In this area, students are introduced to the study of human communication as a process. Emphasis is on examining the role of self-concept, perception, culture, verbal and nonverbal dimensions in the communication process; applying critical listening skills; and developing skills in oral presentations. Depending upon the course, the content focuses on an overview of the principles and practices of interpersonal, small group and public communication, or constructing informative and persuasive speeches with an emphasis on individual public speaking contexts, or constructing informative and persuasive group presentations. Cluster One requires completion of one of three courses offered in human communication.

Choose one of the following:

- SCOM 121. Fundamental Human Communication: Presentations [C1HC] 3.00
- SCOM 122. Fundamental Human Communication: Individual Presentations [C1HC] 3.00
- SCOM 123. Fundamental Human Communication: Group Presentations [C1HC] 3.00

Additional Information

Students who have received credit for one SCOM class are not eligible to receive credit for a second SCOM class.

Writing

In this area, students study the role of the writer, the purpose of documents, and the contexts and audience expectations within which documents are produced. Writing is taught as a process involving invention, collaboration, research and revision. Students read, analyze and create texts in multiple genres using traditional and digital communication tools. Content areas may include public and professional discourse, culture, humanities, and technology.

Complete the following:

- WRTC 103. Rhetorical Reading and Writing [C1W] 3.00

Additional Information

Students may not repeat WRTC 103 for credit.

Information Literacy

Information literacy is the ability to locate, evaluate and use information effectively to accomplish a purpose. Cluster One requires completion of the Madison Research Essentials Test (MREST). All entering students must pass the MREST by the deadline announced by the university. Students not completing the requirement by the deadline will have a hold placed on their academic record until the MREST is passed.

Cluster Three: The Natural World

Dr. Elizabeth T. Brown, **Coordinator**

Scientific investigations into the natural world use analytical methods to evaluate evidence, build and test models based on that evidence, and develop theories. Mathematical studies of form and pattern can create a language that assists in these investigations. Courses in this cluster provide students with the opportunity to develop problem-solving skills in science and mathematics at the college level. Students will be introduced to a substantial body of scientific facts, concepts, models and theories, and they will also gain experience in using basic mathematics to obtain knowledge about the natural world. The cluster is cross disciplinary, thereby demonstrating boundaries and connections among mathematics, the sciences and other aspects of culture.

Typically students begin Cluster Three during their first year and should complete it by the end of their sophomore year. Individual courses satisfy requirements in a number of major and professional programs. Students are encouraged to select appropriate courses in Cluster Three on the basis of their backgrounds, interests and educational objectives.

Cluster Three Learning Objectives

After completing Cluster Three: The Natural World, students should be able to meet the following objectives:

- Describe the methods of inquiry that lead to mathematical truth and scientific knowledge and be able to distinguish science from pseudoscience.
- Use theories and models as unifying principles that help us understand natural phenomena and make predictions.

- Recognize the interdependence of applied research, basic research and technology, and how they affect society.
- Identify the interdependence of natural systems with the social, economic and ethical aspects of global and local issues.
- Use graphical, symbolic and numerical methods to analyze, organize and interpret natural phenomena.
- Discriminate between association and causation, and identify the types of evidence used to establish causation.
- Formulate hypotheses, identify relevant variables and design experiments to test hypotheses.
- Evaluate the credibility, use and misuse of scientific and mathematical information in scientific developments and public-policy issues.

Cluster Three Structure

Cluster Three consists of 10 credits distributed across four areas representing four different aspects of scientific knowledge. Students must take one class that fulfills each of the four areas. Quantitative Reasoning consists of mathematics courses, and Physical Principles and Natural Systems consist of science courses. The groups may be taken in any order, except for courses denoted by an asterisk (*), which have a mathematics and/or science prerequisite or corequisite. In addition, students are required to have at least one lab experience. Certain courses are designed for future teachers, and enrollment in these courses may be limited to IdLS majors; these courses are indicated with a double asterisk (**).

Quantitative Reasoning

Students build mathematical models of systems and learn to understand, interpret and analyze data that is numerical in nature.

Choose one of the following:

- ISAT 151. Topics in Applied Calculus in ISAT [C3QR] 4.00
- ISAT 251. Topics in Applied Statistics in ISAT [C3QR] 3.00
- MATH 103. The Nature of Mathematics [C3QR] 3.00
- MATH 105. Quantitative Literacy and Reasoning [C3QR] 3.00
- MATH 107. Fundamentals of Mathematics I [C3QR] 3.00 **
- MATH 205. Introductory Calculus I [C3QR] 3.00
- MATH 220. Elementary Statistics [C3QR] 3.00
- MATH 231. Calculus with Functions I [C3QR] 3.00
- MATH 235. Calculus I [C3QR] 4.00

Physical Principles

In this area, students study underlying principles of nature. These principles are applied to build models, often quantitative in nature, that explore and explain a variety of natural phenomena.

Choose one of the following:

- ASTR 120. The Solar System [C3PP] 3.00
- ASTR 121. Stars, Galaxies, & Cosmology [C3PP] 3.00
- CHEM 120. Concepts of Chemistry [C3PP] 3.00
- CHEM 131. General Chemistry I [C3PP] 3.00
- ISAT 100. Environmental and Energy Sustainability [C3PP] 3.00
- ISAT 112. Environmental Issues in Science and Technology (2,3) [C3PP] 4.00 (includes lab)
- ISCI 101. Physics, Chemistry & the Human Experience [C3PP] 3.00 *
- ISCI 172. Physical Science for Teachers [C3PP] 3.00 **
- PHYS 121. The Physical Nature of Light and Sound (3, 1) [C3PP] 4.00 (includes lab)

- PHYS 140. College Physics I [C3PP] 3.00 (PHYS 140L required lab corequisite)
- PHYS 215. Energy and the Environment [C3PP] 3.00 *
- PHYS 240. University Physics I [C3PP] 3.00 *

Natural Systems

Students study the behavior of earth and life systems. Students will investigate interactions within these systems, between the systems and their environment, and with society.

Choose one of the following:

- ANTH 196. Biological Anthropology [C3NS] 3.00 (B, R)
- BIO 103. Contemporary Biology (3, 0) [C3NS] 3.00
- BIO 140. Foundations of Biology I (3,3) [C3NS] 4.00
- BIO 222. Interdisciplinary Biology for Engineering and Physical Sciences (3,0) [C3NS] 3.00
- BIO 270. Human Physiology (3, 2) [C3NS] 4.00 (includes lab) *
- GEOL 102. Environment: Earth [C3NS] 3.00
- GEOL 115. Earth Systems and Climate Change [C3NS] 3.00
- GEOL 110. Physical Geology [C3NS] 3.00 (GEOL 110L required lab corequisite)
- GEOL 210. Applied Physical Geology [C3NS] 3.00 *
- GEOL 211. Introduction to Oceanography [C3NS] 3.00
- ISAT 113. Biotechnology Issues in Science and Technology (2,2) [C3NS] 4.00
- ISCI 171. Earth and Planetary Science for Teachers [C3NS] 3.00 **
- PSYC 122. The Science of Vision and Audition [C3NS] 3.00

Lab Experience

This area emphasizes the observational and experimental nature of science. Through hands-on experiential learning, students will make observations and use them to test predictions and hypotheses.

Choose one of the following:

- Physical Principles course with a lab
- Natural Systems course with a lab
- ISCI 104. Scientific Perspectives [C3L] 1.00
- ISCI 173. Life and Environmental Science for Teachers [C3L] 3.00 **

Cluster Two: Arts and Humanities

Dr. Dennis Beck, **Coordinator**

Cluster Two shows students what it means to live lives enriched by reflection, imagination and creativity. It does so by offering each individual a cross disciplinary experience within the arts and humanities, those areas of endeavor that humans have long valued for their intrinsic worth and that invite a deeper appreciation of the human experience. The broadly stated goals for Cluster Two are:

- To introduce students to cultural, historical, aesthetic and theoretical expressions of and questions about human experience.
- To expose students to multiple academic disciplines in the arts and humanities and their methods and unique perspectives.

- To inspire a deeper awareness of how the interplay between culture and expression affects both collective and individual identities.
- To foster appreciation of the aesthetic and formal qualities of literary, visual and performing arts.
- To engage students in thinking critically and communicating clearly about enduring questions concerning human life, culture and history.

Cluster Two Learning Objectives

After completing Cluster Two: Arts and Humanities, students should have attained competency in three major areas.

Human Questions and Contexts

After completing Group One, students will be able to:

- Use critical and comparative analysis to question their own and others' beliefs about and responses to the world or universe.
- Apply the methods of the discipline(s) studied to material from the humanities.
- Identify, evaluate and produce arguments using appropriate concepts and techniques and formulate logical arguments on the same basis.
- Demonstrate an understanding of broader cultural, historical or conceptual contexts of particular issues, ideas, objects or events – past and present.
- Experience humanities events (such as exhibits, films, performances or public lectures) more discerningly.

Visual and Performing Arts

After completing Group Two, students will be able to:

- Explain how artistic works and culture are interrelated.
- Recognize that the arts are accessible and relevant to their lives.
- Demonstrate disciplinary literacy (vocabulary, concepts, creative processes) in a major art form.
- Produce an informed response to the form, content and aesthetic qualities of artistic works.
- Experience arts events more discerningly.
- Acknowledge relationships among the arts.

Literature

After completing Group Three, students will be able to:

- Generate increasingly nuanced questions (interpretations, ideas) about literature and explain why those questions matter.
- Use appropriate vocabulary and tactics to analyze specific literary expressions of culture and the relationship between the reader, the author and text.
- Define ways that texts serve as arguments and identify rhetorical and formal elements that inform these arguments.
- Recognize appropriate contexts (such as genres, political perspectives, textual juxtapositions) and understand that readers may interpret literature from a variety of perspectives.
- Articulate a variety of examples of the ways in which literature gives us access to the human experience that reveals what differentiates it from, and connects it to, the other disciplines that make up the arc of human learning.

Cluster Two Structure

Students complete nine credits by choosing one course from each of three groups: Human Questions and Contexts; Visual and Performing Arts; and Literature.

Group One: Human Questions and Contexts

Students will take one course from the list below. AMST 200 takes a cross disciplinary approach to questions about American identity and shows how they reflect a complex interplay of cultural, historical, religious and ideological perspectives. The ANTH and HIST courses introduce students to the great cultures of the world by surveying the common patterns of experience that characterized Western, Middle Eastern, Asian, African, Meso- and South American societies in the past. The HUM courses are cross disciplinary, in-depth explorations of specific topics, cultures, periods or themes. The PHIL and REL courses explore the great inquiries into human existence and the ways different cultures across different time periods constructed their responses to questions concerning humans' existence and their relationship to nature, ultimate reality and the universe. Thus all of the courses in Group One emphasize central questions about the human condition and ways of studying values and beliefs as they are shaped by class, gender, race, historical events, philosophy and religion.

Choose one of the following:

- AMST 200. Introduction to American Studies [C2HQC] 3.00
- ANTH 205. Buried Cities, Lost Tribes: The Rise and Fall of Early Human Societies [C2HQC] 3.00 (A)
- HIST 101. World History to 1500 [C2HQC] 3.00
- HIST 102. World History Since 1500 [C2HQC] 3.00
- HUM 250. Foundations of Western Culture [C2HQC] 3.00 (Topics vary by section. Examples include: Ancient Greece, Rome)
- HUM 251. Modern Perspectives [C2HQC] 3.00 (Topics vary by section. Examples include: The Enlightenment, Romanticism, and Italian Society and Culture after WWII)
- HUM 252. Global Cultures [C2HQC] 3.00 (Topics vary by section. Examples include: East Asia, West Africa, Latin American Cultures, Islamic Civilization)
- PHIL 101. Introduction to Philosophy [C2HQC] 3.00
- REL 101. Religions of the World [C2HQC] 3.00
- REL 102. God, Meaning & Morality [C2HQC] 3.00

Group Two: Visual and Performing Arts

Students will take one course from the list below. ARTH 205 and ARTH 206 are global art history surveys that introduce students to the visual arts, whose history often has been interconnected with developments in music, dance and theatre/film. These surveys are organized chronologically, but focus distinctly on artistic perception and experience. The global music surveys explore history and the arts through the study of music: its development, aesthetics, forms and styles; and its context within the cultural communities that produced it. ART 200 and MUS 200 are introductions to art or music in general culture; THEA 210 studies theatre as an art form including acting, directing, design, costuming and lighting; MUS 203 explores America's music landscape and examines the interconnections among music, art and literature in historical periods.

Choose one of the following:

- ART 200. Art in General Culture [C2VPA] 3.00
- ARTH 205. Survey of World Art I: Prehistoric to Renaissance [C2VPA] 3.00
- ARTH 206. Survey of World Art II: Renaissance to Modern [C2VPA] 3.00
- MUS 200. Music in General Culture [C2VPA] 3.00

- MUS 203. Music in America [C2VPA] 3.00
- MUS 206. Introduction to Global Music [C2VPA] 3.00
- THEA 210. Introduction to Theatre [C2VPA] 3.00

Group Three: Literature

Students will choose a course from the list below. The literature surveys provide students with extensive reading experiences of representative genres and authors and various critical approaches to literary texts, as well as opportunities to explore the complex ways that the literature both reflects and helps change or create the cultural and intellectual contexts of the times in which they are written. Students are expected to learn strategies for reading and interpreting any literary text so that they come to deepen their appreciation of the aesthetics, rhetorical strategies and meaning of a range of literary texts. Through the humanistic study of literature, students will also obtain a better understanding of themselves and their own culture as well as those of others.

Choose one of the following:

- ENG 221. Literature/Culture/Ideas [C2L] 3.00
- ENG 222. Genre(s) [C2L] 3.00
- ENG 235. Survey of English Literature: From Beowulf to the Eighteenth Century [C2L] 3.00
- ENG 236. Survey of English Literature: Eighteenth Century to Modern [C2L] 3.00
- ENG 239. Studies in World Literature [C2L] 3.00
- ENG 247. Survey of American Literature: From the Beginning to the Civil War [C2L] 3.00
- ENG 248. Survey of American Literature: From the Civil War to the Modern Period [C2L] 3.00
- ENG 260. Survey of African-American Literature [C2L] 3.00
- HUM 200. Great Works [C2L] 3.00 (Topics vary by section. Examples include: The American Century, 19th and 20th Century Russian Literature, Western Classics, Utopias, Distopias)

Literature and Writing Infusion

The courses in Group Three are designated as writing-infused. Students will write a minimum of 5,000 words (approximately 15 pages double-spaced in a standard font) in assignments that may include both informal and formal, ungraded and graded forms. The extensive opportunity to produce and receive feedback on various genres of academic writing will help students sharpen their responses to interesting and thought-provoking texts and promote more engaged and sophisticated reading strategies.

Economics, Environmental and Natural Resource Economics Concentration, B.A.; B.B.A.; B.S.

Required Courses

- ECON 200. Introduction to Macroeconomics [C4GE] 3.00
- ECON 201. Introduction to Microeconomics 3.00
- ECON 305. Environmental Economics 3.00
- ECON 331. Intermediate Microeconomic Theory 3.00
- ECON 332. Intermediate Macroeconomic Theory 3.00
- ECON 340. Economics of Natural Resources 3.00
- ECON 385. Econometrics 3.00
- One 200- or 300-level economics elective 3 Credit Hours
- Two 400-level economics elective 6 Credit Hours
- ECON 488. Senior Capstone Seminar in Economics 3.00

- ECON 490. Special Studies in Economics 1.00 - 3.00
- (1 Credit ECON 490 is required)

Total: 34 Credit Hours

Option A or Option B

In addition, students must choose Option A or Option B.

Option A

For students with specific interests in forests, fisheries and wildlife: *12 Credit Hours*

- BIO 140. Foundations of Biology I (3,3) [C3NS] 4.00
- Choose one of the following (serves as the prerequisite to BIO 250):
- BIO 150. Foundations of Biology II (3,3) 4.00
- GEOL 110. Physical Geology [C3NS] 3.00 plus GEOL 110L. Physical Geology Laboratory [C3NS] 1.00
- GEOG 210. Physical Geography (2, 2) 4.00
- ISAT 112. Environmental Issues in Science and Technology (2,3) [C3PP] 4.00
- BIO 250. Quantitative Ecology and Evolution (3,3) 4.00

Total: 46 Credit Hours

Option B

For students interested in pollution prevention and control: *9-10 Credit Hours*

Choose one of the following: (3-4 credits)

- ISAT 112. Environmental Issues in Science and Technology (2,3) [C3PP] 4.00
- GEOL 115. Earth Systems and Climate Change [C3NS] 3.00
- GEOG 210. Physical Geography (2, 2) 4.00

Choose one of the following: (3 credits)

- GEOG 325. Environmental Ethics 3.00
- GEOG 429. Sustainability: An Ecological Perspective 3.00
- or
- ISAT 429. Sustainability: An Ecological Perspective 3.00

Choose one of the following: (3-4 credits)

- ISAT 320. Fundamentals of Environmental Science & Technology I 4.00
- ISAT 321. Fundamentals of Environmental Science & Technology II 3.00

Total: 43-44 Credit Hours

Economics, Financial Economics Concentration, B.A.; B.B.A.; B.S.

Concentration in Financial Economics

The minimum requirement for a B.A., B.S. or B.B.A. degree in economics with a concentration in financial economics is 27 credit hours of required economics courses and 12 credit hours of required finance courses (in addition to previous requirements).

Required Courses

- ECON 200. Introduction to Macroeconomics [C4GE] 3.00
- ECON 201. Introduction to Microeconomics 3.00
- ECON 331. Intermediate Microeconomic Theory 3.00
- ECON 332. Intermediate Macroeconomic Theory 3.00
- ECON 372. International Finance and Payments 3.00
- ECON 385. Econometrics 3.00
- ECON 430. Monetary Theory 3.00
- ECON 488. Senior Capstone Seminar in Economics 3.00
- Economics elective (400 level, not including ECON 490, ECON 499A) 3 Credit Hours
- FIN 301. Principles of Finance 3.00 (only if not completing COB 300)
- FIN 360. Analytical Methods in Finance 3.00
- FIN 371. Principles of Investments 3.00
- FIN 380. Elemental and Derivative Securities Analysis 3.00

Total: 36-39 Credit Hours

Economics, International Economics Concentration, B.A.; B.B.A.; B.S.

Concentration in International Economics

Students who elect a major in economics with a concentration in international economics are required to complete the following courses:

Required International Economics Courses

- ECON 200. Introduction to Macroeconomics [C4GE] 3.00
- ECON 201. Introduction to Microeconomics 3.00
- ECON 331. Intermediate Microeconomic Theory 3.00
- ECON 332. Intermediate Macroeconomic Theory 3.00
- ECON 370. International Trade and Trade Policies 3.00

- ECON 372. International Finance and Payments 3.00
or
- FIN 372. International Finance and Payments 3.00

- ECON 385. Econometrics 3.00

- ECON 488. Senior Capstone Seminar in Economics *3.00*

Choose two of the following: 6 Credit Hours

- ECON 312. Comparative Economic Systems *3.00*
- ECON 365. Economic Development *3.00*

Two 400-level economics electives: 6 Credit Hours

Total: 36 Credit Hours

Additional Information

In addition, students completing this course of study must have a genuine international experience (such as an internship or semester abroad) and must complete a foreign language through the civilization course, including all of the prerequisites for that course.

Economics, Political Economy Concentration, B.A.; B.B.A.; B.S.

Concentration in Political Economy

Students who elect a major in economics with a concentration in political economy are required to complete the following courses.

Required Political Economics Courses

- ECON 200. Introduction to Macroeconomics [C4GE] *3.00*
- ECON 201. Introduction to Microeconomics *3.00*
- ECON 331. Intermediate Microeconomic Theory *3.00*
- ECON 332. Intermediate Macroeconomic Theory *3.00*
- ECON 385. Econometrics *3.00*
- ECON 488. Senior Capstone Seminar in Economics *3.00*

Choose four of the following: 12 Credit Hours

- ECON 312. Comparative Economic Systems *3.00*
- ECON 326. Public Finance *3.00*
- ECON 327. Game Theory *3.00*
- ECON 405. Political Economy *3.00*
- ECON 426. Theory of Public Choice *3.00*

Two 400-level economics electives: 6 Credit Hours

(Can include ECON 405 and/or ECON 426)

Total: 36 Credit Hours

Economics, Quantitative Economics Concentration B.A.; B.B.A.; B.S.

Concentration in Quantitative Economics

The Concentration in Quantitative Economics will consist of a combination of three courses offered by the Economics Department that develop the students' quantitative skills. Completion of the concentration will help signal the students' quantitative abilities as well as interests to prospective employers.

- ECON 384. Mathematical Economics 3.00

Choose two of the following three options (six credits):

- ECON 483. Applied Time Series Analysis 3.00
- ECON 485. Advanced Econometrics 3.00

- ECON 431. Advanced Microeconomic Theory 3.00
or
- ECON 432. Advanced Macroeconomics 3.00
(Credit may be received for either ECON 431 or ECON 432, but not both)

Economics, Socioeconomics Concentration, B.A.; B.B.A.; B.S.

Concentration in Socioeconomics

Students who elect a major in economics with a concentration in socioeconomics are required to complete the following courses.

Required Economics Courses

- ECON 200. Introduction to Macroeconomics [C4GE] 3.00
- ECON 201. Introduction to Microeconomics 3.00
- ECON 331. Intermediate Microeconomic Theory 3.00
- ECON 332. Intermediate Macroeconomic Theory 3.00
- ECON 385. Econometrics 3.00
- ECON 488. Senior Capstone Seminar in Economics 3.00
- Two 400-level economics electives 6 Credit Hours

Total: 24 Credit Hours

Economics Electives

Choose four of the following: 12 Credit Hours

- ECON 340. Economics of Natural Resources 3.00
- ECON 360. Labor Economics 3.00
- ECON 365. Economic Development 3.00

- ECON 382. Urban Economics 3.00

Choose four of the following: 12 Credit Hours

- ANTH 195. Cultural Anthropology [C4GE] 3.00 (C, R)
- SOCI 336. Race and Ethnicity 3.00

- SOCI 348. Introduction to Developing Societies 3.00
or
- SOWK 348. Introduction to Developing Societies 3.00

- SOCI 337. Sociology of Gender 3.00
- SOCI 344. Work and Society 3.00
- SOCI 358. Sociology of Consumption 3.00
- HIST 320. Women in U.S. History 3.00
- HIST 428. American Workers in the Industrial Age, 1877-1948 3.00
- HIST 466. The Family, 1400-1800 3.00

Total: 45-48 Credit Hours

General Education: The Human Community

Dr. Margaret M. Mulrooney, **Associate Vice Provost for University Programs**

Mission Statement

In the liberal arts tradition, General Education: The Human Community aspires to create informed global citizens of the 21st century. We challenge our community of students and faculty to engage in personal and collective reflection, development, and action.

Philosophy

General Education: The Human Community is the core academic program of James Madison University in which students come to understand how distinct disciplines look at the world from different vantage points. Courses in The Human Community are organized into five clusters, each emphasizing unique tools, rationales and methodologies. Taken together, courses in a student's chosen major and The Human Community complement and complete each other. Both are integral and essential components of a student's full and proper education.

Goals

Students understand the historical and contemporary distinctions and interconnections among people, institutions and communities that create, preserve and transmit culture and knowledge in the arts, sciences, mathematics, social sciences and humanities.

Students become skilled in questioning, investigating, analyzing, evaluating and communicating.

Students participate in a variety of aesthetic and civic experiences reflecting human concerns and values that transcend the limits of specialization.

Structure

The Human Community credit hour requirements are:

Cluster Credit Hours

Cluster One: Skills for the 21st Century 9 Credit Hours

Cluster Two: Arts and Humanities 9 Credit Hours

Cluster Three: The Natural World 10 Credit Hours

Cluster Four: Social and Cultural Processes 7 Credit Hours

Cluster Five: Individuals in the Human Community 6 Credit Hours

Total: 41 Credit Hours

General Education Courses

General Education Cluster Areas	Search Code
Cluster One: Critical Thinking	C1CT
Cluster One: Human Communication	C1HC
Cluster One: Writing	C1W
Cluster Two: Human Questions and Contexts	C2HQC
Cluster Two: Visual and Performing Arts	C2VPA
Cluster Two: Literature	C2L
Cluster Three: Quantitative Reasoning	C3QR
Cluster Three: Physical Principles	C3PP
Cluster Three: Natural Systems	C3NS
Cluster Four: The American Experience	C4AE
Cluster Four: The Global Experience	C4GE

Cluster Five: Wellness	C5W
Cluster Five: Sociocultural Dimension	C5SD

Cluster One: Skills for the 21st Century Courses

Critical Thinking

- BUS 160. Business Decision Making in a Modern Society [C1CT] 3.00
- HIST 150. Critical Issues in Recent Global History [C1CT] 3.00
- ISAT 160. Problem Solving Approaches in Science and Technology [C1CT] 3.00
- PHIL 120. Critical Thinking [C1CT] 3.00
- PHIL 150. Ethical Reasoning [C1CT] 3.00
- SMAD 150. Mediated Communication: Issues and Skills [C1CT] 3.00

Human Communication

- SCOM 121. Fundamental Human Communication: Presentations [C1HC] 3.00
- SCOM 122. Fundamental Human Communication: Individual Presentations [C1HC] 3.00
- SCOM 123. Fundamental Human Communication: Group Presentations [C1HC] 3.00

Writing

- WRTC 103. Rhetorical Reading and Writing [C1W] 3.00

Cluster Two: Arts and Humanities Courses

Human Questions and Contexts

- AMST 200. Introduction to American Studies [C2HQC] 3.00
- ANTH 205. Buried Cities, Lost Tribes: The Rise and Fall of Early Human Societies [C2HQC] 3.00 (A)
- HIST 101. World History to 1500 [C2HQC] 3.00
- HIST 102. World History Since 1500 [C2HQC] 3.00
- HUM 250. Foundations of Western Culture [C2HQC] 3.00
- HUM 251. Modern Perspectives [C2HQC] 3.00
- HUM 252. Global Cultures [C2HQC] 3.00
- PHIL 101. Introduction to Philosophy [C2HQC] 3.00
- REL 101. Religions of the World [C2HQC] 3.00
- REL 102. God, Meaning & Morality [C2HQC] 3.00

Visual and Performing Arts

- ART 200. Art in General Culture [C2VPA] 3.00
- ARTH 205. Survey of World Art I: Prehistoric to Renaissance [C2VPA] 3.00
- ARTH 206. Survey of World Art II: Renaissance to Modern [C2VPA] 3.00

- MUS 200. Music in General Culture [C2VPA] 3.00
- MUS 203. Music in America [C2VPA] 3.00
- MUS 206. Introduction to Global Music [C2VPA] 3.00
- THEA 210. Introduction to Theatre [C2VPA] 3.00

Literature

- ENG 221. Literature/Culture/Ideas [C2L] 3.00
- ENG 222. Genre(s) [C2L] 3.00
- ENG 235. Survey of English Literature: From Beowulf to the Eighteenth Century [C2L] 3.00
- ENG 236. Survey of English Literature: Eighteenth Century to Modern [C2L] 3.00
- ENG 239. Studies in World Literature [C2L] 3.00
- ENG 247. Survey of American Literature: From the Beginning to the Civil War [C2L] 3.00
- ENG 248. Survey of American Literature: From the Civil War to the Modern Period [C2L] 3.00
- ENG 260. Survey of African-American Literature [C2L] 3.00
- HUM 200. Great Works [C2L] 3.00

Cluster Three: The Natural World Courses

Quantitative Reasoning

Students build mathematical models of systems and learn to understand, interpret and analyze data that is numerical in nature.

- ISAT 151. Topics in Applied Calculus in ISAT [C3QR] 4.00
- ISAT 251. Topics in Applied Statistics in ISAT [C3QR] 3.00
- MATH 103. The Nature of Mathematics [C3QR] 3.00
- MATH 105. Quantitative Literacy and Reasoning [C3QR] 3.00
- MATH 107. Fundamentals of Mathematics I [C3QR] 3.00
- MATH 205. Introductory Calculus I [C3QR] 3.00
- MATH 220. Elementary Statistics [C3QR] 3.00
- MATH 229. Introduction to Applied Statistics Using R [C3QR] 3.00
- MATH 231. Calculus with Functions I [C3QR] 3.00
- MATH 233. Calculus with Modeling I [C3QR] 3.00
- MATH 235. Calculus I [C3QR] 4.00

Physical Principles

In this area, students study underlying principles of nature. These principles are applied to build models, often quantitative in nature, that explore and explain a variety of natural phenomena.

- ASTR 120. The Solar System [C3PP] 3.00
- ASTR 121. Stars, Galaxies, & Cosmology [C3PP] 3.00
- CHEM 120. Concepts of Chemistry [C3PP] 3.00
- CHEM 131. General Chemistry I [C3PP] 3.00
- ISAT 100. Environmental and Energy Sustainability [C3PP] 3.00
- ISAT 112. Environmental Issues in Science and Technology (2,3) [C3PP] 4.00
- ISCI 101. Physics, Chemistry & the Human Experience [C3PP] 3.00
- ISCI 172. Physical Science for Teachers [C3PP] 3.00
- PHYS 121. The Physical Nature of Light and Sound (3, 1) [C3PP] 4.00

- PHYS 140. College Physics I [C3PP] 3.00
- PHYS 215. Energy and the Environment [C3PP] 3.00
- PHYS 240. University Physics I [C3PP] 3.00

Natural Systems

Students study the behavior of earth and life systems. Students will investigate interactions within these systems, between the systems and their environment, and with society.

- ANTH 196. Biological Anthropology [C3NS] 3.00 (*B, R*)
- BIO 103. Contemporary Biology (3, 0) [C3NS] 3.00
- BIO 140. Foundations of Biology I (3,3) [C3NS] 4.00
- BIO 222. Interdisciplinary Biology for Engineering and Physical Sciences (3,0) [C3NS] 3.00
- BIO 270. Human Physiology (3, 2) [C3NS] 4.00
- GEOL 102. Environment: Earth [C3NS] 3.00
- GEOL 110. Physical Geology [C3NS] 3.00
- GEOL 115. Earth Systems and Climate Change [C3NS] 3.00
- GEOL 210. Applied Physical Geology [C3NS] 3.00
- GEOL 211. Introduction to Oceanography [C3NS] 3.00
- ISAT 113. Biotechnology Issues in Science and Technology (2,2) [C3NS] 4.00
- ISCI 171. Earth and Planetary Science for Teachers [C3NS] 3.00
- PSYC 122. The Science of Vision and Audition [C3NS] 3.00

Lab Experience

This area emphasizes the observational and experimental nature of science. Through hands-on experiential learning, students will make observations and use them to test predictions and hypotheses.

- Physical Principles course with a lab
- Natural Systems course with a lab
- ISCI 104. Scientific Perspectives [C3L] 1.00
- ISCI 173. Life and Environmental Science for Teachers [C3L] 3.00

Cluster Four: Social and Cultural Processes Courses

The American Experience

- HIST 225. U.S. History [C4AE] 4.00
- JUST 225. Justice and American Society [C4AE] 4.00
- POSC 225. U.S. Government [C4AE] 4.00

The Global Experience

- ANTH 195. Cultural Anthropology [C4GE] 3.00 (*C, R*)
- ECON 200. Introduction to Macroeconomics [C4GE] 3.00
- GEOG 200. Geography: The Global Dimension [C4GE] 3.00
- POSC 200. Global Politics [C4GE] 3.00
- SOCI 110. Social Issues in a Global Context [C4GE] 3.00

Cluster Five: Individuals in the Human Community Courses

Wellness Domain

- HTH 100. Personal Wellness [C5W] 3.00
- KIN 100. Lifetime Fitness & Wellness (2,2) [C5W] 3.00

Sociocultural Domain

- PSYC 101. General Psychology [C5SD] 3.00
- PSYC 160. Life Span Human Development [C5SD] 3.00
- SOCI 140. Microsociology: The Individual in Society [C5SD] 3.00
- WGSS 200. Introduction to Women's, Gender and Sexuality Studies [C5SD] 3.00

Writing, Rhetoric and Technical Communication, School of

Prof. Michael Smith, Director

Mission Statement

The College of Arts and Letters serves multiple vital needs of JMU students. First, it offers high-quality programs of specialized study in the social sciences, humanities and communication, and in several pre-professional and cross disciplinary areas. Second, the college provides a challenging array of courses designed to promote lifelong learning by sharpening analytical abilities; improving computational and communications skills; cultivating a facility with written expression; enhancing cultural awareness, intensifying moral and aesthetic sensitivity, and fostering awareness of the contingent nature of knowledge. Linking these two missions is a college-wide commitment to free but rigorous and controlled inquiry into human nature.

Goals

In addition to the special goals of each major, all programs in the college are committed to helping the students achieve the following common objectives:

- Improve foundational skills fostered by general education courses: writing, critical thinking, information access through technology and, where appropriate, foreign languages.
- Develop the ability to use writing to acquire knowledge and to communicate ideas effectively through writing-intensive courses required in the major.
- Enrich cultural perspectives essential to effective citizenship in the 21st century, global awareness and appreciation of American cultural diversity.
- Provide significant active-learning experiences through field courses, research projects, internships, studies abroad and simulations.

Majors and Minors

Students may select from a broad spectrum of major and minor programs in the seven departments and three schools. The departments and schools fully describe their programs in the "Academic Units" section.

Cross Disciplinary Activities

In addition to departmental majors and minors, the college offers a wide array of interdepartmental majors, minors, pre-professional programs, general education courses, annual events and supporting services, some of which reach out to the regional community. Information on cross disciplinary programs offered by the College of Arts and Letters may be found in the "Cross Disciplinary Programs" section.

Pre-professional Programs

Pre-law

Dr. Melinda Adams, Coordinator

Phone: (540) 568-3377

Email: adams2mj@jmu.edu

Students who plan to apply to law school may select their major from a wide range of fields, depending upon their interests. The scope of the law is broad and offers room for individuals of varied educational and intellectual backgrounds. Students should choose courses that provide them with broad informational and cultural preparation and develop their reasoning abilities.

Especially valuable to a pre-law program are courses in:

- Communication, including composition, language and speech, which enable students to express themselves well.
- The humanities and social sciences, which help students to appreciate and perform effectively in their culture and society.
- Logic, mathematics and the natural sciences, which develop skills of fact discrimination, analysis and synthesis.
- Accounting and economics.

Also important to the pre-law program is Phi Alpha Delta, a student organization that organizes law-related activities.

Pre-theological Studies

Dr. Robert Brown, Coordinator

Phone: (540) 568-5415

Email: brownre@jmu.edu

Students join the pre-theology program to prepare for careers in the service of religious communities. Usually, these careers—such as ministry, religious education, counseling and chaplaincy—require specialized training and graduate degrees from theological seminaries, rabbinical schools or university divinity schools. The pre-theology adviser guides students toward courses and experiential learning at JMU that will provide an academic foundation for graduate studies in theology as well as an opportunity to develop their practical skills or vocational gifts. Students in this program may major in any field, although the Association for Theological Schools recommends substantial pre-professional training in philosophy and religion.

In the Department of Philosophy and Religion, pre-theology students will find a robust offering of courses ranging from the interpretation of religious texts to theology and ethics, and from the histories of particular religious traditions to cross-cultural topics in global religion. Class assignments develop students' skills in critical thinking, ethical reasoning, scriptural hermeneutics, and written and oral communication, all of which theological schools highly value. The pre-theology adviser may direct students to relevant courses in foreign languages, social work, non-profit studies, humanitarian affairs, education or justice studies to complement their academic training in religion. Qualified students are encouraged to undertake independent studies or write honors theses in order to explore in greater depth the theological topics most important to them.

The department also offers students the opportunity to receive academic credit for practical supervised field work with social agencies and religious organizations in order to help students explore the particular forms of religious service they would like to pursue. Making connections with faith leaders within their own traditions helps students access larger networks of tradition-specific resources and contacts as they reflect on their goals and decide where to apply for further study in theology. We encourage students to visit various theological schools during the application season and to meet with representatives that the department invites to campus to discuss theology programs with students.

Resource and Service Centers

Archaeology Collection

Dr. Carole Nash, Coordinator

Phone: (540) 568-6805

Email: nashcl@jmu.edu

The archaeology collection contains artifacts dating from early in prehistory through the modern era that were excavated from numerous Virginia archaeological sites. It also includes an extensive library of site reports, field records, maps and artifact identification guides. Artifact study collections spanning the 12,000 year occupation of Virginia's Ridge and Valley Province are being developed for teaching and research purposes. The collection is an important teaching and research asset of the Department of Sociology and Anthropology.

Center for Public Broadcasting/ WMRA-WEMC

Mr. Matt Bingay, Director

Phone: (540) 568-6221

Email: wmra@jmu.edu

Website: <http://www.wmra.org>

The Center for Public Broadcasting's mission is to inform, connect and engage communities through journalism, broadcasting and outreach. It serves over 50,000 listeners in the Shenandoah Valley, Charlottesville and Farmville areas.

The center comprises a network of non-commercial public radio stations, serving Harrisonburg at 90.7 FM, Charlottesville at 103.5 FM, Lexington at 89.9 FM and Winchester at 94.5 FM, and one standalone station, WEMC, serving Harrisonburg at 91.7 FM. The WMRA network stations are licensed to the James Madison University Board of Visitors. WEMC is licensed to Eastern Mennonite University, but is operated entirely by the center. Much of WMRA's programming is rebroadcast by WMLU 91.3 FM, the station owned by Longwood University in Farmville, Virginia. WMRA and WEMC are members of National Public Radio, and are affiliated with Public Radio International and American Public Media. The stations broadcast 24 hours per day year-round, offering extensive in-depth news coverage and classical, folk, blues and jazz music. The center also operates Valley Voice Radio Reading Service for the print-impaired. Listeners and local businesses contribute nearly three-quarters of the center's annual budget.

Annual Events

Conference on Global Issues

Dr. Giuliana Fazzion

Phone: (540) 568-6068

Email: fazziogx@jmu.edu

The Department of Foreign Languages, Literatures and Cultures organizes a yearly conference on global issues, held in the spring. The conference brings together scholars and researchers from a variety of disciplines to address and assess specific global issues, issuing a call for papers in the fall on an announced topic. Proposals for papers, panels and workshops should be sent to the coordinator.

Madison Writing Awards

Madison Writing Awards (MWA) is a university-wide biennial competition that celebrates writing across the curriculum in all undergraduate academic programs. Winners are recognized at a spring awards reception and the top papers receive generous cash prizes. These awards reflect the commitment of the School of Writing, Rhetoric and Technical Communication and the College of Arts and Letters to promote crossdisciplinary dialogue and engagement as well as to acknowledge the power of writing in all its forms and contexts.

MadRush

Dr. Chris Arndt
Phone: (540) 568-3993
Email: arndtjc@jmu.edu

The MadRush Undergraduate Research Conference features outstanding work by undergraduate humanities and social science majors. Held every spring, it attracts students from across the eastern United States and has become one of the largest humanities and social science undergraduate research conferences in the region.

Mission Statement

The JMU College of Business is a learning community committed to excellence in:

- Preparing students to be engaged, principled business professionals and leaders;
- Advancing scholarship in business disciplines; and
- Enhancing organizational performance through our outreach activities.

Vision Statement

To be regarded as a leader in preparing collaborative business partners engaged with ideas and the world.

Values

Integrity: We are a community dedicated to honesty, mutual respect, ethical reasoning and responsible behavior.

Intellectual Growth: We value academic excellence achieved through the intellectual curiosity and growth of both faculty and students, and through the creation and maintenance of a challenging and rigorous learning environment that encourages critical thinking and life-long learning.

Community: We value a supportive, inclusive culture where diverse ideas, backgrounds, and experiences strengthen our community, contributing to a global and multi-cultural mindset.

Engagement: We value an engaged, active learning environment inside and outside the classroom. We enrich the student experience through mutually beneficial internal and external relationships.

Innovation/Collaboration: We value initiative, creativity, collaboration and entrepreneurial spirit. We promote new ideas and solutions that advance intellectual growth and have a positive impact.

Overview

The College of Business offers baccalaureate degree programs leading to a Bachelor of Business Administration (B.B.A.), a Bachelor of Arts (B.A.) and a Bachelor of Science (B.S.). All degree programs offered by the College of Business are accredited by AACSB International – The Association to Advance Collegiate Schools of Business. The following academic majors are offered as a B.B.A.: accounting, computer information systems, economics, finance, international business, management and marketing. Students may also earn a B.A. degree or B.S. degree in economics. Quantitative finance is offered as a B.S. degree. The B.B.A. degree is comprised of essentially the same general structure, consisting of the four components shown below:

- General Education component
- B.B.A. core component
- Major component
- Electives.

General Education Component

General Education is required of all students regardless of their major or professional program. While much of the general education component of a student's baccalaureate program is completed during the first two years of study, a student has four years to complete this component.

B.B.A. Core Component

B.B.A. majors must complete all of the B.B.A. core components as part of their degree program. The following courses comprise the B.B.A. Lower-Level Core Component:

- COB 191. Business Analytics I (3 credits) ¹
- COB 202. Interpersonal Skills (3 credits)
- COB 204. Computer Information Systems (3 credits)
- COB 241. Financial Accounting (3 credits)
- COB 291. Business Analytics II (3 credits) ²
- ECON 200. Introduction to Macroeconomics (3 credits)
- ECON 201. Introduction to Microeconomics (3 credits)
- MATH 205. Introductory Calculus or MATH 235. Calculus I [C3QR] (3-4 credits) ³
- COB 242. Managerial Accounting (3 credits) ^{4,5}

The following courses comprise the B.B.A. Upper-Level Core Component:

- COB 300A. Integrative Business: Management (3 credits) ^{5,6}
- COB 300B. Integrative Business: Finance (3 credits) ^{5,6}
- COB 300C. Integrative Business: Operations (3 credits) ^{5,6}
- COB 300D. Integrative Business: Marketing (3 credits) ^{5,6}
- COB 318. Legal and Ethical Environment of Business (3 credits)
- COB 487. Strategic Management (3 credits) ⁷

¹ MATH 220 may be substituted for COB 191.

² COB 191 or equivalent and MATH 205 or equivalent are prerequisites for COB 291.

³ Calculus is required but not used in calculating the B.B.A. core GPA. MATH 235 is preferred for Finance majors.

⁴ COB 241 must be taken before COB 242.

⁵ COB 242 is a prerequisite for COB 300 and is not used in calculating the B.B.A. core GPA. COB 242 is a prerequisite for COB 300 for students taking COB 300 in Antwerp.

⁶ All four COB 300 courses must be taken during the same semester.

⁷ COB 300 is a prerequisite or corequisite for COB 318. COB 318 is a prerequisite for COB 487.

⁸ COB 487 must be taken during the senior year.

Major Component

The seven B.B.A. majors offered by the College of Business consist of 24-33 credit hours. Students pursuing a B.B.A. degree may take major courses after being formally admitted into the college, and after they have enrolled/completed COB 300. The major program component of the B.B.A. degree is designed to be completed in three traditional semesters after COB 300. Therefore, students should plan their course work with that timetable in mind.

Admission into the College of Business permits a student to enroll in COB 300 and to be formally admitted as a business B.B.A. major. However, some majors in the college may have standards that exceed those of the college as a whole. Hence, a student must meet both the College of Business requirements and the requirements of the major in which the student seeks to enroll.

Refer to the appropriate sections of the catalog for specific degree requirements for the individual majors in the College of Business.

Recommended Course Sequence

In order to remain on a four-year graduation track, students should follow the recommended course sequence shown below.

Courses to be Completed During the First Year

- COB 191. Business Analytics I (3 credits)¹
- COB 204. Computer Information Systems (3 credits)
- ECON 200. Introduction to Macroeconomics (3 credits)
- ECON 201. Introduction to Microeconomics (3 credits)
- MATH 205. Introductory Calculus I or MATH 235. Calculus I [C3QR] (3-4 credits)

¹ MATH 220 may be substituted for COB 191.

Courses to be Completed During the Sophomore Year

- COB 202. Interpersonal Skills (3 credits)
- COB 241. Financial Accounting (3 credits)
- COB 242. Managerial Accounting (3 credits)
- COB 291. Business Analytics II (3 credits)

Progression Standards for the College of Business¹

Any student admitted to JMU can declare any major offered by the College of Business. Students are not formally admitted into the College of Business until certain requirements are met. Requirements to continue pursuing a B.B.A. degree are described below.

Students are formally admitted into the College of Business as a B.B.A. major and permitted to register for COB 300 when the following requirements are met:

- Submission of a completed application for admission into the College of Business is submitted to the COB Academic Success Center according to the schedule shown below.
 - November 1 for the upcoming spring semester
 - February 15 for the upcoming summer session
 - April 1 for the upcoming fall semester
- Successful completion with a GPA of 2.7 (or higher) in the following business core courses: COB 191, COB 202, COB 204, COB 241, COB 291, ECON 200 and ECON 201. Only grades earned at JMU will be used to calculate the B.B.A. core GPA.
- Successful completion of calculus and COB 242.

No core course needed for COB 300 admission may be attempted more than two times. An "attempted course" is one in which a final letter grade, including "W", "WP" and "WF," is recorded on the student's official JMU transcript.

The university policy for calculating repeat-credit and repeat-forgive will be followed.

Students who fail to meet the requirements described above will be denied admission into the College of Business and will be referred to JMU Career and Academic Planning for assistance in choosing another major.

Students should consult with the major department for further progression requirements in the specific major.

¹ Requirements to be admitted into the College of Business are effective based on when a student intends to enroll in COB 300. Students are advised to consult the College of Business Academic Success Center for current requirements.

Declaration of a Business Major

JMU students seeking to change/declare any major or minor in the College of Business (CoB) must be in "good standing," meaning they must have a cumulative grade point average of 2.0 or higher at the time when they submit a change/declaration of major/minor request. Students will follow the Office of the Registrar's procedure for making such requests. Students are expected to closely follow explicit departmental guidelines and deadlines for completing the process.

The CoB policy does not supersede admission standards of the College of Business for enrollment in COB 300 or junior-level courses in the CoB major programs. And it does not supersede admission requirements for specific academic programs in the CoB.

Business as a Second Major

A student enrolled in any JMU degree program other than the B.B.A. program who wishes to select a B.B.A. major field (i.e., accounting, computer information systems, economics, finance, international business, management or marketing) as a second major must meet the following courses:

- Successful completion of all B.B.A. core courses (refer to the B.B.A. core component section); and
- Successful fulfillment of all requirements specific to the major selected.

Transfer Credit Policy

Transfer of Lower-level Courses that are offered at Upper-level at JMU

The College of Business (CoB) normally does not award transfer credit for courses that were taken at the 100-200 level if those courses are offered at the 300-400 level at JMU.

Transfer of Courses Toward the Major

Each program in the CoB will accept no more than two courses of transfer credit toward the major except in extraordinary circumstances. The major is defined as the course work required by a major field of study in addition to the lower and upper-level B.B.A. core courses. For a course to be considered for transfer credit in the student's major, it must have been completed in an AACSB-accredited business program, or a similarly accredited program, at a four-year university. Certain majors within the CoB may have more restrictive policies on transfer credit.

Limit on Business Course Transfers

In order to earn a B.B.A. degree from the JMU CoB, a student must complete at least fifty percent of the business credit hours required for the degree at JMU. Required business credit hours include the B.B.A. core and the courses required for the major. The following B.B.A. core courses do not count toward meeting this requirement: COB 191, ECON 200 and ECON 201.

Mission Statement

The mission of the James Madison University College of Education is to prepare educated and enlightened individuals who can skillfully contribute to the common good of society and who can enter competently into positions of teaching and educational leadership, civic responsibility and national service. The personal and professional development of students is accomplished by emphasizing excellence and continuous innovation in quality undergraduate, graduate and professional programs. The College of Education is distinguished through faculty and student achievements, academic rigor, excellence in teaching, student and faculty interactions and relationships, technological innovations and national recognitions. The college maintains relevance through active and growing interactions with other colleges within the university and with local, state, regional, national and international communities. The college is committed to providing:

- Undergraduate programs that are composed of or complemented by strong liberal arts preparation, in-depth specialty studies and opportunities for students to develop professional knowledge and skills.

- Graduate programs that support initial teacher licensure emphasizing advanced knowledge in a specialty area and the development of effective leadership and professional skills for addressing the needs of a changing society.
- Continuing professional development and in-service programs in cooperation with public and private schools and agencies, other colleges, institutions and businesses.

The undergraduate and graduate educator preparation programs are accredited by the Council for the Accreditation of Educator Preparation and approved by the Virginia State Board of Education.

The basic philosophy of the college is reflected in these goals:

- To educate individuals for the multiple professions included in the college at both the undergraduate and graduate levels, not merely by transmitting skills and knowledge but by stimulating creativity, developing cognitive abilities and encouraging the testing of hypotheses and reinterpretation of the human experience.
- To encourage a balanced faculty orientation toward teaching, research, scholarship, community service and professionalism that recognizes individual strengths and preferences of the college's faculty.
- To create an environment that fosters an atmosphere of open communication among students, faculty members and community.
- To anticipate societal needs and provide necessary resources for implementing effective off-campus programs now and in the future.

The college has undergraduate and graduate programs that are designed to lead to majors and minors in pre-professional education, initial teacher licensure, advanced programs for teachers, educational leadership, educational technology, adult education, human resource development and military science.

The college is organized into five departments:

- Early, Elementary and Reading Education, Department of
- Educational Foundations and Exceptionalities, Department of
- Learning, Technology and Leadership Education, Department of
- Middle, Secondary and Mathematics Education, Department of
- Military Science, Department of

Programs and Licensure

The College of Education offers undergraduate majors, minors, and pre-professional education programs across a range of concentrations in both teaching and non-teaching areas. Want to teach at the early childhood, elementary, middle or secondary level? How about special education? Ready to teach English to speakers of other languages? JMU has programs especially for you. Majors in education lead to a Bachelor of Science that has been specially designed to meet a vital nationwide need for trained and committed teachers. To ensure that you gain the skills needed for this challenging profession, education majors may require additional content, such as a second major, a minor, or an area of emphasis. Students must apply after meeting program admission requirements. Please see www.jmu.edu/coe/academics.shtml for details. Your academic adviser will provide you with more information at Springboard.

Advisement

Students who wish to pursue a teacher education program of study are required to declare the appropriate major and complimentary areas as listed below. Students should apply to the specific teacher licensure program their first semester at JMU or as soon as possible. Consult your adviser and <http://www.jmu.edu/coe/academics.shtml> for details.

Licensure Area	Education Major	Additional Requirements
Art (PreK-12)	Studio Art, Design and Art History	

Dance (PreK-12)	Dance	
Elementary Education (PreK-6)	Elementary Education	Liberal Studies minor
Foreign Language (PreK-12)	Modern Foreign Languages	
Health and Physical Education (PreK-12)	Kinesiology	
Inclusive Early Childhood Education (PreK-3 and Special Education birth-age 5)	Inclusive Early Childhood Education	
Middle Education	Middle Grades Education	One or two concentration areas required: Language Arts, Mathematics, Science, Social Studies
Music Education (PreK-12)	Music (concentration in Instrumental or Vocal)	
Secondary Education (6-12)	Secondary Education and Content Major (double major) OR Content Major and Minor in Pre-professional Secondary Education	Content Major options: Biology, Chemistry, Earth Science, English, History, Mathematics, Physics or Political Science
Special Education (K-12)	Special Education (concentration in general or adapted)	Minor chosen from selected areas
Teaching English to Speakers of Other Languages (PreK-12)	Teaching English to Speakers of Other Languages	Minor chosen from selected areas
Theatre Education (PreK-12)	Theatre	

The College of Education offers the following undergraduate minors:

- Educational Media
- Human Resource Development
- Military Leadership
- Exceptional Education – Non Teaching
- Teaching English to Speakers of Other Languages (TESOL) - Non Teaching

The following endorsements are also available:

- Algebra I
- Gifted Education
- Journalism

Undergraduate students pursuing licensure to teach by completion of graduate M.A.T. programs should:

- Meet requirements indicated by the respective program prior to submitting an application to The Graduate School.
- Apply for admission to The Graduate School according to program deadlines.
- Complete all pre-professional studies requirements before enrolling in graduate courses in education.

- See the JMU Graduate Catalog for more information on the requirements for the M.A.T. and the M.Ed. degrees and for teacher licensure in the identified areas.

Professional Education Unit

The mission of the James Madison University professional education unit is to prepare caring, knowledgeable, skilled and reflective educators who believe that all students can learn and succeed. Our candidates and faculty are committed to lifelong learning and aspire to meet educational needs in a changing, pluralistic and democratic society. The personal and professional development of candidates is accomplished by emphasizing excellence and continuous innovation in quality undergraduate, graduate and professional programs.

The Professional Education Unit is comprised of all programs across the university designed to lead to licensure or advanced study in education.

The initial teacher licensure programs of the unit include:

4. Art Education
5. Dance Education
6. Inclusive Early Childhood Education (Early Childhood Education and Early Childhood Special Education)
7. Elementary Education
8. Foreign Language Education
9. Middle School Education
10. Music Education
11. Physical and Health Education
12. Secondary Education¹
13. Special Education K-12 General Curriculum
14. Special Education, Birth-Age 5 (ECSE)
15. Special Education K-12 Adapted Curriculum
16. Special Education: Visual Impairments
17. Teaching English to Speakers of Other Languages (TESOL)
18. Theater Education

¹ Secondary education licensure programs include biology, chemistry, Earth science, physics, English, mathematics, history and social sciences.

These initial licensure programs are offered at the undergraduate level:

4. Art Education
5. Dance Education
6. Early Childhood Education
7. Elementary Education
8. Foreign Language
9. Inclusive Early Childhood Education
10. Middle School Education
11. Music Education
12. Secondary Education¹
13. Special Education K-12: Adapted Curriculum
14. Special Education K-12: General Curriculum
15. TESOL (ESL)
16. Theater Education

These initial licensure programs are offered at the graduate level for those having baccalaureate degrees:

- Early Childhood Education
- Inclusive Early Childhood Education

- Middle School Education
- Physical and Health Education
- Secondary Education¹
- Special Education: Birth-Age 5 (ECSE)
- Special Education K-12: Adapted Curriculum
- Special Education K-12: General Curriculum
- Special Education: Visual Impairments
- TESOL

¹ Secondary education licensure programs include Biology, Chemistry, Earth Science, Physics, English, Mathematics, History and Social Sciences.

Advanced programs are offered at the graduate level for licensed teachers or other school personnel:

25. Educational Leadership
26. Educational Technology
27. Master of Music
28. Master of Arts: Art Education
29. Master of Education: Equity & Cultural Diversity
30. Master of Education: Special Education
31. Master of Education: Teacher Leadership
32. Mathematics
33. Reading Education
34. School Counseling
35. School Psychology

Professional Education Coordinating Council

The Professional Education Coordinating Council (PECC) is the official governing body within the university responsible for the preparation of teachers and other school personnel. The membership of the PECC includes the coordinators or representatives of all initial licensure and advanced study programs in education, a representative from the IDLS major, the director of assessment and the directors of the Education Support Center and the Educational Technology and Media Center. The Dean of the College of Education serves ex officio as head of the Professional Education Unit. The Dean of the College of Education, or designee, serves as the chair of PECC. The *Professional Education Handbook* outlines all PECC policies and is found on the Education Support Center homepage at www.jmu.edu/coe/esc

Teacher Education Conceptual Framework

The JMU conceptual framework is a guiding set of principles, beliefs and concepts that provide a basis for designing, implementing, monitoring, assessing and changing programs that prepare teachers and other educators who work closely with children and others in school settings. The overarching purpose, therefore, is to produce resilient, effective educational professionals for a dynamic and changing society.

The JMU Conceptual Framework is grounded in the best of what we know about learning, teaching, and development, and is further based on a moral mission; that is, the work of teachers affects the lives of human beings. In a human sense, it makes a difference in people's lives; in a larger sense, education contributes to societal development and democracy.

The conceptual framework reflects our recognition that teaching is a complex and difficult task, requiring a significant degree of education, preparation and experiences in order to meet the learning needs of all children, regardless of age, culture, condition or ability.

The programs at JMU rely on collaborative partnerships with schools and other community agencies, strong field-based teacher development, a continuum of skills development and reflective professional practice.

Program completers, therefore, should be skilled and adept in a set of competencies that are based on the propositions found in the Conceptual Framework. Those competencies include demonstrating:

- Certain personal qualities and dispositions reflective of a professional educator.
- Deep understanding of the content to be taught and ways to effectively teach the content.
- An understanding of the impact of research on learning and development and how culture influences development.
- An understanding of how students differ in approaches to learning and creating instructional opportunities for diverse learners.
- Skill in effective planning for learning.
- Skill in a wide variety of instructional strategies and technologies.
- Skill at creating positive, effective learning environments.
- The use of effective verbal, non-verbal and media techniques that foster inquiry, collaboration and positive interactions.
- Skill in a variety of effective assessment techniques.
- The ability to reflect on practice, adjust teaching methods and techniques, and seek professional growth.
- Skill in developing positive relationships with parents, colleagues and families.

Education Support Center

Dr. Dara Hall, **Executive Director**

Website: <http://www.jmu.edu/coe/esc>

The Education Support Center (ESC) has four major responsibilities for assisting students with their pursuit of a teaching license:

- monitor admission to, and retention in, the professional education program;
- coordinate field experiences for all programs;
- approve applications for Virginia Licensure; and
- serve as the center for information about professional education programs.

Information and application materials for admission to teacher education, appeals, registration and preparation for entry assessments, student teaching and licensure are available on the ESC website. Also provided is information regarding costs associated with required tests and subscriptions to Tk20.

Admission to Teacher Education

Candidates who want to pursue a course of study leading to the initial Virginia teaching license must be admitted to the teacher education program. Admission is a prerequisite to most education courses; candidates not admitted to teacher education will be blocked from registering for those courses.

Admission Criteria

Criteria	Four and Five Year Initial Programs	Graduate Initial Programs
Approved major and declared pre-professional teaching program	X	
Two satisfactory professional references	X	X

Grades of "C" or better in <ul style="list-style-type: none"> • WRTC 103 or equivalent • Any MATH course • PSYC 160, PSYC 614 or equivalent • EDUC 300 or equivalent 	X	X
Entry Assessments – standardized reading, writing and math assessments: Virginia Communications and Literacy Assessment (VCLA) and Praxis Core Mathematics Academic Skills for Educators Tests (or SAT or ACT exemption for the math assessment)	X	X
Child Abuse Prevention (CAP) certificate	X	X
Cumulative GPA of 2.5 or higher	X	X
First Aid/CPR/AED certificate	X	X
No record of felony conviction or misdemeanors involving children or drugs or founded complaint of child abuse or neglect	X	X
Purchase and subscription to Tk20	X	X
Specific program requirements*	X	X

*Consult the program area coordinator for specific information related to any additional requirements for acceptance into their programs.

Deadline

Freshmen generally apply to Teacher Education by April 15th of their freshmen year and complete all admission requirements by the following semester.

Transfer, post-baccalaureate and graduate candidates should apply during their first term of enrollment at JMU. Students must complete all requirements for admission into teacher education programs in order to enroll in required education courses. A full schedule of application and admission deadlines can be found on the ESC website.

Students can check the status of their admission to the teacher education program on their Tk20 account.

Field Experiences

Field experiences (including practica and internships) are required for candidates in all programs of the professional education unit. The number and nature of these experiences may differ based on program structure and candidates' individual needs and/or goals. Transportation and other arrangements for the practicum and internship courses/experiences will be the candidate's responsibility.

Student Teaching

Student teaching is required as an integral part of the sequence of professional experiences in all teacher education programs.

Its purpose is to enable pre-service teachers to apply acquired skills, understandings and attitudes in PreK-12 classrooms or comprehensive child development programs. Each individual licensure program determines the length of its particular student teaching experience.

The Education Support Center coordinates the student teaching program with participating school divisions, assigning all candidates to their student teaching sites and assisting in the planning and supervision of their work. Experienced teachers serve as cooperating teachers who coach and mentor the student teachers in their classrooms. University supervisors have the major responsibility for the supervision and evaluation of student teachers. Student teaching is graded on a credit/no-credit basis.

Candidates must student teach in the area for which they are seeking licensure or endorsement. A candidate enrolled in multiple teacher licensure programs must complete a student teaching experience in each area.

Student teaching placements are made in accredited Virginia public schools, but may be made within accredited Virginia private schools, programs and agencies.

Most placements are made within approximately one hour's driving distance from campus. Some programs also place students in northern Virginia, Richmond, Tidewater and Roanoke. Other local and non-local placement sites may be assigned in accordance with individual program and/or student needs. All placements are based on availability and efficiency of appropriate supervision. Student teaching is a full-time experience. Permission to take additional course work other than that required by the program will be made only in exceptional cases. Student teachers should not expect to work or participate in excessive extracurricular activities during student teaching. Students with problems and/or special needs must contact the director of the ESC for prior approval.

Opportunities exist for qualified candidates to complete a portion of their student teaching at international locations. Those interested in pursuing this option must meet additional requirements and have permission of their programs at time of application to student teach. Refer to the ESC website for additional information.

Student Teaching Criteria

To be approved for student teaching, all candidates must:

- Complete (prior to acceptance) all stated requirements for admission to teacher education.
- Attend a mandatory student teaching information session and apply for student teaching.
- Complete all course work, assessments and stated requirements prior to student teaching.
- Submit a recommendation for student teaching by their licensure program.
- Meet any additional admission and retention standards of their academic department or school.
- Submit paperwork to show that the student is free from exposure to communicable tuberculosis.

Professional behaviors are expected of all candidates throughout the program. School divisions routinely require a background check prior to student teaching. Convictions for criminal offenses or charges pending may result in schools refusing to make a placement for practicum or student teaching. There may also be serious consequences when being considered for a license to teach in Virginia and in other states. Therefore, students are required to inform the Education Support Center in writing of any conviction or pending charges for a felony, violation of a criminal drug law, an alcohol beverage control law or law that governs driving while intoxicated. Notification should be made within five calendar days after such charge or conviction.

Application Deadlines

Student teaching applications are accepted during the fall semester for the next academic year. It is the student's responsibility to be aware of all application requirements and deadlines.

Teacher Education Licensure

Candidates should apply for a Virginia teaching license upon completion of a teacher education program; this license is not issued automatically. Virginia licensure requirements include the following assessments:

7. Virginia Communication and Literacy Assessment (VCLA) for all licensure areas.
8. Praxis II Subject Assessment Tests for most licensure areas.
9. Reading for Virginia Educators (RVE) for selected programs.

In addition, all candidates shall provide evidence certification or training in emergency first aid, CPR (including hands-on practice) and the use of AED, as well as Dyslexia training.

Licensure Criteria

A statement indicating completion of an approved teacher education program will be entered on the candidate's transcript after:

- education requirements have been met, including a cumulative 2.5 GPA for undergraduates and a 3.0 for graduates;
- degree is awarded; and
- scores (sufficient for subject area) on all state mandated assessments are achieved.

Out-of-State Licensure

It is recommended that candidates applying for out-of-state licenses first obtain the Virginia license. Out-of-state licensure requirements and application forms must be obtained directly from the desired state agencies. Other states may have additional testing and GPA requirements the applicant must meet.

Educational Technology and Media Center

Phone: (540) 568-6302

Website: <http://www.jmu.edu/coe/etmc>

The primary goal of the Educational Technology and Media Center (ETMC) is to support students, faculty and staff in their effective use of technologies for learning. This goal is achieved through access, instruction and promotion of educational technologies available within the center. ETMC houses more than 5,000 items including K-12 textbooks, DVDs and videotapes, software, and a variety of other instructional resources. The center houses the children and youth literature collection of James Madison University totaling more than 15,000 volumes.

Computers throughout the facility allow students to work with computer-assisted instruction, web page creation, word processing, digital images, analog and digital video, page layout, data analysis and the creation of multi-media computer presentations. The growing capabilities in instructional technology are evident in this center where interactive video conferencing, video-streaming and other newly emerging technologies expand the potential for learning in multiple environments. Faculty also have access to mobile carts housing laptops, iPads and other mobile device technologies for use in their instructional practice.

For students desiring licensure in Virginia's schools, ETMC provides opportunities to learn and use many forms of instructional technology. ETMC has a range of production facilities including traditional media, audio and video editing areas, and digital technologies that enable students and faculty to produce a wide variety of instructional materials. College of Education students may also check out digital cameras, camcorders, audio recorders, iPads and laptop computers for their instructional practice.

Mission, Vision and Values

Mission

We engage students, faculty and communities in learning, scholarship and service in health and behavioral studies to inspire responsible contributions to our world.

Vision

CHBS will be a leader in collaborative education, scholarship and practice that drive real world advancements.

Values

We promote and support departments, programs and initiatives that advance a culture of excellence and uphold the following values:

Scholarship & Professional Development

Participate actively in research and continual professional development.

Research refers to systematic examination of phenomena using scientific methods and includes:

- Basic Research—leads to understanding of fundamental questions.
- Applied Research—relates basic research to find solutions to everyday problems.
- Translational Research—relates basic research to professional applications that enhance human health and well-being in a multi-disciplinary environment.

Professional Development includes activities designed to enhance professional knowledge and skills.

Innovation

Pursue creative approaches/trends that strive toward new and effective solutions, while respecting successful traditions and established best practices.

Diversity

Appreciate that salient differences, including intersectionality, among and between constituencies and create opportunities for all individuals to have a voice in CHBS endeavors.

Engaged Learning

Employ teaching and learning strategies within various curricula to foster effective thinking, discernment, discovery and lifelong learning skills.

Integrity

Act in a manner consistent with stated personal, professional, college and university values.

Collaboration

Communicate and recognize commonalities, respect differences, and search cooperatively for possibilities to engage in interprofessional and interdisciplinary work.

Collegiality

Respect that everyone has a role to play in achieving the CHBS vision. This shared purpose can be achieved while valuing each other's contributions.

Community

In and beyond our college, impact-driven interactions feature trust, respect, mutuality, service and associations inclusive of multiple viewpoints.

Majors and Minors

Students may select from a variety of majors, minors, programs and concentrations that are available through the departments in the College of Health and Behavioral Studies. Programs offered include the following:

Majors

- Communication Sciences and Disorders
- Dietetics
- Health Sciences
- Health Services Administration
- Kinesiology
 - Exercise Science
 - Physical and Health Education Teacher Education
- Nursing
- Psychology
- Social Work

Minors

- Chronic Illness
- Coaching Education
- Family Studies
- Nonprofit Studies
- Sport Communication
- Substance Abuse Education

Cross Disciplinary Programs, Outreach Programs, Partnerships, Academic Centers and Institutes

The College of Health and Behavioral Studies places a high value on partnerships with the community. These partnerships and our outreach programs are integral to our academic programs and assist us in meeting our responsibility to participate in efforts to enhance the well-being of our community. We value the impact of experiential activities on the enrichment of student learning. Many of the programs within the college are cross disciplinary in nature, reflecting our commitment and supporting the mission of the college. Further details about these cross disciplinary programs are provided in the minors and Academic Institutes and Centers sections of the catalog and on the CHBS website.

Notice of Non-Discrimination and Equal Opportunity

James Madison University does not discriminate on the basis of age, disability, race or color, national or ethnic origin, political affiliation or belief, religion, sex, sexual orientation, gender identity or expression, veteran status, parental status (including pregnancy), marital status, family medical or genetic information, in its employment, educational programs, activities, and admissions. JMU complies with all applicable federal and state laws regarding non-discrimination, affirmative action, and anti-harassment. The responsibility for overall coordination, monitoring and information dissemination about JMU's program of equal opportunity, non-discrimination, and affirmative action is assigned to the Office of Equal Opportunity. Inquiries or complaints may be directed to Office of Equal Opportunity:

James Robinson, Director
Office of Equal Opportunity
James Madison University
1017 Harrison Street, MSC 5802
Harrisonburg, VA 22807
(540) 568-6991
oeo@jmu.edu

JMU prohibits sexual and gender-based harassment including sexual assault and other forms of inter-personal violence. The responsibility for overall coordination, monitoring and information dissemination about JMU's Title IX program is assigned to the Title IX Coordinator. Inquiries or complaints may be directed to the Title IX Coordinator:

Amy Sirocky-Meck
Title IX
James Madison University
100 East Grace Street, Suite 4033, MSC 7806
Harrisonburg, VA 22807
(540) 568-5219

Dr. Kurtis G. Paterson, Head

Integrated Sciences, School of
Dr. Linda Thomas, Head

Mission

The College of Integrated Science and Engineering encompasses programs whose common focus is solving problems that impact the world at large through both the application of science and technology and the consideration of the social context in which the problem sits.

Over the past several decades, remarkable developments in science and technology have altered our lives and our society, bringing both great opportunities and challenges. Continued prosperity and societal harmony depend on the integration of scientific knowledge, the creative use of engineering design, technical capabilities in computing and other fields, the application of ethical principles and an understanding and appreciation of cultural commonalities and differences. Consequently, there is a need for individuals who understand the importance of specialization, as well as cross disciplinary connections, and also the integration of knowledge for practical application. These individuals must have the flexibility to be able to operate in an environment of uncertainty and complexity, the drive to seize such opportunities as they arise, and the vision and creativity to create new opportunities as needed. Our faculty is dedicated to producing graduates with a scientific and technical knowledge base and a matching set of interpersonal, organizational and technical skills. To this end, our faculty members not only educate our students, they also inspire and serve as role models.

The college places importance on carrying out its role within the community of Academic Affairs, working collaboratively with other colleges and supporting division-wide programs and priorities.

Mission Statement

The College of Integrated Science and Engineering, by supporting its constituent academic programs, seeks to build a community of students, faculty and staff who share a common purpose of improving our world through the cultivation of integrated sciences and engineering.

Goals

The goals of the College of Integrated Science and Engineering are:

- To promote a student-centered focus in teaching, scholarship and service that encompasses excellence, collegiality and professionalism.
- To foster, among both faculty and students, life-long professional development, personal growth and commitment to ethical behavior.
- To contribute to the betterment of society at local, regional, national and global levels with a focus on sustainable solutions.
- To prepare students to enter professions of value to our community, through the study of applied science and engineering within a social context, or to undertake advanced study.
- To support a community of faculty that pursues high-quality, innovative and cross disciplinary instruction, scholarship, and service.
- To emphasize innovation.
- To encourage partnerships both within and outside the university.

Academic Programs

Students may select from a variety of majors, minors, programs and concentrations that are available through the departments in the College of Integrated Science and Engineering. Programs offered include the following:

Majors

- Biotechnology
- Computer Science
- Engineering
- Geographic Science
- Integrated Science and Technology
- Intelligence Analysis

Minors

- Computer Science
- Environmental Humanities
- Environmental Information Systems
- Environmental Management
- Environmental Science
- Environmental Studies
- Geographic Science
- Humanitarian Affairs
- Integrated Science and Technology
- Materials Science
- Robotics
- Science, Technology and Society
- Telecommunications
- Urban and Regional Studies

Cross Disciplinary Programs, Outreach Programs, Partnerships and Academic Centers

The College of Integrated Science and Engineering highly values partnerships with the community. These partnerships and our outreach programs are integral to our academic programs and assist us in fulfilling the responsibility we feel to serve our community. We value the impact of experiential activities on the enrichment of student learning. A listing of CISE centers, outreach programs and partnerships may be found on the CISE website.

Graduate Programs

The College of Integrated Science and Engineering offers the following graduate degrees:

- Computer Science (M.S.)
 - Information Security
 - Digital Forensics
- Computer Science – Fifth Year Format (M.S.)
 - Information Security
 - Digital Forensics
- Integrated Science and Technology (M.S.) – Not currently accepting applications.

- Integrated Science and Technology: Environmental Management and Sustainability (M.S.) – joint degree program with the University of Malta

Mission Statement

The mission of the CSM is to establish a culture of "discovery practice," in which students develop their knowledge, skills and habits of mind by participating in science and mathematics practice. We place undergraduate student learning at the center of a rigorous research-based environment.

Because the most creative discoveries happen when people with different perspectives work together, the college is committed to supporting a diverse community of learners. Our faculty and staff work to ensure that every student enrolled in CSM courses experiences a welcoming and supportive learning environment.

We pursue our mission through educational goals focused on:

- Preparing future scientists and mathematicians
- Advancing science and mathematics literacy of JMU students, the Harrisonburg community and our local schools
- Providing the scientific and mathematical foundations needed for professional careers

Programs

The college offers a variety of academic programs, majors, minors, concentrations, cross disciplinary programs and tracks. Most of these are listed below. For an explanation and contact point of each, visit the college website.

- American Chemical Society accredited degree
- Applied physics
- Astronomy minor
- Biochemistry concentration
- Biochemistry and molecular biology minor for students not majoring in biotechnology
- Biology major and minor
- Biophysical chemistry major
- Biotechnology major
- Chemical education concentration
- Chemistry major and minor
- Chemistry/business concentration
- Computational and applied mathematics
- Computational science concentration
- Earth science major
- Ecology and environmental biology
- Environmental and engineering geology
- Environmental science minor
- Environmental studies minor
- Forestry M.S. program
- Fundamental physics
- Geology major and minor
- Human science minor - not currently offered
- Materials chemistry concentration
- Materials science minor
- Mathematics major and minor
- Medical technology
- Microbiology
- Neuroscience
- Physics – individual option
- Physics major and minor
- Plant sciences
- Pre-Dentistry
- Pre-Forensic Studies
- Pre-Medicine
- Pre-Occupational Therapy
- Pre-Optometry
- Pre-Pharmacy
- Pre-Physical Therapy
- Pre-Physician Assistant
- Pre-Veterinary medicine
- Statistics major and minor

Teaching Licensure Areas:

- Algebra I Add-on endorsement
- Secondary Biology
- Secondary Chemistry
- Secondary Earth sciences
- Secondary Mathematics
- Secondary Physics

Some of these cross disciplinary programs are listed in the cross disciplinary programs section of the catalog. The college also supports the following resource and service centers, collections, events and outreach programs that enhance teaching, scholarly activity and community relations.

Resource and Service Centers

Astronomy Park

Contact: Dr. Sean T. Scully

Phone: (540) 568-4511

Website: <https://www.jmu.edu/planetarium/star-parties.shtml>

Located on the east side of campus near the Physics and Chemistry building is a permanent area for sky observing on campus. There are permanent mounts for six portable 10-inch computer controlled telescopes and an area for a portable 14-inch telescope. This site provides a convenient area for sky observing for introductory astronomy students. Students are able to easily see the moon, planets, nebulae, galaxies, star clusters as well as the sun using the appropriate solar filters. The department is also equipped with CCD cameras, spectrometers, a photometer and multiple solar filters that provide more advanced students with experience in astrophotography and data collection techniques. The public is invited to attend public star gazes which are held several times each semester.

The Center for Computational Mathematics and Modeling

Contact: Dr. James Sochacki

Phone: (540) 568-6614

This cross disciplinary institute for scientific computing houses state-of-the-art graphics workstations and a 16 PII node Beowulf computer system. The Beowulf computer system is a parallel computing environment that can be used on large-scale problems. Faculty and students will have access to this "super computer" from the center and from their offices. The center also operates an Immersive 360o Visualization System. The center uses mathematics both to simulate real-world phenomena and to generate visual data.

Faculty members from the sciences, economics and business disciplines interact with mathematicians to model problems that they are researching with undergraduate students.

Center for Materials Science

Contact: Dr. Brycelyn Boardman

Phone: (540) 568-8811

The educational mission of the Center for Materials Science is to develop and maintain an innovative interdisciplinary and multidisciplinary undergraduate program in materials science that will increase the maturation of students, their research experience and their employment opportunities. The mission includes the integration of undergraduate education with basic and applied research in materials science.

Faculty in the Center for Materials Science have expertise in a wide variety of areas including inorganic and organic synthesis, microfabrication, nanotechnology, thin film growth and surface modification, materials characterization, and modeling and simulation of complex systems. The facilities include a class 10000 clean room, electron beam lithography, and many types of microscopy and other analytical techniques.

Collaborative work is welcome and can include consultation with faculty, assignment of student projects or simply access to facilities.

Department of Chemistry & Biochemistry LC/MS Facility

Contact: Dr. Christine A. Hughey

Phone: (540) 568-6633

Website: <https://www.jmu.edu/chemistry/LCMS.shtml>

The JMU liquid chromatography/mass spectrometry (LC/MS) undergraduate research facility, housed within the Chemistry and Biochemistry, Department of, was established in 2010 with two Major Research Instrumentation (MRI) grants from the National Science Foundation.

The LC/MS instruments housed in the facility include: (1) an Agilent 6460 triple quadrupole (QQQ) mass spectrometer coupled to two Rapid Resolution LC pumps and a diode array detector, (2) an Agilent 6224 time of flight (TOF) mass spectrometer coupled to an Infinity UHPLC pump, and (3) an Agilent 6530 quadrupole time of flight (q-TOF) mass spectrometer coupled to an Infinity UHPLC pump. All three instruments are equipped with an electrospray source. The time of flight instruments afford the high mass accuracy and high resolution necessary for identification of unknowns in complex mixtures. The MS/MS capability of the q-TOF affords additional structural information. The sensitivity of the QQQ makes this instrument ideal for small molecule quantitation. Together, these three instruments provide a robust platform for the qualitative and quantitative analysis of biological and environmental samples.

Electron Microscopy Center

Contact: Dr. Xiaofeng "Harry" Hu

Phone: (540) 568-8115

The Electron Microscopy Center serves faculty, staff and students who wish to use the scanning electron microscopy in scientific investigations. The center also provides demonstrations for public school groups and specialized educational programs.

JMU Center for Genome and Metagenome Studies

Contact: Dr. James B. Herrick

Phone: (540) 568-6653

Dr. Steve G. Cresawn

Phone: (540) 568-3551

Website: <http://www.jmu.edu/genomics>

The mission of JMU Center for Genome and Metagenome Studies (CGEMS) is to support innovative research and training in the methods and principles of genomics, metagenomics and bioinformatics in order to provide an exemplary learning experience for undergraduate and graduate students. CGEMS supports innovative, leading-edge research and training in the methods and principles of genomics, metagenomics, transcriptomics and bioinformatics for students at all levels. The center supports and fosters collaboration among researchers and students in a variety of departments and colleges. CGEMS also sponsors seminars and provides outreach to other higher education institutions in Virginia as well as area schools.

JMU Meteorite Collection

Contact: Dr. Chris Hughes

Phone: (540) 568-6109

Website: <https://www.jmu.edu/physics/meteorite-collection.shtml>

The James Madison University Meteorite Collection is a growing collection of the many sorts of meteorites to strike the Earth, and is located on the second floor of the Physics and Chemistry building. The display is open to the public year-round during university business hours, and after hours by special arrangement.

JMU Regional Undergraduate Laser Facility

Contact: Dr. Oleksandr Kokhan

Phone: (540) 568-1656

Website: www.jmu.edu/chemistry/lasers.shtml

Madison Accelerator Laboratory (MAL)

Contact: Dr. Adriana Banu, Scientific Program Coordinator

Phone: (540) 568-8940

Contact: Dr. Scottie Pendleton, Laboratory Manager

Phone: (540) 568-2650

Website: <https://sites.lib.jmu.edu/mal>

The Madison Accelerator Laboratory (MAL) is a multidisciplinary research user facility available for JMU faculty and students as well as for higher education institutions in Virginia and beyond. The facility features a converted medical electron linear accelerator (linac) with electron beam energies from 5-14 MeV and X-ray beam with endpoint energies from 6-15 MeV. The linac can be used for a variety of applications from basic nuclear physics and radiation effects testing to probing materials via Photon Activation Analysis, a non-destructive and versatile tool that provides high sensitivity for elemental chemical identification, particularly useful for irreplaceable or rare samples. In addition, MAL features a 140 kV X-ray imager with 3-D imaging capabilities allowing non-destructive internal imaging of materials, biological samples, and archaeological/historical artifacts.

Microscopy Facility

Contact: Dr. Kristopher E. Kubow

Phone: (540) 568-4521

Website: <http://www.jmu.edu/microscopy/>

The Biology Department's Microscopy Facility is equipped with several light and fluorescence microscopes, including a Nikon C1 Confocal Laser Scanning Microscope, enabling time lapse imaging, 3-D image reconstruction and fluorescence imaging. The facility has a dedicated staff member who can provide training on the equipment and help faculty and students with any microscopy aspects of their research projects.

Mineral Museum

Contact: Dr. Steve Leslie

Phone: (540) 568-6130

Website: <http://sites.jmu.edu/mineralmuseum>

Housed with the Department of Geology, the JMU Mineral Museum contains more than 700 exceptionally beautiful display specimens that provide mineralogy students with outstanding visual examples of some of the finest crystals from around the world. Each year, numerous educational groups, mineralogical societies and individual collectors visit the collection.

Office of Statistical Services

Contact: Dr. Hasan Hamdan

Email: statconsult@jmu.edu

Through this office, statistics faculty members and students provide JMU and the local community with assistance in the design and analysis of statistical surveys and experiments. Students obtain practical experience and an appreciation for the impact of statistical methods on today's society.

John C. Wells Planetarium

Contact: Dr. Geary E. Albright

Phone: (540) 568-2659

Website: www.jmu.edu/planetarium

Located in Miller Hall, the planetarium serves as a teaching laboratory for both the undergraduates and the local community alike. The facility is used as a resource for introductory astronomy classes and well as welcoming school groups from the region. Several public planetarium shows are offered every month that vary with the seasons. The planetarium is equipped with a GOT0-Chronos/Digistar-3 hybrid planetarium system that offers full dome video as well as exceptionally clear and accurate simulations of the night sky.

Science and Mathematics Learning Center

Contact: Dr. Mary Tam, Interim Associate Director of Science and Mathematics

Phone: (540) 568-4816

Website: www.jmu.edu/smlc

The College of Science and Mathematics has established a Learning Center for Science and Mathematics. The center, which is a part of the JMU Student Success Center, provides extra help with math and science for students in general education and beginning science courses. The center is staffed by five full-time coordinators and carefully selected upper level science and mathematics majors.

Shenandoah Valley Regional NMR Facility

Contact: Dr. Jun Yin

Phone: (540) 568-3683

Website: www.jmu.edu/chemistry/nmr.shtml

The Shenandoah Valley Regional NMR Facility was established with grants from The National Science Foundation (9650132) and The Merck Foundation with matching funds provided by James Madison University, Eastern Mennonite University and Bridgewater College.

The NMR Facility is comprised of three NMR spectrometers: 300, 400 and 600. These instruments are housed at JMU and can be accessed remotely by the Regional NMR Consortium. The group is composed of chemists from Bridgewater College, Eastern Mennonite University, James Madison University, Mary Baldwin University and the University of Virginia.

Science Fair

Contact: Dr. Corey Cleland

Phone: (434) 284-0543

The Shenandoah Valley Regional Science Fair has been administered by the JMU science faculty for over four decades. The science fair is a competition open to all students in grades 6-12 who live in Virginia's Shenandoah Valley.

College of Visual and Performing Arts

Rubén Graciani, **Interim Dean**

Dr. Wren Stevens, **Interim Associate Dean**

Phone: (540) 568-7131

MSC: 2107

Location: Shirley Hanson Roberts Center

Academic Units

Art, Design and Art History, School of

Dr. Katherine Schwartz, **Director**

Music, School of

Dr. John Allemeier, **Director**

Theatre and Dance, School of

Kate Arecchi, **Interim Director**

Mission Statement

The College of Visual and Performing Arts is founded on the belief that artistic expression reveals the essential nature and diversity of human experience. Embracing traditional practices as well as contemporary approaches and technologies, the College provides a stimulating environment in which students create, perform, interpret, research, teach and think critically about the arts. The College actively supports creative and scholarly endeavors, collaboration between faculty and students, and interdisciplinary exchange. We are committed to making the arts an integral part of the life of the university and advancing their visibility, accessibility and understanding throughout the region and the world.

Goals

The programs in the college are committed to achieving the following common objectives:

- To prepare students to be articulate, effective and inspiring performers, educators, creators, scholars and professionals in the arts.
- To attain recognition and leadership in the arts at the regional, national and global levels.
- To enhance, develop and sustain undergraduate and graduate programs of distinction.
- To support cultural, aesthetic and intellectual diversity, and to foster interdisciplinary exchange.
- To offer students instruction and learning experiences that incorporate the latest technology, research and practices.
- To engage the surrounding community as an active partner in promoting and experiencing the arts.

Majors and Minors

CVPA offers majors and minors from the following Schools:

- Art, Design and Art History
- Music
- Theatre and Dance

Resources and Events

Forbes Center for the Performing Arts

Executive Director: Ms. Regan Byrne

Phone: (540) 568-7000

Website: <https://www.jmu.edu/forbescenter>

Comprised of the Dorothy Thomasson Estes Center for Theatre and Dance and the Shirley Hanson Roberts Center for Music Performance, the Forbes Center houses five state-of-the-art performance venues: the Mainstage Theatre (450 seats), the Concert Hall (600 seats), the Recital Hall (196 seats), the Studio Theatre (200 seats) and the Earlynn J. Miller Dance Theatre (200 seats).

The center is home to the Masterpiece Season, a variety of cultural events for JMU and the entire community. The schools of Art, Design and Art History; Music; and Theatre and Dance all take an active role in this series. The season also includes the Encore Series and Family Series featuring visiting artists such as Julian Sands, Liz Lerman Dance Exchange, Béla Fleck, Denyce Graves, Jefferson Pinder and Alex Bay.

Galleries

Director: Dr. Beth Hinderliter

Phone: (540) 568-6918

Website: www.jmu.edu/artandarthistory/galleries/galleries-overview.shtml

artWorks Gallery

artWorks is JMU's student-run gallery, exhibiting work by undergraduate and graduate students. The gallery features moveable walls; hardwood floors; large windows; and a high, open ceiling. Exhibits change, on average, every three weeks. The gallery is located a short walk from Duke Hall on the second floor of 131 Grace Street. The artWorks Gallery is a curricular component of the School of Art, Design and Art History.

Duke Hall Gallery

Duke Hall Gallery of Fine Art is a professional gallery featuring changing exhibitions that directly correlate to the curricula of the School of Art, Design and Art History. The gallery aims to present the highest level of fine art experiences and to create an active space for robust discourse of vital issues facing our society. Duke Hall Gallery is located in Duke Hall, Room 1022, on the corner of Main and Grace Streets. Duke Hall Gallery is sponsored by the College of Visual and Performing Arts and the School of Art, Design and Art History.

New Image Gallery

New Image Gallery is a professional photography gallery featuring contemporary photography of regional and national significance. New Image Gallery is located on the second floor of 131 Grace Street, JMU, Harrisonburg, VA. New Image Gallery is a curricular component of the School of Art, Design and Art History.

Programs

Center for Inclusive Music Engagement

Director: Dr. David Stringham

Email: cime@jmu.edu

Website: <http://www.jmu.edu/cime>

The Center for Inclusive Music Engagement (CIME), located in Burruss Hall, Room 349, provides a collaborative space for practitioners, researchers, and community members to facilitate innovative opportunities for all persons -- particularly those often marginalized in institutional music education contexts -- to create, perform, respond, and connect with, in, through, and around music in ways they find meaningful. Staff, student innovation leaders, campus and community engagement partners pursue objectives related to research, collaboration, education, and dissemination.

Institute for Visual Studies

Director: Dr. David Ehrenpreis

Phone: (540) 568-5656

Website: <http://www.jmu.edu/ivs/>

The Institute for Visual Studies is a center for scholarly, scientific and creative inquiry into the nature and workings of images. An incubator of new ideas, the institute fosters discovery, and the generation of artworks, products and applications by multidisciplinary teams of students and faculty. The Institute for Visual Studies, a collaboration among faculty representing all colleges at the university, is helping establish a multidisciplinary learning community, exploring the connections among art, science, and technology, and creating new solutions for real-world problems. It is located in Roop Hall, room 208.

Madison Art Collection

Director: Dr. Wren River Stevens

Phone: (540) 568-5577

Website: <http://www.jmu.edu/madisonart/>

The Madison Art Collection provides unique opportunities for students, faculty and the surrounding community to learn about a wide range of world cultures through the exploration of its collection of over 35,000 objects. The collection has two exhibition

venues, both located in the Festival Conference and Student Center: The Lisanby Museum showcases exhibits drawn from the permanent collection and uses technological applications such as smart device applications and QR codes to allow visitors to craft their experience with the objects; and the Prism Gallery and Prism International exhibit works emphasizing aspects of diversity, including areas of culture, religion, gender and sexuality. Scholars may apply for access to study Madison Art Collection objects at the Charles Lisanby Center, located in the Festival Conference and Student Center.

Honors College

Dr. Bradley R. Newcomer, **Dean**

Dr. Fawn-Amber Montoya, **Associate Dean**

Phone: (540) 568-6953

Location: Hillcrest House

Website: <http://www.jmu.edu/honors>

Mission

The Honors College seeks to meet the educational needs of talented, highly motivated students by offering increased opportunities for an enriched and challenging curriculum. It is administered by the deans of the Honors College and the Honors Faculty Fellows. Under the guidance of recognized teacher-scholars, this program offers students the opportunity to cultivate the habits of critical thinking, independent analysis and creative expression through classes and independent study. The program offers a setting in which students who share a similar enthusiasm for learning are brought together in intellectual fellowship and provides public recognition for superior academic achievement. The college consists of various modes of study.

Track One Honors Scholars

High-achieving high school seniors apply to enter the Honors College as Track One Honors Scholars. Track One Honors Scholars complete a total of 27 hours in honors, including six credit hours of honors courses in General Education, nine credit hours of electives in courses designated "Honors" or honors options, six credit hours in cross disciplinary honors seminars or colloquia and six credit hours of independent study, consisting of the senior honors project or honors capstone.

Track One Honors Scholars are expected to maintain at least a 3.25 grade point average. Designation as an honors scholar will appear on the student's transcript and diploma after completing the requirements. If the student completes an honors senior capstone within their major field, the designation of graduation with distinction in the major field will also appear on the students transcript and diploma.

Track Two Honors Scholars

The Track Two Honors Scholars Program is open to first- and second-year students with at least a 3.50 grade point average. Students must also submit an application to the Honors College office. Once admitted into Track Two, students are expected to maintain at least a 3.25 grade point average. Students who complete the course requirements will graduate as Honors Scholars with recognition on the students' transcript and diploma. If the student completes an honors senior capstone within their major field, the designation of graduation with distinction in the major field will also appear on the students transcript and diploma. Candidates for Track Two Honors complete at least 24 credit hours in honors, including a six-credit hour senior honors project or honors capstone, six credit hours in honors seminars and twelve credit hours of electives in honors courses.

Track One and Track Two Scholars Areas of Emphasis

Track One and Track Two Honors students may choose to fulfill their seminar requirements by selecting and completing a series of courses associated with an Area of Emphasis.

There are five emphasis themes offered:

- Creativity
- Research
- Service
- Leadership
- Global studies

Fulfillment of area of emphasis requirements involves the completion of three consecutive courses. Completion of the Area of Emphasis will appear as a special designation on the transcript.

Introductory courses are taken in the fall semester of the sophomore year. There is one introductory course offered for each Area of Emphasis. The primary goal of these courses is to introduce students to key skills associated with the area each serves while establishing a cohort of students with similar interests.

Experiential courses are taken in the spring semester of the sophomore year. Experiential courses come in two varieties: deepening and broadening. Deepening courses are restricted to students of one particular emphasis area and are intended to provide a more in-depth exploration of the skills/concepts introduced in the first seminar course. Broadening courses are open to students of more than one emphasis area. To maintain continuity throughout each area, students within an emphasis cohort will participate in meetings facilitated by the emphasis coordinator to discuss and reflect back on connections between their first and second semester experiences.

Practicum courses are taken in the fall semester of the junior year. These courses will be student driven and will hopefully manifest as an extension of the second semester experiences.

Track Three Honors Project

Students in their junior year who are not already in the Honors College but have a cumulative GPA of at least 3.50 are eligible to apply to enter the Honors College to pursue independent research leading to the completion of a six-credit honors project in their major field during their senior year. Students must submit an application to the Honors College office. Once admitted into Track Three, students are expected to maintain at least a 3.25 grade point average and complete their project with a passing grade. A degree with distinction in the major field is awarded to students completing this project while maintaining the required grade point average. Upon approval of the major academic unit and the Honors College, graduation with distinction in the major will appear on the students' transcript and diploma.

Academic Departments

Accounting, School of

Dr. Alexander L. Gabbin, **Director**

Phone: (540) 568-3071

Location: Zane Showker Hall, Room 334

Website: <http://www.jmu.edu/cob/accounting>

Professors

C. Bailey, L. Betancourt, P. Copley, D. Fordham, A. Gabbin, N. Nichols

Associate Professors

J. Briggs, S. Cereola, D. Hayes, J. Irving, R. Richardson

Assistant Professors

A. Duxbury, I. Scott

Lecturers

M. Brown, E. Browning, S. Ferguson, K. Foreman, L. Manktelow, E. Shifflett

Mission

The School of Accounting is committed to preparing students to be active and engaged citizens who are able to apply accounting and business knowledge for the betterment of individuals and organizations. We value an environment of educational excellence in which:

- Students develop both technical and interpersonal skills necessary for successful professional accounting careers;
- Faculty create and disseminate meaningful intellectual contributions and actively participate in the academic and professional communities; and
- Stakeholders, including alumni, recruiters and others, desire long-term and mutually beneficial relationships with the school.

Mission Statement

The mission of the undergraduate accounting program is to prepare students for entry into high-quality graduate programs and for positions in business that do not require postgraduate education. Since the B.B.A. degree is part of the College of Business, it reflects the distinctive competencies of the college. In addition, the program delivers foundation accounting courses to all students in the College of Business and to students in a variety of programs across the university.

The school also offers a Master of Science in accounting. Its mission is to prepare students for success in the accounting profession by strengthening the students' technical expertise, enhancing their understanding of professional responsibility and improving their business skills necessary to compete in today's complex and ever changing business environment.

Goals

The accounting faculty has identified strategic and tactical goals in three major areas: learning objectives for students, intellectual contributions for faculty and service to our profession and the community.

Learning Environment Objectives

We engage in the scholarship of teaching to prepare students for professional accounting careers in public accounting, industry or the public sector. We provide a learning environment that encourages a commitment to lifelong learning and develops a diverse set of skills in students, including technical competence, information technology proficiency, critical thinking, teamwork and communication.

Intellectual Contributions Objectives

We engage in the scholarships of discovery, application of knowledge and instructional development to advance knowledge in the field of accounting, to improve business practice, to encourage and support innovative teaching methods and curricula and to foster the intellectual and professional growth of our faculty.

Service Objectives

We serve our school, college, university, accounting profession and business, and academic communities through active participation and leadership in academic, professional and business organizations.

Career Opportunities

The programs of study offered by the accounting program provide an educational experience intended to prepare students for a variety of careers in the accounting, financial, auditing, consulting and information systems fields. Some of the job titles held by graduates of our program include the following:

- Audit Partner
- Business Analyst
- Business Consultant
- Chief Financial Officer
- Comptroller
- Computer Systems Consultant
- Controller
- Cost Accountant
- Cost Analyst
- Division Controller
- Forensic Accountant
- Fraud Examiner
- Information Systems Coordinator
- Internal Auditor
- Systems Consultant
- Tax Adviser
- Tax Partner

Our graduates find employment with all of the "Big Four" international public accounting firms, dozens of national, regional and local public accounting firms, government agencies and major international companies. Many of our graduates work for business consulting firms. The field of accounting has one of the highest demands for new graduates of any area in today's market, and accounting graduates enjoy some of the highest starting salaries in the College of Business.

Co-curricular Activities and Organizations

Beta Alpha Psi is the honors organization for accounting, finance, quantitative finance and computer information systems majors.

Programs of Study

The School of Accounting offers both an undergraduate and graduate program. The undergraduate degree consists of the four-year major in accounting, leading to the Bachelor of Business Administration (B.B.A.) degree. During their junior year, students may choose to meet with their adviser to discuss enrolling in the five-year Professional Program in Accounting, which leads to the award of the B.B.A. and the Master of Science in Accounting (M.S.A.) degree at the end of five years. For more information on the M.S.A. degree, please refer to the Graduate Catalog.

Students who choose to complete the four-year undergraduate program will have the requisite accounting, business and general education to pursue a variety of career opportunities in accounting and business.

Students are advised that 150 hours of college education are required to be licensed as a Certified Public Accountant in most states. The five-year professional program is therefore recommended for those electing a career in public accounting. The professional program allows the student to concentrate in the areas of taxation or auditing; it also provides a well-rounded background in accounting and other related business disciplines. A student must be admitted to the M.S.A. program in order to enroll in graduate courses. Admission to the M.S.A. program is competitive. M.S.A. program admission requirements are included in the graduate catalog. Students may apply following their junior year and early application for admission is encouraged.

Special Admission Requirements

To register for ACTG 302, ACTG 303, ACTG 343 or ACTG 377, a student must have:

- been accepted to COB 300.
- completed COB 241 and COB 242 with a "B" or better in each.

In some years, the School of Accounting may require students to pass a COB 241 assessment exam. Students must pass the exam with a score of 80 percent or higher. Students will be contacted directly by the School of Accounting if they are required to take the exam. Students who do not meet the 80 percent threshold will meet with the director of the School of Accounting to outline steps for improving their proficiency in financial accounting. Students may take the exam twice.

Accounting Major Progression Standards

Students are required to earn a "C-" or better in all upper level prerequisite accounting courses before continuing to the next course in the sequence. Students receiving a "D+" or lower in any upper level accounting course must repeat the course and earn a "C-" or better in order to be awarded a B.B.A. degree with a major in accounting.

Any student having a total of three "W's," "WF's," "D+'s," "D's", "D-'s" or "F's" in required 300 or 400-level accounting courses will be dropped from the major and not permitted to register for additional accounting courses.

Any student having a total of two "W's," "WF's," "D+'s," "D's", "D-'s" or "F's" in any (single) required 300 or 400-level accounting major course will be dropped from the major and not permitted to register for additional accounting courses.

Accounting, B.B.A.

Degree and Major Requirements

The Bachelor of Business Administration degree in accounting requires a minimum of 120 credit hours of undergraduate course work.

Certifications

Many graduates desire to gain certifications in their selected area of specialization. The Certified Public Accountant (CPA) is the best known of these certifications. To obtain a CPA license in Virginia, candidates must meet a 150-hour education requirement, including 24 credits in accounting and 24 in business. The U.S. Virgin Islands is the only U.S. jurisdiction that does not require at least 150 hours of education for licensure. The masters in accounting program is highly recommended for those electing a career in public accounting.

In addition to the CPA exam, graduates of our program sit for the Certified Management Accountant (CMA) exam, the Certified Internal Auditor (CIA) exam, the Certified Information Systems Auditor (CISA) exam and others.

Transfer Credit

All upper-division accounting course work (300-499) must be completed at JMU.

B.B.A. Core Component

B.B.A. Lower-Level Core Component

B.B.A. majors must complete all of the B.B.A. core components as part of their degree program. The following courses comprise the B.B.A. Lower-Level Core Component:

- COB 191. Business Analytics I 3.00 ¹
- COB 202. Interpersonal Skills 3.00
- COB 204. Computer Information Systems 3.00
- COB 241. Financial Accounting 3.00
- COB 242. Managerial Accounting 3.00 ^{4,5}
- COB 291. Business Analytics II 3.00 ²
- ECON 200. Introduction to Macroeconomics [C4GE] 3.00
- ECON 201. Introduction to Microeconomics 3.00

- MATH 205. Introductory Calculus I [C3QR] 3.00 ³
or
- MATH 235. Calculus I [C3QR] 4.00 ³

B.B.A. Upper-Level Core Component

The following courses comprise the B.B.A. Upper-Level Core Component:

- COB 300A. Integrative Business: Management 3.00 ^{5,6}
- COB 300B. Integrative Business: Finance 3.00 ^{5,6}
- COB 300C. Integrative Business: Operations 3.00 ^{5,6}
- COB 300D. Integrative Business: Marketing 3.00 ^{5,6}
- COB 318. Legal and Ethical Environment of Business 3.00 ⁷
- COB 487. Strategic Management 3.00 ⁸

Footnotes

¹ MATH 220 may be substituted for COB 191.

² COB 191 or equivalent and MATH 205 or equivalent are prerequisites for COB 291.

³ Calculus is required but not used in calculating the B.B.A. core GPA. MATH 235 is preferred for Finance majors.

⁴ COB 241 must be taken before COB 242.

⁵ COB 242 is a prerequisite for COB 300 but is not used in calculating the B.B.A. core GPA.

⁶ All four COB 300 courses must be taken during the same semester.

⁷ COB 300 is a prerequisite or corequisite for COB 318. COB 318 is a prerequisite for COB 487.

⁸ COB 487 must be taken during the senior year.

Major Requirements

Core Courses

- ACTG 295. Accounting Ethics and Social Responsibility 3.00
- ACTG 302. Introduction to the Profession: Role of Accountants 1.00
- ACTG 303. Basic Spreadsheet Skills for Accountants 1.00
- ACTG 304. Advanced Spreadsheet Skills for Analysis and Reporting Accounting Information 1.00
- ACTG 313. Accounting Information Systems 3.00
- ACTG 343. Corporate Financial Reporting I 3.00
- ACTG 344. Corporate Financial Reporting II 3.00
- ACTG 377. Federal Income Tax Accounting 3.00
- ACTG 410. Auditing 3.00
- ACTG 475. Accounting Decision Making and Control 3.00

Total: 24 Credit Hours

Recommended Schedule for Majors

First Two Years

Students planning to major in accounting must be accepted into the College of Business. Admission requirements to the College of Business require completion of 9 lower-level B.B.A. core courses. It is expected that the lower-level B.B.A. core curriculum will be completed during the first two years of study along with General Education and elective courses. Students will work with an adviser to develop their schedule of courses for the first two years.

Third and Fourth Years

Students accepted into the College of Business will begin major courses in their junior year. Students will develop an individualized schedule of course work for their junior and senior years during ACTG 302. Introduction to the Profession: Role of Accountants taken in the fall of their junior year.

Third Year

First Semester

- COB 300A. Integrative Business: Management *3.00*
- COB 300B. Integrative Business: Finance *3.00*
- COB 300C. Integrative Business: Operations *3.00*
- COB 300D. Integrative Business: Marketing *3.00*
- ACTG 302. Introduction to the Profession: Role of Accountants *1.00*
- ACTG 343. Corporate Financial Reporting I *3.00*

Total: 16 Credit Hours

Second Semester

- ACTG 303. Basic Spreadsheet Skills for Accountants *1.00*
- ACTG 344. Corporate Financial Reporting II *3.00*
- ACTG 313. Accounting Information Systems *3.00*
- General Education or electives: 9 Credit Hours

Total: 16 Credit Hours

Fourth Year

Up to seven hours of core requirements in economics and calculus may also be taken for General Education credit. Students who take the General Education packages and courses recommended by the College of Business will have only 39 credit hours of additional B.B.A. core requirements.

- Any 300 level accounting course not completed in the third year
- ACTG 295. Accounting Ethics and Social Responsibility *3.00*
- ACTG 304. Advanced Spreadsheet Skills for Analysis and Reporting Accounting Information *1.00*
- ACTG 377. Federal Income Tax Accounting *3.00*
- ACTG 410. Auditing *3.00*
- ACTG 475. Accounting Decision Making and Control *3.00*
- COB 318. Legal and Ethical Environment of Business *3.00*
- COB 487. Strategic Management *3.00*
- Any remaining General Education or electives required for graduation; consult your adviser.

Adult Degree Program

Dr. Windi Turner, **Director**

Phone: (540) 568- 4253

Email: adp@jmu.edu

Location: Ice House, 127 W. Bruce Street, Room 332

Website: <http://www.jmu.edu/adultdegree>

Mission

The Adult Degree Program (ADP) addresses the needs of adult learners through an innovative, personalized program plan of study. ADP provides students the opportunity to develop an undergraduate degree that meets their individual educational and professional goals.

Admission

Applicants must have a minimum of 30 transferable credit hours with a grade of "C" or better for each credit hour of college work. Applicants should be 22 or older.

With very limited exceptions, students in the Individualized Study major (the Adult Degree Program's academic major) cannot transfer to another major on campus.

Degrees Offered

ADP students have the opportunity to earn a Bachelor of Individualized Studies (B.I.S.), a Bachelor of Arts (B.A.) in individualized studies or a Bachelor of Science (B.S.) in individualized studies. The General Education core requirements differ by degree.

Individualized Studies, B.A.

Dr. Windi Turner, **Director**

Phone: (540) 568- 4253

Email: adp@jmu.edu

Location: Ice House, 127 W. Bruce Street, Room 332

Website: <http://www.jmu.edu/adultdegree>

Mission

The Adult Degree Program (ADP) addresses the needs of adult learners through an innovative, personalized program plan of study. ADP provides students the opportunity to develop an undergraduate degree that meets their individual educational and professional goals.

Admission

Applicants must have a minimum of 30 transferable credit hours with a grade of "C" or better for each credit hour of college work. Applicants should be 22 or older.

With very limited exceptions, students in the Individualized Studies major (the Adult Degree Program's academic major) cannot transfer to another major on campus.

Degrees Offered

ADP students have the opportunity to earn a Bachelor of Individualized Studies (B.I.S.), a Bachelor of Arts (B.A.) in individualized studies or a Bachelor of Science (B.S.) in individualized studies. The General Education core requirements differ by degree.

Program Requirements

- Completion of IS 200. Individualized Studies Major Program Development is required.
- A minimum of 120 credit hours will be required for graduation. The specific program agreement will be designed in consultation with a faculty adviser.
- A program agreement for meeting the requirements of the degree must be submitted to the Adult Degree Program office for approval while enrolled in the IS 200 course.
- To earn a B.I.S. degree, the student must complete minimum of 41 General Education credit hours.
- To earn a B.A. degree, a student must earn the above 41 credit hour requirements, plus an additional three hours of philosophy and six hours of foreign language at the intermediate (200) level for a total of 50 General Education credit hours.
- To earn a B.S. degree, a student must earn the above 41 credit hours, plus an additional three hours to meet the quantitative requirement and an additional three hours to meet the scientific literacy requirement for a total of 47 General Education credit hours.
- A student's concentration, or field of study, consists of a minimum of 30 credits, at least 24 of which must be upper-division credit (300- and 400-level courses). The concentration shall include classes from two or more academic disciplines and represent a coherent body of knowledge, which may require course work beyond the 30 minimum credit hours.
- No more than 30 credit hours of course work can be selected from courses taught by the College of Business. This 30 credit hour limit includes COB courses transferred from other colleges and nontraditional credit earned in the COB.
- The concentration must be completed with a GPA of 2.0 or better.
- A minimum of 15 credit hours in the concentration must be JMU credits.
- IS 498. Individualized Study Project, is a capstone course that is directly related to the student's concentration or field of study. The project is coordinated by a content area faculty member and must be completed with a minimum grade of "C." A final oral report must be presented on the project.
- ADP requires all students to take the Honor Code test.
- Each graduate must have earned a minimum of 30 credit hours at JMU (a maximum of eight non-traditional credits may be applied to the JMU hours requirement).
- At least 60 credit hours must be earned from four-year institutions.
- ADP students are expected to participate in assessment activities. Assessment information is used to assist faculty in modifying curricula.
- There is no residency requirement; however, program agreements that extend beyond six years may need to be amended if university policies change that affect the original program agreements.

Program of Study

As an individualized studies major, each ADP student puts together an individual program plan that includes the following: General Education Requirements – minimum of 41 credits. A listing of acceptable courses to fulfill these requirements for ADP is available from the ADP website.

- Social and Behavioral Science (6 credits)
- Humanities (6 credits)
- Natural Science (6 credits)
- Written Communications (6 credits)
- Oral Communications (3 credits)
- Mathematics (3 credits)
- US History (4 credits)
- General Education Electives (7 Credits)
- Additional Requirements for:
 - Bachelors of Science in Individualized Studies: Natural Science (3 credits) and Mathematics (3 credits)
 - Bachelors of Arts in Individualized Studies: Philosophy (3 credits) and Language (6 credits at the 200-level or higher)

Individualized Studies Major Concentration

This is the focus area of student's individualized studies degree. The concentration is cross disciplinary and is comprised of classes from two or more academic programs chosen to meet the student's educational and/or professional goals:

19. Minimum of 30 credits.
20. 24 credits must be completed in 300- or 400-level courses
21. IS 498. Individualized Study Project – capstone research project, included in the 24 upper-level course requirements
22. Electives – All other credits
23. IS 200. Individualized Studies Major Program Development (required)
24. IS 206. Researching, Writing and Documenting Prior Learning (optional, for students pursuing credit for prior learning experience only)
25. 100- and 200-level courses not used elsewhere
26. 000 general credit transfer courses

Mechanisms for Earning Credit

The number of credits, which might be accepted or earned through the following methods, is determined by the student's approved program. It is reasonable to expect that the unique educational needs, background and personal circumstances of each student will determine to a great extent the manner in which credit has been and will be earned.

17. Transfer credit
18. Credit by departmental examination
19. Credit for sponsored learning or independent studies
20. Regular course work
21. Credit for experiential learning through portfolio evaluation (See below)*
22. Credit for educational programs of the Armed Forces
23. College Level Examination Program (CLEP)*
24. American Council on Education College Credit Recommendation Service (ACE)*

*Non-traditional credits; no more than 30 non-traditional credits can be counted towards degree requirements of 120.

Online Academic Modules

Online academic modules have been developed in cooperation with academic units at the university. Students can use these modules when developing their concentration. Current modules include:

- Autism Spectrum Disorders

- Business Technology
- Entrepreneurship
- Human Resource Development
- Professional and Workplace Communication

Prior Learning Assessment

College level learning, acquired through other than traditional classroom experience, must be documented by the student. Procedures for doing so have been established by the ADP office. Requests for experiential learning credit should be submitted as soon as possible after an ADP student completes IS 200 and IS 206E . Experiential learning credit is not transferable to a traditional degree program. ADP students requesting experiential learning credit must complete IS 206E. Prior Learning Experience: Research and Writing the Portfolio . A fee is charged for each learning component evaluated by academic units for credit.

College Credit Recommendation Service

ADP accepts some but not all credits as recommended in the National Guide to Educational Credit for Training Programs and the Guide to Educational Credit by Examination prepared by the American Council on Education. Additional information on program policies and procedures is available through the ADP website.

College-Level Examination Program

The Adult Degree Program at JMU participates in the College-Level Examination Program. CLEP is a national program of credit by examination that offers students an opportunity to obtain recognition for achievement in specific college courses.

Interested individuals may schedule a CLEP test by directly contacting the Adult Degree Program office.

Credit/No-Credit

Students enrolled in ADP may take courses on a credit/no-credit basis if they have completed 28 credit hours of college course work and have a 2.25 cumulative GPA.

Courses in the area of concentration, including the senior project, may not be taken on a credit/no-credit basis. Other provisions of the credit/no-credit option, as described in this catalog, will also be in effect.

Individualized Studies, B.I.S.

Dr. Windi Turner, **Director**

Phone: (540) 568- 4253

Email: adp@jmu.edu

Location: Ice House, 127 W. Bruce Street, Room 332

Website: <http://www.jmu.edu/adultdegree>

Mission

The Adult Degree Program (ADP) addresses the needs of adult learners through an innovative, personalized program plan of study. ADP provides students the opportunity to develop an undergraduate degree that meets their individual educational and professional goals.

Admission

Applicants must have a minimum of 30 transferable credit hours with a grade of "C" or better for each credit hour of college work. Applicants should be 22 or older.

With very limited exceptions, students in the Individualized Studies major (the Adult Degree Program's academic major) cannot transfer to another major on campus.

Degrees Offered

ADP students have the opportunity to earn a Bachelor of Individualized Studies (B.I.S.), a Bachelor of Arts (B.A.) in individualized studies or a Bachelor of Science (B.S.) in individualized studies. The General Education core requirements differ by degree.

Program Requirements

36. Completion of IS 200. Individualized Studies Major Program Development is required.
37. A minimum of 120 credit hours will be required for graduation. The specific program agreement will be designed in consultation with a faculty adviser.
38. A program agreement for meeting the requirements of the degree must be submitted to the Adult Degree Program office for approval while enrolled in the IS 200 course.
39. To earn a B.I.S. degree, the student must complete minimum of 41 General Education credit hours.
40. To earn a B.A. degree, a student must earn the above 41 credit hour requirements, plus an additional three hours of philosophy and six hours of foreign language at the intermediate (200) level for a total of 50 General Education credit hours.
41. To earn a B.S. degree, a student must earn the above 41 credit hours, plus an additional three hours to meet the quantitative requirement and an additional three hours to meet the scientific literacy requirement for a total of 47 General Education credit hours.
42. A student's concentration, or field of study, consists of a minimum of 30 credits, at least 24 of which must be upper-division credit (300- and 400-level courses). The concentration shall include classes from two or more academic disciplines and represent a coherent body of knowledge, which may require course work beyond the 30 minimum credit hours.
43. No more than 30 credit hours of course work can be selected from courses taught by the College of Business. This 30 credit hour limit includes COB courses transferred from other colleges and nontraditional credit earned in the COB.
44. The concentration must be completed with a GPA of 2.0 or better.
45. A minimum of 15 credit hours in the concentration must be JMU credits.
46. IS 498. Individualized Study Project, is a capstone course that is directly related to the student's concentration or field of study. The project is coordinated by a content area faculty member and must be completed with a minimum grade of "C." A final oral report must be presented on the project.
47. ADP requires all students to take the Honor Code test.
48. Each graduate must have earned a minimum of 30 credit hours at JMU (a maximum of eight non-traditional credits may be applied to the JMU hours requirement).
49. At least 60 credit hours must be earned from four-year institutions.

50. ADP students are expected to participate in assessment activities. Assessment information is used to assist faculty in modifying curricula.
51. There is no residency requirement; however, program agreements that extend beyond six years may need to be amended if university policies change that affect the original program agreements.

Program of Study

As an individualized studies major, each ADP student puts together an individual program plan that includes the following: General Education Requirements – minimum of 41 credits. A listing of acceptable courses to fulfill these requirements for ADP is available from the ADP website.

- Social and Behavioral Science (6 credits)
- Humanities (6 credits)
- Natural Science (6 credits)
- Written Communications (6 credits)
- Oral Communications (3 credits)
- Mathematics (3 credits)
- US History (4 credits)
- General Education Electives (7 Credits)
- Additional Requirements for:
 - Bachelors of Science in Individualized Studies: Natural Science (3 credits) and Mathematics (3 credits)
 - Bachelors of Arts in Individualized Studies: Philosophy (3 credits) and Language (6 credits at the 200-level or higher)

Professors

A. Adesanya, S. Brooks, S. Choi, T. Cole, C. Diop, D. Ehrenpreis, L. Halpern, R. Hilliard, L. Katzman, J. McCaslin, D. McCusker, J. Ott, M. Rooker, K. Schwartz, M. Shanahan, R. Silberman, G. Stewart, W. Tate, L. Tubach, W. Wightman, S. Zurbrigg

Associate Professors

A. Barnes, D. Hardy, J. Erdman, R. Mertens, W. Stevens, A. Taylor, K. Tollefson-Hall

Assistant Professors

N. Brinen, D. de Wild, K. Hackett, C. Henriques, B. Hinderliter, K. Phaup, H. Sions

Mission Statement

We collaborate as creators and scholars to advance diversity and independent thought through rigorous practice and research.

Goals

The School of Art, Design and Art History discerns the following five distinct teaching goals:

- To prepare future professionals with a global perspective.
- To develop and license future leaders in the field of education.
- To enrich the general education of the JMU community.
- To offer professional instruction for students who wish to enrich their education with a second major or minor.
- To present outstanding contemporary exhibition programs.

To meet these goals, the School of Art, Design and Art History offers three degrees, a choice of five majors and select areas of emphasis. PK-12 Licensure is available to every School of Art, Design and Art History major, regardless of their degree track. Minors are offered in select areas. All degrees require a minimum of 120 credit hours. A full description of degree requirements is listed under degree requirements.

Career Opportunities and Marketable Skills

Art students at JMU have the opportunity to prepare for a wide variety of art and art-related career fields. Because the School of Art, Design and Art History educates art students as critical thinkers and creative problem solvers, graduates have an enhanced

ability to think independently, respond flexibly, work productively and compete successfully for employment in career fields that value original and thoughtful creativity. Some possible careers include:

- Advertising Designer
- Architectural Designer
- Artist
- Art Critic
- Art Educator
- Art Historian
- Ceramicist
- Conservator
- Gallery Owner
- Graphic Designer
- Illustrator
- Industrial Designer
- Jeweler
- Multimedia Designer
- Museum Curator/Educator
- Painter
- Photographer
- Printmaker
- Sculptor
- Textile Designer

To discuss specific career options, students should contact the school and make an appointment with a member of the faculty.

Accreditation

Supplementing JMU's general accreditation, all degrees offered by the School of Art, Design and Art History are professionally accredited by the National Association of Schools of Art and Design. In addition, the Art Education program is also accredited by the National Council for Accreditation of Teacher Education (now CAEP).

Special Admission Requirements

Phone: (540) 568-6216/6661 **Email:** art-arthistory@jmu.edu

Website: <http://www.jmu.edu/art>

Art History Majors

Students intending to major in art history are not required to submit a portfolio, but should follow the regular JMU admissions process. To be considered for departmental scholarships, students must submit a resume, writing sample and short essay to the department. To enroll in the museum studies concentration in art history, students must have a 3.3 GPA in the major and a minimum of nine credits in art history and general education art history courses.

Architectural Design, Art Studio, Graphic Design, and Industrial Design Majors

All prospective freshmen, transfer and change of major students intending to major in architectural design, graphic design or studio art must meet JMU admission requirements as stated in the Undergraduate Catalog. In addition to meeting JMU admission requirements, all students seeking the BFA in architectural design, art studio or graphic design, or the BS in industrial design are required to submit a portfolio to the school's SlideRoom account (<https://jmuart.slideroom.com>). The submission of a portfolio is optional for students seeking the BA and BS in art studio. All students, regardless of degree type, who wish to be considered for a scholarship must submit a portfolio to SLideRoom. The submission of a portfolio is seen as evidence of a student's interest and potential for future success in art. The deadline for submitting portfolios to the school's SlideRoom site is the first Monday after the last portfolio review day in the spring semester. There is a \$10 charge for this submission.

Transfer and Change of Major Students

Transfer and change of major students seeking the BFA in architectural design, art studio, or graphic design or the BS in industrial design are required to submit a portfolio and also need to upload unofficial transcripts and a statement of intent to the school's SlideRoom account that explains their educational and artistic goals, articulating the reasons for choosing this area of study.

On-Campus Portfolio Review Days and Scholarships

All students who would like to be considered for scholarships are required to attend one of the on-campus portfolio review days. Students will show their original art and participate in a faculty interview. If time-based media examples (video and animation) are included, students will need to bring their own digital device for presentation purposes. Refer to the SADAH website for the dates of the upcoming portfolio review days and for additional portfolio requirements. All scholarship awards are based on merit and vary in amount, up to the full cost of tuition. Tours of facilities and program information sessions will take place at on-campus events.

Off-Campus Portfolio Review Days

The SADAH also offers students the opportunity for feedback on their portfolio, prior to their digital submission and before an on-campus portfolio scholarship interview. The portfolio review events provide an opportunity for feedback on actual artwork, as well as an opportunity to meet with faculty from the school. All prospective freshmen, transfer and change of major students are strongly encouraged to attend a portfolio review day, on or off campus, prior to submitting their portfolio.

Graphic Design

Students seeking official acceptance into the graphic design major must enroll in GRPH 208 and submit a portfolio representing work completed in GRPH 101 , GRPH 200 and GRPH 206. Students not admitted may reapply the following semester.

Architectural Design

Students seeking official acceptance into the architectural design major must enroll in ARCD 208 and submit a portfolio representing work completed in ARCD 200 and ARCD 202. Students not admitted may reapply the following year.

Industrial Design

Students seeking acceptance into the advanced industrial design courses must enroll in INDU 208 and submit a portfolio representing work comprised of projects completed in INDU 200, INDU 202, GRPH 101, INDU 220, INDU 380 and independent design related work. Students not admitted may reapply one time.

Cross Disciplinary Minor

- Book Arts Minor

Architectural Design, B.F.A.

Coordinator: Jori Erdman

Phone: (540) 568-3318

Email: erdmanja@jmu.edu

The B.F.A. in architectural design educates future design leaders. It is an intensive program focused on rigorous design processes. Architectural design is approached holistically—emphasizing investigations into the nature of materials and objects, interior space, ergonomics, history and theory, programmatic invention, functional poetics, and collaboration across disciplines. The curriculum instills purpose, craft, technological competencies and versatile thinking.

Admission Requirements

Admission to the B.F.A. in architectural design is selective and competitive for a limited number of reserved seats in upper-division (300-400 level) architectural design courses. Declaration of architectural design as a major and completion of lower-division (100-200) prerequisite art courses does not guarantee admission into the program. Admission to upper-division ARCD courses is based on completion of all prerequisite art courses and merit as determined by faculty review of portfolios submitted in satisfaction of the course ARCD 208. Portfolio Review.

ARCD 208 is a 0 credit, pass/fail course that functions as a prerequisite to enrollment in 300-400 level architectural design courses. Students should enroll in ARCD 208 during the semester in which they are enrolled in ARCD 202. ARCD 208 portfolios are reviewed during the spring semester (February) prior to pre-registration. Students should contact the area coordinator of architectural design to determine the exact time and location for the ARCD 208 portfolio review.

Any art major may take ARCD 200 and ARCD 202, but is restricted from taking any 300-400 level architectural design course until ARCD 208 has been taken and passed.

Accepted students who receive a passing grade for ARCD 208 will be able to register for ARCD upper-division courses for the following semester. Students not accepted will have one opportunity to reapply the following spring semester or may choose to continue in another major within the SADAH.

Degree Requirements

Required Courses

- General Education courses *41 Credit Hours*¹
- University electives *1 Credit Hours*
- Major requirements (listed below) *78 Credit Hours*

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

Total: 120 Credit Hours

Major Requirements

This major requires 78 credit hours in art, art history and art-related courses; 45 must focus on architectural design.

Required Courses

Foundation Courses: 18 Credit Hours

- ART 102. Two-Dimensional Design (0,6) *3.00*
- ART 104. Drawing I (0,6) *3.00*
- ART 106. Three-Dimensional Design (0,6) *3.00*
- ART 108. Drawing II (0,6) *3.00*
- ARTH 205. Survey of World Art I: Prehistoric to Renaissance [C2VPA] *3.00*
- ARTH 206. Survey of World Art II: Renaissance to Modern [C2VPA] *3.00*

Required Concentration Courses: 51 Credit Hours

- ARCD 200. Architect Design Studio I *6.00*
- ARCD 202. Architect Design Studio II *6.00*
- ARCD 208. Portfolio Review *0.00*
- ARCD 220. CAD I: 3D Modeling *3.00*
- ARCD 300. Architect Design Studio III *6.00*
- ARCD 302. Architect Design Studio IV *6.00*
- ARCD 330. Materials and Methods I *3.00*
- ARCD 370. History of Architecture *3.00*
- ARCD 376. Modern Architecture *3.00*
- ARCD 400. Architect Design Studio V *6.00*
- ARCD 402. Architect Design Studio VI *6.00*
- ARCD 440. Professional Design Practices *3.00*
- ARCD 496. Internship *0.00*

Art, Design and Art History Electives: 9 Credit Hours

Studio art, design and art history electives may include courses from general fine arts, graphic design, industrial design, art education, architectural design, internships and art history with a minimum of three credits at the 300-400 level excluding courses taken in the required major, ARTH 490, ARTH 495 and ARTH 499.

Total: 78 Credit Hours

Recommended Schedule for Majors

First Year

- General Education *12 Credit Hours*
- Art Foundations *18 Credit Hours*

Total: 30 Credit Hours

Second Year

- ARCD 200. Architect Design Studio I *6.00*
- ARCD 202. Architect Design Studio II *6.00*
- ARCD 220. CAD I: 3D Modeling *3.00*
- ARCD 208. Portfolio Review *0.00* (spring)
- ARCD 370. History of Architecture *3.00*
- ARCD 376. Modern Architecture *3.00*
- General Education *15 Credit Hours*

Total: 36 Credit Hours

Third Year

- ARCD 300. Architect Design Studio III *6.00*
- ARCD 302. Architect Design Studio IV *6.00*
- ARCD 330. Materials and Methods I *3.00*
- ARCD 440. Professional Design Practices *3.00*
- ARCD 496. Internship *0.00*¹
- Art, Design and Art History Elective Courses
- General Education *6 Credit Hours*

Total: 30 Credit Hours

Fourth Year

- ARCD 400. Architect Design Studio V *6.00*
- ARCD 402. Architect Design Studio VI *6.00*
- Art, Design and Art History Elective Courses
- General Education *9 Credit Hours*

Total: 27 Credit Hours

Footnotes

¹ ARCD 496 is typically completed during the summer.

Art Education Professional PK-12 Licensure

Coordinator: Dr. Karin Tollefson-Hall

Phone: (540) 568-4304

Email: tollefk1@jmu.edu

Art education professional PK-12 licensure is available to all studio and design majors. In addition to the general education and academic major requirements, students desiring PreK-12 teaching licensure in art must complete 23 credits of additional course work in art education, education and psychology, and 16 credits of student teaching. It is necessary to be admitted to the teacher education program prior to enrolling in professional education courses. For a complete description of admission and retention policies and procedures for teacher education, refer to the College of Education.

Students seeking licensure are encouraged to consult regularly with the program coordinator of art education. The undergraduate degree leading to licensure must include the following minimum requirements in art:

- Nine credits must be earned in art history and art appreciation.
- Six credits must be earned in ceramics and crafts, with a minimum of one course in ceramics.
- Six credits must be earned in three-dimensional media, with one course in sculpture.
- Twelve credits must be earned in four different two-dimensional media.
- Twenty-seven studio credits, with a minimum of six credits in each of three separate studio areas.

Course Requirements

The following is a list of the required courses leading to PK-12 art licensure and a suggested sequence of when each may be taken.

Required Courses

- ART 304. Methods of Art Criticism *3.00* (spring, second year)
- ARED 300. Elementary Art Education Methods (1, 4) *3.00* (fall, third year)
- ARED 302. Secondary Art Education Methods *3.00* (spring, third year)
- ARED 400. Visual Arts Across the Curriculum (1,4) *3.00* (fall, fourth year)
- ARED 490. Field Experiences in Art Education *1.00-3.00* (repeatable; taken concurrently with ARED 300, ARED 302 and ARED 400)

Total: 15 Credit Hours

Required Education and Psychology Courses

Required Courses

- PSYC 160. Life Span Human Development [C5SD] *3.00*¹
- EDUC 300. Foundations of American Education *3.00*
- LED 420. Content Area Literacy, K-12 *2.00*
- ARED 480. Student Teaching *8.00*
(taken twice for a total of *16 Credit Hours*)

Total: 24 Credit Hours

Footnote

¹ PSYC 160 may double-count toward General Education Cluster Five

Art History Minor

Minor Requirements

Students enrolled in any degree program may minor in art history by completing a minimum of 18 credit hours in art history courses, as the following chart shows. At least six of these credit hours must be 400-level art history courses. The student's minor program is subject to approval by the school director.

Required Courses

- ARTH 205. Survey of World Art I: Prehistoric to Renaissance [C2VPA] 3.00
- ARTH 206. Survey of World Art II: Renaissance to Modern [C2VPA] 3.00
- Art history courses (300-400 level) 12 Credit Hours ¹

Total: 18 Credit Hours

Footnote

¹ For studio art, graphic design and architectural design majors, required ARTH courses in the art emphasis program may count toward the art history minor. Excludes ARTH 390, ARTH 490, ARTH 495 and ARTH 499.

Art History, B.A.

Coordinator: Dr. Maureen Shanahan

Phone: (540) 568-6029

Email: shanahmg@jmu.edu

The Bachelor of Arts in art history is intended for students who wish to study the history of the visual arts, including the cultural and social context in which they were created. It is the mission of the art history program to educate students with a global perspective on the arts.

Western art history is emphasized, coupled with opportunities to study the art of select non-Western traditions. Students majoring in art history will develop a general knowledge of the principle monuments and artists of all major historical art periods. Students also will:

- Become acquainted with the art history of non-Western cultures.
- Locate unfamiliar works within major style periods and cultures.
- Describe, analyze and interpret the form and content of individual works of art in relation to the cultures from which they originate.
- Recognize major art media.
- Understand at least three major historical periods of art in detail.

- Become familiar with art history theory and methods of analysis and criticism.
- Research and write about significant artists, artistic events, periods and artistic concepts.

The art history program encourages majors and minors to participate in internship opportunities at museums, galleries and other art related settings, and it provides up-to-date information about jobs and graduate programs in art history and related fields. Visiting scholars, campus art exhibitions, trips to major museums and the JMU Study Abroad program provide students with opportunities to study and apply their art history knowledge outside the classroom. Upon completion of the art history major, students will have been exposed to a broad background and knowledge of the opportunities for graduate school and employment. The art history program also advocates cross disciplinary education and actively supports students who double major with other disciplines.

Internship/Independent Study Credit

A maximum of three credits of art history internship, independent study or honors course work may be applied toward the major in art history. A student may petition the art history coordinator to apply six credit hours toward the art history major if the internship or independent study course work is directly relevant to the student's interests and career goals.

Requirements for Art History as a Second Major

Students in any degree program may study art history as a second major by completing the 39 credit art history requirement. Students studying art history as a second major do not need to complete the requirements for the B.A. degree if their first major will complete the requirements for a different baccalaureate degree. However, non-B.A. degree students completing art history as a second major are strongly encouraged to complete the B.A. foreign language requirement.

Degree Requirements

Required Courses	Credit Hours
General Education ¹	41
Foreign Language classes (intermediate level required) ²	0-14
Philosophy course (in addition to General Education courses) ³	
University electives ³	23-37
Major requirements	39
	120

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² The foreign language requirement may be satisfied by successful completion of the second semester of the intermediate level of the student's chosen language (typically 232) or by placing out of that language through the Department of Foreign Language, Literature and Culture's placement test.

³ Depends on number of hours needed to fulfill the B.A. foreign language requirement. If they are completed in six hours, students should use the larger number of general electives to complete a second major or minor that complements art or art history or, for students intending to pursue graduate degrees, to gain reading knowledge of a second foreign language.

Major Requirements

The major in art history requires 39 credit hours in art history and studio courses, as the following chart shows. At least six of these credit hours must be 400-level art history courses.

Core courses at the 200 level are broad interpretive overviews of art history that combine lecture and discussion to permit students to learn the content and chronology of world art history; to learn how art historians collect, analyze and synthesize evidence; and engage in introductory exercises in the discipline. They generally include short formal writing assignments and exams with essay sections.

Distributives at the 300 level also combine lecture and discussion, more narrowly survey specific periods or cultures and address aspects of art historical methodology. These courses require longer formal writing assignments and include student research. Courses at the 400 level are seminars on specialized topics that center on advanced student research. A single course may not fulfill more than one distribution requirement.

Required Courses

- ARTH 205. Survey of World Art I: Prehistoric to Renaissance [C2VPA] 3.00
- ARTH 206. Survey of World Art II: Renaissance to Modern [C2VPA] 3.00
- ARTH 300. Art History Seminar 3.00 ¹
- ARTH 400. Art History Research Portfolio 0.00

Non-Western Electives (choose one of the following):

- ARTH 312. African Art: Sub-Saharan 3.00
- ARTH 325. Topics in Non-Western Art and Architecture 3.00-9.00
- ARTH 418. Modern and Contemporary African Art 3.00
- ARTH 419. Topics in African Art 3.00
- ARTH 424. Arts of Ancient Egypt 3.00
- ARTH 425. Advanced Topics in Non-Western Art 3.00
- ARTH 484. Art of the Americas 3.00

Cross-Cultural Electives (choose one of the following):

- ARTH 326. Topics in Cross-Cultural Art 3.00-9.00
- ARTH 332. Islamic Art and Architecture 3.00
- ARTH 426. Advanced Topics in Cross-Cultural Art 3.00-9.00
- ARTH 440. City of Jerusalem 3.00
- ARTH 446. Renaissance Art and the East 3.00
- ARTH 488. African American Art 3.00

Pre-Modern Elective (choose one of the following):

- ARTH 312. African Art: Sub-Saharan 3.00
- ARTH 327. Topics in Pre-Modern Art 3.00
- ARTH 332. Islamic Art and Architecture 3.00
- ARTH 346. Italian Renaissance Art 3.00
- ARTH 424. Arts of Ancient Egypt 3.00
- ARTH 427. Advanced Topics in Pre-Modern Art 3.00
- ARTH 439. Topics in Medieval Art 3.00

- ARTH 440. City of Jerusalem 3.00
- ARTH 446. Renaissance Art and the East 3.00
- ARTH 449. Topics in Renaissance Art 3.00
- ARTH 484. Art of the Americas 3.00

Modern and Contemporary Elective (choose one of the following):

- ARTH 304. History of Photography 3.00
- ARTH 328. Topics in Modern and Contemporary Art 3.00
- ARTH 360. Nineteenth Century Art 3.00
- ARTH 372. Modern Art From 1900-1945 3.00
- ARTH 380. American Art to 1870 3.00
- ARTH 382. American Art from 1870 3.00
- ARTH 404. Topics in the History of Photography 3.00
- ARTH 406. Monticello 3.00
- ARTH 418. Modern and Contemporary African Art 3.00
- ARTH 419. Topics in African Art 3.00
- ARTH 428. Advanced Topics in Modern and Contemporary Art 3.00
- ARTH 459. Topics Seventeenth and Eighteenth Century Art 3.00
- ARTH 469. Topics in Nineteenth Century Art 3.00
- ARTH 471. Commemoration and Controversy: Public Art in America 3.00
- ARTH 472. Modern Art Since 1945 3.00
- ARTH 479. Topics in Twentieth Century Art 3.00
- ARTH 488. African American Art 3.00

Additional Courses

Art history electives (300-400 level)¹ 12 credit hours

Studio art and design electives (any level)²6 credit hours

Total: 39 Credit Hours

Footnotes

¹ ART 305. Seminar in Aesthetics, may count as an art history elective. A maximum of three credits from ARTH 490, ARTH 495 or ARTH 499 may count toward the major.

² ART 200. Art in General Culture [C2VPA] may not count as a studio art and design elective.

Recommended Schedule For Majors

First Year

Choose one of the following: 3 credit hours

- ARTH 205. Survey of World Art I: Prehistoric to Renaissance [C2VPA] 3.00
or
- ARTH 206. Survey of World Art II: Renaissance to Modern [C2VPA] 3.00

- Foreign language courses 6 *Credit Hours*
- Cluster One: Skills for the 21st Century 9 *Credit Hours*
- General Education course 3-6 *Credit Hours*
- General electives 6-9 *Credit Hours*

Total: 30 Credit Hours

Second Year

Choose one of the following: 3 credit hours

- 5. ARTH 205. Survey of World Art I: Prehistoric to Renaissance [C2VPA] 3.00
or
- ARTH 206. Survey of World Art II: Renaissance to Modern [C2VPA] 3.00

- Choose foreign language (if needed) or general electives 6 *Credit Hours*
- General Education courses 18 *Credit Hours*
- Studio Art elective 3 *Credit Hours*

Total: 30 Credit Hours

Third Year

- Non-Western art history elective 3 *Credit Hours*
- Western art history electives 6 *Credit Hours*
- ARTH 300. Art History Seminar 3.00
- General electives 3 *Credit Hours*
- Studio Art elective 3 *Credit Hours*
- General Education courses 12 *Credit Hours*

Total: 30 Credit Hours

Fourth Year

- Art History electives 12 *Credit Hours*
- General electives 18 *Credit Hours*

Total: 30 Credit Hours

Art History, Museum Studies Concentration, B.A.

Coordinator: Maureen Shanahan

- Choose foreign language (if needed) or general electives *6 Credit Hours*
- General Education courses *18 Credit Hours*
- Studio Art Elective *3 Credit Hours*

Total: 30 Credit Hours

Third Year

- Non-Western art history elective *3 Credit Hours*
- Western art history electives *6 Credit Hours*
- ARTH 300. Art History Seminar *3.00*
- General electives *3 Credit Hours*
- Studio Art elective *3 Credit Hours*
- General Education courses *12 Credit Hours*

Total: 30 Credit Hours

Fourth Year

- Art History electives *12 Credit Hours*
- General electives *18 Credit Hours*

Total: 30 Credit Hours

Internship/Independent Study Credit

A maximum of three credits of art history internship, independent study or honors course work may be applied toward the major in art history. A student may petition the art history coordinator to apply six credit hours toward the art history major if the internship or independent study course work is directly relevant to the student's interests and career goals.

Concentration Requirements

The museum studies concentration enriches the art history curriculum by offering course work that examines the critical role that museums have played in constructing the discipline and pedagogy of art history. History and theory-oriented classes will introduce students to the role and function of museums in society and the ways in which museums both reflect and perpetuate the values of the cultures that create them. Experiential practica or internship courses will expose students to the wide range of work conducted in museums, including curation, collections management, conservation, education, design and installation, media and public relations, publications, development and administration.

While the concentration is academic and not vocational, it offers students valuable hands-on experience beneficial for admission into graduate school and entry into the competitive market of art-related professions. Virginia is a state that boasts a plethora of art museums, house museums, history museums, and historic and archaeological sites. Art history majors who complete the concentration will be well positioned for seeking employment in regional and state museums.

The museum studies concentration consists of five courses (15 credit hours). Students are required to complete three core courses and two elective courses. Students may only count three credit hours toward both the art history major and the museum studies concentration.

A 3.3 GPA in the minimum of nine credits in Art History (ARTH) and General Education Art History (ARTH) courses are required to enroll in the concentration. To apply, students submit an unofficial transcript to the area coordinator. Students may apply to the concentration in the fall or spring semester, but no later than the last day of the course add registration deadline.

Required Courses

- ARTH 394. Introduction to Museum Work *3.00*
or
- HIST 394. Introduction to Museum Work *3.00*

- ARTH 408. The Museum: History and Controversies *3.00*
or
- HIST 408. The Museum: Histories and Controversies *3.00*

- ARTH 495. Internship in Art History *1.00 - 3.00*

Electives (choose two of the following):

- ARTH 301. Institutions and Professions in Art History *3.00*
- ARTH 309. Topics in Museum Studies *3.00*

- ARTH 396. Introduction to Public History *3.00*
or
- HIST 396. Introduction to Public History *3.00*

- ARTH 406. Monticello *3.00*
or
- HIST 406. Monticello *3.00*

- ARTH 409. Topics in Museum Studies *3.00*
- ARTH 491. Exhibition Seminar *3.00*

- ARTH 492. Material Culture *3.00*
or
- ANTH 492. Material Culture *3.00 (A)*
or
- HIST 492. Material Culture *3.00*

- ARTH 493. Historic Preservation *3.00*
or
- HIST 493. Historic Preservation *3.00*

- ANTH 494. Field Techniques in Archaeology *4.00 - 8.00 (A,F)*
- HIST 440. The History Museum *3.00*

Total: 15 Credit Hours

Art Minor

The art minor attempts to:

- Broaden students' understandings of the value and role of the visual arts in general culture.
- Deepen their appreciation for personal artistic production.
- Enhance their creativity and ability to think independently.

Minor Requirements

A minimum of 18 credit hours is required for the art minor.

Required Courses

- ART 102. Two-Dimensional Design (0,6) *3.00*
- ART 104. Drawing I (0,6) *3.00*

- Art or art-related courses (any level) *6 Credit Hours*¹
- Art or art-related courses (300-400 level) *6 Credit Hours*²

Total: 18 Credit Hours

Footnotes

¹ Art and design studio courses are restricted to ARCD, ART, GRPH and INDU courses, but do not include ART 200, ART 205, ART 304, ART 305, ART 491, ART 493, ART 496 and ART 499.

² These 300-400 level courses cannot count toward the students' major(s).

Art, Studio, B.A.

Coordinator: Robert Mertens

Phone: (540) 568-6883

Email: mertenj@jmu.edu

The B.A. in studio art is designed for students who seek a breadth of knowledge in the visual arts and who have an interest or background in the humanities and foreign language. The studio art faculty is made up of practicing artists who work closely with the students, and students also work closely with each other as they develop their studio practice. Visiting artists and scholars, workshops, field trips and frequent on-campus exhibitions of professional artwork enhance student engagement with contemporary art. Additionally, students have opportunities to exhibit and present their artwork, to assist in running on-campus galleries and studio art labs and to partake in other hands-on art experiences.

Students graduating with a B.A. in Studio Art will:

- Display technical command of at least one medium and display fluency in a range of media.
- Effectively analyze and apply two- and three-dimensional design principles and devices
- Develop an independent line of creative inquiry that embraces risk-taking and inventive solutions
- Knowledgeably critique and contextualize their artwork to cultivate expressive ideas and meaningful content
- Demonstrate awareness of contemporary art and art history within a global context

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Foreign Language courses (intermediate level required) *0-14 Credit Hours*²
- Philosophy course (in addition to General Education courses) *3 Credit Hours*
- University electives *17-31 Credit Hours*
- Major requirements (listed below) *45 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² The foreign language requirement may be satisfied by successful completion of the second semester of the intermediate level of the student's chosen language (typically 232) or by placing out of that language through the Department of Foreign Language, Literature and Culture's placement test.

Major Requirements

The studio art major requires a minimum of 45 credit hours in art and art history.

Required Art Courses

Foundation Courses

- ART 102. Two-Dimensional Design (0,6) 3.00
- ART 104. Drawing I (0,6) 3.00
- ART 106. Three-Dimensional Design (0,6) 3.00
- ARTH 205. Survey of World Art I: Prehistoric to Renaissance [C2VPA] 3.00
- ARTH 206. Survey of World Art II: Renaissance to Modern [C2VPA] 3.00

3-D Studio Art courses (choose one of the following):

- ART 220. Introductory Ceramics: Potter's Wheel (0,9) 3.00
- ART 222. Introductory Ceramics: Handbuilding (0,9) 3.00
- ART 232. Introduction to Fiber Arts: Structures 3.00
- or
- ART 234. Introduction to Fiber Arts: Surfaces 3.00
- ART 240. Metal & Jewelry (0,9) 3.00
- ART 280. Sculpture (0,9) 3.00

Additional Courses

- Studio art courses (300-400 level) 6 *Credit Hours* ¹
- Art electives (any level) 9 credits ²
- General art electives (any level) 9 *Credit Hours* ³
- Art history elective (300-400 level) 3 *Credit Hours* ⁴

Total: 45 Credit Hours

Footnotes

¹ The six credits of studio art electives (300-400 level) must be taken in a single studio area. Graphic design and architectural design course credits cannot count as a concentration area. Studio art credits cannot be double-counted.

² A minimum of nine credit hours of general art electives must consist of studio-based courses with an ART prefix (excluding ART 200, ART 304, ART 305, ART 491, ART 493 and ART 496).

³ The other nine credit hours of general art electives must consist of any courses with the prefix ARCD, ARED, ART, ARTH, GRPH and INDU.

⁴ Excludes ARTH 490, ARTH 495 and ARTH 499.

Recommended Schedule for Majors

First Year

- ART 102. Two-Dimensional Design (0,6) *3.00*
- ART 104. Drawing I (0,6) *3.00*
- ART 106. Three-Dimensional Design (0,6) *3.00*
- ARTH 205. Survey of World Art I: Prehistoric to Renaissance [C2VPA] *3.00*
- Cluster One: Skills for the 21st Century *9 Credit Hours*
- General Education courses *9 Credit Hours*

Total: 30 Credit Hours

Second Year

- ARTH 206. Survey of World Art II: Renaissance to Modern [C2VPA] *3.00*
- Required studio art course *3 Credit Hours*
- Foreign language courses (if needed) *6 Credit Hours*
- General Education courses *12 Credit Hours*
- General art electives (any level) *6 Credit Hours*

Total: 30 Credit Hours

Third Year

- Art history elective (300-400 level) *3 Credit Hours*
- General art electives (any level) *9 Credit Hours*
- General electives *6 Credit Hours*
- B.A. philosophy requirement *3 Credit Hours*
- General Education courses *9 Credit Hours*

Total: 30 Credit Hours

Fourth Year

- Studio art courses (300-400 level) *6 Credit Hours*
- Art or general electives *24 Credit Hours*

Total: 30 Credit Hours

Art, Studio, B.F.A.

Coordinator: Rob Mertens

Email: mertenjr@jmu.edu

Phone: (540) 568-3860

The B.F.A. in Studio Art offers concentrations in ceramics, fibers, metals, painting and drawing, photography, printmaking and sculpture, and it is designed for students who aspire to develop a professional art practice as expansively defined in today's world. Students are prepared to produce and exhibit art and to pursue further study at the graduate level.

The studio art faculty is made up of practicing artists who work closely with the students, and students also work closely with each other as they develop their studio practice. Visiting artists and scholars, workshops, field trips and frequent on-campus exhibitions of professional artwork enhance student engagement with contemporary art. Additionally, students have opportunities to exhibit and present their artwork, to assist in running on-campus galleries and studio art labs and to partake in other hands-on art experiences.

Students graduating with a B.F.A. in studio art will:

- Display technical command of at least one medium and display fluency in a range of media
- Effectively analyze and apply two- and three-dimensional design principles and devices
- Develop an independent line of creative inquiry that embraces risk-taking and inventive solutions
- Knowledgeably critique and contextualize their artwork to cultivate expressive ideas and meaningful content
- Demonstrate awareness of contemporary art and art history within a global context

Degree Requirements

Required Courses

- General Education courses *41 Credit Hours*¹
- University elective *1 Credit Hours*
- Major requirements (listed below) *78 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

Major and Concentration Requirements

The general fine arts concentration requires 78 credit hours in art, art history and art related courses.

Required Art Courses

Foundation Courses

- ART 102. Two-Dimensional Design (0,6) 3.00
- ART 104. Drawing I (0,6) 3.00
- ART 106. Three-Dimensional Design (0,6) 3.00
- ART 108. Drawing II (0,6) 3.00
- ARTH 205. Survey of World Art I: Prehistoric to Renaissance [C2VPA] 3.00
- ARTH 206. Survey of World Art II: Renaissance to Modern [C2VPA] 3.00

Studio art courses (choose six of the following): 18 Credit Hours

Courses cannot be double-counted in studio concentration.

- ART 220. Introductory Ceramics: Potter's Wheel (0,9) 3.00
or
- ART 222. Introductory Ceramics: Handbuilding (0,9) 3.00
- ART 232. Introduction to Fiber Arts: Structures 3.00
or
- ART 234. Introduction to Fiber Arts: Surfaces 3.00
- ART 240. Metal & Jewelry (0,9) 3.00
- ART 252. Introductory Painting (0,9) 3.00
- ART 260. Introductory Photography: Black and White (0,9) 3.00
- ART 270. Printmaking: Screenprint (0,9) 3.00
or
- ART 272. Printmaking: Relief and Intaglio 3.00
or
- ART 274. Printmaking: Lithography (0,9) 3.00
- ART 280. Sculpture (0,9) 3.00
- GRPH 200. Image Making (0, 6) 3.00

Studio Concentration (choose one of the following): 15 Credit Hours

Credits taken to fulfill the studio concentration must be taken in a single studio area.

Ceramics

- ART 220. Introductory Ceramics: Potter's Wheel (0,9) 3.00
- ART 222. Introductory Ceramics: Handbuilding (0,9) 3.00
- ART 320. Intermediate Ceramics: Molds & Casting (0,9) 3.00
- ART 322. Intermediate Ceramics: Surface Development (0,9) 3.00
- ART 420. Advanced Ceramics: Portfolio Development (0,9) 1.00 - 3.00, *repeatable* (repeatable to 9 credits)

Fiber Arts

- ART 230. Introduction to Fiber Processes (0,9) 3.00
- ART 232. Introduction to Fiber Arts: Structures 3.00
- ART 234. Introduction to Fiber Arts: Surfaces 3.00

- ART 330. Intermediate Fiber Processes (0, 9). 3 credits, repeatable 3.00
- ART 430. Advanced Fiber Processes 1.00 - 3.00, repeatable
- ART 432. Digital Processes in Fibers 3.00
- ART 434. Collaboration in Fiber Arts 3.00
- ART 436. Woven Structures in Fiber Arts 3.00
- ART 438. Iterative Structures in Fiber Arts 3.00

Metals and Jewelry

- ART 240. Metal & Jewelry (0,9) 3.00
- ART 340. Intermediate Metal & Jewelry (0,9) 3.00
- ART 440. Advanced Metal and Jewelry (0,9) 1.00 - 3.00, repeatable
- An additional 6 credits in ART 340 and/or ART 440

Painting and Drawing

- ART 252. Introductory Painting (0,9) 3.00
- ART 350. Figure Drawing (0,9) 3.00
- ART 352. Intermediate Painting 3.00
- ART 452. Advanced Painting (0,9) 1.00 - 3.00, repeatable (repeat for credit)

Photography

- ART 260. Introductory Photography: Black and White (0,9) 3.00
- ART 360. Intermediate Photography: Digital (0,9) 3.00

Complete three of the following courses:

- ART 362. Intermediate Photography: Experimental Black & White (0,9) 3.00
- ART 364. Intermediate Photography: Large Format (0,9) 3.00
- ART 460. Advanced Photography: Alternative Processes (0,9) 1.00 - 3.00
- ART 462. Advanced Photography: the Prehistory of Photography, Magic and Illusion 1.00 - 3.00
- ART 464. Advanced Photography: The Photograph as Document 3.00
- ART 466. Advanced Photography: Performance for the Lens 3.00
- ART 468. Advanced Photography: Screen-Based Photo/Video 3.00
- ART 469. Photography: Portfolio Development (0,9) 1.00 - 3.00, repeatable

Printmaking

- ART 270. Printmaking: Screenprint (0,9) 3.00
- ART 272. Printmaking: Relief and Intaglio 3.00
- ART 274. Printmaking: Lithography (0,9) 3.00
- ART 470. Advanced Printmaking (0,9) 1.00 - 3.00, repeatable (repeatable to 6 credits)

Sculpture

- ART 280. Sculpture (0,9) 3.00

- ART 380. Intermediate Sculpture (0,9) 3.00
- ART 480. Advanced Sculpture (0,9) 1.00 - 3.00, *repeatable* (repeatable to 9 credits)

Art History electives (300-400 level): 6 Credit Hours

Excludes ARTH 490, ARTH 495 and ARTH 499.

Art and art-related electives: 21 Credit Hours

Studio art and art-related electives may include courses from graphic design, architectural design, art education independent study, industrial design, internships and study abroad studio courses but excludes courses taken to fulfill the studio concentration.

Total: 78 Credit Hours

Recommended Schedule for Majors

First Year

- ART 102. Two-Dimensional Design (0,6) 3.00
- ART 104. Drawing I (0,6) 3.00
- ART 106. Three-Dimensional Design (0,6) 3.00
- ART 108. Drawing II (0,6) 3.00
- Cluster One: Skills for the 21st Century 9-12 *Credit Hours*
- General Education: The Human Community courses 3-6 *Credit Hours*

Total: 30 Credit Hours

Second Year

- ARTH 205. Survey of World Art I: Prehistoric to Renaissance [C2VPA] 3.00
- ARTH 206. Survey of World Art II: Renaissance to Modern [C2VPA] 3.00
- Required two- and three-dimensional studio art electives 9 *Credit Hours*
- Studio concentration 6 *Credit Hours*
- General Education: The Human Community courses 9 *Credit Hours*

Total: 30 Credit Hours

Third Year

- Art history elective (300-400 level) 3 *Credit Hours*
- Required two- and three-dimensional studio art electives 9 *Credit Hours*
- Studio concentration 6 *Credit Hours*
- General or art electives (any level) 6 *Credit Hours*
- General Education: The Human Community courses 6 *Credit Hours*

Total: 30 Credit Hours

Fourth Year

- Art history elective (300-400 level) *3 Credit Hours*
- Studio concentration *6 Credit Hours*
- General or art electives *9 Credit Hours*
- General Education: The Human Community courses *12 Credit Hours*

Total: 30 Credit Hours

Art, Studio, B.S.

Coordinator: Robert Mertens

Email: mertenj@jmu.edu

Phone: (540) 568-6883

The B.S. in studio art is designed for students who seek a breadth of knowledge in the visual arts and who have an interest or background in math, the natural sciences or the social sciences. The studio art faculty is made up of practicing artists who work closely with the students, and students also work closely with each other as they develop their studio practice. Visiting artists and scholars, workshops, field trips and frequent on-campus exhibitions of professional artwork enhance student engagement with contemporary art. Additionally, students have opportunities to exhibit and present their artwork, to assist in running on-campus galleries and studio art labs and to partake in other hands-on art experiences.

Students graduating with a B.S. in studio art will:

- Display technical command of at least one medium and display fluency in a range of media
- Effectively analyze and apply two- and three-dimensional design principles and devices
- Develop an independent line of creative inquiry that embraces risk-taking and inventive solutions
- Knowledgeably critique and contextualize their artwork to cultivate expressive ideas and meaningful content
- Demonstrate awareness of contemporary art and art history within a global context

Required Courses

- General Education requirements *41 Credit Hours*¹
- Quantitative requirement *3 Credit Hours*²
- Scientific Literacy requirement *3 Credit Hours*²
- University electives *28 Credit Hours*
- Major requirements (listed below) *45 Credit Hours*³

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² In addition to course work taken to fulfill General Education requirement.

³ A minimum of nine credit hours of general art electives must consist of studio-based courses with an ART prefix (excluding ART 200, ART 304, ART 305, ART 491, ART 493 and ART 496). The other six credit hours of general art electives must consist of any courses with the prefix ARCD, ARED, ART, ARTH, GRPH and INDU.

Major Requirements

The studio arts major requires 45 credit hours in art and art history courses.

Required Courses

Foundation Courses

- ART 102. Two-Dimensional Design (0,6) 3.00
- ART 104. Drawing I (0,6) 3.00
- ART 106. Three-Dimensional Design (0,6) 3.00
- ARTH 205. Survey of World Art I: Prehistoric to Renaissance [C2VPA] 3.00
- ARTH 206. Survey of World Art II: Renaissance to Modern [C2VPA] 3.00
- Studio art electives (300-400 level) 6 *Credit Hours* ¹
- Art electives (any level) 9 credits ²
- General art electives (any level) 9 *Credit Hours* ³
- Art history elective (300-400 level) 3 *Credit Hours* ⁴

3-D Studio Art courses (choose one of the following): 3 Credit Hours

- ART 220. Introductory Ceramics: Potter's Wheel (0,9) 3.00
- ART 222. Introductory Ceramics: Handbuilding (0,9) 3.00
- ART 232. Introduction to Fiber Arts: Structures 3.00
- or
- ART 234. Introduction to Fiber Arts: Surfaces 3.00
- ART 240. Metal & Jewelry (0,9) 3.00
- ART 280. Sculpture (0,9) 3.00

Total: 45 Credit Hours

Footnotes

1 The six credits of studio art electives (300-400 level) must be taken in a single studio area. Graphic design and architectural design course credits cannot count as a concentration area. Studio art credits cannot be double-counted.

2 A minimum of nine credit hours of general art electives must consist of studio-based courses with an ART prefix (excluding ART 200, ART 304, ART 305, ART 491, ART 493 and ART 496).

3. The other nine credit hours of general art electives must consist of any courses with the prefix ARCD, ARED, ART, ARTH, GRPH and INDU.

4. Excludes ARTH 490, ARTH 495 and ARTH 499.

Recommended Schedule for Majors

First Year

- ART 102. Two-Dimensional Design (0,6) *3.00*
- ART 104. Drawing I (0,6) *3.00*
- ART 106. Three-Dimensional Design (0,6) *3.00*
- ARTH 205. Survey of World Art I: Prehistoric to Renaissance [C2VPA] *3.00*
- Cluster One: Skills for the 21st Century *9-12 Credit Hours*
- General Education: The Human Community *6-9 Credit Hours*

Total: 30 Credit Hours

Second Year

- ARTH 206. Survey of World Art II: Renaissance to Modern [C2VPA] *3.00*
- Required studio art elective *3 Credit Hours*
- Scientific Literacy requirement (in addition to General Education) *3 Credit Hours*
- General Education course *9 Credit Hours*
- General art electives (any level) *6 Credit Hours*
- General elective *3 Credit Hours*

Total: 30 Credit Hours

Third Year

- Art history elective (300-400 level) *3 Credit Hours*
- General art electives (any level) *9 Credit Hours*
- General elective *3 Credit Hours*
- Quantitative requirement (in addition to General Education) *3 Credit Hours*
- General Education courses *12 Credit Hours*

Total: 30 Credit Hours

Fourth Year

- Studio art electives (300-400 level) *6 Credit Hours*
- General electives *9-12 Credit Hours*
- General Education courses *12-15 Credit Hours*

Total: 30 Credit Hours

Art, Studio, Integrated 3D Concentration, B.F.A.

Greg Stewart, **Coordinator**

Phone: (540) 568-6816

Email: stewargk@jmu.edu

The integrated 3D concentration students explore the technical, formal, conceptual and cultural overlaps between sculpture, ceramics, fiber and metals.

Integrated 3D students complete a beginning and intermediate course in each 3D medium. This develops a strong, broad skill base, 3D visualization and thinking skills, habits of investigation with a 3D perspective and knowledge of contemporary practices in 3D media.

Students also complete a six- to 12-credit concentration in their chosen medium and two capstone courses to further develop and refine specialized technical, analytical and creative skills as well as help students to prepare for professional practice.

Upon completion of the degree, integrated 3D students will be well prepared to pursue professional production and exhibition of their own art or more in-depth study at the graduate level.

Students graduating with a B.F.A. in studio art with an integrated 3D concentration will:

- Display technical command of at least one medium and display fluency in a range of media
- Effectively analyze and apply two- and three-dimensional design principles and devices
- Develop an independent line of creative inquiry that embraces risk-taking and inventive solutions
- Knowledgeably critique and contextualize their artwork to cultivate expressive ideas and meaningful content
- Demonstrate awareness of contemporary art and art history within a global context

Degree Requirements

Required Courses

- General Education courses¹ *41 Credit Hours*
- University electives *1 Credit Hour*
- Major requirements (listed below) *78 Credit Hours*

Total: 120 Credit Hours

Footnote

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

Major Requirements

The integrated 3D emphasis requires 78 credit hours in art, art history and art related courses.

Required Courses

Foundation Courses: 18 Credit Hours

- ART 102. Two-Dimensional Design (0,6) *3.00*
- ART 104. Drawing I (0,6) *3.00*
- ART 106. Three-Dimensional Design (0,6) *3.00*
- ART 108. Drawing II (0,6) *3.00*

- ARTH 205. Survey of World Art I: Prehistoric to Renaissance [C2VPA] 3.00
- ARTH 206. Survey of World Art II: Renaissance to Modern [C2VPA] 3.00

2D Studio Art courses (choose two): 6 Credit Hours

- ART 252. Introductory Painting (0,9) 3.00
- ART 260. Introductory Photography: Black and White (0,9) 3.00
- ART 270. Printmaking: Screenprint (0,9) 3.00
- ART 272. Printmaking: Relief and Intaglio 3.00
- ART 274. Printmaking: Lithography (0,9) 3.00
- ART 350. Figure Drawing (0,9) 3.00
- GRPH 200. Image Making (0, 6) 3.00

3D Studio Art courses: 24 Credit Hours

Courses cannot be double-counted in studio emphasis.

- ART 220. Introductory Ceramics: Potter's Wheel (0,9) 3.00
or
- ART 222. Introductory Ceramics: Handbuilding (0,9) 3.00
- ART 232. Introduction to Fiber Arts: Structures 3.00
or
- ART 234. Introduction to Fiber Arts: Surfaces 3.00
- ART 240. Metal & Jewelry (0,9) 3.00
- ART 280. Sculpture (0,9) 3.00
- ART 320. Intermediate Ceramics: Molds & Casting (0,9) 3.00
or
- ART 322. Intermediate Ceramics: Surface Development (0,9) 3.00
- ART 330. Intermediate Fiber Processes (0, 9). 3 credits, repeatable 3.00
- ART 340. Intermediate Metal & Jewelry (0,9) 3.00
- ART 380. Intermediate Sculpture (0,9) 3.00

Studio Emphasis (choose one of the following media): 6 Credit Hours

Credits taken to fulfill the studio emphasis must be taken in a single studio area.

Ceramics

- ART 320. Intermediate Ceramics: Molds & Casting (0,9) 3.00
or
- ART 322. Intermediate Ceramics: Surface Development (0,9) 3.00
- ART 420. Advanced Ceramics: Portfolio Development (0,9) 1.00 - 3.00, *repeatable* (repeatable up to 9 credits)

Fiber Arts

- ART 430. Advanced Fiber Processes 1.00 - 3.00, *repeatable* (repeatable up to 9 credits)
- ART 432. Digital Processes in Fibers 3.00 (repeatable up to 9 credits)

- ART 434. Collaboration in Fiber Arts 3.00 (repeatable up to 9 credits)
- ART 436. Woven Structures in Fiber Arts 3.00 (repeatable up to 9 credits)
- ART 438. Iterative Structures in Fiber Arts 3.00 (repeatable up to 9 credits)

Metals and Jewelry

- ART 440. Advanced Metal and Jewelry (0,9) 1.00 - 3.00, *repeatable* (repeatable up to 9 credits)

Sculpture

- ART 480. Advanced Sculpture (0,9) 1.00 - 3.00, *repeatable* (repeatable up to 9 credits)

Required Capstone Courses: 6 Credit Hours

- ART 495. Capstone Seminar: Three-Dimensional Art 3.00 (offered every spring)
- ART 497. Capstone Studio: Three-Dimensional Art 3.00 (offered fall and spring)

Art History Electives: 6 Credit Hours

- Art history electives (300-400 level) ² 6 credit hours

Additional Courses: 12 Credit Hours

- Art and art-related electives ³ 12 credit hours

Total: 78 Credit Hours

Footnotes

¹ This course fulfills the College of Visual and Performing Arts writing-intensive requirement for the major.

² Excludes ARTH 490, ARTH 495 and ARTH 499.

³ Studio art and art-related electives include courses from graphic design, interior design, art education and internships, but excludes courses taken to fulfill the studio concentration.

Recommended Schedule for Majors

First Year

- ART 102. Two-Dimensional Design (0,6) 3.00
- ART 104. Drawing I (0,6) 3.00
- ART 106. Three-Dimensional Design (0,6) 3.00
- ART 108. Drawing II (0,6) 3.00
- ARTH 205. Survey of World Art I: Prehistoric to Renaissance [C2VPA] 3.00

- ARTH 206. Survey of World Art II: Renaissance to Modern [C2VPA] 3.00
- Cluster One: Skills for the 21st Century 9.00
- Cluster Two: Arts and Humanities 3.00

Total: 30 Credit Hours

Second Year

- Required 200- and/or 300-level three-dimensional studio art courses 15.00
- Art history elective (300-400 level) 3.00
- Cluster Two: Arts and Humanities 6.00
- Cluster Three: The Natural World 6.00

Total: 30 Credit Hours

Third Year

- Required 200- and/or 300-level 3D studio art courses 15.00
- Studio emphasis 6.00
- Cluster Three: The Natural World 4.00
- Cluster Four: Social and Cultural Processes 4.00
- University credit 1.00

Total: 30 Credit Hours

Fourth Year

- ART 495. Capstone Seminar: Three-Dimensional Art 3.00 (offered every spring)
- ART 497. Capstone Studio: Three-Dimensional Art 3.00 (offered fall and spring)
- Required two-dimensional studio art electives 6.00
- Art history elective (300-400 level) 3.00
- Cluster Four: Social and Cultural Processes 3.00
- Cluster Five: Individuals in the Human Community 6.00

- Studio emphasis 6.00
or
- Art and art-related electives 6.00

Total: 30 Credit Hours

Coordinator: Dawn McCusker

Phone: (540) 568-6500

Email: mccuskdm@jmu.edu

The graphic design program provides a professional education with an interdisciplinary approach. Program objectives for the graphic design student are:

- Articulate ideas and understand the fundamental elements and principles of graphic design while using correct terminology pertinent to the field.
- Demonstrate a working knowledge of artistic methods, craft and formal structure as vehicles to enhance a solutions communicative value.
- Demonstrate proficiency in both traditional and digital ways of making.
- Develop diverse problem-solving methodologies that combine theory, research, analytical skills and conceptualization to create effective graphic design solutions.
- Develop a professional graphic design portfolio reflective of one's knowledge and abilities that encompasses the contemporary design market.

The graphic design program objectives are enhanced by frequent field trips to design events, guest speakers, workshops and internship opportunities. Design students have an opportunity to engage with design leaders in the field through field trips, events and participation in a professional design organization.

Admission Requirements

Admission to the B.F.A. in graphic design is selective and competitive for a limited number of reserved seats in upper-division (300-400 level) graphic design courses. Declaration of graphic design as a major and completion of lower-division (100-200) prerequisite ART and GRPH courses does not guarantee admission into the program. Admission to upper-division GRPH courses is based on completion of all prerequisite GRPH courses and merit as determined by a faculty review of portfolios submitted in satisfaction of GRPH 208. Portfolio Review.

GRPH 208. Portfolio Review is a 0 credit, pass/fail course that functions as a prerequisite to enrollment in all 300-400 level graphic design courses. Students should enroll in GRPH 208 during the semester following completion of lower-level GRPH courses, or concurrently with GRPH 206. GRPH 208 portfolios are reviewed each semester. Students enrolled in GRPH 208 will be emailed at the beginning of the semester and will be informed of the exact time and location of the GRPH 208 portfolio review.

Any art major may take lower-level GRPH courses, but is restricted from taking any 300-400 level graphic design course until GRPH 208 has been taken and passed.

Accepted students who receive a passing grade for GRPH 208 will be able to register for upper-division courses GRPH for the following semester and are required to furnish a Macintosh laptop computer. Purchase recommendations can be found at: <http://www.jmu.edu/computing/purchase/dept.shtml>.

Students not accepted will have one opportunity to reapply in the following semester or may choose to continue in another major within the Art, Design and Art History, School of.

Degree Requirements

Required Courses

- General Education: The Human Community courses *41 Credit Hours*¹
- University electives *1 Credit Hours*
- Major requirements (listed below) *78 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

Major Requirements

This major requires 78 credit hours in art, art history and art-related courses; 36 are graphic design concentration required and elective courses.

Required Courses

Foundation Courses: 18 Credit Hours

- ART 102. Two-Dimensional Design (0,6) 3.00
- ART 104. Drawing I (0,6) 3.00
- ART 106. Three-Dimensional Design (0,6) 3.00
- ART 108. Drawing II (0,6) 3.00
- ARTH 205. Survey of World Art I: Prehistoric to Renaissance [C2VPA] 3.00
- ARTH 206. Survey of World Art II: Renaissance to Modern [C2VPA] 3.00

Required art studio courses (choose four of the following): 12 Credit Hours

- ART 220. Introductory Ceramics: Potter's Wheel (0,9) 3.00
or
- ART 222. Introductory Ceramics: Handbuilding (0,9) 3.00
- ART 232. Introduction to Fiber Arts: Structures 3.00
- ART 234. Introduction to Fiber Arts: Surfaces 3.00
- ART 240. Metal & Jewelry (0,9) 3.00
- ART 252. Introductory Painting (0,9) 3.00
- ART 260. Introductory Photography: Black and White (0,9) 3.00
- ART 270. Printmaking: Screenprint (0,9) 3.00
or
- ART 272. Printmaking: Relief and Intaglio 3.00
or
- ART 274. Printmaking: Lithography (0,9) 3.00
- ART 276. Introductory Book Arts: Materials and Structures 3.00

Major Courses (Required): 33 Credit Hours

- ARCD 303. History of Design 3.00
- GRPH 101. Digital Media Design I (0, 9) 3.00
- GRPH 200. Image Making (0, 6) 3.00
- GRPH 201. Digital Media Design II 3.00
- GRPH 206. Typography I (0, 9) 3.00
- GRPH 208. Portfolio Review 0.00
- GRPH 306. Typography II (0, 9) 3.00
- GRPH 312. Web Design 3.00
- GRPH 313. Interactive Media 3.00
- GRPH 408. Brand Identity 3.00
- GRPH 497. Graphic Design Capstone 6.00

Major Courses (Electives): 15 Credit Hours

Major electives: 6 Credit Hours

- GRPH 300. Illustration (0, 9) 3.00
- GRPH 301. Digital Media Design III 3.00
- GRPH 304. Package Design (0, 9) 3.00
- GRPH 375. Letterpress 3.00
- GRPH 376. Intermediate Book Arts: Concept, Content, Form 3.00

- GRPH 380. Wayfinding, Signage, Exhibit Design *3.00*
- GRPH 390. Independent Study in Graphic Design *1.00 - 3.00*
- GRPH 392. Topics in Graphic Design *3.00*
- GRPH 496. Internship in Graphic Design *1.00 - 6.00*¹
- Art and art-related electives² *6 Credit Hours*
- Art history electives (300-400 level)³ *3 Credit Hours*

Footnotes

¹ A maximum of six credit hours of practicum or internship may count toward the degree.

² Studio art and art-related electives may include courses from general fine arts, architectural design, graphic design, industrial design and internships, but excludes courses taken to fulfill the studio concentration.

³ Excludes ARTH 490, ARTH 495 and ARTH 499.

Total: 78 Credit Hours

Recommended Schedule for Majors

First Year

First Semester

- ART 102. Two-Dimensional Design (0,6) *3.00*
- ART 104. Drawing I (0,6) *3.00*
- ARTH 205. Survey of World Art I: Prehistoric to Renaissance [C2VPA] *3.00*
- Cluster One: Skills for the 21st Century *3 Credit Hours*
- General Education: The Human Community courses *3 Credit Hours*

Second Semester

- ART 106. Three-Dimensional Design (0,6) *3.00*
- ARTH 206. Survey of World Art II: Renaissance to Modern [C2VPA] *3.00*
- GRPH 101. Digital Media Design I (0, 9) *3.00*
- General Education: The Human Community *6 Credit Hours*

Total: 30 Credit Hours

Second Year

First Semester

- ART 108. Drawing II (0,6) *3.00*
- GRPH 200. Image Making (0, 6) *3.00*
- Two-D or Three-D Studio Art Courses *3 Credit Hours*

- General Education: The Human Community courses *6 Credit Hours*

Second Semester

- GRPH 201. Digital Media Design II *3.00*
- GRPH 206. Typography I (0, 9) *3.00*
- GRPH 208. Portfolio Review *0.00*
- Two-D or Three-D Studio Art Courses *3 Credit Hours*
- General Education: The Human Community courses *6 Credit Hours*

Total: 30 Credit Hours

Third Year

First Semester

- ARCD 303. History of Design *3.00*
- GRPH 306. Typography II (0, 9) *3.00*
- GRPH 312. Web Design *3.00*
- General Education: The Human Community courses *6 Credit Hours*

Second Semester

- GRPH 313. Interactive Media *3.00*
- Two-D or Three-D Studio Art Courses *3 Credit Hours*
- Art history elective (300-400 level) *3 Credit Hours*
- General Education: The Human Community courses *6 Credit Hours*

Total: 30 Credit Hours

Fourth Year

First Semester

- GRPH 408. Brand Identity *3.00*
- Two-D or Three-D Studio Art Courses *3 Credit Hours*
- Art and art-related electives *6 Credit Hours*
- General Education: The Human Community courses *3 Credit Hours*

Second Semester

- GRPH 497. Graphic Design Capstone *6.00*
- GRPH Concentration Elective *6 Credit Hours*
- General Education: The Human Community courses *2 Credit Hours*
- University Elective (if total credits do not reach 120) *1 Credit Hour*

Total: 30 Credit Hours

Industrial Design, B.S.

Coordinator: Audrey Barnes

Email: barnesal@jmu.edu

Phone: (540) 568-7670

The industrial design major seeks to:

- Integrate knowledge of the visual arts with applied design technology.
- Enhance problem-solving and communication skills in the creation of design concepts.
- Develop student knowledge that optimizes the function, value and appearance of manufactured products and systems.

Admissions Requirements

Admission to the B.S. in industrial design is selective and competitive for a limited number of reserved seats in upper-division (300-400 level) industrial design courses. Declaration of industrial design as a major and completion of lower-division (100-200) prerequisite art and design courses does not guarantee admission into the program. Admission to upper-division INDU courses is based on completion of all prerequisite art courses and merit as determined by faculty review of portfolios submitted in satisfaction of the course INDU 208. Portfolio Review.

INDU 208 is a 0 credit, pass/fail course that functions as a prerequisite to enrollment in 300-400 level industrial design advanced studio courses. Students should enroll in INDU 208 during the semester in which they are enrolled in INDU 202. INDU 208 portfolios are reviewed during the spring semester (February) prior to pre-registration. Students should contact the area coordinator of industrial design to determine the exact time and location for the INDU 208 portfolio review.

INDU 200 and INDU 202 are restricted to BS of ID majors who have passed ART 102, 104 and 106 only, and students are restricted from taking any 300-400 level industrial design advanced studio courses until INDU 208 has been taken and passed.

Accepted students who receive a passing grade for INDU 208 will be able to register for INDU upper division advanced studio courses for the following semester. Students not accepted will have one opportunity to reapply the following spring semester or may choose to continue in another major within the SADAH.

Degree Requirements

Required Courses

- General Education requirements *41 Credit Hours*¹
- Quantitative requirement (in addition to General Education courses) *3 Credit Hours*
- Scientific Literacy requirement (in addition to General Education courses) *3 Credit Hours*
- Major requirements (listed below) *78 Credit Hours*

Total: 125 Credit Hours

Note: Students can double count one course, reducing the total credit hours to 122.

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

Major Requirements

The industrial design major requires 78 credit hours in art, art history and art-related courses. Of these hours, 42 credits must be in INDU courses, some of which may be the B.S. Natural/Social Science requirement.

Required Courses

Foundation Courses (9 credits)

- ART 102. Two-Dimensional Design (0,6) 3.00
- ART 104. Drawing I (0,6) 3.00
- ART 106. Three-Dimensional Design (0,6) 3.00

Art & Design Electives (6 credits)

Art and design electives may include studio-based courses from industrial design, graphic design, architectural design, studio art, studio assistantships and internships. Excludes courses taken to fulfill the concentration courses, advanced studios, and art and design history.**

Footnote

**Also excludes ART 200, 205, 304 and 305

Required Concentration Courses (21 credits)

- INDU 200. Introduction to Industrial Design 6.00
or
- ARCD 200. Architect Design Studio I 6.00
- GRPH 101. Digital Media Design I (0, 9) 3.00
- INDU 202. Industrial Design Studio 6.00
- INDU 208. Portfolio Review 0.00
- INDU 220. CAD I: 3D Modeling 3.00
- INDU 380. Materials and Processes 3.00

Advanced Studios (24 credits)

- INDU 300. Product Design 6.00
- INDU 302. Transportation Studio 6.00
- INDU 400. Systems and Services 6.00
- INDU 402. Social Innovation and Social Entrepreneurship 6.00

- INDU 404. Indu Advanced Special Topics Studio *6.00*
- INDU 406. Senior Thesis Studio *6.00* (Instructor Permission Required)
- INDU 408. Swing Studio Option *6.00*

Art & Design History Courses (9 credits)

- ARTH 205. Survey of World Art I: Prehistoric to Renaissance [C2VPA] *3.00*
- ARTH 206. Survey of World Art II: Renaissance to Modern [C2VPA] *3.00*
- ARCD 303. History of Design *3.00*

Interdisciplinary Electives (9 Credit Hours Total)

Society and Culture (choose one)

May fulfill the B.S. Natural/Social Science requirement.

- ANTH 195. Cultural Anthropology [C4GE] *3.00 (C, R)*
- ANTH 205. Buried Cities, Lost Tribes: The Rise and Fall of Early Human Societies [C2HQC] *3.00 (A)*
- ANTH 323. Anthropology and Photography *3.00 (C)*
- SOCI 311. Sociology of the Environment *3.00*
- SOCI 315. Technology and Society *3.00*
- SOCI 337. Sociology of Gender *3.00*

Engineering and Technology (choose one)

Students selecting ENGR electives must have approval from the course instructor and the INDU adviser.

- ENGR 231. Engineering Design I *2.00*
- ENGR 232. Engineering Design II *2.00*
- ENGR 280. Projects in Engineering *1.00 - 4.00*
- ENGR 498. Advanced Topics in Engineering *1.00-3.00* (Innovation)
- ENGR 498. Advanced Topics in Engineering *3.00* (Realization)
- ENGR 498. Advanced Topics in Engineering *3.00* (Human Centered Design)
- ENGR 498. Advanced Topics in Engineering *3.00* (Innovation Exchange)
- ENGR 498. Advanced Topics in Engineering *3.00* (Systems Design and Placemaking)
- ENGR 480. Advanced Projects in Engineering *1.00 - 4.00*
- ISAT 211. Issues in Modern Production Systems *3.00*
- ISAT 330. Sustainable Manufacturing Systems *3.00*

Business, Marketing and Entrepreneurship (choose one)

- COB 318. Legal and Ethical Environment of Business *3.00*
- MKTG 380. Principles of Marketing *3.00*
- MGT 472. New Venture Creation *3.00*
- MGT 305. Management and Organizational Behavior *3.00*
- MGT 310. Business Fundamentals for Entrepreneurs *3.00*

Total: 78 Credit Hours

Recommended Schedule for Majors

First Year

- General Education *12 Credit Hours*
- Art Foundations *9 Credit Hours (ART 102, ART 104, ART 106)*
- Art History *6 Credit Hours (ARTH 205, ARTH 206)*
- Quantitative Reasoning *3 Credit Hours*

Total: 30 Credit Hours

Second Year

- General Education *12 Credit Hours*
- INDU 200. Introduction to Industrial Design *6.00*
- INDU 202. Industrial Design Studio *6.00*
- INDU 208. Portfolio Review *0.00*
- INDU 220. CAD I: 3D Modeling *3.00*
- INDU 380. Materials and Processes *3.00*

Total: 30 Credit Hours

Third Year

- General Education *9 Credit Hours*
- Scientific Literacy *3 Credit Hours*
- Advanced Studio *6 Credit Hours*
- Advanced Studio *6 Credit Hours*
- Art and Design Elective *3 Credit Hours*
- Interdisciplinary Elective *3 Credit Hours*
- ARCD 303. History of Design *3.00*

Total: 33 Credit Hours

Fourth Year

- Advanced Studio *6 Credit Hours*
- Advanced Studio *6 Credit Hours*
- Art and Design Electives *3 Credit Hours*
- General Education *9 Credit Hours*
- Interdisciplinary Elective *6 Credit Hours*

Total: 30 Credit Hours

Biology, Department of

Dr. Casonya Johnson, **Department Head**

Phone: (540) 568-6225

Email: prinssc@jmu.edu

Location: Bioscience Building, Room 2001C

Dr. Kyle Seifert, **Undergraduate Coordinator**

Website: <http://www.jmu.edu/biology>

Professors

M. Davis, M. Gabriele, N. Garrison, H. Griscom, C. Johnson, C. Lantz, C. McMullen, J. Monroe, M. Renfroe, C. Rose, K. Seifert, B. Wiggins, R. Wunderlich, G. Wyngaard

Associate Professors

S. Babcock, T. Bloss, J. Brown, C. Cleland, I. Cooper, S. Cresawn, J. Daniel, R. Enke, K. Gobetz, S. Halsell, J. Harsh, J. Herrick, P. Ludwig, C. May, T. Rife, K. Slekar

Assistant Professors

K. Cresawn, K. Kubow, D. McLeod, D. Moseley, M. Parker, M. Steffen, D. Strong, P. Vasudevan, B. Velayudhan, G. Vidal, M. Walker, L. Wurch

Lecturers

B. Cage, E. Doyle, O. Hyman, T. Hynd, P. Kilkenney, A. Pesce

Mission Statement

The Department of Biology holds as its primary core value a commitment to providing superlative teaching for students. To accomplish this mission, we will create an environment for learning that will include opportunities for undergraduate research, a broadly based academic program, a supportive, diverse and collaborative faculty, an understanding of the process of science and a recognition of the importance of community outreach and involvement.

Career Opportunities and Advanced Fields of Study

- Anthropology
- Aquatic Science
- Biodiversity
- Bioinformatics
- Biotechnology
- Botany
- Clinical Laboratory Sciences
- Dentistry
- Ecology and Environmental Science
- Epidemiology
- Forensic Science
- Forestry
- Genetic Counseling
- Graduate School in the Biological Sciences

- Immunology
- Landscape Architecture
- Medicine
- Microbiology
- Microscopy
- Neurobiology
- Nursing
- Occupational Therapy
- Optometry
- Pharmacology
- Physical Therapy
- Physician Assistant
- Physiology
- Research Assistant
- Scientific Writing
- Secondary Education
- U.S. Fish and Wildlife Service
- Veterinary Medicine
- Virology
- Zoology

Students interested in pursuing any of these career opportunities should contact the biology office. An appropriate adviser will be assigned for mentoring and course selection.

Co-curricular Activities and Organizations

Biology majors participate in activities such as:

- Weekly departmental seminars
- Tri-Beta, a national biology society
- Pre-professional health clubs and honor society
- EARTH, an environmental action club
- Summer and academic-year research opportunities
- Summer courses at biological field stations
- Internships with various organizations
- Aiding in teaching as student assistants
- Presenting papers at meetings
- Volunteering at Rockingham Memorial Hospital and with the rescue squad

Special Requirements

To be used as prerequisites for biology courses, grades of "C-" or higher should be earned in the following: BIO 140, BIO 150, BIO 240, BIO 250, CHEM 131, CHEM 131L, and CHEM 132. Transfer credit for BIO 140 and/or BIO 150 can be earned from freshmen-year equivalent courses from other institutions. It is the student's responsibility to provide evidence to demonstrate that the subject content of the course(s) taken is the same as BIO 140 and/or BIO 150 at JMU. In order for BIO 270 and BIO 290 credit to be transferred, both semesters of an Anatomy and Physiology course (A&P I and A&P II) must be completed at the "C" or higher level. A single semester of either of these sequences transfers as BIO 000.

Practical hands-on experience in the field and/or laboratory is important content of laboratory based courses. Transfer credit for courses including laboratories will only be awarded for those having skill and application content comparable to that of JMU courses. Upper division biology credits applicable toward the major or minor are transferred as specific courses or as BIO 300, BIO 426 or BIO 427. Credits not applicable toward the major or minor, but applicable toward the 120 hour degree requirement, are transferred as BIO 000. A maximum of eight credit hours of first year (100) level BIO courses may be applied to the biology major or minor requirements.

Students who declared a major in biology before Fall 2016 should consult with their adviser about course requirements.

Biology Minor

Minor Requirements

Biology Minor

Minor Adviser: Julia Stutzman

Students who declared a major in biology before Fall 2016 should consult with their adviser about course requirements. The biology minor is not available to biotechnology majors.

Courses

Students choosing to minor in biology must complete the following courses:

- BIO 140. Foundations of Biology I (3,3) [C3NS] 4.00
- BIO 150. Foundations of Biology II (3,3) 4.00
- BIO 240. Genetics (3,3) 4.00
- BIO 250. Quantitative Ecology and Evolution (3,3) 4.00
- Biology elective (300-level and above) 3-4 Credit Hours

Total: 19-20 Credit Hours

Biology, B.A.

Degree and Major Requirements

The department offers a four-year B.S. degree program for a major in biology and for a major in biology qualifying for the Secondary Collegiate Professional License. Requirements for the B.A. degree can be met by adding the completion of an intermediate level foreign language and three credit hours in philosophy. Students may not receive dual credit toward the biology major for 300- and 400-level BIO courses that are applied toward the biotechnology major.

Biology majors must complete 40 credit hours of biology courses including 16 credit hours at the 300 and 400 level. Specific requirements include four core courses (BIO 140, BIO 150, BIO 240 and BIO 250), at least two upper-division laboratory courses and one course from a list of courses with an emphasis on organismal diversity. In addition, biology majors must complete a set of cognate courses in chemistry, mathematics, statistics and physics that are listed below. Students are encouraged to participate in independent research with a faculty mentor. Credits earned doing research will count toward the biology major but some restrictions apply.

When requested, senior biology majors are expected to participate in program assessment test activities as a graduation requirement. Assessment information helps the department modify the curriculum to meet student needs.

Credit by Examination

When evidence of sufficient background or preparation is presented, the Biology, Department of offers credit by examination in many of its non-lab courses at the discretion of the course instructor or coordinator. Students seeking such credit should make arrangements with the course instructor or coordinator and obtain approval of the department head.

Teaching Licensure

Biology majors need courses in physics and geology as well as inorganic and organic chemistry for many science education positions.

In addition to the general education and academic major requirements, biology majors desiring secondary teacher licensure must be admitted to teacher education, complete the pre-professional program in secondary education at the undergraduate level and complete the graduate level Master of Arts in Teaching degree.

It is critical that students seeking licensure consult regularly with both their education adviser and their major adviser to support their progression through the programs. For a full description of the program in secondary teaching, refer to the Middle, Secondary and Mathematics Education, Department of in addition to the College of Education.

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Quantitative requirement (in addition to General Education) *3 Credit Hours*²
- Scientific Literacy requirement (in addition to General Education) *3-4 Credit Hours*²
- Biology requirements (listed below) *40 Credit Hours*
- Cognate requirements (listed below) *31-36 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² The quantitative and scientific literacy requirements are met by courses required in the major.

Biology Major Requirements

- BIO 140. Foundations of Biology I (3,3) [C3NS] *4.00*
- BIO 150. Foundations of Biology II (3,3) *4.00*
- BIO 240. Genetics (3,3) *4.00*
- BIO 250. Quantitative Ecology and Evolution (3,3) *4.00*

Total: 16 Credit Hours

Additional Biology Course Requirements - 24 credits

Students in the biology major must complete at least 24 credit hours of approved biology courses and at least 16 of these must be at the 300 and 400 levels. Also, one course must be from a group of courses on organismal diversity and two courses must have a laboratory component. Courses in both lists may count for both requirements. Three credits of independent research (BIO 497 and/or BIO 499) may be used for one, but only one, of the laboratory courses.

Choose at least one organismal diversity courses:

- BIO 309. Marine and Freshwater Invertebrates (3, 0) 3.00
- BIO 310. Marine Biology 3.00
- BIO 320. Comparative Anatomy of Vertebrates (2, 4) 4.00
- BIO 340. Morphology and Anatomy of Vascular Plants (2, 4) 4.00
- BIO 345. Animal Field Biology 3.00
- BIO 357. Galápagos Islands: Biodiversity and Conservation 3.00
- BIO 360. Plant Biology (3, 0) 3.00
- BIO 364. Human Uses of Plants (3, 0) 3.00
- BIO 386. Field Botany (3, 3) 4.00
- BIO 402. Forest Ecology 4.00
- BIO 405. Vertebrate Paleontology (3, 1) 3.00
- GEOL 405. Vertebrate Paleontology 3.00
- BIO 412. Mammalogy 4.00
- BIO 420. Medical Parasitology (3, 0) 3.00
- BIO 430. Ornithology: Research and Current Advances 4.00
- BIO 470. Morphology of Nonvascular Plants (2, 4) 4.00
- BIO 484. Aquatic Microbiology 3.00
- BIO 486. Systematics of Vascular Plants (2, 4) 4.00

Choose at least two laboratory courses:

- BIO 318. Experimental Vertebrate Development (0, 4) 2.00
- BIO 320. Comparative Anatomy of Vertebrates (2, 4) 4.00
- BIO 340. Morphology and Anatomy of Vascular Plants (2, 4) 4.00
- BIO 342. Mathematical Models in Biology 3.00
- MATH 342. Mathematical Models in Biology 3.00
- BIO 343L. Immunology Laboratory (0, 4) 1.00
- BIO 345. Animal Field Biology 3.00
- BIO 346. Bacterial Discovery 2.00
- BIO 348L. Medical Microbiology Laboratory 1.00
- BIO 350. Paleobiology (3, 2) 4.00
- BIO 354. Global Climate Change and Life: Ecological and Biological Impacts of Climate Variability (3, 3) 4.00
- BIO 364L. Laboratory in Human Uses of Plants (0, 3) 1.00
- BIO 366. Environmental Ecology and Evolution (3, 3) 4.00
- BIO 370. Animal Physiology (3, 3) 4.00
- BIO 386. Field Botany (3, 3) 4.00

- BIO 387L. Environmental Microbiology Laboratory *1.00*
- BIO 400. Geology and Ecology of the Bahamas *3.00*
- GEOL 400. Geology and Ecology of the Bahamas *3.00*
- BIO 402. Forest Ecology *4.00*
- GEOG 402. Forest Ecology *4.00*
- BIO 410. Advanced Human Anatomy (1, 6) *3.00*
- BIO 412. Mammalogy *4.00*
- BIO 416. Human Embryology (3, 3) *4.00*
- BIO 420L. Medical Parasitology Lab (0, 3) *1.00*
- BIO 430. Ornithology: Research and Current Advances *4.00*
- BIO 432. Light Microscopy (2, 4) *4.00*
- BIO 445. Neurobiology (3, 3) *4.00*
- BIO 446. Experimental Neurobiology *4.00*
- BIO 448. Developmental Neurobiology *4.00*
- BIO 449. Insect Ecology (2, 4) *4.00*
- BIO 452. Population Ecology (2, 4) *4.00*
- BIO 455. Plant Physiology (3, 3) *4.00*
- BIO 456. Landscape Ecology (3, 3) *4.00*
- BIO 457. Biological Applications of Geographic Information Systems (2, 4) *4.00*
- BIO 459. Freshwater Ecology (3, 3) *4.00*
- BIO 460. Plant Biotechnology (2, 4) *4.00*
- BIO 465. Environmental Toxicology (2, 4) *4.00*
- BIO 470. Morphology of Nonvascular Plants (2, 4) *4.00*
- BIO 480. Advanced Molecular Biology (2, 5) *4.00*
- BIO 481. Genomics (3, 3) *4.00*
- BIO 482. Human Histology (3, 3) *4.00*
- BIO 483. Bioinformatics (3, 3) *4.00*
- BIO 484. Aquatic Microbiology *3.00*
- BIO 486. Systematics of Vascular Plants (2, 4) *4.00*
- BIO 490. Mechanics of Animal Movement (3, 3) *4.00*

Additional Information

Only one Topics in Biology (BIO 426/427) may fulfill one of the laboratory course and/or organismal requirements. A list of the topics that may be used is available in the biology department office. These can be repeated with a change in topic, but only 12 credits from BIO 426/427 can be applied toward the 40-hour biology course requirement.

When choosing additional biology courses to complete the 40 credit hour requirement, students are strongly encouraged to discuss their career interests with an adviser who can help select courses best suited to their needs. Students are encouraged to participate in independent research and teaching courses with a faculty mentor, though a maximum of eight credits of BIO 492, BIO 494, BIO 495, BIO 496, BIO 497, BIO 499 and ISC 450 can be counted toward the biology major.

Cognate Requirements

The following five groups of support courses are required for the biology major. Consult your academic adviser about which courses are appropriate.

Required Courses

Complete all of the following: 11 Credit Hours

- CHEM 131. General Chemistry I [C3PP] 3.00
- CHEM 131L. General Chemistry Laboratory [C3PP] 1.00
- CHEM 132. General Chemistry II 3.00
- CHEM 132L. General Chemistry Laboratory 1.00
- CHEM 241. Organic Chemistry I 3.00

Choose one of the following: 3 Credit Hours

Chemistry beyond the minimum requirement is recommended in many areas of biology. Consult with your adviser about which courses are appropriate. Students who take BIO 361/CHEM 361 in addition to CHEM 242, CHEM 353, CHEM 354 or GEOL 355/CHEM 355 will have BIO 361/CHEM 361 applied toward their BIO 300-400-level elective requirements. BIO 361/CHEM 361 may not be used for both a chemistry cognate and a biology major elective.

- CHEM 242. Organic Chemistry II 3.00
- BIO 361. Biochemistry I (3, 0) 3.00
- CHEM 361. Biochemistry I 3.00
- CHEM 353. Environmental Chemistry 3.00
- CHEM 354. Environmental Chemistry Field Camp 3.00
- GEOL 355. Geochemistry of Natural Waters 3.00
- CHEM 355. Geochemistry of Natural Waters 3.00

Choose one of the following sets of courses: 4-7 Credit Hours

Mathematics beyond the minimum requirement is desirable in many areas of biology. Consult your adviser about which courses are appropriate.

- MATH 231. Calculus with Functions I [C3QR] 3.00
- MATH 232. Calculus with Functions II 3.00
- MATH 233. Calculus with Modeling I [C3QR] 3.00
- MATH 234. Calculus with Modeling II 3.00
- MATH 235. Calculus I [C3QR] 4.00

Choose one of the following courses: 3-4 Credit Hours

Statistics beyond the minimum requirement is desirable in many areas of biology. Consult your adviser about which courses are appropriate.

- MATH 220. Elementary Statistics [C3QR] 3.00
- MATH 229. Introduction to Applied Statistics Using R [C3QR] 3.00
- MATH 285. Data Analysis 4.00
- MATH 318. Introduction to Probability and Statistics 4.00

Choose one of the following sets of courses: 8 Credit Hours

- PHYS 140. College Physics I [C3PP] 3.00
- PHYS 140L. General Physics Laboratory [C3PP] 1.00
- PHYS 150. College Physics II 3.00

- PHYS 150L. General Physics Laboratory *1.00*
- PHYS 240. University Physics I [C3PP] *3.00*
- PHYS 240L. University Physics Laboratory I [C3PP] *1.00*
- PHYS 250. University Physics II *3.00*
- PHYS 250L. University Physics Laboratory II *1.00*

Biology Recommended Schedule for Majors

First semester first year biology majors are encouraged to start with a 14-15 hour course load. This will generally include BIO 140, CHEM 131 and CHEM 131L, and/or a math course plus General Education. The work load will then be increased in the second semester based on the level of first semester success.

First Year

- BIO 140. Foundations of Biology I (3,3) [C3NS] *4.00*¹
- BIO 150. Foundations of Biology II (3,3) *4.00*
- CHEM 131. General Chemistry I [C3PP] *3.00*¹
- CHEM 132. General Chemistry II *3.00*¹
- CHEM 131L. General Chemistry Laboratory [C3PP] *1.00*
- CHEM 132L. General Chemistry Laboratory *1.00*
- Mathematics courses *4-7 Credit Hours*¹
- General Education: Cluster One *9-12 Credit Hours*

Total: 29-35 Credit Hours

Footnote

¹Fulfills General Education: Cluster Three.

Second Year

- BIO 240. Genetics (3,3) *4.00*
- BIO 250. Quantitative Ecology and Evolution (3,3) *4.00*
- CHEM 241. Organic Chemistry I *3.00*

- CHEM 242. Organic Chemistry II *3.00*
or
- BIO 361. Biochemistry I (3, 0) *3.00*
or
- CHEM 361. Biochemistry I *3.00*
or
- GEOL 355. Geochemistry of Natural Waters *3.00*
or
- CHEM 355. Geochemistry of Natural Waters *3.00*

- Mathematics course *3-4 Credit Hours*
- General Education: from Clusters Two, Four and Five *12 Credit Hours*

Total: 29-30 Credit Hours

Third Year

- Upper-level biology laboratory courses *8 Credit Hours*
- Biology elective *3-4 Credit Hours*
- Physics courses *8 Credit Hours*
- General Education: from Clusters Two, Four and Five *7 Credit Hours*
- Electives *6 Credit Hours*

Total: 32 Credit Hours

Fourth Year

- Upper-level biology laboratory course *4 Credit Hours*
- Biology electives *9 Credit Hours*
- General Education: from Clusters Two, Four and Five *3 Credit Hours*
- Electives *15 Credit Hours*

Total: 31 Credit Hours

Biology, B.S.

Degree and Major Requirements

The department offers a four-year B.S. degree program for a major in biology and for a major in biology qualifying for the Secondary Collegiate Professional License. Requirements for the B.A. degree can be met by adding the completion of an intermediate level foreign language and three credit hours in philosophy. Students may not receive dual credit toward the biology major for 300- and 400-level BIO courses that are applied toward the biotechnology major.

Biology majors must complete 40 credit hours of biology courses including 16 credit hours at the 300 and 400 level. Specific requirements include four core courses (BIO 140, BIO 150, BIO 240 and BIO 250), at least two upper-division laboratory courses and one course from a list of courses with an emphasis on organismal diversity. In addition, biology majors must complete a set of cognate courses in chemistry, mathematics, statistics and physics that are listed below. Students are encouraged to participate in independent research with a faculty mentor. Credits earned doing research will count toward the biology major but some restrictions apply.

When requested, senior biology majors are expected to participate in program assessment test activities as a graduation requirement. Assessment information helps the department modify the curriculum to meet student needs.

Credit by Examination

When evidence of sufficient background or preparation is presented, the Department of Biology offers credit by examination in many of its non-lab courses at the discretion of the course instructor or coordinator. Students seeking such credit should make arrangements with the course instructor or coordinator and obtain approval of the department head.

Teaching Licensure

Biology majors need courses in physics and geology as well as inorganic and organic chemistry for many science education positions.

In addition to the general education and academic major requirements, biology majors desiring secondary teacher licensure must be admitted to teacher education, complete the pre-professional program in secondary education at the undergraduate level and complete the graduate level Master of Arts in Teaching degree.

It is critical that students seeking licensure consult regularly with both their education adviser and their major adviser to support their progression through the programs. For a full description of the program in secondary teaching, refer to the Middle, Secondary and Mathematics Education, Department of, in addition to the College of Education.

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Quantitative requirement (in addition to General Education) *3 Credit Hours*²
- Scientific Literacy requirement (in addition to General Education) *3-4 Credit Hours*²
- Biology requirements (listed below) *40 Credit Hours*
- Cognate requirements (listed below) *31-36 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² The quantitative and scientific literacy requirements are met by courses required in the major.

Biology Major Requirements

- BIO 140. Foundations of Biology I (3,3) [C3NS] *4.00*
- BIO 150. Foundations of Biology II (3,3) *4.00*
- BIO 240. Genetics (3,3) *4.00*
- BIO 250. Quantitative Ecology and Evolution (3,3) *4.00*

Total: 16 Credit Hours

Additional Biology Course Requirements - 24 credits

Students in the biology major must complete at least 24 credit hours of approved biology courses and at least 16 of these must be at the 300 and 400 levels. Also, one course must be from a group of courses on organismal diversity and two courses must have a laboratory component. Courses in both lists may count for both requirements. Three credits of independent research (BIO 497 and/or BIO 499) may be used for one, but only one, of the laboratory courses.

Choose at least one organismal diversity courses:

- BIO 309. Marine and Freshwater Invertebrates (3, 0) 3.00
- BIO 310. Marine Biology 3.00
- BIO 320. Comparative Anatomy of Vertebrates (2, 4) 4.00
- BIO 340. Morphology and Anatomy of Vascular Plants (2, 4) 4.00
- BIO 345. Animal Field Biology 3.00
- BIO 357. Galápagos Islands: Biodiversity and Conservation 3.00
- BIO 360. Plant Biology (3, 0) 3.00
- BIO 364. Human Uses of Plants (3, 0) 3.00
- BIO 386. Field Botany (3, 3) 4.00
- BIO 402. Forest Ecology 4.00
- BIO 405. Vertebrate Paleontology (3, 1) 3.00
- GEOL 405. Vertebrate Paleontology 3.00
- BIO 412. Mammalogy 4.00
- BIO 420. Medical Parasitology (3, 0) 3.00
- BIO 430. Ornithology: Research and Current Advances 4.00
- BIO 470. Morphology of Nonvascular Plants (2, 4) 4.00
- BIO 484. Aquatic Microbiology 3.00
- BIO 486. Systematics of Vascular Plants (2, 4) 4.00

Choose at least two laboratory courses:

- BIO 318. Experimental Vertebrate Development (0, 4) 2.00
- BIO 320. Comparative Anatomy of Vertebrates (2, 4) 4.00
- BIO 340. Morphology and Anatomy of Vascular Plants (2, 4) 4.00
- BIO 342. Mathematical Models in Biology 3.00
- MATH 342. Mathematical Models in Biology 3.00
- BIO 343L. Immunology Laboratory (0, 4) 1.00
- BIO 345. Animal Field Biology 3.00
- BIO 346. Bacterial Discovery 2.00
- BIO 348L. Medical Microbiology Laboratory 1.00
- BIO 350. Paleobiology (3, 2) 4.00
- BIO 354. Global Climate Change and Life: Ecological and Biological Impacts of Climate Variability (3, 3) 4.00
- BIO 364L. Laboratory in Human Uses of Plants (0, 3) 1.00
- BIO 366. Environmental Ecology and Evolution (3, 3) 4.00
- BIO 370. Animal Physiology (3, 3) 4.00
- BIO 386. Field Botany (3, 3) 4.00
- BIO 387L. Environmental Microbiology Laboratory 1.00
- BIO 400. Geology and Ecology of the Bahamas 3.00
- GEOL 400. Geology and Ecology of the Bahamas 3.00
- BIO 402. Forest Ecology 4.00
- GEOG 402. Forest Ecology 4.00
- BIO 410. Advanced Human Anatomy (1, 6) 3.00
- BIO 412. Mammalogy 4.00
- BIO 416. Human Embryology (3, 3) 4.00
- BIO 420L. Medical Parasitology Lab (0, 3) 1.00

- BIO 430. Ornithology: Research and Current Advances *4.00*
- BIO 432. Light Microscopy (2, 4) *4.00*
- BIO 445. Neurobiology (3, 3) *4.00*
- BIO 446. Experimental Neurobiology *4.00*
- BIO 448. Developmental Neurobiology *4.00*
- BIO 449. Insect Ecology (2, 4) *4.00*
- BIO 452. Population Ecology (2, 4) *4.00*
- BIO 455. Plant Physiology (3, 3) *4.00*
- BIO 456. Landscape Ecology (3, 3) *4.00*
- BIO 457. Biological Applications of Geographic Information Systems (2, 4) *4.00*
- BIO 459. Freshwater Ecology (3, 3) *4.00*
- BIO 460. Plant Biotechnology (2, 4) *4.00*
- BIO 465. Environmental Toxicology (2, 4) *4.00*
- BIO 470. Morphology of Nonvascular Plants (2, 4) *4.00*
- BIO 480. Advanced Molecular Biology (2, 5) *4.00*
- BIO 481. Genomics (3, 3) *4.00*
- BIO 482. Human Histology (3, 3) *4.00*
- BIO 483. Bioinformatics (3, 3) *4.00*
- BIO 484. Aquatic Microbiology *3.00*
- BIO 486. Systematics of Vascular Plants (2, 4) *4.00*
- BIO 490. Mechanics of Animal Movement (3, 3) *4.00*

Additional Information

Only one Topics in Biology (BIO 426/427) may fulfill one of the laboratory course and/or organismal requirements. A list of the topics that may be used is available in the biology department office. These can be repeated with a change in topic, but only 12 credits from BIO 426/427 can be applied toward the 40-hour biology course requirement.

When choosing additional biology courses to complete the 40 credit hour requirement, students are strongly encouraged to discuss their career interests with an adviser who can help select courses best suited to their needs. Students are encouraged to participate in independent research and teaching courses with a faculty mentor, though a maximum of eight credits of BIO 492, BIO 494, BIO 495, BIO 496, BIO 497, BIO 499 and ISC 450 can be counted toward the biology major.

Cognate Requirements

The following five groups of support courses are required for the biology major. Consult your academic adviser about which courses are appropriate.

Required Courses

Complete all of the following: 11 Credit Hours

- CHEM 131. General Chemistry I [C3PP] *3.00*
- CHEM 131L. General Chemistry Laboratory [C3PP] *1.00*
- CHEM 132. General Chemistry II *3.00*
- CHEM 132L. General Chemistry Laboratory *1.00*
- CHEM 241. Organic Chemistry I *3.00*

Choose one of the following: 3 Credit Hours

Chemistry beyond the minimum requirement is recommended in many areas of biology. Consult with your adviser about which courses are appropriate. Students who take BIO 361/CHEM 361 in addition to CHEM 242, CHEM 353, CHEM 354 or GEOL 355/CHEM 355 will have BIO 361/CHEM 361 applied toward their BIO 300-400-level elective requirements. BIO 361/CHEM 361 may not be used for both a chemistry cognate and a biology major elective.

- CHEM 242. Organic Chemistry II *3.00*
- BIO 361. Biochemistry I (3, 0) *3.00*
- CHEM 361. Biochemistry I *3.00*
- CHEM 353. Environmental Chemistry *3.00*
- CHEM 354. Environmental Chemistry Field Camp *3.00*
- GEOL 355. Geochemistry of Natural Waters *3.00*
- CHEM 355. Geochemistry of Natural Waters *3.00*

Choose one of the following sets of courses: 4-7 Credit Hours

Mathematics beyond the minimum requirement is desirable in many areas of biology. Consult your adviser about which courses are appropriate.

- MATH 231. Calculus with Functions I [C3QR] *3.00*
- MATH 232. Calculus with Functions II *3.00*
- MATH 233. Calculus with Modeling I [C3QR] *3.00*
- MATH 234. Calculus with Modeling II *3.00*
- MATH 235. Calculus I [C3QR] *4.00*

Choose one of the following courses: 3-4 Credit Hours

Statistics beyond the minimum requirement is desirable in many areas of biology. Consult your adviser about which courses are appropriate.

- MATH 220. Elementary Statistics [C3QR] *3.00*
- MATH 229. Introduction to Applied Statistics Using R [C3QR] *3.00*
- MATH 285. Data Analysis *4.00*
- MATH 318. Introduction to Probability and Statistics *4.00*

Choose one of the following sets of courses: 8 Credit Hours

- PHYS 140. College Physics I [C3PP] *3.00*
- PHYS 140L. General Physics Laboratory [C3PP] *1.00*
- PHYS 150. College Physics II *3.00*
- PHYS 150L. General Physics Laboratory *1.00*
- PHYS 240. University Physics I [C3PP] *3.00*
- PHYS 240L. University Physics Laboratory I [C3PP] *1.00*
- PHYS 250. University Physics II *3.00*
- PHYS 250L. University Physics Laboratory II *1.00*

Biology Recommended Schedule for Majors

First semester first year biology majors are encouraged to start with a 14-15 hour course load. This will generally include BIO 140, CHEM 131 and CHEM 131L, and/or a math course plus General Education. The work load will then be increased in the second semester based on the level of first semester success.

First Year

- BIO 140. Foundations of Biology I (3,3) [C3NS] 4.00 ¹
- BIO 150. Foundations of Biology II (3,3) 4.00
- CHEM 131. General Chemistry I [C3PP] 3.00 ¹
- CHEM 132. General Chemistry II 3.00 ¹
- CHEM 131L. General Chemistry Laboratory [C3PP] 1.00
- CHEM 132L. General Chemistry Laboratory 1.00
- Mathematics courses 4-7 *Credit Hours* ¹
- General Education: Cluster One 9-12 *Credit Hours*

Total: 29-35 Credit Hours

Footnote

¹Fulfills General Education: Cluster Three.

Second Year

- BIO 240. Genetics (3,3) 4.00
- BIO 250. Quantitative Ecology and Evolution (3,3) 4.00
- CHEM 241. Organic Chemistry I 3.00

- CHEM 242. Organic Chemistry II 3.00
or
- BIO 361. Biochemistry I (3, 0) 3.00
or
- CHEM 361. Biochemistry I 3.00
or
- GEOL 355. Geochemistry of Natural Waters 3.00
or
- CHEM 355. Geochemistry of Natural Waters 3.00

- Mathematics course 3-4 *Credit Hours*
- General Education: from Clusters Two, Four and Five 12 *Credit Hours*

Total: 29-30 Credit Hours

Third Year

- Upper-level biology laboratory courses 8 *Credit Hours*

- Biology elective *3-4 Credit Hours*
- Physics courses *8 Credit Hours*
- General Education: from Clusters Two, Four and Five *7 Credit Hours*
- Electives *6 Credit Hours*

Total: 32 Credit Hours

Fourth Year

- Upper-level biology laboratory course *4 Credit Hours*
- Biology electives *9 Credit Hours*
- General Education: from Clusters Two, Four and Five *3 Credit Hours*
- Electives *15 Credit Hours*

Total: 31 Credit Hours

Biology, Ecology and Environmental Biology Concentration, B.S.

Degree and Major Requirements

Concentration in Ecology and Environmental Biology

The biology department offers a concentration within the biology major for students with interest in ecology, field biology, natural resources, environmental biology, conservation biology, evolution, animal behavior and organismal biology. Students choosing a concentration in ecology and environmental biology must meet all of the requirements for the biology major as well as the following additional requirements. Courses for this concentration can also satisfy biology major requirements.

Students must complete at least 20 credit hours from the following list.

With prior approval from the concentration coordinator, BIO 426 and/or BIO 427 may be substituted. Students are strongly encouraged to discuss their career interests with an adviser who can help select courses best suited to their needs. In addition to the courses listed below, a maximum of eight credits of BIO 495, BIO 496, BIO 497 and BIO 499A/BIO 499B/BIO 499C can be counted toward the EEB concentration.

- BIO 245. General Microbiology (3, 2) *4.00*^{1,2}
- BIO 309. Marine and Freshwater Invertebrates (3, 0) *3.00*¹
- BIO 310. Marine Biology *3.00*¹
- BIO 320. Comparative Anatomy of Vertebrates (2, 4) *4.00*^{1,2}
- BIO 340. Morphology and Anatomy of Vascular Plants (2, 4) *4.00*^{1,2}

- BIO 342. Mathematical Models in Biology *3.00*
or
- MATH 342. Mathematical Models in Biology *3.00*

- BIO 345. Animal Field Biology *3.00*^{1,2}
- BIO 354. Global Climate Change and Life: Ecological and Biological Impacts of Climate Variability (3, 3) *4.00*

- BIO 357. Galápagos Islands: Biodiversity and Conservation 3.00 ¹
- BIO 360. Plant Biology (3, 0) 3.00 ¹
- BIO 366. Environmental Ecology and Evolution (3, 3) 4.00 ²
- BIO 370. Animal Physiology (3, 3) 4.00 ²
- BIO 386. Field Botany (3, 3) 4.00 ^{1,2}
- BIO 387. Environmental Microbiology 3.00
- BIO 387L. Environmental Microbiology Laboratory 1.00 ²

- BIO 395. Comparative Animal Behavior (3, 0) 3.00
or
- PSYC 395. Comparative Animal Behavior 3.00

- BIO 400. Geology and Ecology of the Bahamas 3.00
or
- GEOL 400. Geology and Ecology of the Bahamas 3.00

- BIO 402. Forest Ecology 4.00 ²
or
- GEOG 402. Forest Ecology 4.00 ²

- BIO 404. Evolutionary Analysis (3, 0) 3.00

- BIO 405. Vertebrate Paleontology (3, 1) 3.00
or
- GEOL 405. Vertebrate Paleontology 3.00

- BIO 412. Mammalogy 4.00 ^{1,2}
- BIO 430. Ornithology: Research and Current Advances 4.00 ^{1,2}
- BIO 447. Evolution and Ecology of Infectious Disease (3, 0) 3.00
- BIO 449. Insect Ecology (2, 4) 4.00 ^{1,2}
- BIO 451. Current Topics in Human Development and Evolution (3, 0) 3.00
- BIO 452. Population Ecology (2, 4) 4.00 ²
- BIO 453. Microbial Ecology and Evolution (2, 4) 3.00
- BIO 454. Introduction to Biometrics (3, 1) 4.00
- BIO 455. Plant Physiology (3, 3) 4.00 ²
- BIO 456. Landscape Ecology (3, 3) 4.00 ²
- BIO 457. Biological Applications of Geographic Information Systems (2, 4) 4.00 ²
- BIO 459. Freshwater Ecology (3, 3) 4.00 ²
- BIO 465. Environmental Toxicology (2, 4) 4.00 ²
- BIO 466. Toxicology Seminar (3, 0) 3.00
- BIO 470. Morphology of Nonvascular Plants (2, 4) 4.00 ^{1,2}
- BIO 484. Aquatic Microbiology 3.00 ^{1,2}
- BIO 486. Systematics of Vascular Plants (2, 4) 4.00 ^{1,2}

Footnotes

¹ Meets the biology major requirement for an organismal diversity course.

² Meets one of the biology major requirements for laboratory/field courses.

Students must take two additional cognate courses:

- MATH 321. Analysis of Variance and Experimental Design *3.00*
or
- MATH 322. Applied Linear Regression *3.00*
or
- MATH 324. Applied Nonparametric Statistics *3.00*
or
- MATH 325. Survey Sampling Methods *3.00*
or
- BIO 454. Introduction to Biometrics (3, 1) *4.00*

- GEOG 215. Introduction to Geographic Information Science and Cartography *3.00*
or
- BIO 457. Biological Applications of Geographic Information Systems (2, 4) *4.00*

Additional Information

It is highly recommended that students take additional upper-level degree elective courses in geography/GIS (such as GEOG 466. GIS and Geographic Databases, or GEOG 467. GIS Project Management) and in statistics (such as MATH 322. Applied Linear Regression, or MATH 324. Applied Nonparametric Statistics). Students should consult with their adviser about which courses are appropriate.

Biology, Microbiology Concentration, B.S.

Degree and Major Requirements

Concentration Coordinator: Kyle Seifert

Phone: (540)568-2286

E-mail: seiferkx@jmu.edu

Concentration in Microbiology

The biology department offers a concentration within the biology major for students with interest in bacteriology, virology, immunology, parasitology and infectious disease. Students choosing a concentration in microbiology must meet all the requirements for the biology major, including the following specific requirements.

Required Courses

- BIO 245. General Microbiology (3, 2) *4.00*
- BIO 246. Microbiology Seminar *1.00*
- BIO 348. Medical Microbiology *3.00*
- BIO 387. Environmental Microbiology *3.00*

Choose one of the following laboratory courses: 1-2 Credit Hours

- BIO 204. Viral Genome and Bioinformatics (0,4) 2.00
- ISAT 204. Viral Genome and Bioinformatics 2.00
- BIO 346. Bacterial Discovery 2.00 ¹
- BIO 348L. Medical Microbiology Laboratory 1.00 ¹
- BIO 387L. Environmental Microbiology Laboratory 1.00 ¹

Footnote

¹ Meets one of the biology major requirements for a laboratory/field course.

Choose 6 Credit Hours from the following courses:

Up to two credit hours may be earned from courses with a laboratory (L) designation. No course may be used to fulfill both this requirement and the concentration's laboratory requirement. With prior approval from the concentration coordinator, BIO 426 and/or BIO 427 may be substituted.

- BIO 343. Immunology (3, 0) 3.00
- BIO 343L. Immunology Laboratory (0, 4) 1.00
- BIO 348L. Medical Microbiology Laboratory 1.00
- BIO 387L. Environmental Microbiology Laboratory 1.00
- BIO 420. Medical Parasitology (3, 0) 3.00
- BIO 420L. Medical Parasitology Lab (0, 3) 1.00
- BIO 444. Virology (3, 0) 3.00
- BIO 447. Evolution and Ecology of Infectious Disease (3, 0) 3.00
- BIO 453. Microbial Ecology and Evolution (2, 4) 3.00
- BIO 484. Aquatic Microbiology 3.00

Total: 19 Credit Hours

Biology, Neuroscience Concentration, B.S.

Degree and Major Requirements

Concentration Coordinator: Mark Gabriele

Phone: (540) 568-6333

E-mail: gabrieml@jmu.edu

Concentration in Neuroscience

The biology department offers a concentration within the biology major for students with interests in cell and molecular, systems, and behavioral aspects of the nervous system and its functionality. Students choosing a concentration in neuroscience must meet all of the requirements for the biology major in addition to the following requirements. Courses for this concentration can also satisfy biology major requirements.

Required Courses

Choose one: 3 Credit Hours

- BIO 301. Introductory Neuroscience 3.00
- BIO 385. Biopsychology 3.00
or
- PSYC 385. Biopsychology 3.00

Choose one: 3-4 Credit Hours

- BIO 415. Neuroanatomy and Neurogenic Communication Disorders 3.00
or
- CSD 415. Neuroanatomy and Neurogenic Communication Disorders 3.00
- BIO 445. Neurobiology (3, 3) 4.00¹

Neuroscience Concentration Electives: 9-12 Credit Hours

Choose three, of which at least one must be principally a neurobiology course (BIO 375/PSYC 375, BIO 415/CSD 415, BIO 443, BIO 445, BIO 446 or BIO 448).

- BIO 316. Animal Development (3, 0) 3.00 with optional laboratory¹
- BIO 375. Sensation and Perception 3.00
or
- PSYC 375. Sensation & Perception 3.00
- BIO 415. Neuroanatomy and Neurogenic Communication Disorders 3.00²
or
- CSD 415. Neuroanatomy and Neurogenic Communication Disorders 3.00²
- BIO 443. Understanding Techniques in Neuroscience 3.00
- BIO 445. Neurobiology (3, 3) 4.00^{1,2}
- BIO 446. Experimental Neurobiology 4.00¹
- BIO 448. Developmental Neurobiology 4.00¹
- BIO 480. Advanced Molecular Biology (2, 5) 4.00¹
- BIO 481. Genomics (3, 3) 4.00¹
- BIO 482. Human Histology (3, 3) 4.00¹

Total: 15-19 Credit Hours

Footnotes

¹ Meets one of the biology major requirements for a laboratory/field course.

² BIO 445 and BIO 415/CSD 415: The course not taken as part of required neuroscience concentration core may be used to fulfill elective requirements.

Additional Information

Students should choose additional BIO courses at the 300-400 level, including a course that fulfills the organismal diversity major requirement, and are strongly encouraged to discuss their career interests with an adviser who can help select courses best suited to their needs. With prior approval from the concentration coordinator, BIO 426 and/or BIO 427 may be substituted. It is recommended that students participate in independent research (BIO 497/BIO 499A/BIO 499B/BIO 499C) with a faculty mentor.

Biotechnology

Biotechnology, B.S.

Dr. Stephanie Stockwell, **Director**

Phone: (540) 568-8980

Email: stockwsb@jmu.edu

Location: ISAT-CISAT Building, Room 320

Mission

JMU Biotechnology is a 4-year interdisciplinary major leading to a B.S. degree. The program is shared among the Departments of Biology, Chemistry and Biochemistry, and Integrated Science and Technology (ISAT). Students undertake a rigorous curriculum rich with hands-on laboratory experiences, critical analyses of both the "how" and the "why" of biotechnological solutions, and the development of transferable skills needed to keep up in a rapidly changing field. The combination of both scientific/technical depth and cross-disciplinary breadth allow graduates to pursue diverse career paths in industry, government and advanced studies.

Biotechnology majors complete 47-50 credit hours of science foundation courses, 17 credit hours of biotechnology transition and core courses, and 15 credit hours of electives. Advanced courses are selected from an extensive list of Biology, Chemistry and Biochemistry, ISAT, Engineering and Mathematics and Statistics offerings. Students work with assigned academic advisers to develop individualized portfolios of upper level courses that best suit their unique interests and goals. Up to six credits of undergraduate research or internship experiences can be applied to the upper level electives requirement.

Students are eligible for the General Business Minor. Students may not receive dual credit toward the Biotechnology major for 300- and 400-level Biology courses that are also applied toward the Biology major. Biotechnology students pursuing a minor in ISAT may not substitute 100-level Biology or Chemistry courses for ISAT foundation courses. Biotechnology majors are not eligible for the Biochemistry and Molecular Biology Minor.

Degree and Major Requirements

Degree Requirements

- General Education: The Human Community *41 Credit Hours*¹
- Quantitative requirement *3 Credit Hours*²
- Scientific Literacy requirement *3-4 Credit Hours*²
- Major requirements (listed below) and electives *79 Credit Hours*

Total: 126 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements that each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² In addition to General Education.

Major Requirements

Science Foundation Courses

- CHEM 131. General Chemistry I [C3PP] 3.00 and
- CHEM 132. General Chemistry II 3.00

- CHEM 131L. General Chemistry Laboratory [C3PP] 1.00 and
- CHEM 132L. General Chemistry Laboratory 1.00

- CHEM 241. Organic Chemistry I 3.00 and
- CHEM 242. Organic Chemistry II 3.00

- CHEM 242L. Organic Chemistry Laboratory 2.00

- BIO 140. Foundations of Biology I (3,3) [C3NS] 4.00
- BIO 150. Foundations of Biology II (3,3) 4.00
- BIO 240. Genetics (3,3) 4.00
- BIO 245. General Microbiology (3, 2) 4.00

Note

Students who wish to take BIO 250 in lieu of BIO 245 are encouraged to seek approval for this substitution from the biotechnology program director.

Choose one of the following sets of courses:

- PHYS 140. College Physics I [C3PP] 3.00 and
- PHYS 140L. General Physics Laboratory [C3PP] 1.00 and
- PHYS 150. College Physics II 3.00 and
- PHYS 150L. General Physics Laboratory 1.00

or

- PHYS 240. University Physics I [C3PP] 3.00 and
- PHYS 240L. University Physics Laboratory I [C3PP] 1.00
- PHYS 250. University Physics II 3.00 and
- PHYS 250L. University Physics Laboratory II 1.00

Choose one of the following sets of courses:

- MATH 231. Calculus with Functions I [C3QR] 3.00
- MATH 232. Calculus with Functions II 3.00
or
- MATH 233E. Calculus with Modeling I 3.00
- MATH 234. Calculus with Modeling II 3.00
or
- MATH 235. Calculus I [C3QR] 4.00

Choose one of the following courses:

- MATH 220. Elementary Statistics [C3QR] 3.00
- MATH 285. Data Analysis 4.00

Total: 47-50 Credit Hours

Biotechnology Transition and Core Courses

- BIOT 260. Biotechnology Seminar 1.00
- ISAT 305. Instrumentation and Measurement in Biotechnology (0, 2) 1.00
- ISAT 451. Biotechnology in Industry and Agriculture 3.00
- ISAT 456. Ethical, Legal, & Social Implications of Biotechnology 3.00
- CHEM 361. Biochemistry I 3.00
- CHEM 366L. Biochemistry Laboratory 2.00
- BIO 480. Advanced Molecular Biology (2, 5) 4.00

Total: 17 Credit Hours

Biotechnology Elective Courses

Select 15 credit hours:

- BIO 301. Introductory Neuroscience 3.00
- BIO 316. Animal Development (3, 0) 3.00
- BIO 324. Human Genetics (3, 0) 3.00

- BIO 342. Mathematical Models in Biology 3.00
or
- MATH 342. Mathematical Models in Biology 3.00

- BIO 343. Immunology (3, 0) 3.00
- BIO 343L. Immunology Laboratory (0, 4) 1.00
- BIO 348. Medical Microbiology 3.00
- BIO 348L. Medical Microbiology Laboratory 1.00
- BIO 360. Plant Biology (3, 0) 3.00
- BIO 364. Human Uses of Plants (3, 0) 3.00
- BIO 364L. Laboratory in Human Uses of Plants (0, 3) 1.00
- BIO 370. Animal Physiology (3, 3) 4.00

- BIO 387. Environmental Microbiology 3.00
- BIO 387L. Environmental Microbiology Laboratory 1.00
- BIO 416. Human Embryology (3, 3) 4.00
- BIO 420. Medical Parasitology (3, 0) 3.00
- BIO 420L. Medical Parasitology Lab (0, 3) 1.00
- BIO 432. Light Microscopy (2, 4) 4.00
- BIO 444. Virology (3, 0) 3.00
- BIO 445. Neurobiology (3, 3) 4.00
- BIO 446. Experimental Neurobiology 4.00
- BIO 447. Evolution and Ecology of Infectious Disease (3, 0) 3.00
- BIO 451. Current Topics in Human Development and Evolution (3, 0) 3.00
- BIO 454. Introduction to Biometrics (3, 1) 4.00
- BIO 455. Plant Physiology (3, 3) 4.00
- BIO 460. Plant Biotechnology (2, 4) 4.00
- BIO 465. Environmental Toxicology (2, 4) 4.00
- BIO 466. Toxicology Seminar (3, 0) 3.00
- BIO 472. Human Metabolism (3, 0) 3.00
- BIO 475. Advanced Cell Biology (3, 0) 3.00
- BIO 477. The Genetics of Cancer (3, 0) 3.00
- BIO 481. Genomics (3, 3) 4.00
- BIO 482. Human Histology (3, 3) 4.00
- BIO 483. Bioinformatics (3, 3) 4.00
- BIO 490. Mechanics of Animal Movement (3, 3) 4.00
- CHEM 270. Inorganic Chemistry I 3.00
- CHEM 331. Physical Chemistry I 3.00
- CHEM 336L. Applied Physical Chemistry Laboratory 2.00
- CHEM 351. Analytical Chemistry 4.00
- CHEM 352. Instrumental Analysis 3.00
- CHEM 352L. Instrumental Analysis Laboratory 2.00
- CHEM 362. Biochemistry II 3.00
- CHEM 440. Intermediate Organic Chemistry 3.00
- CHEM 445. Polymer Chemistry 3.00
- CHEM 450. Nuclear and Radiation Chemistry 3.00
- ISAT 351. Biotechnology for the New Millennium II 3.00
- ISAT 452. Medical Biotechnology 3.00
- ISAT 454. Computer Applications in Biotechnology 3.00
- ISAT 455. Regulatory Issues Biotechnology 3.00
- ISAT 459. Awareness and Understanding of Chemical, Biological, and Radiological Weapons of Mass Destruction 3.00
- MATH 321. Analysis of Variance and Experimental Design 3.00
- MATH 322. Applied Linear Regression 3.00
- MATH 421. Applied Multivariate Statistical Analysis 3.00
- MATH 485. Selected Topics 1.00 - 4.00
- ENGR 472. Biological Treatment Processes and Reactor Design 3.00
- ENGR 498. Advanced Topics in Engineering 1.00-3.00 (select topics, such as bioprocess engineering)

Additional Information

Additional 300- and 400-level courses may meet the requirement, with permission from the program director.

Students are highly encouraged to include academic credit for independent research or internships, up to 6 credits of which may be applied to the elective requirement. Approved courses associated with this kind of independent study include:

- BIO 495, 496, and 497A and 497B
- BIO 499A, 499B and 499C
- BIOT 494
- CHEM 390A and 390B
- CHEM 494
- CHEM 497A
- CHEM 499A, 499B, 499C
- ISAT 480
- ISAT 499A, 499B and 499C

Recommended Schedule for Majors

First semester, first year biotechnology majors are encouraged to start with a 14-15 hour course load. This will generally include a biology course (four credit hours), CHEM 131 and CHEM 131L, and/or a math course, plus General Education. In some cases, the general chemistry sequence may be postponed when math placement scores suggest that the development of quantitative reasoning skills should come first. The work load may then be adjusted in the second semester based on the level of success in the first semester.

First Year

Note: Other recommended first-year courses include BIO 203. Viral Discovery (0,4) or ISAT 203 and BIO 204. Viral Genome and Bioinformatics (0,4) or ISAT 204. The total credit hours listed below do not reflect this recommendation.

- BIO 140. Foundations of Biology I (3,3) [C3NS] *4.00*
- BIO 150. Foundations of Biology II (3,3) *4.00*
- CHEM 131. General Chemistry I [C3PP] *3.00*¹
- CHEM 131L. General Chemistry Laboratory [C3PP] *1.00*¹
- CHEM 132. General Chemistry II *3.00*
- CHEM 132L. General Chemistry Laboratory *1.00*
- Quantitative course *4-6 Credit Hours*¹
- General Education: Cluster One *9 Credit Hours*

Total: 29-31 Credit Hours

Footnote

¹ Fulfills General Education: Cluster Three. Some students may be advised to postpone their general chemistry courses if their math placement scores are not sufficiently high.

Second Year

- BIOT 260. Biotechnology Seminar *1.00*
- ISAT 305. Instrumentation and Measurement in Biotechnology (0, 2) *1.00*
- BIO 240. Genetics (3,3) *4.00*
- BIO 245. General Microbiology (3, 2) *4.00*
- CHEM 241. Organic Chemistry I *3.00*
- CHEM 242. Organic Chemistry II *3.00*
- CHEM 242L. Organic Chemistry Laboratory *2.00*
- Quantitative course *3-4 Credit Hours*
- General Education: from Clusters Two, Four and Five *9 Credit Hours*

Total: 30-31 Credit Hours

Third Year

- CHEM 361. Biochemistry I *3.00*
or
- BIO 361. Biochemistry I (3, 0) *3.00*

- CHEM 366L. Biochemistry Laboratory *2.00*
- BIO 480. Advanced Molecular Biology (2, 5) *4.00*
- Biotechnology Electives *4 Credit Hours*
- Physics courses *8 Credit Hours*
- General Education: from Clusters Two, Four and Five *7 Credit Hours*
- Electives *4 Credit Hours*

Total: 32 Credit Hours

Fourth Year

- ISAT 456. Ethical, Legal, & Social Implications of Biotechnology *3.00*
- ISAT 451. Biotechnology in Industry and Agriculture *3.00*
- Biotechnology Electives *11 Credit Hours*
- General Education: from Clusters Two, Four and Five *6 Credit Hours*
- Electives *6 Credit Hours*

Total: 29 Credit Hours

Chemistry and Biochemistry, Department of

Dr. Linette M. Watkins, **Department Head**

Phone: (540) 568-6246

Email: watkinlm@jmu.edu

Location: Physics and Chemistry Building, Room 1186

Website: <http://www.jmu.edu/chemistry>

Professors

D. Amenta, K. Caran, T. DeVore, D. Downey, R. Foust, J. Gilje, C. Hughey, G. MacDonald, B. Reisner, L. Watkins

Associate Professors

A. Baber, C. Berndsen, B. Boardman, O. Kokhan, S. Lewis, D. Mohler, I. Sumner, N. Wright, Y. Zhang

Assistant Professors

G. Peters, P. Raston

Lecturers

I. Black, D. Blumling, K. Funck, Q. Liu, D. Warnaar, D. Wilson

Mission Statement

The Department of Chemistry and Biochemistry offers the B.S. degree for a major in chemistry, with concentrations that meet the American Chemical Society Accredited Programs requirements for programs in biochemistry, materials chemistry and in chemistry/chemical education. In addition, the department offers a B.S. degree in biophysical chemistry. It also offers minors in chemistry, biochemistry and molecular biology, and materials science. The programs are designed to provide the theoretical and practical instruction in chemistry and related areas to prepare students for careers in chemistry, biochemistry, medicine, dentistry, paramedical areas, forensic sciences, chemical engineering and other technology based areas. The department also recognizes its responsibility to provide courses for non-chemistry majors who need a basic understanding of the principles of chemistry either for their chosen major or their general education.

Career Opportunities

- Graduate school in chemistry, biochemistry or related areas (ACS Certified Degrees preferred)
- Professional employment as a chemist or biochemist (ACS Certified Degrees preferred)
- Professional school (medical, dental, veterinary, pharmacy, business and law)
- Chemical engineering
- Environmental science
- Forensic science
- Immunology
- Industrial hygiene
- Pharmaceutical chemistry
- Pharmacology
- Production supervision
- Quality control
- Research assistant
- Science educator
- Scientific writing
- Some forms of development work
- Technical library science
- Toxicology
- Other fields where critical problem solving and technical communication skills are valued

Co-curricular Activities and Organizations

- American Chemical Society Student Affiliate Chapter
- Alpha Chi Sigma Professional Fraternity (Coed)
- Iota Sigma Pi

Teaching Licensure

There are two paths to licensure as a high school teacher (link). One is a 4-year path with a double major in Chemistry Education and Secondary Education. Another common option is a 5-year path with the General Program in Chemistry with a Secondary Education Minor, and adding a 5th year Master of Arts in Teaching (M.A.T.).

It is critical that students seeking licensure consult regularly with both their education adviser and their major adviser to support their progression through the programs. For a full description of the program in secondary teaching, refer to the Middle, Secondary and Mathematics Education, Department of, in addition to the College of Education/Professional Education Unit section of the catalog.

Biophysical Chemistry, B.S.

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Quantitative requirement (in addition to General Education) *3 Credit Hours*²
- Scientific Literacy requirement (in addition to General Education) *3-4 Credit Hours*²
- Major requirements and electives *85-87 Credit Hours*

Total: 131 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary. Some courses that are required for this major will meet General Education requirements.

² The quantitative and scientific literacy requirements for this degree are met by courses required for the major. As a result, the total credit hours earned for the degree will be 131.

Major Requirements

- CHEM 131. General Chemistry I [C3PP] *3.00*
- CHEM 132. General Chemistry II *3.00*
- CHEM 135L. Special General Chemistry Laboratory I *1.00*¹
- CHEM 136L. Special General Chemistry Laboratory II *2.00*¹
- CHEM 270. Inorganic Chemistry I *3.00*
- CHEM 241. Organic Chemistry I *3.00*
- CHEM 242. Organic Chemistry II *3.00*
- CHEM 287L. Integrated Inorganic/Organic Laboratory I *2.00*²
- CHEM 288L. Integrated Inorganic/Organic Laboratory II *2.00*²
- CHEM 351. Analytical Chemistry *4.00*
- CHEM 361. Biochemistry I *3.00*
- CHEM 363. Biophysical Chemistry *3.00* (Literature & Seminar included)
- CHEM 367L. Biochemistry Laboratory *2.00* (fall)

- CHEM 368L. Biophysical Chemistry Laboratory 2.00 (spring)
- CHEM 331. Physical Chemistry I 3.00
- CHEM 432. Physical Chemistry II 3.00
- CHEM 336L. Applied Physical Chemistry Laboratory 2.00
- BIO 140. Foundations of Biology I (3,3) [C3NS] 4.00
- BIO 240. Genetics (3,3) 4.00
- BIO 480. Advanced Molecular Biology (2, 5) 4.00

Physics and Mathematics Background Courses: 24 Credit Hours

- MATH 235. Calculus I [C3QR] 4.00
- MATH 236. Calculus II 4.00
- MATH 237. Calculus III 4.00

or

- MATH 231. Calculus with Functions I [C3QR] 3.00
- MATH 232. Calculus with Functions II 3.00
- MATH 236. Calculus II 4.00
- MATH 237. Calculus III 4.00

- MATH 238. Linear Algebra with Differential Equations 4.00
- PHYS 240. University Physics I [C3PP] 3.00
- PHYS 250. University Physics II 3.00
- PHYS 240L. University Physics Laboratory I [C3PP] 1.00
- PHYS 250L. University Physics Laboratory II 1.00

Choose at least two of the following electives: 6-8 Credit Hours

- CHEM 375. An Introduction to Materials Science 3.00
or
- PHYS 375. An Introduction to Materials Science 3.00
or
- MATS 375. An Introduction to Materials Science 3.00

- CHEM 362. Biochemistry II 3.00
- CHEM 440. Intermediate Organic Chemistry 3.00
- CHEM 445. Polymer Chemistry 3.00
- CHEM 470. Inorganic Chemistry II 3.00
- BIO 324. Human Genetics (3, 0) 3.00
- BIO 445. Neurobiology (3, 3) 4.00
- BIO 475. Advanced Cell Biology (3, 0) 3.00
- PHYS 260. University Physics III 3.00
- PHYS 270. Modern Physics 4.00
- PHYS 326. Biophysics 3.00

- PHYS 381. Materials Characterization (Lecture/Lab) 3.00
- BIO 342. Mathematical Models in Biology 3.00

- or
- MATH 342. Mathematical Models in Biology 3.00

- CHEM 390A. Problems in Chemistry 1.00-3.00
- CHEM 390B. Problems in Chemistry 1.00 - 3.00
- or
- CHEM 497A. Undergraduate Chemical Research 1.00
- or
- CHEM 499A. Honors 1.00

- BIO 494. Internship in Biology (0, 4-8) 1.00 - 2.00
- or
- BIO 497. Biological Research (0, 4-8) 1.00, *repeatable*

- PHYS 398. Independent Study in Physics or Astronomy 1.00 - 3.00
- or
- PHYS 498R. Undergraduate Research in Physics or Astronomy 1.00 - 4.00
- or
- PHYS 499. Honors 1.00 - 3.00, *repeatable*

- MATH 497. Undergraduate Research 1.00 - 4.00
- or
- MATH 498. Independent Study
- or
- MATH 499A/MATH 499B/MATH 499C

- ANY 300-400 level CHEM, PHYS or MATH course pre-approved by adviser

Total: 85-87 Credit Hours

Footnotes

¹ CHEM 131L-CHEM 132L may be substituted.

² CHEM 242L may be substituted.

Recommended Schedule for Majors

First Year

- CHEM 131. General Chemistry I [C3PP] 3.00
- CHEM 132. General Chemistry II 3.00

- CHEM 135L. Special General Chemistry Laboratory I 1.00
- CHEM 136L. Special General Chemistry Laboratory II 2.00
- or
- CHEM 131L. General Chemistry Laboratory [C3PP] 1.00
- CHEM 132L. General Chemistry Laboratory 1.00

- BIO 140. Foundations of Biology I (3,3) [C3NS] 4.00
- MATH 235. Calculus I [C3QR] 4.00
- MATH 236. Calculus II 4.00
- General Education courses or electives 10 Credit Hours

Total: 30-31 Credit Hours

Second Year

- CHEM 241. Organic Chemistry I 3.00
- CHEM 242. Organic Chemistry II 3.00
- CHEM 270. Inorganic Chemistry I 3.00
- CHEM 287L. Integrated Inorganic/Organic Laboratory I 2.00
- CHEM 288L. Integrated Inorganic/Organic Laboratory II 2.00
- BIO 240. Genetics (3,3) 4.00
- MATH 237. Calculus III 4.00
- PHYS 240. University Physics I [C3PP] 3.00
- PHYS 250. University Physics II 3.00
- PHYS 240L. University Physics Laboratory I [C3PP] 1.00
- PHYS 250L. University Physics Laboratory II 1.00
 - General Education courses or electives 3 Credit Hours

Total: 32 Credit Hours

Third Year

- CHEM 331. Physical Chemistry I 3.00
- CHEM 336L. Applied Physical Chemistry Laboratory 2.00
- CHEM 351. Analytical Chemistry 4.00
- CHEM 361. Biochemistry I 3.00
- MATH 238. Linear Algebra with Differential Equations 4.00
- General Education courses or electives 14 Credit Hours

Total: 30 Credit Hours

Fourth Year:

- CHEM 363. Biophysical Chemistry 3.00
- CHEM 367L. Biochemistry Laboratory 2.00
- CHEM 368L. Biophysical Chemistry Laboratory 2.00
- CHEM 432. Physical Chemistry II 3.00
- BIO 480. Advanced Molecular Biology (2, 5) 4.00
- General Education courses or electives 12 Credit Hours

Total: 26 Credit Hours

Chemistry Minor

The requirements for a minor in chemistry are 24 credit hours in chemistry, distributed as follows:

Courses

General Chemistry 8 Credit Hours

- CHEM 131. General Chemistry I [C3PP] 3.00
- CHEM 132. General Chemistry II 3.00
- CHEM 131L. General Chemistry Laboratory [C3PP] 1.00
- CHEM 132L. General Chemistry Laboratory 1.00

Organic Chemistry: One or two lectures and corresponding lab 4-8 Credit Hours

- CHEM 241. Organic Chemistry I 3.00 and
- CHEM 241L. Concepts of Organic Chemistry Laboratory 1.00

or

- CHEM 241. Organic Chemistry I 3.00 and
- CHEM 242. Organic Chemistry II 3.00 and
- CHEM 242L. Organic Chemistry Laboratory 2.00

Physical Chemistry: One lecture and corresponding lab 5 Credit Hours

- CHEM 331. Physical Chemistry I 3.00 and
 - CHEM 336L. Applied Physical Chemistry Laboratory 2.00
- or
- CHEM 432. Physical Chemistry II 3.00 and
 - CHEM 438L. Physical Chemistry Laboratory 2.00

Analytical Chemistry 4 Credit Hours

- CHEM 351. Analytical Chemistry 4.00

An approved three-credit CHEM elective

Total: 24 Credit Hours

Additional Information

In order to complete this minor, prerequisite courses in mathematics and physics are required. These courses collectively fulfill the nine-credit approved technical elective package for the Bachelor of Science in Engineering.

Chemistry, American Chemical Society Certified Curriculum in Biochemistry Concentration, B.S.

Concentration II: American Chemical Society Certified Curriculum in Biochemistry

This program meets the recommended undergraduate degree requirements of the American Society for Biochemistry and Molecular Biology for a major in biochemistry. All ACS Certified Programs require a minimum of 400 hours of laboratory and research. Students completing concentration II must complete the courses below in addition to core courses.

Degree and Major Requirements

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Quantitative requirement (in addition to General Education) *3 Credit Hours*²
- Scientific Literacy requirement (in addition to General Education) *3-4 Credit Hours*²
- Major requirements and electives *70-74 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary. Some courses that are required for this major will meet General Education requirements.

² The quantitative and scientific literacy requirements are met by courses required in the major.

Additional Information

Students must complete all course work in one of the six concentrations listed to earn a bachelor's degree in chemistry. The credit hours for major requirements will vary based on the chosen concentration.

Core Requirements for all concentrations

- CHEM 131. General Chemistry I [C3PP] *3.00*
- CHEM 132. General Chemistry II *3.00*
- CHEM 135L. Special General Chemistry Laboratory I *1.00*¹
- CHEM 136L. Special General Chemistry Laboratory II *2.00*¹
- CHEM 241. Organic Chemistry I *3.00*
- CHEM 242. Organic Chemistry II *3.00*
- CHEM 270. Inorganic Chemistry I *3.00*
- CHEM 287L. Integrated Inorganic/Organic Laboratory I *2.00*

- CHEM 288L. Integrated Inorganic/Organic Laboratory II 2.00
- CHEM 331. Physical Chemistry I 3.00
- CHEM 351. Analytical Chemistry 4.00
- CHEM 361. Biochemistry I 3.00
- CHEM 481. Literature and Seminar I 1.00
- CHEM 482. Literature and Seminar II 1.00

Total: 34 Credit Hours

Required Cognate Courses for all Concentrations

- MATH 235. Calculus I [C3QR] 4.00 and
- MATH 236. Calculus II 4.00 (or MATH 231, 232 and 236)
- PHYS 240. University Physics I [C3PP] 3.00
- PHYS 250. University Physics II 3.00
- PHYS 240L. University Physics Laboratory I [C3PP] 1.00
- PHYS 250L. University Physics Laboratory II 1.00

Total: 16-18 Credit Hours

Footnote

¹ CHEM 131L-132L may be substituted.

Electives

The well-prepared student is encouraged to take as many of the additional departmental offerings as possible as electives with attention being given to junior and/or senior research projects.

Three credits of undergraduate research (CHEM 390A/CHEM 390B/497A/499A) may be used to satisfy chemistry elective requirements if the research project is completed with the same faculty mentor over multiple semesters.

Required Courses

This program meets the recommended undergraduate degree requirements of the American Society for Biochemistry and Molecular Biology for a major in biochemistry. All ACS Certified Programs require a minimum of 400 hours of laboratory and research. Students completing concentration II must complete the courses below in addition to core courses.

- CHEM 352. Instrumental Analysis 3.00
- CHEM 352L. Instrumental Analysis Laboratory 2.00
- CHEM 362. Biochemistry II 3.00
- CHEM 366L. Biochemistry Laboratory 2.00
- CHEM 432. Physical Chemistry II 3.00
- CHEM 438L. Physical Chemistry Laboratory 2.00
- BIO 140. Foundations of Biology I (3,3) [C3NS] 4.00
- BIO 240. Genetics (3,3) 4.00
- BIO 245. General Microbiology (3, 2) 4.00

- BIO 480. Advanced Molecular Biology (2, 5) *4.00*

Total: 31 Credit Hours

Recommended Schedule for Majors

First Year

- CHEM 131. General Chemistry I [C3PP] *3.00*
- CHEM 132. General Chemistry II *3.00*

- CHEM 135L. Special General Chemistry Laboratory I *1.00*
- CHEM 136L. Special General Chemistry Laboratory II *2.00*
or
- CHEM 131L. General Chemistry Laboratory [C3PP] *1.00*
- CHEM 132L. General Chemistry Laboratory *1.00*

- MATH 235. Calculus I [C3QR] *4.00*
- MATH 236. Calculus II *4.00*
- BIO 140. Foundations of Biology I (3,3) [C3NS] *4.00*
- General Education courses or electives *10 Credit Hours*

Total: 30-31 Credit Hours

Second Year

- CHEM 241. Organic Chemistry I *3.00*
- CHEM 242. Organic Chemistry II *3.00*
- CHEM 270. Inorganic Chemistry I *3.00*
- CHEM 287L. Integrated Inorganic/Organic Laboratory I *2.00*
- CHEM 288L. Integrated Inorganic/Organic Laboratory II *2.00*
- PHYS 240. University Physics I [C3PP] *3.00*
- PHYS 250. University Physics II *3.00*
- PHYS 240L. University Physics Laboratory I [C3PP] *1.00*
- PHYS 250L. University Physics Laboratory II *1.00*
 - General Education courses or electives *9 Credit Hours*

Total: 30 Credit Hours

Third Year

- CHEM 331. Physical Chemistry I *3.00*
- CHEM 351. Analytical Chemistry *4.00*
- CHEM 352. Instrumental Analysis *3.00*
- CHEM 352L. Instrumental Analysis Laboratory *2.00*
- CHEM 361. Biochemistry I *3.00*

- CHEM 481. Literature and Seminar I *1.00*
- CHEM 482. Literature and Seminar II *1.00*
- Courses in the concentration, General Education or electives *13 Credit Hours*

Total: 30 Credit Hours

Fourth Year

Courses in the concentration, General Education or electives *29 Credit Hours*

Total: 29 Credit Hours

Chemistry, American Chemical Society Certified Curriculum in Chemical Education Concentration, B.S.

Concentration IV: American Chemical Society Certified Curriculum in Chemical Education

All ACS Certified Programs require a minimum of 400 hours of laboratory and research. Students completing concentration IV must complete the courses below in addition to core courses.

Teaching Licensure

Students interested in becoming teachers must meet specific curriculum requirements in their major as part of the undergraduate academic degree. Chemistry majors must also complete a course in biology and a course in geology.

In addition to the general education and academic major requirements, chemistry majors desiring secondary teacher licensure must be admitted to teacher education, complete the pre-professional program in secondary education at the undergraduate level and the graduate level Master of Arts in Teaching degree.

It is critical that students seeking licensure consult regularly with both their education adviser and their major adviser to support their progression through the programs. For a full description of the program in secondary teaching, refer to the Middle, Secondary and Mathematics Education, Department of, in addition to the College of Education/Professional Education Unit section of the catalog.

Degree and Major Requirements

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Quantitative requirement (in addition to General Education) *3 Credit Hours*²
- Scientific Literacy requirement (in addition to General Education) *3-4 Credit Hours*²

- Major requirements and electives *70-74 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary. Some courses that are required for this major will meet General Education requirements.

² The quantitative and scientific literacy requirements are met by courses required in the major.

Additional Information

Students must complete all course work in one of the six concentrations listed to earn a bachelor's degree in chemistry. The credit hours for major requirements will vary based on the chosen concentration.

Core Requirements for all concentrations

- CHEM 131. General Chemistry I [C3PP] 3.00
- CHEM 132. General Chemistry II 3.00
- CHEM 135L. Special General Chemistry Laboratory I 1.00 ¹
- CHEM 136L. Special General Chemistry Laboratory II 2.00 ¹
- CHEM 241. Organic Chemistry I 3.00
- CHEM 242. Organic Chemistry II 3.00
- CHEM 270. Inorganic Chemistry I 3.00
- CHEM 287L. Integrated Inorganic/Organic Laboratory I 2.00
- CHEM 288L. Integrated Inorganic/Organic Laboratory II 2.00
- CHEM 331. Physical Chemistry I 3.00
- CHEM 351. Analytical Chemistry 4.00
- CHEM 361. Biochemistry I 3.00
- CHEM 481. Literature and Seminar I 1.00
- CHEM 482. Literature and Seminar II 1.00

Total: 34 Credit Hours

Required Cognate Courses for all Concentrations

- MATH 235. Calculus I [C3QR] 4.00 and
- MATH 236. Calculus II 4.00 (or MATH 231, 232 and 236)
- PHYS 240. University Physics I [C3PP] 3.00
- PHYS 250. University Physics II 3.00
- PHYS 240L. University Physics Laboratory I [C3PP] 1.00
- PHYS 250L. University Physics Laboratory II 1.00

Total: 16-18 Credit Hours

Footnote

¹ CHEM 131L-132L may be substituted.

Electives

The well-prepared student is encouraged to take as many of the additional departmental offerings as possible as electives with attention being given to junior and/or senior research projects.

Three credits of undergraduate research (CHEM 390A/CHEM 390B/497A/499A) may be used to satisfy chemistry elective requirements if the research project is completed with the same faculty mentor over multiple semesters.

Required Courses

All ACS Certified Programs require a minimum of 400 hours of laboratory and research. Students completing concentration IV must complete the courses below in addition to core courses.

- CHEM 352. Instrumental Analysis *3.00*
- CHEM 352L. Instrumental Analysis Laboratory *2.00*
- CHEM 432. Physical Chemistry II *3.00*
- CHEM 438L. Physical Chemistry Laboratory *2.00*
- ACS Certified Chemical Education Courses: See Licensure Programs.

Recommended Schedule for Majors

First Year

- CHEM 131. General Chemistry I [C3PP] *3.00*
- CHEM 132. General Chemistry II *3.00*

- CHEM 135L. Special General Chemistry Laboratory I *1.00*
- CHEM 136L. Special General Chemistry Laboratory II *2.00*
or
- CHEM 131L. General Chemistry Laboratory [C3PP] *1.00*
- CHEM 132L. General Chemistry Laboratory *1.00*

- MATH 235. Calculus I [C3QR] *4.00*
- MATH 236. Calculus II *4.00*
- BIO 140. Foundations of Biology I (3,3) [C3NS] *4.00*
- General Education courses or electives *10 Credit Hours*

Total: 30-31 Credit Hours

Second Year

- CHEM 241. Organic Chemistry I *3.00*
- CHEM 242. Organic Chemistry II *3.00*
- CHEM 270. Inorganic Chemistry I *3.00*
- CHEM 287L. Integrated Inorganic/Organic Laboratory I *2.00*

- CHEM 288L. Integrated Inorganic/Organic Laboratory II *2.00*
- PHYS 240. University Physics I [C3PP] *3.00*
- PHYS 250. University Physics II *3.00*
- PHYS 240L. University Physics Laboratory I [C3PP] *1.00*
- PHYS 250L. University Physics Laboratory II *1.00*
 - General Education courses or electives *9 Credit Hours*

Total: 30 Credit Hours

Third Year

- CHEM 331. Physical Chemistry I *3.00*
- CHEM 351. Analytical Chemistry *4.00*
- CHEM 352. Instrumental Analysis *3.00*
- CHEM 352L. Instrumental Analysis Laboratory *2.00*
- CHEM 361. Biochemistry I *3.00*
- CHEM 481. Literature and Seminar I *1.00*
- CHEM 482. Literature and Seminar II *1.00*
- Courses in the concentration, General Education or electives *13 Credit Hours*

Total: 30 Credit Hours

Fourth Year

Courses in the concentration, General Education or electives *29 Credit Hours*

Total: 29 Credit Hours

Chemistry, American Chemical Society Certified Curriculum in Chemistry Concentration, B.S.

Concentration I: American Chemical Society Certified Curriculum in Chemistry

All ACS Certified Programs require a minimum of 400 hours of laboratory and research. Students completing concentration I must complete the courses below in addition to core courses.

Degree and Major Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Quantitative requirement (in addition to General Education) *3 Credit Hours*²

- Scientific Literacy requirement (in addition to General Education) *3-4 Credit Hours*²
- Major requirements and electives *70-74 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary. Some courses that are required for this major will meet General Education requirements.

² The quantitative and scientific literacy requirements are met by courses required in the major.

Additional Information

Students must complete all course work in one of the six concentrations listed to earn a bachelor's degree in chemistry. The credit hours for major requirements will vary based on the chosen concentration.

Core Requirements for all concentrations

- CHEM 131. General Chemistry I [C3PP] *3.00*
- CHEM 132. General Chemistry II *3.00*
- CHEM 135L. Special General Chemistry Laboratory I *1.00*¹
- CHEM 136L. Special General Chemistry Laboratory II *2.00*¹
- CHEM 241. Organic Chemistry I *3.00*
- CHEM 242. Organic Chemistry II *3.00*
- CHEM 270. Inorganic Chemistry I *3.00*
- CHEM 287L. Integrated Inorganic/Organic Laboratory I *2.00*
- CHEM 288L. Integrated Inorganic/Organic Laboratory II *2.00*
- CHEM 331. Physical Chemistry I *3.00*
- CHEM 351. Analytical Chemistry *4.00*
- CHEM 361. Biochemistry I *3.00*
- CHEM 481. Literature and Seminar I *1.00*
- CHEM 482. Literature and Seminar II *1.00*

Total: 34 Credit Hours

Required Cognate Courses for all Concentrations

- MATH 235. Calculus I [C3QR] *4.00* and
- MATH 236. Calculus II *4.00* (or MATH 231, 232 and 236)
- PHYS 240. University Physics I [C3PP] *3.00*

- PHYS 240L. University Physics Laboratory I [C3PP] *1.00*
- PHYS 250L. University Physics Laboratory II *1.00*
 - General Education courses or electives *9 Credit Hours*

Total: 30 Credit Hours

Third Year

- CHEM 331. Physical Chemistry I *3.00*
- CHEM 351. Analytical Chemistry *4.00*
- CHEM 352. Instrumental Analysis *3.00*
- CHEM 352L. Instrumental Analysis Laboratory *2.00*
- CHEM 361. Biochemistry I *3.00*
- CHEM 481. Literature and Seminar I *1.00*
- CHEM 482. Literature and Seminar II *1.00*
- Courses in the concentration, General Education or electives *13 Credit Hours*

Total: 30 Credit Hours

Fourth Year

Courses in the concentration, General Education or electives *29 Credit Hours*

Total: 29 Credit Hours

Chemistry, American Chemical Society Certified Curriculum in Materials Chemistry Concentration, B.S.

Concentration III: American Chemical Society Certified Curriculum in Materials Chemistry

All ACS Certified Programs require a minimum of 400 hours of laboratory and research. Students completing concentration III must complete the courses below in addition to core courses.

Degree and Major Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Quantitative requirement (in addition to General Education) *3 Credit Hours*²
- Scientific Literacy requirement (in addition to General Education) *3-4 Credit Hours*²
- Major requirements and electives *70-74 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary. Some courses that are required for this major will meet General Education requirements.

² The quantitative and scientific literacy requirements are met by courses required in the major.

Additional Information

Students must complete all course work in one of the six concentrations listed to earn a bachelor's degree in chemistry. The credit hours for major requirements will vary based on the chosen concentration.

Core Requirements for all concentrations

- CHEM 131. General Chemistry I [C3PP] *3.00*
- CHEM 132. General Chemistry II *3.00*
- CHEM 135L. Special General Chemistry Laboratory I *1.00*¹
- CHEM 136L. Special General Chemistry Laboratory II *2.00*¹
- CHEM 241. Organic Chemistry I *3.00*
- CHEM 242. Organic Chemistry II *3.00*
- CHEM 270. Inorganic Chemistry I *3.00*
- CHEM 287L. Integrated Inorganic/Organic Laboratory I *2.00*
- CHEM 288L. Integrated Inorganic/Organic Laboratory II *2.00*
- CHEM 331. Physical Chemistry I *3.00*
- CHEM 351. Analytical Chemistry *4.00*
- CHEM 361. Biochemistry I *3.00*
- CHEM 481. Literature and Seminar I *1.00*
- CHEM 482. Literature and Seminar II *1.00*

Total: 34 Credit Hours

Required Cognate Courses for all Concentrations

- MATH 235. Calculus I [C3QR] 4.00 and
- MATH 236. Calculus II 4.00 (or MATH 231, 232 and 236)
- PHYS 240. University Physics I [C3PP] 3.00
- PHYS 250. University Physics II 3.00
- PHYS 240L. University Physics Laboratory I [C3PP] 1.00
- PHYS 250L. University Physics Laboratory II 1.00

Total: 16-18 Credit Hours

Footnote

¹ CHEM 131L-132L may be substituted.

Electives

The well-prepared student is encouraged to take as many of the additional departmental offerings as possible as electives with attention being given to junior and/or senior research projects.

Three credits of undergraduate research (CHEM 390A/CHEM 390B/497A/499A) may be used to satisfy chemistry elective requirements if the research project is completed with the same faculty mentor over multiple semesters.

Required Courses

All ACS Certified Programs require a minimum of 400 hours of laboratory and research. Students completing concentration III must complete the courses below in addition to core courses.

- CHEM 336L. Applied Physical Chemistry Laboratory 2.00
- CHEM 352. Instrumental Analysis 3.00
- CHEM 352L. Instrumental Analysis Laboratory 2.00
- CHEM 375. An Introduction to Materials Science 3.00
- CHEM 432. Physical Chemistry II 3.00
- CHEM 445. Polymer Chemistry 3.00 (with laboratory)
- MATH 237. Calculus III 4.00
- MATH 238. Linear Algebra with Differential Equations 4.00

Choose one of the following: 3-4 Credit Hours

- CHEM 485. Science of the Small 4.00
- ENGR 314. Materials and Mechanics 4.00
- ENGR 498. Advanced Topics in Engineering 1.00-3.00 (when topic is appropriate)
- GEOL 390. Laboratory Techniques in Geology (2, 2) 3.00

Total: 28-29 Credit Hours

Recommended Schedule for Majors

First Year

- CHEM 131. General Chemistry I [C3PP] 3.00
- CHEM 132. General Chemistry II 3.00

- CHEM 135L. Special General Chemistry Laboratory I 1.00
- CHEM 136L. Special General Chemistry Laboratory II 2.00
or
- CHEM 131L. General Chemistry Laboratory [C3PP] 1.00
- CHEM 132L. General Chemistry Laboratory 1.00

- MATH 235. Calculus I [C3QR] 4.00
- MATH 236. Calculus II 4.00
- BIO 140. Foundations of Biology I (3,3) [C3NS] 4.00
- General Education courses or electives 10 *Credit Hours*

Total: 30-31 Credit Hours

Second Year

- CHEM 242. Organic Chemistry II 3.00
- CHEM 270. Inorganic Chemistry I 3.00
- CHEM 287L. Integrated Inorganic/Organic Laboratory I 2.00
- CHEM 288L. Integrated Inorganic/Organic Laboratory II 2.00
- PHYS 240. University Physics I [C3PP] 3.00
- PHYS 250. University Physics II 3.00
- PHYS 240L. University Physics Laboratory I [C3PP] 1.00
- PHYS 250L. University Physics Laboratory II 1.00
 - General Education courses or electives 9 *Credit Hours*

Total: 30 Credit Hours

Third Year

- CHEM 331. Physical Chemistry I 3.00
- CHEM 351. Analytical Chemistry 4.00
- CHEM 352. Instrumental Analysis 3.00
- CHEM 352L. Instrumental Analysis Laboratory 2.00
- CHEM 361. Biochemistry I 3.00
- CHEM 481. Literature and Seminar I 1.00
- CHEM 482. Literature and Seminar II 1.00
- Courses in the concentration, General Education or electives 13 *Credit Hours*

Total: 30 Credit Hours

Fourth Year

Courses in the concentration, General Education or electives *29 Credit Hours*

Total: 29 Credit Hours

Chemistry, Chemistry/Business Program Concentration, B.S.

Concentration VI: Chemistry/Business Program

This program is designed for business-oriented chemistry students preparing for careers in patent law, technical sales, technical service and related areas. Students completing concentration VI must complete the courses below in addition to core courses.

Degree and Major Requirements

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Quantitative requirement (in addition to General Education) *3 Credit Hours*²
- Scientific Literacy requirement (in addition to General Education) *3-4 Credit Hours*²
- Major requirements and electives *70-74 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary. Some courses that are required for this major will meet General Education requirements.

² The quantitative and scientific literacy requirements are met by courses required in the major.

Additional Information

Students must complete all course work in one of the six concentrations listed to earn a bachelor's degree in chemistry. The credit hours for major requirements will vary based on the chosen concentration.

Core Requirements for all concentrations

- CHEM 131. General Chemistry I [C3PP] *3.00*
- CHEM 132. General Chemistry II *3.00*
- CHEM 135L. Special General Chemistry Laboratory I *1.00*¹
- CHEM 136L. Special General Chemistry Laboratory II *2.00*¹
- CHEM 241. Organic Chemistry I *3.00*

- CHEM 242. Organic Chemistry II *3.00*
- CHEM 270. Inorganic Chemistry I *3.00*
- CHEM 287L. Integrated Inorganic/Organic Laboratory I *2.00*
- CHEM 288L. Integrated Inorganic/Organic Laboratory II *2.00*
- CHEM 331. Physical Chemistry I *3.00*
- CHEM 351. Analytical Chemistry *4.00*
- CHEM 361. Biochemistry I *3.00*
- CHEM 481. Literature and Seminar I *1.00*
- CHEM 482. Literature and Seminar II *1.00*

Total: 34 Credit Hours

Required Cognate Courses for all Concentrations

- MATH 235. Calculus I [C3QR] *4.00* and
- MATH 236. Calculus II *4.00* (or MATH 231, 232 and 236)
- PHYS 240. University Physics I [C3PP] *3.00*
- PHYS 250. University Physics II *3.00*
- PHYS 240L. University Physics Laboratory I [C3PP] *1.00*
- PHYS 250L. University Physics Laboratory II *1.00*

Total: 16-18 Credit Hours

Footnote

¹ CHEM 131L-132L may be substituted.

Electives

The well-prepared student is encouraged to take as many of the additional departmental offerings as possible as electives with attention being given to junior and/or senior research projects.

Three credits of undergraduate research (CHEM 390A/CHEM 390B/497A/499A) may be used to satisfy chemistry elective requirements if the research project is completed with the same faculty mentor over multiple semesters.

Courses

This program is designed for business-oriented chemistry students preparing for careers in patent law, technical sales, technical service and related areas. Students completing concentration VI must complete the courses below in addition to core courses.

- CHEM 336L. Applied Physical Chemistry Laboratory *2.00*
- ACTG 244. Accounting for Non-Business Majors *3.00*
- CIS 204. Computer Information Systems Fundamentals for Non-Business Majors *3.00*
- ECON 200. Introduction to Macroeconomics [C4GE] *3.00*
- ECON 201. Introduction to Microeconomics *3.00*
- FIN 345. Finance Fundamentals for Non-Business Majors *3.00*
- MATH 220. Elementary Statistics [C3QR] *3.00*

- MGT 305. Management and Organizational Behavior *3.00*
- MKTG 380. Principles of Marketing *3.00*
- Approved chemistry, science and/or COB ¹ courses *5 Credit Hours*

Total: 31 Credit Hours

Footnote

¹ COB 218. Legal & Ethical Environment of Business is a suggested elective. Although business electives may be taken by students in this concentration, the total number of business credit hours may not exceed 27.

Recommended Schedule for Majors

First Year

- CHEM 131. General Chemistry I [C3PP] *3.00*
- CHEM 132. General Chemistry II *3.00*

- CHEM 135L. Special General Chemistry Laboratory I *1.00*
- CHEM 136L. Special General Chemistry Laboratory II *2.00*
or
- CHEM 131L. General Chemistry Laboratory [C3PP] *1.00*
- CHEM 132L. General Chemistry Laboratory *1.00*

- MATH 235. Calculus I [C3QR] *4.00*
- MATH 236. Calculus II *4.00*
- BIO 140. Foundations of Biology I (3,3) [C3NS] *4.00*
- General Education courses or electives *10 Credit Hours*

Total: 30-31 Credit Hours

Second Year

- CHEM 241. Organic Chemistry I *3.00*
- CHEM 242. Organic Chemistry II *3.00*
- CHEM 270. Inorganic Chemistry I *3.00*
- CHEM 287L. Integrated Inorganic/Organic Laboratory I *2.00*
- CHEM 288L. Integrated Inorganic/Organic Laboratory II *2.00*

- PHYS 250. University Physics II *3.00*
- PHYS 240L. University Physics Laboratory I [C3PP] *1.00*
- PHYS 250L. University Physics Laboratory II *1.00*
 - General Education courses or electives *9 Credit Hours*

Total: 30 Credit Hours

Third Year

- CHEM 331. Physical Chemistry I *3.00*
- CHEM 351. Analytical Chemistry *4.00*
- CHEM 352. Instrumental Analysis *3.00*
- CHEM 352L. Instrumental Analysis Laboratory *2.00*
- CHEM 361. Biochemistry I *3.00*
- CHEM 481. Literature and Seminar I *1.00*
- CHEM 482. Literature and Seminar II *1.00*
- Courses in the concentration, General Education or electives *13 Credit Hours*

Total: 30 Credit Hours

Fourth Year

Courses in the concentration, General Education or electives *29 Credit Hours*

Total: 29 Credit Hours

Chemistry, General Program in Chemistry Concentration, B.S.

Concentration V: General Program in Chemistry

Students completing concentration V must complete the Degree and Major courses below.

Degree and Major Requirements

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Quantitative requirement (in addition to General Education) *3 Credit Hours*²
- Scientific Literacy requirement (in addition to General Education) *3-4 Credit Hours*²
- Major requirements and electives *70-74 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary. Some courses that are required for this major will meet General Education requirements.

² The quantitative and scientific literacy requirements are met by courses required in the major.

Additional Information

Students must complete all course work in one of the six concentrations listed to earn a bachelor's degree in chemistry. The credit hours for major requirements will vary based on the chosen concentration.

Core Requirements for all concentrations

- CHEM 131. General Chemistry I [C3PP] 3.00
- CHEM 132. General Chemistry II 3.00
- CHEM 135L. Special General Chemistry Laboratory I 1.00 ¹
- CHEM 136L. Special General Chemistry Laboratory II 2.00 ¹
- CHEM 241. Organic Chemistry I 3.00
- CHEM 242. Organic Chemistry II 3.00
- CHEM 270. Inorganic Chemistry I 3.00
- CHEM 287L. Integrated Inorganic/Organic Laboratory I 2.00
- CHEM 288L. Integrated Inorganic/Organic Laboratory II 2.00

Instructors

L. Freeman, M. Garber

Mission

The Department of Communication Sciences and Disorders engages students, faculty and members of the community to advance the state of knowledge through basic and applied research, innovative professional and pre-professional education, and enhanced clinical practices to better serve those with communication disorders.

The department is committed to promoting comprehensive, state-of-the-art undergraduate pre-professional education that includes discipline-specific course work and observation. In keeping with university requirements, this includes a broad-based General Education component. The department also delivers graduate-level course work and practicum experiences for those

interested in entering professional practice in either speech-language pathology or audiology, a university teaching and research position, or a management/administrative position in service delivery settings.

The department is committed to advancing the state of knowledge in both basic and applied aspects of communication sciences and disorders through its master's and doctoral research degrees and the research activities of its faculty and students and to providing service to the profession, university and client communities at local, state, national and international levels. Through the Speech, Language, and Hearing Clinic, the department provides services as part of the clinical teaching component of its mission and serves as a clinical research resource for students and faculty.

Goals

- Providing course work and observation at the undergraduate level, including study of the underlying science and development of human communication, and an introduction to disorders that may occur in human communication.
- Providing course work at the undergraduate level that will prepare students for:
- Graduate study in the areas of speech-language pathology or audiology;
- Graduate school in a related discipline; and
- A liberal education in the discipline of communication sciences and disorders.

Programs of Study

The department offers a B.A. and B.S. in communication sciences and disorders. The department also offers the M.S. in speech-language pathology (professional preparation), the M.S. in communication sciences and disorders (research), the Au.D. (Doctor of Audiology) and the Ph.D. in communication sciences and disorders with emphases in audiology, speech-language pathology and/or speech and hearing science. Inquiries concerning these graduate programs should be directed to the dean of The Graduate School or the appropriate department graduate coordinator. A master's degree is the minimum requirement for competency/certification endorsed by the American Speech-Language-Hearing Association and for Virginia licensure in speech-language pathology. In audiology, a doctoral degree is the minimum requirement for competency/certification endorsed by the American Speech-Language-Hearing Association and for new Virginia licensure applicants.

Speech, Language, and Hearing Clinic

The JMU audiology clinic and the JMU Speech-Language clinic provide the following services for communicatively impaired individuals of the university community and its service area. Appointments for services may be made by any member of the community.

Areas of Service Delivery

- Speech-language and/or hearing assessments
- Intervention programs in speech, language and hearing disorders
- Preventative and educational consultation
- Referrals for other professional services when indicated

Career Opportunities

With relevant graduate degrees:

- Audiologist in medical centers, medical practice, private practice
- Clinical supervisor
- Hearing scientist
- Researcher, university professor
- Speech-language pathologist in the public schools, rehabilitation centers, medical environment, private practice
- Speech scientist

Co-curricular Organizations

- National Student Speech-Language-Hearing Association
- Student Academy of Audiology

Communication Sciences and Disorders, B.A.

Degree Requirements

Required Courses

- General Education *41 Credit Hours*^{1,2}
- Foreign Language classes (intermediate level required) *0-14 Credit Hours*³
- Philosophy course(s) (in addition to General Education courses) *3 Credit Hours*
- University electives *28-34 Credit Hours*
- Major requirements (listed below) *48 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ Biological science, statistics, physics and/or chemistry courses are required. They may be taken as part of the General Education courses or as non-departmental required courses.

² The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

³ The foreign language requirement may be satisfied by successful completion of the second semester of the intermediate level of the student's chosen language (typically 232) or by placing out of that language through the Department of Foreign Languages, Literatures and Cultures' placement test.

Major Requirements

Required Courses

- CSD 200. Introduction to Communication Disorders *3.00*
- CSD 207. Phonetics *3.00*
- CSD 208. Anatomy and Physiology of the Ear and Voice Mechanism *3.00*
- CSD 209. Acoustics of Hearing and Speech *3.00*
- CSD 300. Language Development *3.00*

- CSD 301. Audiology *3.00*
- CSD 314. Phonological and Language Disorders *3.00*
- CSD 318. Aural Rehabilitation *3.00*
- CSD 412. Professional Issues and Multicultural Considerations in Communication Disorders *3.00*

- CSD 415. Neuroanatomy and Neurogenic Communication Disorders *3.00*
or
- BIO 415. Neuroanatomy and Neurogenic Communication Disorders *3.00*

- CSD 416. Organic Disorders in Communication Sciences and Disorders *3.00*
- PSYC 101. General Psychology [C5SD] *3.00*
- PSYC 160. Life Span Human Development [C5SD] *3.00*
- EXED 200. Foundations of Exceptional Education *3.00*
- MATH 220. Elementary Statistics [C3QR] *3.00*

Choose one of the following:

- CSD 470. Methods and Observation *3.00*
- CSD 471. Methods and Observation in Audiology *3.00*

Total: 48 Credit Hours

Recommended Schedule for Majors

First Year

- CSD 200. Introduction to Communication Disorders *3.00*
- PSYC 101. General Psychology [C5SD] *3.00*
- Biological sciences course *3-4 Credit Hours*¹
- General Education courses *18 Credit Hours*

Total: 27-30 Credit Hours

Second Year

- CSD 207. Phonetics *3.00*
- CSD 208. Anatomy and Physiology of the Ear and Voice Mechanism *3.00*
- CSD 209. Acoustics of Hearing and Speech *3.00*
- PSYC 160. Life Span Human Development [C5SD] *3.00*

Mission

We are a community engaged in teaching, researching and practicing communication as central to cultivating ethical, productive and meaningful lives and relationships.

Goals

As the school offers courses and programs in communication studies, the school seeks to fulfill the following goals:

- To prepare all JMU students who take a communication studies course to use oral communication skills effectively.
- To prepare students with a major or minor in communication studies for graduate and professional study as well as for careers in communication and communication-related professions.
- To provide co-curricular opportunities which enhance and reinforce communication competencies for all JMU students.

Career Opportunities and Marketable Skills

Students of communication studies develop skill competencies required for effective interaction and leadership in communities, workplaces and groups. Some of these skills include:

- Speaking
- Interacting in small groups

- Using nonverbal communication skills such as use of space, voice, gaze and facial expressions
- Constructing persuasive messages and campaigns
- Using computers for word processing, statistical analysis, desktop publishing, graphic design, web page construction and browsing the Internet
- Analyzing communication at all levels including interpersonal, small group and organizational
- Persuading successfully
- Using language effectively
- Writing effectively
- Mediating and resolving conflicts
- Listening and problem solving

Such careers are part of the following fields:

- Consulting
- Entertainment
- Hospitality Industry
- Management
- Personnel
- Politics
- Sales
- Teaching

Study in communication studies also serves as valuable pre-professional preparation for graduate and professional studies in the following fields:

- Communication
- Counseling
- Law
- Management
- Ministry

Students who study communication studies acquire skills that enable them to interact with others effectively. These skills include:

- Speaking in front of groups
- Interacting effectively in small groups
- Using nonverbal communication skills such as use of space, voice, eyes and facial expressions
- Constructing persuasive messages and campaigns
- Using computers for word processing, statistical analysis, desktop publishing, graphic design, web page construction and browsing the Internet
- Analyzing communication problems at the organizational level
- Persuading successfully
- Using language effectively
- Writing effectively
- Mediating and resolving conflicts

Co-curricular Activities and Organizations

To enhance courses and programs in communication studies, the school offers a variety of co-curricular activities and organizations open to all JMU students. Co-curricular activities involve practical communication experiences for which credit is available, either through the various practicums or one of the school's applied courses. Co-curricular organizations are student clubs and honorary societies associated with the school's individual programs of study.

Activities

- Annual Communication Studies Conference: Annual program highlighting undergraduate scholarship in which students deliver professional presentations to the JMU community on a variety of topics that reflect the diverse research methodologies and areas of study in the School of Communication Studies.
- Debate Team: Affords students interested in debating intercollegiate tournament competition and local audience experiences.
- Individual Events Team: Intercollegiate tournament competition and local audience experiences for students interested in public speaking and the oral interpretation of literature can be acquired through individual events team participation.

Organizations

- Delta Sigma Rho-Tau Kappa Alpha: A chapter of a national honorary organization for students competing in intercollegiate debate and individual events.
- Lambda Pi Eta: A chapter of a national honorary organization for students interested in communication.
- Destination Imagination: Students interested in effective conflict resolution and mediation skills can participate in the activities.
- Public Relations Student Society Association: An award-winning student organization for students pursuing careers in public relations.
- Health Communication Institute: Students interested in effective communication with health communication professionals can work with the institute in a practicum or directed project.

Admission to the Major

Admission to JMU does not guarantee admission to the School of Communication Studies. All students interested in majoring in the program must apply for a limited number of spaces while first completing SCOM 240 and SCOM 241. In order to register for these classes, students must change their major to "SCOM declared" to register for SCOM 240 and SCOM 241.

The School of Communication Studies reviews applications for admission to the major each semester. Students must submit their applications (which can be accessed from the SCOM website and submitted by email) in the semester in which they are completing the SCOM 240 and SCOM 241 requirements. Applications are due by November 15 (fall semester) and April 15 (spring semester). Students who have applied by the above deadlines will be notified of the department's admission decision at the end of the semester in which they complete the SCOM 240 and SCOM 241 requirements.

Admission to the major is based on availability to the most qualified students as determined by performance in SCOM 240 and SCOM 241. It is possible for a student to be accepted into the major but not into their first choice concentration.

Students who are not admitted may file one more additional application in the next regular semester. Students reapplying must apply in two consecutive semesters of enrollment at the university. If a student reapplies after retaking SCOM 240 and SCOM 241 (whether repeat or repeat/forgive), the school will look only at their highest grades earned when evaluating their second application.

Successful completion of a major in the School of Communication Studies requires, at the very least, a minimum of four semesters after a student is fully admitted to the school. Depending upon the student's particular circumstances and degree progress, more than four semesters may be required for completing the major. Once admitted to the School of Communication Studies, a student cannot retroactively apply more than nine hours of SCOM courses, including SCOM 240 and SCOM 241, to his/her major (SCOM 121/SCOM 122/SCOM 123 does not count towards those nine hours).

Policy for Students Transferring from Another Institution

Students applying from other institutions are held to the same policies and guidelines as other applicants. However, once admitted to the School of Communication Studies, transfer students may petition for SCOM credit for courses taken at previous institutions. As with other applicants, they cannot retroactively apply more than nine hours of SCOM courses taken at JMU, including SCOM 240 and SCOM 241, to their major or minor once admitted to the School of Communication Studies.

Minimum Grades

Any course taken to fulfill a degree requirement in communication studies must be completed with a minimum grade of "C-". A communication studies course completed with a grade of "D" may be credited toward graduation but may not be included as course work toward a communication studies major or minor. Additionally, courses completed with a grade less than "C-" will not count as fulfilling prerequisites for future courses, and enrolled students may be administratively removed from courses for which they have not completed a required prerequisite with a grade of "C-" or higher.

Limitations in Applied Courses

No more than six hours combined credit in SCOM 318. Practicum in Communication Studies, SCOM 390. Directed Projects and SCOM 495. Internship in Communication Studies may be counted toward a major in communication studies unless approved by the academic unit head.

Double Counting

Students with a communication studies major are allowed to count toward the major a maximum of six hours of credit earned to satisfy requirements in another major or minor.

Degree and Major Requirements

The School of Communication Studies offers the Bachelor of Science and Bachelor of Arts degrees with a major in communication studies. Students must take at least 39 hours of work in communication studies beyond the General Education requirement.

All programs must include at least five elements:

- Twelve hours of required courses.
- Successful completion of the milestone, Core Assessment in Communication Studies, upon completion of the core requirements
- Fifteen hours of courses within distribution areas to meet the school depth requirement.
- Nine hours of free elective courses in communication studies at the 300 or 400 level and three hours at the 200, 300 or 400 level.
- Twelve hours of course work at the 300 level or above outside of the major program of study; or a second major or minor.

Communication Studies Minor

Minor Requirements

Communication Studies Minor

A minor in communication studies requires 18 hours of course work in communication studies beyond the General Education requirement, including SCOM 240, SCOM 241 and a minimum of nine hours at the 300 level and three hours at the 400 level. Before a student begins a minor in communication studies, the school director and the student's adviser must approve his/her planned program of study.

Admission to the Minor

Admission to JMU does not guarantee admission to a minor in the School of Communication Studies. All students interested in minoring in the program must apply for a limited number of spaces while first completing SCOM 240 and SCOM 241. In order to register for these classes, students must first declare the SCOM minor online. The School of Communication Studies reviews applications for admission to the minor each semester. Students must submit their applications (which can be accessed from the SCOM website and submitted by email) in the semester in which they are completing the SCOM 240 and 241 requirements. Applications are due by November 15 (fall semester) and April 15 (spring semester). Students who have applied will be notified of the department's admission decision at the end of the semester in which they complete the SCOM 240 and SCOM 241 requirements.

Admission to an SCOM minor is based on availability to the most qualified students as determined by performance in SCOM 240 and SCOM 241.

Students who are not admitted may file one more additional application in the next regular semester. Students reapplying must apply in two consecutive semesters of enrollment at the university. If a student reapplies after retaking SCOM 240 and SCOM 241 (whether repeat or repeat/forgive), the school will look only at their highest grades earned when evaluating their second application.

Successful completion of any minor in the School of Communication Studies requires, at the very least, a minimum of two semesters after a student is fully admitted to the School. Depending upon the student's particular circumstances and degree progress, more than two semesters may be required for completing the minor. Once admitted to the School of Communication Studies, a student cannot retroactively apply more than nine hours of SCOM courses, including SCOM 240 and SCOM 241, to his/her minor. Also, once admitted to an SCOM minor, a student cannot automatically transfer into the SCOM major without reapplying in a subsequent semester, and there is no guarantee of acceptance.

Communication Studies, Advocacy Studies Concentration, B.A.

Degree and Major Requirements

The School of Communication Studies offers the Bachelor of Science and Bachelor of Arts degrees with a major in communication studies. Students must take at least 39 hours of work in communication studies beyond the General Education requirement.

All programs must include at least five elements:

- Twelve hours of required courses.
- Successful completion of the milestone, Core Assessment in Communication Studies, upon completion of the core requirements
- Fifteen hours of courses within distribution areas to meet the school depth requirement.

- Nine hours of free elective courses in communication studies at the 300 or 400 level and three hours at the 200, 300 or 400 level.
- Twelve hours of course work at the 300 level or above outside of the major program of study; or a second major or minor.

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Quantitative requirement *3 Credit Hours*²
- Scientific Literacy requirement *3-4 Credit Hours*²
- University electives *21-46 Credit Hours*³
- Major requirements (listed below) *39 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² In addition to course work taken to fulfill General Education requirement.

³ A minimum of 12 credit hours of university electives must be at the 300 level or above, or students must earn a second major or minor.

Additional Information

In addition, students pursuing a B.S. in communication studies must complete MATH 220. Elementary Statistics [C3QR] or a school-approved statistics course. School-approved statistics courses include, but are not limited to, COB 191. Business Analytics I. MATH 220 can count as either a General Education or a B.S. quantitative requirement, but not both.

Major Requirements

Core Requirements

- SCOM 240. Introduction to Communication Theory *2.00*
- SCOM 241. Communication Theory Lab *1.00*
- SCOM 242. Presentational Speaking *3.00*
- SCOM 280. Introduction to Communication Research *3.00*¹
- SCOM 341. Persuasion *3.00*
- Completion of Core Assessment in Communication Studies Milestone *0 Credit Hours*
- Additional communication studies elective at the 200, 300 or 400 level *3 Credit Hours*
- Additional communication studies electives at the 300-400 levels *9 Credit Hours*

Footnote

¹ This course fulfills the College of Arts and Letters writing-intensive requirement for the major.

Depth Requirement: (15 hours required from the depth areas below)

Communication Skills (choose one): 3 Credit Hours

- SCOM 247. Small Group Communication 3.00
- SCOM 261. Public Relations Techniques I: Written 3.00

- SCOM 301. Feminist Blogging: Writing for Shout Out! JMU 3.00
or
- WGSS 301. Feminist Blogging: Writing for Shout Out! JMU 3.00

- SCOM 332. Mediation 3.00
- SCOM 333. Negotiations 3.00
- SCOM 335. Communication Consulting 3.00
- SCOM 340. Principles and Processes of Interviewing 3.00
- SCOM 342. Argument and Advocacy 3.00
- SCOM 344. Oral Interpretation 3.00
- SCOM 358. Business and Professional Communication Studies 3.00
- SCOM 361. Public Relations Techniques II: Visual 3.00
- SCOM 367. Advanced Public Relations Writing 3.00
- SCOM 447. Facilitating Public and Organizational Engagement Processes 3.00
- SCOM 449. Communication Training 3.00

Communication Research (choose one): 3 Credit Hours

- SCOM 381. Rhetorical Research Methods 3.00
- SCOM 383. Quantitative Experimental Research Methods 3.00
- SCOM 385. Qualitative Research Methods 3.00
- SCOM 386. Survey Research Methods 3.00
- SCOM 388. Campaign Research Methods 3.00

Communication Theory and Context (choose three): 9 Credit Hours

At least one theory and context course requirement must be at the 400-level.

- SCOM 248. Intercultural Communication 3.00
- SCOM 260. Introduction to Public Relations 3.00

- SCOM 301. Feminist Blogging: Writing for Shout Out! JMU 3.00
or
- WGSS 301. Feminist Blogging: Writing for Shout Out! JMU 3.00

Advocacy Studies Concentration

This concentration prepares students to understand, critically evaluate and engage the communication theories, processes, media institutions and communication technologies that citizens, political leaders, government officials, public administrators, interest groups and community service organizations use to campaign, deliberate, adjudicate, govern and advocate for social change. Skilled advocates adopt, develop and implement diverse sets of communication strategies that help clients articulate interests and goals, determine social systems and audiences most likely to achieve goals, identify effective media and appropriate goal oriented messages, and develop plans for implementing change.

In addition to the 12 hours of required communication studies courses, students studying advocacy must complete the following 18 hours from among the depth requirements. The school also recommends that students enroll in an internship during their junior or senior year.

Communication Studies, Advocacy Studies Concentration, B.S.

Degree and Major Requirements

The School of Communication Studies offers the Bachelor of Science and Bachelor of Arts degrees with a major in communication studies. Students must take at least 39 hours of work in communication studies beyond the General Education requirement.

All programs must include at least five elements:

- Twelve hours of required courses.
- Successful completion of the milestone, Core Assessment in Communication Studies, upon completion of the core requirements
- Fifteen hours of courses within distribution areas to meet the school depth requirement.

- Nine hours of free elective courses in communication studies at the 300 or 400 level and three hours at the 200, 300 or 400 level.
- Twelve hours of course work at the 300 level or above outside of the major program of study; or a second major or minor.

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Quantitative requirement *3 Credit Hours*²
- Scientific Literacy requirement *3-4 Credit Hours*²
- University electives *21-46 Credit Hours*³
- Major requirements (listed below) *39 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² In addition to course work taken to fulfill General Education requirement.

³ A minimum of 12 credit hours of university electives must be at the 300 level or above, or students must earn a second major or minor.

Additional Information

In addition, students pursuing a B.S. in communication studies must complete MATH 220. Elementary Statistics [C3QR] or a school-approved statistics course. School-approved statistics courses include, but are not limited to, COB 191. Business Analytics I. MATH 220 can count as either a General Education or a B.S. quantitative requirement, but not both.

Major Requirements

Core Requirements

- SCOM 240. Introduction to Communication Theory *2.00*
- SCOM 241. Communication Theory Lab *1.00*
- SCOM 242. Presentational Speaking *3.00*
- SCOM 280. Introduction to Communication Research *3.00*¹
- SCOM 341. Persuasion *3.00*
- Completion of Core Assessment in Communication Studies Milestone *0 Credit Hours*
- Additional communication studies elective at the 200, 300 or 400 level *3 Credit Hours*
- Additional communication studies electives at the 300-400 levels *9 Credit Hours*

Footnote

¹ This course fulfills the College of Arts and Letters writing-intensive requirement for the major.

Depth Requirement: (15 hours required from the depth areas below)

Communication Skills (choose one): 3 Credit Hours

Total: 39 Credit Hours

Communication Studies, Cultural Communication Concentration, B.A.

Degree and Major Requirements

The School of Communication Studies offers the Bachelor of Science and Bachelor of Arts degrees with a major in communication studies. Students must take at least 39 hours of work in communication studies beyond the General Education requirement.

All programs must include at least five elements:

- Twelve hours of required courses.
- Successful completion of the milestone, Core Assessment in Communication Studies, upon completion of the core requirements
- Fifteen hours of courses within distribution areas to meet the school depth requirement.

- Nine hours of free elective courses in communication studies at the 300 or 400 level and three hours at the 200, 300 or 400 level.
- Twelve hours of course work at the 300 level or above outside of the major program of study; or a second major or minor.

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Quantitative requirement *3 Credit Hours*²
- Scientific Literacy requirement *3-4 Credit Hours*²
- University electives *21-46 Credit Hours*³
- Major requirements (listed below) *39 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² In addition to course work taken to fulfill General Education requirement.

³ A minimum of 12 credit hours of university electives must be at the 300 level or above, or students must earn a second major or minor.

Additional Information

In addition, students pursuing a B.S. in communication studies must complete MATH 220. Elementary Statistics [C3QR] or a school-approved statistics course. School-approved statistics courses include, but are not limited to, COB 191. Business Analytics I. MATH 220 can count as either a General Education or a B.S. quantitative requirement, but not both.

Major Requirements

Core Requirements

- SCOM 240. Introduction to Communication Theory *2.00*
- SCOM 241. Communication Theory Lab *1.00*
- SCOM 242. Presentational Speaking *3.00*
- SCOM 280. Introduction to Communication Research *3.00*¹
- SCOM 341. Persuasion *3.00*
- Completion of Core Assessment in Communication Studies Milestone *0 Credit Hours*
- Additional communication studies elective at the 200, 300 or 400 level *3 Credit Hours*
- Additional communication studies electives at the 300-400 levels *9 Credit Hours*

Footnote

¹ This course fulfills the College of Arts and Letters writing-intensive requirement for the major.

Depth Requirement: (15 hours required from the depth areas below)

Communication Skills (choose one): 3 Credit Hours

- SCOM 247. Small Group Communication 3.00

Communication Studies, Generalist Concentration, B.S.

Degree and Major Requirements

The School of Communication Studies offers the Bachelor of Science and Bachelor of Arts degrees with a major in communication studies. Students must take at least 39 hours of work in communication studies beyond the General Education requirement.

All programs must include at least five elements:

- Twelve hours of required courses.
- Successful completion of the milestone, Core Assessment in Communication Studies, upon completion of the core requirements
- Fifteen hours of courses within distribution areas to meet the school depth requirement.
- Nine hours of free elective courses in communication studies at the 300 or 400 level and three hours at the 200, 300 or 400 level.
- Twelve hours of course work at the 300 level or above outside of the major program of study; or a second major or minor.

Degree Requirements

Required Courses

- General Education 41 *Credit Hours*¹
- Quantitative requirement 3 *Credit Hours*²
- Scientific Literacy requirement 3-4 *Credit Hours*²
- University electives 21-46 *Credit Hours*³
- Major requirements (listed below) 39 *Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² In addition to course work taken to fulfill General Education requirement.

³ A minimum of 12 credit hours of university electives must be at the 300 level or above, or students must earn a second major or minor.

Additional Information

In addition, students pursuing a B.S. in communication studies must complete MATH 220. Elementary Statistics [C3QR] or a school-approved statistics course. School-approved statistics courses include, but are not limited to, COB 191. Business Analytics I. MATH 220 can count as either a General Education or a B.S. quantitative requirement, but not both.

Major Requirements

Core Requirements

- SCOM 240. Introduction to Communication Theory *2.00*
- SCOM 241. Communication Theory Lab *1.00*
- SCOM 242. Presentational Speaking *3.00*
- SCOM 280. Introduction to Communication Research *3.00*¹
- SCOM 341. Persuasion *3.00*
- Completion of Core Assessment in Communication Studies Milestone *0 Credit Hours*
- Additional communication studies elective at the 200, 300 or 400 level *3 Credit Hours*
- Additional communication studies electives at the 300-400 levels *9 Credit Hours*

Footnote

¹ This course fulfills the College of Arts and Letters writing-intensive requirement for the major.

Depth Requirement: (15 hours required from the depth areas below)

Communication Skills (choose one): 3 Credit Hours

- SCOM 247. Small Group Communication *3.00*
- SCOM 261. Public Relations Techniques I: Written *3.00*

Health Communication Studies Concentration Courses

This concentration prepares students for careers in a variety of areas including: patient advocacy, patient experience coaching, health educator, wellness coordinator, health policy advocacy and health-related writing. Students will gain strong writing and research skills, project management expertise, leadership, team building and gain knowledge in the areas of: doctor-patient

communication, interpersonal health communication, health campaigns, culture and health, public health and current topics in health communication.

In addition to the 12 hours of required communication studies courses, students studying health communication must complete the following hours from among the depth requirements. Students are encouraged to enroll in an internship during their junior or senior years.

- SCOM 370. Introduction to Health Communication 3.00
- SCOM 468. Patient-Provider Communication 3.00
- SCOM 470. Health Communication Campaigns 3.00
- SCOM 471. Culture and Health Communication 3.00

Advanced Methods

Choose two of the following: 6 Credit Hours

- SCOM 303. Special Topics in Health Communication 3.00

Total: 18 Credit Hours

Footnote

¹ We strongly suggest that the internship option, if selected, be in the area of health communication.

Health Communication Studies Concentration Courses

This concentration prepares students for careers in a variety of areas including: patient advocacy, patient experience coaching, health educator, wellness coordinator, health policy advocacy and health-related writing. Students will gain strong writing and research skills, project management expertise, leadership, team building and gain knowledge in the areas of: doctor-patient communication, interpersonal health communication, health campaigns, culture and health, public health and current topics in health communication.

In addition to the 12 hours of required communication studies courses, students studying health communication must complete the following hours from among the depth requirements. Students are encouraged to enroll in an internship during their junior or senior years.

- SCOM 370. Introduction to Health Communication 3.00
- SCOM 468. Patient-Provider Communication 3.00
- SCOM 470. Health Communication Campaigns 3.00
- SCOM 471. Culture and Health Communication 3.00

Advanced Methods

Choose two of the following: 6 Credit Hours

- SCOM 303. Special Topics in Health Communication 3.00

Total: 18 Credit Hours

Footnote

¹ We strongly suggest that the internship option, if selected, be in the area of health communication.

Communication Studies, Interpersonal Communication Studies Concentration, B.A.

Degree and Major Requirements

The School of Communication Studies offers the Bachelor of Science and Bachelor of Arts degrees with a major in communication studies. Students must take at least 39 hours of work in communication studies beyond the General Education requirement.

All programs must include at least five elements:

- Twelve hours of required courses.
- Successful completion of the milestone, Core Assessment in Communication Studies, upon completion of the core requirements
- Fifteen hours of courses within distribution areas to meet the school depth requirement.
- Nine hours of free elective courses in communication studies at the 300 or 400 level and three hours at the 200, 300 or 400 level.
- Twelve hours of course work at the 300 level or above outside of the major program of study; or a second major or minor.

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Quantitative requirement *3 Credit Hours*²
- Scientific Literacy requirement *3-4 Credit Hours*²
- University electives *21-46 Credit Hours*³
- Major requirements (listed below) *39 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² In addition to course work taken to fulfill General Education requirement.

³ A minimum of 12 credit hours of university electives must be at the 300 level or above, or students must earn a second major or minor.

Additional Information

In addition, students pursuing a B.S. in communication studies must complete MATH 220. Elementary Statistics [C3QR] or a school-approved statistics course. School-approved statistics courses include, but are not limited to, COB 191. Business Analytics I. MATH 220 can count as either a General Education or a B.S. quantitative requirement, but not both.

Major Requirements

Core Requirements

- SCOM 240. Introduction to Communication Theory *2.00*
- SCOM 241. Communication Theory Lab *1.00*
- SCOM 242. Presentational Speaking *3.00*

Communication Studies, Organizational Communication Studies Concentration, B.S.

Degree and Major Requirements

The School of Communication Studies offers the Bachelor of Science and Bachelor of Arts degrees with a major in communication studies. Students must take at least 39 hours of work in communication studies beyond the General Education requirement.

All programs must include at least five elements:

- Twelve hours of required courses.
- Successful completion of the milestone, Core Assessment in Communication Studies, upon completion of the core requirements
- Fifteen hours of courses within distribution areas to meet the school depth requirement.
- Nine hours of free elective courses in communication studies at the 300 or 400 level and three hours at the 200, 300 or 400 level.

- Twelve hours of course work at the 300 level or above outside of the major program of study; or a second major or minor.

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Quantitative requirement *3 Credit Hours*²
- Scientific Literacy requirement *3-4 Credit Hours*²
- University electives *21-46 Credit Hours*³
- Major requirements (listed below) *39 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² In addition to course work taken to fulfill General Education requirement.

³ A minimum of 12 credit hours of university electives must be at the 300 level or above, or students must earn a second major or minor.

Additional Information

In addition, students pursuing a B.S. in communication studies must complete MATH 220. Elementary Statistics [C3QR] or a school-approved statistics course. School-approved statistics courses include, but are not limited to, COB 191. Business Analytics I. MATH 220 can count as either a General Education or a B.S. quantitative requirement, but not both.

Major Requirements

Core Requirements

- SCOM 240. Introduction to Communication Theory *2.00*
- SCOM 241. Communication Theory Lab *1.00*
- SCOM 242. Presentational Speaking *3.00*
- SCOM 280. Introduction to Communication Research *3.00*¹
- SCOM 341. Persuasion *3.00*
- Completion of Core Assessment in Communication Studies Milestone *0 Credit Hours*
- Additional communication studies elective at the 200, 300 or 400 level *3 Credit Hours*
- Additional communication studies electives at the 300-400 levels *9 Credit Hours*

Footnote

¹ This course fulfills the College of Arts and Letters writing-intensive requirement for the major.

Depth Requirement: (15 hours required from the depth areas below)

Communication Skills (choose one): 3 Credit Hours

- SCOM 247. Small Group Communication 3.00

- SCOM 369. Topics in Engaged Public Relations 3.00
- SCOM 460. Public Relations Management 3.00

Total: 21 Credit Hours

Cultural Communication Minor

Minor Requirements

Admission to the Minor

Admission to JMU does not guarantee admission to a minor in the School of Communication Studies. All students interested in minoring in the program must apply for a limited number of spaces while first completing SCOM 240 and SCOM 241. In order to register for these classes, students must first submit their application for an SCOM minor. Applications can be accessed on the SCOM website and must be submitted by email. The School of Communication Studies reviews applications for admission to the minor each semester. Students who have applied will be notified of the department's admission decision at the end of the semester in which they complete the SCOM 240 and SCOM 241 requirements. Admission to an SCOM minor is based on availability to the most qualified students as determined by performance in SCOM 240 and SCOM 241.

Students who are not admitted may file one more additional application in the next regular semester. Students reapplying must apply in two consecutive semesters of enrollment at the university. If a student reapplies after retaking SCOM 240 and SCOM 241 (whether repeat or repeat/forgive), the school will look only at their highest grades earned when evaluating their second application.

Successful completion of any minor in the School of Communication Studies requires, at the very least, a minimum of two semesters after a student is fully admitted to the School. Depending upon the student's particular circumstances and degree progress, more than two semesters may be required for completing the minor. Once admitted to the School of Communication Studies, a student cannot retroactively apply more than nine hours of SCOM courses, including SCOM 240 and SCOM 241, to his/her minor. Also, once admitted to an SCOM minor, a student cannot automatically transfer into the SCOM major without reapplying in a subsequent semester, and there is no guarantee of acceptance.

Cultural Communication Minor

The minor in cultural communication is designed to provide students with principles and theories of communication processes that help explain dynamics of intercultural interactions in personal and professional contexts. The program is intended for students not majoring in communication studies who wish to augment their major area of study, develop skills of cultural competence and increase their awareness of diversity.

Admission to the Minor

Admission to JMU does not guarantee admission to a minor in the School of Communication Studies. All students interested in minoring in the program must apply for a limited number of spaces while first completing SCOM 240 and SCOM 241. In order to register for these classes, students must first submit their application for an SCOM minor. Applications can be accessed on the SCOM website and must be submitted by email. The School of Communication Studies reviews applications for admission to the minor each semester. Students who have applied will be notified of the department's admission decision at the end of the semester in which they complete the SCOM 240 and SCOM 241 requirements.

Admission to an SCOM minor is based on availability to the most qualified students as determined by performance in SCOM 240 and SCOM 241.

Students who are not admitted may file one more additional application in the next regular semester. Students reapplying must apply in two consecutive semesters of enrollment at the university. If a student reapplies after retaking SCOM 240 and SCOM 241 (whether repeat or repeat/forgive), the school will look only at their highest grades earned when evaluating their second application.

Successful completion of any minor in the School of Communication Studies requires, at the very least, a minimum of two semesters after a student is fully admitted to the School. Health Communication Minor

The minor in health communication is designed for students who are interested in working in health care or related fields and are completing coursework in areas such as nursing, health sciences, and for students who are in the pre-professional programs. The minor offers students flexibility in terms of area of focus for the minor, so that they can gain the most applicable knowledge for their future endeavors.

Minor Requirements

Admission to the Minor

Admission to JMU does not guarantee admission to a minor in the School of Communication Studies. All students interested in minoring in the program must apply for a limited number of spaces while first completing SCOM 240 and SCOM 241. Computer Information Systems and Business Analytics, Department of

Dr. Art Gowan, **Department Head**

Phone: (540) 568-8796

Email: gowanja@jmu.edu

Location: Zane Showker Hall, Room 234

Website: <http://www.jmu.edu/cob/cis>

Professors

M. Busing, T. Dillon, A. Gowan, D. Lending, I. Markham, M. Mitri, R. Pal, S. Palocsay, S. Stevens

Associate Professors

C. Guo, P. Wang

Assistant Professors

D. Babik, A. Connolly, J. Ezell, J. May, L. Mutchler, L. Novoa, E. Torabi, B. Vaziri, H. Yekta, Y. Zhong

Instructors

L. Atkins, C. Cole, L. Dutt, J. Jewett, S. Lough, L. Tchommo

Mission Statement

The Department of Computer Information Systems and Business Analytics is committed to:

- Educating students by creating an active, experiential learning environment that prepares them to apply knowledge of information systems, operations, business analytics and business for the betterment of organizations and society; and
- Serving the academic community and business communities through appropriate research and service.

Objectives

Computer information systems (CIS) is offered as a major through the Department of Computer Information Systems and Business Analytics. This program prepares business students for careers as information systems professionals. The program of study focuses on the development and management of information systems in a business environment. Students develop the technical skills and organizational insights required to analyze, design, implement and administer information systems. The CIS curriculum includes hands-on projects, laboratory exercises, case analysis and business simulations to build strong technical and analytical skills, effective oral and written communication skills, and the ability to work independently and in team-oriented environments. Students are offered the opportunity to gain practical experience through internships and co-op programs. The department faculty endorses the program educational objectives listed below.

The CIS B.B.A. program will produce graduates with the ability to:

- Exhibit leadership in a role as subject matter expert or consultant.
- Exhibit confidence in combining technical, business, and interpersonal skills to innovate and solve problems in a team environment.
- Effectively adapt and apply changing technology to business opportunities and challenges.
- Work effectively in the IS field to make a positive contribution to society.

Career Opportunities

Computer information systems professionals analyze business opportunities and problems, then design and build solutions using the power of information technologies. Students in the CIS program gain the business and technical skills that will prepare them to move quickly from technical to leadership roles within the organization.

- Consultant
- Business Analyst
- Business Intelligence Specialist
- Computer Forensics Specialist
- IT/IS Auditor
- IT/IS Consultant
- Risk Analyst
- Security Consultant
- Systems Analyst
- Telecommunications Analyst
- IT/IS Manager
- Application Development Manager
- Business Owner (IT/IS Industry)
- Chief Information Officer
- Chief Security Officer
- Data Warehousing Manager
- Information Systems Manager
- Program Manager
- Project Manager
- IT Operations Professional
- Database Administrator
- Information Technology Trainer
- Network and Systems Administrator

- Security Specialist
- Software Engineer
- Web Developer

Co-curricular Activities and Organizations

The JMU Chapter of the National Association for Information Systems (AIS) was started in 2014 and serves to advance knowledge and to promote excellence in the practice and study of information systems. Along with providing premier networking opportunities with top consulting firms, AIS provides student members the ability to engage in national student competitions, in-house tutoring activities, professional development workshops, and various fundraising and social events.

Accreditation

The B.B.A. in computer information systems is accredited by the Computing Accreditation Commission of ABET, <http://www.abet.org>.

Business Analytics Minor

Coordinator: Dr. Susan W. Palocsay

Business analytics is a technical approach to analyzing problems and making business-related decisions. It uses statistical methods, management science techniques, and mathematical modeling to forecast the implications of various choices and identify the best alternatives. Business analytics focuses on the effective use of data and information to provide fact-based insights and drive positive business actions. The minor in business analytics prepares students to solve complex decision problems in a business environment with a combination of quantitative skills and hands-on expertise using current software applications.

Admission to the BSAN program is limited and competitive. Students seeking to add the BSAN minor must submit an application by October 1. Students will be admitted as a cohort each fall to start the BSAN program in the spring.

To be eligible to apply for admission, students must have completed the following:

- One introductory calculus course (MATH 205, MATH 231, MATH 235, ISAT 151 or equivalent)
- One statistics course (COB 191, MATH 220, MATH 285, MATH 318, ISAT 251 or equivalent)
- One economics course (ECON 200 or ECON 201)
- One business analytics course (COB 291) with a grade of "B-" or higher

In addition, a student must be able to take the 300-level BSAN courses on a schedule of one per semester in a three-consecutive semester period.

A complete application to the minor includes the following:

- A completed BSAN minor application form
- A letter of recommendation from COB 291 instructor

Students may use transfer and/or college credits that have been accepted by JMU to meet competency requirements. Admission is based on an average of a student's highest grades in one course from each competency area and the letter of recommendation.

Only grades earned at JMU and verified by the registrar will be used; transfer transcripts will also be reviewed. More emphasis will be placed on grades than on the recommendation letter. Following review by the BSAN Admission Committee, students will be notified about their acceptance into the minor. If accepted, students will be eligible to register for BSAN courses.

Required Courses

Choose one of the following: 3-4 Credit Hours

- COB 191. Business Analytics I *3.00*
- ISAT 251. Topics in Applied Statistics in ISAT [C3QR] *3.00*
- MATH 220. Elementary Statistics [C3QR] *3.00*
- MATH 285. Data Analysis *4.00*
- MATH 318. Introduction to Probability and Statistics *4.00*

Other Required Courses

- COB 291. Business Analytics II *3.00*¹
- BSAN 390. Statistical Modeling for Business Analytics *3.00*
- BSAN 391. Decision Modeling for Business Analytics *3.00*

- BSAN 393. Data Mining for Business Analytics *3.00*
or
- CIS 393. Data Mining for Business Analytics *3.00*

Elective - Choose one of the following: 3 Credit Hours

- CIS 463. Business Intelligence *3.00*
- ISAT 344. Intelligent Systems *3.00*
- ECON 385. Econometrics *3.00*
- FIN 475. Financial Modeling and Risk Analysis *3.00*
- MATH 322. Applied Linear Regression *3.00*
- MKTG 482. Marketing Analytics *3.00*

Total: 18-19 Credit Hours

Footnote

¹ COB 191 and MATH 205 or equivalent are prerequisites for COB 291. A grade of "B-" or higher in COB 291 and junior or senior standing are prerequisites for taking the subsequent required courses (BSAN 390, BSAN 391, and BSAN 393/CIS 393) in the business analytics minor.

Computer Information Systems Minor

Computer Information Systems Minor Requirements

Coordinator: Dr. Michel Mitri

The minor in computer information systems is primarily structured to provide students in various disciplines on campus with the opportunity to study business-oriented information systems.

Admission to the CIS minor is based on a student's performance in one course from each of the following seven competency areas:

- One introductory information-systems course (COB 204 or equivalent as determined by the department head)
- One introductory computer programming course (CIS 221, ISAT 252, CS 139 , CS 149 , CS 159 , IA 241 or equivalent as determined by the department head)
- One calculus course (MATH 205, MATH 231, MATH 235, ISAT 151 or equivalent as determined by the department head)
- One statistics course (COB 191, MATH 220 or equivalent as determined by the department head)
- One critical thinking course (student's Cluster One critical thinking course or equivalent as determined by the department head)
- One writing course (WRTC 103 or equivalent as determined by the department head)
- One quantitatively oriented economics/business course (ECON 200, ECON 201, COB 241, COB 242, COB 291 or equivalent as determined by the department head)

Admission is based on weighted average of student's highest grades in one course from each of the seven competency areas and is subject to space availability of CIS courses. Students seeking to add the CIS minor may submit an application to the CIS & BSAN department when they have completed, or are currently completing, all seven classes on the application.

Required Courses

- COB 204. Computer Information Systems *3.00*
- CIS 221. Principles of Programming *3.00*
- CIS 304. Enterprise Architecture *3.00*
- CIS 330. Database Design and Application *3.00*
- CIS 454. Systems Analysis and Design *3.00*
- CIS elective *3 Credit Hours*

Total: 18 Credit Hours

Footnote

CS 139 or CS 149 or ISAT 252 or IA 241 with a grade of "C" or better or enrollment in CS 159 may be substituted for CIS 221.

Computer Information Systems, Business Analytics Concentration, B.B.A.

Degree and Major Requirements

The B.B.A. in computer information systems requires a minimum of 120 credit hours of undergraduate work. Sixty credit hours will be taken outside the College of Business. In counting the 60 credit hours of non-business courses, B.B.A. students may include all hours taken in General Education (usually 41), up to a total of nine hours in economics and three hours of COB 191. Business Analytics I. The remaining hours will be taken from any department outside the College of Business. Students should carefully select these courses to help them gain additional knowledge and expertise for their careers and personal lives.

Degree Requirements

Required Courses

- B.B.A. core courses *39 Credit Hours*¹
- CIS major requirements *27-28 Credit Hours*
- **General Education** courses *41 Credit Hours*²
- Electives *12 Credit Hours*³

Total: 120 Credit Hours

Footnotes

¹ Assumes that **MATH 205** and **ECON 200** are taken as **General Education** courses.

² The **General Education** program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

³ Credit hours may vary. See adviser for details.

Major Requirements

Students planning to major in Computer Information System (CIS) must complete the 27-28 hours of lower-division B.B.A. core curriculum prior to enrolling in upper-division core courses normally taken in the first semester of their junior year. It is expected that the lower-division core curriculum will be completed during the first two years of study along with most of the university general education curriculum. Failing to complete all the lower-division core requirements on time will delay enrollment in upper-division core and major courses.

Required Core Courses

- CIS 221. Principles of Programming *3.00*¹
- CIS 304. Enterprise Architecture *3.00*
- CIS 330. Database Design and Application *3.00*
- CIS 331. Intermediate Computer Programming *3.00*
- CIS 454. Systems Analysis and Design *3.00*

Total: 15 Credit Hours

Required Concentration

Computer Information System majors must choose one of the following options to complete the required courses in the CIS major:

Option 1: **Information Systems** Concentration, complete five CIS core courses and five courses required for the concentration.

Option 2: **Business Analytics** Concentration, complete the five CIS core courses and four courses required in the concentration. *(Admission to the BSAN program is limited and competitive. CIS majors interested in pursuing the BSAN concentration will have to submit an application for admission by October 1 in the pool with students applying for the BSAN minor. One cohort of BSAN students will be admitted each fall to start the BSAN courses in the spring).*

Footnote

¹ CS 149 or ISAT 252 or IA 241 with a grade of "C" or better or enrollment in CS 159 may be substituted for CIS 221.

B.B.A. Core Component

B.B.A. Lower-Level Core Component

B.B.A. majors must complete all of the B.B.A. core components as part of their degree program. The following courses comprise the B.B.A. Lower-Level Core Component:

- COB 191. Business Analytics I 3.00 ¹
- COB 202. Interpersonal Skills 3.00
- COB 204. Computer Information Systems 3.00
- COB 241. Financial Accounting 3.00
- COB 242. Managerial Accounting 3.00 ^{4,5}
- COB 291. Business Analytics II 3.00 ²
- ECON 200. Introduction to Macroeconomics [C4GE] 3.00
- ECON 201. Introduction to Microeconomics 3.00

- MATH 205. Introductory Calculus I [C3QR] 3.00 ³
or
- MATH 235. Calculus I [C3QR] 4.00 ³

B.B.A. Upper-Level Core Component

The following courses comprise the B.B.A. Upper-Level Core Component:

- COB 300A. Integrative Business: Management 3.00 ^{5,6}
- COB 300B. Integrative Business: Finance 3.00 ^{5,6}
- COB 300C. Integrative Business: Operations 3.00 ^{5,6}
- COB 300D. Integrative Business: Marketing 3.00 ^{5,6}
- COB 318. Legal and Ethical Environment of Business 3.00 ⁷
- COB 487. Strategic Management 3.00 ⁸

Footnotes

¹ MATH 220 may be substituted for COB 191.

² COB 191 or equivalent and MATH 205 or equivalent are prerequisites for COB 291.

³ Calculus is required but not used in calculating the B.B.A. core GPA. MATH 235 is preferred for Finance majors.

⁴ COB 241 must be taken before COB 242.

⁵ COB 242 is a prerequisite for COB 300 but is not used in calculating the B.B.A. core GPA.

⁶ All four COB 300 courses must be taken during the same semester.

⁷ COB 300 is a prerequisite or corequisite for COB 318. COB 318 is a prerequisite for COB 487.

⁸ COB 487 must be taken during the senior year.

Business Analytics Concentration

Business analytics is a technical approach to analyzing problems and making business-related decisions. It uses statistical methods, management science techniques, machine learning and mathematical modeling to forecast the implications of various choices and identify the best alternatives. Business analytics focuses on the effective use of data and information to provide fact-based insights and drive positive business actions. Combined with the ability to analyze, design and implement information system, including applications and databases, the computer information systems major with a concentration in business analytics prepares students for careers in consulting, business analysis and data analysis.

Required Courses

- BSAN 390. Statistical Modeling for Business Analytics 3.00
- BSAN 391. Decision Modeling for Business Analytics 3.00

- BSAN 393. Data Mining for Business Analytics 3.00
or
- CIS 393. Data Mining for Business Analytics 3.00

- CIS 463. Business Intelligence 3.00

Total: 12 Credit Hours

Admission Requirements

To be eligible to apply for admission to the Business Analytics concentration of the Computer Information Systems major, students must have completed the following:

- One introductory calculus course (MATH 205, MATH 231, MATH 235, ISAT 151 or equivalent)
- One statistics course (COB 191, MATH 220, MATH 285, MATH 318, ISAT 251 or equivalent)
- One economics course (ECON 200 or ECON 201)
- One business analytics course (COB 291) with a grade of "B-" or higher

In addition, a student must be able to take the 300-level BSAN courses on a schedule of one per semester in a three-consecutive semester period.

A complete application to the Business Analytics concentration includes the following:

- A completed BSAN concentration application form
- A letter of recommendation from COB 291 instructor

Students may use transfer and/or college credits that have been accepted by JMU to meet competency requirements. Admission is based on an average of a student's highest grades in one course from each competency area and the letter of recommendation.

Only grades earned at JMU and verified by the registrar will be used; transfer transcripts will also be reviewed. More emphasis will be placed on grades than on the recommendation letter. Following review by the BSAN Admission Committee, students will be notified about their acceptance into the concentration. If accepted, students will be eligible to register for BSAN courses.

Recommended Schedule for Majors

Computer information systems majors should follow the course schedule described here to complete the final two years of their program. It is possible to deviate from this program, but care must be taken to ensure that all course prerequisites are met.

First Two Years

Students normally take the lower-division B.B.A. core curriculum along with many of the General Education curriculum. All lower-division core requirements must be completed before enrolling in the upper-division core courses. It is recommended that CIS 221. Principles of Programming be completed in the second semester of the second year.

Third Year *

First Semester

Students who are able to complete B.B.A. core requirements early enough to take COB 300 in the second semester of the second year should take additional CIS courses in the first semester of the third year and subsequent semesters. Consult your adviser.

- COB 300A. Integrative Business: Management *3.00*
- COB 300B. Integrative Business: Finance *3.00*
- COB 300C. Integrative Business: Operations *3.00*
- COB 300D. Integrative Business: Marketing *3.00*
- CIS 304. Enterprise Architecture *3.00*

Second Semester

- BSAN 390. Statistical Modeling for Business Analytics *3.00*
- CIS 330. Database Design and Application *3.00*
- COB 318. Legal and Ethical Environment of Business *3.00*

Fourth Year *

First Semester

- BSAN 391. Decision Modeling for Business Analytics *3.00*
- CIS 331. Intermediate Computer Programming *3.00*
- CIS 361. Computer Information Systems Internship *0.00*
- CIS 454. Systems Analysis and Design *3.00*

Second Semester

Students majoring in CIS are highly encouraged to complete an internship in computer information systems for non-academic credit (CIS 361).

- BSAN 393. Data Mining for Business Analytics *3.00*
or
- CIS 393. Data Mining for Business Analytics *3.00*
- CIS 463. Business Intelligence *3.00*
- COB 487. Strategic Management *3.00*

Footnotes

* Consult your adviser regarding General Education or non-business elective courses required for graduation which are not listed here.

¹ COB 318 may be taken in other semesters, but it has to be taken before COB 487.

² COB 487 may be taken in the fall or spring of the senior year.

Computer Information Systems, Cooperative Education Concentration, B.B.A.

Concentration in Cooperative Education

Coordinator: Dr. Tom Dillon

The cooperative education concentration in CIS major offers highly qualified undergraduate majors the opportunity to participate in a six- to eight-month professional experience with well-recognized industry leaders in information technology and operations. Students will be awarded 12 hours of academic credit that will substitute for two required courses in the CIS curriculum and for six credits of special topics (CIS 498). Substitution for the two specific courses will be made based on the structure and context of the co-op experience and in cooperation with the co-op firm.

Students must demonstrate competency via examination in the two required courses selected in order to receive credit in those courses. Students who have at least a 3.0 GPA, are majors in CIS and have fulfilled all of their COB core requirements (COB 487, Strategic Management) are eligible to apply on a competitive basis through the CIS & BSAN department.

Students who want to participate in a co-op program must apply both to the CIS & BSAN department office and the participating firm at least three months in advance of the start of the co-op. Co-ops typically begin in January or May and last six to eight months. Course substitutions must be approved in conjunction with the co-op coordinator in the CIS & BSAN department and the co-op coordinator in the firm.

A program of study must be placed on file for each student who is accepted for a co-op prior to beginning the co-op experience. Students may participate in a co-op during their junior or senior years, but they are limited to one co-op. Students who want to participate in a co-op as postgraduates may do so as special students. These students will receive a certificate on successful completion of the co-op experience. *Prerequisite: CIS majors with junior standing and a minimum 3.0 grade point average.*

Computer Information Systems, Information Systems Concentration, B.B.A.

Degree and Major Requirements

The B.B.A. in computer information systems requires a minimum of 120 credit hours of undergraduate work. Sixty credit hours will be taken outside the College of Business. In counting the 60 credit hours of non-business courses, B.B.A. students may include all hours taken in General Education (usually 41), up to a total of nine hours in economics and three hours of COB 191, Business Analytics I. The remaining hours will be taken from any department outside the College of Business. Students should carefully select these courses to help them gain additional knowledge and expertise for their careers and personal lives.

Degree Requirements

Required Courses

- B.B.A. core courses *39 Credit Hours*¹
- CIS major requirements *27-28 Credit Hours*
- **General Education** courses *41 Credit Hours*²
- Electives *12 Credit Hours*³

Total: 120 Credit Hours

Footnotes

¹ Assumes that **MATH 205** and **ECON 200** are taken as **General Education** courses.

² The **General Education** program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

³ Credit hours may vary. See adviser for details.

Major Requirements

Students planning to major in Computer Information System (CIS) must complete the 27-28 hours of lower-division B.B.A. core curriculum prior to enrolling in upper-division core courses normally taken in the first semester of their junior year. It is expected that the lower-division core curriculum will be completed during the first two years of study along with most of the university general education curriculum. Failing to complete all the lower-division core requirements on time will delay enrollment in upper-division core and major courses.

Required Core Courses

- CIS 221. Principles of Programming *3.00*¹
- CIS 304. Enterprise Architecture *3.00*
- CIS 330. Database Design and Application *3.00*
- CIS 331. Intermediate Computer Programming *3.00*
- CIS 454. Systems Analysis and Design *3.00*

Total: 15 Credit Hours

Required Concentration

Computer Information System majors must choose one of the following options to complete the required courses in the CIS major:

Option 1: **Information Systems** Concentration, complete five CIS core courses and five courses required for the concentration.

Option 2: **Business Analytics** Concentration, complete the five CIS core courses and four courses required in the concentration. *(Admission to the BSAN program is limited and competitive. CIS majors interested in pursuing the BSAN concentration will have to submit an application for admission by October 1 in the pool with students applying for the BSAN minor. One cohort of BSAN students will be admitted each fall to start the BSAN courses in the spring).*

Footnote

¹ CS 149 or ISAT 252 or IA 241 with a grade of "C" or better or enrollment in CS 159 may be substituted for CIS 221.

B.B.A. Core Component

B.B.A. Lower-Level Core Component

B.B.A. majors must complete all of the B.B.A. core components as part of their degree program. The following courses comprise the B.B.A. Lower-Level Core Component:

- COB 191. Business Analytics I 3.00 ¹
- COB 202. Interpersonal Skills 3.00
- COB 204. Computer Information Systems 3.00
- COB 241. Financial Accounting 3.00
- COB 242. Managerial Accounting 3.00 ^{4,5}
- COB 291. Business Analytics II 3.00 ²
- ECON 200. Introduction to Macroeconomics [C4GE] 3.00
- ECON 201. Introduction to Microeconomics 3.00

- MATH 205. Introductory Calculus I [C3QR] 3.00 ³
or
- MATH 235. Calculus I [C3QR] 4.00 ³

B.B.A. Upper-Level Core Component

The following courses comprise the B.B.A. Upper-Level Core Component:

- COB 300A. Integrative Business: Management 3.00 ^{5,6}
- COB 300B. Integrative Business: Finance 3.00 ^{5,6}
- COB 300C. Integrative Business: Operations 3.00 ^{5,6}
- COB 300D. Integrative Business: Marketing 3.00 ^{5,6}
- COB 318. Legal and Ethical Environment of Business 3.00 ⁷
- COB 487. Strategic Management 3.00 ⁸

Footnotes

¹ MATH 220 may be substituted for COB 191.

² COB 191 or equivalent and MATH 205 or equivalent are prerequisites for COB 291.

³ Calculus is required but not used in calculating the B.B.A. core GPA. MATH 235 is preferred for Finance majors.

⁴ COB 241 must be taken before COB 242.

⁵ COB 242 is a prerequisite for COB 300 but is not used in calculating the B.B.A. core GPA.

⁶ All four COB 300 courses must be taken during the same semester.

⁷ COB 300 is a prerequisite or corequisite for COB 318. COB 318 is a prerequisite for COB 487.

⁸ COB 487 must be taken during the senior year.

Information Systems Concentration

The information systems concentration prepares students to analyze, design and implement information system, including applications, databases, networks and architectures. Elective courses allow students to acquire more detailed knowledge in

security, project management, web development and consulting. The computer information systems major with a concentration in information systems prepares students for careers in consulting, business analysis, data analysis and systems analysis.

Required Courses

- CIS 301. Cloud Server Management *1.00*
- CIS 320. Computing and Telecommunications Networks *3.00*
- CIS 484. Information Systems Development and Implementation *3.00*
- CIS Electives *6 Credit Hours*

Total: 13 Credit Hours

Electives

Students majoring in CIS are highly encouraged to complete an internship in computer information systems for non-academic credit (CIS 361).

- CIS 354. Advanced Visual Basic Programming *3.00*
- BSAN 393. Data Mining for Business Analytics *3.00*
or
- CIS 393. Data Mining for Business Analytics *3.00*
- CIS 366. Web Design and Development *3.00*
- CIS 420. Computer-Based Networking *3.00*
- CIS 424. Computer Security Management *3.00*
- CIS 425. Defensive Cybersecurity *3.00*
- CIS 428. Mobile Computing and Security *3.00*
- CIS 434. Information Technology Consulting *3.00*
- CIS 464. Information Systems Project Management *3.00*
- CIS 490. Special Studies in Computer Information Systems or Business Analytics *1.00 - 3.00*
- CIS 498. Special Topics in Computer Information Systems *3.00*

Recommended Schedule for Majors

Computer information systems majors should follow the course schedule described here to complete the final two years of their program. It is possible to deviate from this program, but care must be taken to ensure that all course prerequisites are met.

First Two Years

Students normally take the lower-division B.B.A. core curriculum along with many of the General Education curriculum. All lower-division core requirements must be completed before enrolling in the upper-division core courses. It is recommended that CIS 221. Principles of Programming be completed in the second semester of the second year.

Third Year *

First Semester

Students who are able to complete B.B.A. core requirements early enough to take COB 300 in the second semester of the second year should take additional CIS courses in the first semester of the third year and subsequent semesters. Consult your adviser.

- COB 300A. Integrative Business: Management 3.00
- COB 300B. Integrative Business: Finance 3.00
- COB 300C. Integrative Business: Operations 3.00
- COB 300D. Integrative Business: Marketing 3.00
- CIS 304. Enterprise Architecture 3.00

Second Semester

- CIS 301. Cloud Server Management 1.00
- CIS 320. Computing and Telecommunications Networks 3.00
- CIS 330. Database Design and Application 3.00
- COB 318. Legal and Ethical Environment of Business 3.00¹

Fourth Year *

First Semester

- CIS 331. Intermediate Computer Programming 3.00
- CIS 361. Computer Information Systems Internship 0.00
- CIS 454. Systems Analysis and Design 3.00
- One Computer Information Systems elective 3 Credit Hours

Second Semester

- CIS 484. Information Systems Development and Implementation 3.00
- COB 487. Strategic Management 3.00²
- One Computer Information Systems elective 3 Credit Hours

Footnotes

* Consult your adviser regarding General Education or elective courses required for graduation which are not listed here.

¹ COB 318 may be taken in other semesters, but it has to be taken before COB 487.

² COB 487 may be taken in the fall or spring of the senior year.

Computer Science, Department of

Dr. Sharon J. Simmons, **Department Head**

Phone: (540) 568-3335

Email: simmonsj@jmu.edu

Location: ISAT/CS Building, Room 222

Website: <http://www.jmu.edu/cs>

Professors

D. Bernstein, F. Buchholz, C. Fox, S. Frysinger, M. Heydari, R. Mata-Toledo, D. McGraw, S. Simmons, B. Tjaden, S. Wang

Associate Professors

M. Aboutabl, M. Kirkpatrick, M. Lam, C. Mayfield, M. Norton, N. Sprague, D. Weikle

Assistant Professors

J. Bowers, K. Molloy, M. Stewart

Mission

The computer science department strives to be an intellectual community that continually explores the broad field of computing, applies this knowledge to solve problems in a variety of domains and engages with the profession and society at large. Undergraduates join this community when they become majors, participating with faculty and other students in exploring computing through classes, projects, clubs and internships.

Goals

The goals of the computer science department are to:

- Offer small classes that provide opportunities for personal interaction with students.
- Provide a broad, inclusive and up-to-date computing curriculum.
- Provide students opportunities for professional and community engagement and real world experiences.
- Help students to become computing problem solvers and good communicators.
- Produce graduates who will succeed in the computing profession.

Career Opportunities and Marketable Skills

Computing technology pervades modern society and demand for computing professionals is strong and projected to remain strong for the foreseeable future. Careers in computing range from technical positions specifying, designing, building and maintaining networks and systems of all kinds, through project leadership and technical management. The computer science major prepares students for entry-level technical positions as programmers, software developers, requirements analysts, software designers, testers, software quality assurance professionals, system architects, network engineers, information security specialists and computing consultants.

Co-curricular Activities and Organizations

The James Madison University Student Chapter of the Association for Computing Machinery is the local student chapter of the national association for computing professionals.

The JMU chapter of Upsilon Pi Epsilon, the international honor society in computer science, recognizes outstanding academic achievement by students and outstanding contributions to education by faculty. The department also sponsors the Robotics, Cyber Defense, Digital Forensics and Women in Technology clubs.

Students are encouraged to intern in a business or government organization during the summer. Students may receive elective credit toward their major requirements for internship experiences.

Admission Requirements

Any student may declare a CS major or minor, but students may enroll in CS courses beyond CS 139 /CS 149, CS 159 and CS 227/CS 227 only if they are fully admitted to the CS major or minor. Full admission to the major or minor is granted as described below.

- Students who have attempted CS 139 /CS 149, CS 159 or CS 227/MATH 227 at JMU may not attempt them elsewhere (that is, they must make any second attempts at JMU).
- Students must submit an application for full admission to the CS major or minor no earlier than the semester in which they complete CS 159.
- Students with a GPA of 3.0 or better in CS 139 /CS 149 and CS 159 who have attempted these classes only once are guaranteed full admission to the major or minor. Others will be granted full admission to the CS major or minor as space permits based on their GPA in CS 139 /CS 149 and CS 159 and faculty evaluation of their potential to succeed in the CS major or minor.
- Students who have completed the CS minor may apply for full admission to the CS major no earlier than the semester in which they complete the last course in the CS minor.
- CS minors with a GPA of 3.0 or higher in the CS minor will be fully admitted to the CS major; others will be admitted as space permits based on their minor GPA.
- Students will be notified of their CS major or minor admission status by January 1st for admission in the spring semester (following application the previous fall semester), and by May 15th for admission in the fall semester (following application the previous spring semester).
- Students who are not granted full admission to the CS major or minor may file one additional application in the next regular semester after they are denied admission.

Transfer students who have completed the equivalent of CS 159 (or for whom this class is waived) are granted full admission to the CS major or minor. Other transfer students are subject to same process as non-transfer students.

Minor Requirements

- Robotics Minor
- Telecommunications Minor

Computer Science Minor

The Computer Science minor begins with a required two-course introductory sequence (CS 149 and CS 159) that is open to any student who meets the course prerequisites. CS 101 and CS/MATH 227 are optional courses that are also open to any student who meets the course prerequisites. Students wishing to continue in the CS minor beyond CS 159 must apply for full admission. The application procedure and requirements are available on the CS department site (<https://www.jmu.edu/cs>).

Computer Science Minor

Minor Adviser: Dr. Michael Kirkpatrick

Minor Requirements

Courses

- CS 149. Introduction to Programming 3.00

- CS 159. Advanced Programming *3.00*

Core course (choose one): 3 Credit Hours

- CS 240. Algorithms and Data Structures *3.00*
- CS 261. Computer Systems I *3.00*
- CS 345. Software Engineering *3.00*

Electives: 9 Credit Hours

Choose three computer science courses numbered CS 101 or above, excluding CS 280.

Additional core courses completed (CS 240, CS 261 and CS 345) beyond the one required can be counted for this requirement.

Total: 18 Credit Hours

Computer Science, B.S.

Degree and Major Requirements

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Quantitative requirement (in addition to General Education) *3 Credit Hours*
- Major requirements (listed below) *49-52 Credit Hours*
- University electives *24-27 Credit Hours*

Total: 120 Credit Hours

Footnote

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

Major Requirements

Major Requirements

- CS 149. Introduction to Programming *3.00*
- CS 159. Advanced Programming *3.00*
- CS 240. Algorithms and Data Structures *3.00*
- CS 261. Computer Systems I *3.00*
- CS 327. Discrete Structures II *3.00*

- CS 345. Software Engineering 3.00
- CS 361. Computer Systems II 3.00
- CS 430. Programming Languages 3.00
- Computer Science electives above CS 300, with at least two above CS 345: 9 Credit Hours

Choose one introductory discrete math course: 3 Credit Hours

- CS 227. Discrete Structures I 3.00
or
- MATH 227. Discrete Structures I 3.00

Choose one calculus sequence: 4-6 Credit Hours

- MATH 235. Calculus I [C3QR] 4.00
or
- MATH 231. Calculus with Functions I [C3QR] 3.00 and
- MATH 232. Calculus with Functions II 3.00

Choose one statistics course: 3-4 Credit Hours

- MATH 220. Elementary Statistics [C3QR] 3.00
- MATH 318. Introduction to Probability and Statistics 4.00
- MATH 229. Introduction to Applied Statistics Using R [C3QR] 3.00

Choose one algorithms course: 3 Credit Hours

- CS 412. Applied Algorithms 3.00
- CS 452. Design and Analysis of Algorithms 3.00

Choose one systems elective: 3 Credit Hours

- CS 432. Compilers 3.00
- CS 450. Operating Systems 3.00
- CS 456. Computer Architecture 3.00
- CS 470. Parallel and Distributed Systems 3.00

Total: 49-52 Credit Hours

Additional Information

The credit/no-credit option may not be applied to any courses specifically listed above, nor may that option be applied to computer science electives

Progressing in the Major

Students may enroll in each of CS 149, CS 159, CS 240 and CS 261 at most twice. Most CS courses require a grade of "C-" or better ("B-" or better in CS 149) in prerequisite courses. Students must achieve a cumulative grade point average of 2.0 or better in all courses used to satisfy CS major degree requirements.

Certificates

Periodically, the department may offer a collection of two or more advanced courses in a particular area of study.

Students successfully completing those courses will obtain a certificate in that area of study. Examples of possible certificate programs include networking, software engineering and information security.

U.S. Government Requirements for Computer Scientists

The U.S. government standard for occupational category GS- 1550: Computer Science Series includes a requirement of 15 hours in statistics and mathematics including differential and integral calculus. This means that students considering a career as a computer scientist with the U.S. government (including DoD, NASA, etc.) must complete more math courses than the minimum requirement for a B.S. degree. Recommended calculus sequences for these students are MATH 235-MATH 236 or MATH 231-MATH 232-MATH 236. However, only the U.S. Office of Personnel Management can give final approval of individual qualifications.

Cross Disciplinary Minors

Students should be aware that most minors have prerequisites, meaning that certain courses must be completed before a student can enroll in other courses. Consult with the minor adviser for additional information and recommendations for scheduling.

African, African American and Diaspora Studies Minor

Dr. Mollie Godfrey, **Coordinator**

Phone: (540) 568-6103

Email: godfrema@jmu.edu

Dr. Besi Brilliant Muhonja, **Coordinator**

Phone: (540) 568-2500

Email: muhonjbx@jmu.edu

Website: <http://www.jmu.edu/africana>

The minor in African, African American and Diaspora Studies (AAAD) broadens students' world perspectives by enhancing their understanding of the peoples, identities and institutions of Africa and the African Diaspora. The AAAD program employs interdisciplinary approaches to analyze Africa and the African Diaspora in a global context. Courses taken to fulfill program requirements are drawn from several departments in the humanities, social sciences and sciences. Students in the program will examine the key disciplines, concepts, methods and topics in African, African American and Diaspora studies.

The AAAD minor is open to all JMU undergraduate students. Courses taken to complete the minor may also be used to satisfy the student's major, with the permission of the major adviser, as well as General Education requirements.

The AAAD minor requires:

- Successful completion of 19 credit hours according to the requirements listed below.
- No more than nine hours from a single discipline.

Required Courses: 4 Credit Hours

- AAAD 200. Introduction to African, African American and Diaspora Studies [C4GE] 3.00
- AAAD 489. African, African American and Diaspora Studies Senior Research Experience 1.00²

Choose five, one of which must be at the 400 level: 15 Credit Hours

- AAAD 300. Special Topics in African, African American and Diaspora Studies 3.00
- AAAD 400. Advanced Topics in African, African American and Diaspora Studies 3.00
- AAAD 401. Internship in African, African American and Diaspora Studies 1.00-6.00
- AAAD 488. African American Art 3.00
- ANTH 280. Peoples and Cultures of Sub-Saharan Africa 3.00 (C)
- ANTH 391. Study Abroad 1.00 - 6.00 (May be A, B, C, F)
- ANTH 395. Special Topics in Anthropology 3.00 (May be A, B, or C)¹
- ART 200. Art in General Culture [C2VPA] 3.00¹
- ARTH 210. African Art & Culture in the Humanities 3.00
- ARTH 312. African Art: Sub-Saharan 3.00
- ARTH 320. Travel Study in Art History 3.00¹
- ARTH 418. Modern and Contemporary African Art 3.00
- ARTH 419. Topics in African Art 3.00
- ARTH 424. Arts of Ancient Egypt 3.00
- ARTH 488. African American Art 3.00
- ARTH 489. Topics in Art History 3.00¹
- BIO 426. Topics in Biology 1.00 - 4.00¹
- BIO 427. Topics in Biology with Laboratory 1.00 - 4.00¹
- EDUC 310. Teaching in a Diverse Society 3.00
- EDUC 490. Special Topics in Education 1.00 - 4.00¹
- ELED 310. Diversity in Elementary Education with Service Learning 3.00
- ENG 239. Studies in World Literature [C2L] 3.00¹
- ENG 260. Survey of African-American Literature [C2L] 3.00
- ENG 302. Special Topics in Literature and Language 3.00¹
- ENG 332. Studies in Popular Genres 3.00¹
- ENG 358. Oral Literature 3.00¹
- ENG 359. Studies in African American Literature 3.00
- ENG 361. African-American Fiction 3.00
- ENG 362. African-American Poetry 3.00
- ENG 377. Introduction to African Literature 3.00
- ENG 385. Special Topics in Film Study 3.00¹
- ENG 405. Advanced Studies in Anglophone Literature 3.00^{1,2}
- ENG 408. Advanced Studies in African-American Literature 3.00
- ENG 410. Advanced Studies in Author 3.00¹
- ENG 412. Special Topic Seminar 3.00¹
- ENG 423. Advanced Studies in Gender and Sexuality in Literature 3.00¹
- ENG 432. Advanced Studies in African Literature 3.00

- ENGR 498. Advanced Topics in Engineering 1.00-3.00 ¹
- GEOG 335. Geography of Africa 3.00
- GEOG 339. Geography of the Caribbean 3.00
- GEOG 491. International Studies 1.00 - 3.00 ¹
- HIST 263. Africa 3.00
- HIST 307**. The Trans-Atlantic Slave Trade 3.00
- HIST 341. Selected Themes in World History 3.00
- HIST 355. African-American History to 1865 3.00
- HIST 356. African-American History Since 1865 3.00
- HIST 361**. Class and Ethnicity in Africa 3.00
- HIST 391. Travel Studies Seminar 3.00

- HIST 439. Selected Topics in American History 3.00 ¹
- HIST 470. Modern Africa 3.00
- HIST 489. Selected Topics in World History 3.00 ^{1,2}
- HRD 123. Developing Multicultural Competency for Effective Facilitation 3.00
- HUM 252. Global Cultures 3.00 (African Cultures in the Humanities)¹
- HUM 252. Global Cultures [C2HQC] 3.00 (African Experience)
- IB 298. Special Topics in International Business 3.00 ¹
- IDLS 391. Study Abroad 1.00 - 6.00 ¹
- ISAT 480. Topics in Integrated Science & Technology 1.00 - 4.00 ¹
- JUST 301. Advanced Level Special Topics in Justice Studies 3.00 ^{1,2}
- JUST 328. Race, Class and Justice 3.00
- MUS 200. Music in General Culture [C2VPA] 3.00 ¹
- MUS 356. History of Jazz in America 3.00
- POSC 326. Civil Rights 3.00
- POSC 353. African Politics 3.00
- POSC 361. Topics in International Relations 3.00 ¹
- POSC 371. Topics in Comparative Politics 3.00 ^{1,2}
- REL 330. Religions of Africa and the African Diaspora 3.00 ¹
- REL 336. African-American Religion 3.00
- SCOM 395. Study Abroad Seminar 3.00 - 6.00 ¹
- SMAD 498. Senior Seminar in Media Arts and Design 3.00 ^{1,2}
- SOCI 336. Race and Ethnicity 3.00
- SOCI 354. Social Inequality 3.00
- SOCI 391. Study Abroad 1.00 - 6.00 ¹
- UNST 390. Special Studies in University Studies 1.00 - 3.00
- UNST 490. Advanced Special Studies in University Studies 1.00 - 3.00 ¹
- WGSS 300. Special Topics in Women's, Gender and Sexuality Studies 3.00 ^{1,2}
- WGSS 495. Special Topics in Women's, Gender and Sexuality Studies 3.00 ^{1,2}
- WRTC 103. Rhetorical Reading and Writing [C1W] 3.00 ¹

Total: 19 Credit Hours

Footnotes

¹ Course topic and content must focus on the peoples of Africa and/or the African Diasporas as well as be approved by the program coordinator(s).

² Research must have an African and/or African Diaspora focus.

Additional Information

Other appropriate courses not listed above may be considered for the minor. Consult with program coordinators.

In addition to taking these courses, students are encouraged to participate in travel or study programs to Africa, the Caribbean and other relevant areas. Students who want to earn credit hours through participation in an accredited travel/study program are encouraged to do so with prior approval of the coordinators.

American Studies Minor

Dr. Laura Henigman, **Coordinator**

Phone: (540) 568-3752

Email: henigmlx@jmu.edu

Website: <http://www.jmu.edu/americanstudies/>

The minor in American studies fosters an understanding of the complexity of US, colonial North American and North American indigenous societies through employing a range of disciplinary approaches and topics. Students will enroll in the gateway course AMST 200. Introduction to American Studies [C2HQC], and then they will select from a list of courses drawn from a variety of disciplines including literature, history, the fine arts, philosophy and the social sciences.

The minor program in American studies is open to all undergraduate students at JMU. The requirement is the successful completion of 18 hours. Students must take five additional courses from the list below. No more than two courses may be from the same program. See the program coordinator for additional courses that may be substituted.

Core Requirements

- AMST 200. Introduction to American Studies [C2HQC] 3.00

Choose five: 15 Credit Hours

- ANTH 265. Peoples and Cultures of Latin America and the Caribbean 3.00 (C).
- ANTH 312. The Native Americans 3.00 (A)

- ARTH 380. American Art to 1870 3.00
or
- ARTH 482. American Art from 1870

- ARTH 484. Art of the Americas 3.00
- ENG 342. Early American Literature 3.00
- ENG 343. Antebellum American Literature 3.00
- ENG 344. Late Nineteenth Century American Literature 3.00
- ENG 352. The American Novel to 1914 3.00
- ENG 356. Modern American Novel 3.00
- ENG 357. Contemporary American Literature 3.00

- ENG 360. Introduction to Ethnic American Literature 3.00
- ENG 361. African-American Fiction 3.00
- ENG 362. African-American Poetry 3.00
- ENG 363. Native American Literature 3.00
- HIST 303. Early America 3.00
- HIST 304. Native Peoples of the United States 3.00
- HIST 307**. The Trans-Atlantic Slave Trade 3.00
- HIST 310. American Business History 3.00
- HIST 315. History of Sport 3.00
- HIST 320. Women in U.S. History 3.00
- HIST 322. The New South 3.00
- HIST 323. The Old South 3.00
- HIST 326. The Automobile in 20th Century America 3.00
- HIST 327. Technology in America 3.00
- HIST 330. U.S. Diplomatic History 3.00
- HIST 338. U.S. Urban History 3.00
- HIST 339. Selected Themes in U.S. History 3.00
- HIST 350. Virginia 3.00

- HIST 355. African-American History to 1865 3.00
or
- HIST 356. African-American History Since 1865 3.00

- HIST 362. Introduction to U.S. Religious History 3.00
or
- REL 362. Introduction to U.S. Religious History 3.00

- MUS 203. Music in America [C2VPA] 3.00
- MUS 356. History of Jazz in America 3.00
- PHIL 370. American Philosophy 3.00
- POSC 330. American Political Thought 3.00
- POSC 380. The U.S. Presidency 3.00
- POSC 382. The Role of Religion in American Politics 3.00
- POSC 384. Minority Group Politics 3.00
- POSC 385. The U.S. Congress 3.00
- REL 330. Religions of Africa and the African Diaspora 3.00
- REL 332. Born Again Religion 3.00
- REL 334. New Religious Movements 3.00
- REL 336. African-American Religion 3.00
- SCOM 346. Free Speech in America 3.00
- SMAD 372. Media History 3.00
- SOCI 318. Sociology of Immigration 3.00
- SOCI 336. Race and Ethnicity 3.00
- SOCI 341. Sociology of Education 3.00
- SOCI 357. Sociology of Disasters 3.00

- SOCI 368. Contemporary American Culture 3.00
or

- ANTH 368. Contemporary American Culture 3.00 (C)
- THEA 485. American Theatre 3.00

Total: 18 Credit Hours

Email: sethmj@jmu.edu

Website: <http://www.jmu.edu/asianstudies>

The purpose of this cross disciplinary program is to broaden the students' perspective by enhancing their understanding and appreciation of Asian culture and institutions. This program combines the offerings of several academic units, such as anthropology; art, design and art history; economics; English; geography; history; international business; foreign languages; political science; and religion and philosophy.

The minimum requirement for a minor in Asian studies is 18 credit hours. These 18 hours can include any of the following courses. Special topics courses not listed can be applied to the minor degree with approval of the program coordinator. A maximum of eight hours of Chinese, Japanese, Korean or Hindi language may be included to satisfy credit hour requirements of the minor.

Courses

- ANTH 197. Archaeology 3.00 (A,R)
- ANTH 295. People and Cultures of East Asia 3.00 (C)
- ARTH 430. Far Eastern Art 3.00
- CHIN 101. Elementary Chinese I 3.00 - 4.00
- CHIN 102. Elementary Chinese II 3.00 - 4.00
- CHIN 231. Intermediate Chinese I 3.00
- CHIN 232. Intermediate Chinese II 3.00
- CHIN 300. Chinese Grammar and Communication 3.00
- CHIN 397. Intensive Reading and Writing in Chinese I 3.00
- ECON 312. Comparative Economic Systems 3.00
- ENG 378. Studies in South Asian Literature 3.00
- GEOG 334. Geography of East and Southeast Asia 3.00
- GEOG 338. Geography of the Philippine Islands: Problems and Possibilities 3.00
- HUM 200. Great Works [C2L] 3.00 (Asia)
- HUM 252. Global Cultures [C2HQC] 3.00 (Cross-Cultural Perspectives – East Asian Humanities)
- HUM 252. Global Cultures [C2HQC] (Cross-Cultural Perspectives – Global South Asia)
- HUM 252. Global Cultures [C2HQC] (Cross Cultural Perspectives – Gandhi, Non-Violence and Global Transformation)
- HIST 274. Modern East Asia 3.00
- HIST 311**. China to 1600 3.00
- HIST 312**. Japan Since 1600 3.00
- HIST 371**. India 3.00
- HIST 377**. History of Korea 3.00
- HIST 378**. China in the Modern World 3.00

- HIST 379**. Family and Gender in East Asia 3.00
- IB 298. Special Topics in International Business 3.00 (Business Environment in China and Southeast Asia)
- IB 298. Special Topics in International Business 3.00 (Doing Business in China)
- JAPN 101. Elementary Japanese I 4.00
- JAPN 102. Elementary Japanese II 4.00
- JAPN 111. Intensive Japanese I 6.00
- JAPN 212. Intensive Japanese II 6.00
- JAPN 231. Intermediate Japanese I 3.00
- JAPN 232. Intermediate Japanese II 3.00
- JAPN 300. Japanese Grammar and Communication 3.00
- KOR 101. Elementary Korean I 3.00 - 4.00
- KOR 102. Elementary Korean II 3.00 - 4.00
- KOR 231. Intermediate Korean I 3.00
- KOR 232. Intermediate Korean II 3.00
- POSC 355. East Asian Politics 3.00
- REL 310. (Re)thinking Order and Chaos: An Introduction to Hinduism 3.00
- REL 314. Gandhi and the Other 9/11 3.00
- REL 410. Dharma/Adharma: Hindu Ethical Reasoning 3.00

Total: 18 Credit Hours

Biochemistry and Molecular Biology Minor

Dr. Jonathan Monroe, **Coordinator**

Phone: (540) 568-6649

Email: monroejd@jmu.edu

Dr. Gina MacDonald, **Coordinator**

Phone: (540) 568-6852

Email: macdongx@jmu.edu

Website: <http://www.jmu.edu/biology>

The biochemistry and molecular biology minor is open to students not majoring in biotechnology. The following are prerequisites for entry into the biochemistry and molecular biology minor program (some prerequisites are not shown; see the course descriptions).

Prerequisites

- BIO 140. Foundations of Biology I (3,3) [C3NS] 4.00
- CHEM 241. Organic Chemistry I 3.00
- CHEM 242. Organic Chemistry II 3.00

Choose from the following:

- CHEM 242L. Organic Chemistry Laboratory 2.00
- CHEM 287L. Integrated Inorganic/Organic Laboratory I 2.00 - CHEM 288L. Integrated Inorganic/Organic Laboratory II 2.00

Required Courses

- BIO 240. Genetics (3,3) 4.00
- BIO 480. Advanced Molecular Biology (2, 5) 4.00

- CHEM 361. Biochemistry I 3.00
or
- BIO 361. Biochemistry I (3, 0) 3.00

- CHEM 362. Biochemistry II 3.00
- CHEM 366L. Biochemistry Laboratory 2.00

Choose one of the following: 4-5 Credit Hours

- CHEM 331. Physical Chemistry I 3.00 including CHEM 336L
- CHEM 351. Analytical Chemistry 4.00

Total: 20-21 Credit Hours

Book Arts Minor

Ms. Dawn M. McCusker, **Coordinator**

Phone: (540) 568-6500

Email: mccuskdm@jmu.edu

Dr. Karin Tollefson-Hall, **Coordinator**

Phone: (540) 568-4304

Email: tollefkl@jmu.edu

Website: <http://www.jmu.edu/cds/regional-and-area-studies/index.shtml>

The minor in book arts is a cross disciplinary program designed to broaden students' understanding of the value and role of the art of the book in general culture while enhancing written and visual creativity, artistic production, and the ability to think independently. Students enrolled in any degree program may minor in book arts by completing a minimum of 21 credit hours. The student's minor program is subject to the approval of the School of Art, Design and Art History director.

A total of nine credit hours may be double counted between the minor and the major.

Requirements

Required Courses: 15 Credit Hours

- ART 102. Two-Dimensional Design (0,6) 3.00
- ART 104. Drawing I (0,6) 3.00
- ART 276. Introductory Book Arts: Materials and Structures 3.00
- ENG 415. Advanced Studies in Textuality and the History of the Book 3.00

Choose one of the following:

- ENG 391. Introduction to Creative Writing – Nonfiction 3.00
- ENG 392. Introduction to Creative Writing – Poetry 3.00
- ENG 393. Introduction to Creative Writing – Fiction 3.00

Choose two of the following: 6 Credit Hours

- ART 230. Introduction to Fiber Processes (0,9) 3.00
- ART 232. Introduction to Fiber Arts: Structures 3.00
- ART 234. Introduction to Fiber Arts: Surfaces 3.00
- ART 260. Introductory Photography: Black and White (0,9) 3.00

- ART 270. Printmaking: Screenprint (0,9) 3.00
or
- ART 272. Printmaking: Relief and Intaglio 3.00
or
- ART 274. Printmaking: Lithography (0,9) 3.00

- ART 280. Sculpture (0,9) 3.00
- ART 336. Pulp 3.00
- GRPH 101. Digital Media Design I (0, 9) 3.00
- ART 375. Letterpress 3.00
or
- GRPH 375. Letterpress 3.00

- ART 376. Intermediate Book Arts: Concept, Content, Form 3.00
or
- GRPH 376. Intermediate Book Arts: Concept, Content, Form 3.00

- ENG 496. Advanced Topics in Creative Writing 3.00

Total: 21 Credit Hours

British Communication and Media Minor

Prof. Dietrich Maune, **Coordinator**

Phone: (540) 568-3039

Email: maunedx@jmu.edu

Website: <http://www.jmu.edu/cds/regional-and-area-studies/index.shtml>

The cross disciplinary British communication and media minor enables students to expand their knowledge of communication and media in Great Britain, and to enhance their appreciation of the impact culture has on communication and media. Students must participate in the JMU semester or summer in London program to complete this minor.

The minor requires at least 18 credit hours, chosen from courses offered both at JMU and in London. Students may double-count a maximum of six credit hours toward both a major and this minor.

Courses

Required Courses: 6 Credit Hours

- SCOM 248. Intercultural Communication 3.00 ¹
- SCOM 360L. British Media and Society 3.00 ²
or
- SMAD 360L. British Media and Society 3.00 ²
or
- WRTC 360L. British Media and Society 3.00 ²
or
- HUM 251L. British Media and Society 3.00 ²

Footnotes

¹ Must be taken in Harrisonburg at JMU. Regularly offered in fall semesters.

² Must be taken in London.

Elective Courses: 12 Credit Hours

Select at Least four of the following courses:

- SCOM 347L. Communication, Diversity and Popular Culture 3.00 ²
- SMAD 301L. The Media Arts: Culture By Design 3.00 ²
or
- SCOM 351. Visual Rhetoric 3.00
or
- WRTC 351L. Visual Rhetoric 3.00 ²
or
- ARTH 389. Topics in Art History – The Media Arts: Culture by Design²
- ENG 463L. Film Adaptations 3.00 ²
or
- SMAD 463L. Film Adaptations 3.00 ²
or
- SCOM 395. Film Adaptations: British Literature and Film²
- SCOM 472L. Media and Politics 3.00 ²
or
- SMAD 472L. Media and Politics 3.00 ²
or
- THEA 449. London Theatre 3.00 ²
or
- ENG 412N. Special Topic Seminar 3.00 ²
or
- HUM 200L. Great Works - London [C2L] 3.00 ²
- WRTC 314. Writing in the Public Sphere 3.00 ²
or

- SCOM 321L. Writing in The Public Sphere ²
- IDLS 486. Internship & Field Experience *1.00 - 6.00* ²

Footnotes

² Must be taken in London.

Total: 18 Credit Hours

Additional Information

Appropriate independent studies, directed projects, and Semester in London Faculty Member in Residence courses may be counted as part of the minor with approval by the minor coordinator. Students studying in London during the summer will need to complete one additional course, approved by the minor coordinator, following the student's return to JMU.

Chronic Illness Minor

Dr. Christina Lam, **Coordinator**

Phone: (540) 568-7616

Email: russelck@jmu.edu

Website: <http://www.nursing.jmu.edu/chronicillness.html>

The cross disciplinary minor in chronic illness prepares students from any major to understand and respond to the impacts of chronic illness on the individual, family, health care system and society. Knowledge and strategies to address the prevention and the management of chronic illness across its trajectory will enhance the skills and abilities of students who plan to practice in any profession. The minor is open to all undergraduate students at JMU and requires a minimum of 18 credits with no more than six credits in the student's major counting toward the minor.

Deadlines for submission of the Application to Declare a Chronic Illness Minor are due to the Chronic Illness Minor Coordinator by:

- The last day of September for fall registration for the spring term.
- The last day of February for spring registration for the fall term.

Core Requirements

Students completing the nursing major must complete the core requirements prior to starting major courses

- NSG 390. Impact of Chronic Illness *3.00*
- NSG 391. Living Successfully with Chronic Illness *3.00*

Elective Requirements: 6-12 Credit Hours

(Select 12 credits. Students completing the nursing major should select six credits.)

- ANTH 360. Medical Anthropology *3.00 (C)*
- EXED 306. Lifespan Issues for Individuals with Disabilities *3.00*

- GERN 280. Social Gerontology 3.00
or
- SOCI 280. Social Gerontology 3.00

- GERN 305. Programs and Services for the Elderly 3.00
- HTH 255. Chronic Disease and Disabilities 3.00 ¹
- HTH 351. Health Behavior Change 3.00 ¹
- IPE 490. Special Topics in Health and Human Services 0.00 - 4.00 (when topic is appropriate)

- MSCI 390. The Combat Experience 3.00
- KIN 424. Exercise and Nutrition in Chronic Disease 3.00
or
- NUTR 455. Exercise and Nutrition in Chronic Disease 3.00

- NSG 301. History Taking/History Telling: Narratives of Chronic Illness and Disability 2.00
- PSYC 304. Death & Dying: Thanatology 3.00
- NSG 306. Combating Childhood Obesity 1.00
- NSG 308. Empowerment and Resilience 1.00
- NSG 310. Helping Persons in Pain 2.00
- NSG 314. Rural Health: an Interprofessional Approach 3.00
or
- IPE 314. Rural Health: an Interprofessional Approach 3.00
or
- SOWK 314. Rural Health: an Interprofessional Approach 3.00
- NSG 318. Nursing, Chronic Illness and Health in a Global Context 2.00
- NSG 319. Understanding Sexuality across the Health-Illness Continuum 2.00
- NSG 320. Innovative Diabetes Health Education 1.00
- NSG 322. Integrative Health Care 2.00
- NSG 326. Care and Consideration for Children with Special Needs 1.00
- NSG 328. Life, Death, and the In-Between 1.00
- NSG 329. Best Practices in Diabetes Care 2.00
- NSG 330. Medical Innovations 3.00
- NSG 360. HHS in Costa Rica: Interprofessional Perspective 2.00-4.00
- NSG 361. International Health Perspectives: Malta 4.00
- NSG 363. Health Care in Spain: A Cross Cultural Exploration of Illness and Wellness 4.00
- NSG 415. Ethical Decision-Making in Healthcare: an Interprofessional Approach 1.00
- NSG 490. Special Studies 1.00 - 6.00 (when topic is appropriate) (credits vary) see chronic illness minor web page
- NSG 490 Study Abroad Experiences (Australia, Kenya, Tanzania) (credits vary)
- SOWK 332. Community Mental Health Practice 3.00

Footnotes

¹ Health Sciences majors only

Total: 18 Credit Hours

Classical Studies Minor

Dr. Stephen Chappell, **Coordinator**

Phone: (540) 568-4708

Email: chappesx@jmu.edu

Website: <http://www.jmu.edu/classicalstudies/>

The minor in classical studies introduces students to the literature, culture, philosophy, history and languages of Greco-Roman civilization. The requirement is successful completion of 18 credits chosen from the following courses offered by participating academic units. Students who take Latin or Greek can apply up to 12 credit hours to the minor.

Required Courses

Choose one of the following: 3 Credit Hours

- HUM 250. Foundations of Western Culture [C2HQC] 3.00 (The Greek Experience)
- HUM 250. Foundations of Western Culture [C2HqC] (The Roman Experience)
- HUM 250. Foundations of Western Culture [C2HqC] (The Ancient Mediterranean)

Choose five of the following: 15 Credit Hours

- GRK 101. Elementary Greek I 3.00 - 4.00
- GRK 102. Elementary Greek II 3.00 - 4.00
- GRK 231. Intermediate Greek I 3.00
- GRK 232. Intermediate Greek II 3.00
- LAT 101. Elementary Latin I 3.00 - 4.00
- LAT 102. Elementary Latin II 3.00 - 4.00
- LAT 231. Intermediate Latin I 3.00
- LAT 232. Intermediate Latin II 3.00
- ARTH 205. Survey of World Art I: Prehistoric to Renaissance [C2VPA] 3.00
- ARTH 424. Arts of Ancient Egypt 3.00
- CLAS 100. Latin and Greek Roots of English Words 3.00
- CLAS 266. Greek and Roman Classics in Translation 3.00
- CLAS 338. Roman Religion 3.00
- CLAS 360. Topics in Greek and Roman Culture 3.00
- ENG 305. Mythology 3.00.
- HIST 101. World History to 1500 [C2HQC] 3.00
- HIST 369. Greek History, 3000 BC-AD 267 3.00
- HIST 370. Byzantine Empire 3.00
- HIST 391. Travel Studies Seminar 3.00
- HIST 467. The Roman Republic 3.00
- HIST 468. The Roman Empire 3.00
- HIST 489. Selected Topics in World History 3.00
- PHIL 340. Ancient Greek Philosophy 3.00

- PHIL 460. Topics in Classical Philosophy 3.00
- POSC 310. Political Theory: Ancient to Early Modern 3.00
- REL 240. Jesus and the Moral Life 3.00
- REL 360. History of Christian Thought 3.00
- REL 460. Topics in Ancient Jewish and Early Christian Literature 3.00

Total: 18 Credit Hours

Creative Writing Minor

Dr. Paul Bogard, **Coordinator**

Phone: 540-568-6860

Email: bogardpw@jmu.edu

Website: <http://www.jmu.edu/english/undergraduate/minors.shtml>

The cross disciplinary minor in creative writing is designed to encourage students to develop their writing talents across a number of literary forms and communication contexts.

Course offerings in poetry, fiction, creative nonfiction, scriptwriting, screen and playwriting give students the opportunity to shape the minor to suit a variety of artistic interests and professional objectives. With the choice of at least one course from a group involving advanced topics, narrative and poetic forms, media criticism and film analysis, students will gain informed perspectives on current issues affecting readers, viewers, writers and their creative works. These courses support the core workshop courses and are vital to competence in the field.

The minimum requirement for a minor in creative writing is 18 hours. Two courses may be double-counted between the minor and the major. Students electing this minor may acquire more information from the creative writing adviser of the Department of English, the School of Media Arts and Design or the School of Theatre and Dance.

Required Courses

Select four or five core courses from two or more departments: 12-15 Credit Hours

- ENG 391. Introduction to Creative Writing – Nonfiction 3.00
- ENG 392. Introduction to Creative Writing – Poetry 3.00
- ENG 393. Introduction to Creative Writing – Fiction 3.00
- ENG 493. Advanced Creative Nonfiction 3.00
- ENG 494. Advanced Poetry Writing 3.00
- ENG 495. Advanced Fiction Writing 3.00
- SMAD 250. Scriptwriting 3.00
- SMAD 251. Screenplay Writing 3.00
- SMAD 311. Feature Writing 3.00
- SMAD 340. Advanced Screenplay Writing 3.00
- SMAD 498. Senior Seminar in Media Arts and Design 3.00 (when topic is appropriate) ¹
- THEA 347. Playwriting 3.00
- THEA 441. Senior Seminar in Theatre 3.00 (when topic is appropriate) ¹
- THEA 447. Advanced Playwriting 3.00

Select one or two support courses from the following: 3-6 Credit Hours

- ENG 390. The Environmental Imagination 3.00
- ENG 483. Narrative Form 3.00
- ENG 484. Poetic Craft and Creativity 3.00
- ENG 496. Advanced Topics in Creative Writing 3.00
- SMAD 373. Media Analysis and Criticism 3.00
- SMAD 463. Film Adaptations 3.00
- THEA 481. Theory and Performance Studies 3.00

Total: 18 Credit Hours

¹ Students must check with the professor or creative writing coordinator to see if these courses are appropriate for this minor.

Criminal Justice Minor

Dr. Peggy S. Plass, **Coordinator**

Phone: (540) 568-7151

Email: plassms@jmu.edu

The cross disciplinary minor in criminal justice is designed for students who are preparing for careers in law enforcement, corrections, judicial administration or other areas related to the study or management of crime, either directly upon graduation or after further graduate training. The requirement for a minor in criminal justice is 21 credits. Students should allow a minimum of four semesters in which to complete the minor.

Required Courses

- CRJU 215. Introduction to Criminal Justice 3.00
- CRJU 225. Ethics in Criminal Justice 3.00

Choose at least one course from each of the following units:

Human Behavior: 3 Credit Hours

- SOCI 304. Social Deviance 3.00 ¹
- CRJU 325. Criminology 3.00

- PSYC 250. Introduction to Abnormal Psychology 3.00 (Non PSYC majors only)
or
- PSYC 335. Abnormal Psychology 3.00 (PSYC majors) ¹

- PSYC 316. Human Development and Crime 3.00
or
- JUST 316. Human Development and Crime 3.00 ¹

Law and Procedure: 3 Credit Hours

- CRJU 321. Criminalistics 3.00
- JUST 327. Criminal Law 3.00 ¹
- CRJU 328. Criminal Procedure 3.00
- CRJU 329. Criminal Investigation and Evidence 3.00

Institutions: 3 Credit Hours

- JUST 330. Corrections 3.00 ¹
- CRJU 335. Law Enforcement 3.00
- CRJU 337. Courts and the Judiciary
- CRJU 340. Administration of Justice 3.00

Choose two additional courses from those listed above or from the following: 6 Credit Hours

- CRJU 301. Advanced Level Special Topics in Criminal Justice 3.00
- CRJU 401. Internship in Criminal Justice 3.00

Total: 21 Credit Hours

Footnote

¹ Students majoring in this discipline may double count only one course as credit for the minor and that major.

Disability Studies Minor

Daisy Breneman, **Coordinator**

Phone: (540) 568-4247 **Email:** brenemdl@jmu.edu

Dr. Susan Ghiaciuc, **Coordinator**

Phone: (540) 568-1613 **Email:** ghiacisx@jmu.edu

The minor in disability studies engages students in an examination of the many ways disability is defined and constructed. Students will build knowledge of the political, rhetorical, social, educational, historical, legal and medical frameworks of disability through both classroom and experiential study in courses drawn from several disciplines. Students will examine the ways systems inhibit and promote full participation of people with disabilities, explore how communities define and reinforce norms, and understand disability as an inherent part of diversity and inclusivity.

The minor in disability studies is open to all undergraduate students at JMU. The introductory course DST 100 can be taken the same semester as core courses. More than one core course can be taken to count toward the overall credit requirement. No more than nine hours may be taken from a single discipline. No more than two courses may be double counted for a student's major/minor.

Required Courses (1 credit hour)

- DST 100. Introduction to Disability Studies

Choose one of the following core courses (3 credit hours)

- JUST 385. Disability and Justice 3.00
- KIN 429. Special Topics in Adapted Physical Education 3.00
- WRTC 430. Contemporary Rhetorical Theory and Practice 3.00 : Disability Rhetoric
- SCOM 343. Contemporary Rhetorical Theory and Practice 3.00 : Disability Rhetoric
- SOCI 335. Disability and Society 3.00
- SOCI 375. Medical Sociology 3.00

Choose five of the following elective courses (15 credit hours)

- ANTH 360. Medical Anthropology 3.00 (C)
- ANTH 395. Special Topics in Anthropology 3.00 (May be A,B, or C) : Sex and the Social: The Cultural Politics of Reproduction
- DANC 322. Equity, Inclusion and Access in Education and Performance 3.00
- THEA 322. Equity, Inclusion and Access in Education and Performance 3.00
- DANC 325. Dance in Community 3.00
- HIST 306*. A History of the Body in the West 3.00
- HIST 476. History of Disability in Postwar Europe, 1945-1991 3.00
- JUST 221. Social Justice Theories 3.00
- REL 371. Religion and Disability 3.00
- SCOM 370. Introduction to Health Communication 3.00
- SOCI 304. Social Deviance 3.00
- SOCI 385. Madness and Society: the Sociology of Mental Health and Illness 3.00
- SRM 242. Sociology and Psychology of Sport and Recreation 3.00
- SRM 436. Facilities and Event Management 3.00

Total: 19 Credit Hours

Entrepreneurship Minor

Chris Roeder, **Coordinator**

Phone: (540) 568-3143

Email: roedercc@jmu.edu

The entrepreneurship minor is designed to introduce students from any discipline to the knowledge, skills and mindset necessary for successful new venture creation. The minor is open to students in any major except management, which offers a track in innovation and entrepreneurship.

Students who successfully complete the entrepreneurship minor will develop the knowledge base and skills needed for new venture creation and management. They will be able to:

- Understand entrepreneurship as a possible career path, its role in economic growth and opportunity, and its associated social benefits.
- Recognize/identify entrepreneurial opportunities that fit the individual student. Includes self-analysis in the context of possible entrepreneurial activities and demonstration of the ability to identify and analyze the attractiveness of potential markets.
- Develop a business model and create a business plan. This includes completing a clear and concise written plan that serves as a blueprint for creation of the proposed venture.
- Apply relevant financial and business principles to assess the need for start-up capital, conduct break even analysis and identify cash flow needed for future growth.
- Identify and evaluate various sources of funding.
- Articulate an effective pitch to gain support from investors, suppliers, customers or potential employees.
- Interact and collaborate with various stakeholders to develop and evaluate ideas, and grow those ideas to fruition.

Admission

To be considered for admission into the entrepreneurship minor students will need to submit an application packet to the entrepreneurship minor coordinator in the Management Department. The application includes:

- A completed application form, which includes an unofficial transcript and responses to essay questions on the applicant's entrepreneurial experience and goals
- Proof of good academic standing

Students may request permission to count two three-credit electives from their major as their ENTP electives. These courses must be related to innovation and/or entrepreneurship, and they must be approved by the minor coordinator.

All electives must be approved by the adviser, and students should check with an adviser for the most updated list of suggested electives, as the list can change.

Required Courses

- MGT 310. Business Fundamentals for Entrepreneurs 3.00
or
- COB 300A. Integrative Business: Management 3.00
- MGT 320. Management of Innovation and Technology 3.00¹
- MGT 471. Entrepreneurship and Small Business Management 3.00
- MGT 472. New Venture Creation 3.00

Electives (choose two): (6 credit hours)

- ACTG 244. Accounting for Non-Business Majors 3.00
- ENGR 480. Advanced Projects in Engineering 1.00 - 4.00
- ENGR 498. Advanced Topics in Engineering 1.00-3.00 : Innovation²
- ENGR 498. Advanced Topics in Engineering: Realization²
- ENGR 498. Advanced Topics in Engineering: Innovation Exchange²
- ENGR 498. Advanced Topics in Engineering: Social Entrepreneurship²
- FIN 345. Finance Fundamentals for Non-Business Majors 3.00
- ISAT 480. Topics in Integrated Science & Technology 1.00 - 4.00
- MGT 340. International Management 3.00

- MGT 365. Fundamentals of Human Resource Management 3.00
- MKTG 380. Principles of Marketing 3.00
- WRTC 340. Writing as Leading 3.00

Total: 18 credit hours

Footnotes

¹ Engineering students may substitute ENGR 221 for MGT 320.

² All ENGR courses are contingent on availability.

Environmental Humanities Minor

Dr. Katey Castellano, **Coordinator**

Phone: (540) 568-3753

Website: <https://www.jmu.edu/environment/humanities.shtml>

This minor allows students to articulate broad historical and cultural views of the complex interactions among humans and the natural and material environment. Students will analyze and produce expressive, creative work that illustrates the complexity of human interaction with the environment.

Students select 18 hours as distributed below. No more than three courses can come from a single academic unit in the total hours selected. Students may double-count two courses in the minor with their major. At the discretion of the minor coordinator, science courses may be substituted into the minor.

Humanities and the Environment

Choose four courses, no more than two from the same discipline: 12 Credit Hours

- ARCD 330. Materials and Methods I 3.00
- ENG 221. Literature/Culture/Ideas [C2L] 3.00 (for minor credit when topic is "Environmental Literature")
- ENG 371. Literature and the Environment 3.00
- ENG 372. Ecocriticism and Environmental Ethics 3.00
- ENG 390. The Environmental Imagination 3.00
- ENVT 300. Topics in Environmental Humanities 3.00
- ENVT 301. Internship in Environmental Humanities 3.00
- ENVT 401. Studio or Independent Study in Environmental Humanities 3.00
- GEOG 325. Environmental Ethics 3.00
- HIST 270. Modern Middle East 3.00
- HIST 304. Native Peoples of the United States 3.00 ¹
- HIST 315. History of Sport 3.00
- HIST 427. U.S. Environmental History 3.00
- HIST 434. Recent America 3.00

- INDU 392. Topics in Industrial Design 3.00 (for minor credit when topic is "Design and Sustainability")
- REL 366. Religion, Animals and the Environment 3.00
or
- ENVT 366. Religion, Animals and the Environment 3.00
- SCOM 302. Third Wave Ecofeminism 3.00
or
- WGSS 302. Third Wave Ecofeminism 3.00
- SCOM 354. Environmental Communication and Advocacy 3.00
or
- WRTC 326. Environmental Communication and Advocacy 3.00
- WRTC 416. Rhetoric of Environmental Science and Technology 3.00
or
- SCOM 465. Rhetoric of Environmental Science and Technology 3.00
- Approved Special Topics Courses
- Approved Internship Programs
- Approved Study Abroad Programs

Humanities/Social Science Elective

Choose one: 3 Credit Hours

- ANTH 300. The Anthropology of Food 3.00 (C)
- ANTH 307. Climate, Culture and Change 3.00 (A)
- ANTH 430. Primate Conservation Biology 3.00 (B)
- ARTH 380. American Art to 1870 3.00 (for landscape, painting, nationalism)
- ENG 325. Romantic Literature 3.00
- ENG 363. Native American Literature 3.00
- ENG 496. Advanced Topics in Creative Writing 3.00 (Cavanagh's section)
- HIST 326. The Automobile in 20th Century America 3.00
- HIST 327. Technology in America 3.00
- HIST 405. Travel and Exploration 3.00
- HIST 443. Modern American Technology and Culture 3.00
- HIST 453**. Patterns of Global History 3.00
- HIST 469. A History of International Development in the Twentieth Century 3.00
- HUM 252. Global Cultures [C2HQC] 3.00 "Global South Asia" only
- HUMN 301. Introduction to Natural Disasters Response 3.00
- ISAT 421. Environmental Policy & Regulation 3.00
- PPA 484. Environmental Regulatory Policy and Politics 3.00
- SOCI 311. Sociology of the Environment 3.00
- SOCI 354. Social Inequality 3.00
- SOCI 358. Sociology of Consumption 3.00
- WRTC 342. Writing Place 3.00
- WRTC 358. Writing About Science and Technology 3.00

Science Elective

General Education courses may double-count for the minor.

Choose one: 3 Credit Hours

- ENVT 200. Environmental Systems Theory 3.00
- GEOG 322. Agricultural Systems 3.00
- GEOG 341. Wilderness Techniques 3.00
- GEOL 102. Environment: Earth [C3NS] 3.00
- GEOL 115. Earth Systems and Climate Change [C3NS] 3.00
- GEOL 211. Introduction to Oceanography [C3NS] 3.00
- HTH 352. Environmental Health 3.00
- ISAT 100. Environmental and Energy Sustainability [C3PP] 3.00
- ISAT 112. Environmental Issues in Science and Technology (2,3) [C3PP] 4.00
- NUTR 380. Global Nutrition 3.00

Total: 18 Credit Hours

¹ These four history courses are offered on a rotating basis. One will be offered each year. Each one contains substantial environmental material.

Environmental Information Systems Minor

Dr. Steven P. Frysinger, **Coordinator**

Phone: (540) 568-2710

Email: frysinsp@jmu.edu

Website: <http://www.jmu.edu/EnvironmentalInfoSys>

The cross disciplinary minor in environmental information systems is designed for undergraduates interested in using computer and information management technology to solve environmental problems and improve environmental stewardship. Some examples of environmental information systems are database systems to track and report hazardous materials in factories, decision support systems to facilitate risk analysis and management, GIS-based natural resource inventory systems and automated business management systems to support and document environmental compliance.

The environmental information systems minor requires a minimum of 25 credit hours². Core courses are intended to ensure knowledge of the foundation disciplines. Electives should be chosen in consideration of the student's particular interests within the general field of environmental information systems; the coordinator may approve other elective courses. Students are advised to check prerequisites of listed courses.

Required Courses

Core Courses: 16-17 Credit Hours

- CS 149. Introduction to Programming 3.00 ¹
- ISAT 340. Software Development 3.00 ¹

- ISAT 320. Fundamentals of Environmental Science & Technology I 4.00²
- ISAT 321. Fundamentals of Environmental Science & Technology II 3.00
- ISAT 426. Environmental Information Systems 3.00

Elective Courses: 8-9 Credit Hours

Students who have successfully completed ISAT 320 prior to fall 2016 will receive 3 credits for ISAT 320; if that is the case, the environmental information systems minor requires a minimum of 24 credit hours.

- CS 159. Advanced Programming 3.00¹
- CS 474. Database Design and Application 3.00¹
- GEOG 215. Introduction to Geographic Information Science and Cartography 3.00
- GEOG 366. Intermediate Geographic Information Science 3.00
- GEOG 385. Principles of Remote Sensing 3.00
- GEOG 466. GIS and Geographic Databases 3.00
- ISAT 341. Machine Learning and Data Science 3.00
- ISAT 420. Environmental Analysis and Modeling 3.00
- ISAT 447. Interaction Design 3.00

Total: 25 Credit Hours

Footnotes

¹ Or equivalent by permission of director.

² Students who have successfully completed ISAT 320 prior to fall 2016 will receive 3 credits for ISAT 320; if that is the case, the environmental information systems minor requires a minimum of 24 credit hours.

Note:

CS 149, ISAT 252 or CIS 221 substitute for CS 139 ; CIS 331 substitutes for CS 159; CS 474 substitutes for ISAT 340; CIS 330 substitutes for CS 474.

Environmental Management Minor

Dr. Steven P. Frysinger, **Coordinator**

Phone: (540) 568-2710

Email: frysinsp@jmu.edu

Website: <http://www.jmu.edu/environmentalmgt>

The cross disciplinary environmental management minor prepares students to apply the principles of environmental science and engineering to contemporary environmental problems in natural resource, industrial and public policy contexts. The minor is particularly suitable for students interested in professional careers in industrial environmental management, natural resources management, and environmental policy and planning.

The environmental management minor strives to develop graduates who can apply science and technology to a broad range of practical environmental problems in professional settings. Students are expected to be literate and competent in the sciences and mathematics underlying environmental problem solving.

The environmental management minor requires a total of 29 credits, including prerequisite courses. Prerequisite courses may be fulfilled as part of the student's major.

Prerequisite

- BIO 250. Quantitative Ecology and Evolution (3,3) 4.00

Three hours from one of the following:

- ISAT 251. Topics in Applied Statistics in ISAT [C3QR] 3.00
- MATH 220. Elementary Statistics [C3QR] 3.00
- MATH 285. Data Analysis 4.00
- MATH 307. Principles of Probability and Statistics 3.00

Required Courses

Students who have successfully completed ISAT 320 prior to fall 2016 will receive 3 credits for ISAT 320; if that is the case, the environmental management minor requires a total of 28 credits, including prerequisite courses.

- ISAT 320. Fundamentals of Environmental Science & Technology I 4.00
- ISAT 321. Fundamentals of Environmental Science & Technology II 3.00
- CHEM 241. Organic Chemistry I 3.00
- ENVT 400. Capstone Seminar in Environmental Problem Solving 3.00
- Concentration (See descriptions below) 9.00

Total: 22 Credit Hours

Concentrations

Students completing the environmental management minor must concentrate in one of three areas: natural resources, industrial systems or environmental policy. Students should be aware that some of the listed courses may have additional prerequisites.

Natural Resources

- ISAT 424. Natural Resource Management 3.00

Choose two of the following courses:

- BIO 402. Forest Ecology 4.00
- BIO 456. Landscape Ecology (3, 3) 4.00
- BIO 457. Biological Applications of Geographic Information Systems (2, 4) 4.00
- BIO 459. Freshwater Ecology (3, 3) 4.00
- BIO 465. Environmental Toxicology (2, 4) 4.00
- CHEM 354. Environmental Chemistry Field Camp 3.00

- CHEM 355. Geochemistry of Natural Waters 3.00

or

- GEOL 355. Geochemistry of Natural Waters 3.00
- GEOG 340. Biogeography 3.00
- GEOG 341. Wilderness Techniques 3.00
- GEOG 342. Management and Protection of Natural Resources 3.00
- GEOG 343. Wildlife Management 3.00
- GEOL 430. Environmental Soil Science (2, 2) 3.00
- ISAT 420. Environmental Analysis and Modeling 3.00
- ISAT 425. Environmental Hydrology 3.00
- ISAT 429. Sustainability: An Ecological Perspective 3.00

Industrial Systems

- ISAT 422. Industrial Environmental Management 3.00

Choose two of the following courses:

- HTH 352. Environmental Health 3.00
- HTH 450. Epidemiology 3.00
- ISAT 423. Environmental Remediation 3.00
- ISAT 427. Industrial Hygiene 3.00
- ISAT 428. Industrial Ecology 3.00

Environmental Policy

- ISAT 421. Environmental Policy & Regulation 3.00
 - ISAT 422. Industrial Environmental Management 3.00
- or
- ISAT 424. Natural Resource Management 3.00

Choose one of the following courses:

- BIO 465. Environmental Toxicology (2, 4) 4.00
 - ECON 305. Environmental Economics 3.00
 - ECON 340. Economics of Natural Resources 3.00
 - GEOG 325. Environmental Ethics 3.00
 - GEOG 429. Sustainability: An Ecological Perspective 3.00
- or
- ISAT 429. Sustainability: An Ecological Perspective 3.00
 - HIST 427. U.S. Environmental History 3.00
 - ISAT 411. Energy Economics and Policy 3.00
 - ISAT 420. Environmental Analysis and Modeling 3.00
 - ISAT 423. Environmental Remediation 3.00
 - ISAT 471. Transportation: Energy, Environment & Society 3.00

- PPA 484. Environmental Regulatory Policy and Politics *3.00*
- SCOM 354. Environmental Communication and Advocacy *3.00*
- SOCI 311. Sociology of the Environment *3.00*

Other courses may apply by permission of the coordinator.

Environmental Science Minor

Dr. Bruce A. Wiggins, **Coordinator**

Phone: (540) 568-6196

Email: wigginba@jmu.edu

Website: <http://www.jmu.edu/environment/science.shtml>

This minor is a cross disciplinary program that any student may elect. Students pursuing programs ranging from the physical, natural or social sciences to education, journalism or business could benefit from this broadly-based curriculum. The program draws from courses that focus on the application of scientific concepts and principles to the understanding of environmental problems and their solutions. The minor draws upon the expertise of faculty in the areas of biology, chemistry, geography, physics and integrated science and technology.

The environmental science minor:

- Provides a scientific background to those students interested in environmental law, environmental economics and environmental sustainability.
- Broadens the student's understanding of how sciences are linked to environmental questions.
- Complements any major by focusing on courses related to environmental issues.

The minimum requirement for a minor in environmental science is 24 credit hours taken from the four groups outlined below. Students wishing to complete more than one of the environmental minors (environmental management, environmental science and environmental studies) may receive dual credit for the capstone course (ENVT 400), but may not receive dual credit for any other courses that might be shared by the minors. Pre-approved study abroad and/or internship experiences may be substituted for one or more of the courses listed below.

No more than two courses from a single subject area can count toward the completion of the environmental science minor.

International studies and special topics courses with appropriate content may be counted (prior approval by the environmental science minor coordinator required).

Courses

Group 1. Introduction to Environmental Science: 3-4 Credit Hours

Can be double-counted with General Education.

- BIO 250. Quantitative Ecology and Evolution (3,3) *4.00*
- GEOG 210. Physical Geography (2, 2) *4.00*
- GEOL 102. Environment: Earth [C3NS] *3.00*
- GEOL 110. Physical Geology [C3NS] *3.00*
- GEOL 115. Earth Systems and Climate Change [C3NS] *3.00*
- ISAT 100. Environmental and Energy Sustainability [C3PP] *3.00*
- ISAT 112. Environmental Issues in Science and Technology (2,3) [C3PP] *4.00*

Group 2. Advanced Environmental Science courses: 15 Credit Hours

- BIO 387. Environmental Microbiology 3.00
- BIO 400. Geology and Ecology of the Bahamas 3.00
or
- GEOL 400. Geology and Ecology of the Bahamas 3.00

- BIO 402. Forest Ecology 4.00
or
- GEOG 402. Forest Ecology 4.00

- BIO 452. Population Ecology (2, 4) 4.00
- BIO 453. Microbial Ecology and Evolution (2, 4) 3.00
- BIO 454. Introduction to Biometrics (3, 1) 4.00
- BIO 456. Landscape Ecology (3, 3) 4.00
- BIO 457. Biological Applications of Geographic Information Systems (2, 4) 4.00
- BIO 459. Freshwater Ecology (3, 3) 4.00
- BIO 465. Environmental Toxicology (2, 4) 4.00
- BIO 466. Toxicology Seminar (3, 0) 3.00
- CHEM 353. Environmental Chemistry 3.00
- CHEM 354. Environmental Chemistry Field Camp 3.00
- CHEM 450. Nuclear and Radiation Chemistry 3.00
- ENGR 411. Fundamentals of Sustainable Engineering and Design 3.00
- ENGR 472. Biological Treatment Processes and Reactor Design 3.00
- ENGR 474. Physical Chemical Treatment Processes 3.00
- ENGR 478. Water Resources Engineering 3.00
- ENVT 200. Environmental Systems Theory 3.00
- GEOG 215. Introduction to Geographic Information Science and Cartography 3.00
- GEOG 216. Earth Observation and GPS 3.00
- GEOG 290. Human-Environment Interactions 3.00
- GEOG 310. Environmental Issues 1.00 - 4.00
- GEOG 340. Biogeography 3.00
- GEOG 365. Cartography and Geospatial Visualization 3.00
- GEOG 385. Principles of Remote Sensing 3.00
- GEOL 211. Introduction to Oceanography [C3NS] 3.00
- GEOL 310 A - D. Environmental Impact 2.00 - 3.00, *repeatable to 6 credits*
- GEOL 320. Meteorology 3.00
- GEOL 430. Environmental Soil Science (2, 2) 3.00

- GEOL 355. Geochemistry of Natural Waters 3.00
or
- CHEM 355. Geochemistry of Natural Waters 3.00

- GEOL 377. Earth Surface Processes (2, 2) 3.00
- GEOL 406. Paleoclimatology and Paleoceanography 3.00
- GEOL 410. Engineering Geology (2, 2) 3.00
- GEOL 460. Hydrogeology (2, 2) 3.00
- ISAT 311. Role of Energy in Modern Society 3.00

- ISAT 320. Fundamentals of Environmental Science & Technology I *4.00*
- ISAT 321. Fundamentals of Environmental Science & Technology II *3.00*
- ISAT 420. Environmental Analysis and Modeling *3.00*
- ISAT 423. Environmental Remediation *3.00*
- ISAT 425. Environmental Hydrology *3.00*
- ISAT 427. Industrial Hygiene *3.00*
- ISAT 428. Industrial Ecology *3.00*
- MATH 321. Analysis of Variance and Experimental Design *3.00*
- MATH 322. Applied Linear Regression *3.00*
- MATH 324. Applied Nonparametric Statistics *3.00*
- MATH 328. Time Series Analysis *3.00*
- MATH 421. Applied Multivariate Statistical Analysis *3.00*
- PHYS 215. Energy and the Environment [C3PP] *3.00*

Group 3. Environmental Studies courses: 3 Credit Hours

One of the following courses:

- ECON 305. Environmental Economics *3.00*
- ECON 340. Economics of Natural Resources *3.00*
- ENG 371. Literature and the Environment *3.00*
- ENG 390. The Environmental Imagination *3.00*
- GEOG 325. Environmental Ethics *3.00*
- HIST 427. U.S. Environmental History *3.00*
- ISAT 421. Environmental Policy & Regulation *3.00*
- ISAT 473. Local Agriculture and Farm Internships *4.00*
- PPA 484. Environmental Regulatory Policy and Politics *3.00*

- SCOM 354. Environmental Communication and Advocacy *3.00*
or
- WRTC 326. Environmental Communication and Advocacy *3.00*

- SOCI 311. Sociology of the Environment *3.00*

- WRTC 416. Rhetoric of Environmental Science and Technology *3.00*
or
- SCOM 465. Rhetoric of Environmental Science and Technology *3.00*

Group 4. Capstone course

- ENVT 400. Capstone Seminar in Environmental Problem Solving *3.00*¹

Footnote

¹ All students must complete the capstone course ENVT 400. Students must have completed 15 hours of their environment minor in order to enroll in the capstone.

Total: 24-25 Credit Hours

Environmental Studies Minor

Dr. Rob Alexander, **Coordinator**

Phone: (540) 568-3771

Email: alexanrw@jmu.edu

Website: <http://www.jmu.edu/environment/studies.shtml>

The environmental studies minor provides a cross disciplinary education engaging socio-cultural, scientific and technical issues raised by the oft-conflicting needs and desires of globally interacting societies. Designed to complement any major, the goals of the environmental studies minor include:

- To help undergraduates develop an awareness of the cultural, political and scientific aspects of the world's environmental problems.
- To better prepare students for further study at the graduate or professional school level and careers in the expanding field of environmental professions.

Overview of Requirements

The minimum requirement for a minor in environmental studies is a minimum of 21 credit hours taken from the three categories: Introduction to Environment and Environmental Science Literacy, The Socio-Cultural Context of Environmental Studies and the Senior Seminar capstone course.

No more than two courses from a single subject (e.g., GEOG, GEOL, ANTH, ENG) may count toward completion of the minor. Students wishing to complete more than one of the environment minors (environmental management, environmental science and environmental studies) may receive dual credit for the capstone course (ENVT 400), but may not receive dual credit for any other courses that might be shared by the minors.

Courses

Introduction to Environment and Environmental Science Literacy

Fundamental to exploring the problems which emerge through the human/nature interaction is an understanding of core scientific concepts and processes that underlie natural systems. Therefore, minors will take an environmental science course that provides a broad survey of core concepts as well as an environmental science course that provides a targeted focus on an environmental science topic.

Introduction to Environment

Select one course from the following, which can be double-counted with General Education:

- BIO 103. Contemporary Biology (3, 0) [C3NS] 3.00
- BIO 250. Quantitative Ecology and Evolution (3,3) 4.00
- ENVT 200. Environmental Systems Theory 3.00
- GEOG 210. Physical Geography (2, 2) 4.00
- GEOL 102. Environment: Earth [C3NS] 3.00
- GEOL 110. Physical Geology [C3NS] 3.00

- GEOL 115. Earth Systems and Climate Change [C3NS] 3.00
- GEOL 210. Applied Physical Geology [C3NS] 3.00
- ISAT 100. Environmental and Energy Sustainability [C3PP] 3.00
- ISAT 112. Environmental Issues in Science and Technology (2,3) [C3PP] 4.00

Environmental Science Literacy

Select one course from the following, which can be double-counted with General Education:

- BIO 457. Biological Applications of Geographic Information Systems (2, 4) 4.00
- BIO 459. Freshwater Ecology (3, 3) 4.00
- GEOG 327. Climatology 3.00
- GEOL 211. Introduction to Oceanography [C3NS] 3.00
- GEOL 230. Evolution of Earth (3, 2) 4.00
- GEOL 310 A - D. Environmental Impact 2.00 - 3.00, *repeatable to 6 credits*
- GEOL 320. Meteorology 3.00
- GEOL 430. Environmental Soil Science (2, 2) 3.00
- ISAT 320. Fundamentals of Environmental Science & Technology I 4.00
- PHYS 215. Energy and the Environment [C3PP] 3.00

The Socio-Cultural Context of Environmental Studies

Environmental studies involves a breadth of knowledge regarding the intersections of social and natural systems and how human activity and thought, over time, reflect the tensions, challenges and opportunities of a human society embedded in a finite natural environment.

Select four courses (a minimum of 12 credit hours) from the following. Only two courses with the same course subject may be taken.

- ECON 305. Environmental Economics 3.00
- ECON 340. Economics of Natural Resources 3.00
- EDUC 455. Perspectives in Environmental Education 3.00
- ENG 221. Literature/Culture/Ideas [C2L] 3.00 (Lit, Nature, Env section only)
- ENG 371. Literature and the Environment 3.00
- ENG 372. Ecocriticism and Environmental Ethics 3.00
- ENG 390. The Environmental Imagination 3.00
- GEOG 290. Human-Environment Interactions 3.00
- GEOG 300. Population Geography 3.00

- GEOG 310. Environmental Issues 1.00 - 4.00
or
- GEOL 310 A - D. Environmental Impact 2.00 - 3.00, *repeatable to 6 credits*

- GEOG 322. Agricultural Systems 3.00
- GEOG 325. Environmental Ethics 3.00
- GEOG 427. Water Resources of the World 3.00

- GEOG 429. Sustainability: An Ecological Perspective 3.00
or

- ISAT 429. Sustainability: An Ecological Perspective 3.00
- HIST 427. U.S. Environmental History 3.00
- ISAT 290. Introduction to Systems Thinking for Complex Problems 3.00
- ISAT 421. Environmental Policy & Regulation 3.00
- PPA 484. Environmental Regulatory Policy and Politics 3.00
- SCOM 302. Third Wave Ecofeminism 3.00
or
- WGSS 302. Third Wave Ecofeminism 3.00
- SCOM 354. Environmental Communication and Advocacy 3.00
or
- WRTC 326. Environmental Communication and Advocacy 3.00
- SOCI 311. Sociology of the Environment 3.00
- SOCI 357. Sociology of Disasters 3.00
- WRTC 416. Rhetoric of Environmental Science and Technology 3.00
or
- SCOM 465. Rhetoric of Environmental Science and Technology 3.00
- Approved special topics courses
- Approved internship programs
- Approved study abroad courses

Senior Seminar Capstone Course

The culminating experience for the environmental studies minor is the combined capstone, co-taught by two faculty members from different fields and joined by the environmental science and environmental management minors. With a small size, opportunities for experiential field trips and engagement with current environmental challenges, ENVT 400 creates an all hands on deck opportunity to demonstrate competency in environmental studies and to make a difference with real environmental problems.

- ENVT 400. Capstone Seminar in Environmental Problem Solving 3.00

Total: 21-24 Credit Hours

Family Studies Minor

Dr. Terrence Fernsler, **Minor Adviser**

Phone: (540) 568-6980

Email: fernslts@jmu.edu

Website: <http://www.jmu.edu/socwork/familystudies.html>

The minor in family studies is designed for undergraduates seeking enhancement of their major, desiring to increase understanding of self and relationships, and seeking to make a positive contribution to society. The minor offers two focuses: Family ecology (FECO) and gerontology (GERO). Both focuses explore a range of family-related issues, family processes, policies, laws, services and the interrelationship of families and society. The minor will enhance majors in many fields including

anthropology, early and middle education, health sciences, management, nursing, psychology, social work and sociology. The minor capstone requires students to make connections between their major field and family studies.

The family studies minor requires a minimum of 18 credit hours with no more than six credit hours in the student's major. Note that some courses have prerequisites that must be completed before enrollment. Some courses may be restricted to students enrolled in particular majors.

One introductory course is required: either FAM 133 or SOCI 374.

For FECO focus students, 12 other credit hours are required and must be selected from each of these areas: Families in society, family and intimate relationships, and human development in the family. An additional course must be selected from any of the three areas or from family studies electives.

A capstone course, FAM 400, is also required. At least four courses in the minor, including the introductory course, must be completed prior to enrolling in FAM 400.

Required Courses

Core Courses

Introductory Course: 3 Credit Hours

- FAM 133. The Contemporary Family 3.00
- SOCI 374. Sociology of Families 3.00

Frameworks and Focus Capstone Courses: 3 Credit Hours

- FAM 400. Theory Survey 1.00
- FAM 401. Issues and Applications 2.00^{6,7}
or
- IPE 490. Special Topics in Health and Human Services 0.00 - 4.00^{6,8} (Course topic: Caregivers Community Network)
(must be taken for 2.00 Credit Hours)

Family Ecology Focus

Families in Society

Choose one of the following: 3 Credit Hours

- GERN 280. Social Gerontology 3.00
or
- SOCI 280. Social Gerontology 3.00
- HIST 320. Women in U.S. History 3.00
- HIST 379**. Family and Gender in East Asia 3.00
- HIST 466. The Family, 1400-1800 3.00
- NSG 390. Impact of Chronic Illness 3.00⁴
- SOCI 303. Sociology of Death & Dying 3.00¹

- SOCI 337. Sociology of Gender 3.00
or
- WGSS 337. Sociology of Gender 3.00

- SOWK 338. Issues and Policies in Family Services 3.00
- SOWK 342. Child Welfare Services 3.00

Family and Intimate Relationships

Choose three credits from the courses below: 3 Credit Hours

- HTH 372. Human Sexuality 3.00
- NSG 326. Care and Consideration for Children with Special Needs 1.00
- PSYC 275. Psyc of Human Intimacy 3.00
- PSYC 450. Psychology of Child Abuse and Neglect 3.00 ¹
- SCOM 440. Family Communication 3.00 ²
- SOWK 340. Violence in Families 3.00 ¹

Human Development in the Family

Choose three credits from the courses below: 3 Credit Hours

- EXED 306. Lifespan Issues for Individuals with Disabilities 3.00 ³
- FAM 300. Child Development 3.00 ¹
- NSG 319. Understanding Sexuality across the Health-Illness Continuum 2.00
- PSYC 304. Death & Dying: Thanatology 3.00 ¹
- PSYC 365. Developmental Psychology 3.00 ¹
- PSYC 475. Psychology of Adulthood 3.00

- SOWK 325. Parent-Child Relationships Across the Lifespan 3.00
or
- FAM 325. Parent-Child Relationships Across the Lifespan 3.00

- SOWK 387. Working with Teens 3.00

Additional Elective

Choose three credits from one of the three topic areas above or one of the following: 3 Credit Hours

- FAM 375. Grant Writing for Agencies 3.00
- FAM 386. Youth Empowerment Strategies (YES) 3.00
- FAM 487. Special Topics in Family Studies 3.00
- FAM 490. Special Studies in Family Studies 3.00

Gerontology Focus

Foundation Courses: 9 Credit Hours

- GERN 280. Social Gerontology *3.00*
or
- SOCI 280. Social Gerontology *3.00* (Health Services Administration majors may substitute HSA 290. Gerontology for Health Services Administration)
- GERN 305. Programs and Services for the Elderly *3.00*⁵
- PSYC 160. Life Span Human Development [C5SD] *3.00*

Elective Course (Choose three credit hours from the following approved courses):

- BIO 301. Introductory Neuroscience *3.00*⁵
- GERN 450. Palliative and Hospice Care: An Interdisciplinary Approach *3.00*
- GERN 487. Special Topics in Gerontology *3.00*
- GERN 490. Special Studies in Gerontology *1.00 - 3.00*
- HTH 378. The Use & Effects of Drugs *3.00*⁵
- HTH 471. Health Aspects of Gerontology *3.00*
- IPE 415. Ethical Decision-Making in Healthcare: an Interprofessional Approach *1.00*
or
- NSG 415. Ethical Decision-Making in Healthcare: an Interprofessional Approach *1.00*
- NSG 310. Helping Persons in Pain *2.00*
- NSG 322. Integrative Health Care *2.00*
- NSG 328. Life, Death, and the In-Between *1.00*
- NSG 391. Living Successfully with Chronic Illness *3.00*
- PSYC 304. Death & Dying: Thanatology *3.00*⁵
- SOWK 325. Parent-Child Relationships Across the Lifespan *3.00*
or
- FAM 325. Parent-Child Relationships Across the Lifespan *3.00*
- SOCI 303. Sociology of Death & Dying *3.00*
- SOWK 314. Rural Health: an Interprofessional Approach *3.00*
or
- HTH 314. Rural Health: An Interdisciplinary Approach *3.00*
or
- IPE 314. Rural Health: an Interprofessional Approach *3.00*

Total: 18 Credit Hours

Footnotes

¹ Some courses in the minor have substantive overlap in focus and content. To ensure students gain a broad exposure to family functions and dynamics, some restrictions apply for overlapping courses. For the family ecology focus, students may take either:

- SOCI 303. Sociology of Death & Dying or PSYC 304. Death & Dying: Thanatology;
- PSYC 450. Psychology of Child Abuse and Neglect or SOWK 340. Violence in Families;
- PSYC 365. Developmental Psychology or FAM 300. Child Development

² SCOM majors and minors only.

³ Special education non-teaching and chronic illness concentration students only.

⁴ Access may be limited.

⁵ Course has one or more prerequisites.

⁶ GERN 495 may be substitute as a capstone course with special permission from the minor adviser.

⁷ Capstone course for the FECO focus.

⁸ Capstone course for the GERO focus.

Film Studies Minor

Kevin J. Reynolds, **Coordinator**

Phone: (540) 568-8183

Email: reynolkj@jmu.edu

The minor in film studies is designed for students who wish to extend their critical understanding of visual communication and narrative form by studying how movies tell stories, convey information and influence audiences. Because the program is cross disciplinary, it examines films as both art and entertainment, bringing together the literary traditions of English and the communication perspectives of media arts and design. Together, the aim is to explore cinema's pictorial "language," investigate its commercial consequences and evaluate its impact across cultures as a medium for enacting the human story.

Six credit hours may be double-counted between the minor and major. Information is available from the film studies adviser of the Media Arts and Design, School of or the English, Department of.

Required Courses

- ENG 380. Introduction to Film *3.00*
or
- SMAD 380. Introduction to Film *3.00*

Select no fewer than five courses from the following: 15 Credit Hours

- ENG 381. History of Film to 1960 *3.00*
- ENG 382. History of Film Since 1960 *3.00*
- ENG 383. Film Genre *3.00*
- ENG 384. Film Authorship *3.00*
- ENG 385. Special Topics in Film Study *3.00*
- SMAD 371. Narrative Media Studies *3.00*
- SMAD 460. Film and Society *3.00*
- SMAD 461. Film as Art *3.00*
- SMAD 462. Documentary in Film & Television *3.00*
- SMAD 463. Film Adaptations *3.00*

- SMAD 464. Contemporary American Film 3.00
- SMAD 498. Senior Seminar in Media Arts and Design 3.00 (when topic is film)

Total: 18 Credit Hours

Global Supply Chain Management Minor

Dr. Mert Tokman, **Coordinator**

Phone: (540) 568-3020

Email: tokmanmx@jmu.edu

The global supply chain management minor is designed to provide a broad overview of the supply chain management and logistics functions in a global context. The minor is open to all COB, ISAT and ENGR majors.

The minor is comprised of two core courses (MGT 461. Introduction to Supply Chain Management and MKTG 462. International Logistics) and four electives that can be chosen from available classes in marketing, management, international business, integrated sciences and engineering.

Prerequisite:

- COB 300C. Integrative Business: Operations 3.00 (For COB Majors)
or
- ISAT 211. Issues in Modern Production Systems 3.00 (For CISE Majors)

Core Courses: 6 Credit Hours

(On campus or Study Abroad):

- MGT 461. Introduction to Supply Chain Management 3.00
- MKTG 462. International Logistics 3.00

Electives: 12 Credit Hours

Marketing Majors

Choose two: (6 Credit Hours)

- MKTG 450. Business Marketing 3.00
- MKTG 460. Global Marketing 3.00
- MKTG 494. Marketing Internship 3.00 - 6.00

Choose two from: (6 Credit Hours)

- ISAT 433. Foundations of Lean and Six Sigma 3.00
- ISAT 434. Industrial Informatics 3.00

- ISAT 435. Lean Six Sigma Applications *3.00*

Management Majors

Choose two: (6 Credit Hours)

- MGT 325. Project Management *3.00*
- MGT 340. International Management *3.00*

Choose two from: (6 Credit Hours)

- ISAT 433. Foundations of Lean and Six Sigma *3.00*
- ISAT 434. Industrial Informatics *3.00*
- ISAT 435. Lean Six Sigma Applications *3.00*

International Business and other COB Majors

Choose two: (6 Credit Hours)

- IB 494. International Business Internship *3.00*
- MGT 340. International Management *3.00*
- MKTG 460. Global Marketing *3.00*

Choose two from: (6 Credit Hours)

- ISAT 433. Foundations of Lean and Six Sigma *3.00*
- ISAT 434. Industrial Informatics *3.00*
- ISAT 435. Lean Six Sigma Applications *3.00*

Integrated Science and Technology Majors

- ISAT 330. Sustainable Manufacturing Systems *3.00*
- ISAT 331. Cyber-Physical Industry *3.00*

Choose two from: (6 Credit Hours)

- ISAT 432. Materials Selection in Product Design *3.00*
- ISAT 433. Foundations of Lean and Six Sigma *3.00*
- ISAT 434. Industrial Informatics *3.00*
- ISAT 435. Lean Six Sigma Applications *3.00*
- ISAT 437. Technological Innovation and Sustainable Design *3.00*

- ISAT 341. Machine Learning and Data Science *3.00*
or
- ISAT 344. Intelligent Systems *3.00*
(Integrated Science and Technology students may receive credit for either ISAT 341 or ISAT 344, but not both)

Engineering Majors

Choose two from: (6 Credit Hours)

- ENGR 411. Fundamentals of Sustainable Engineering and Design 3.00
- ISAT 432. Materials Selection in Product Design 3.00
- ISAT 433. Foundations of Lean and Six Sigma 3.00
- ISAT 434. Industrial Informatics 3.00
- ISAT 435. Lean Six Sigma Applications 3.00
- ISAT 437. Technological Innovation and Sustainable Design 3.00

- ISAT 330. Sustainable Manufacturing Systems 3.00
or
- ISAT 331. Cyber-Physical Industry 3.00
(Engineering students may receive credit for either ISAT 330 or ISAT 331, but not both)

- ISAT 341. Machine Learning and Data Science 3.00
or
- ISAT 344. Intelligent Systems 3.00
(Engineering students may receive credit for either ISAT 341 or ISAT 344, but not both)

Total: 18 Credit Hours

Historical Archaeology Minor

Dr. Dennis B. Blanton, **Minor Adviser**

Phone: (540) 568-6171

Dr. Gabrielle M. Lanier, **Minor Adviser**

Phone: (540) 568-3615

Website: <http://www.jmu.edu/cds/regional-and-area-studies/index.shtml>

The minor is designed for students interested in the sub-field of historical archaeology, a discipline that integrates the research interests and methods of archaeology and history. The minor is designed to complement existing majors in anthropology and history, and it may also be of interest to students in art history and public administration. While guided by the theoretical underpinnings of history and anthropology, the minor in historical archaeology is field- and research-oriented. Students enrolling in the program should anticipate courses that require significant effort outside of the classroom.

Two courses (six credits) may be double-counted between the minor and the student's major.

Required Courses

- ANTH 331. Historical Archaeology 3.00 (A)
or
- HIST 331. Historical Archaeology 3.00

- ANTH 494. Field Techniques in Archaeology 4.00 - 8.00 (A,F)

- HIST 396. Introduction to Public History 3.00
or
- ARTH 396. Introduction to Public History 3.00

Capstone research course

The personalized capstone course can take place over one or two semesters and will require the student to work closely with a faculty adviser. The project will require the student to define a research topic, establish a theoretical and methodological base for the project, gather data, interpret the results and prepare an appropriate statement of findings.

- ANTH 496. Research Thesis 3.00 (A)
or
- HIST 496. Research Thesis 3.00

Choose three of the following: 9 Credit Hours

Of these, one course must be chosen from the history/anthropology options and one must be from the geology or geography options.¹

- ANTH 410. Spatial Analysis for Anthropologists 4.00 (A,B or C)
- ANTH 455. Archaeology: Methods of Analysis and Interpretation 4.00 (A,F)

- HIST 394. Introduction to Museum Work 3.00
or
- ARTH 394. Introduction to Museum Work 3.00

- HIST 492. Material Culture 3.00
or
- ANTH 492. Material Culture 3.00 (A)
or
- ARTH 492. Material Culture 3.00

- HIST 493. Historic Preservation 3.00
or
- ARTH 493. Historic Preservation 3.00

- GEOL 430. Environmental Soil Science (2, 2) 3.00
- GEOL 442. Field Geophysics 3.00

Footnote

¹ Access to geology and geography courses is competitive and will require some computer experience.

Total: 22 Credit Hours

Anthropology Course Designations

Archaeology (A)

- ANTH 197. Archaeology 3.00 (A,R)
- ANTH 205. Buried Cities, Lost Tribes: The Rise and Fall of Early Human Societies [C2HQC] 3.00 (A)
- ANTH 250. Anthropology of the American Southwest 3.00 (A)
- ANTH 307. Climate, Culture and Change 3.00 (A)
- ANTH 311. Archaeology of Virginia 3.00 (A)
- ANTH 312. The Native Americans 3.00 (A)
- ANTH 325. Aztec, Maya & Their Predecessors 3.00 (A)
- ANTH 327. Ancient North American Civilizations 3.00 (A)
- ANTH 331. Historical Archaeology 3.00 (A)
- ANTH 366. Anthropology of War 3.00 (A, C)
- ANTH 391. Study Abroad 1.00 - 6.00 (May be A, B, C, F)
- ANTH 395. Special Topics in Anthropology 3.00 (May be A,B, or C)
- ANTH 410. Spatial Analysis for Anthropologists 4.00 (A,B or C)
- ANTH 455. Archaeology: Methods of Analysis and Interpretation 4.00 (A,F)
- ANTH 486. Internship in Anthropology 1.00 - 6.00 (May be A,B or C)
- ANTH 490. Special Studies in Anthropology 1.00 - 3.00 (May be A, B or C)
- ANTH 492. Material Culture 3.00 (A)
- ANTH 494. Field Techniques in Archaeology 4.00 - 8.00 (A,F)
- ANTH 496. Research Thesis 3.00 (A)
- ANTH 499. Honors Thesis 6.00 (May be A, B, or C). Three Semesters

Biological Anthropology (B)

- ANTH 196. Biological Anthropology [C3NS] 3.00 (B, R)
- ANTH 315. Human Evolution 3.00 (B)
- ANTH 316. Human Evolutionary Psychology 3.00 (B)
- ANTH 317. Primate Evolutionary Ecology 3.00 (B)
- ANTH 318. The Evolution of Primate Sexuality and Reproduction 3.00 (B)
- ANTH 319. Human Osteology 3.00 (B)
- ANTH 352. Birth, Death, Sex: Exploring Demography 3.00 (B,C)
- ANTH 391. Study Abroad 1.00 - 6.00 (May be A, B, C, F)
- ANTH 395. Special Topics in Anthropology 3.00 (May be A,B, or C)
- ANTH 410. Spatial Analysis for Anthropologists 4.00 (A,B or C)
- ANTH 415. Anthropological Genetics 3.00 (B)
- ANTH 430. Primate Conservation Biology 3.00 (B)
- ANTH 445. Methods and Research Perspectives in Biological Anthropology (B) 4.00
- ANTH 486. Internship in Anthropology 1.00 - 6.00 (May be A,B or C)
- ANTH 490. Special Studies in Anthropology 1.00 - 3.00 (May be A, B or C)
- ANTH 499. Honors Thesis 6.00 (May be A, B, or C). Three Semesters

Cultural Anthropology (C)

- ANTH 195. Cultural Anthropology [C4GE] 3.00 (C, R)
- ANTH 265. Peoples and Cultures of Latin America and the Caribbean 3.00 (C).
- ANTH 280. Peoples and Cultures of Sub-Saharan Africa 3.00 (C)
- ANTH 295. People and Cultures of East Asia 3.00 (C)
- ANTH 300. The Anthropology of Food 3.00 (C)

- ANTH 305. Language and Culture 3.00 (C)
- ANTH 306. Japanese Society and Culture 3.00 (C)
- ANTH 323. Anthropology and Photography 3.00 (C)
- ANTH 324. Mindfulness and Anthropology 3.00 (C)
- ANTH 350. Magic, Witchcraft and Religion 3.00 (C)
- ANTH 352. Birth, Death, Sex: Exploring Demography 3.00 (B,C)
- ANTH 360. Medical Anthropology 3.00 (C)
- ANTH 364. U.S./Latin American Borders 3.00 (C)
- ANTH 366. Anthropology of War 3.00 (A, C)
- ANTH 368. Contemporary American Culture 3.00 (C)
- ANTH 370. Topics in the Anthropology of Gender 3.00 (C)
- ANTH 375. Anthropological Theory 3.00 (C,R,W)
- ANTH 376. Anthropology of Reproduction 3.00 (C)
- ANTH 377. Space/Culture/Power 3.00 (C)
- ANTH 388. Prisons, Punishment and the State 3.00
- ANTH 389. Ethnographic Experience in Dominica 3.00 (C)
- ANTH 390. Topics in Cultural Studies 3.00 (C)
- ANTH 391. Study Abroad 1.00 - 6.00 (May be A, B, C, F)
- ANTH 395. Special Topics in Anthropology 3.00 (May be A,B, or C)
- ANTH 405. Topics in Linguistic Anthropology 3.00 (C)
- ANTH 410. Spatial Analysis for Anthropologists 4.00 (A,B or C)
- ANTH 411. Topics in Ethnographic Film 3.00 (C)
- ANTH 435. Ethnographic Genres and Methods 4.00 (C,F)
- ANTH 436. Afro-Latin America 3.00 (C)
- ANTH 486. Internship in Anthropology 1.00 - 6.00 (May be A,B or C)
- ANTH 490. Special Studies in Anthropology 1.00 - 3.00 (May be A, B or C)
- ANTH 499. Honors Thesis 6.00 (May be A, B, or C). Three Semesters

Field Experience (F)

- ANTH 391. Study Abroad 1.00 - 6.00 (May be A, B, C, F)
- ANTH 435. Ethnographic Genres and Methods 4.00 (C,F)
- ANTH 455. Archaeology: Methods of Analysis and Interpretation 4.00 (A,F)
- ANTH 494. Field Techniques in Archaeology 4.00 - 8.00 (A,F)

Required for All Anthropology Majors (R)

- ANTH 195. Cultural Anthropology [C4GE] 3.00 (C, R)
- ANTH 196. Biological Anthropology [C3NS] 3.00 (B, R)
- ANTH 197. Archaeology 3.00 (A,R)
- ANTH 201. The Discipline of Anthropology 1.00 (R)
- ANTH 375. Anthropological Theory 3.00 (C,R,W)

Writing Intensive (W)

- ANTH 375. Anthropological Theory 3.00 (C,R,W)

Humanitarian Affairs Minor

Dr. Tara Parsons, **Coordinator**

Phone: (540) 568-7645

Email: parsonstn@jmu.edu

Website: <http://www.jmu.edu/humanitarian>

The cross disciplinary humanitarian affairs minor provides students with a global perspective on the major humanitarian crises facing the human community today. Students will investigate the impacts of natural disasters, disease, hunger and famine, poverty, conflict, and national and international policies on the welfare of human communities around the world. They will also explore solutions to various humanitarian crises and evaluate the problems of practicing humanitarianism in the world today. Students will become acquainted with the organizations that address these crises and the challenges they face. Finally, students will acquire knowledge and skills that prepare them for careers in governmental and non-governmental organizations that address humanitarian issues. The minor in humanitarian studies is open to all undergraduate students at JMU.

Core Requirements

- HUMN 201. Introduction to Humanitarian Affairs 3.00

Choose five of the following

With no more than two from any single discipline:

- HUMN 301. Introduction to Natural Disasters Response 3.00
or
- GEOG 301. Introduction to Natural Disasters 3.00

- HUMN 302. Legal Issues in Humanitarian Affairs 3.00
- HUMN 350. Special Topics in Humanitarian Affairs 1.00 - 3.00

- HUMN 360. GIS for Humanitarian Assistance 3.00
or
- GEOG 360. GIS for Humanitarian Assistance 3.00

- HUMN 490. Humanitarian Affairs Field Experience 3.00 ¹

- ANTH 366. Anthropology of War 3.00 (A, C)
- BIO 420. Medical Parasitology (3, 0) 3.00
- ECON 270. International Economics 3.00
- ENGR 471. Water in Africa 3.00
- GEOG 280. Human Geography: The Cultural Landscape 3.00
- GEOG 300. Population Geography 3.00
- GEOG 322. Agricultural Systems 3.00
- GEOG 323. The Geography of Human Genetics, Infectious Diseases and Diet 3.00
- GEOG 335. Geography of Africa 3.00
- GEOG 339. Geography of the Caribbean 3.00
- GEOG 345. Geography of Poverty 3.00
- GEOG 375. Political Geography 3.00

- ISAT 459. Awareness and Understanding of Chemical, Biological, and Radiological Weapons of Mass Destruction 3.00
- IA 460. All Hazards Response And Management Systems 3.00
- JUST 235. Justice in the Global Community 3.00
- JUST 341. Gender and Justice 3.00
- JUST 345. Restorative Justice 3.00
- JUST 357. Environmental Justice 3.00

- JUST 372. Ethics and International Politics 3.00
or
- POSC 372. Ethics and International Politics 3.00

- JUST 373. Rebuilding Post Conflict Societies 3.00

- JUST 392. Peace Studies 3.00
or
- POSC 392. Peace Studies 3.00

- NPS 300. Introduction to Nonprofits 3.00
- NUTR 380. Global Nutrition 3.00
- POSC 200. Global Politics [C4GE] 3.00

- POSC 331. Human Rights in Theory and Practice 3.00
or
- JUST 331. Human Rights in Theory and Practice 3.00

- POSC 340. Politics of Development 3.00
- POSC 347. Comparative Public Policy 3.00
- POSC 348. The Politics of Cultural Pluralism 3.00
- POSC 395. International Law 3.00
- POSC 396. International Organizations 3.00
- POSC 397. The Politics of International Economic Relations 3.00
- PSYC 460. Community Psychology Within Developing Societies 3.00
- SCOM 331. Communication and Conflict 3.00
- SCOM 332. Mediation 3.00

- SCOM 334. Alternative Dispute Resolution 3.00
- SOWK 348. Introduction to Developing Societies 3.00
or
- SOCI 348. Introduction to Developing Societies 3.00

- SOWK 375. Grant Writing for Agencies 3.00
- WRTC 314. Writing in the Public Sphere 3.00
- WRTC 484. Writing for Nonprofits 3.00
- WRTC 486. Writing in the Community 3.00

Footnote

¹ When used for credit in the humanitarian affairs minor, the international experience must be approved and supervised by the minor coordinator.

Total: 18 Credit Hours

Interdisciplinary Social Science Minors

Dr. Alison D. Sandman, **Coordinator**

Phone: (540) 568-6182

Email: sandmaad@jmu.edu

Website: <http://www.jmu.edu/history/iss.shtml>

The interdisciplinary social science minor offers a program of integrated study that exposes students to diverse methodologies, philosophies and controversies that define the social sciences. It is a required minor for secondary education students who wish to teach social studies. The ISS minor incorporates economics, geography, history and political science and is offered in two forms for secondary education students. Secondary education students will major in either history or political science and then complete the ISS minor that corresponds to the major. Through this minor and the completion of the B.A. degree in history or political science, students will gain the content knowledge necessary for success in secondary education in social studies. Students not selecting the secondary education licensure program may declare either form of the ISS minor.

Minor Requirements

History Major with ISS Minor

Requirements for the History, B.A. are on the History, Department of page.

Degree Requirements

- General Education *41 Credit Hours* ¹
- Foreign Language classes (intermediate level required) *0-14 Credit Hours* ²
- Philosophy course (in addition to General Education courses) *3 Credit Hours*
- Major requirements *33-34 Credit Hours* ³
- Minor requirements (listed below) *26 Credit Hours*
- Electives *2-16 Credit Hours*

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² The foreign language requirement may be satisfied by successful completion of the second semester of the intermediate level of the student's chosen language (typically 232), or by placing out of that language through the Department of Foreign Languages, Literatures and Cultures' placement test.

³ HIST 457 is a required capstone for the ISS minor and must be completed as part of the history major requirements.

Total: 120 Credit Hours

Political Science Major with ISS Minor

Requirements for the Political Science, B.A. are on the Political Science, Department of page.

Degree Requirements

- General Education *41 Credit Hours*¹
- Foreign Language classes (intermediate level required) *0-14 Credit Hours*²
- Philosophy course (in addition to General Education courses) *3 Credit Hours*
- Major requirements *33 Credit Hours*³
- Minor requirements (listed below) *22 Credit Hours*
- Electives *7-21 Credit Hours*

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² The foreign language requirement may be satisfied by successful completion of the second semester of the intermediate level of the student's chosen language (typically 232), or by placing out of that language through the Department of Foreign Languages, Literatures and Cultures' placement test.

³ POSC 457 is a required capstone for the ISS minor and must be completed as part of the political science major requirements.

Total: 120 Credit Hours

ISS Minor Requirements

To be licensed to teach secondary school social studies, the student must satisfactorily complete requirements for a baccalaureate degree in either history or political science and complete the ISS minor that is paired with that major.

ISS for History Majors

- HIST 225. U.S. History [C4AE] *4.00*¹
- POSC 225. U.S. Government [C4AE] *4.00*¹
- POSC 302. State & Local Gov *3.00*
- POSC 335. Comparative Politics for Teachers *3.00*

Choose one: 3 Credit Hours

- ECON 200. Introduction to Macroeconomics [C4GE] *3.00*¹
- ECON 201. Introduction to Microeconomics *3.00*

Choose one: 3 Credit Hours

- GEOG 200. Geography: The Global Dimension [C4GE] *3.00*¹
- GEOG 280. Human Geography: The Cultural Landscape *3.00*

Choose one: 3 Credit Hours

- GEOG 300 or 400 level *3.00*

- ISS 330. Maps, Money and World Trade *3.00*

Choose one: 3 Credit Hours

- POSC 362. Political Behavior *3.00*
- POSC 380. The U.S. Presidency *3.00*
- POSC 385. The U.S. Congress *3.00*
- POSC 386. The U.S. Judiciary *3.00*

Footnote

¹ May double count for General Education credit.

Total: 26 Credit Hours

ISS for Political Science Majors

- HIST 225. U.S. History [C4AE] *4.00* (Must be completed for General Education credit)
- HIST 350. Virginia *3.00*

Choose one: 3 Credit Hours

- ECON 200. Introduction to Macroeconomics [C4GE] *3.00*¹
- ECON 201. Introduction to Microeconomics *3.00*

Choose one: 3 Credit Hours

Total: 22 Credit Hours

Latin American, Latinx and Caribbean Studies Minor

Allison Fagan, **Coordinator**

Phone: (540) 568-6170

Email: faganae@jmu.edu

Website: <http://www.jmu.edu/lacs>

This cross disciplinary minor helps students to acquire a deeper understanding of Latin America, the Caribbean and Latinos in the U.S. All minors must attain proficiency in Spanish, Portuguese or French at or above the intermediate level (SPAN 232/PORT 232/FR 232 or equivalent). In addition to the language requirement, the minor consists of 18 approved credit hours. Students must select courses in at least three different disciplines. Participants in the minor are encouraged to explore the possibility of studying in a Latin American or Caribbean country for a semester or summer session. See the website for changes in required courses.

Courses

Students may take no more than nine credits (3 courses) in any discipline (i.e., ANTH, HIST).

Complete two courses from among the following: 6 Credit Hours

- ANTH 265. Peoples and Cultures of Latin America and the Caribbean 3.00 (C).
- HIST 313. The History of Latinos in the United States 3.00
- HUM 252. Global Cultures [C2HQC] 3.00
- POSC 350. Latin American Politics 3.00
- SPAN 308. Latin American Civilization 3.00

Complete four additional courses from among the following: 12 Credit Hours

- ANTH 265. Peoples and Cultures of Latin America and the Caribbean 3.00 (C).
- ANTH 325. Aztec, Maya & Their Predecessors 3.00 (A)
- ANTH 364. U.S./Latin American Borders 3.00 (C)
- ANTH 389. Ethnographic Experience in Dominica 3.00 (C)
- ANTH 391. Study Abroad 1.00 - 6.00 (May be A, B, C, F)
- ANTH 395. Special Topics in Anthropology 3.00 (May be A, B, or C)
- ANTH 436. Afro-Latin America 3.00 (C)
- HIST 436**. Afro-Latin America 3.00
- ANTH 490. Special Studies in Anthropology 1.00 - 3.00 (May be A, B or C)

- ARTH 484. Art of the Americas 3.00
- ECON 270. International Economics 3.00
- ECON 312. Comparative Economic Systems 3.00
- ECON 365. Economic Development 3.00
- ECON 372. International Finance and Payments 3.00
- ECON 490. Special Studies in Economics 1.00 - 3.00
- ENG 360. Introduction to Ethnic American Literature 3.00
- GEOG 339. Geography of the Caribbean 3.00
- GEOG 490. Senior Research or Field Practicum 3.00
- HIST 302**. Latin American Urban History 3.00
- HIST 313. The History of Latinos in the United States 3.00
- HIST 341. Selected Themes in World History 3.00
- HIST 391. Travel Studies Seminar 3.00
- HIST 395. History Seminar 3.00
- HIST 399. Special Studies in History 3.00
- HIST 437**. Latin America and Latin Americans through Film: Focus on the Twentieth Century 3.00
- HIST 444**. Revolution and Social Change in Latin America 3.00
- HIST 445**. A Cultural History of Latin America, the Caribbean, and the United States 3.00
- HIST 447**. South America 3.00
- HIST 448**. Gender in Latin America and the Iberian World 3.00
- HIST 489. Selected Topics in World History 3.00
- HUM 252. Global Cultures [C2HQC] 3.00
- LACS 490. Independent Study in Latin American, Latinx and Caribbean Studies 3.00
- LACS 495. Special Topics in Latin American, Latinx and Caribbean Studies 3.00
- POSC 350. Latin American Politics 3.00
- POSC 371. Topics in Comparative Politics 3.00
- POSC 397. The Politics of International Economic Relations 3.00
- REL 380. Contemporary Theologies 3.00
- REL 450. Religion and Society 3.00
- SOCI 318. Sociology of Immigration 3.00
- SOCI 391. Study Abroad 1.00 - 6.00
- SOCI 490. Independent Study in Sociology 1.00 - 3.00
- SPAN 308. Latin American Civilization 3.00
- SPAN 321. Oral and Written Communication (for Heritage Speakers) 3.00
- SPAN 385. Latin American Drama and Short Stories 3.00
- SPAN 395. Latin American Poetry of the 20th Century 3.00
- SPAN 401. Hispanic/Latinx Cinema for Spanish Conversation 3.00
- SPAN 404. Spanish in the United States 3.00
- SPAN 415. The Spanish-American Novel 3.00
- SPAN 446. Special Topics in Spanish Literature 3.00
- SPAN 447. Special Topics in Spanish Civilization and Culture 3.00
- SPAN 465. Cinema and Literature 3.00
- SPAN 485. Business and Society in Latin America 3.00
- SPAN 490. Special Studies in Spanish 1.00 - 3.00
- SPAN 492. Latinx Community Practicum 3.00

Total: 18 Credit Hours

Footnotes

¹ HUM 252 is typically offered in several sections each semester; many of these sections do not focus on Latin America. Students must take the version focused on Latin America for HUM 252 to count as part of the Latin American studies minor. HUM 252 counts as a history course unless taught by faculty from another discipline.

² Special topics or special studies course. It may count for the minor, but only if it deals with Latin America or the Caribbean. Contact the coordinator for approval.

³ Must be one of the following topics: Latin American Cultures or Brazilian Culture.

Latino Community Engagement Minor

The Latino Community Engagement minor invites Spanish-speaking students to engage with the local and regional Latinx community through a curriculum that requires community engagement and that emphasizes the immediacy of history and current events as they affect the Spanish speaking population. Students do not have to be FLLC majors in Spanish in order to elect this minor, but the majority of these courses will be taught in Spanish. Students will be able to select up to two courses in English from a diverse list of courses in topics critical to Latino and Spanish-speaking communities. Consult with the minor coordinator for assistance in evaluating skills for participation.

Required Courses: 9 Credit Hours

- SPAN 300. Grammar and Communication *3.00*
- SPAN 320. Oral and Written Communication *3.00*
or
- SPAN 321. Oral and Written Communication (for Heritage Speakers) *3.00*
- SPAN 492. Latinx Community Practicum *3.00*

Upper-Level Courses: 9 Credit Hours

Choose three upper-level courses in Latino topics from this list. At least one must be taught in Spanish.

No more than two courses can be double-counted with the student's major. Upper-level courses may be substituted, subject to prior approval from the minor coordinator.

- HIST 313. The History of Latinos in the United States *3.00*
- JUST 328. Race, Class and Justice *3.00*
- JUST 343. Justice and Society *3.00*
- POSC 367. U.S. Immigration Politics and Policy *3.00*
- REL 324. Latinx and Latin American Christianity *3.00*
- SCOM 248. Intercultural Communication *3.00*
- SCOM 342. Argument and Advocacy *3.00*
- SCOM 471. Culture and Health Communication *3.00*
- SOCI 318. Sociology of Immigration *3.00*
- SOCI 336. Race and Ethnicity *3.00*
- SOCI 372. Sociology of the Community *3.00*
- SOWK 487. Special Topics *3.00* (Social Work with Immigrants and Refugees)
- SPAN 365. Medical Spanish *3.00*
- SPAN 370. Legal Spanish *3.00*

- SPAN 401. Hispanic/Latinx Cinema for Spanish Conversation *3.00*
- SPAN 404. Spanish in the United States *3.00*
- SPAN 436. Introduction to Interpretation *3.00*
- WRTC 318. Intercultural Professional Communication *3.00*
- WRTC 342. Writing Place *3.00*
- WRTC 486. Writing in the Community *3.00*

Total: 18 Credit Hours

Logic and Reasoning Minor

Dr. Tracy A. Luper, **Coordinator**

Phone: (540) 568-6394

Email: lupherta@jmu.edu

Dr. Thomas R. Adajian, **Coordinator**

Phone: (540) 568-6394

Email: adajiatr@jmu.edu

Website: <http://www.jmu.edu/cds/regional-and-area-studies/index.shtml>

Logic and reasoning are central to human inquiry. The minor brings together several disciplines which take logic and reasoning as part of their subject matter, emphasize the core logical elements that are common across disciplines and show how to apply these common logical concepts and tools in different domains. The requirement for a minor in logic and reasoning is 18-19 credits: 12-13 credit hours from a set of core courses and six credit hours from electives.

Required Courses

- PHIL 250. Introduction to Symbolic Logic *3.00*
- PHIL 310. Symbolic Logic *3.00*

Choose one of the following: 6-7 Credit Hours

- MATH 235. Calculus I [C3QR] *4.00*
and
- MATH 245. Discrete Mathematics *3.00*
- or
- MATH 227. Discrete Structures I *3.00*
or
- CS 227. Discrete Structures I *3.00*
and
- CS 327. Discrete Structures II *3.00*

Elective Courses

Choose at least two of the following: 6 Credit Hours

- CS 444. Artificial Intelligence 3.00 (prerequisite CS 240)
- MATH 424. Statistical Decision Theory 3.00 (prerequisite MATH 318)
- PHIL 315. Logic and Legal Reasoning 3.00
- PHIL 326. Introduction to Non-Standard Logics 3.00
- PHIL 396. Philosophy of Physics 3.00 (prerequisite PHIL 101)
- PHIL 397. Philosophy of Space and Time 3.00
- PHIL 398. Philosophy of Quantum Theory 3.00
- PHIL 410. Philosophy of Science 3.00

Total: 18-19 Credit Hours

Materials Science Minor

Dr. Brycelyn Boardman, **Director**

Phone: (540) 568-8811

Email: boardmbm@jmu.edu

Location: 901 Carrier Drive, MSC 4502

Website: <http://csm.jmu.edu/materialsscience>

Refer to the Materials Science Minor in Centers for Materials Science for more detailed information on this cross disciplinary program.

Credit by Examination

The chemistry and biochemistry department offers credit by examination for CHEM 131 and 132. General Chemistry I-II. Students who want permission to take the examination must apply to the department head. Details regarding approval to take the examination and examination dates will be provided when the application is received.

Teaching Licensure

Students interested in becoming teachers must meet specific curriculum requirements in their major as part of the undergraduate academic degree. Chemistry majors must also complete a course in biology and a course in geology.

In addition to the general education and academic major requirements, chemistry majors desiring secondary teacher licensure must be admitted to teacher education, complete the pre-professional program in secondary education at the undergraduate level and the graduate level Master of Arts in Teaching degree.

It is critical that students seeking licensure consult regularly with both their education adviser and their major adviser to support their progression through the programs. For a full description of the program in secondary teaching, refer to the Department of Middle, Secondary and Mathematics Education, in addition to the College of Education/Professional Education Unit section of the catalog.

Minor Requirements

The minor in materials science includes four major components:

- Choice of an entry-level introductory course in materials science.

- Lecture or laboratory course that emphasizes more specialized areas in materials science.
- Materials science electives that can include all specialized courses.
- Research or an additional materials science lecture or laboratory experience.

Courses for the minor are offered through the departments of chemistry, geology and environmental studies, integrated science and technology, mathematics, and physics.

Courses

- Materials Science Electives: *9 Credit Hours*
- Research or additional materials science laboratory course: *3 Credit Hours*

Choose one of the following: 3 Credit Hours

- MATS 375. An Introduction to Materials Science *3.00*
or
- PHYS 375. An Introduction to Materials Science *3.00*
or
- CHEM 375. An Introduction to Materials Science *3.00*

- MATS 395. Geologic Perspectives in Materials Science
or
- GEOL 395. Geologic Perspectives in Materials Science

Choose one of the following: 3 Credit Hours

- MATS 381. Materials Characterization
or
- PHYS 381. Materials Characterization (Lecture/Lab) *3.00*

- MATS 432. Selection and Use of Engineering Materials and Manufacturing Processes
or
- ISAT 432. Materials Selection in Product Design *3.00*

- MATS 436. Micro-Nanofabrication and Applications
or
- ISAT 436. Micro-Nanofabrication and Applications

Total: 18 Credit Hours

Concentration Requirements

The concentration in materials science consists of 12 credits hours of course work approved by the student's adviser and by the director of the center. Appropriate courses may be chosen from materials science offerings in the areas of chemistry, geology and environmental studies, integrated science and technology, mathematics, and physics. This concentration must be pursued in conjunction with a designated major in chemistry, geology and environmental studies, integrated science and technology, biology, mathematics, and physics.

Courses

- Materials Science Electives: *6 Credit Hours*
- Research or additional materials science laboratory course: *3 Credit Hours*

Choose one of the following: 3 Credit Hours

- MATS 375. An Introduction to Materials Science *3.00*
or
- PHYS 375. An Introduction to Materials Science *3.00*
or
- CHEM 375. An Introduction to Materials Science *3.00*

- MATS 395. Geologic Perspectives in Materials Science
or
- GEOL 395. Geologic Perspectives in Materials Science

Total: 12 Credit Hours

Research in Materials Science

Register for Research in Materials Science under one of the following:

- CHEM 497. Undergraduate Research (in materials science, 2-4 credits)
- GEOL 497. Problems in Geology (in materials science, 1-3 credits)
- ISAT 491, ISAT 492, ISAT 493 Thesis (in materials science, 6 credits)
- PHYS 498R. Undergraduate Research in Physics or Astronomy (in materials science, 2-4 credits)
- MATS 498R. Undergraduate Materials Science Research (1-3 credits, repeatable to 6 credits)
- Materials Science Elective Courses

Courses

- GEOL 300. Introduction to Petrology (3, 3) *4.00*

- MATS 337. Solid State Physics *3.00*
or
- PHYS 337. Solid State Physics *3.00*

- MATS 381. Materials Characterization *3.00* (Lecture/Lab)
or
- PHYS 381. Materials Characterization (Lecture/Lab) *3.00* (Lecture/Lab)

- MATS 382. Microfabrication Laboratory *3.00* (Lecture/Lab)

- PHYS 380. Thermodynamics and Statistical Mechanics *3.00*
or
- CHEM 331. Physical Chemistry I *3.00*

- MATS 432. Selection and Use of Engineering Materials and Manufacturing Processes 3.00
or
- ISAT 432. Materials Selection in Product Design 3.00

- MATS 436. Micro-Nanofabrication and Applications 3.00
or
- ISAT 436. Micro-Nanofabrication and Applications 3.00

- CHEM 445. Polymer Chemistry 3.00

- MATS 396. X-RAY Characterization of Solid Materials 3.00
or
- GEOL 396. X-RAY Characterization of Solid Materials 3.00

Special topics in materials science registered under:

- CHEM 480. Selected Topics in Chemistry 1.00 - 4.00 each semester (materials science)
- GEOL 398. Topics in Geology 1.00 - 4.00 (materials science)
- ISAT 480. Topics in Integrated Science & Technology 1.00 - 4.00 (i.e., light metals)
- MATH 483. Selected Topics in Applied Mathematics 3.00 (materials science)
- MATS 498R. Undergraduate Materials Science Research 1.00 - 3.00
- PHYS 497. Topics in Physics 1.00 - 4.00 (materials science)

Medical Humanities Minor

Dr. Michael J. Klein, **Coordinator**

Phone: (540) 568-3380

Email: kleinmj@jmu.edu

Website: <http://www.jmu.edu/medical-humanities>

The cross disciplinary minor in medical humanities provides students with a humanistic and social study of illness, health and the body. Typically, we approach the human body from a medical, diagnostic model. But physicians have long recognized that this approach to health and well-being is not sufficient for understanding our somatic life. Drawing upon concepts found in the disciplines contributing to the minor, courses in the curriculum share the common focus of examining how individuals and institutions articulate and disseminate conceptions of the body, including constituent issues such as race, ethnicity, sexuality and gender.

Students select a minimum of 18 credit hours taken from a list of approved courses. No more than six credits from a single subject (e.g. ANTH, ENG, SCOM, SOCI) can count toward the minor.

Required Courses

Choose six courses from the following:

- ANTH 352. Birth, Death, Sex: Exploring Demography 3.00 (B,C)
or
- SOCI 352. Birth, Death, Sex: Exploring Demography 3.00
- ANTH 360. Medical Anthropology 3.00 (C)

- ANTH 376. Anthropology of Reproduction 3.00 (C)
- ENG 360. Introduction to Ethnic American Literature 3.00

- ENG 368. Women's Literature 3.00
or
- WGSS 368. Women's Literature 3.00
- ENG 369. Feminist Literary Theory 3.00
or
- WGSS 369. Feminist Literary Theory 3.00

- ENG 370. Queer Literature 3.00
or
- WGSS 370. Queer Literature 3.00

- ENG 423. Advanced Studies in Gender and Sexuality in Literature 3.00

- ENG 466. Advanced Studies in Women's Literature 3.00
or
- WGSS 466. Advanced Studies in Women's Literature 3.00

- GEOG 323. The Geography of Human Genetics, Infectious Diseases and Diet 3.00
- HTH 372. Human Sexuality 3.00
- HIST 306*. A History of the Body in the West 3.00
- HIST 319. Women at Work in U.S. History 3.00
- HIST 320. Women in U.S. History 3.00
- HIST 321*. European Women's History 3.00
- HIST 379**. Family and Gender in East Asia 3.00
- HIST 448**. Gender in Latin America and the Iberian World 3.00
- IPE 415. Ethical Decision-Making in Healthcare: an Interprofessional Approach 1.00
- ISAT 456. Ethical, Legal, & Social Implications of Biotechnology 3.00
- ISAT 485. Gender Issues in Science 3.00
or
- WGSS 485. Gender Issues in Science 3.00
- PHIL 262. Problems in Applied Ethics 3.00

- PHIL 350. The Philosophy of Feminism 3.00
or
- WGSS 350. The Philosophy of Feminism 3.00

- PSYC 308. Health Psychology 3.00
- REL 280. Religion and Science 3.00
- REL 315. Women and Religion 3.00
- REL 371. Religion and Disability 3.00
- REL 372. Religion and Medicine, East and West 3.00
- SCOM 303. Special Topics in Health Communication 3.00

- SCOM 348. Communication and Gender 3.00
or
- WGSS 348. Communication & Gender 3.00

- SCOM 468. Patient-Provider Communication 3.00
- SCOM 471. Culture and Health Communication 3.00
- SOCI 336. Race and Ethnicity 3.00
- SOCI 337. Sociology of Gender 3.00
or
- WGSS 337. Sociology of Gender 3.00
- SOCI 375. Medical Sociology 3.00
- SOCI 385. Madness and Society: the Sociology of Mental Health and Illness 3.00

- WRTC 420. Feminist Rhetorics 3.00
or
- WGSS 420. Feminist Rhetorics 3.00
or
- SCOM 420. Feminist Rhetorics 3.00

- WRTC 458. Scientific and Medical Communication 3.00
- WRTC 488. Writing in the Health Sciences 3.00

Total: 18 Credit Hours

Medieval and Renaissance Studies Minor

Dr. Peter J. Eubanks, **Coordinator**

Phone: (540) 568-3511

Website: <http://www.jmu.edu/medren>

This minor focuses on the period from the fall of Rome (5th century C.E.) to 1700. The minor allows students to take courses in art history, English, history, music, philosophy, political science, religion and some languages, including medieval languages such as Old English and Middle English in the original or in translation, and elementary and intermediate courses in Arabic, Greek and Latin. Other languages may also be counted for credit with the approval of the instructor. Introductory (i.e., 100 and 200 level) modern language courses are not permitted for credit.

The minor requires 18 credits total from the list below, with the following restrictions. The 18 credit hours must include courses from at least three distinct disciplines. Note that all foreign language courses (ARAB, FR, GER, ITAL and LAT) fall into the single discipline of foreign languages and literatures. At least four of the six required classes must be taken from the intermediate or advanced categories. It is recommended that students take one introductory course before taking the 300 or 400 level classes.

Other courses with significant Medieval and/or Renaissance content may be counted toward the minor with the approval of the coordinator. In addition, students interested in pursuing a three-credit hour focused individual research project should contact individual faculty members with whom they might wish to work to determine the feasibility of this option in their particular cases. Only one such independent study will count toward the minor.

Approval of the minor coordinator will also be required in the following two cases. First, courses with an asterisk will count toward the minor only if their content is focused on the Medieval and/or Renaissance periods. Second, because the content of HUM 200, HUM 250 and HUM 252 may vary, the minor coordinator will determine the appropriate disciplinary category for these courses.

Required Courses

*Courses with an asterisk will count toward the minor only if their content is focused on the Medieval and/or Renaissance periods.

Introductory

- ARTH 205. Survey of World Art I: Prehistoric to Renaissance [C2VPA] 3.00
- HIST 101. World History to 1500 [C2HQC] 3.00
- HUM 200. Great Works [C2L] 3.00 *
- HUM 250. Foundations of Western Culture [C2HQC] 3.00 *
- HUM 252. Global Cultures [C2HQC] 3.00 *
- HIST 201. Europe to 1815 3.00
- HIST 269. Premodern Middle East 3.00

Intermediate

- ARTH 313. Masterpieces of Italian Renaissance Art 3.00 (*Semester in Florence only*)
- ARTH 320. Travel Study in Art History 3.00
- ENG 302. Special Topics in Literature and Language 3.00 *
- ENG 311. Medieval Literature and Culture 3.00
- ENG 313. Sixteenth Century British Literature 3.00
- ENG 315. Seventeenth Century British Literature 3.00
- ENG 316. Early Modern Drama 3.00
- ENG 317. Shakespeare's Tragedies and Romances 3.00
- ENG 318. Shakespeare's Comedies and Histories 3.00
- HIST 383*. Early England 3.00
- MUAP 380. Collegium Musicum 1.00
- PHIL 342. Medieval Philosophy 3.00
- POSC 310. Political Theory: Ancient to Early Modern 3.00
- REL 300. Selected Topics in Religion 3.00 *
- REL 305. Islamic Religious Tradition 3.00
- REL 360. History of Christian Thought 3.00

Advanced

- ARTH 446. Renaissance Art and the East 3.00
- ARTH 448. Studies in Leonardo and Michelangelo 3.00
- ARTH 449. Topics in Renaissance Art 3.00
- ENG 410. Advanced Studies in Author 3.00 *
- ENG 412. Special Topic Seminar 3.00 *
- FR 446. Special Topics in French Literature 3.00 *
- GER 436. Studies in German Literature 3.00 *
- HIST 463. Tudor-Stuart England 3.00
- HIST 464. Renaissance and Reformation 3.00
- HIST 466. The Family, 1400-1800 3.00

- HIST 473. Early Modern Islamic Empires 3.00
- HIST 477. Medieval Europe 3.00
- HIST 489. Selected Topics in World History 3.00

- ITAL 437. Studies in Italian Literature 3.00 *
or
- ENG 437. Studies in Italian Literature 3.00 *

- MUS 373. Music History 3.00 ¹
- PHIL 460. Topics in Classical Philosophy 3.00 *

Footnote

¹ MUS 373 is intended for music majors and thus is not appropriate for students who lack expertise in reading music.

Middle Eastern Communities and Migrations Minor

Dr. Shah Mahmoud Hanifi, **Coordinator**

Phone: (540) 568-1743

Email: hanifism@jmu.edu

Website: <http://www.jmu.edu/mecm>

This minor concentrates on social and political issues involving Muslim, Christian and Jewish populations in their own right and in relation to one another in the territory between the Nile and Indus rivers during the modern period. The program is also designed to accommodate consideration of other communities including Hindu and other South Asians, Anatolian and Central Asian Turks, and Mediterranean peoples in the larger area stretching from North Africa to Southeast Asia as well as Middle Eastern diaspora communities in Europe and the Americas from the ancient period to the present.

The cross disciplinary orientation of the program emphasizes comparison and a synthesis of local, regional, trans-national and global perspectives. The program provides an intellectual foundation that can be usefully applied and built upon in graduate school, the private sector or government service.

Students are required to take 18 credits comprised of six credits of core course work and 12 credits of electives. Students may take no more than nine credits from a single academic unit.

Additional Information

The College of Arts and Letters departments offer a number of courses listed generically, usually at the 300– and 400–level (including disciplinary capstone and methodology courses, often numbered 395) that can also count toward the MECM minor under certain circumstances.

Core Courses

Choose two: 6 Credit Hours

- REL 250. Islamic Religious Traditions 3.00 (every three semesters)
- HIST 269. Premodern Middle East 3.00 ¹
- HIST 270. Modern Middle East 3.00 ²

Choose any of the following to fulfill the remaining 12 credits:

Regular Offerings

Department of Foreign Languages, Literatures and Cultures

- ARAB 101. Elementary Arabic I 4.00¹
- ARAB 102. Elementary Arabic II 4.00²
- ARAB 111. Intensive Arabic I 6.00³
- ARAB 212. Intensive Arabic II 6.00³
- ARAB 231. Intermediate Arabic I 3.00¹
- ARAB 232. Intermediate Arabic II 3.00²
- FL 490. ** Special Studies in Foreign Languages 1.00 - 4.00⁷
- HUM 252. Global Cultures [C2HQC] 3.00 (Turkey: Meeting of East and West)
- PERS 101. Elementary Persian I 3.00 - 4.00¹
- PERS 102. Elementary Persian II 3.00 - 4.00²
- PERS 231. Intermediate Persian I 3.00¹
- PERS 232. Intermediate Persian II 3.00²

School of Art, Design and Art History

- ARTH 332. Islamic Art and Architecture 3.00⁶
- ARTH 424. Arts of Ancient Egypt 3.00⁶
- ARTH 439. Topics in Medieval Art 3.00¹
- ARTH 440. City of Jerusalem 3.00⁶
- ARTH 446. Renaissance Art and the East 3.00⁶

Department of Anthropology and Sociology

- SOCI 342. Social Movements in the Middle East 3.00

Department of History

- HIST 269. Premodern Middle East 3.00¹
- HIST 270. Modern Middle East 3.00²
- HIST 372**. Afghanistan in Regional and Global Systems 3.00⁶
- HIST 373. History of the Ottoman Empire, 1453-1922 3.00⁶
- HIST 473. Early Modern Islamic Empires 3.00⁶
- HIST 485. Colonialism in the Middle East and South Asia 3.00⁶

Department of Philosophy and Religion

- REL 201. Introduction to Hebrew Bible/Old Testament 3.00
- REL 202. Introduction to the New Testament 3.00
- REL 250. Islamic Religious Traditions 3.00⁵
- REL 320. Judaism 3.00⁵

Department of Political Science

- POSC 354. Politics of the Middle East 3.00 ¹

Total: 18 Credit Hours

Additional Courses

The following three-credit courses are offered at varying intervals and can count toward the MECM minor if they are structured to include substantial content relating to the foci and goals of the program. Contact the program coordinator to apply one of these courses to the MECM minor.

Department of Anthropology and Sociology

- SOCI 311. Sociology of the Environment 3.00
- SOCI 321. Politics in Society 3.00
- SOCI 348. Introduction to Developing Societies 3.00
- SOCI 360. Social Movements 3.00

School of Art, Design and Art History

- ARTH 419. Topics in African Art 3.00

Department of English

- ENG 430. Advanced Studies in Comparative Literature 3.00
- ENG 433. Advanced Studies in Arabic Literature 3.00.

Department of Foreign Languages, Literatures and Cultures

- ARAB 330. Business Arabic 3.00
- ARAB 339. Literatures of the Islamic World 600-1500 A.D. 3.00
- ARAB 340. Intermediate Arabic Conversation 3.00
- ARAB 400. Advanced Arabic Writing and Conversation 3.00
- ARAB 447. Special Topics in Arabic Civilization and Culture 3.00
- ARAB 448. Special Topics in Arabic Linguistics 3.00

Department of Political Science

- POSC 340. Politics of Development 3.00
- POSC 361. Topics in International Relations 3.00
- POSC 371. Topics in Comparative Politics 3.00

Department of Philosophy and Religion

- REL 300. Selected Topics in Religion 3.00⁷
- REL 309. Jihad in Islamic Traditions 3.00⁶
- HUM 252. Global Cultures [C2HQC] 3.00 (Islamic Civilization)

Footnotes

¹ Offered every fall semester.

² Offered every spring semester.

³ Offered May–June summer term only.

⁴ Offered every third semester.

⁵ Offered fall or spring semester.

⁶ Offered every two years.

⁷ Offered every fall and spring.

Modern European Studies Minor

Dr. John A. Scherpereel, **Coordinator**

Phone: (540) 568-3933

Email: scherpja@jmu.edu

Website: <http://www.jmu.edu/mes/minor.shtml>

The minor in modern European studies provides a cross disciplinary understanding of social dynamics in Europe from the Enlightenment (18th century) through the present. Modern European studies minors will be prepared for careers in public, private, non-profit and educational institutions and will be able to apply critical insights on European culture, thought, history and society in their professions. All minors must attain proficiency in French, German, Italian, Spanish or another European Union language at or above the intermediate level (FL 232 or above).

Students must complete 18 credit hours in addition to the language requirement. These 18 credit hours must include six core credits and 12 elective credits. Six elective credits must cover culture and thought, and six elective credits must cover history and society. The minor's 18 credits must be distributed across at least three disciplines and must include at least one history course.

Core

Choose two from the following: 6 Credit Hours

- HIST 202. Europe Since 1815 3.00
- HIST 382*. Europe in the 20th Century 3.00
- POSC 344. Politics of the European Union 3.00
- POSC 345. Politics of Western Europe 3.00
- POSC 346. Politics of Central and Eastern Europe 3.00

Culture and Thought Electives

Choose two from the following: 6 Credit Hours

- ARTH 313. Masterpieces of Italian Renaissance Art 3.00 (*Semester in Florence only*)
- ARTH 314. Masterpieces of Spanish Art [C2VPA] 3.00 (*Semester in Salamanca*)
- ARTH 315. Masterpieces of British Architecture

- ARTH 316. Masterpieces of British Art 3.00 (*Semester in London*)
or
- ARTH 316L. Masterpieces of British Art

- ARTH 372. Modern Art From 1900-1945 3.00
- ARTH 460. Nineteenth Century Art 3.00
- ARTH 469. Topics in Nineteenth Century Art 3.00
- ARTH 472. Modern Art Since 1945 3.00
- ENG 325. Romantic Literature 3.00
- ENG 327. Gothic Literature 3.00
- ENG 329. Victorian Literature 3.00
- ENG 330. Nineteenth Century British Novel 3.00
- ENG 340. Modern British and Irish Literature 3.00
- ENG 341. Contemporary British and Irish Literature 3.00
- ENG 375. Irish and Anglo-Irish Literature 3.00

- ENG 412L. The London Theatre (London only)
or
 - THEA 449L. The London Theatre (London only)
or
- HUM 200L. Great Works - London [C2L] 3.00 The London Theatre (London only)

- FR 308. Contemporary French Civilization 3.00
- FR 446. Special Topics in French Literature 3.00²
- FR 465. French Cinema 1930-1980 3.00
- FR 466. Contemporary French Cinema 3.00
- GER 266. Contemporary German Literature in Translation
- GER 307. History of German Civilization 3.00
- GER 308. Contemporary German Civilization 3.00
- GER 405. The Age of German Classicism 3.00
- GER 425. Modern German Literature 3.00
- GER 465. German Cinema 3.00

- ITAL 308. Contemporary Italian Civilization 3.00
or
- ITAL 425. Modern Italian Literature 3.00
- ITAL 446. Special Topics in Italian Literature 3.00²
- ITAL 465. Italian Cinema 3.00
- ITAL 490F. Special Studies in Italian 3.00
- PHIL 344. Existentialism 3.00
- PHIL 375. Nineteenth Century Philosophy and Theology 3.00
- PHIL 390. Special Topics in Philosophy 3.00²

- PHIL 468. Phenomenology 3.00
- POSC 316. Contemporary Political Theory 3.00
- POSC 321. Political Theory and Ideology 3.00

- REL 375. Nineteenth Century Philosophy and Theology 3.00
or
- PHIL 375. Nineteenth Century Philosophy and Theology The 19th Century: Age of Ideology

- SMAD 463L. Film Adaptations 3.00
- SPAN 307. Spanish Civilization 3.00

- SPAN 335. Introduction to Spanish Literature 3.00
or
- SPAN 335S. Introduction to Spanish Literature 3.00

- SPAN 405. Spanish Novels of the 19th and 20th Centuries 3.00
- SPAN 406. Spanish Drama of the 19th and 20th Centuries 3.00
- SPAN 461. Post War Literature in Spain 3.00

- SPAN 465. Cinema and Literature 3.00
or
- SPAN 465S. Cinema and Literature 3.00

History and Society Electives

Choose two of the following: 6 Credit Hours

- GEOG 332. Geography of Europe 3.00
- HIST 202. Europe Since 1815 3.00³
- HIST 301*. European Military History 3.00
- HIST 308*. Contemporary Italian Civilization 3.00
- HIST 321*. European Women's History 3.00
- HIST 341. Selected Themes in World History 3.00²
- HIST 382*. Europe in the 20th Century 3.00³
- HIST 384*. England and the Empire-Commonwealth 3.00
- HIST 388*. Germany Since 1871 3.00
- HIST 478. Eastern Europe 3.00
- HIST 486. Europe Since 1914 3.00
- HIST 487. World War II 3.00
- HIST 488. The Holocaust in Global Context 3.00
- HIST 489. Selected Topics in World History 3.00²
- SMAD 360L. British Media and Society 3.00
or
- SCOM 360L. British Media and Society 3.00
or
- WRTC 360L. British Media and Society 3.00

- POSC 344. Politics of the European Union 3.00³

- POSC 345. Politics of Western Europe 3.00³
- POSC 346. Politics of Central and Eastern Europe 3.00³
- POSC 371. Topics in Comparative Politics 3.00^{2,3}
- POSC 371S. Special Studies Salamanca 3.00

- POSC 472L. Media and Politics 3.00 (London only)
or
- SCOM 472L. Media and Politics 3.00 (London only)
or
- SMAD 472L. Media and Politics 3.00 (London only)

Footnotes

¹ This course is taught every other fall on campus and is occasionally offered as part of JMU's short-term Study Abroad Summer Program in Berlin.

² This course may only be used in the minor when its topic is relevant to the minor. Questions should be directed to the minor coordinator.

³ This course may not be double-counted toward the minor.

Total: 18 Credit Hours

Music and Human Services Minor

Dr. Jesse Rathgeber, **Coordinator**

Phone: (540) 568-5279

Email: rathgejc@jmu.edu

This minor will prepare students for vocational and avocational opportunities to use music performance, education, entrepreneurship and community engagement skills to serve diverse populations in human service settings. Students with interest and musical backgrounds are welcome.

Requirements for the minor are 18 credits: 15 credit hours from a set of core courses and three credits from electives.

Degree Requirements

- MUS 206. Introduction to Global Music [C2VPA] 3.00
- MUS 429. Introduction to Intentional Music 1.00
- MUS 430. Music and Human Services: Experiences and Practicum 2.00
- MUED 431. Psychology of Music 3.00
- MUED 485. Teaching Music to Students with Special Needs 3.00
- PSYC 250. Introduction to Abnormal Psychology 3.00
- PSYC 335. Abnormal Psychology 3.00

Choose three credits from the following: 3 Credit Hours

- EXED 200. Foundations of Exceptional Education 3.00

- EXED 303. Foundations of Classroom and Behavior Management 3.00
- EXED 306. Lifespan Issues for Individuals with Disabilities 3.00
- EXED 443. Assistive Technology Use for Individuals With Disabilities 3.00
- DANC 325. Dance in Community 3.00
- MUS 150. Introduction to Technological Applications in Music 1.00

Total: 18 Credit Hours

Footnotes

¹ Access limited; additional sections offered during the summer.

² Only offered to psychology majors or through transfer credit.

Non-Profit Studies Minor

Dr. Terrence Fernsler, **Minor Adviser**

Phone: (540) 568-6980

Email: fernslts@jmu.edu

Website: <http://www.jmu.edu/socwork/nonprofit.html>

The nonprofit studies minor prepares students from a variety of disciplines to understand the unique role of nonprofit organizations in American society. Emphasis is placed on history, theory, legal issues and management topics. The minor includes a capstone seminar and a field experience in a nonprofit agency with the focus to be determined in conjunction with the adviser.

Required Courses

- NPS 300. Introduction to Nonprofits 3.00 ¹
- NPS 320. Nonprofit Management 3.00 ¹
- NPS 400. Internship/Practicum in Nonprofit Studies 4.00 - 6.00 ¹
- NPS 450. Nonprofit Studies Capstone Seminar 3.00 ¹
- Major elective (discipline specific) 3.00 ²
- Elective 3.00 ²

Footnotes

¹ Course has one or more prerequisites.

² A course to be determined in consultation with the nonprofit studies adviser.

Total: 19-21 Credit Hours

Political Communication Minor

Dr. Valerie A. Sulfaro, **Coordinator**

Phone: (540) 568-3997

Email: sulfarva@jmu.edu

Website: <https://www.jmu.edu/commstudies/minors.shtml>

The program in political communication is designed for those students wishing to supplement their major programs with an emphasis on communication skills, knowledge and abilities specifically relevant to participation in political environments. Students must complete a core set of courses, an internship in the field of political communication and a selection of electives.

All political communication minors are required to take a PCOM internship in the Department of Political Science or the Department of Communication Studies. Before enrolling for a PCOM internship, students should have attained junior status, completed the PCOM core requirements and taken at least one upper level PCOM course. Some academic units may have additional prerequisites for their internship course. All SCOM majors with a minor in PCOM are required to take SCOM 495 for their PCOM internship requirement (and to have met the prerequisites for this course). POSC, INTA and PPA majors minoring in PCOM must complete POSC 493 to fulfill the internship requirement. All other majors may take either POSC 493 or SCOM 318 as a means of satisfying their internship. Before pursuing any internship, students must consult with the PCOM coordinator to ensure that the internship is suitable for the minor.

For majors in SCOM who minor in PCOM, a maximum of six credits of course work from the minor can be counted toward the requirements for the major. For SMAD majors, only three credits from the minor may be counted toward the major.

There is no limit on double counting between the POSC major and the PCOM minor. All students must complete 25-26 credit hours for the minor.

Required Courses

- POSC 225. U.S. Government [C4AE] 4.00

- POSC 472. Media and Politics 3.00 ¹
or
- SCOM 472. Media and Politics 3.00 ¹
or
- SMAD 472. Media and Politics 3.00 ¹

- SCOM 353. American Political Culture and Communication 3.00

Choose one of the following: 3-4 Credit Hours

POSC, PPA and INTA majors:

- POSC 493. Political Communication Internship 4.00

SCOM majors (3 credits):

Non-POSC and Non-SCOM majors:

- POSC 493. Political Communication Internship 4.00
or
- SCOM 318. Practicum in Communication Studies 1.00 - 6.00

Choose one of the following: 3 Credit Hours

- POSC 365. American Political Campaigning 3.00²

Choose one of the following: 3 Credit Hours

- SCOM 352. Communication and Social Movements 3.00³
- SCOM 453. Political Campaign Communication 3.00³

Choose two of the following: 6 Credit Hours

- POSC 300. Politics and Film 3.00
- POSC 362. Political Behavior 3.00
- POSC 382. The Role of Religion in American Politics 3.00
- POSC 383. Women and Politics in Comparative Perspective 3.00
- POSC 384. Minority Group Politics 3.00
- POSC 385. The U.S. Congress 3.00
- SCOM 342. Argument and Advocacy 3.00
- SCOM 346. Free Speech in America 3.00
- SCOM 354. Environmental Communication and Advocacy 3.00

- SCOM 420. Feminist Rhetorics 3.00
or
- WRTC 420. Feminist Rhetorics 3.00
or
- WGSS 420. Feminist Rhetorics 3.00

- SCOM 431. Legal Communication 3.00

Total: 25-26 Credit Hours

Footnotes

¹ POSC 472 will not count toward this requirement.

² If both POSC 365 and POSC 369 are taken, one may be counted as an elective.

³ If both SCOM 352 and SCOM 453 are taken, one may be counted as an elective.

Pre-Professional Health Minors

Pre-professional health (PPH) minors are programs that outline recommended courses, activities and competencies for students who are preparing for careers in health professions that require masters or doctoral education. See the "Pre-Professional Health Advising" section for details.

Robotics Minor

Dr. Kevin Giovanetti, **Coordinator**
Phone: (540) 568-6353

Email: giovankl@jmu.edu

Website: <http://www.jmu.edu/cs/minors/robotics-minor>

The cross disciplinary minor in robotics is intended to offer STEM majors and students with an interest in science and technology a fundamental understanding of scientific and technical issues involved in the design, construction and application of robots.

Educational Goals

- Students will have a basic understanding of robot control systems, sensors, motion, circuits and the overall design of robots.
- Students will be able to design and develop autonomous robots and robot control software.
- Students will develop an understanding of how advances in robotics technology can be used in diverse real-life applications.
- Students will learn to work on a cross disciplinary team developing a technical product.

Required Courses

- Basic Preparation ¹

Choose one of the following: 3-4 Credit Hours

- CS 149. Introduction to Programming 3.00
- IA 241. Introduction to Programming and Data Science 3.00
- ISAT 252. Programming and Problem Solving 3.00

Choose one of the following: 3-4 Credit Hours

The 20 credit hour option is only available with the selection of MATH 232.

- MATH 232. Calculus with Functions II 3.00
or
- MATH 235. Calculus I [C3QR] 4.00
- ISAT 151. Topics in Applied Calculus in ISAT [C3QR] 4.00

Choose one of the following: 4 Credit Hours

Students who have completed the physical principles area of Cluster Three with a course not listed below should meet with the minor adviser.

- PHYS 140. College Physics I [C3PP] 3.00
and
- PHYS 140L. General Physics Laboratory [C3PP] 1.00
or
- PHYS 240. University Physics I [C3PP] 3.00
and
- PHYS 240L. University Physics Laboratory I [C3PP] 1.00
or

- ISAT 152. Topics in Applied Physics in Isat 4.00

Core Course

Choose one of the following: 3 Credit Hours

- CS 354. Introduction to Autonomous Robotics 3.00
- PHYS 386. Robots: Structure and Theory 3.00
- PHYS 387. Theory and Basic Principles of Mobile Robot Construction and Control 3.00

Electives

At least one elective must be from a different department from the core course.

Choose at least six credits from the following: 6-8 Credit Hours

- CS 444. Artificial Intelligence 3.00
- ENGR 440. Mechatronics 3.00
- ISAT 331. Cyber-Physical Industry 3.00
- ISAT 344. Intelligent Systems 3.00
- MATH 238. Linear Algebra with Differential Equations 4.00
- MATH 248. Computers & Numerical Algorithms 4.00
- MATH 341. Non-Linear Dynamics and Chaos 3.00
- PHYS 371. Digital Electronics 2.00
- PHYS 372. Microcontrollers and Their Applications (2, 4) 2.00
- PHYS 388. Robots for Humanity 3.00

Robotics Project Course

- CISE 481. Robotics Project Summary 1.00²

Total: 20-24 Credit Hours

Footnotes

¹ A basic preparation course may be waived by the minor adviser if a student has completed a comparable course or experience.

² CISE 481 is intended to summarize a capstone robotics project experience. In order to register for CISE 481 students must have completed or be enrolled in an approved capstone, special topics, or independent study course that involves a robotics project. At the discretion of the robotics minor adviser, students may also qualify for CISE 481 by completing an internship, research experience or professional project that entails robotics design and/or development. Consult the minor adviser for more information.

Russian Studies Minor

Dr. Stephany G. Plecker, **Coordinator**

Phone: (540) 568-3578

Email: pleckesg@jmu.edu

Website: <http://www.jmu.edu/russianstudies>

This minor offers students a broad, cross disciplinary perspective on Russian culture, history, political institutions, economy and geography. It deepens the students' understanding and knowledge of the Russian and non-Russian peoples of the former Soviet Union, and prepares them for careers in teaching, government and international business.

The Russian Studies minor requires 18 credits with a minimum of six credits of Russian language. Students must take courses in at least three different disciplines.

Courses

- ECON 312. Comparative Economic Systems *3.00*
- HIST 385*. The Russian Empire to 1881 *3.00*
- HIST 386*. Russia and the Soviet Union from 1881 to 1991 *3.00*
- HIST 474. Stalinism in Theory, Practice, and Memory *3.00*
- HIST 475. Modern Russia *3.00*
- HUM 200. Great Works [C2L] *3.00* (Russian Literature in Translation)
- RUS 300. Grammar and Communication *3.00*
- RUS 308. Introduction to Russian Civilization *3.00*
- RUS 315. Russian Phonetics *3.00*
- RUS 320. Russian Oral and Written Communication *3.00*
- RUS 400. Advanced Conversation *3.00*
- RUS 438. Studies in Russian Literature *3.00*

Students may include one course from the following:

- ECON 490. Special Studies in Economics *1.00 - 3.00*
- FL 490. ** Special Studies in Foreign Languages *1.00 - 4.00* (Russian)
- GEOG 490. Senior Research or Field Practicum *3.00*
- HIST 490. Special Studies *3.00*

Total: 18 Credit Hours

Special topics courses can be applied to the minor with approval of the program coordinator. Students may also earn credit by studying in a program in Russia or any of the former Soviet states.

Science, Technology and Society Minor

Dr. Shannon Conley-Phillips, **Coordinator**

Phone: (540) 568-2601

Email: conleysn@jmu.edu

Science, technology and society (STS) is an internationally recognized field of cross disciplinary study that integrates philosophical, social scientific and humanistic studies to better understand the natural and human-built world. The minor offers students the opportunity to critically examine science, technology and medicine as methods for reasoning about and acting upon the natural world as expressions of human cultures, past and present.

Students learn to scrutinize the ideas, reasoning, values, practices and artifacts embedded in the world they inhabit today. They explore how choices made within various historical, social, economic and political contexts sometimes influence the development of science, technology and medicine. They also see how the adoption and diffusion of ideas, artifacts and techniques can then influence individuals, society, politics and culture. Courses in this minor draw students together from diverse majors across the campus and encourage open inquiry into the role of science and technology in society.

The minor in STS is open to all undergraduate students at JMU. Courses taken to complete the STS minor can also be used to satisfy the student's major and General Education requirements.

The STS minor requires 18 credit hours with at least one course each from the history, sociology and ISAT courses listed.

Required Courses

Choose one: 3 Credit Hours

- ISAT 131. Technology, Science, and Society 3.00
- HIST 327. Technology in America 3.00
- SOCI 315. Technology and Society 3.00

Elective Courses

Choose five from at least four different programs/majors: 15 Credit Hours

- ANTH 360. Medical Anthropology 3.00 (C)
- CS 330. Societal and Ethical Issues in Computing 3.00
- GEOG 322. Agricultural Systems 3.00
- GEOG 325. Environmental Ethics 3.00
- GEOG 429. Sustainability: An Ecological Perspective 3.00
- or
- ISAT 429. Sustainability: An Ecological Perspective 3.00

- HIST 305*. History of Science and Christianity 3.00
- HIST 306*. A History of the Body in the West 3.00
- HIST 326. The Automobile in 20th Century America 3.00
- HIST 327. Technology in America 3.00
- HIST 404*. Science and Society in Early Modern Europe 3.00
- HIST 405. Travel and Exploration 3.00
- HIST 427. U.S. Environmental History 3.00
- HIST 443. Modern American Technology and Culture 3.00
- ISAT 231. Political Economy of Technology and Science 3.00
- ISAT 311. Role of Energy in Modern Society 3.00
- ISAT 411. Energy Economics and Policy 3.00
- ISAT 421. Environmental Policy & Regulation 3.00
- ISAT 456. Ethical, Legal, & Social Implications of Biotechnology 3.00

- ISAT 471. Transportation: Energy, Environment & Society 3.00
- ISAT 477. Complex Systems and How They Fail 3.00
- PHIL 396. Philosophy of Physics 3.00
- PHIL 397. Philosophy of Space and Time 3.00
- PHIL 398. Philosophy of Quantum Theory 3.00
- PHIL 410. Philosophy of Science 3.00
- SOCI 311. Sociology of the Environment 3.00
- SOCI 375. Medical Sociology 3.00

- WGSS 485. Gender Issues in Science 3.00
or
- ISAT 485. Gender Issues in Science 3.00

- WRTC 358. Writing About Science and Technology 3.00

- WRTC 416. Rhetoric of Environmental Science and Technology 3.00
or
- SCOM 465. Rhetoric of Environmental Science and Technology 3.00

- WRTC 458. Scientific and Medical Communication 3.00

Total: 18 Credit Hours

Special topics courses not listed can be applied to the minor with prior approval of the program coordinator.

Sport Communication Minor

Dr. Isaac Woo, **Coordinator**

Phone: (540) 568-3815

Email: woocw@jmu.edu

This minor consists of course work offered in communication studies, media arts and design, and kinesiology for students with an interest in sports media and communication.

Due to enrollment limitation in required courses, admission to JMU does not guarantee admission to the sport communication minor. Students interested in this program must apply for a limited number of spaces while first completing KIN 242 and SCOM 260. The Communication Studies, School of reviews applications for admission to the sport communication minor. Students should complete the application (available from the school website) and submit it by email to scom@jmu.edu. Students will receive an email acknowledging receipt of their application, which should be kept. Applications are due by November 15 (fall semester) and April 15 (spring semester). Students who have applied by these deadlines will be notified of the admission decision at the end of the semester in which they complete KIN 242 and SCOM 260. Admission is granted to the most qualified students as determined by their performance in these courses.

Students who are not admitted may file one additional application before the next regular academic year. Students reapplying must apply in two consecutive years of enrollment at the university. If a student reapplies after retaking KIN 242 and/or SCOM 260 (whether repeat or repeat/forgive), the school will look only at the highest grades earned when evaluating their second application.

Because of the curriculum sequence, it typically takes four consecutive semesters to complete the minor. Rising seniors typically cannot complete the minor by graduation. Some required courses are offered only one semester a year.

Once admitted, a student cannot retroactively apply more than nine hours of SCOM courses, including SCOM 260, to this minor.

This minor is open to any student at the university including SCOM majors, however, SCOM majors are limited to double counting no more than six credits to both their major and minor.

Required Courses

- KIN 242. Introduction to Sport Communication *3.00*
- KIN 243. Sport Communication Techniques: Broadcasting *3.00*
or
- SCOM 243. Sport Communication Techniques – Broadcast *3.00*
or
- SMAD 243. Sport Communication Techniques: Broadcasting *3.00*
- KIN 244. Sport Communication Techniques: Writing and Reporting *3.00*
or
- SMAD 244. Sport Communication Techniques – Written
or
- SMAD 244. Sport Communication Techniques: Writing and Reporting *3.00*
- SCOM 260. Introduction to Public Relations *3.00*
- SCOM 318. Practicum in Communication Studies *1.00 - 6.00*
- SCOM 365. Sports Public Relations *3.00*
- SCOM 464. Communication, Culture and Sports *3.00*

Choose one of the following: 2-3 Credit Hours

- KIN 304. History and Philosophy of Physical Education and Sport *2.00*
- KIN 329. Social Aspects of Sport *3.00*
- SCOM 348. Communication and Gender *3.00*
or
- WGSS 348. Communication & Gender *3.00*
- SCOM 342. Argument and Advocacy *3.00*
- SCOM 347. Communication, Diversity and Popular Culture *3.00*

Total: 23-24 Credit Hours

Substance Abuse Education Minor

Katherine Ott Walter, **Adviser**

Phone: (540) 568-8972

Email: ottwalmk@jmu.edu

This cross disciplinary substance abuse education minor provides the student with the foundational knowledge and skills necessary to assist communities in designing evidenced-based prevention/education programs to encourage healthy attitudes and behaviors towards alcohol, tobacco and other drugs. Course work in this minor will help prepare the student for the Certified Prevention Professionals-ATOD exam, which they can take after one year of prevention-related paid work experience and additional prevention-specific training. Students must complete 18 credit hours from the categories outlined below. Students must take one of the Alcohol, Tobacco and Other Drugs (ATOD) specific courses. The remaining 15 credits must be selected from the additional courses listed below, preferably one from each category. No more than three courses may be taken from a single subject area (PSYC, HTH, SOWK, etc.), and no more than three courses can count for both the student's major/additional minor and the substance abuse education minor.

Required Courses

Alcohol, Tobacco and Other Drugs (ATOD) (Must select one of the following courses): 3 Credit Hours

- HTH 378. The Use & Effects of Drugs 3.00
- SOWK 487. Special Topics 3.00¹
or
- FAM 487. Special Topics in Family Studies 3.00¹
or
- GERN 487. Special Topics in Gerontology 3.00¹
- PSYC 285. Drugs and Behavior 3.00

Select five courses from the list of courses below (No more than three courses may be taken from a single subject area, i.e., PSYC, HTH, SOWK, etc.): 15 Credit Hours

Prevention, Education and Service Delivery

- HTH 351. Health Behavior Change 3.00
- JUST 221. Social Justice Theories 3.00
- JUST 301. Advanced Level Special Topics in Justice Studies 3.00¹
- JUST 345. Restorative Justice 3.00
- PSYC 250. Introduction to Abnormal Psychology 3.00
- PSYC 308. Health Psychology 3.00
- PSYC 335. Abnormal Psychology 3.00
- SOWK 386. Youth Empowerment Strategies (Yes) 3.00
- SOWK 387. Working with Teens 3.00
- SOWK 487. Special Topics 3.00¹

Communication

- SCOM 370. Introduction to Health Communication 3.00
- SCOM 470. Health Communication Campaigns 3.00
- WRTC 484. Writing for Nonprofits 3.00

- WRTC 486. Writing in the Community 3.00
- WRTC 488. Writing in the Health Sciences 3.00

Community Organizing

- FAM 375. Grant Writing for Agencies 3.00
or
- GERN 375. Grant Writing for Agencies 3.00
or
- NPS 375. Grant Writing for Agencies 3.00
or
- SOWK 375. Grant Writing for Agencies 3.00

- NPS 300. Introduction to Nonprofits 3.00

Public Policy and Environmental Change

- PPA 359. Policy Analysis 3.00
- PPA 462. Social Welfare and Local Government Policy 3.00

- WRTC 326. Environmental Communication and Advocacy 3.00
or
- SCOM 354. Environmental Communication and Advocacy 3.00

- SOWK 335. Social Policy 3.00
- HTH 420. Global Perspectives on Alcohol and Drug Policies 3.00²

Planning and Evaluation

- HTH 458. Health Program Planning and Evaluation 3.00

Total: 18 Credit Hours

Footnotes

¹ When topics are minor related, to be approved by the coordinator.

² Offered in summer only.

Telecommunications Minor

Dr. Mohamed Aboutabl, **Adviser**

Phone: (540) 568-7589

Email: aboutams@jmu.edu

Website: <http://www.jmu.edu/cs/minors/telecom-minor/index.shtml>

The cross disciplinary minor in telecommunications is designed to augment the student's major program with a package of courses that will prepare the graduate to obtain a position as a telecommunication/network professional and fill a societal need in one of the fastest growing areas of technology.

The program is developed as a minor principally for three major programs: computer science, integrated science and technology (for students not in the telecommunications concentration), and computer information systems. However, the program is open to any undergraduate with some computer background and an interest in telecommunications.

The telecommunications minor will instill knowledge of:

- Telecommunication terminologies, standards, policies and procedures.
- Basics of data transmission, digital signal processes and signaling hierarchies.
- Architectures, communications protocols and components of LANs, WANs and internetworks.
- The TCP/IP and ATM protocol suites.
- Switching, routing and traffic management in inter-networked environments.
- Voice, video and data transmission over IP and ATM.
- Application development for the internet.
- Distributed object systems programming and management.

Students are encouraged to check prerequisites. At most, four courses can be used to satisfy both the telecommunications minor and a student's major requirements.

Required Courses

- ISAT 460. Tcp/Ip Networks 3.00
- CS 461. Internetworking 3.00
or
- ISAT 461. Internetworking 3.00

Choose one of the following: 3 Credit Hours

- CIS 320. Computing and Telecommunications Networks 3.00
- ISAT 360. Introduction to Networking & Security 3.00

Choose one of the following: 3-4 Credit Hours

- CIS 221. Principles of Programming 3.00
- ISAT 252. Programming and Problem Solving 3.00

Choose one of the following: 3 Credit Hours

- CS 458. Cyber Defense 3.00
- ISAT 462. Network Applications Development 3.00
or
- CS 462. Network Applications Development 3.00
- ISAT 465. Wireless Networking, Security and Forensics 3.00

Total: 18-19 Credit Hours

Urban and Regional Studies Minor

Dr. Henry A. Way, **Coordinator**

Phone: (540) 568-8186

Email: wayha@jmu.edu

The minor in urban and regional studies prepares students for careers or graduate training in government. While satisfying the B.A. or B.S. requirements of their chosen major, students may complement that major with a 24 credit hour minor in urban and regional studies drawn from the following courses.

Required Courses

- GEOG 376. Urban Geography 3.00
- POSC 360. Urban Politics 3.00
- ECON 475. Regional Economics 3.00

Choose from the following: 12 Credit Hours

Must be in a discipline other than the student's major.

- ECON 326. Public Finance 3.00
- ECON 340. Economics of Natural Resources 3.00
- GEOG 315. Field Studies in Geography 3.00

- GEOL 310 A - D. Environmental Impact 2.00 - 3.00, *repeatable to 6 credits*
or
- GEOG 310. Environmental Issues 1.00 - 4.00

- GEOL 430. Environmental Soil Science (2, 2) 3.00
- POSC 302. State & Local Gov 3.00
- POSC 495. Internship in Political Science 4.00
- SOCI 352. Birth, Death, Sex: Exploring Demography 3.00
- SOCI 361. Sociology of Organizations 3.00

Total: 24 Credit Hours

World Literature Minor

Dr. Debali Mookerjee-Leonard, **Coordinator**

Phone: (540) 568-3751

Email: mookerdx@jmu.edu

The cross disciplinary minor in world literature is designed for students who wish to extend their critical understanding of literature and other artistic productions beyond the confines of Anglo-America and offers them the opportunity to study literary and artistic productions from Africa, Asia, the Caribbean Islands, continental Europe, Latin America, the Middle East and a special interest area (Native America, African America, Asian America, Immigrant Britain). By offering a broad yet substantial

introduction to literature and other arts produced beyond their traditional experience, the minor provides students with a bridge to understanding new cultures and languages. It aims to equip students with the critical and analytical skills necessary to reflect upon and appreciate these artistic practices as well as to develop a clear understanding of social context and artistic expression by encouraging them to think outside the local and on a more global level. The minor provides a good foundation for students to meet the challenges of graduate studies in comparative literature, world cinema and cultural studies/history.

The minimum requirement for a minor in world literature is 18 hours. Six credit hours may be double-counted between the minor and the major or general education courses. In addition to the gateway course, ENG 239, students can take one 200-level course to count toward the minor. The English, Department of and the Foreign Languages, Literatures and Cultures, Department of (FLLC) offer a range of courses which will fulfill the minor. FLLC offers students the opportunity to study non-English language literatures from Europe often in the original language, while all courses in the English department are taught in English or in translation. Students can also take a maximum of two relevant courses from disciplines other than English and foreign languages, with the permission of the program coordinator. Students should consult the coordinator about new courses and appropriateness of the subject of special topics courses. The following courses may include several sections per term—ENG 221, ENG 222, ENG 302, ENG 368, ENG 383, ENG 385, ENG 405, ENG 410, ENG 412, ENG 423, ENG 466, HUM 200—and only certain sections will satisfy the minor requirement. Students electing this minor can acquire more information from the program coordinator regarding courses which will count toward the minor. Courses from disciplines other than English and foreign languages may be considered for credit with the prior approval of the coordinator.

Required Course: 3 Credit Hours

- ENG 239. Studies in World Literature [C2L] 3.00

Choose five of the following: 15 Credit Hours

- ARAB 307. A History of Islamic Civilization 600-1600 A.D. 3.00
- ARAB 308. Contemporary Islamic Civilization 3.00
- ARAB 339. Literatures of the Islamic World 600-1500 A.D. 3.00
- ARAB 385. The Arabian Nights 3.00
- ARAB 386. Arabic Fables and Short Stories 3.00
- ARAB 446. Special Topics in Arabic Literature 3.00
- ENG 221. Literature/Culture/Ideas [C2L] 3.00
- ENG 222. Genre(s) [C2L] 3.00
- ENG 260. Survey of African-American Literature [C2L] 3.00
- ENG 302. Special Topics in Literature and Language 3.00
- ENG 305. Mythology 3.00.
- ENG 306. The Bible as Literature 3.00
- ENG 358. Oral Literature 3.00
- ENG 360. Introduction to Ethnic American Literature 3.00
- ENG 361. African-American Fiction 3.00
- ENG 362. African-American Poetry 3.00
- ENG 363. Native American Literature 3.00
- ENG 364. Introduction to Asian-American Literature 3.00
- ENG 368. Women's Literature 3.00
- ENG 377. Introduction to African Literature 3.00
- ENG 378. Studies in South Asian Literature 3.00
- ENG 379. Literature and Empire 3.00

Professors

M. Hughes, H. McCartney, P. Sullivan

Associate Professors

A. Bodle, G. Font, S. Kang, K. Kavanagh, S. Mathur, J. Merritt, R. Wilson

Assistant Professors

C. Bahlmann Bollinger, S. Lupo, J. Myers, M. Sharifian, E. Thacker

Instructors

A. Berry, P. Kennedy, A. Loso, K. Shifflett

The Department of Early, Elementary, and Reading Education offers graduate and undergraduate programs in literacy, early, and elementary education. All programs include extensive fieldwork to ensure varied opportunities for experiences working with children and families. The Reading Center, a collection of current children's literature, supports all professional education licensure programs.

Education, Elementary Education, B.S.

The Elementary Education Program prepares candidates to teach students in grades PreK-6. Drawn from research and theories in child development, teaching and learning, the course work and field experiences prepare teacher candidates to employ a cross disciplinary approach to instruction that reflects an understanding of the diverse nature of learners and their families.

The JMU Elementary Education Program seeks to foster in its candidates an empathic understanding of the ways that children are affected by social contexts and by the children's own abilities/disabilities; the knowledge and pedagogical skills to support each child's right to success; and belief in the value of each child. Our candidates are guided in:

- Critically challenging conventional wisdom and common practices to identify hidden assumptions and activities that constrain or privilege some at the expense of others.
- Learning to ask questions and developing an inquiring approach motivated by the desire to understand the world in its myriad complexities.
- Reflecting deeply on and constructing positive relationships with others.
- Expressing knowledge, skills and attitudes in ways that communicate with others and provide a forum for the creative and academic expression of the profession and the self.
- Developing an appreciation for the global connection of all humanity and our interdependence on the finite, natural resources of the earth.
- Experiencing life among people whose social contexts are unlike the candidates' own to broaden and deepen respect for and sensitivity to various cultures and social contexts.

- Knowing and appreciating the process of human unfolding throughout the cycles of life from conception onward, particularly throughout the period of childhood and preadolescence.
- Valuing the literacies and literate backgrounds of all learners to develop equitable, inclusive instruction that honors diverse learners at all developmental phases.
- Reflecting critically on the ways we embody and enact a sustainable sense of self.
- Building on interdisciplinary connections among content areas to create inclusive, responsive and effective instruction for all learners.

The courses in the Elementary Education program are organized to integrate academic content with pedagogical practice throughout the major. Field experiences are provided along with course work to enable candidates to apply their knowledge in a variety of settings. Candidates must be fully accepted into teacher education to begin the ELED course work in the third year.

Assessment occurs during each semester, and candidate performance is reviewed at the end of each semester. Candidates must demonstrate satisfactory performance before moving on to the next semester. Satisfactory performance includes a "C" or higher in all education course work and an overall 2.5 GPA, demonstration of professional behaviors, and acceptable performance in practica and on key assessments.

Candidates in this program must meet with the head of the Department of Early, Elementary and Reading Education early during the first year or as soon, thereafter, as possible to obtain information concerning the requirements for admission to teacher education and to be assigned an adviser. Candidates should note that they must be fully admitted to teacher education prior to registering for the courses offered during Year 3 of the Elementary Education program. Candidates should also note that actual requirements may differ from the catalog requirements listed because of changes enacted by the Virginia Department of Education or other accrediting agencies after the catalog copy is approved. Therefore, it is especially important for candidates to confer with their education advisers on a regular basis. Completion of the Elementary Education major leads to a Virginia teaching license with an endorsement in PK-6 Elementary Education. To be recommended for licensure, all candidates must meet the following requirements:

- Complete General Education requirements.
- Complete the Elementary Education pre-professional program.
- Complete the disciplinary courses required for the elementary education degree.
- Meet all admission and retention criteria for teacher education including satisfactory scores on the VCLA, Praxis Core Math, RVE and Praxis Elementary Multiple Subjects tests.
- Meet admission requirements for the Elementary Education program.
- Meet performance and behavior standards as indicated by ratings on the program Professional Dispositions Checklist.

Elementary Education Degree Requirements

Required Courses

- General Education *41 Credit Hours*
- Scientific Literacy (in addition to General Education) *3 Credit Hours*
- Quantitative Reasoning (in addition to General Education) *3 Credit Hours*
- Major Requirements *36 Credit Hours*
- Licensure Requirements *28 Credit Hours*
- Liberal Studies Minor *33 Credit Hours*

Total: 122 Credit Hours

Elementary Education Major Requirements

Required General Education courses: 18 credit hours

Students majoring in Elementary Education will be required to complete JMU General Education with additional courses related to Bachelor of Science requirements (Quantitative and Scientific Literacy). Given required VDOE competencies associated with PK-6 teacher licensure, students will be required to enroll in the following courses:

- Cluster Two [C2HQC] HIST 101 or HIST 102;
- Cluster Three [C3QR] MATH 107, [C3PP] ISCI 172, [C3NS] ISCI 171, [C3 L] ISCI 173;
- Cluster Four [C4AE] HIST 225 or POSC 225, [C4GE] ANTH 195 or GEOG 200;
- and Cluster Five [C5SD] PSYC 160.

Students will also be required to complete MATH 108 and MATH 207 to meet VDOE competencies.

Elementary Education Core Requirements

- ECED 372. Introduction to Early Childhood Education *3.00*
- EDUC 165. Social Foundations of Exceptionalities *3.00*
- EDUC 300. Foundations of American Education *3.00*
- ELED 208. Child Development: Birth Through Adolescence *3.00*
- ELED 271. Practicum in Early and Elementary Education *1.00-2.00*
- ELED 310. Diversity in Elementary Education with Service Learning *3.00*

Total: 16 Credit Hours

Elementary Education Disciplinary Requirements

- ELED 321. Practicum with a Focus on Learners and Learning *1.00-3.00*
- ELED 322. Practicum with a Focus on Curriculum Integration and Guiding Behavior *1.00-3.00*
- ELED 332. Children and Science *3.00*
- ELED 334. Children and Social Studies *3.00*
- ELED 343. Children and Mathematics II *3.00*
- LED 366. Early Literacy Development and Acquisition *3.00*
- ELED 433. Children and Mathematics: Number, Operations, Algebraic and Geometric Reasoning *3.00*
- LED 436. Literacy Learning in the Elementary Grades *3.00*

Total: 20 Credit Hours

Licensure Requirements

- ELED 450. Planning Instruction and Assessment *3.00*
- ELED 455. Home, School, Communities *3.00*
- ELED 480. Student Teaching in Elementary Education *8.00*
(taken twice for a total of *16.00 Credit Hours*)
- EXED 485. Systematic Behavioral Support and Interventions *3.00*
- LED 462. Literacy Across the Curriculum *3.00*

Total: 28 Credit Hours

Recommended Schedule for Elementary Education Majors

First Year - Fall

- SCOM 121. Fundamental Human Communication: Presentations [C1HC] 3.00
or
- SCOM 122. Fundamental Human Communication: Individual Presentations [C1HC] 3.00
or
- SCOM 123. Fundamental Human Communication: Group Presentations [C1HC] 3.00

- GEOG 200. Geography: The Global Dimension [C4GE] 3.00
or
- ANTH 195. Cultural Anthropology [C4GE] 3.00 (C, R)

- ISCI 171. Earth and Planetary Science for Teachers [C3NS] 3.00
- PSYC 160. Life Span Human Development [C5SD] 3.00
- MATH 107. Fundamentals of Mathematics I [C3QR] 3.00

Total: 15 Credit Hours

First Year - Spring

- HTH 100. Personal Wellness [C5W] 3.00
or
- KIN 100. Lifetime Fitness & Wellness (2,2) [C5W] 3.00

- ISCI 172. Physical Science for Teachers [C3PP] 3.00
- MATH 108. Fundamentals of Mathematics II 3.00
- WRTC 103. Rhetorical Reading and Writing [C1W] 3.00

Choose one of the following Cluster One Critical Thinking courses:

- BUS 160. Business Decision Making in a Modern Society [C1CT] 3.00
- HIST 150. Critical Issues in Recent Global History [C1CT] 3.00
- ISAT 160. Problem Solving Approaches in Science and Technology [C1CT] 3.00
- PHIL 120. Critical Thinking [C1CT] 3.00
- PHIL 150. Ethical Reasoning [C1CT] 3.00
- SMAD 150. Mediated Communication: Issues and Skills [C1CT] 3.00

Total: 15 Credit Hours

Second Year - Fall

- EDUC 300. Foundations of American Education 3.00

- HIST 101. World History to 1500 [C2HQC] 3.00

or

- HIST 102. World History Since 1500 [C2HQC] 3.00

Choose one of the following Cluster Two Visual and Performing Arts courses:

- ART 200. Art in General Culture [C2VPA] 3.00
- ARTH 205. Survey of World Art I: Prehistoric to Renaissance [C2VPA] 3.00
- ARTH 206. Survey of World Art II: Renaissance to Modern [C2VPA] 3.00
- MUS 200. Music in General Culture [C2VPA] 3.00
- MUS 203. Music in America [C2VPA] 3.00
- MUS 206. Introduction to Global Music [C2VPA] 3.00
- THEA 210. Introduction to Theatre [C2VPA] 3.00

Choose one of the following Cluster Two Literature courses:

- ENG 221. Literature/Culture/Ideas [C2L] 3.00
- ENG 222. Genre(s) [C2L] 3.00
- ENG 235. Survey of English Literature: From Beowulf to the Eighteenth Century [C2L] 3.00
- ENG 236. Survey of English Literature: Eighteenth Century to Modern [C2L] 3.00
- ENG 239. Studies in World Literature [C2L] 3.00
- ENG 247. Survey of American Literature: From the Beginning to the Civil War [C2L] 3.00
- ENG 248. Survey of American Literature: From the Civil War to the Modern Period [C2L] 3.00
- ENG 260. Survey of African-American Literature [C2L] 3.00

Choose one of the following Cluster Four American Experience courses:

- HIST 225. U.S. History [C4AE] 4.00
- POSC 225. U.S. Government [C4AE] 4.00

Total: 16 Credit Hours

Second Year - Spring

- ELED 271. Practicum in Early and Elementary Education 1.00-2.00
- ECED 372. Introduction to Early Childhood Education 3.00
- ELED 208. Child Development: Birth Through Adolescence 3.00
- ELED 310. Diversity in Elementary Education with Service Learning 3.00
- ISCI 173. Life and Environmental Science for Teachers [C3L] 3.00
- MATH 207. Fundamentals of Mathematics III 3.00¹

Total: 16 Credit Hours

¹ Part of the minor in IDLS.

Third Year - Fall

- Minor in IDLS *3.00 Credit Hours*
- EDUC 165. Social Foundations of Exceptionalities *3.00*
- ELED 321. Practicum with a Focus on Learners and Learning *1.00-3.00*
- ELED 332. Children and Science *3.00*
- ELED 433. Children and Mathematics: Number, Operations, Algebraic and Geometric Reasoning *3.00*
- LED 366. Early Literacy Development and Acquisition *3.00*

Total: 16 Credit Hours

Third Year - Spring

- Minor in IDLS *6.00 Credit Hours*
- ELED 322. Practicum with a Focus on Curriculum Integration and Guiding Behavior *1.00-3.00*
- ELED 334. Children and Social Studies *3.00*
- ELED 443. Children and Mathematics II *3.00*
- LED 436. Literacy Learning in the Elementary Grades *3.00*

Total: 16 Credit Hours

Fourth Year - Fall

- ELED 450. Planning Instruction and Assessment *3.00*
- ELED 480. Student Teaching in Elementary Education *8.00*
- LED 462. Literacy Across the Curriculum *3.00*

Total: 14 Credit Hours

Fourth Year - Spring

- ELED 455. Home, School, Communities *3.00*
- ELED 480. Student Teaching in Elementary Education *8.00*
- EXED 485. Systematic Behavioral Support and Interventions *3.00*

Total: 14 Credit Hours

Total: 122 Credit Hours

Elementary Education, Pre-Kindergarten Through Sixth Grade Master's Level Licensure

Elementary Education

Pre-Kindergarten Through Sixth Grade Master's Level Licensure Program

The Elementary Education Program prepares candidates to teach students in grades PreK-6. Drawn from research and theories in child development, teaching, and learning, the course work and field experiences prepare teacher candidates to employ a cross disciplinary approach to instruction that reflects an understanding of the diverse nature of learners and their families.

The JMU elementary program seeks to foster in its candidates an empathic understanding of the ways that children are affected by social contexts and by the children's own abilities/disabilities; the knowledge and pedagogical skills to support each child's right to success; and belief in the value of each child. Our candidates are guided in:

- Critically challenging conventional wisdom and common practices to identify hidden assumptions and activities that constrain or privilege some at the expense of others.
- Learning to ask questions and developing an inquiring approach motivated by the desire to understand the world in its myriad complexities.
- Reflecting deeply on and constructing positive relationships with others.
- Expressing knowledge, skills, and attitudes in ways that communicate with others and provide a forum for the creative and academic expression of the profession and the self.
- Developing an appreciation for the global connection of all humanity and our interdependence on the finite, natural resources of the earth.
- Experiencing life among people whose social contexts are unlike the candidates' own to broaden and deepen respect for and sensitivity to various cultures and social contexts.
- Knowing and appreciating the process of human unfolding throughout the cycles of life from conception onward, particularly throughout the period of childhood.

The courses in the Elementary Education program are sequentially organized throughout the junior and senior years and continue in the graduate program. Field experiences are provided along with course work to enable candidates to apply their knowledge in a variety of settings. Candidates must be accepted in teacher education to begin the ELED course work.

Assessment occurs each semester, and performance is reviewed at the end of each semester. Candidates must demonstrate satisfactory performance before moving on to the next semester. Satisfactory performance includes a "C" or higher in all education course work and an overall 2.5 GPA, demonstration of professional behaviors, and acceptable performance in practica and on key assessments.

Candidates in this program must meet with the head of the Department of Early, Elementary and Reading Education to declare the minor in elementary education, be assigned a date to start the ELED courses, and be assigned an adviser in elementary education. A limited number of candidates can start the ELED course work each semester.

Student Teaching

Candidates must apply to student teach in the fall before their graduate year. At that time, students must be fully accepted into teacher education, be admitted unconditionally to graduate school and have a 3.0 graduate GPA.

Recommended Schedule for Elementary Education

Students should take General Education, IDLS requirements, EDUC 300 and EXED 200 during their first and second years.

Third Year

- ECED 372. Introduction to Early Childhood Education *3.00*
- ELED 208. Child Development: Birth Through Adolescence *3.00*
- ELED 310. Diversity in Elementary Education with Service Learning *3.00*
- ELED 321. Practicum with a Focus on Learners and Learning *1.00-3.00*
- LED 366. Early Literacy Development and Acquisition *3.00*
- Major requirements/Electives *15 Credit Hours*

Total: 30 Credit Hours

Fourth Year

- ELED 322. Practicum with a Focus on Curriculum Integration and Guiding Behavior *1.00-3.00*
- ELED 332. Children and Science *3.00*
- ELED 433. Children and Mathematics: Number, Operations, Algebraic and Geometric Reasoning *3.00*
- ELED 334. Children and Social Studies *3.00*
- LED 436. Literacy Learning in the Elementary Grades *3.00*
- Major requirements/Electives *15 Credit Hours*

Total: 30 Credit Hours

Graduate Courses

Candidates beginning the graduate portion of the program must meet all Graduate School requirements and criteria for admission; it is expected that students will complete the admission process during their senior year. In addition, students must meet all graduate level graduation requirements.

Courses

- ELED 510. Creativity and the Arts *3 Credit Hours*
- ELED 533. Children and Math II: Data, Chance, and Space *3 Credit Hours*
- ELED 570. Planning, Instruction, and Assessment in the Elementary Education Curriculum *3 Credit Hours*
- ELED 621. Practicum with a Focus on Inquiry *2 Credit Hours*
- ELED 622. Seminar: Inquiry Projects *1 Credit Hours*
- ELED 632. Inquiry in Elementary Education *3 Credit Hours*
- ELED 641. Families, Schools, and Communities *2 Credit Hours*
- ELED 690. Internship in Teaching *8 Credit Hours*
- READ 590. Reading Across the Curriculum *3 Credit Hours*
- Elective *3 Credit Hours*

Total: 31 Credit Hours

Economics, Department of

Dr. William Wood, **Department Head**

Phone: (540) 568-3243

Email: woodwc@jmu.edu

Location: Zane Showker Hall, Room 434

Website: <http://www.jmu.edu/cob/economics>

Professors

E. Ahmed, J. Doyle, S. Elwood, R. Horn, S. Milliman, B. Rosser, W. Wood

Associate Professors

V. Bhatt, N. Cavusoglu, W. Grant, A. Neveu, A. Smith, J. Subrick

Assistant Professor

B. Hamilton, S. Hussain, P. Mutreja, A. Naumenko

Lecturers

P. Heap, Z. Gochenour, M. Sameni

Mission

The Department of Economics is committed to students' intellectual development by fostering an understanding and appreciation of economic forms of explanation and their relationships to other social sciences. Economics faculty members are dedicated to sound and effective pedagogy, to scholarship of the highest quality and to outreach to the local and business community.

The department provides an intellectual foundation for the appreciation and understanding of economic theory and policy. This foundation is developed within a broader educational perspective that stresses the importance of imaginative thinking, free inquiry and the pursuit of life-long learning. In this way, the program prepares students with the economic literacy necessary to cope with the challenges inherent in a world of accelerating change.

Goals

- Help students develop analytical and critical thinking skills.
- Promote cross disciplinary forms of instruction.
- Seek continuous improvement in the quality of classroom instruction.
- Serve the community through outreach services.
- Help students pursue careers and additional education.

Marketable Skills

- Analytical thinking capabilities highly valued by business, government and the nonprofit sector.
- Writing and research skills applicable to a wide variety of careers.
- Statistical and econometric skills used in business and finance.
- Preparation in critical thinking valued by graduate schools, including law, business, and arts and sciences.
- Analytical skills valued by employers for internships in business, government and consulting.

Co-curricular Activities and Organizations

- Economics Club (open membership)
- Omicron Delta Epsilon (national honor society in economics)

Admission to the Major

Students wishing to pursue a B.A., B.B.A. or B.S. degree program in economics must be formally admitted to the program in order to enroll in the required core courses ECON 331, ECON 332 and ECON 385, which all require grades of "C" or better in their prerequisite courses. In order to be admitted as either a B.A. or B.S. candidate, the student must have at least three semesters remaining at JMU to complete the degree requirements. In order to be accepted as a B.B.A. candidate, the student must also meet all of the College of Business admission requirements (described in the College of Business section of the catalog).

To declare economics as a major, students must apply online through the JMU registrar's website and have an interview with the department head.

Credit by Examination

Credit in ECON 200 will be granted to students who achieve a grade of 4 or 5 on the Advanced Placement Test in Macroeconomics administered by the Educational Testing Service. Credit in ECON 201 will be granted to students who achieve a grade of 4 or 5 on the Advanced Placement Test in Microeconomics.

Economics Minor

Minor Requirements

Economics Minor

The minimum requirement for a minor in economics is 18 credit hours in economics, including ECON 200 and ECON 201. At least six credit hours of the remaining twelve credit hours must be 300- or 400- level economics courses. Students may not receive credit toward the minor in economics for both ECON 270 and ECON 370.

Credit by Examination

Credit in ECON 200 will be granted to students who achieve a grade of 4 or 5 on the Advanced Placement Test in Macroeconomics administered by the Educational Testing Service. Credit in ECON 201 will be granted to students who achieve a grade of 4 or 5 on the Advanced Placement Test in Microeconomics.

Preparation for Graduate Study in Economics

While not formal requirements, students intending to pursue graduate work in economics are encouraged to select as many of the following courses as possible:

Courses

- ECON 384. Mathematical Economics 3.00
- ECON 430. Monetary Theory 3.00
- ECON 431. Advanced Microeconomic Theory 3.00
- ECON 432. Advanced Macroeconomics 3.00

- MATH 235. Calculus I [C3QR] 4.00
- MATH 236. Calculus II 4.00
- MATH 237. Calculus III 4.00
- MATH 238. Linear Algebra with Differential Equations 4.00
- MATH 336. Elementary Differential Equations 3.00
- PHIL 250. Introduction to Symbolic Logic 3.00

Economics, B.A.

Degree and Major Requirements

Degree Requirements

Economics majors choose from a B.A., B.S. or B.B.A. degree. The B.A. and B.S. degrees are traditional liberal arts degrees that lead to a variety of career and graduate school options; the B.B.A. is designed to prepare students for careers in business.

The minimum requirement for a B.A. degree in economics is 33 credit hours of economics, including 18 credit hours of core courses and 15 credit hours of electives. It is also necessary for the student to complete the foreign language and philosophy requirements for a B.A. degree as well as complete the General Education program.

Required Courses

- General Education 41 Credit Hours ¹
- Foreign Language classes (intermediate level required) 0-14 Credit Hours ²
- Philosophy course(s) (in addition to General Education courses) 3 Credit Hours
- Major requirements (listed below) and electives 62-76 Credit Hours

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² The foreign language requirement may be satisfied by successful completion of the second semester of the intermediate level of the student's chosen language (typically 232), or by placing out of that language through the Department of Foreign Language, Literatures and Cultures' placement test.

Major Requirements

Required Economics Courses

- ECON 200. Introduction to Macroeconomics [C4GE] 3.00
- ECON 201. Introduction to Microeconomics 3.00
- ECON 331. Intermediate Microeconomic Theory 3.00
- ECON 332. Intermediate Macroeconomic Theory 3.00
- ECON 385. Econometrics 3.00
- ECON 488. Senior Capstone Seminar in Economics 3.00

- Economics electives (at least six credits must be at the 400 level, not including ECON 488, ECON 490 or ECON 499A) *15 Credit Hours*

Total: 33 Credit Hours

Additional Information

To advance to the core required classes (ECON 331, ECON 332 and ECON 385), students must complete all prerequisites with a grade of "C" or better. Then students need to complete ECON 331, ECON 332 and ECON 385 with a grade of "C" or better to be eligible for graduation.

Recommended Schedule for B.A. in Economics Majors

First Two Years

During the first two years, students should complete:

- Most of the General Education program
- ECON 201. Introduction to Microeconomics *3.00*
- ECON 200. Introduction to Macroeconomics [C4GE] *3.00*
- COB 191. Business Analytics I *3.00*

Choose one of the following:

- MATH 205. Introductory Calculus I [C3QR] *3.00*
- MATH 231. Calculus with Functions I [C3QR] *3.00*
- MATH 235. Calculus I [C3QR] *4.00*
- ISAT 151. Topics in Applied Calculus in ISAT [C3QR] *4.00*

Additional Information

Students are encouraged to take ECON 331 and/or ECON 332 in their sophomore year, which can only be taken once the prerequisites of ECON 200, ECON 201 and the prerequisite math course are completed.

Third and Fourth Years

B.A. economics majors should complete ECON 331, ECON 332, and preferably ECON 385 by the end of their junior year. While most majors will complete the 400-level requirements in economics during their senior year, students may take a 400-level course during their junior year if the prerequisite for the course has been met. ECON 488 should be taken during the senior year.

Economics, B.B.A.

Degree and Major Requirements

Economics majors choose from a B.A., B.S. or B.B.A. degree. The B.A. and B.S. degrees are traditional liberal arts degrees that lead to a variety of career and graduate school options; the B.B.A. is designed to prepare students for careers in business.

Degree Requirements

The B.B.A. degree in economics requires a minimum of 120 credit hours of undergraduate work.

The minimum requirement for a B.B.A. degree in economics is 33 credit hours of economics including 18 credit hours of core courses and 15 credit hours of electives. B.B.A. students also complete the core business requirements as well as complete the General Education program.

Required Courses

- B.B.A. core courses *45-46 Credit Hours*¹
- Economics major requirements (minus overlapping B.B.A. requirements) *27 Credit Hours*
- General Education courses *41 Credit Hours*²
- Electives *6-7 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ Up to seven credit hours of core requirements in economics and calculus may also be taken for General Education credit. Students who take the General Education packages and courses recommended by the College of Business will have only 39 credit hours of additional B.B.A. core requirements.

² The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

Major Requirements

Required Economics Courses

- ECON 200. Introduction to Macroeconomics [C4GE] *3.00*
- ECON 201. Introduction to Microeconomics *3.00*
- ECON 331. Intermediate Microeconomic Theory *3.00*
- ECON 332. Intermediate Macroeconomic Theory *3.00*
- ECON 385. Econometrics *3.00*
- ECON 488. Senior Capstone Seminar in Economics *3.00*
- Economics electives (at least six credits must be at the 400 level, not including ECON 488, ECON 490 or ECON 499A) *15 Credit Hours*

Total: 33 Credit Hours

Additional Information

Students need to complete ECON 331, ECON 332 and ECON 385 with a grade of "C" or better.

B.B.A. Core Component

B.B.A. Lower-Level Core Component

B.B.A. majors must complete all of the B.B.A. core components as part of their degree program. The following courses comprise the B.B.A. Lower-Level Core Component:

- COB 191. Business Analytics I 3.00¹
- COB 202. Interpersonal Skills 3.00
- COB 204. Computer Information Systems 3.00
- COB 241. Financial Accounting 3.00
- COB 242. Managerial Accounting 3.00^{4,5}
- COB 291. Business Analytics II 3.00²
- ECON 200. Introduction to Macroeconomics [C4GE] 3.00
- ECON 201. Introduction to Microeconomics 3.00

- MATH 205. Introductory Calculus I [C3QR] 3.00³
or
- MATH 235. Calculus I [C3QR] 4.00³

B.B.A. Upper-Level Core Component

The following courses comprise the B.B.A. Upper-Level Core Component:

- COB 300A. Integrative Business: Management 3.00^{5,6}
- COB 300B. Integrative Business: Finance 3.00^{5,6}
- COB 300C. Integrative Business: Operations 3.00^{5,6}
- COB 300D. Integrative Business: Marketing 3.00^{5,6}
- COB 318. Legal and Ethical Environment of Business 3.00⁷
- COB 487. Strategic Management 3.00⁸

Footnotes

¹ MATH 220 may be substituted for COB 191.

² COB 191 or equivalent and MATH 205 or equivalent are prerequisites for COB 291.

³ Calculus is required but not used in calculating the B.B.A. core GPA. MATH 235 is preferred for Finance majors.

⁴ COB 241 must be taken before COB 242.

⁵ COB 242 is a prerequisite for COB 300 but is not used in calculating the B.B.A. core GPA.

⁶ All four COB 300 courses must be taken during the same semester.

⁷ COB 300 is a prerequisite or corequisite for COB 318. COB 318 is a prerequisite for COB 487.

⁸ COB 487 must be taken during the senior year.

Recommended Schedule for B.B.A. in Economics Majors

First Two Years

During the first two years, students should complete:

The 30-31 hour, lower-division B.B.A. core curriculum (failing to complete these courses before the first semester of the junior year could delay admission to the degree program and enrollment in COB 300A/COB 300B/COB 300C/COB 300D).

- Most of the General Education curriculum

- ECON 200. Introduction to Macroeconomics [C4GE] 3.00
- ECON 201. Introduction to Microeconomics 3.00
- COB 191. Business Analytics I 3.00

Choose one of the following:

- MATH 205. Introductory Calculus I [C3QR] 3.00
- MATH 231. Calculus with Functions I [C3QR] 3.00
- MATH 235. Calculus I [C3QR] 4.00
- ISAT 151. Topics in Applied Calculus in ISAT [C3QR] 4.00

Third and Fourth Years

B.B.A. economics majors should take COB 300A, COB 300B, COB 300C, COB 300D before the spring semester of their junior year and complete ECON 331, ECON 332, and preferably ECON 385 by the end of their junior year.

While most majors will complete the 400-level requirements in economics during their senior year, students may take a 400-level course during their junior year if the prerequisite for the course has been met. ECON 488 should be taken during the senior year.

Economics, B.S.

Degree and Major Requirements

Economics majors choose from a B.A., B.S. or B.B.A. degree. The B.A. and B.S. degrees are traditional liberal arts degrees that lead to a variety of career and graduate school options; the B.B.A. is designed to prepare students for careers in business.

Degree Requirements

The minimum requirement for a B.S. degree in economics is 33 credit hours of economics including 18 credit hours of core courses and 15 credit hours of electives. It is also necessary for the student to complete the quantitative and scientific literacy requirements for a B.S. degree as well as complete the General Education program.

Required courses

- General Education *41 Credit Hours*¹
- Quantitative requirement *3 Credit Hours*²
- Scientific Literacy requirement *3-4 Credit Hours*²
- Major requirements (listed below) and electives *72-73 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² In addition to course work taken to fulfill General Education requirement.

Major Requirements

Required Economics Courses

- ECON 200. Introduction to Macroeconomics [C4GE] 3.00
- ECON 201. Introduction to Microeconomics 3.00
- ECON 331. Intermediate Microeconomic Theory 3.00
- ECON 332. Intermediate Macroeconomic Theory 3.00
- ECON 385. Econometrics 3.00
- ECON 488. Senior Capstone Seminar in Economics 3.00
- Economics electives (at least six credits must be at the 400 level, not including ECON 488, ECON 490 or ECON 499A) 15 Credit Hours

Total: 33 Credit Hours

Additional Information

To advance to the core required classes (ECON 331, ECON 332 and ECON 385), students must complete all prerequisites with a grade of "C" or better. Then students need to complete ECON 331, ECON 332 and ECON 385 with a grade of "C" or better to be eligible for graduation.

Recommended Schedule for B.S. in Economics Majors

First Two Years

During the first two years, students should complete:

- Most of the General Education program
- ECON 201. Introduction to Microeconomics 3.00
- ECON 200. Introduction to Macroeconomics [C4GE] 3.00
- COB 191. Business Analytics I 3.00

Choose one of the following:

- MATH 205. Introductory Calculus I [C3QR] 3.00
- MATH 231. Calculus with Functions I [C3QR] 3.00
- MATH 235. Calculus I [C3QR] 4.00
- ISAT 151. Topics in Applied Calculus in ISAT [C3QR] 4.00

Additional Information

Students are encouraged to take ECON 331 and/or ECON 332 in their sophomore year, which can only be taken once the prerequisites of ECON 200, ECON 201 and the prerequisite math course are completed.

Third and Fourth Years

B.S. economics majors should complete ECON 331, ECON 332, and preferably ECON 385 by the end of their junior year. While most majors will complete the 400-level requirements in economics during their senior year, students may take a 400-level course during their junior year if the prerequisite for the course has been met. ECON 488 should be taken during the senior year.

Economics, Environmental and Natural Resource Economics Concentration, B.A.; B.B.A.; B.S.

Concentration in Environmental and Natural Resource Economics

Required Courses

- ECON 200. Introduction to Macroeconomics [C4GE] 3.00
- ECON 201. Introduction to Microeconomics 3.00
- ECON 305. Environmental Economics 3.00
- ECON 331. Intermediate Microeconomic Theory 3.00
- ECON 332. Intermediate Macroeconomic Theory 3.00
- ECON 340. Economics of Natural Resources 3.00
- ECON 385. Econometrics 3.00
- One 200- or 300-level economics elective 3 *Credit Hours*
 - Two 400-level economics elective 6 *Credit Hours*
- ECON 488. Senior Capstone Seminar in Economics 3.00
- ECON 490. Special Studies in Economics 1.00 - 3.00
- (1 Credit ECON 490 is required)

Total: 34 Credit Hours

Option A or Option B

In addition, students must choose Option A or Option B.

Option A

For students with specific interests in forests, fisheries and wildlife: 12 *Credit Hours*

- BIO 140. Foundations of Biology I (3,3) [C3NS] 4.00
- Choose one of the following (serves as the prerequisite to BIO 250):
- BIO 150. Foundations of Biology II (3,3) 4.00
- GEOL 110. Physical Geology [C3NS] 3.00 plus GEOL 110L. Physical Geology Laboratory [C3NS] 1.00
- GEOG 210. Physical Geography (2, 2) 4.00
- ISAT 112. Environmental Issues in Science and Technology (2,3) [C3PP] 4.00
- BIO 250. Quantitative Ecology and Evolution (3,3) 4.00

Total: 46 Credit Hours

Option B

For students interested in pollution prevention and control: *9-10 Credit Hours*

Choose one of the following: (3-4 credits)

- ISAT 112. Environmental Issues in Science and Technology (2,3) [C3PP] 4.00
- GEOL 115. Earth Systems and Climate Change [C3NS] 3.00
- GEOG 210. Physical Geography (2, 2) 4.00

Choose one of the following: (3 credits)

- GEOG 325. Environmental Ethics 3.00
- GEOG 429. Sustainability: An Ecological Perspective 3.00
or
- ISAT 429. Sustainability: An Ecological Perspective 3.00

Choose one of the following: (3-4 credits)

- ISAT 320. Fundamentals of Environmental Science & Technology I 4.00
- ISAT 321. Fundamentals of Environmental Science & Technology II 3.00

Total: 43-44 Credit Hours

Economics, Financial Economics Concentration, B.A.; B.B.A.; B.S.

Concentration in Financial Economics

The minimum requirement for a B.A., B.S. or B.B.A. degree in economics with a concentration in financial economics is 27 credit hours of required economics courses and 12 credit hours of required finance courses (in addition to previous requirements).

Required Courses

- ECON 200. Introduction to Macroeconomics [C4GE] 3.00
- ECON 201. Introduction to Microeconomics 3.00
- ECON 331. Intermediate Microeconomic Theory 3.00
- ECON 332. Intermediate Macroeconomic Theory 3.00
- ECON 372. International Finance and Payments 3.00
- ECON 385. Econometrics 3.00
- ECON 430. Monetary Theory 3.00
- ECON 488. Senior Capstone Seminar in Economics 3.00
- Economics elective (400 level, not including ECON 490, ECON 499A) 3 Credit Hours
- FIN 301. Principles of Finance 3.00 (only if not completing COB 300)
- FIN 360. Analytical Methods in Finance 3.00
- FIN 371. Principles of Investments 3.00
- FIN 380. Elemental and Derivative Securities Analysis 3.00

Total: 36-39 Credit Hours

Economics, International Economics Concentration, B.A.; B.B.A.; B.S.

Concentration in International Economics

Students who elect a major in economics with a concentration in international economics are required to complete the following courses:

Required International Economics Courses

- ECON 200. Introduction to Macroeconomics [C4GE] 3.00
- ECON 201. Introduction to Microeconomics 3.00
- ECON 331. Intermediate Microeconomic Theory 3.00
- ECON 332. Intermediate Macroeconomic Theory 3.00
- ECON 370. International Trade and Trade Policies 3.00

- ECON 372. International Finance and Payments 3.00
or
- FIN 372. International Finance and Payments 3.00

- ECON 385. Econometrics 3.00
- ECON 488. Senior Capstone Seminar in Economics 3.00

Choose two of the following: 6 Credit Hours

- ECON 312. Comparative Economic Systems 3.00
- ECON 365. Economic Development 3.00

Two 400-level economics electives: 6 Credit Hours

Total: 36 Credit Hours

Additional Information

In addition, students completing this course of study must have a genuine international experience (such as an internship or semester abroad) and must complete a foreign language through the civilization course, including all of the prerequisites for that course.

Economics, Political Economy Concentration, B.A.; B.B.A.; B.S.

Concentration in Political Economy

Students who elect a major in economics with a concentration in political economy are required to complete the following courses.

Required Political Economics Courses

- ECON 200. Introduction to Macroeconomics [C4GE] 3.00
- ECON 201. Introduction to Microeconomics 3.00
- ECON 331. Intermediate Microeconomic Theory 3.00
- ECON 332. Intermediate Macroeconomic Theory 3.00
- ECON 385. Econometrics 3.00
- ECON 488. Senior Capstone Seminar in Economics 3.00

Choose four of the following: 12 Credit Hours

- ECON 312. Comparative Economic Systems 3.00
- ECON 326. Public Finance 3.00
- ECON 327. Game Theory 3.00
- ECON 405. Political Economy 3.00
- ECON 426. Theory of Public Choice 3.00

Two 400-level economics electives: 6 Credit Hours

(Can include ECON 405 and/or ECON 426)

Total: 36 Credit Hours

Economics, Quantitative Economics Concentration B.A.; B.B.A.; B.S.

Concentration in Quantitative Economics

The Concentration in Quantitative Economics will consist of a combination of three courses offered by the Economics Department that develop the students' quantitative skills. Completion of the concentration will help signal the students' quantitative abilities as well as interests to prospective employers.

- ECON 384. Mathematical Economics 3.00

Choose two of the following three options (six credits):

- ECON 483. Applied Time Series Analysis 3.00

- ECON 485. Advanced Econometrics 3.00
- ECON 431. Advanced Microeconomic Theory 3.00
or
- ECON 432. Advanced Macroeconomics 3.00
(Credit may be received for either ECON 431 or ECON 432, but not both)

Economics, Socioeconomics Concentration, B.A.; B.B.A; B.S.

Concentration in Socioeconomics

Students who elect a major in economics with a concentration in socioeconomics are required to complete the following courses.

Required Economics Courses

- ECON 200. Introduction to Macroeconomics [C4GE] 3.00
- ECON 201. Introduction to Microeconomics 3.00
- ECON 331. Intermediate Microeconomic Theory 3.00
- ECON 332. Intermediate Macroeconomic Theory 3.00
- ECON 385. Econometrics 3.00
- ECON 488. Senior Capstone Seminar in Economics 3.00
- Two 400-level economics electives 6 Credit Hours

Total: 24 Credit Hours

Economics Electives

Choose four of the following: 12 Credit Hours

- ECON 340. Economics of Natural Resources 3.00
- ECON 360. Labor Economics 3.00
- ECON 365. Economic Development 3.00
- ECON 382. Urban Economics 3.00

Choose four of the following: 12 Credit Hours

- ANTH 195. Cultural Anthropology [C4GE] 3.00 (C, R)
- SOCI 336. Race and Ethnicity 3.00
- SOCI 348. Introduction to Developing Societies 3.00
or
- SOWK 348. Introduction to Developing Societies 3.00
- SOCI 337. Sociology of Gender 3.00
- SOCI 344. Work and Society 3.00
- SOCI 358. Sociology of Consumption 3.00

- HIST 320. Women in U.S. History 3.00
- HIST 428. American Workers in the Industrial Age, 1877-1948 3.00
- HIST 466. The Family, 1400-1800 3.00

Total: 45-48 Credit Hours

Educational Foundations and Exceptionalities, Department of

Professors

L. Desportes, S. Wasta, W. White

Associate Professors

D. Allen-Bronaugh, S. Blatz, C.R. Bosch, K. Koubek, T. Thomas, M. Williams

Assistant Professors

T. Brown, J. Pulos, B. Riden, S. Snyder, K. Wiley

Instructors

L. Leaman, L. Schick

The Department of Educational Foundations and Exceptionalities offers programs in special education, inclusive education, teaching English to speakers of other languages and gifted education. All programs include extensive fieldwork to ensure varied experience working with children and families.

Education, Inclusive Early Childhood Education, B.S.

The Bachelor of Science pre-professional program in Inclusive Early Childhood Education enables students to gain knowledge and understanding of early childhood inclusion (Birth-3rd grade) and practices that promote access, participation, and support for young children and their families. Students completing the four-year degree program, when combined with the teacher dual licensure option, are prepared to serve as teachers of students with and without disabilities in a variety of inclusive educational placements.

The licensure program is designed to prepare resilient, culturally responsive educators who are advocates for young children and youth with and without disabilities that are not only qualified for the complexity of their professional roles but also are reflective problem-solvers. This program offers a dual licensure in PreK-3rd grade and Early Childhood Special Education (birth-5 years)

The program includes extensive field experiences which occur each semester beginning in the student's junior year. Assessment of candidate performance includes evaluation of performance in individual courses and practicum, as well as other criteria. At various points throughout the program, there are formative and summative assessments where faculty committees review the overall performance of each candidate. Formative assessments will be used to advise candidates and develop a plan of action for addressing any concerns that have been identified by the faculty. Summative assessments will be used to identify those candidates who are not making satisfactory progress toward advancement to the next sequences of courses and experiences. If

progress is unsatisfactory, the candidate will not be allowed to continue until any identified issues are corrected. In some cases, a candidate will be allowed to continue in the next semester, but there will be a plan of action for addressing any concerns that have been identified by the faculty.

Every student is assigned an adviser. Students should plan on regularly consulting their adviser .

It is important for students to understand that the undergraduate major in Inclusive Early Childhood Education does not lead to teacher-education licensure unless licensure requirements are completed. To qualify for a recommendation for licensure in Inclusive Early Childhood Education [Early Childhood Special Education (Birth-5 years) and general education curriculum (PreK-3rd Grade)], students must complete licensure requirements in addition to requirements for the Inclusive Early Childhood Education undergraduate major. These requirements include 22 credit hours of practicum and student teaching experiences. Please note that these credit hour requirements are included in the 120 credit hour requirements for the Bachelor of Science in Inclusive Early Childhood Education degree.

Inclusive Early Childhood Education Degree Requirements

Required Courses

- General Education *41 Credit Hours*
- Bachelor of Science Degree Requirements *6 Credit Hours*
- IECE Major *48 Credit Hours*
- Licensure Requirements / Electives *3-25 Credit Hours*

Total: 120 Credit Hours

General Education Requirements

- Cluster One: Skills for the 21st Century *9.00*
- Cluster Two: Arts and Humanities *9.00*
- Cluster Three: The Natural World *10.00*
- Cluster Four: Social and Cultural Processes *7.00*
- Cluster Five: Individuals in the Human Community (PSYC 160 required for teacher certification) *6.00*

Bachelor of Science Requirements

- Scientific Literacy *3.00*
- Quantitative Requirement *3.00*

Total: 47 Credit Hours

Inclusive Early Childhood Inclusive Education Major: 48 Credit Hours

IECE Professional Studies Core - Required

- EDUC 300. Foundations of American Education 3.00

Education, Special Education, Adapted Curriculum Concentration, B.S.

The Bachelor of Science pre-professional program in special education enables students to become knowledgeable about the characteristics, diagnosis and remediation of children with disabilities accessing the general education curriculum or in adapted curriculum settings. Students completing the four-year degree program, when combined with the teacher licensure option, are prepared to serve as teachers of students with disabilities in a variety of educational placements.

The licensure program is designed to prepare resilient, culturally responsive educators who are advocates for children and youth with disabilities that are not only qualified for the complexity of their professional roles but also are reflective problem-solvers.

The program includes extensive field experiences. Assessment of candidate performance includes evaluation of performance in individual courses and practicum, as well as other criteria. At various points throughout the program, there are formative and summative assessments where faculty committees review the overall performance of each candidate. Formative assessments will be used to advise candidates and develop a plan of action for addressing any concerns that have been identified by the faculty. Summative assessments will be used to identify those candidates who are not making satisfactory progress towards advancement to the next sequences of courses and experiences. If progress is unsatisfactory, the candidate will not be allowed to continue until any identified deficiencies are corrected. In some cases, a candidate will be allowed to continue in the next semester, but there will be a plan of action for addressing any concerns that have been identified by the faculty.

Every student is assigned an adviser. Students should plan on consulting their adviser regularly.

It is important for students to understand that the undergraduate major in special education does not lead to teacher-education licensure unless licensure requirements are completed. To qualify for a recommendation for licensure in special education, general curriculum K-12 and/or adapted curriculum K-12, students must complete licensure requirements in addition to requirements for the special education undergraduate major. These requirements include 15 credit hours of practicum and student teaching experiences. Please note that these credit hour requirements are included in the 124 credit hour requirements for the Bachelor of Science in Special Education degree.

Education, Teaching English to Speakers of Other Languages (TESOL), B.S.

Coordinator: Dr. Katya Koubek

Phone: (540) 568-6760

Email: koubekex@jmu.edu

The Teaching English to Speakers of Other Languages (TESOL) major offers licensure preparation for PK-12 Teaching English to Speakers of Other Languages (TESOL). This TESOL pre-professional major enables students to become knowledgeable about the theories of linguistics, research on social and cultural variables that influence language acquisition, and the knowledge required to facilitate and assess language instruction in content areas, and laws governing the education of children for whom English is not their native language. This program will prepare future educators to understand and implement equitable and effective ways of working with English learners (ELs) in a variety of contexts, including inclusion in content/general education classes, sheltered-ESL classes and pullout classes.

Completion of the four-year major, when combined with teacher licensure courses (20 credit hours) leads to eligibility for a Virginia teaching license for PK-12 English as a Second Language. Major and additional licensure requirements can be completed within the 123-credit hour structure of the Bachelor of Science undergraduate degree in TESOL.

The College of Education's TESOL Program is interested in candidates who are committed to social justice and to creating affirming and academically challenging learning environments.

Students considering PK-12 initial licensure in TESOL follow the process described below:

All teacher education admission requirements are submitted through the Education Support Center, located in Memorial Hall, room 7230. Candidates must be fully admitted into teacher education before they can register for certain designated undergraduate education courses.

Teacher education candidates must maintain an overall GPA of 2.5 or better and complete general education courses with a minimum grade of "C." Candidates must also complete TESOL major content courses with a minimum grade of "C."

Candidates must apply to student teach one year prior to their student teaching semester.

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Bachelor of Science Quantitative Requirement *3 Credit Hours*
- Bachelor of Science Scientific Literacy Requirement *3-4 Credit Hours*
- Teaching English to Speakers of Other Languages *51 Credit Hours*
- Minor Requirements *18 Credit Hours*
- Foreign Language or Electives *3-4 Credit Hours*

Total: 120 Credit Hours

Footnote

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

Exceptional Education Non-Teaching Minor

Program Coordinator: Dr. Laura Desportes

Phone: (540) 568-4527

Email: desporlx@jmu.edu

The non-teaching minor program in exceptional education is designed for students in other major fields who wish to acquire professional knowledge related to assisting individuals with disabilities but who do not want to pursue Virginia teaching

licensure. All students seeking to complete the minor must meet with the non-teaching program adviser to develop an approved program of study.

Required Courses

- EXED 200. Foundations of Exceptional Education *3.00* (Prerequisite for all EXED courses. Offered online in the summer)

Complete two survey courses:

- EXED 310. Survey of Emotional Disturbance *3.00*
- EXED 320. Survey of Learning Disabilities *3.00*
- EXED 330. Survey of Intellectual Disabilities *3.00*
- EXED 375. Overview Study of Autism Spectrum Disorders *3.00*¹
- EXED 305. Characteristics of Acquired Brain Injury *3.00*

Select nine credits from electives:

- EXED 303. Foundations of Classroom and Behavior Management *3.00*
- EXED 306. Lifespan Issues for Individuals with Disabilities *3.00*
- EXED 309. Supporting Community Access for Adults with Disabilities *3.00*
- EXED 401. Issues in Exceptional Education *1.00 - 3.00*
- EXED 443. Assistive Technology Use for Individuals With Disabilities *3.00*
- EXED 455. Collaborative Teaching for Learners with Disabilities *3.00*
- EXED 465. Perspectives of Early Childhood Special Education *3.00*
- EXED 490. Special Studies in Special Education *1.00 - 3.00 each semester*²
- CSD 420. Introduction to Sign Language *3.00*
- CSD 421. Sign Language II *3.00*
- KIN 313. Adapted Physical Education *3.00*³
- TESL 426. Concepts in First and Second Language Acquisition *3.00*

Autism Certificate Courses

Students completing the autism certificate must complete these three courses in sequential order. No other electives must be completed if a student chooses this option. Not permitted in enrolling in EXED 375.

- EXED 416. Overview and Assessment of Autism Disorders *3.00*
- EXED 417. Communication, Language and Sensory Issues of Learners with ASD and/or on the Adapted Curriculum *3.00*
- EXED 418. Challenging Behaviors, Positive Behavioral Supports, Functional Behavioral Assessment and Behavior Intervention Plans *3.00*

Total: 18 Credit Hours

Footnotes

¹ Permitted only if the student is not enrolling the autism series (EXED 416, EXED 417, EXED 418).

² Independent study must be approved and supervised by individual faculty.

³ For kinesiology majors only; KIN 310 is a corequisite.

Special Education: General Curriculum K-Twelve

Program Coordinator: Dr. Sharon Blatz

Phone: (540) 568-6784

Email: blatzsl@jmu.edu

Completion of the five-year professional program may lead to eligibility for a Virginia teaching license for the special education general curriculum K-12. Assessment occurs each semester and performance will be reviewed at each assessment gate. Candidates must demonstrate satisfactory performance before moving on to the next semester. Satisfactory performance includes a "C" or better in course work, demonstration of professional behaviors, and acceptable performance in practicums and on key assessments. To be recommended for licensure, all students must meet the following requirements:

- Complete General Education and major requirements.
- Complete the special education pre-professional program as it corresponds to the related teaching track.
- Meet all admission and retention criteria for teacher education.
- Meet admission requirements for the special education M.A.T. program.
- Complete the graduate portion of the licensure program.

Special Education: Gifted Education

Program Coordinator: Kris Wiley

Phone: (540) 568-2276

Email: wileykr@jmu.edu

The Educational Foundations and Exceptionalities, Department of offers an add-on endorsement in gifted education at the graduate level only. See the graduate catalog for information.

Teaching English to Speakers of Other Languages: Non-Licensure TESOL Minor

Coordinator: Dr. Katya Koubek

Phone: (540) 568-6760

Email: koubekex@jmu.edu

The Teaching English to Speakers of Other Languages (TESOL) program is designed to enable students to complete the TESOL non-licensure minor or the TESOL PK-12 licensure. Both programs prepare students to work effectively in promoting English language acquisition of children and adults who are not native English speakers. These programs also promote development of skills in cross-cultural competence and draw heavily upon theories of linguistics, research on social and cultural variables that influence second language acquisition, and the knowledge required to facilitate second language learning.

Candidates currently enrolled in initial teaching licensure programs may be able to complete the TESOL requirements in conjunction with completing their other preparation program. With careful planning, dual licensure is possible. Candidates interested in dual licensure should consult with the TESOL coordinator and the other program area adviser for more information.

Non-Licensure TESOL Minor

The non-licensure minor program in TESOL is designed for students in various fields, who wish to acquire professional knowledge related to teaching English to speakers of other languages, but who do not want to pursue Virginia teaching licensure. Students will acquire skills in cross-cultural competence, understand and implement more equitable and effective ways of working with English learners (ELs), and become familiar with the processes of first and second language acquisition. Students will gain a foundational knowledge of effective teaching practices to assist and assess ELs. The TESOL non-licensure minor requires a minimum of 19-20 credit hours; 16 credits are required core courses and 3-4 credits are electives selected in consultation with a program adviser.

Requirements

Required Courses

- EDUC 310. Teaching in a Diverse Society *3.00*
- LED 430. Development, Assessment and Instruction of Literacy: K-12 *3.00*
- TESL 426. Concepts in First and Second Language Acquisition *3.00*
- TESL 428. Assessment for Curriculum Development in English as a Second Language *3.00*
- TESL 385. Practicum in TESOL *1.00-3.00*
- TESL 470. Instructional Strategies for Teaching English as a Second Language *3.00*¹

Electives (choose one): 3-4 Credit Hours

- EDUC 300. Foundations of American Education *3.00*
- EDUC 370. Instructional Technology *3.00* (Lab course)
- ENG 308. Introduction to Linguistics *3.00*
- EXED 303. Foundations of Classroom and Behavior Management *3.00*
- LED 435. Literacy Development and Instruction for English Language Learners *3.00*²

Total: 19-20 Credit Hours

Footnotes

¹ This course has an additional one credit practicum, TESL 385 .

² This course has an additional one credit practicum, TESL 383.

Engineering, Department of

Dr. Adebayo Ogundipe, **Interim Department Head**

S. Harper, K. Paterson, R. Prins, B. Striebig

Associate Professors

K. Gipson, J. Henriques, S. Holland, S. Morton, J. Nagel, R. Nagel, A. Ogundipe

Assistant Professors

D. Castaneda, J. Fortsyth, S. Joshi, H. Kirkvold, C. Miller

Mission

Through an engineering curriculum grounded in effective instructional practices, we nurture an engaged educational community of conscientious and adaptable learners who develop solutions for the betterment of society.

Objectives

The JMU Engineering program provides an eight-semester project-driven platform for students to contribute engineering work for sustainable societies. We seek engineers who are eager to:

- understand the needs of people and communities, effectively communicate with project partners, and provide leadership for diverse teams,
- make beneficial solutions for society and the planet using innovation, design thinking, engineering analyses, and an understanding of complexities involved in real projects.
- function effectively in the work environment with integrity and professionalism, and
- demonstrate a commitment to professional development through self-motivated learning, career advancement, or advanced studies.

The Bachelor of Science in Engineering is a single cross disciplinary engineering degree that integrates many traditional engineering disciplines with course work in business, project management, engineering, design and liberal arts. The foci of the program are sustainability, engineering design and project delivery.

Engineering for a sustainable world is, in short, a body of knowledge and set of holistic analytical design skills that contribute to the development of products, processes, services and infrastructure that simultaneously protect the environment, conserve resources and meet human needs at an acceptable financial cost. By reframing traditional engineering practice, sustainability provides a way of moving toward the development of sustainable societies, where human quality of life is advanced with a minimum impact on finite resources and the environment. Traditional approaches to engineering, such as mechanical, electrical or chemical are not offered in this program.

Rather, this modern, project-based, engineering curriculum spans many areas of engineering to create adaptable engineers with practical know-how.

The curriculum is ABET accredited and prepares students for the Fundamentals of Engineering (FE) pre-licensure examination. Graduates will be prepared to succeed in the engineering workforce or in advanced engineering degree programs by accumulating a professional portfolio of engineering project experiences throughout the curriculum.

Career Opportunities

Upon graduation, alumni will be prepared for a wide range of opportunities in the engineering workforce or in graduate school. Typical fields of engineering that students will be prepared to enter include sustainable design, process design, product design, process engineering, project management and systems engineering. Other industry options include product service system design, technical sales, management training and technical marketing.

A wide range of graduate school options include master's and doctoral programs in civil engineering, environmental engineering, industrial engineering, materials engineering, mechanical engineering and systems engineering. Other postgraduation options

include business school, law school, AmeriCorps, Peace Corps, military service, entrepreneurship (starting a small business), applied science fields, international experiences, medical school and careers in politics/public policy.

Some examples of the industries that hire engineers include, among others, design and build companies, aeronautic firms, automobile manufacturers, colleges and universities, computer service and software firms, consulting firms, energy systems firms, federal contractors, federal, state and local governments (e.g., NASA, EPA, NIST, DOD, DOE), non-profit agencies, manufacturing firms, inspection agencies, mining and petroleum firms, pharmaceutical and medical research companies, research and development laboratories, telecommunication companies, and waste management and recycling firms.

Admission to the Major

The B.S. in engineering admits a limited number of students each year. To be eligible to apply for admission, students must have completed the following:

All courses (or approved equivalents) required for the engineering major with a grade of "C" or higher:

- MATH 235, MATH 236, MATH 237, MATH 238
- PHYS 240, PHYS 240L, PHYS 250, PHYS 250L
- CHEM 131, CHEM 131L and CHEM 132, CHEM 132L or CHEM 133E, 133LE
- ENGR 112, ENGR 212, ENGR 221, ENGR 231, ENGR 232

Any of the preceding courses may only be repeated once to be considered for admission.

No more than 85 students (including transfer students with qualifying transcripts) will be admitted to the major at the junior-level. If more than 85 students meet the above standards, enrollment will be limited to the top 85 students. For on-campus students, the admission criterion will be grade point average (GPA) in the five ENGR courses (ENGR 112, ENGR 212, ENGR 221, ENGR 231, ENGR 232). In the event of a tie, GPA in the lower division MATH, CHEM and PHYS courses required for the engineering major (listed in #1) will be used as a tie-breaker. The student coordinator will work with the engineering Academic Unit Head to assess the relative merit of transfer students. Students who are not among the top 85 in their cohort may elect to wait one year and be considered with the next cohort, if they so choose, though the same selection criteria applies.

Progressing in the Major

Once admitted to the engineering program, students must maintain an in-major and cumulative GPA of 2.0 or higher.

Once admitted, any course required as part of the engineering major may only be repeated once.

Engineering, B.S.

Required courses

- General Education *41 Credit Hours*¹
- Quantitative requirement *3 Credit Hours*²
- Scientific Literacy requirement *3 Credit Hours*²
- Major requirements (listed below) and electives *80 Credit Hours*

Total: 127 Credit Hours

Additional Information

Students must complete a total of nine hours of approved electives, including at least six hours of technical electives. Students may not use courses required for the engineering major to fulfill elective requirements.

- Technical Electives: Must include at least three credit hours of ENGR 440–ENGR 479. Up to three credit hours of technical electives may be from ENGR 480 or ENGR 498.
- Free electives: May include up to three credit hours of any other 300 or 400 level courses at JMU (both ENGR and non-ENGR courses are eligible). This may include courses that qualify as technical electives but were not used to meet the technical elective requirement.

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² In addition to course work taken to fulfill General Education requirement.

Recommended Schedule for Majors

First Year

Fall Semester

- MATH 235. Calculus I [C3QR] 4.00 ¹
- PHYS 240. University Physics I [C3PP] 3.00 ²
- PHYS 240L. University Physics Laboratory I [C3PP] 1.00 ²
- General Education 6 Credit Hours ³

Total: 14 Credit Hours

Spring Semester

- ENGR 112. Engineering Decisions 3.00 (Engineering Decisions)
- General Education 3 Credit Hours ³
- MATH 236. Calculus II 4.00
- PHYS 250. University Physics II 3.00
- PHYS 250L. University Physics Laboratory II 1.00

Total: 14 Credit Hours

Second Year

Fall Semester

- MATH 237. Calculus III 4.00
- CHEM 131. General Chemistry I [C3PP] 3.00
- CHEM 131L. General Chemistry Laboratory [C3PP] 1.00
- ENGR 231. Engineering Design I 2.00

- General Education *6 Credit Hours*

Total: 16 Credit Hours

Spring Semester

- MATH 238. Linear Algebra with Differential Equations *4.00*
- ENGR 212. Statics and Dynamics (3,1) *4.00*
- ENGR 221. Management of Technology I: Product Development and Entrepreneurial Engineering *3.00*
- ENGR 232. Engineering Design II *2.00*
- CHEM 132. General Chemistry II *3.00*
- CHEM 132L. General Chemistry Laboratory *1.00*

Total: 17 Credit Hours

Third Year

Fall Semester

- ENGR 311. Fluid Mechanics *4.00*
- ENGR 313. Circuits and Instrumentation *4.00*
- ENGR 322. Engineering Management II: Engineering Project Management *3.00*
- ENGR 331. Engineering Design III *3.00*
- General Education *3 Credit Hours*

Total: 17 Credit Hours

Spring Semester

- ENGR 312. Thermodynamics and Heat Transfer *4.00*
- ENGR 314. Materials and Mechanics *4.00*
- ENGR 332. Engineering Design IV *3.00*
- Approved engineering elective *3 Credit Hours*
- General Education *3 Credit Hours*

Total: 17 Credit Hours

Fourth Year

Fall Semester

- ENGR 411. Fundamentals of Sustainable Engineering and Design *3.00*
- ENGR 413. Systems Analysis *3.00*
- ENGR 431. Engineering Design V *3.00*
- Approved engineering elective *3 Credit Hours*

- General Education *6 Credit Hours*

Total: 18 Credit Hours

Spring Semester

- ENGR 412. Sustainable Engineering and Design II *3.00*
- ENGR 432. Engineering Design VI *3.00*
- Approved engineering elective *3 Credit Hours*
- General Education *7 Credit Hours*

Total: 16 Credit Hours

Footnotes

¹ Also fulfills General Education requirement for Cluster Three, Group 1.

² Also fulfills General Education requirement for Cluster Three, Group 2.

³ Fulfills General Education requirement for Cluster One.

English, Department of

Dr. Dabney A. Bankert, **Department Head**

Phone: (540) 568-6797

Email: bankerda@jmu.edu

Location: Keezell Hall, Room 215

Website: <http://www.jmu.edu/english>

Professors

R. Aguirre, D. Bankert, K. Castellano, M. Favila, A. Federico, J. Gabbin, B. Hefner, B. Johnson, L. Kutchins, R. Majors, D. Mookerjea-Leonard, M. Parker, M. Rankin, M. Rebhorn

Associate Professors

L. Alleyne, D. Babcock, P. Bogard, E. Cavanagh, S. Cote, A. Fagan, R. Gaughran, M. Godfrey, D. Goode, L. Henigman, B. Muhonja, B. Nowvieskie, M. Thompson, S. White

Assistant Professors

D. Lo, H. Pennington, D. Price, S. Samatar, G. Wrenn

Mission

Our mission is to prepare our students to be appreciative yet critical readers and creators of language, texts, and ideas, attending to the powerful link between the literary arts and the human condition. We develop in students the ability to write with clarity, creativity, and rhetorical power, and to recognize and explore the complex interaction between texts of various genres and diverse contexts of production and reception, that they may emerge with superior dexterity of reasoning, a heightened empathy, and an expanded worldview.

Goals

To build upon the skills introduced in the General Education program, the Department of English strives to:

- Provide students advanced instruction in writing styles ranging from expository and creative writing to literary criticism.
- Help students master advanced skills in analytical and critical thinking.
- Develop skills in research and information access.

Career Opportunities

Careers that involve critical thinking, document analysis or oral and written communication such as:

- Career counseling
- Corporate recruiting
- Consulting
- Editing
- Educational administration
- Film and food critic
- Graduate school in English, creative writing, law and library science
- Human resources
- Insurance underwriting
- Intelligence analyst
- Law school
- Library science (librarian, archivist, preservationist)
- Literary agent
- Literacy instructor
- Lobbyist
- Magazine writing and editing (print and online)
- Marketing
- Newspaper reporting/foreign correspondent
- Non-profit advocacy and administration
- Public relations and public affairs officer
- Publishing
- Research
- Speech writer
- Stockbroker
- Teaching

Co-curricular Activities and Organizations

- Sigma Tau Delta (the National English Honor Society)
- gardy loo! (a literary magazine)
- Sister Speak (JMU's feminist journal)
- MacGuffin Film Journal
- Cinemuse Film Club
- Hopscotch (children's literature magazine)

Cross Disciplinary Minors

English participates in the following cross disciplinary minors:

- African, African American and Diaspora Studies Minor
- American Studies Minor
- Book Arts Minor
- British Communication and Media Minor
- Classical Studies Minor
- Creative Writing Minor
- Environmental Humanities Minor
- Environmental Studies Minor
- Film Studies Minor
- Latin American, Latinx and Caribbean Studies Minor
- Medical Humanities Minor
- Medieval and Renaissance Studies Minor
- Middle Eastern Communities and Migrations Minor
- Modern European Studies Minor
- Women's, Gender and Sexuality Studies Minor
- World Literature Minor

English Minor

Minor Requirements

The minimum requirement for a minor in English is 18 credit hours. At least nine hours must be taken in courses at the 300 level or above. A minor in English does not meet requirements for the Secondary Teaching License.

English, B.A.

Degree and Major Requirements

Students majoring in English earn the B.A. degree unless they are completing an additional major in a degree program other than the B.A. The minimum requirement for a major in English is 36 credit hours of course work in the major.

The department recommends that students choose a variety of courses from among different periods and topics. Students progress through the major by taking ENG 299 and three 200 level surveys, and then moving on to 300 level courses and at least two 400 level Advanced Studies courses. They also fulfill three distributional overlay requirements.

Courses taken to fulfill General Education Cluster Two requirements may also fulfill requirements in the English major. Students may complete credit requirements by taking additional electives.

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹

- Foreign language classes (intermediate level required) *0-14 Credit Hours*²
- Philosophy course (in addition to General Education courses) *3 Credit Hours*
- University electives *26-40 Credit Hours*
- Major requirements (listed below) *36 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² The foreign language requirement may be satisfied by successful completion of the second semester of the intermediate level of the student's chosen language (typically 232) or by placing out of that language through the Department of Foreign Languages, Literatures and Cultures' placement exam.

Major Requirements

All students must include in their program the following core courses:

Core Courses

- ENG 299. Writing About Literature *3.00*¹
- Choose one course at the 200 or 300 level *3 Credit Hours*
- Choose five courses from the 300 level *15 Credit Hours*
- Choose two approved 400-level courses from the Advanced Studies list *6 Credit Hours*

Footnote

¹ This course fulfills the College of Arts and Letters writing-intensive requirement for the major.

Choose one from the following: 3 Credit Hours

- ENG 235. Survey of English Literature: From Beowulf to the Eighteenth Century [C2L] *3.00*
- ENG 247. Survey of American Literature: From the Beginning to the Civil War [C2L] *3.00*

Choose one from the following: 3 Credit Hours

- ENG 221. Literature/Culture/Ideas [C2L] *3.00*
- ENG 222. Genre(s) [C2L] *3.00*
- ENG 235. Survey of English Literature: From Beowulf to the Eighteenth Century [C2L] *3.00*
- ENG 236. Survey of English Literature: Eighteenth Century to Modern [C2L] *3.00*
- ENG 239. Studies in World Literature [C2L] *3.00*
- ENG 247. Survey of American Literature: From the Beginning to the Civil War [C2L] *3.00*
- ENG 248. Survey of American Literature: From the Civil War to the Modern Period [C2L] *3.00*
- ENG 260. Survey of African-American Literature [C2L] *3.00*

Choose one from the following: 3 Credit Hours

- ENG 235. Survey of English Literature: From Beowulf to the Eighteenth Century [C2L] 3.00
- ENG 236. Survey of English Literature: Eighteenth Century to Modern [C2L] 3.00
- ENG 239. Studies in World Literature [C2L] 3.00
- ENG 247. Survey of American Literature: From the Beginning to the Civil War [C2L] 3.00
- ENG 248. Survey of American Literature: From the Civil War to the Modern Period [C2L] 3.00
- ENG 260. Survey of African-American Literature [C2L] 3.00

Total: 36 Credit Hours

The courses selected must include the following:

One course at the 300 or 400 level, pre-1700:

- ENG 306. The Bible as Literature 3.00
- ENG 311. Medieval Literature and Culture 3.00
- ENG 313. Sixteenth Century British Literature 3.00
- ENG 315. Seventeenth Century British Literature 3.00
- ENG 316. Early Modern Drama 3.00
- ENG 317. Shakespeare's Tragedies and Romances 3.00
- ENG 318. Shakespeare's Comedies and Histories 3.00
- ENG 319. Teaching Shakespeare 3.00
- ENG 320L. Shakespeare on the Page and Stage in London
- ENG 401. Advanced Studies in Medieval Literature 3.00
- ENG 402. Advanced Studies in British Literature Before 1700 3.00

One course at the 300 or 400 level, pre-1900:

- ENG 306. The Bible as Literature 3.00
- ENG 311. Medieval Literature and Culture 3.00
- ENG 313. Sixteenth Century British Literature 3.00
- ENG 315. Seventeenth Century British Literature 3.00
- ENG 316. Early Modern Drama 3.00
- ENG 317. Shakespeare's Tragedies and Romances 3.00
- ENG 318. Shakespeare's Comedies and Histories 3.00
- ENG 319. Teaching Shakespeare 3.00
- ENG 320L. Shakespeare on the Page and Stage in London
- ENG 321. Restoration and 18th-Century British Prose and Poetry 3.00
- ENG 322. Restoration and Eighteenth Century British Drama 3.00
- ENG 325. Romantic Literature 3.00
- ENG 327. Gothic Literature 3.00
- ENG 329. Victorian Literature 3.00
- ENG 330. Nineteenth Century British Novel 3.00
- ENG 342. Early American Literature 3.00
- ENG 343. Antebellum American Literature 3.00
- ENG 344. Late Nineteenth Century American Literature 3.00
- ENG 352. The American Novel to 1914 3.00
- ENG 363. Native American Literature 3.00
- ENG 401. Advanced Studies in Medieval Literature 3.00
- ENG 402. Advanced Studies in British Literature Before 1700 3.00

One course from the Identity, Diversity and Power selections:

- ENG 358. Oral Literature *3.00*
- ENG 360. Introduction to Ethnic American Literature *3.00*
- ENG 361. African-American Fiction *3.00*
- ENG 362. African-American Poetry *3.00*
- ENG 363. Native American Literature *3.00*
- ENG 364. Introduction to Asian-American Literature *3.00*
- ENG 368. Women's Literature *3.00*
- ENG 369. Feminist Literary Theory *3.00*
- ENG 370. Queer Literature *3.00*
- ENG 377. Introduction to African Literature *3.00*
- ENG 378. Studies in South Asian Literature *3.00*
- ENG 379. Literature and Empire *3.00*
- ENG 408. Advanced Studies in African-American Literature *3.00*
- ENG 423. Advanced Studies in Gender and Sexuality in Literature *3.00*
- ENG 432. Advanced Studies in African Literature *3.00*

- ENG 434. Advanced Studies in Latin American Literature in Translation *3.00*
or
- SPAN 434. Advanced Studies in Latin American Literature in Translation *3.00*

- ENG 466. Advanced Studies in Women's Literature *3.00*

Two courses at the 400 level:

- ENG 401. Advanced Studies in Medieval Literature *3.00*
- ENG 402. Advanced Studies in British Literature Before 1700 *3.00*
- ENG 403. Advanced Studies in British Literature After 1700 *3.00*
- ENG 405. Advanced Studies in Anglophone Literature *3.00*
- ENG 407. Advanced Studies in American Literature *3.00*
- ENG 408. Advanced Studies in African-American Literature *3.00*
- ENG 410. Advanced Studies in Author *3.00*
- ENG 413. Advanced Studies in Literature and Ideas *3.00*
- ENG 414. Advanced Studies in Genre *3.00*
- ENG 415. Advanced Studies in Textuality and the History of the Book *3.00*
- ENG 417. Advanced Studies in Linguistics and the English Language *3.00*
- ENG 420. Advanced Studies in Theory and Cultural Studies *3.00*
- ENG 423. Advanced Studies in Gender and Sexuality in Literature *3.00*
- ENG 430. Advanced Studies in Comparative Literature *3.00*
- ENG 432. Advanced Studies in African Literature *3.00*
- ENG 433. Advanced Studies in Arabic Literature *3.00*.
- ENG 434. Advanced Studies in Latin American Literature in Translation *3.00*
- ENG 439. Advanced Studies in Major Authors of Literature in Spanish in Translation *3.00*
- ENG 466. Advanced Studies in Women's Literature *3.00*

Additional Information

Other courses may be applied to these requirements via course directive. Students should consult advisers and the departmental semester list about other options.

Recommended Schedule for Majors

First Year

- Foreign language courses *6-8 Credit Hours*
- General Education courses *23 Credit Hours*

Total: 29-31 Credit Hours

Second Year

- Two of three required courses from among ENG 221-ENG 260 *6 Credit Hours*
- ENG 299. Writing About Literature *3.00*
- General Education courses *15 Credit Hours*
- Foreign language courses *6 Credit Hours*

Total: 30 Credit Hours

Third Year

- Remaining requirement from General Education *3 Credit Hours*
- English 300-level courses *12-15 Credit Hours*
- Other electives *15 Credit Hours*

Total: 30 Credit Hours

Fourth Year

- English 400 level Advanced Studies courses *6 Credit Hours*
- English 300-400 level courses *6-9 Credit Hours*
- Other electives *15-18 Credit Hours*

Total: 30 Credit Hours

Concentrations

In consultation with their advisers, students may choose nine credit hours of courses at the 300- or 400-level that acquaint them with the scope of one of the fields below. Students may also consult advisers and individual professors about additional courses that may, because of content covered in a particular semester, be eligible for a concentration by special permission (for example, ENG 302, ENG 412 or others).

British Literature

Select appropriate courses in consultation with adviser.

American Literature

Select appropriate courses in consultation with adviser.

World Literature

- ENG 305. Mythology *3.00*.
- ENG 306. The Bible as Literature *3.00*
- ENG 358. Oral Literature *3.00*
- ENG 360. Introduction to Ethnic American Literature *3.00*
- ENG 361. African-American Fiction *3.00*
- ENG 362. African-American Poetry *3.00*
- ENG 363. Native American Literature *3.00*
- ENG 364. Introduction to Asian-American Literature *3.00*
- ENG 368. Women's Literature *3.00*
- ENG 377. Introduction to African Literature *3.00*
- ENG 378. Studies in South Asian Literature *3.00*
- ENG 379. Literature and Empire *3.00*
- ENG 405. Advanced Studies in Anglophone Literature *3.00*
- ENG 408. Advanced Studies in African-American Literature *3.00*
- ENG 423. Advanced Studies in Gender and Sexuality in Literature *3.00*
- ENG 430. Advanced Studies in Comparative Literature *3.00*
- ENG 432. Advanced Studies in African Literature *3.00*

Race and Ethnicity Studies

- ENG 358. Oral Literature *3.00*
- ENG 360. Introduction to Ethnic American Literature *3.00*
- ENG 361. African-American Fiction *3.00*
- ENG 362. African-American Poetry *3.00*
- ENG 363. Native American Literature *3.00*
- ENG 364. Introduction to Asian-American Literature *3.00*
- ENG 377. Introduction to African Literature *3.00*
- ENG 378. Studies in South Asian Literature *3.00*
- ENG 379. Literature and Empire *3.00*
- ENG 408. Advanced Studies in African-American Literature *3.00*
- ENG 432. Advanced Studies in African Literature *3.00*

- ENG 433. Advanced Studies in Arabic Literature *3.00*.

Creative Writing

Students with a strong interest in developing various writing skills should include in their program nine credit hours of electives from the following courses.

Choose three of the following:

- ENG 347. Playwriting *3.00*
or
- THEA 347. Playwriting *3.00*

- ENG 390. The Environmental Imagination *3.00*
- ENG 391. Introduction to Creative Writing – Nonfiction *3.00*
- ENG 392. Introduction to Creative Writing – Poetry *3.00*
- ENG 393. Introduction to Creative Writing – Fiction *3.00*
- ENG 483. Narrative Form *3.00*
- ENG 484. Poetic Craft and Creativity *3.00*
- ENG 493. Advanced Creative Nonfiction *3.00*
- ENG 494. Advanced Poetry Writing *3.00*
- ENG 495. Advanced Fiction Writing *3.00*
- ENG 496. Advanced Topics in Creative Writing *3.00*

English, Teaching Licensure

Licensure Requirements

Students interested in becoming teachers must meet specific curriculum requirements in their major as part of the undergraduate academic degree. English majors desiring secondary teacher licensure must complete LED 254, include among their core courses the surveys of both English and American literature (ENG 235, ENG 236, ENG 247 and ENG 248), and include among their electives the following:

Choose one of the following:

- ENG 309. Traditional English Grammar *3.00*
- ENG 310. Modern English Grammar *3.00*

Choose one of the following:

- ENG 317. Shakespeare's Tragedies and Romances *3.00*
- ENG 318. Shakespeare's Comedies and Histories *3.00*
- ENG 319. Teaching Shakespeare *3.00*
- ENG 320L. Shakespeare on the Page and Stage in London

Additional Courses

- At least one course at any level in American literature
- At least one course at any level in British literature
- At least one course at any level in world literature

Additional Information

In addition to the General Education and academic major requirements, English majors desiring secondary teacher licensure must be admitted to teacher education, complete the pre-professional program in secondary education at the undergraduate level and complete the graduate level Master of Arts in Teaching degree.

It is critical that students seeking licensure consult regularly with both their education adviser and their major adviser to support their progression through the programs. For a full description of the program in secondary teaching, refer to the Middle, Secondary and Mathematics Education, Department of, in addition to the College of Education.

Teaching English as a Second Language

For a description of the TESOL program, refer to the College of Education section of the catalog.

Finance and Business Law, Department of

Dr. Hui Sono, **Department Head**

Phone: (540) 568-6530

Email: sonohh@jmu.edu

Location: Zane Showker Hall, Room 315

Website: www.jmu.edu/cob/finance

Professors

P. Drake, J. Fink, K. Fink, A. Hamilton, Q. Liu, E. Semaan, H. Sono

Associate Professors

J. Chowdhury, C. Ullrich

Assistant Professors

C. Fox, C. Larsson, E. McCarthy, A. Usman, W. Zhang

Lecturers

W. Collier, M. Graham, D. Parker, R. Rubin

Mission

The Department of Finance and Business Law, together with our partners in the business community, is committed to preparing students to be principled, productive contributors to business and society.

Values

To support its mission, the Department of Finance and Business Law is committed to the following values:

- Ethics: Develop decision makers who are respectful of stakeholders and the rule of law.
- Engagement: Connect students and faculty with stakeholders in the local and global communities.

- **Critical Thinking:** Foster intellectual curiosity and analytical skills to enable an understanding of the role of finance and business law in the global economy.
- **Innovation:** Challenge students to develop their own solutions to financial issues in a dynamic economy.

Career Opportunities

The finance major is designed to prepare students for careers in the financial management of industrial and commercial enterprises; commercial, retail and mortgage banking; investment analysis and portfolio management; real estate; insurance; finance positions in federal, state and local governments; and graduate study.

Job titles held by graduates of the programs include:

- Analyst, Real Estate Development
- Analyst, Structured Finance
- Assistant Treasurer
- Associate, Forensic Technology
- Business Systems Analyst
- Consultant
- Consultant/Engineer Analytics
- Consultant/Financial Advisory
- Corporate Model Analyst
- Credit Manager
- Credit Risk Associate
- Financial Planner
- Financial Analyst
- Financial Engineer
- Internal Auditor
- Junior Analyst
- Lending Officer
- Loan Analyst
- Manager, Capital Budgeting
- Manager, Pension Fund Investments
- Manager, Project Finance
- Mortgage Analyst
- Operations Analyst
- Portfolio Analyst
- Pricing Analyst
- REIT Analyst
- Securities Analyst

Co-curricular Activities and Organizations

- Beta Alpha Psi
- Financial Management Association
- Madison Investment Fund
- Madison Venture Group
- Women In Business

Degree and Major Requirements

The Finance and Business Law, Department of offers programs leading to the Bachelor of Business Administration degree in finance and the Bachelor of Science degree in quantitative finance. As part of the JMU assessment program, graduating seniors are required to participate in assessment activities. Assessment information is used to assist the College of Business and department faculty in curricula.

Finance, B.B.A.

Bachelor of Business Administration in Finance

The B.B.A. degree with a major in finance requires a minimum of 120 credit hours of undergraduate course work. Fifty percent of this work, or 60 credit hours, must be taken outside of the College of Business. In counting the 60 credit hours of non-business courses, students may include all hours taken in General Education, up to a total of nine hours in economics (ECON courses must be counted as economics), and three hours of COB 191. Business Analytics I. The remaining hours, to bring the total to 60, must be taken from any department outside the College of Business. Students should carefully select these non-business electives to help them gain additional knowledge and expertise for their careers and personal lives.

Students enrolled at James Madison University who wish to change their major to finance should go to the Student Center in MyMadison to submit a request. Students must be in good academic standing to change their major to finance and, if they have taken any FIN prefix courses at the time of the change request, must meet the prerequisites for the required courses in the finance major.

Students who plan to major in finance and earn a score on the Math Placement Exam sufficient for placement into MATH 235 are strongly encouraged to enroll in MATH 235.

Required major courses provide finance majors with a foundation in financial management, investments and institutions. Electives within the major permit students to obtain an additional emphasis and explore other areas within the field of finance.

Transfer Credit

Each program in the CoB will accept no more than two courses of transfer credit toward the major except in extraordinary circumstances. The major is defined as the course work required by a major field of study in addition to the lower and upper-level BBA core courses. For a course to be considered for acceptance in the student's major, it must have been completed in an AACSB International-accredited business program, or a similarly accredited program, at a four-year university.

In general, all finance course work must be completed at JMU. Transfer credit for finance courses is awarded only in certain circumstances. In no case will transfer credit be awarded for FIN 488. Advanced Financial Policy. Contact the department head for more information on transfer credit.

Degree Requirements

Courses

- B.B.A. core courses *45-46 Credit Hours* ¹
- Finance major requirements *24 Credit Hours*
- Free elective *3 Credit Hours* ²

- General Education courses *41 Credit Hours* ³
- Electives *6-7 Credit Hours* ²

Total: 120 Credit Hours

Footnotes

¹ Up to seven hours of core requirements in economics and calculus may also be taken for General Education credit.

² Any course taught by the university outside the College of Business.

³ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

B.B.A. Core Component

B.B.A. Lower-Level Core Component

B.B.A. majors must complete all of the B.B.A. core components as part of their degree program. The following courses comprise the B.B.A. Lower-Level Core Component:

- COB 191. Business Analytics I *3.00* ¹
- COB 202. Interpersonal Skills *3.00*
- COB 204. Computer Information Systems *3.00*
- COB 241. Financial Accounting *3.00*
- COB 242. Managerial Accounting *3.00* ^{4,5}
- COB 291. Business Analytics II *3.00* ²
- ECON 200. Introduction to Macroeconomics [C4GE] *3.00*
- ECON 201. Introduction to Microeconomics *3.00*

- MATH 205. Introductory Calculus I [C3QR] *3.00* ³
or
- MATH 235. Calculus I [C3QR] *4.00* ³

B.B.A. Upper-Level Core Component

The following courses comprise the B.B.A. Upper-Level Core Component:

- COB 300A. Integrative Business: Management *3.00* ^{5,6}
- COB 300B. Integrative Business: Finance *3.00* ^{5,6}
- COB 300C. Integrative Business: Operations *3.00* ^{5,6}
- COB 300D. Integrative Business: Marketing *3.00* ^{5,6}
- COB 318. Legal and Ethical Environment of Business *3.00* ⁷
- COB 487. Strategic Management *3.00* ⁸

Footnotes

¹ MATH 220 may be substituted for COB 191.

² COB 191 or equivalent and MATH 205 or equivalent are prerequisites for COB 291.

³ Calculus is required but not used in calculating the B.B.A. core GPA. MATH 235 is preferred for Finance majors.

⁴ COB 241 must be taken before COB 242.

⁵ COB 242 is a prerequisite for COB 300 but is not used in calculating the B.B.A. core GPA.

⁶ All four COB 300 courses must be taken during the same semester.

⁷ COB 300 is a prerequisite or corequisite for COB 318. COB 318 is a prerequisite for COB 487.

⁸ COB 487 must be taken during the senior year.

Major Requirements

Finance Major Core Courses

- FIN 360. Analytical Methods in Finance *3.00*
- FIN 365. Intermediate Financial Management *3.00*
- FIN 371. Principles of Investments *3.00*
- FIN 488. Advanced Financial Policy *3.00*

Additional Information

In addition to these core courses, the student majoring in finance must successfully complete 12 credit hours of finance elective courses. Finance electives include any 300-level or 400-level finance course other than FIN 301, FIN 345, FIN 499 and the finance major core courses.

A student may choose up to one of the following courses to satisfy the finance elective credit hours: ACTG 313, ACTG 343, ACTG 344, ACTG 377, BLAW 360, BLAW 470, BLAW 480, BLAW 494, BLAW 495, BLAW 496, BLAW 497, BLAW 498, CIS 304, CIS 330, CIS 393, CIS 463 and BSAN 393. A finance major cannot take more than 10 credit hours of FIN prefix courses in any one semester.

Recommended Schedule for Majors

First Two Years

Students planning to major in finance must complete the 30-31 hour, lower-division B.B.A. core curriculum prior to enrolling in upper-division core courses, normally taken in the first semester of the junior year. It is expected that the lower-division core curriculum will be completed during the first two years of study along with most of the university General Education curriculum. Failing to complete all lower-division B.B.A. core requirements on time will delay enrollment in upper-division core and major courses.

Third and Fourth Years

Finance majors will follow the course schedule below to complete the final two years of their program. It is possible to deviate from this program, but care must be taken to ensure that all course prerequisites are met. Finance majors are encouraged to enroll in FIN 360 during the same semester as COB 300 or during the semester following completion of COB 300. Note that students taking FIN 360 concurrently with COB 300 will have more choices in finance electives in subsequent semesters because FIN 360 is a prerequisite for most finance courses. It is anticipated that students will complete the finance requirements in three semesters following COB 300.

Third Year

First Semester

- COB 300A. Integrative Business: Management 3.00
- COB 300B. Integrative Business: Finance 3.00
- COB 300C. Integrative Business: Operations 3.00
- COB 300D. Integrative Business: Marketing 3.00
- FIN 360. Analytical Methods in Finance 3.00

Second Semester

- FIN 365. Intermediate Financial Management 3.00
- FIN 371. Principles of Investments 3.00
- Finance elective 3 *Credit Hours*

Fourth Year

COB 487 is required during a student's senior year but may be taken either semester.

First Semester

- Finance electives 6 *Credit Hours*

Second Semester

- COB 487. Strategic Management 3.00
- FIN 488. Advanced Financial Policy 3.00
- Finance elective 3 *Credit Hours*

Concentrations

Though not required, finance majors may elect a concentration. The concentrations are financial analysis, financial technology and analytics, and risk management. Students electing these concentrations will be taking specific electives in place of the required four electives for the major. Finance majors who wish to declare a concentration may do so once accepted into COB 300 or during any semester following. A student must earn a 2.0 in the courses designated for a concentration in order to have successfully completed the concentration.

Financial Analysis Concentration

Many James Madison University finance graduates go on to careers in financial analysis, and the need for financial analysts remains strong. The financial analysis concentration helps prepare students for these careers and also Levels I and II of the Chartered Financial Analyst exam.

Students wishing to declare and complete the financial analysis concentration must have a minimum of a "B" in COB 241 and COB 242.

Required Courses

- FIN 362. Financial Analysis 3.00

- FIN 378. Fixed Income Analysis *3.00*
- FIN 380. Elemental and Derivative Securities Analysis *3.00*

Choose one of the following: 3 Credit Hours

- ACTG 343. Corporate Financial Reporting I *3.00*
- FIN 434. Fundamentals of Financial Data Science *3.00*
- FIN 475. Financial Modeling and Risk Analysis *3.00*

Total: 12 Credit Hours

Financial Technology and Analytics Concentration

The changing landscape of finance requires increased knowledge of technology. The financial technology and analytics concentration will prepare the students to be agile in financial information systems and expose them to various analytical and visualization tools.

Required Courses

- FIN 434. Fundamentals of Financial Data Science *3.00*
- FIN 471. Portfolio Management *3.00*
- FIN 475. Financial Modeling and Risk Analysis *3.00*

Choose one of the following: 3 Credit Hours

- BSAN 393. Data Mining for Business Analytics *3.00*
- CIS 304. Enterprise Architecture *3.00*
- CIS 330. Database Design and Application *3.00*
- CIS 393. Data Mining for Business Analytics *3.00*

Total: 12 Credit Hours

Risk Management Concentration

A focus in risk management is designed for finance majors pursuing a more in-depth review of the issues facing organizations and the tools needed to address those uncertainties. In the risk management concentration, students focus on the theory of risk management, risk identification, risk measurement and applications in the form of risk modeling techniques such as Value-at-Risk and Monte Carlo simulations.

Required Courses

- FIN 380. Elemental and Derivative Securities Analysis *3.00*
- FIN 450. Financial Risk Management *3.00*
- FIN 451. Risk Management II *3.00*
- FIN 475. Financial Modeling and Risk Analysis *3.00*

Total: 12 Credit Hours

Quantitative Finance Major with a Minor in Economics and Mathematics, B.S.

Bachelor of Science in Quantitative Finance

The B.S. degree with a major in quantitative finance is designed to prepare students for careers in financial engineering, structured finance, financial modeling, securitization, actuarial science, financial analysis and portfolio management. The focus of this major is on problem solving in the quantitative areas of finance with an added emphasis on the application of complex securities to a variety of financial situations.

The quantitative finance program, which is a cross disciplinary major with many courses co-listed with the math department, is a highly structured program requiring minor fields in both mathematics and economics, though many students choose to double major in mathematics and quantitative finance. If the double major is selected, students are required to take ECON 200, ECON 201 and ECON 331, but are not required to complete the economics minor. Students electing this program should consult with their major adviser as early as possible to identify the appropriate course sequencing. Students electing to double major in mathematics and quantitative finance should also consult with a mathematics adviser as soon as possible.

Students enrolled in James Madison University who wish to change their major to quantitative finance should go to the Student Center in MyMadison to submit a request. Students must be in good academic standing to change their major to quantitative finance and, if they have taken any FIN prefix courses at the time of the change request, must meet the prerequisites for the required courses in the quantitative finance major.

Transfer Credit

Each program in the CoB will accept no more than two courses of transfer credit toward the major except in extraordinary circumstances. The major is defined as the course work required by a major field of study in addition to the lower and upper-level BBA core courses. For a course to be considered for acceptance in the student's major, it must have been completed in an AACSB International-accredited business program, or a similarly accredited program, at a four-year university.

In general, all finance course work must be completed at JMU. Transfer credit for finance courses is awarded only in certain circumstances. In no case will transfer credit be awarded for FIN 488. Contact the department head for more information on transfer credit.

Quantitative Finance Major with a minor in Economics and Mathematics

Degree Requirements

- General Education *41 Credit Hours*¹
- Scientific Literacy requirement *3 Credit Hours*²
- Electives *11 Credit Hours*
- Major requirements (listed below) *65 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² In addition to course work taken to fulfill General Education requirement.

Major Requirements

- COB 241. Financial Accounting *3.00*

Finance Courses: 27 Credit Hours

- FIN 250. Introduction to Quantitative Finance *3.00*
- FIN 365. Intermediate Financial Management *3.00*
- FIN 371. Principles of Investments *3.00*
- FIN 380. Elemental and Derivative Securities Analysis *3.00*

- FIN 395. Mathematical Finance *3.00*
or
- MATH 395. Mathematical Finance *3.00*

- FIN 405. Securities Pricing *3.00*
or
- MATH 405. Securities Pricing *3.00*

- FIN 450. Financial Risk Management *3.00*
- FIN 480. Seminar in Financial Engineering *3.00*

Plus one of the following:

- FIN 328. Time Series Analysis *3.00*
or
- MATH 328. Time Series Analysis *3.00*

- FIN 372. International Finance and Payments *3.00*
or
- ECON 372. International Finance and Payments *3.00*

- FIN 451. Risk Management II *3.00*
- FIN 455. Advanced International Financial Management *3.00*
- FIN 471. Portfolio Management *3.00*
- FIN 475. Financial Modeling and Risk Analysis *3.00*

Mathematics Courses: 27 Credit Hours

(Four of the 27 credits count for General Education)

- MATH 235. Calculus I [C3QR] *4.00*¹
- MATH 236. Calculus II *4.00*
- MATH 237. Calculus III *4.00*
- MATH 238. Linear Algebra with Differential Equations *4.00*

- MATH 248. Computers & Numerical Algorithms 4.00
- MATH 318. Introduction to Probability and Statistics 4.00

One of the following recommended MATH electives:

- MATH 423. Stochastic Process 3.00
- MATH 424. Statistical Decision Theory 3.00
- MATH 426. Probability and Mathematical Statistics I 3.00
- MATH 440. Fourier Analysis and Partial Differential Equation 3.00

Economics Courses: 18 Credit Hours

(Six of the 18 credits count for General Education)

- ECON 200. Introduction to Macroeconomics [C4GE] 3.00²
- ECON 201. Introduction to Microeconomics 3.00³
- ECON 331. Intermediate Microeconomic Theory 3.00

- ECON 332. Intermediate Macroeconomic Theory 3.00
and

- MATH 322. Applied Linear Regression 3.00
or
- ECON 385. Econometrics 3.00

- One upper-level economics elective 3 *Credit Hours*

Total: 75 Credit Hours

Footnotes

¹ General Education requirement Cluster Three .

² General Education requirement Cluster Four.

³ Satisfies the scientific literacy requirement.

Concentration

Though not required, Quantitative Finance majors may elect a concentration. The concentrations are financial analysis and risk management. Students electing these concentrations will be taking specific FIN electives.

Financial Analysis Concentration

The financial analysis concentration helps prepare students for careers as financial analysts and also Levels I and II of the Chartered Financial Analyst (CFA) exam.

Required Courses

- FIN 362. Financial Analysis 3.00
- FIN 378. Fixed Income Analysis 3.00
- FIN 380. Elemental and Derivative Securities Analysis 3.00

Choose one of the following: 3 Credit Hours

- ACTG 343. Corporate Financial Reporting I 3.00
- FIN 434. Fundamentals of Financial Data Science 3.00
- FIN 475. Financial Modeling and Risk Analysis 3.00

Total: 12 Credit Hours

Risk Management Concentration

Though not required, quantitative finance majors may elect the risk management concentration. Students electing this concentration will be taking specific electives and two additional electives. Students may add this concentration to their program when they progress to FIN 380 .

Quantitative finance majors who wish to declare the risk management concentration may do so after successfully completing FIN 250 or any semester following.

A focus in risk management is designed for qualitative finance majors pursuing a more in-depth review of the issues facing organizations and the tools needed to address those uncertainties. In the risk management concentration, students focus on the theory of risk management, risk identification, risk measurement and applications in the form of risk modeling techniques such as Value-at-Risk and Monte Carlo simulations.

Required Courses

- FIN 380. Elemental and Derivative Securities Analysis 3.00
- FIN 450. Financial Risk Management 3.00
- FIN 451. Risk Management II 3.00
- FIN 475. Financial Modeling and Risk Analysis 3.00

Total: 12 Credit Hours

Additional Information

FIN 450 is a requirement for quantitative finance majors and FIN 451 and FIN 475 are possible electives for this major. Students electing this concentration take two courses beyond the typical quantitative finance major.

Quantitative Finance/Mathematics Double Major, B.S.

Bachelor of Science in Quantitative Finance

The B.S. degree with a major in quantitative finance is designed to prepare students for careers in financial engineering, structured finance, financial modeling, securitization, actuarial science, financial analysis and portfolio management. The focus

of this major is on problem solving in the quantitative areas of finance with an added emphasis on the application of complex securities to a variety of financial situations.

The quantitative finance program, which is a cross disciplinary major with many courses co-listed with the math department, is a highly structured program requiring minor fields in both mathematics and economics, though many students choose to double major in mathematics and quantitative finance. If the double major is selected, students are required to take ECON 200, ECON 201 and ECON 331, but are not required to complete the economics minor. Students electing this program should consult with their major adviser as early as possible to identify the appropriate course sequencing. Students electing to double major in mathematics and quantitative finance should also consult with a mathematics adviser as soon as possible.

Students enrolled in James Madison University who wish to change their major to quantitative finance should go to the Student Center in MyMadison to submit a request. Students must be in good academic standing to change their major to quantitative finance and, if they have taken any FIN prefix courses at the time of the change request, must meet the prerequisites for the required courses in the quantitative finance major.

Transfer Credit

Each program in the CoB will accept no more than two courses of transfer credit toward the major except in extraordinary circumstances. The major is defined as the course work required by a major field of study in addition to the lower and upper-level BBA core courses. For a course to be considered for acceptance in the student's major, it must have been completed in an AACSB International-accredited business program, or a similarly accredited program, at a four-year university.

In general, all finance course work must be completed at JMU. Transfer credit for finance courses is awarded only in certain circumstances. In no case will transfer credit be awarded for FIN 488. Contact the department head for more information on transfer credit.

Quantitative Finance/Mathematics Double Major

Degree Requirements

- General Education *41 Credit Hours*¹
- Scientific Literacy requirement *3 Credit Hours*²
- Free electives *0-1 Credit Hours*
- Major requirements (listed below) and electives *75-76 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

- FIN 450. Financial Risk Management *3.00*
- FIN 480. Seminar in Financial Engineering *3.00*

Plus one of the following:

- FIN 328. Time Series Analysis *3.00*
- MATH 328. Time Series Analysis *3.00*
- FIN 372. International Finance and Payments *3.00*
- ECON 372. International Finance and Payments *3.00*
- FIN 451. Risk Management II *3.00*
- FIN 455. Advanced International Financial Management *3.00*
- FIN 471. Portfolio Management *3.00*
- FIN 475. Financial Modeling and Risk Analysis *3.00*

Economics Courses: 9 Credit Hours

(Three of which count for General Education and three of which count for the B.S. scientific literacy requirement)

- ECON 200. Introduction to Macroeconomics [C4GE] *3.00*
- ECON 201. Introduction to Microeconomics *3.00*
- ECON 331. Intermediate Microeconomic Theory *3.00*

Mathematics Courses: 42-43 Credit Hours

(Four of which count for General Education)

- MATH 235. Calculus I [C3QR] *4.00*
- MATH 236. Calculus II *4.00*
- MATH 237. Calculus III *4.00*
- MATH 238. Linear Algebra with Differential Equations *4.00*
- MATH 245. Discrete Mathematics *3.00*
- MATH 248. Computers & Numerical Algorithms *4.00*
- MATH 318. Introduction to Probability and Statistics *4.00*
- MATH 410. Advanced Calculus I *3.00*
- MATH 430. Abstract Algebra I *3.00*

One of the following mathematics electives:

- MATH 411. Advanced Calculus II *3.00*
- MATH 431. Abstract Algebra II *3.00*
- MATH 434. Advanced Linear Algebra *3.00*
- MATH 435. Introduction to Topology *3.00*

One of the following recommended mathematics electives:

- MATH 322. Applied Linear Regression *3.00*
- MATH 423. Stochastic Process *3.00*
- MATH 424. Statistical Decision Theory *3.00*
- MATH 426. Probability and Mathematical Statistics I *3.00*
- MATH 440. Fourier Analysis and Partial Differential Equation *3.00*

Total: 81-82 Credit Hours

Footnotes

¹ General Education requirement Cluster Three.

² General Education requirement Cluster Four.

³ Satisfies the scientific literacy requirement.

Concentration

Though not required, Quantitative Finance majors may elect a concentration. The concentrations are financial analysis and risk management. Students electing these concentrations will be taking specific FIN electives.

Financial Analysis Concentration

The financial analysis concentration helps prepare students for careers as financial analysts and also Levels I and II of the Chartered Financial Analyst (CFA) exam.

Required Courses

- FIN 362. Financial Analysis *3.00*
- FIN 378. Fixed Income Analysis *3.00*
- FIN 380. Elemental and Derivative Securities Analysis *3.00*

Choose one of the following: 3 Credit Hours

- ACTG 343. Corporate Financial Reporting I *3.00*
- FIN 475. Financial Modeling and Risk Analysis *3.00*
- FIN 434. Fundamentals of Financial Data Science *3.00*

Total : 12 Credit Hours

Risk Management Concentration

Though not required, quantitative finance majors may elect the risk management concentration. Students electing this concentration will be taking specific electives and two additional electives. Students may add this concentration to their program when they progress to FIN 380 .

Quantitative finance majors who wish to declare the risk management concentration may do so after successfully completing FIN 250 or any semester following.

A focus in risk management is designed for qualitative finance majors pursuing a more in-depth review of the issues facing organizations and the tools needed to address those uncertainties. In the risk management concentration, students focus on the theory of risk management, risk identification, risk measurement and applications in the form of risk modeling techniques such as Value-at-Risk and Monte Carlo simulations.

Required Courses

- FIN 380. Elemental and Derivative Securities Analysis *3.00*
- FIN 450. Financial Risk Management *3.00*
- FIN 451. Risk Management II *3.00*
- FIN 475. Financial Modeling and Risk Analysis *3.00*

Foreign Languages, Literatures and Cultures, Department of

Instructors

D. Campora, G. Danielli, M. Fiorello, E. Guolo, I. Haseloff, S. Hernández, H. Moreira, V. Riso

Mission

The Department of Foreign Languages, Literatures and Cultures (FLLC) is a central site on campus for the implementation of James Madison University internationalization efforts. Through its course offerings, study abroad programs, organizations and

clubs, and the presence of faculty with research areas in diverse foreign cultures, the department embodies cultural diversity, particularly international diversity, at JMU. The strong presence of international students and faculty on campus is a critical indicator of this recognition of international diversity.

The Department of Foreign Languages, Literatures and Cultures offers students and the community a broad range of educational courses and programs that help develop foreign language competence, a global perspective, and an understanding of foreign cultures both ancient and modern.

The department's mission is to ensure that all graduates with a B.A. have sufficient knowledge of a modern foreign language to build fluency in that language when future personal or professional needs require it; prepare language majors for success as professionals in language-related career fields; enhance the education of non-language majors by providing them foreign language skills that complement their chosen major; teach understanding and appreciation of foreign cultures and provide basic knowledge about the literature, culture, and intellectual achievements of countries other than the U.S.; play a leading role in internationalizing the college curriculum; provide opportunities for language and cultural study abroad; support cross-listed courses for the departments of English and History as part of their major requirements, and the General Education program with courses for the Cluster Two requirements.

The department also plays an important role in the university cross disciplinary minors by offering courses for Russian Studies, Latin American, Latinx and Caribbean Studies Minor, World Literature and Classical Studies.

Goals and Objectives

The department strives to fulfill this mission by pursuing the following goals. Within each area, students should:

Knowledge

- Be familiar with a variety of linguistic principles in both the target language and their own.
- Understand the major literary movements of the target culture and be familiar with selected major literary texts of the target culture.
- Be familiar with the great ideas of humanity and of Western civilization in particular, especially as they have originated in or influenced the target culture.
- Understand the institutions and history of the target culture.
- Understand similarities and differences between the target culture and their own.

Skills

- Demonstrate reading, writing, listening and speaking skills in both English and the target language.
- Think critically, analytically and objectively.
- Make and formulate informed aesthetic and linguistic judgments.
- Research a topic thoroughly using both traditional and online sources.
- Use computers effectively for a variety of purposes, from word processors and spell checkers in the target language to terminological databases and machine-aided translation tools.

Experiences

- Ponder what it means to be human in response to literary and cultural studies.
- Engage great texts and great ideas.
- Realize what it is like to be a foreigner with incomplete cultural and linguistic competence.
- See the world through the filter of another language and culture.

- Realize that every language is an imperfect vehicle, riddled with traps and ambiguities.

Attitudes

- Embrace life-long learning.
- Approach issues from cross disciplinary, global and historical perspectives.
- Respect diversity among cultures and within any given culture.
- Respect the opinions and beliefs of other people – and other peoples – while defining and advancing their own.
- Recognize the contingent nature of knowledge.

Program

The department offerings address a wide spectrum of student needs. Our program seeks to:

- Offer a minor and a major in a specific language.
- Strongly recommend a second major and/or minor in another discipline.
- Offer advanced courses for cross disciplinary programs.
- Offer basic courses required for Bachelor of Arts candidates.
- Organize and participate in Honors courses.
- Provide General Education courses in Cluster Two and reinforce Cluster One goals in all courses.

Faculty

The faculty members of the department strive to:

- Meet the ever-evolving needs of the students.
- Develop innovative teaching techniques, courses and programs while preserving a traditional core.
- Engage consistently in scholarship.
- Provide dutiful service to the college, the university and the profession.
- Be a role model for students as educators and as human beings.

General Objectives

All language majors are expected to acquire:

- Knowledge of critical thinking methods and the ability to apply them.\
- Know-how with regard to computers, including word processing skills and the ability to use software devoted to grammar exercises, vocabulary development, literature and culture.
- An appreciation and affective feel for other cultures in addition to an intellectual perspective.

Specific Objectives

The Foreign Languages, Literatures and Cultures offers programs designed to:

- Teach students to understand and speak a language with relative ease.
- Develop skills in reading and writing.
- Provide an acquaintance with foreign literatures.
- Develop an appreciation of foreign cultures.

- Prepare students for professions in education, government work and international trade or for research leading to advanced degrees.

Career Opportunities

- Banking
- Criminal Justice
- Education
- Foreign Service
- Imports/Exports
- Law
- Management
- Marketing
- Medicine
- Ministry
- Museum work
- Public Relations
- Social work
- Translation

Co-curricular Organizations

The department supports the following organizations:

- Le Cercle Francophone
- Dobro Slovo
- German Club
- Il Circolo Culturale Italiano
- Phi Sigma Iota
- Russian Club
- El Club de Español
- Sigma Delta Pi

Minimum Grades

A student must receive a minimum grade of "C-" for course credits to count toward any major or minor in the Department of FLLC.

International Education and Studies Abroad

The department strongly supports – and greatly benefits from – the university's excellent Studies Abroad programs. Majors are strongly encouraged to spend a significant amount of time abroad and teaching licensure candidates must either spend a semester abroad and/or demonstrate an advanced level of foreign language proficiency. Students are urged to check with their language advisers to see which courses taken abroad count toward the language major. Majors in modern foreign languages must take 33 credit hours of foreign language courses specified by the department. Students are required to take 18 of those in courses taught in the Department of Foreign Languages, Literatures and Cultures based on the main JMU campus.

Minors in modern foreign languages must take 18 credit hours of foreign language courses specified by the department. Students are required to take nine of those in courses taught in the Department of Foreign Languages, Literatures and Cultures based on the main JMU campus.

Placement Tests

The score a student receives from the online placement test will be valid for registering in a language class that takes place up to and including the second semester of the sophomore year at JMU. A student who chooses to wait until his/her junior year to begin language study will be required to repeat the online placement test. Students will be placed in a class according to the new score, even if this means starting in a lower-level class than was indicated by the first placement test. In this circumstance, the student will take more classes to fulfill the language requirement for the B.A. degree.

The faculty of the Department of Foreign Languages, Literatures and Cultures strongly recommend that students begin their required language classes no later than the second semester of the sophomore year, and ideally as soon as possible after taking the online placement exam.

Semester Registering	Accepted Placement Score
Fall, first year	First year test
Spring, first year	First year test
Fall, sophomore year	First year test
Spring, sophomore year	First year test
Fall, junior year (and all later semesters)	Must retake test in spring of sophomore year or later in order to register for language classes for this semester and all later semesters

Heritage Speakers and International Students

Heritage speakers who would like to pursue a major or minor in FLLC studies in their heritage language must take the JMU Foreign Language placement test. Placement into level 300 is required in order to qualify to take the examination for credit for 300. Students who pass the examination for credit for 300 are entitled to register in other FLLC courses that have 300 as a prerequisite or to proceed to take the examination for credit for 320.

International students who are admitted to JMU and would like to pursue a major or minor in FLLC studies in their native language(s) need to take the examination for credit for 300 and 320 and then register for more advanced courses.

Heritage Speakers and international students who need to satisfy a language requirement need to complete a waiver form after being tested for proficiency.

Heritage Speakers and international students who wish to take elective credits in their language need to be tested for proficiency.

For testing of languages not offered by FLLC department, contact the department.

Business French Minor

Courses

- FR 300. Grammar and Communication *3.00*
- FR 308. Contemporary French Civilization *3.00*
- FR 320. French Oral and Written Communication *3.00*
- FR 330. Business French *3.00*
- FR 351. French/English Translation *3.00*
- One 300 or 400-level FR course *3 Credit Hours*

Total: 18 Credit Hours

Business German Minor

Courses

- GER 300. Grammar and Communication *3.00*
- GER 308. Contemporary German Civilization *3.00*
- GER 320. Oral and Written Communication *3.00*
- GER 330. Business German *3.00*
- GER 341. Translation Competencies *3.00*
- GER 375. Business and Society in Germany *3.00*

Total: 18 Credit Hours

Business Italian Minor

Courses

Up to two courses in English may be counted toward the total minor requirement, with approval of the academic unit head.

- ITAL 300. Italian Grammar and Communication *3.00*
- ITAL 308. Contemporary Italian Civilization *3.00*
- ITAL 320. Oral and Written Communication *3.00*
- ITAL 330. Business Italian *3.00*
- ITAL 375. Business and Society in Italy *3.00*
- ITAL 435. Translation Strategies *3.00*

Business Spanish Minor

Business Spanish

Adviser: Veronica Haun

Phone: (540) 568-6851

Email: haunvx@jmu.edu

The professional minor in business Spanish is intended for students who wish to consolidate and improve their knowledge of Spanish in several business areas. The main aim of the minor is to teach students how to use specific business terms in Spanish and to handle selling techniques, negotiation strategies, product presentations, commercial activities, marketing, and business correspondence in Spanish. Students acquire a greater knowledge of Spanish as well as deeper understanding of Spanish or Hispanic societies and their business cultures.

The minor comprises one linguistic component, one elective component, one translation/interpretation component and three profession-specific linguistic components.

Required Courses

- SPAN 300. Grammar and Communication *3.00*
- SPAN 330. Business Spanish *3.00*
- SPAN 430. Advanced Business Spanish *3.00*

One elective Spanish course: 3 Credit Hours

- SPAN 307. Spanish Civilization *3.00*
- SPAN 308. Latin American Civilization *3.00*
- SPAN 311. Contrastive Linguistics *3.00*

- SPAN 320. Oral and Written Communication *3.00*
or
- SPAN 321. Oral and Written Communication (for Heritage Speakers) *3.00*

- SPAN 407. Aspects of Spanish Civilization *3.00*
- SPAN 447. Special Topics in Spanish Civilization and Culture *3.00*

Choose one: 3 Credit Hours

- SPAN 485. Business and Society in Latin America *3.00*
- SPAN 486. Business and Society in Spain *3.00*

Choose one: 3 Credit Hours

- SPAN 435. Translation Strategies *3.00*
- SPAN 436. Introduction to Interpretation *3.00*

Total: 18 Credit Hours

Legal Spanish Minor

Adviser: Marianne Mason
Phone: (540) 568-6327
Email: masonmx@jmu.edu

The minor in legal Spanish is designed for students who wish to improve and consolidate their knowledge of Spanish in several legal areas. Students acquire a basic understanding of the differences between common law and Roman law and investigate

several branches of law such as civil law, labor law, criminal law and commercial law in Spanish-speaking countries. The main aims of the minor are to teach students how to use specific legal terms in Spanish and to manage legal documents such as contracts, as well as to prepare students to understand cultural differences and to identify and communicate terminology and phraseology needed for effective cross-cultural communication in the public safety arena. The minor provides a framework for learning the appropriate Spanish usage for thematic areas such as victim reporting, field interviews, investigations, traffic stops, armed and dangerous calls, medical emergencies, and public safety situations.

Required Courses

- SPAN 300. Grammar and Communication 3.00
- SPAN 360. Spanish for Public Safety 3.00
- SPAN 370. Legal Spanish 3.00

- SPAN 435. Translation Strategies 3.00
or
- SPAN 436. Introduction to Interpretation 3.00
(SPAN 435 or SPAN 436, but not both)

- SPAN 470. Advanced Legal Spanish 3.00
- SPAN 495. Practical Spanish for Public Safety/Legal Spanish 3.00

Total: 18 Credit Hours

Medical Spanish Minor

Adviser: Diana Galarreta
Phone: (540) 568-6128
Email: galarrdf@jmu.edu

For health service professionals, knowledge of medical Spanish is no longer an option but a necessity. Unless they have a reasonable level of Spanish, communication with patients whose only language is Spanish will be difficult. Courses in medical Spanish are therefore hugely relevant today. The minor in medical Spanish is intended for all future health service professionals, including physicians and their assistants, nurses, pharmacists, dentists, physical therapists, occupational therapists, medical laboratory technicians, emergency medical technicians, medical aides, medical interpreters, healthcare industry professionals and psychologists.

The minor comprises one linguistic component, one elective component, one translation/interpretation component and three profession-specific linguistic components.

Required Courses

- SPAN 300. Grammar and Communication 3.00
- SPAN 365. Medical Spanish 3.00
- SPAN 475. Advanced Medical Spanish 3.00
- SPAN 476. Culture and Medicine in Latin America 3.00

One elective Spanish course: 3 Credit Hours

- SPAN 307. Spanish Civilization 3.00

- SPAN 308. Latin American Civilization *3.00*
- SPAN 320. Oral and Written Communication *3.00*
or
- SPAN 321. Oral and Written Communication (for Heritage Speakers) *3.00*
- SPAN 407. Aspects of Spanish Civilization *3.00*
- SPAN 447. Special Topics in Spanish Civilization and Culture *3.00*

Choose one: 3 Credit Hours

- SPAN 435. Translation Strategies *3.00*
- SPAN 436. Introduction to Interpretation *3.00*
- SPAN 494. Practical Medical Spanish *3.00*

Total: 18 Credit Hours

Modern Foreign Language Minor

A minor in a modern foreign language consists of the specified upper-division courses in a specific language.

Arabic

Courses

- ARAB 300. Arabic Grammar and Communication *3.00*
- ARAB 320. Arabic Oral and Written Communication *3.00*
- One 300 or 400-level ARAB literature course *3 Credit Hours*
- Three other 300 or 400-level ARAB courses *9 Credit Hours*

Total: 18 Credit Hours

Chinese

Courses

- CHIN 300. Chinese Grammar and Communication *3.00*
- CHIN 320. Chinese Oral and Written Communication *3.00*
- One 300 or 400-level CHIN literature course *3 Credit Hours*
- Three other 300 or 400-level CHIN courses *9 Credit Hours*

Total: 18 Credit Hours

French

Courses

- FR 300. Grammar and Communication 3.00
- FR 320. French Oral and Written Communication 3.00
- One 300 or 400-level FR literature course 3 *Credit Hours*
- Three 300 or 400-level FR courses 9 *Credit Hours*

Total: 18 Credit Hours

German

Courses

- GER 300. Grammar and Communication 3.00
- GER 320. Oral and Written Communication 3.00
- One 300 or 400-level GER literature course 3 *Credit Hours*
- Three other 300 or 400-level GER courses 9 *Credit Hours*

Total: 18 Credit Hours

Italian

Courses

- ITAL 300. Italian Grammar and Communication 3.00
- ITAL 320. Oral and Written Communication 3.00
- One 300- or 400-level Italian literature course¹ 3 *Credit Hours*
- Three 300- or 400-level other Italian courses¹ 9 *Credit Hours*

Total: 18 Credit Hours

Footnote

¹ Up to two courses in English may be counted toward the minor requirements with the approval of the academic unit head.

Russian

Courses

- RUS 300. Grammar and Communication 3.00
- RUS 320. Russian Oral and Written Communication 3.00
- One 300 or 400-level RUS literature course 3 *Credit Hours*
- Three 300 or 400-level RUS courses 9 *Credit Hours*

Total: 18 Credit Hours

Spanish

Courses

- SPAN 300. Grammar and Communication *3.00*
- SPAN 320. Oral and Written Communication *3.00*
or
- SPAN 321. Oral and Written Communication (for Heritage Speakers) *3.00*
- SPAN 335. Introduction to Spanish Literature *3.00*
- Three other 300 or 400-level SPAN courses *9 Credit Hours*

Total: 18 Credit Hours

Modern Foreign Languages Teaching Licensure

Interim Coordinator: José I. Barrio Olano

Phone: (540) 568-6128

Email: barrioji@jmu.edu

In conjunction with the College of Education, the department offers programs leading to the teaching license in French, German, Italian and Spanish. In addition to the General Education and academic major requirements, students desiring preK-12 teaching licensure in French, German, Italian or Spanish must be accepted for admission to the teacher education program offered by the College of Education prior to enrolling in professional education courses. In addition to the 33 foreign language credits, an additional 39 credits are required for teaching licensure.

Students interested in teacher licensure in French, German, Italian or Spanish must also meet the specific curriculum requirements of their foreign language major as part of the undergraduate academic degree.

For a complete description of admission and retention policies and procedures for teacher education, refer to the College of Education. Students seeking licensure are encouraged to consult regularly with the teaching licensure coordinator.

Required Courses

- PSYC 160. Life Span Human Development [C5SD] *3.00*
- EDUC 300. Foundations of American Education *3.00*
- EXED 303. Foundations of Classroom and Behavior Management *3.00*
- MSSE 370. General Instructional Methods for Grades 6-12 *3.00*
- MSSE 371. Clinical Experience in Adolescent Education *1.00*
- FLED 370. Modern Foreign Language Assessment *3.00*
- FLED 470. Methods of Modern Foreign Language Teaching *3.00*
- FLED 471. Modern Foreign Language Field Experience *3.00*
- FLED 475. Supervised Student Teaching Experience *12.00*
- FLED 476. Student Teaching Seminar *3.00*
- LED 420. Content Area Literacy, K-12 *2.00*

Total: 39 Credit Hours

Modern Foreign Languages, B.A.

Bachelor of Arts in Modern Foreign Languages

Students can earn both a B.A. in Modern Foreign Languages and a minor in a specific language. Currently the department provides:

- Four years of instruction in Arabic, French, German, Italian and Spanish.
- Three years of instruction Chinese and Japanese.
- Two years of instruction in Ancient Greek, Latin, Korean, Persian, Portuguese, Russian and Swahili.

The minimum requirement for a major in languages is 33 upper-division credit hours in a specific language.

Additional Language

Students majoring in modern foreign languages must complete the intermediate level of a second language unless they are:

- Completing a second major.
- Completing a teaching licensure or an education minor.
- Completing two degrees.
- Completing a pre-professional health program.

If the student has a previous background in a second language, the second language requirement may also be satisfied by placing out of it through the Department of Foreign Languages, Literatures and Cultures' placement test. However, in this case, the student must proportionally increase the number of university electives as indicated in the B.A. degree requirements.

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Foreign language classes (intermediate level required) *0-14 Credit Hours*²
- Second Foreign Language (intermediate level required) *0-14 Credit Hours*²
- Philosophy course (in addition to General Education courses) *3 Credit Hours*
- University electives *15-43 Credit Hours*³
- Major requirements (listed below) *33 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² The foreign language requirement and the second language requirement may be satisfied by successful completion of the second semester of the intermediate level of the student's chosen language (typically 232) or by placing out of that language through the Department of Foreign Languages, Literatures and Cultures' placement test. The second language is not required of double majors or education minors or of those seeking teaching licensure.

³ The number of university electives varies depending on the number of actual credits earned with the first and second language requirements. These language requirements may be fully or partly satisfied through the Department of Foreign Languages,

Literatures and Cultures' placement tests, but these tests do not confer actual credits and subsequently the number of university electives students take will vary.

Major Requirements

All language sections share certain core requirements.

Courses

- Two language courses (300 and 320 or 321) *6 Credit Hours*¹
- Two civilization courses (307 and 308) *6 Credit Hours*
- Literature courses in the target language *6-12 Credit Hours*
- Other courses as specified by the section *9-15 Credit Hours*²

Total: 33 Credit Hours

Footnotes

¹ These courses fulfill the College of Arts and Letters writing-intensive requirement for the major.

² The courses required for Spanish majors are different, as shown in the Spanish listing.

Arabic

Courses

- ARAB 300. Arabic Grammar and Communication *3.00*¹
- ARAB 307. A History of Islamic Civilization 600-1600 A.D. *3.00*
- ARAB 308. Contemporary Islamic Civilization *3.00*
- ARAB 320. Arabic Oral and Written Communication *3.00*
- ARAB 371. Advanced Arabic Grammar and Translation *3.00*
- Two 300- or 400-level ARAB literature courses *6 Credit Hours*
- Three other 300- or 400-level ARAB courses *9 Credit Hours*

Choose one of the following courses: 3 Credit Hours

- ARAB 400. Advanced Arabic Writing and Conversation *3.00*
- ARAB 411. Colloquial Egyptian Arabic I *3.00*
- ARAB 412. Colloquial Egyptian Arabic II *3.00*
- ARAB 413. Colloquial Levantine Arabic I (Jordanian/Palestinian) *3.00*
- ARAB 414. Colloquial Levantine Arabic II (Syrian/Lebanese) *3.00*

Total: 33 Credit Hours

Footnote

¹ This course fulfills the College of Arts and Letters writing-intensive requirement for the major.

French

Courses

- FR 300. Grammar and Communication 3.00 ¹
- FR 307. History of French Civilization 3.00
- FR 308. Contemporary French Civilization 3.00
- FR 320. French Oral and Written Communication 3.00
- FR 335. Introduction to French Literature 3.00
- Three 300- or 400-level FR literature courses 9 *Credit Hours*
- Three other 300- or 400-level FR courses 9 *Credit Hours*

Total: 33 Credit Hours

Footnote

¹ This course fulfills the College of Arts and Letters writing-intensive requirement for the major.

German

Courses

- GER 300. Grammar and Communication 3.00 ¹
- GER 307. History of German Civilization 3.00
- GER 308. Contemporary German Civilization 3.00
- GER 320. Oral and Written Communication 3.00
- GER 341. Translation Competencies 3.00
- Three 300- or 400-level GER literature courses 9 *Credit Hours*
- Three elective 300- or 400-level GER courses 9 *Credit Hours*

Total: 33 Credit Hours

Footnote

¹ This course fulfills the College of Arts and Letters writing-intensive requirement for the major.

Italian

Courses

- ITAL 300. Italian Grammar and Communication 3.00 ¹
- ITAL 307. Italian Civilization 3.00
- ITAL 308. Contemporary Italian Civilization 3.00
- ITAL 320. Oral and Written Communication 3.00
- ITAL 335. Introduction to Italian Literature 3.00
- ITAL 435. Translation Strategies 3.00

- Two 300- or 400-level ITAL literature courses² *6 Credit Hours*
- Three elective 300- or 400-level ITAL courses² *9 Credit Hours*

Total: 33 Credit Hours

Footnote

¹ This course fulfills the College of Arts and Letters writing-intensive requirement for the major.

² *Up to three courses taught in English may be counted toward the total major unit requirement, with the approval of your academic unit head.*

Spanish-English Translation and Interpretation Minor

Adviser: Marianne Mason

Phone: (540) 568-6327

Email: masonmx@jmu.edu

Translation and interpretation are two of today's fastest growing professions. An obvious requirement for anyone wishing to enter these professions is the ability to speak two languages fluently. Students who wish to make a positive impact as a translator or interpreter, however, require more than just the ability to speak two languages well. What they need is the linguistic, cultural and technical expertise they can only get from courses designed specifically to prepare them for the demands of these challenging professions. In the minor in translation and interpretation, students take their first steps toward acquiring this expertise.

The minor comprises one linguistic component, one elective component and four profession-specific linguistic components for a total of 18 credit hours.

Required Courses: 9 Credit Hours

- SPAN 300. Grammar and Communication *3.00*
- SPAN 435. Translation Strategies *3.00*
- SPAN 436. Introduction to Interpretation *3.00*

One elective Spanish course: 3 Credit Hours

- SPAN 307. Spanish Civilization *3.00*
- SPAN 308. Latin American Civilization *3.00*
- SPAN 312. Translation Competencies *3.00*

- SPAN 320. Oral and Written Communication *3.00*
or
- SPAN 321. Oral and Written Communication (for Heritage Speakers) *3.00*

- SPAN 407. Aspects of Spanish Civilization *3.00*
- SPAN 447. Special Topics in Spanish Civilization and Culture *3.00*
- SPAN 476. Culture and Medicine in Latin America *3.00*
- SPAN 477. Culture and Medicine in Spain *3.00*
- SPAN 485. Business and Society in Latin America *3.00*
- SPAN 486. Business and Society in Spain *3.00*

Choose one: 3 Credit Hours

- SPAN 310. Introduction to Spanish Linguistics *3.00*
- SPAN 311. Contrastive Linguistics *3.00*
- SPAN 315. Spanish Phonetics *3.00*
- SPAN 404. Spanish in the United States *3.00*
- SPAN 448. Special Topics in Spanish Linguistics *3.00*

Choose one: 3 Credit Hours

- SPAN 494. Practical Medical Spanish *3.00*
- SPAN 495. Practical Spanish for Public Safety/Legal Spanish *3.00*
- SPAN 496. Translation/Interpreting Internship *3.00*

Total: 18 Credit Hours

Geology and Environmental Science, Department of

Dr. Stephen A. Leslie, **Department Head**

Phone: (540) 568-6130

Email: lesliesa@jmu.edu

Location: Memorial Hall, Room 7335

Professors

S. Baedke, L. Eaton, L. Fichter, , E. Johnson, S. Leslie, E. Pyle, K. St. John, S. Whitmeyer

Associate Professors

Y. Admassu, J. Haynes

Assistant Professors

C. Elmi, C. Kearns, R. McGary

Visiting Assistant Professors

Y. Chen, A. Garcia, M. Schultz

Instructors

S. Whitmeyer

Mission Statement

Our mission is to serve two vital needs of the JMU students. First, the majors in geology present high-quality programs of specialized study focusing on Earth materials, internal and external Earth processes, analysis of Earth history and application of geology to environmental and engineering issues. In support of this mission is a commitment to foster the ability to think analytically and to communicate both within the discipline and with non-scientists. Course work and research experiences prepare the student for postgraduate study or professional careers that are subject to rapidly changing societal needs. Second, our department strives to enhance the university's general education program by offering timely and challenging courses that provide insight into Earth processes and human-environment interactions. These courses promote life-long liberal learning by fostering critical thinking and an awareness of natural science.

Goals

Provide a stimulating, intellectual environment for students in geology and environmental science that will generate interest and enthusiasm for learning and will provide a solid foundation for graduate work and careers in geology and environmental science.

Teach science as science is practiced. Since the advancement of scientific knowledge often occurs within a social context – collaboration among scientists, conferences, seminars – the goal is to develop a similar mode of operation for the geology program.

Provide high-quality, relevant general studies courses within the discipline that focus on the fundamental science in the societal context (e.g., environmental change, climate change, hazards). These courses will incorporate critical thinking and an appreciation of human-environment interactions.

Career Opportunities

- Earth Science Teacher
- Engineering Geologist
- Environmental Geologist
- Environmental Scientist/Specialist
- Geochemist
- Government or Industry Geologist

- Geological Oceanographer
- Geomorphologist
- Geophysicist
- Hydrogeologist
- Meteorologist
- Science Museum Curator
- Paleoclimatologist/paleoceanographer
- Paleontologist
- Petroleum Geologist
- Soil Scientist

Co-curricular Activities and Organization

The department encourages majors and minors to participate in the student Geology Club, which sponsors field trips, camping excursions, and hosts educational activities for elementary school students. Geology majors are encouraged to apply to be laboratory teaching assistants and research assistants for faculty in the department. Majors and minors are also strongly encouraged to become members of one or more of the following geoscience organizations and to present their research at the affiliated regional or national meetings:

- Geological Society of America (GSA)
- American Association of Petroleum Geologists (AAPG)
- American Geophysical Union (AGU)
- National Association of Geoscience Teachers (NAGT)

Earth Science Teaching Licensure

Teaching Licensure

Students interested in becoming teachers must meet specific curriculum requirements in their major as part of the undergraduate academic degree. The B.A. in Earth science includes state course requirements in astronomy, meteorology and oceanography, to total no less than 32 hours in the Earth sciences (including geology) and a minimum of 16 hours total in physics, chemistry and biology.

In addition to the general education and academic major requirements, Earth science majors desiring secondary teacher licensure must be admitted to the pre-professional program in secondary education at the undergraduate level and complete the graduate level Master of Arts in Teaching degree.

It is critical that students seeking teaching licensure consult regularly with both their education adviser and their major adviser to support their progression through the programs. For a full description of the program in secondary teaching, refer to the Middle, Secondary and Mathematics Education, Department of, in addition to the College of Education.

Earth Science, B.A.

Degree and Major Requirements

There are two bachelor degrees offered in the Geology and Environmental Science, Department of, a B.S. in geology and a B.A. in Earth science. Both degree options have a research requirement that includes a formal presentation. The B.S. degree has two concentrations: a general geology concentration designed for students who want to take a wider range of geology elective courses and an environmental and engineering geology concentration designed for students who want to focus their geology electives toward applied environmental science.

The B.A. in Earth science prepares individuals to work in a wide range of professional public sector service careers where preparation in Earth science and communication of science to nonscientific audiences is a requirement or an asset. This includes the preparation of Earth science teachers.

Bachelor of Arts in Earth Science

The B.A. in Earth science degree is designed to integrate all the Earth sciences in a systems approach to understanding the Earth. This includes incorporating and integrating subjects such as oceanography, meteorology and astronomy. The emphasis is on the preparation of individuals to work in a wide range of professional public sector service careers where preparation in Earth science and communication of science to non-scientific audiences is a requirement or an asset.

Teaching Licensure

Students interested in becoming teachers must meet specific curriculum requirements in their major as part of the undergraduate academic degree. The B.A. in Earth science includes state course requirements in astronomy, meteorology and oceanography, to total no less than 32 hours in the Earth sciences (including geology) and a minimum of 16 hours total in physics, chemistry and biology.

In addition to the general education and academic major requirements, Earth science majors desiring secondary teacher licensure must be admitted to the pre-professional program in secondary education at the undergraduate level and complete the graduate level Master of Arts in Teaching degree.

It is critical that students seeking teaching licensure consult regularly with both their education adviser and their major adviser to support their progression through the programs.

For a full description of the program in secondary teaching, refer to the Middle, Secondary and Mathematics Education, Department of, in addition to the College of Education.

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Foreign Language classes (intermediate level required) *0-14 Credit Hours*²
- Philosophy course(s) (in addition to General Education courses) *3 Credit Hours*³
- Major requirements (listed below including cognate sciences and math) *59-63 Credit Hours*
- General Electives *0-17 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² The foreign language requirement may be satisfied by successful completion of the second semester of the intermediate level of the student's chosen language (typically 232), or by placing out of that language through the Department of Foreign Languages, Literatures and Cultures' placement exam.

³ 100, 200, 300 or 400-level course acceptable or consult the list of courses satisfying B.A. degree requirements at <http://www/jmu.edu/registrar>.

Major Requirements

B.A. degree students are expected to complete CHEM 131-CHEM 131L before enrolling in geology courses numbered 300 and higher.

Core Requirements

- GEOL 110L. Physical Geology Laboratory [C3NS] *1.00*
- GEOL 167. History and Philosophy of the Geosciences *3.00*

- GEOL 211. Introduction to Oceanography [C3NS] *3.00*
or
- GEOL 401. Oceanography for Teachers *3.00*

- GEOL 230. Evolution of Earth (3, 2) *4.00*
- GEOL 291. Writing and Communicating in the Geosciences *1.00*
- GEOL 320. Meteorology *3.00*
- GEOL 367. Genesis of Solid Earth Materials (3, 2) *4.00*
- GEOL 377. Earth Surface Processes (2, 2) *3.00*
- GEOL 387. Stratigraphy, Structure, and Tectonics (3, 2) *4.00*
- GEOL 477. Contemporary Issues in the Geosciences *4.00*

Choose one of the following: 3 Credit Hours

- GEOL 102. Environment: Earth [C3NS] *3.00*
- GEOL 110. Physical Geology [C3NS] *3.00*
- GEOL 115. Earth Systems and Climate Change [C3NS] *3.00*
- GEOL 210. Applied Physical Geology [C3NS] *3.00*

Choose one of the following: 3 Credit Hours

- ASTR 220. General Astronomy I: The Night Sky, the Solar System and Stars *3.00*
- GEOL 307. Planetary Geology (2, 2) *3.00*

Research Requirements: 2-6 Credit Hours

In addition to GEOL 291, choose from the following to complete the research requirement. All majors must complete a minimum of two credits. Students conducting research with faculty should select GEOL 497; Honors students doing research with faculty must complete a minimum of six credits in GEOL 499A/GEOL 499B/GEOL 499C. All students must give a formal presentation to fulfill this requirement.

- GEOL 491. Geological Literature and Research 2.00
- GEOL 494. Internship in Geology 1.00 - 3.00
- GEOL 497. Problems in Geology 1.00 - 3.00

- GEOL 499A. Honors in Geology 1.00
- GEOL 499B. Honors in Geology 2.00
- GEOL 499C. Honors in Geology 3.00

Total: 37-41 Credit Hours

Cognate Science and Mathematics Area

The B.A. degree option requires that each student complete at least 16 hours of cognate science credit hours with at least one course from biology, physics and chemistry chosen from:

Biology: 4 Credit Hours

- BIO 140. Foundations of Biology I (3,3) [C3NS] 4.00
- BIO 350. Paleobiology (3, 2) 4.00

Chemistry: 4 Credit Hours

- CHEM 131. General Chemistry I [C3PP] 3.00
- CHEM 131L. General Chemistry Laboratory [C3PP] 1.00

- CHEM 132. General Chemistry II 3.00
- CHEM 132L. General Chemistry Laboratory 1.00

Physics: 3-4 Credit Hours

- PHYS 140. College Physics I [C3PP] 3.00
- PHYS 140L. General Physics Laboratory [C3PP] 1.00

- PHYS 150. College Physics II 3.00
- PHYS 150L. General Physics Laboratory 1.00
- or
- GEOL 440. Geophysics (3, 2) 4.00

Math: 3-4 Credit Hours

The B.A. option requires that each student complete at least six credit hours of mathematics, including one of the following:

- MATH 205. Introductory Calculus I [C3QR] 3.00
- MATH 232. Calculus with Functions II 3.00

- MATH 235. Calculus I [C3QR] *4.00*

Total: 20-22 Credit Hours

Recommended Minors for the Bachelor of Arts in Earth Science

The B.A. Earth science degree recommends (but does not require) that students complete a minor in a complementary program, suitable toward the career goals of the student.

Students may also propose a minor that is not listed above to their adviser for approval.

Minor

Approved minors include:

- Astronomy *12 Credit Hours*¹
- Biology *12-16 Credit Hours*¹
- Business Analytics *18-19 Credit Hours*
- Chemistry *20 Credit Hours*¹
- Economics *18 Credit Hours*
- Environmental Information Systems *24 Credit Hours*
- Environmental Management Minor *19 Credit Hours*¹
- Environmental Science *15 Credit Hours*¹
- Environmental Studies *18 Credit Hours*¹
- Humanitarian Affairs *18 Credit Hours*
- Geographic Science *19 Credit Hours*
- Mathematics *14-18 Credit Hours*¹
- Nonprofit Studies *19-21 Credit Hours*
- Physics *14-22 Credit Hours*¹
- Political Science *19 Credit Hours*
- Public Policy and Administration *19 Credit Hours*
- Science, Technology and Society *18 Credit Hours*
- Secondary Education *22-24 Credit Hours*
- Sociology Minor *18 Credit Hours*
- Statistics *15-16 Credit Hours*¹
- Urban and Regional Studies *24 Credit Hours*
- Writing, Rhetoric and Technical Communication *18 Credit Hours*

Footnote

¹ Credit hours for courses in the minor that are already required courses for the B.A. in Earth Science major have been subtracted from the total hours listed here.

Recommended Schedule for B.A. Degree in Earth Science

First Year

- Cluster One: Skills for the 21st Century *9-12 Credit Hours*

- GEOL 110. Physical Geology [C3NS] 3.00
- GEOL 110L. Physical Geology Laboratory [C3NS] 1.00
- GEOL 167. History and Philosophy of the Geosciences 3.00
- GEOL 230. Evolution of Earth (3, 2) 4.00
- MATH 205. Introductory Calculus I [C3QR] 3.00
- CHEM 131. General Chemistry I [C3PP] 3.00
- CHEM 131L. General Chemistry Laboratory [C3PP] 1.00

Total: 27-30 Credit Hours

Second Year

- GEOL 211. Introduction to Oceanography [C3NS] 3.00
- GEOL 291. Writing and Communicating in the Geosciences 1.00
- GEOL 320. Meteorology 3.00
- GEOL 367. Genesis of Solid Earth Materials (3, 2) 4.00
- GEOL 377. Earth Surface Processes (2, 2) 3.00
- Foreign language courses 1-8 *Credit Hours*¹
- General Education courses 12 *Credit Hours*

Foreign language courses 1-8 Credit Hours

Total: 27-34 Credit Hours

Footnote

¹ Foreign language at the intermediate level.

Third Year

- GEOL 387. Stratigraphy, Structure, and Tectonics (3, 2) 4.00
- Cognate science and mathematics 9-12 *Credit Hours*
- General Education courses 9 *Credit Hours*

Choose one of the following: 3 Credit Hours

- ASTR 220. General Astronomy I: The Night Sky, the Solar System and Stars 3.00
- GEOL 307. Planetary Geology (2, 2) 3.00

Total: 25-28 Credit Hours

Fourth Year

- GEOL 477. Contemporary Issues in the Geosciences 4.00
- Cognate science 3-4 *Credit Hours*
- Geology electives 4-6 *Credit Hours*
- Electives 12-20 *Credit Hours*

Choose one from the following: 2-6 Credit Hours

- GEOL 491. Geological Literature and Research 2.00
- GEOL 494. Internship in Geology 1.00 - 3.00
- GEOL 497. Problems in Geology 1.00 - 3.00

- GEOL 499A. Honors in Geology 1.00
- GEOL 499B. Honors in Geology 2.00
- GEOL 499C. Honors in Geology 3.00

Total: 24-39 Credit Hours

Geology Minor

Minor Requirements

The requirement for a minor in geology is a minimum of 18 credit hours of geology approved by the student's geology adviser.

Geology, General Geology Concentration, B.S.

Degree and Major Requirements

There are two bachelor degrees offered in the Geology and Environmental Science, Department of, a B.S. in geology and a B.A. in Earth science. Both degree options have a research requirement that includes a formal presentation. The B.S. degree has two concentrations: a general geology concentration designed for students who want to take a wider range of geology elective courses and an environmental and engineering geology concentration designed for students who want to focus their geology electives toward applied environmental science.

The B.A. in Earth science prepares individuals to work in a wide range of professional public sector service careers where preparation in Earth science and communication of science to nonscientific audiences is a requirement or an asset. This includes the preparation of Earth science teachers.

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Quantitative requirement (in addition to General Education) *3 Credit Hours*²
- Scientific Literacy requirement (in addition to General Education) *3-4 Credit Hours*²
- Major requirements (listed below) *68-76 Credit Hours*
- General Electives *2-11 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² The quantitative and scientific literacy requirements are met by courses required by the major.

Major Requirements

Core Requirements

- GEOL 110L. Physical Geology Laboratory [C3NS] *1.00*
- GEOL 230. Evolution of Earth (3, 2) *4.00*
- GEOL 280. Mineralogy (3, 2) *4.00*
- GEOL 291. Writing and Communicating in the Geosciences *1.00*
- GEOL 300. Introduction to Petrology (3, 3) *4.00*
- GEOL 387. Stratigraphy, Structure, and Tectonics (3, 2) *4.00*
- GEOL 388. Advanced Structure, Stratigraphy, Tectonics (3,2) *4.00*
- GEOL 399. Field Geology *6.00*

Choose one of the following: 3 Credit Hours

- GEOL 110. Physical Geology [C3NS] *3.00*
- GEOL 102. Environment: Earth [C3NS] *3.00*
- GEOL 115. Earth Systems and Climate Change [C3NS] *3.00*
- GEOL 210. Applied Physical Geology [C3NS] *3.00*

Research Requirements: 2-6 Credit Hours

In addition to GEOL 291, choose from the following to complete the research requirement. All majors must complete a minimum of two credits. Students conducting research with faculty should select GEOL 497; Honors students doing research with faculty must complete a minimum of six credits in GEOL 499A/GEOL 499B/GEOL 499C. All students must give a formal presentation to fulfill this requirement.

- GEOL 491. Geological Literature and Research *2.00*
- GEOL 494. Internship in Geology *1.00 - 3.00*
- GEOL 497. Problems in Geology *1.00 - 3.00*
- GEOL 499A. Honors in Geology *1.00*
- GEOL 499B. Honors in Geology *2.00*
- GEOL 499C. Honors in Geology *3.00*

Total: 33-37 Credit Hours

Courses

The B.S. degree in geology is designed for students who plan to obtain professional employment in geology or enter graduate school upon graduation. It is recommended that incoming B.S. degree students complete the following courses prior to enrolling in required geology courses numbered 300 and higher.

- CHEM 131. General Chemistry I [C3PP] *3.00*
- CHEM 131L. General Chemistry Laboratory [C3PP] *1.00*
- CHEM 132. General Chemistry II *3.00*

- CHEM 132L. General Chemistry Laboratory *1.00*
- MATH 235. Calculus I [C3QR] *4.00*
or
- MATH 231. Calculus with Functions I [C3QR] *3.00* and
- MATH 232. Calculus with Functions II *3.00*
- MATH 220. Elementary Statistics [C3QR] *3.00*
or
- MATH 236. Calculus II *4.00*

Choose one of the following two sequences: 8 Credit Hours

- PHYS 140. College Physics I [C3PP] *3.00*
- PHYS 140L. General Physics Laboratory [C3PP] *1.00*
- PHYS 150. College Physics II *3.00*
- PHYS 150L. General Physics Laboratory *1.00*
or
- PHYS 240. University Physics I [C3PP] *3.00*
- PHYS 140L. General Physics Lab I [C3T1G2] *1.00*
- PHYS 250. University Physics II *3.00*
- PHYS 150L. General Physics Lab II *1.00*

Total: 23-26 Credit Hours

Additional Information

Students planning graduate study in some areas of the geosciences should consider courses in mathematics, physics or chemistry beyond those required for the B.S. major.

Concentrations

The B.S. degree option requires that each student complete at least 12 credit hours chosen from one of the two concentrations.

General Geology

- GEOL 302. Sedimentary Petrology *1.00*
- GEOL 380. Genetic Mineralogy (2, 2) *3.00*
- GEOL 350. Paleobiology (3, 2) *4.00*
- GEOL 355. Geochemistry of Natural Waters *3.00*
- GEOL 377. Earth Surface Processes (2, 2) *3.00*
- GEOL 390. Laboratory Techniques in Geology (2, 2) *3.00*
- GEOL 398. Topics in Geology *1.00 - 4.00* (must be approved by adviser)
- GEOL 400. Geology and Ecology of the Bahamas *3.00*
- GEOL 405. Vertebrate Paleontology *3.00*
- GEOL 406. Paleoclimatology and Paleooceanography *3.00*
- GEOL 410. Engineering Geology (2, 2) *3.00*
- GEOL 430. Environmental Soil Science (2, 2) *3.00*
- GEOL 440. Geophysics (3, 2) *4.00*

- GEOL 442. Field Geophysics *3.00*
- GEOL 460. Hydrogeology (2, 2) *3.00*
- GEOL 489. Quantitative Methods in Geology *3.00*

Recommended Schedule for B.S. Degree in Geology

First Year

- CHEM 131. General Chemistry I [C3PP] *3.00*
- CHEM 131L. General Chemistry Laboratory [C3PP] *1.00*
- CHEM 132. General Chemistry II *3.00*
- CHEM 132L. General Chemistry Laboratory *1.00*
- GEOL 110. Physical Geology [C3NS] *3.00*
- GEOL 110L. Physical Geology Laboratory [C3NS] *1.00*
- GEOL 230. Evolution of Earth (3, 2) *4.00*
- General Education Courses *12 Credit Hours*

Choose one of the following: 6-8 Credit Hours

- MATH 231. Calculus with Functions I [C3QR] *3.00*
- MATH 232. Calculus with Functions II *3.00*
- or
- MATH 235. Calculus I [C3QR] *4.00*
- MATH 236. Calculus II *4.00*

Total: 34-36 Credit Hours

Second Year

- GEOL 280. Mineralogy (3, 2) *4.00*
- GEOL 291. Writing and Communicating in the Geosciences *1.00*
- GEOL 387. Stratigraphy, Structure, and Tectonics (3, 2) *4.00*
- Geology elective *3 Credit Hours*
- General Education courses *11 Credit Hours*

Choose one of the following: 8 Credit Hours

- PHYS 140. College Physics I [C3PP] *3.00*
- PHYS 140L. General Physics Laboratory [C3PP] *1.00*
- PHYS 150. College Physics II *3.00*
- PHYS 150L. General Physics Laboratory *1.00*
- or
- PHYS 240. University Physics I [C3PP] *3.00*
- PHYS 140L. General Physics Lab I [C3T1G2] *1.00*
- PHYS 250. University Physics II *3.00*
- PHYS 150L. General Physics Lab II *1.00*

Total: 31 Credit Hours

Third Year

- GEOL 300. Introduction to Petrology (3, 3) 4.00
- GEOL 388. Advanced Structure, Stratigraphy, Tectonics (3,2) 4.00
- GEOL 399. Field Geology 6.00 (summer session)
- Geology electives 8 Credit Hours
- General Education courses 9 Credit Hours
- General Electives 3 Credit Hours

Total: 34 Credit Hours

Fourth Year

- Electives 9-20 Credit Hours

Choose from the following: 2-6 Credit Hours

- GEOL 491. Geological Literature and Research 2.00
- GEOL 494. Internship in Geology 1.00 - 3.00
- GEOL 497. Problems in Geology 1.00 - 3.00

- GEOL 499A. Honors in Geology 1.00 and
- GEOL 499B. Honors in Geology 2.00 and
- GEOL 499C. Honors in Geology 3.00

Total: 11-26 Credit Hours

Geophysics Minor

Geophysics Minor

The minor in geophysics is designed to provide adequate training for professional work or graduate school in geophysics in the broad sense. No more than 10 credits from the geophysics minor may be used to double count with a major. The requirements for the geophysics minor are a minimum of 21 credits, including at least one semester each of geology, mathematics and physics, distributed as follows:

Required Courses

Choose one of the following: 4 Credit Hours

- GEOL 110. Physical Geology [C3NS] 3.00 and
- GEOL 110L. Physical Geology Laboratory [C3NS] 1.00
- or
- GEOL 210. Applied Physical Geology [C3NS] 3.00 and
- GEOL 110L. Physical Geology Laboratory [C3T1G3] 1.00
- or

- PHYS 140. College Physics I [C3PP] 3.00 and
- PHYS 140L. General Physics Laboratory [C3PP] 1.00
or
- PHYS 240. University Physics I [C3PP] 3.00 and
- PHYS 140L. General Physics Lab I [C3T1G2] 1.00

Complete all of the following:

- GEOL 440. Geophysics (3, 2) 4.00
- GEOL 442. Field Geophysics 3.00
- MATH 238. Linear Algebra with Differential Equations 4.00
- MATH 248. Computers & Numerical Algorithms 4.00

Choose one of the following elective courses: 3-4 Credit Hours

Additional elective courses permitted upon approval from minor adviser.

- ASTR 220. General Astronomy I: The Night Sky, the Solar System and Stars 3.00
- CHEM 331. Physical Chemistry I 3.00
- GEOL 410. Engineering Geology (2, 2) 3.00
- GEOL 460. Hydrogeology (2, 2) 3.00
- MATH 237. Calculus III 4.00
- PHYS 260. University Physics III 3.00

Total: 22-23 Credit Hours

Note for Geology Majors

The geology major requires a sequence of math and physics courses (see major program for details). The following sequence of courses will satisfy the major requirements and is strongly recommended for students interested in geophysics. In particular, MATH 236 is a prerequisite for several courses included in the geophysics minor.

- MATH 235. Calculus I [C3QR] 4.00
- MATH 236. Calculus II 4.00
- PHYS 240. University Physics I [C3PP] 3.00 (and Lab)
- PHYS 250. University Physics II 3.00 (and Lab)

Mission

We are a community united in creating an environment of quality education that integrates philosophy, theory and practice while enhancing professional and personal growth of our students.

Vision

The Hart School at JMU will be nationally renowned by students, peers and industry partners for innovative teaching, exceptional research and transformational impact on the greater community.

Core Values

- Leadership
- Integrity
- Respect
- Student-Centered Learning
- Diversity
- Innovation

M. Baltazar, T. Lind, T. Pippert, J. Storey

Mission

The mission of the Hospitality Management Program is to develop a community of learners through quality education that integrates theory, practice and personal growth in the hospitality, sport and recreation industries.

The hospitality leaders of tomorrow must be educated and enlightened citizens who will lead productive and meaningful lives. The James Madison University Hospitality Management Program prides itself in developing creative hospitality leaders who make a difference.

The program mission is to develop hospitality leaders through sound theoretical course work, innovative learning activities, mentoring opportunities, exposure to premier hospitality organizations and interaction with dynamic industry professionals. Together with alumni, students, parents and friends of the program, JMU-HM will be recognized as the preferred provider for hospitality graduates.

Goals

- To expose students to a rigorous academic and experiential learning program, including a 400-hour internship prior to graduation.
- To provide an intimate educational setting of small classes, team learning experiences and meaningful personal contacts with faculty and industry professionals.
- To promote the use and development of technology, critical thinking and communication skills in hospitality leadership.
- To ensure that all HM students have a meaningful choice of job opportunities upon graduation.
- To build a set of leadership skills while providing students exceptional financial acumen.
- To maintain a faculty of knowledgeable and respected industry professionals, dedicated to continuous improvement via internships, authorship, industry contacts and participation at national and international industry conferences.

Career Opportunities

The hospitality field, also known as the mega-industry, includes many career opportunities. Recent statistics include:

- Hospitality management provides \$98.3 billion in tax revenues to federal, state and local governments.
- Total hospitality employment in the U.S. includes 15.4 million jobs.
- Pleasure travel volume was 950.4 million; personal trips with business travel accounted for over 251 million trips in the United States alone.
- The World Tourism Organization forecasts a growth in international tourist arrivals of between 3% and 4% in the next year. International visitors spend \$79.4 billion a year.
- The travel field is America's largest services exporter, with international travelers spending over \$110 billion in the United States.
- The US hotel and motel industry consists of about 40,000 companies that operate 48,000 properties, with combined annual revenue over \$120 billion.
- The restaurant industry's total economic effect is \$1.5 trillion.
- The restaurant industry remains one of the nation's largest private-sector employers with its 12.7 million employees, comprising 9% of the U.S. workforce.
- The restaurant industry is projected to add 1.3 million career and employment opportunities by 2020.
- Dining is the most popular domestic trip activity and is included in 31% of all domestic trips. On a typical day, 130 million Americans will visit a restaurant.
- The private club industry represented by The Club Managers Association of America had \$13 billion in revenue in 2008 employing 290,749 associates.

Co-curricular Activities and Organizations

- Professional Convention Management Association (PCMA) is a student organization that provides both educational and social programs to the hospitality management major. This group plans and coordinates an annual trip to the PCMA Annual Convention.
- The National Society of Minorities in Hospitality (NSMH) is a student organization that explores the issues, challenges and opportunities for minorities in mega-industry. It participates in both regional and national conventions in association with industry leaders.
- The James Madison University Student Chapter of Club Managers Association of America (JMU CMAA) is instrumental in exposing students to the profession of club management and its many career opportunities.
- Eta Sigma Delta (ESD) is an honor society recognizing hospitality and tourism students for outstanding academic achievement, meritorious service and demonstrated professionalism.

- Hospitality Sales & Marketing Association International (HSMIA) is a global organization of sales, marketing, and revenue management professionals representing all segments of the hospitality industry.

Degree and Major Requirements

The B.S. degree in Hospitality Management (HM) requires a minimum of 120 credit hours of undergraduate course work. All HM majors must complete the general business minor for hospitality management, HM core and HM required courses.

Required Courses

- General Education *41-44 Credit Hours*¹
- Quantitative Requirement (in addition to General Education) *3 Credit Hours*
- Scientific Literacy requirement (in addition to General Education) *3-4 Credit Hours*
- Hospitality Management Core Courses *9 Credit Hours*
- Major Requirements *36 Credit Hours*
- General Business Minor for Hospitality Management *18 Credit Hours*²
- University Electives *6-10 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² Successful completion of these courses with a 2.0 GPA will qualify the student for a general business minor; however, it is the responsibility of the student to complete the necessary paperwork in the College of Business to apply for the minor.

Major Requirements

Hospitality Management Core

- HM 201. Foundations of Hospitality, Sport and Recreation Management *3.00*
or
- SRM 201. Foundations of Hospitality, Sport and Recreation Management *3.00*

- HM 202. Foundations of Leadership in Hospitality, Sport and Recreation Management *3.00*
or
- SRM 202. Foundations of Leadership in Hospitality, Sport and Recreation Management *3.00*

- HM 203. Foundations of Ethics and Law in Hospitality, Sport and Recreation Management *3.00*
or
- SRM 203. Foundations of Ethics and Law in Hospitality, Sport and Recreation Management *3.00*

Total: 9 Credit Hours

Required Courses

- HM 211. Overview of Hospitality and Tourism Management *3.00*

- HM 212. Hospitality Prowess 3.00
- HM 310. Practical Work Experience 0.00
- HM 311. Hotel Operations and Hospitality Technology 3.00
- HM 312. Culinary Arts & Menu Management 3.00
- HM 316. Country Club Management 3.00
- HM 317. Introduction to Event Management 3.00
- HM 351. Cost Control and Budgeting 3.00
- HM 402. Supervisory Hospitality Internship 3.00
- HM 421. Hospitality Ethics 3.00
- HM 422. Hospitality Human Resources Management 3.00
- HM 441. Hospitality Financial Management 3.00
- HM 442. Hospitality Seminar 3.00

Total: 36 Credit Hours

General Business Minor

Students in hospitality management must declare the business minor for hospitality management through the College of Business.

General Business Minor Courses

- ACTG 244. Accounting for Non-Business Majors 3.00 ¹
- CIS 204. Computer Information Systems Fundamentals for Non-Business Majors 3.00
- ECON 201. Introduction to Microeconomics 3.00
- FIN 345. Finance Fundamentals for Non-Business Majors 3.00
- MGT 305. Management and Organizational Behavior 3.00
- MKTG 380. Principles of Marketing 3.00

Total: 18 Credit Hours

Footnote

¹ Successful completion of COB 242 will substitute for ACTG 244.

Recommended Schedule

First Year

- HM 201. Foundations of Hospitality, Sport and Recreation Management 3.00
- HM 202. Foundations of Leadership in Hospitality, Sport and Recreation Management 3.00
- HM 203. Foundations of Ethics and Law in Hospitality, Sport and Recreation Management 3.00
- Cluster One 9 Credit Hours
- General Education 12 Credit Hours

Total: 30 Credit Hours

Second Year

- HM 211. Overview of Hospitality and Tourism Management *3.00*
- HM 212. Hospitality Prowess *3.00*
- ACTG 244. Accounting for Non-Business Majors *3.00*
- CIS 204. Computer Information Systems Fundamentals for Non-Business Majors *3.00*
- ECON 201. Introduction to Microeconomics *3.00*
- Quantitative Requirement *3 Credit Hours*
- General Education *12 Credit Hours*

Total: 30 Credit Hours

Third Year

- HM 310. Practical Work Experience *0.00*
- HM 311. Hotel Operations and Hospitality Technology *3.00*
- HM 312. Culinary Arts & Menu Management *3.00*
- HM 316. Country Club Management *3.00*
- HM 317. Introduction to Event Management *3.00*
- HM 351. Cost Control and Budgeting *3.00*
- FIN 345. Finance Fundamentals for Non-Business Majors *3.00*
- MGT 305. Management and Organizational Behavior *3.00*
- MKTG 380. Principles of Marketing *3.00*
- General Education and university electives *6 Credit Hours*

Total: 30 Credit Hours

Summer

- HM 402. Supervisory Hospitality Internship *3.00*

Total: 3 Credit Hours

Fourth Year

- HM 421. Hospitality Ethics *3.00*
- HM 422. Hospitality Human Resources Management *3.00*
- HM 441. Hospitality Financial Management *3.00*
- HM 442. Hospitality Seminar *3.00*
- University electives *15 Credit Hours*

Total: 27 Credit Hours

Associate Professors

B. Carr, J. Pate, D. Shonk, J. Wallace-Carr

Assistant Professors

E. Anaza, M. Sato

Lecturers

A. Bosley, A. Hayslett, N. Marrin, T. Martin

Mission

The mission of the sport and recreation program is to develop a community of learners through quality education that integrates theory, practice, and personal growth in the hospitality, sport and recreation industries.

We are dedicated to the development of future leaders in sport and management professions through a course of study that maximizes the potential of individuals and society.

Sport and recreation management is committed to providing:

- An outstanding undergraduate program based on the criteria of relevant professional associations, which will enable graduates to be successful in their professional endeavors.
- A program that builds upon the strong liberal studies background provided through General Education.
- The opportunities that challenge students to think critically, to use technology and to appreciate the global community.
- The research and development projects that push back the boundaries of knowledge and promote effective practice in sport and recreation management.

Career Opportunities

Graduates with this degree will be employed in professional sport organizations, semi-professional sport organizations, collegiate athletics, sport marketing agencies, sport broadcasting venues, facility management in both sport and recreation, community recreation agencies, commercial recreation agencies, theme parks, military recreation as well as hotels, resorts and other hospitality and entertainment venues.

Careers in sport and recreation management are plentiful. The listing below offers examples of possible career paths and is not meant to be comprehensive.

- Fitness/Health Club Manager
- Sportscaster
- Aerobics Instructor
- Sports Agent
- Athletic Coach
- Athletic Director
- Sports Event Coordinator
- Media Relations Specialist
- Sports Information Specialist
- YMCA Youth Leader
- Recreation Professional
- Sports Marketing Specialist

- Community Center Director
- Corporate Fitness Leader
- Director of Stadium Operations
- Director of Ticket Operations
- Professional Sports Scout
- Promotion Director
- Youth Programs Director
- Campus Recreation Director
- Athletic Contract Manager
- Sports Camp Director

Co-Curricular Activities

In order to enhance the educational, experiential, networking and professional opportunities for our students, sport and recreation management (SRM) offers and encourages involvement in a wide variety of co-curricular activities and SRM-related conferences and organizations. Co-curricular activities also include required practicum and internship experiences for which academic credit is given. Below is a list of SRMs most prominent activities:

Conferences and Events

- Sports Events Marketing Experience (SEME)
- Sports Industry Networking and Career Conference (SINC)
- National Intramural Recreational Sports Association (NIRSA) Annual Conference and Recreational Sports Expo
- National Recreation and Parks Association (NRPA) National Conference
- Association of Outdoor Recreation Education Annual Conference

Professional Organizations

- National Intramural Recreational Sports Association (NIRSA)
- National Recreation and Parks Association (NRPA)
- North American Society for Sport Management (NASSM)
- Association of Outdoor Recreation and Education
- Society of Health and Physical Educators (SHAPE; formerly American Alliance for Health, Physical Education, Recreation and Dance)

JMU Clubs and Organizations

- Phi Epsilon Kappa
- SRM Major's Club (SLAM)
- Sports Clubs

Practicums and Internships

SRM requires its students to complete a practicum and an internship. Both count as academic credit hours. These are opportunities for the student to gain valuable experience by working in his/her field of choice in a sport or recreation-related agency. The opportunities are almost endless.

While enrolled in SRM 482, Internship in Sport and Recreation Management, students may only take one additional course (three or four credit hours). The additional course must be approved in advance by the site supervisor and the director of SRM.

Degree and Major Requirements

Degree Requirements

Required Courses

- General Education *41-44 Credit Hours* ¹
- Quantitative requirement (in addition to General Education) *3 Credit Hours*
- Scientific Literacy requirement (in addition to General Education) *3-4 Credit Hours*
- Sport and Recreation Management core courses *6 Credit Hours*
- Major requirements *39 Credit Hours*
- General Business Minor for Sport and Recreation Management *18 Credit Hours* ²
- University Electives *6-10 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² Successful completion of these courses with a 2.0 GPA will qualify the student for a general business minor; however, it is the responsibility of the student to complete the necessary paperwork in the College of Business to apply for the minor.

Major Requirements

Assistant Professors

A. Abad-Jorge, M. Daniels, A. Dengo-Flores, J. Ginnity, J. Goetschius, M. Hesse, A. Massey, A. Russell Yun, W. Simmons, A. Skelly, J. Walsh, X. You

Instructors

K. Harrison, E. Richardson

Mission

As the Department of Health Professions, we engage students, faculty and the community through education, service, and scholarship to produce highly qualified healthcare professionals and leaders.

Vision

To be nationally recognized for innovative practices in education, leadership, scholarship, and service to produce leaders in the dynamic healthcare industry.

Career Opportunities

- Athletic Trainer (Graduate Program)
- Registered Dietitian/Nutritionist
- Health Administrator
- Health Fitness Specialist
- Occupational Therapist (Graduate Program)
- Physician Assistant (Graduate Program)

Co-curricular Organizations

- American College of Sports Medicine
- Madison Athletic Training Student Association
- Health Administration Student Association
- JMU Dietetic Association
- JMU Physician Assistant Student Society
- JMU Student Occupational Therapy Association
- Pre-Occupational Therapy Association
- Pre-Physical Therapy Society

- Pre-Physician Assistant Club

Special Admission Requirements

Admission to JMU does not guarantee admission to all academic majors and minors. Special applications are required for admission to the clinical portions of the athletic training program, the dietetics program and the health services administration program.

Degree Offerings

The Department of Health Professions offers the following degrees:

- Bachelor of Science in Dietetics
- Bachelor of Science in Health Services Administration
- Master of Science in Athletic Training
- Master of Occupational Therapy
- Master of Physician Assistant Studies

Dietetics, B.S.

Degree and Major Requirements

The Bachelor of Science in dietetics is the first step toward registration as a dietitian nutritionist. The Registered Dietitian Nutritionist (RD/RDN) credential is a national credential that requires completion of a Didactic Program in Nutrition and Dietetics (DPD), a Supervised Practice program, usually a Dietetic Internship (DI), and successful completion of the national registration examination. The DPD at James Madison University is accredited by the Accreditation Council for Education in Nutrition and Dietetics of the Academy of Nutrition and Dietetics, 120 S. Riverside Plaza, Suite 2190, Chicago, IL 60606-6995, (312) 899-4876. The program in dietetics gives the student a wide view of dietetics careers including clinical dietetics, administrative dietetics, community dietetics, food service, education and research.

Special Admission Requirements

Any student admitted to JMU can declare dietetics as his/her major and will be permitted to enroll in NUTR 280. Nutrition for Wellness and NUTR 295. Foundations of Nutrition Practice. However, to make progress in the major beyond the first few courses students need to apply and be admitted to the professional program.

Students wishing to be admitted to the dietetics program at JMU must apply in the spring semester during which admission requirements will be met by February 15, usually the sophomore year.

Students applying for admission must have a cumulative GPA of at least 3.0 in the following courses, with no grade lower than a "C."

- BIO 270. Human Physiology (3, 2) [C3NS] 4.00
- CHEM 131. General Chemistry I [C3PP] 3.00
- CHEM 131L. General Chemistry Laboratory [C3PP] 1.00
- CHEM 132. General Chemistry II 3.00
- CHEM 131L-132L. General Chemistry Laboratories 1.00 each semester

- HTH 210. Medical Terminology 3.00
- MATH 220. Elementary Statistics [C3QR] 3.00
- NUTR 280. Nutrition for Wellness 3.00
- NUTR 295. Foundations of Nutrition Practice 2.00
- POSC 225. U.S. Government [C4AE] 4.00
- PSYC 101. General Psychology [C5SD] 3.00
- or
- PSYC 160. Life Span Human Development [C5SD] 3.00
- SCOM 121. Fundamental Human Communication: Presentations [C1HC] 3.00
- or
- SCOM 122. Fundamental Human Communication: Individual Presentations [C1HC] 3.00
- or
- SCOM 123. Fundamental Human Communication: Group Presentations [C1HC] 3.00
- WRTC 103. Rhetorical Reading and Writing [C1W] 3.00

Retention and Receiving Didactic Program in Dietetics Verification

To remain in the major, students must maintain a GPA of at least 3.0 in the major, earn grades of "C" (2.0) or higher in all remaining required courses. Transfer credit will not be accepted for the following courses: NUTR 363, NUTR 446, NUTR 482, NUTR 484 and NUTR 490. All successful graduates will receive four copies of a signed verification statement from the James Madison University DPD as soon as a final transcript verifying all grades and degree confirmation is available.

Required Courses/Recommended Schedule for Majors

First Year

- CHEM 131. General Chemistry I [C3PP] 3.00
- CHEM 131L. General Chemistry Laboratory [C3PP] 1.00
- NUTR 295. Foundations of Nutrition Practice 2.00

- PSYC 101. General Psychology [C5SD] 3.00 ¹
- or
- PSYC 160. Life Span Human Development [C5SD] 3.00 ¹

- Quantitative requirement (B.S. degree requirement) 3 Credit Hours
- WRTC 103. Rhetorical Reading and Writing [C1W] 3.00
- Cluster 1 - Critical Thinking (any course in Cluster 1 Critical Thinking area)
- Cluster 1 - Communication (any course in Cluster 1 Communication area)
- General Education courses 9 Credit Hours

Total: 22 Credit Hours

Second Year

- BIO 270. Human Physiology (3, 2) [C3NS] 4.00 ¹

- CHEM 132. General Chemistry II 3.00 ¹
- CHEM 132L. General Chemistry Laboratory 1.00 ¹
- HTH 210. Medical Terminology 3.00

- POSC 225. U.S. Government [C4AE] 4.00 ¹
- MATH 220. Elementary Statistics [C3QR] 3.00 ¹
- NUTR 280. Nutrition for Wellness 3.00
- General Education courses 6 *Credit Hours*

Total: 27 Credit Hours

Third Year*

- CHEM 241. Organic Chemistry I 3.00
- CHEM 241L. Concepts of Organic Chemistry Laboratory 1.00
- CHEM 260. Concepts of Biochemistry 3.00
- CHEM 260L. Concepts of Biochemistry Laboratory 1.00
- HTH 354. U.S. and Global Health Care Systems 3.00
- NUTR 340. Science of Food Preparation 3.00
- NUTR 360. Management in Dietetics 3.00
- NUTR 362. Food Services Systems 3.00
- NUTR 363. Quantity Food Production 4.00
- NUTR 380. Global Nutrition 3.00
- NUTR 384. Clinical Nutrition I 3.00
- NUTR 385. Nutrition Throughout the Life Cycle 3.00

Total: 33 Credit Hours

Fourth Year*

- BIO 245. General Microbiology (3, 2) 4.00
- IPE 415. Ethical Decision-Making in Healthcare: an Interprofessional Approach 1.00
- NUTR 446. Experimental Foods 3.00
- NUTR 482. Nutrition and Metabolism 3.00
- NUTR 484. Clinical Nutrition II 3.00
- NUTR 485. Community Nutrition 3.00
- NUTR 486. Counseling Skills for Dietetics 3.00
- NUTR 490. Field Experience in Dietetics 3.00 ²
- NUTR 495. Senior Seminar in Dietetics 3.00

Total: 30 Credit Hours

Footnotes

¹ These courses may count for both General Education and the major depending on General Education course choice.

² Field experience practicum should be completed the summer between junior and senior years.

*Courses in Years 3 and 4 are offered only one semester per year with the exception of NUTR 380.

Health Services Administration, B.S.

Deadline for Change or Declaration of Majors

Deadlines for change or declaration of major forms are:

Semester Deadline

Summer February 15

Fall February 15

Spring September 15 of the previous year

Forms received in the health professions office after the deadline will be processed the following semester. Students changing their major to health professions after February 15 of the sophomore year should expect an additional semester(s) to complete the program. The number of additional semesters required to complete the program will depend on the timing of the change to health professions and the number of summer courses completed.

Degree and Major Requirements

The Department of Health Professions offers the following degrees: Bachelor of Science in Dietetics, Bachelor of Science in Health Services Administration, Master of Science in Athletic Training, Master of Occupational Therapy and Master of Physician Assistant Studies.

Bachelor of Science in Health Services Administration

The program in health services administration prepares students for entry-level administrative positions, and staff positions requiring administrative skills, in various health organizations including hospitals, hospital systems, managed care organizations, retirement and long-term care facilities, ambulatory care organizations, physician practices and public health facilities. In addition, the program provides the foundation for graduate study in health administration and related fields. The health services administration program is approved as a Full Certified undergraduate program by the Association of University Programs in Health Administration (AUPHA).

Any student admitted to JMU can declare health services administration as his/her major and enroll in prerequisite courses. However, to progress in the major beyond the prerequisite courses, students must apply and be admitted to the program. To be eligible to apply, students must have completed or be enrolled in the following pre-requisite courses at the time of application and receive a grade of "C-" or better:

- CIS 204. Computer Information Systems Fundamentals for Non-Business Majors
- ECON 201. Introduction to Microeconomics
- HTH 354. U.S. and Global Health Care Systems

Students wishing to be admitted to the health services administration program at JMU may apply in the spring of their sophomore year or upon completion of the prerequisite courses. Applications are due September 15 for spring semester admission or February 15 for fall semester admission. Specific application requirements may be found on the health services administration program website (<http://healthprof.jmu.edu/hsa/>)

Upon completion of all JMU and program requirements, the student is awarded the B.S. in Health Services Administration.

No more than 30 hours may be taken in the College of Business.

Degree Requirements

Required Courses

- General Education *40 Credit Hours*¹
- Quantitative requirement (in addition to General Education) *3 Credit Hours*
- Scientific Literacy requirement (in addition to General Education) *3 Credit Hours*
- Major requirements (listed after schedule) *74 Credit Hours*

Footnote

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

Total: 120 Credit Hours

Required Courses/Recommended Schedule for Majors

First Year

- General Education courses *31 Credit Hours*

Total: 31 Credit Hours

Second Year

Professors

T. Enyeart Smith, R. Koslow, K. Lewis, M. Wessel

Associate Professors

S. Baller, A. Burnett, K. Ott Walter, A. Peachey, D. Sutton

Assistant Professors

M. Bishop, S. Blackstone, E. Collazo-Vargas, A. Coleman, S. Grossman, D. Henry, T. Jehi, A. Johnson, R. Khan, L. Merrell, T. Thomas

Instructors

L. Blosser

Lecturers

T. Howley, L. Lemons, R. Prodoehl, M. Stickney

Mission Statement

Through education, scholarship and service we enhance the health and well-being of individuals and populations.

Goals

The goals of the Department of Health Sciences are to:

- Educate future health professionals through engaged learning.
- Provide professional service to the department, college, university and global community.
- Conduct, disseminate and publish research/scholarship in health sciences.
- Contribute to the health and well-being of the JMU community.
- Support the General Education program at JMU.

Co-curricular Organizations

- Eta Sigma Gamma (Health Sciences Honor Society)
- Pre-Occupational Therapy Association
- Pre-Physical Therapy Society
- Pre-Physician Assistant Club

Special Admission Requirements

Admission to JMU does not guarantee admission to all academic majors and minors.

Deadline for Change or Declaration of Majors

Deadlines for change or declaration of major forms are:

Semester	Deadline
Summer	February 15
Fall	February 15
Spring	September 15 of the previous year

Forms received in the health sciences office after the deadline will be processed the following semester. Students changing their major to health sciences after February 15 of the sophomore year should expect an additional semester(s) to complete the

program. The number of additional semesters required to complete the program will depend on the timing of the change to health sciences and the number of summer courses completed.

Assessment

Graduating majors must participate in assessment activities. Assessment information helps the faculty modify the curriculum to meet student needs.

Degree Offered

The Department of Health Sciences offers the Bachelor of Science in Health Sciences.

Credit by Examination

The Department of Health Sciences offers credit by examination for a limited number of the courses taught in the department. Students who want permission to take an examination must apply to the department head during the regular registration period. Students will receive details regarding approval and examination dates after they apply. Examinations will be given only in courses offered during the semester.

Health Sciences, B.S.

The B.S. degree with a major in health sciences consists of health science course requirements in addition to General Education requirements and B.S. requirements.

The B.S. in Health Sciences degree is designed for students interested in understanding the causes of disease, strategies for promoting wellness, and the scientific basis and methodologies for analysis of health concerns. The major combines a broad foundation of health-related course work with a choice of preparatory courses suitable for entry into graduate programs in medicine, dentistry, optometry, occupational therapy, physical therapy, pharmacy, public health, physician assistant and veterinary medicine.

All students pursuing the B.S. in Health Science must complete the following core courses:

Major Requirements

- CHEM 120. Concepts of Chemistry [C3PP] 3.00
or
- CHEM 131. General Chemistry I [C3PP] 3.00
and
- CHEM 131L. General Chemistry Laboratory [C3PP] 1.00
or
- CHEM 132. General Chemistry II 3.00
and
- CHEM 132L. General Chemistry Laboratory 1.00

- MATH 220. Elementary Statistics [C3QR] 3.00
- HTH 100. Personal Wellness [C5W] 3.00
- HTH 150. Introduction to Health Sciences 2.00
- HTH 210. Medical Terminology 3.00
- HTH 231. Population Health Determinants 3.00
- HTH 245. Foundations of Infectious Disease 3.00
- HTH 255. Chronic Disease and Disabilities 3.00
- HTH 320. Statistical Methods for Health Science Research 3.00
- HTH 351. Health Behavior Change 3.00
- HTH 354. U.S. and Global Health Care Systems 3.00
- HTH 408. Health Research Methods 3.00
- HTH 423. Ethics and Critical Thinking in Health 3.00
- HTH 450. Epidemiology 3.00

Select 16 Credits:

- BIO 140. Foundations of Biology I (3,3) [C3NS] 4.00
- BIO 150. Foundations of Biology II (3,3) 4.00
- BIO 240. Genetics (3,3) 4.00
- BIO 245. General Microbiology (3, 2) 4.00¹
- BIO 324. Human Genetics (3, 0) 3.00
- BIO 370. Animal Physiology (3, 3) 4.00

- CHEM 241. Organic Chemistry I 3.00
and
- CHEM 241L. Concepts of Organic Chemistry Laboratory 1.00

- CHEM 242. Organic Chemistry II 3.00
and
- CHEM 242L. Organic Chemistry Laboratory 2.00

- CHEM 260. Concepts of Biochemistry 3.00
- HTH 441. Biomechanics for the Healthcare Professional 3.00
- NUTR 280. Nutrition for Wellness 3.00

- PHYS 140. College Physics I [C3PP] 3.00
and
- PHYS 140L. General Physics Laboratory [C3PP] 1.00

- PHYS 150. College Physics II 3.00
and
- PHYS 150L. General Physics Laboratory 1.00

- PSYC 101. General Psychology [C5SD] 3.00
- PSYC 160. Life Span Human Development [C5SD] 3.00
- PSYC 250. Introduction to Abnormal Psychology 3.00¹

Select 8 Credits:

- BIO 245. General Microbiology (3, 2) 4.00

- BIO 270. Human Physiology (3, 2) [C3NS] 4.00
- BIO 290. Human Anatomy (3, 3) 4.00

Total: 65-70 Credit Hours

Footnotes

¹ Will not count for the 16 credits in this category unless also taking BIO 270 and BIO 290.

² Pre-Occupational Therapy, Pre-Physical Therapy or Pre-Physician Assistant students only.

Recommended Schedule

First Year

- HTH 100. Personal Wellness [C5W] 3.00
- MATH 220. Elementary Statistics [C3QR] 3.00
- HTH 150. Introduction to Health Sciences 2.00
 - 2-3 courses from Select 16 4-8 Credit Hours
 - General Education courses 15-18 Credit Hours

Total: 30-33 Credit Hours

Second Year

- CHEM 120. Concepts of Chemistry [C3PP] 3.00
- or
- CHEM 131. General Chemistry I [C3PP] 3.00 and
- CHEM 131L. General Chemistry Laboratory [C3PP] 1.00
- or
- CHEM 132. General Chemistry II 3.00 and
- CHEM 132L. General Chemistry Laboratory 1.00
- HTH 210. Medical Terminology 3.00
- HTH 231. Population Health Determinants 3.00
- HTH 245. Foundations of Infectious Disease 3.00
- HTH 255. Chronic Disease and Disabilities 3.00
 - General Education courses and electives 8-16 Credit Hours

Choose one of the following:

- BIO 270. Human Physiology (3, 2) [C3NS] 4.00
- BIO 290. Human Anatomy (3, 3) 4.00

Total: 30 Credit Hours

Third Year

- HTH 320. Statistical Methods for Health Science Research 3.00
- HTH 351. Health Behavior Change 3.00
- HTH 354. U.S. and Global Health Care Systems 3.00
 - General Education, select 16 courses and electives 11 Credit Hours

Choose one of the following:

- BIO 270. Human Physiology (3, 2) [C3NS] 4.00
- BIO 290. Human Anatomy (3, 3) 4.00

Total: 27 Credit Hours

Fourth Year

- HTH 423. Ethics and Critical Thinking in Health 3.00
- HTH 450. Epidemiology 3.00
 - General Education, pre-professional courses and electives 21 Credit Hours

Total: 30 Credit Hours

Mission

The Department of History supports the academic mission of James Madison University by providing the highest quality educational experiences within the liberal arts tradition that meet students' needs and prepare students for meaningful careers and active citizenship. The department focuses on the student as individual learner and global citizen. Our dedicated faculty members are classroom innovators and scholars who work responsibly and supportively with students to expand their knowledge and skills, and to create a foundation for their lifelong learning.

Inside the Classroom

Students of history will become well-rounded and engaged citizens by:

- Acquiring knowledge of the human condition through the study of political, cultural, and social experiences of people around the world
- Learning the historical contexts of major political, intellectual, social, economic, religious and environmental events and transformations
- Understanding the major cultural developments in fine and popular arts in societies around the world in their historical contexts
- Discerning how people from a variety of societies hold differing values, ethics, and legal concepts and comprehending how these ideas relate to each other and to Western ideas and values

Students of history will gain the following skills

- Reading, writing, and speaking effectively and critically
- Making informed judgments based on existing evidence
- Locating printed and online information to research a topic exhaustively
- Critically evaluating textual evidence by identifying its thesis, sources, conclusions, perspective, bias, and reliability

Beyond the Classroom

While at JMU, students of history will bring the insights and skills they learn in the classroom to their relationship and experiences with their broader communities.

Possibilities for such interactions include:

- Leading efforts to promote open dialogue, civic engagement, and public service.
- Fostering interdisciplinary relationships by engaging with the larger scholarly community at the university.
- Participating in partnerships and events that expand and challenge their own worldview.
- Studying abroad to deepen their understanding of cultural differences and non-US historical perspectives and experiences.
- Becoming involved in professional work through internships.

Career Opportunities

Students graduating with a major or minor in history leave JMU with skills that are sought after by a wide range of employers. History graduates are adaptive learners and able project managers. As a result, they are particularly marketable in a world where professions change rapidly. Some of the career paths that history majors follow include:

- Advertising
- Archives and Libraries
- Business
- Communication
- Digital humanities
- Education
- Government
- Information Management
- Journalism
- Law
- Non-Profit and Non-Governmental Organizations

- Project Management
- Public History and Museums
- Public Policy
- Research
- Teaching
- Writing and Editing

Undergraduate work in history is also a successful foundation for advanced degrees in the humanities, law, the social sciences, medicine, and other disciplines.

Co-curricular Activities and Organizations

- Phi Alpha Theta (National Honor Society for History)
- The Madison Historians

Cross Disciplinary Minors

Students majoring or minoring in History should consider adding a Cross Disciplinary minor. The programs below are supported by History faculty and include courses that can be double-counted in the History major or minor. For more information, refer to Cross Disciplinary Minors.

- African, African American and Diaspora Studies Minor
- American Studies Minor
- Asian Studies Minor
- Classical Studies Minor
- Environmental Humanities Minor
- Historical Archaeology Minor
- Latin American, Latinx and Caribbean Studies Minor
- Medieval and Renaissance Studies Minor
- Middle Eastern Communities and Migrations Minor
- Russian Studies Minor
- Science, Technology and Society Minor
- Women's, Gender and Sexuality Studies Minor

Credit by Examination

The Department of History offers credit by examination for HIST 101, HIST 102 and HIST 225. Students who want permission to take an examination must apply in writing to the department head during the regular registration period. The examinations are administered during the first month of each semester at a time and place set by the department. Additional information on credit by examination may be found at the Department of History website.

History Minor

Minor Requirements

History Minor

The minor in history enhances any program of study and pairs well with many majors. It is available with any degree. The minor requires 21 credit hours of history, including HIST 101 and HIST 102. At least six of the remaining 15 hours must be at the 300- or 400-level, with at least one of these courses in world history.

History Teaching Licensure

Teaching Licensure

Students interested in becoming teachers must meet specific curriculum requirements in their major as part of the undergraduate academic degree. History majors desiring secondary teaching licensure must complete HIST 225.

In addition to the general education and academic major requirements, history majors desiring secondary teacher licensure must minor in Interdisciplinary Social Sciences. They must also be admitted to teacher education, complete the pre-professional program in secondary education at the undergraduate level and complete the graduate level Master of Arts in Teaching degree.

It is critical that students seeking licensure consult regularly with their education adviser, their ISS adviser, and their major adviser to support their progression through the programs. For a full description of the requirements see the teaching history section of the history department website.

History, B.A.

Degree and Major Requirements

Bachelor of Arts in History

History courses introduce students to the nature of history and survey the globe in a historical context. The 100- and 200-level courses are world or regional surveys, covering extensive periods of time, while the 300- and 400-level courses are focused on one theme, time period or geography. The upper-level courses require extensive analysis of sources and texts, and they include a research assignment that showcases the students' ability to develop and present their own historical interpretations.

The major requires three core courses: HIST 101, HIST 102 and HIST 395. Majors must take eight additional courses: Two on the 200 level and six on the 300 and 400 levels—with at least three of the upper division courses taken at the 400 level. In addition, majors must take one upper division course in each of the following fields: U.S., Europe and World history. For students writing a senior honors thesis, only three hours of HIST 499. Honors may be counted among the three 400-level courses required for the major.

History Degree and Major Requirements

The requirements for a major in history consist of introductory, mid- and upper-level courses. All courses introduce students to the nature of history and survey the globe in a historical context. In addition to involving reading, writing and critical thinking, these courses develop students' elementary computer skills in identifying and interpreting research sources and presenting research results. The 100- and 200-level courses are world or regional surveys, covering extensive periods of time, while the 300- and 400-level courses focus on specific nations, time periods or themes. The upper-level courses also require more extensive analysis of sources, texts and interpretations. Courses at the 400 level are capstones where students are expected to show an advanced ability to meet all department objectives. Majors in history are strongly encouraged to continue study in foreign

languages beyond the minimum university requirement and, when appropriate, to integrate their foreign language studies into their history classes.

This major requires three core courses. Two of these courses are introductory: HIST 101. World History to 1500 [C2HQC] and HIST 102. World History Since 1500 [C2HQC]. The third required course is HIST 395. History Seminar. This seminar on research methods teaches students the most sophisticated computer applications for research and writing.

In addition to the core requirements, majors must take eight elective courses: two on the 200 level and six on the 300 and 400 levels. At least three of the six upper division courses must be taken at the 400 level. For students writing a senior honors thesis, only three hours of HIST 499. Honors, may be counted among the three 400-level courses required for the major.

Majors must also complete one course at the upper division level in each of the following fields: U.S. history, European history and World history.

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Foreign Language classes (intermediate level required) *0-14 Credit Hours*²
- Philosophy course (in addition to General Education courses) *3 Credit Hours*
- University electives *29-43 Credit Hours*
- Major requirements (listed below) *33 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² The foreign language requirement may be satisfied by successful completion of the second semester of the intermediate level of the student's chosen language (typically 232) or by placing out of that language through the Department of Foreign Languages, Literatures and Cultures' placement test.

Major Requirements

Core Requirements

- HIST 101. World History to 1500 [C2HQC] *3.00*
- HIST 102. World History Since 1500 [C2HQC] *3.00*
- Any two courses at the 200-level, including HIST 225 *6-7 Credit Hours*¹
- HIST 395. History Seminar *3.00*²
- Electives: Six 300- or 400-level courses *18 Credit Hours*
(At least one course in each of World, U.S. and European history and at least three courses at the 400 level)

Total: 33 Credit Hours

Footnotes

¹ HUM 252 may be able to fill this requirement. Check with the history adviser.

² This course fulfills the College of Arts and Letters writing-intensive requirement for the major.

Recommended Schedule for Majors

First Year

- HIST 101. World History to 1500 [C2HQC] 3.00 (Cluster Two)
- HIST 102. World History Since 1500 [C2HQC] 3.00 (Cluster Two)
- Foreign language courses 6-8 *Credit Hours*
- General Education courses 9 *Credit Hours*
- General Education Cluster One: Skills for the 21st Century 9 *Credit Hours*

Total: 30 Credit Hours

Second Year

- Any two courses at the 200 level 6-7 *Credit Hours*
- HIST 395. History Seminar 3.00
- Foreign language courses (if needed) or electives 9-10 *Credit Hours*
- General Education courses (Cluster Three, Cluster Five) 12 *Credit Hours*

Total: 31 Credit Hours

Third Year

- Philosophy course 3 *Credit Hours*
- History electives (mix 300 and 400 levels) 9 *Credit Hours*
- Electives 9 *Credit Hours*
- General Education courses (Cluster Two, Cluster Four) 9 *Credit Hours*

Total: 30 Credit Hours

Fourth Year

- History electives (mix 300 and 400 levels) 9 *Credit Hours*
- Electives 18 *Credit Hours*
- General Education courses (Cluster Four) 3 *Credit Hours*

Total: 30 Credit Hours

Total: 30 Credit Hours

Public History Concentration Requirements

Historians today practice their discipline in a variety of careers as well as in more traditional academic settings. Those historians who work in museums, archives, government agencies, libraries, historic preservation organizations, businesses, contract history firms, cultural resource management firms and historic sites are known as public historians because they use their skills as historians to serve a public audience. The concentration in Public History trains students in the broad range of skills and issues associated with public history while providing them with a solid general background in history.

Students pursuing the public history concentration augment their foundation of traditional history courses by taking introductory and specialized public history courses and completing a semester-long internship. History majors opting to pursue the public history concentration will complete seven elective courses, six of which must be 300/400 level history courses. The public history concentration consists of five courses (15 credit hours).

Students are required to complete two public history core courses and three elective courses. Two of the three elective courses should be chosen from the list of primary electives; the remaining elective course may be chosen from either the primary or secondary list of elective courses.

Core Requirements

- HIST 101. World History to 1500 [C2HQC] 3.00
- HIST 102. World History Since 1500 [C2HQC] 3.00
- Any two 200-level History courses 6-7 Credit Hours
- HIST 395. History Seminar 3.00 ¹
- Seven electives ²
- 300/400-level HIST courses 9 Credit Hours

Required Courses

- HIST 340. Internship in History 3.00
- HIST 396. Introduction to Public History 3.00

Primary Electives: 6-9 Credit Hours

- HIST 331. Historical Archaeology 3.00
or
- ANTH 331. Historical Archaeology 3.00 (A)

- HIST 394. Introduction to Museum Work 3.00
or
- ARTH 394. Introduction to Museum Work 3.00

- HIST 407. Digital History 3.00
- HIST 438. Workshop in Public and Local History 3.00
- HIST 440. The History Museum 3.00

- HIST 441. Oral History 3.00
or
- SCOM 441. Oral History 3.00

- HIST 492. Material Culture 3.00

- or
- ANTH 492. Material Culture 3.00 (A)
- or
- ARTH 492. Material Culture 3.00

- HIST 493. Historic Preservation 3.00
- or
- ANTH 493. Historic Preservation

- HIST 495. Intro Archives and Manuscripts 3.00

Secondary Electives: 0-3 Credit Hours

- HIST 326. The Automobile in 20th Century America 3.00
- HIST 327. Technology in America 3.00

- HIST 338. U.S. Urban History 3.00
- or
- SOCI 338. U.S. Urban History 3.00

- HIST 360. Research Apprenticeship in History 3.00
- HIST 391. Travel Studies Seminar 3.00 (Summer in Ghana Program)
- HIST 391. Travel Studies Seminar: Paris and Normandy: Civilization, Culture, and Memory: North of England Programme 3.00
- HIST 402. Workshop in Colonial American Life 3.00
- HIST 403. Workshop in Civil War Virginia 3.00

- HIST 406. Monticello 3.00
- or
- ARTH 406. Monticello 3.00

- HIST 408. The Museum: Histories and Controversies 3.00
- or
- ARTH 408. The Museum: History and Controversies 3.00

- ANTH 494. Field Techniques in Archaeology 4.00 - 8.00 (A,F)

Total: 36 Credit Hours

Footnotes

¹ This course fulfills the College of Arts and Letters writing-intensive requirement for the major.

² Six (18 credit hours) of the seven electives must be 300/400-level history courses. At least three courses (9 credit hours) must be 400-level history courses. For honors majors, only three hours of HIST 499. Honors, may be counted among the three 400-level courses required for the major.

Independent Scholars Program

Dr. Scott Paulson, **Academic Unit Head**
Dr. Matthew Chamberlin, **Director**

Dr. Phil Frana, **Associate Director**
Dr. Fletcher Linder, **Professor**
Phone: (540) 568-5218
Email: chambema@jmu.edu
Location: Maury Hall, Room 118

Mission

The mission of the independent scholars major is to provide students with a learning environment in which they develop and pursue self-designed curricular pathways and research goals, identifying unique domains of inquiry and interweaving multiple modes of thinking. Students are empowered to cultivate their own academic and professional interests in ways that foster the ability to comprehend and contribute uniquely and innovatively to a wide array of topics, questions and problems.

Objectives

IS majors will:

- develop topic-based interests and inquiry strategies to pursue those interests.
- enhance creativity, self-directedness and perseverance required for inquiry.
- learn research, technical and communication skills relevant to their inquiry.
- situate their inquiry in relation to contemporary notions of disciplinary thinking.
- enhance aptitude and confidence in working independently and collectively.
- apply knowledge and skills in experiential-learning settings.

Admission to the Major

Acceptance into IS is competitive and open to all JMU students with a GPA of 3.25 or higher, or by permission.

Interested students will meet with one of the IS coordinators before the end of the first semester of their first year. Based on the advice of IS coordinators, students may then enroll in the IS exploration and major application course (IND 200), which is taught each fall. Students whose interests better align with existing JMU majors will be directed to those majors.

Decisions about acceptance into IS will be made by the IND 200 instructor, IS coordinators and a faculty advisory committee at the end of each IND 200 course. Successful applicants will:

- have a strong academic record that demonstrates exceptional motivation, curiosity, writing ability and independent research potential.
- have performed well overall in the IND 200 course, which includes writing a convincing inquiry proposal and feasible curriculum.

Students not accepted into IS at the end of IND 200 will be carefully advised into other majors and can use the three IND credits as electives.

Independent Scholars, B.A.

Degree and Major Requirements

Individualized curricula using existing courses across participating JMU units will be constructed with faculty oversight to help students pursue their own inquiry goals. Each student's curriculum will include:

- a cross disciplinary exploration course (IND 200)
- at least 36 credit hours of course work beyond General Education requirements
- at least four credits of skill-enhancing workshops (IND 300)
- a six-credit hour senior project (IND 499A)
- the plans for relevant field experiences, internships and/or study abroad programs.

For students in the honors program, the IS senior project will fulfill the senior honors project requirement.

Required courses

- General Education *41 Credit Hours*¹
- Philosophy course *3 Credit Hours*²
- Foreign Language *1-14 Credit Hours*
- Major requirements *49 Credit Hours*
- Electives *13-27 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² In addition to course work taken to fulfill General Education requirement.

Independent Scholars, B.S.

Degree and Major Requirements

Individualized curricula using existing courses across participating JMU units will be constructed with faculty oversight to help students pursue their own inquiry goals. Each student's curriculum will include:

- a cross disciplinary exploration course (IND 200)
- at least 36 credit hours of course work beyond General Education requirements
- at least four credits of skill-enhancing workshops (IND 300)
- a six-credit hour senior project (IND 499A)
- the plans for relevant field experiences, internships and/or study abroad programs.

For students in the honors program, the IS senior project will fulfill the senior honors project requirement.

Required courses

- General Education 41 Credit Hours ¹
- Quantitative requirement 3 Credit Hours ²
- Scientific Literacy requirement 3-4 Credit Hours ²
- Major requirements 49 Credit Hours
- Electives 23-24 Credit Hours

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² In addition to course work taken to fulfill General Education requirement.

Professors

K. Altaïi, C. Bachmann, M. Bentley, T. Benzing, A. Biesecker, Z. Bortolot, R. Brent, C. J. Brodrick-Hartman, T. Chen, J. Coffman, S. Frysinger, N. Hendrickson, M. Kimsey, C. Klevickis, R. Kolvoord, H. Kraenzle, D. McGraw, R. McKown, J. Miles, M. Papadakis, R. Raab, E. Salib, J. Spindel, A. Teate, W. Teel, L. Temple, L. Thomas

Associate Professors

M. Benton, S. Conley, A. Goodall, S. El-Tawab, S. Marrin, C. Nash, N. Radziwill, E. Reid, S. Stockwell, J. Tang, T. Walton, H. Way

Assistant Professors

D. Bonsal, J. Ferenbaugh, R. MacDonald, K. Moore, G. Murton, A. Salman, R. Simmons, J. Stoltzfus, Q. Tao, X. Wei, C. Yang, E. York, K., Yurco, H. Zhang

Instructors

P. Henriksen, P. Rittenhouse

Cross Disciplinary Major and Minor Programs

ISAT participates in several cross disciplinary programs. These include a major in biotechnology and minors in

- Environmental Information Systems Minor
- Environmental Management Minor
- Environmental Science Minor
- Environmental Studies Minor
- Materials Science Minor
- Science, Technology and Society Minor
- Telecommunications Minor

Geographic Science

Program Coordinator: Dr. Mace Bentley

Phone: (540) 568-6260

Email: bentleml@jmu.edu

Website: <http://www.gs.jmu.edu>

Mission

The Geographic Science Program empowers, inspires and motivates students to become competent critical thinkers who will prepare for lifelong learning, respond to intellectual challenges with interest, excitement and competence, and see themselves as global citizens actively involved in the world around them. The Geographic Science Program prepares students who are confident in their abilities as geographers. Graduates have the skills to make a professional contribution to the field, and to compete in graduate programs and the job market. They are highly qualified for careers in research and development and are equipped for long-term success as professionals in the field of geography.

Through the study of geography, students will:

- Understand and properly use the terminology and concepts that are central to the discipline of geography, and explain how these concepts evolved over time.
- Effectively use appropriate geospatial technologies to address questions about human interactions within the built or natural environments.
- Be productive participants in research efforts aimed at measuring, describing, analyzing, and explaining the underlying processes giving rise to geographic phenomena.
- Work effectively in multidisciplinary teams.
- Evaluate human-environment interactions from a holistic point of view that addresses geographic, as well as political, social, economic and ethical factors affecting those interactions.
- Demonstrate civic responsibility and appreciation for cultural and physical diversity from local to global scales.

Career Opportunities

The geography major is divided into concentration areas. Each of these offers a unique set of career opportunities.

Co-curricular Activities and Organizations

- Geography Club
- Gama Theta Upsilon (International Geographical Honor Society)

Integrated Science and Technology

Location: ISAT Building, Room 121

Website: <http://www.isat.jmu.edu>

Mission Statement

The Integrated Science and Technology Bachelors Program prepares graduates to excel in a complex, technological world by empowering them to become critical thinkers and lifelong learners able to provide multi-disciplinary solutions to scientific and technological challenges with sensitivity to social, ethical and global considerations.

The foundational concept of the ISAT Program, which distinguishes it from other science- and technology-based programs, is its integration of multiple disciplines within a student's four-year course of study. The unique integrative character of the program is carried by the curriculum content, pedagogy, and departmental culture.

Goals

We measure our success by achieving the following 11 goals.

ISAT graduates will be able to do the following:

- Apply and integrate mathematics, physical science, biological science, and technology.
- Apply sound experimental methodology.
- Understand the professional requirements for the acquisition and use of information and data.
- Work effectively in multidisciplinary teams.
- Solve technological problems and understand their societal implications.
- Understand and apply the principles of professional ethics.
- Communicate effectively on social, scientific and technical matters.
- Analyze science and technology within broader global, political, economic and social contexts.
- Become autonomous, self-directed learners who recognize the need for lifelong learning.
- Use the computer as an effective problem-solving tool.
- Examine a problem and assemble the tools and knowledge needed to solve it.

Career Opportunities

The ISAT major prepares graduates for a wide variety of careers because of the breadth of science, technology, economic, and societal studies coupled with the integrative, problem-solving focus of the program. The program prepares students for a professional career and the majority of students enter the workforce upon graduation. However, a significant number choose to continue their education through a variety of graduate programs.

ISAT graduates have successfully built careers over a wide range of professions. Examples include technical and operational consulting, biotech lab research, network reliability and security improvement, energy and environmental policy development, information management, renewable energy development, manufacturing process development, and environmental management.

Some graduates start their own businesses, some work in small start-ups involved with new technology applications while others work in Fortune 500 companies. Graduates have also chosen to start their careers in other directions including government agencies, Peace Corps and other forms of public service, education, and politics.

Students who choose graduate studies have a wide range of options. ISAT graduates have successfully completed graduate studies in areas such as engineering, business, microbiology, environment, computer science, law, and medicine. The flexibility

of the ISAT program allows students to select appropriate elective courses as they prepare for the graduate program of their choice.

Co-curricular Activities and Organizations

- ISAT Honor Society
- Environmental Management, JMU Student Chapter of Air and Waste Management Association
- Association for Facilities Engineering, JMU Student Chapter
- Virginia Biotechnology Association, JMU Student Chapter
- Society of Automotive Engineers International, JMU Student Chapter
- IEEE Computer Society, JMU Student Chapter
- Armed Force Communications and Electronics Association (AFCEA), JMU Student Chapter
- American Wind Energy Association, JMU Student Chapter
- Collaboration for Environment, Health and Safety (CEHS)

Program Accreditation

The ISAT Bachelor's degree program is accredited by the Applied Science Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET).

Intelligence Analysis

Director: Stephen Marrin

Phone: (540) 568-2746

Email: marrinsp@jmu.edu

Website: <http://www.jmu.edu/ia>

Mission Statement

The IA program will equip students to evaluate data from diverse sources and objectively assess the most significant implications for decision-making in a way that goes beyond other existing estimates of the situation and its significance using an integrated skill set in cognitive, computational, contextual and communicative methods, exemplify the character traits that define an effective and ethical analyst and employ the conceptual understanding of the underlying theoretical frameworks necessary to adapt and apply these methods to any type of problem.

The IA program's core values are versatility, real-world relevance, methodological sophistication, academic rigor, intellectual community, ethical and professional practice, and external engagement

Career Opportunities

IA students can find employment in an array of government agencies (both civilian and military), federal contracting and consulting firms, select U.S. and multinational corporations, and state and local law enforcement.

Admission to Intelligence Analysis

Currently Enrolled Students

Admission to JMU does not guarantee admission to the intelligence analysis major. The IA program will strive to accommodate all interested students who adopt IA upon admission to JMU. The size of the cohort will be limited beyond fall semester of sophomore year.

To be eligible to apply for full admission to the major, students must complete a statistics course (MATH 220 or ISAT 251) and complete the following courses with a grade of "C" or better:

- IA 200. Introduction to National Security Intelligence
- IA 240. Technology Applications in a Networked World
- IA 261. Hypothesis Testing

Students will be admitted on the competitive basis of their combined performance in the first semester's three required IA courses.

Transfer Students

Transfer students must also take the three required courses during their fall semester, as these courses are not offered in the spring. It is recommended that transfer students talk with an IA adviser regarding the selection of a minor that can be useful for the major if they begin during spring semester.

Geographic Science Minor

Minor Requirements

The minor in geographic science consists of the following courses for a total of not less than 19 credit hours.

Required Courses

- GEOG 210. Physical Geography (2, 2) *4.00*
- GEOG 215. Introduction to Geographic Information Science and Cartography *3.00*
- GEOG 280. Human Geography: The Cultural Landscape *3.00*
- Three additional geographic science courses *9-12 Credit Hours*

Total: 19-22 Credit Hours

Geographic Science, Applied Geographic Information Science Concentration, B.A.

Applied Geographic Information Science (AGIS) Concentration

JMU Geographic Science graduates with an AGIS concentration are prepared to gain professional employment with government and industry or go on to graduate programs. Public agencies where they find employment include local and regional planning agencies, mapping organizations such as the U.S. Geological Survey, intelligence agencies such as the National Geospatial Intelligence Agency, and also in the environmental science field with the U.S. Forest Service, the National Park Service, the Environmental Protection Agency and other agencies.

JMU AGIS graduates find opportunities in industry with companies such as ESRI, Digital Global, Lockheed, BAE Systems, Astrium, SAIC, Sanborn and many others.

Degree and Major Requirements

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Foreign Language classes (intermediate level required) *0-14 Credit Hours*²
- Philosophy course(s) (in addition to General Education courses) *3 Credit Hours*
- Major requirements *46 Credit Hours*
- Electives *16-30 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary. ISAT 251 for the math requirement in Cluster Three is strongly recommended, as is GEOG 200 in Cluster Four.

² The foreign language requirement may be satisfied by successful completion of the second semester of the intermediate level of the student's chosen language (typically 232) or by placing out of that language through the Department of Foreign Languages, Literatures and Cultures placement test.

Major Requirements

Core Courses

- ISAT 251. Topics in Applied Statistics in ISAT [C3QR] *3.00*
or
- MATH 220. Elementary Statistics [C3QR] *3.00*
- GEOG 210. Physical Geography (2, 2) *4.00*
- GEOG 215. Introduction to Geographic Information Science and Cartography *3.00*
- GEOG 216. Earth Observation and GPS *3.00*
- GEOG 280. Human Geography: The Cultural Landscape *3.00*
- GEOG 290. Human-Environment Interactions *3.00*
or

- GEOG 308. Environment, Nature and Society 3.00
- Advanced Sequence GEOG 400-level (selected in consultation with the adviser) 6 Credit Hours ^{1,2}
- Concentration courses 21 Credit Hours

Total: 46 Credit Hours

Footnotes

¹ For Honors students, the advanced sequence is GEOG 499 A, B, C.

² Students may opt for a capstone experience that entails three or six hours of independent research (GEOG 490), with the approval of and in close consultation with a project adviser.

Additional Information

In addition to the geography core courses, students must choose a concentration, listed in the "Concentrations" section. All courses for the major must be taken on a graded basis. Students must earn a "C" or better in each of the core courses as they are prerequisites to most concentration courses.

Concentration Requirements

Required Courses

In addition to the geography core requirements, students in the AGIS concentration must complete the following course work.

- GEOG 365. Cartography and Geospatial Visualization 3.00
- GEOG 366. Intermediate Geographic Information Science 3.00
- GEOG 385. Principles of Remote Sensing 3.00

Choose nine credit hours from the following electives:

Courses from the ISAT program, the Computer Science, Department of and the College of Business may be used as electives, as approved by the GS program operations coordinator.

- GEOG 406. Forest Inventory: A Geospatial Approach 3.00
- GEOG 465. Topics in GIS 3.00
- GEOG 466. GIS and Geographic Databases 3.00
- GEOG 467. GIS Project Management 3.00
- GEOG 468. Internet Geographic Information Systems 3.00
- GEOG 469. Applications of Geographic Information Systems 3.00
- GEOG 485. Processing Remotely Sensed Data 3.00
- GEOG 490. Senior Research or Field Practicum 3.00
- GEOG 491. International Studies 1.00 - 3.00
- GEOG 495. Internship in Geography 3.00 - 6.00
- GEOG 497. Independent Study 3.00

Cognate Course: 3 Credit Hours

(three credit hours selected from the following)

- GEOG 200. Geography: The Global Dimension [C4GE] 3.00
- GEOG 300. Population Geography 3.00

- GEOG 301. Introduction to Natural Disasters 3.00
- or
- HUMN 301. Introduction to Natural Disasters Response 3.00

- GEOG 310. Environmental Issues 1.00 - 4.00
- GEOG 315. Field Studies in Geography 3.00
- GEOG 320. Human Dimensions of Global Change 3.00
- GEOG 322. Agricultural Systems 3.00
- GEOG 323. The Geography of Human Genetics, Infectious Diseases and Diet 3.00
- GEOG 325. Environmental Ethics 3.00
- GEOG 327. Climatology 3.00
- GEOG 329. Global Climate Change 3.00
- GEOG 331. Geography of Virginia 3.00
- GEOG 332. Geography of Europe 3.00
- GEOG 334. Geography of East and Southeast Asia 3.00
- GEOG 335. Geography of Africa 3.00
- GEOG 336. Environmental Hazards: A Focus on Southeast Asia 3.00
- GEOG 337. Geography of Latin America 3.00
- GEOG 338. Geography of the Philippine Islands: Problems and Possibilities 3.00
- GEOG 339. Geography of the Caribbean 3.00
- GEOG 340. Biogeography 3.00
- GEOG 341. Wilderness Techniques 3.00
- GEOG 342. Management and Protection of Natural Resources 3.00
- GEOG 343. Wildlife Management 3.00
- GEOG 345. Geography of Poverty 3.00
- GEOG 350. Topics in Geography 1.00 - 3.00
- GEOG 355. Global Positioning Systems 3.00

- GEOG 360. GIS for Humanitarian Assistance 3.00
- or
- HUMN 360. GIS for Humanitarian Assistance 3.00

- GEOG 375. Political Geography 3.00
- GEOG 376. Urban Geography 3.00
- GEOG 380. Cultural Geography 3.00

- GEOG 402. Forest Ecology 4.00
- or
- BIO 402. Forest Ecology 4.00

- GEOG 410. Geography and Film 3.00
- GEOG 427. Water Resources of the World 3.00

- GEOG 429. Sustainability: An Ecological Perspective 3.00
- or
- ISAT 429. Sustainability: An Ecological Perspective 3.00

- GEOG 430. Geography of Crop Plants 3.00

- GEOG 440. Global Biodiversity *3.00*
- GEOG 470. Senior Seminar in Environmental Conservation, Sustainability and Development *3.00*
- GEOG 476. Sustainable Cities Seminar *3.00*
- ISAT 425. Environmental Hydrology *3.00*
- ISAT 473. Local Agriculture and Farm Internships *4.00*
- ISAT 474. Political Ecology *3.00*

Total: 21 Credit Hours

In addition to the geography core courses, students must choose a concentration, listed in the "Concentrations" section. All courses for the major must be taken on a graded basis. Students must earn a "C" or better in each of the core courses as they are prerequisites to most concentration courses.

Concentration Requirements

Required Courses

Methods Course

In addition to the geography core requirements, students in the customized concentration must complete one of the following methods courses:

- GEOG 315. Field Studies in Geography 3.00
- GEOG 341. Wilderness Techniques 3.00
- GEOG 355. Global Positioning Systems 3.00
- GEOG 365. Cartography and Geospatial Visualization 3.00
- GEOG 366. Intermediate Geographic Information Science 3.00
- GEOG 385. Principles of Remote Sensing 3.00

Declared Pathway

Students will choose from a set of courses, approved by a program adviser, on the basis of how they fit together thematically and support the educational objectives of the GS program. Students must take a minimum of 18 credit hours at the 300 level or above (in addition to the methods course). At least 6 of these credit hours must be at the 400 level or above.

Total: 21 Credit Hours

Total: 120 Credit Hours

Footnote

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary. ISAT 251 for the math requirement in Cluster Three is strongly recommended, as is GEOG 200 in Cluster Four.

Major Requirements

Core Courses

- ISAT 251. Topics in Applied Statistics in ISAT [C3QR] *3.00*
or
- MATH 220. Elementary Statistics [C3QR] *3.00*

- GEOG 210. Physical Geography (2, 2) *4.00*
- GEOG 215. Introduction to Geographic Information Science and Cartography *3.00*
- GEOG 216. Earth Observation and GPS *3.00*
- GEOG 280. Human Geography: The Cultural Landscape *3.00*

- GEOG 290. Human-Environment Interactions *3.00*
or
- GEOG 308. Environment, Nature and Society *3.00*
- Advanced Sequence GEOG 400-level (Selected in consultation with the adviser) *6 Credit Hours*^{1,2}
- Concentration courses *21 Credit Hours*

Total: 46 Credit Hours

Footnotes

¹ For Honors students, the advanced sequence is GEOG 499 A, B, C.

² Students may opt for a capstone experience that entails three or six hours of independent research (GEOG 490), with the approval of and in close consultation with a project adviser.

Additional Information

In addition to the geography core courses, students must choose a concentration, listed in the "Concentrations" section. All courses for the major must be taken on a graded basis. Students must earn a "C" or better in each of the core courses as they are prerequisites to most concentration courses.

Concentration Requirements

Required Courses

Methods Course

In addition to the geography core requirements, students in the customized concentration must complete one of the following methods courses:

- GEOG 315. Field Studies in Geography *3.00*
- GEOG 341. Wilderness Techniques *3.00*
- GEOG 355. Global Positioning Systems *3.00*
- GEOG 365. Cartography and Geospatial Visualization *3.00*
- GEOG 366. Intermediate Geographic Information Science *3.00*
- GEOG 385. Principles of Remote Sensing *3.00*

Declared Pathway

Students will choose from a set of courses, approved by a program adviser, on the basis of how they fit together thematically and support the educational objectives of the GS program. Students must take a minimum of 18 credit hours at the 300 level or above (in addition to the methods course). At least 6 of these credit hours must be at the 400 level or above.

Total: 21 Credit Hours

Geographic Science, Environmental Conservation, Sustainability and Development Concentration, B.A.

Environmental Conservation, Sustainability and Development Concentration

Geographic Science graduates trained in resource analysis, environmental conservation and sustainable development find jobs with local, state and federal governments, non-profit organizations, and for-profit agencies.

Organizations hire geographers to work in environmental and land use planning, resource management (including hydrology, forestry, wildlife and soil conservation, and recreation management), area or regional specialties, international business, community development, and development of human and natural resources in foreign countries. Many geographic science graduates move on to graduate degrees (M.A., M.S. and Ph.D.) and become educators in higher education (community colleges and universities) or obtain higher-level positions in both the private and public sector.

Private environmental organizations and consulting firms, as well as government agencies, hire students completing the environmental studies concentration at JMU. Principal employers include the Environmental Protection Agency, the U.S. Forest Service, the National Park Service, U.S. Geological Survey, and non-profit organizations including the Nature Conservancy and Peace Corps.

Degree and Major Requirements

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Foreign Language classes (intermediate level required) *0-14 Credit Hours*²
- Philosophy course(s) (in addition to General Education courses) *3 Credit Hours*
- Major requirements *46 Credit Hours*
- Electives *16-30 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary. ISAT 251 for the math requirement in Cluster Three is strongly recommended, as is GEOG 200 in Cluster Four.

² The foreign language requirement may be satisfied by successful completion of the second semester of the intermediate level of the student's chosen language (typically 232) or by placing out of that language through the Department of Foreign Languages, Literatures and Cultures placement test.

Major Requirements

Core Courses

- ISAT 251. Topics in Applied Statistics in ISAT [C3QR] *3.00*
or
- MATH 220. Elementary Statistics [C3QR] *3.00*
- GEOG 210. Physical Geography (2, 2) *4.00*
- GEOG 215. Introduction to Geographic Information Science and Cartography *3.00*
- GEOG 216. Earth Observation and GPS *3.00*
- GEOG 280. Human Geography: The Cultural Landscape *3.00*

- GEOG 290. Human-Environment Interactions *3.00*
or
- GEOG 308. Environment, Nature and Society *3.00*
- Advanced Sequence GEOG 400-level (selected in consultation with the adviser) *6 Credit Hours*^{1,2}
- Concentration courses *21 Credit Hours*

Total: 46 Credit Hours

Footnotes

¹ For Honors students, the advanced sequence is GEOG 499 A, B, C.

² Students may opt for a capstone experience that entails three or six hours of independent research (GEOG 490), with the approval of and in close consultation with a project adviser.

Additional Information

In addition to the geography core courses, students must choose a concentration, listed in the "Concentrations" section. All courses for the major must be taken on a graded basis. Students must earn a "C" or better in each of the core courses as they are prerequisites to most concentration courses.

Concentration Requirements

The environmental conservation, sustainability and development (ECSD) concentration focuses on the geographical contexts within which people and places interact. Required and elective course work allows students to explore spatial and temporal patterning between human communities and the natural environment at multiple scales. The curriculum addresses global issues such as global climate change and globalization; environment and human interactions including political, economic, physical and ethical factors; human and ecological aspects of sustainable development; natural resource management including energy, forests, wildlife and biodiversity; cultural ecology; regional geography; and population issues.

In addition to the geography core requirements, students in the environmental conservation, sustainability and development concentration must complete the following course work.

Required Courses

- ECSD Electives *15 Credit Hours*
- Cognate course *3 Credit Hours*

Senior seminar course, selected from the following: 3 Credit Hours

- GEOG 410. Geography and Film *3.00*
- GEOG 427. Water Resources of the World *3.00*
- GEOG 429. Sustainability: An Ecological Perspective *3.00*
- GEOG 440. Global Biodiversity *3.00*
- GEOG 470. Senior Seminar in Environmental Conservation, Sustainability and Development *3.00*
- GEOG 476. Sustainable Cities Seminar *3.00*
- GEOG 491. International Studies *1.00 - 3.00*

Total: 21 Credit Hours

ECSD Electives

Students select four courses from the list below. These 300-level courses are identified on the concentration form, which will be reviewed and approved by the student's academic adviser.

In consultation with the academic adviser, a student may select one non-geographic science course as an elective.

- GEOG 200. Geography: The Global Dimension [C4GE] 3.00
- GEOG 300. Population Geography 3.00

- GEOG 301. Introduction to Natural Disasters 3.00
or
- HUMN 301. Introduction to Natural Disasters Response 3.00

- GEOG 310. Environmental Issues 1.00 - 4.00
- GEOG 315. Field Studies in Geography 3.00
- GEOG 320. Human Dimensions of Global Change 3.00
- GEOG 322. Agricultural Systems 3.00
- GEOG 323. The Geography of Human Genetics, Infectious Diseases and Diet 3.00
- GEOG 325. Environmental Ethics 3.00
- GEOG 327. Climatology 3.00
- GEOG 329. Global Climate Change 3.00
- GEOG 331. Geography of Virginia 3.00
- GEOG 332. Geography of Europe 3.00
- GEOG 334. Geography of East and Southeast Asia 3.00
- GEOG 335. Geography of Africa 3.00
- GEOG 336. Environmental Hazards: A Focus on Southeast Asia 3.00
- GEOG 337. Geography of Latin America 3.00
- GEOG 338. Geography of the Philippine Islands: Problems and Possibilities 3.00
- GEOG 339. Geography of the Caribbean 3.00
- GEOG 340. Biogeography 3.00
- GEOG 341. Wilderness Techniques 3.00
- GEOG 342. Management and Protection of Natural Resources 3.00
- GEOG 343. Wildlife Management 3.00
- GEOG 345. Geography of Poverty 3.00
- GEOG 348. Indigenous Geographies 3.00
- GEOG 350. Topics in Geography 1.00 - 3.00
- GEOG 355. Global Positioning Systems 3.00

- GEOG 360. GIS for Humanitarian Assistance 3.00
or
- HUMN 360. GIS for Humanitarian Assistance 3.00

- GEOG 375. Political Geography 3.00
- GEOG 376. Urban Geography 3.00
- GEOG 380. Cultural Geography 3.00

- GEOG 402. Forest Ecology 4.00
or
- BIO 402. Forest Ecology 4.00

- GEOG 406. Forest Inventory: A Geospatial Approach 3.00
- GEOG 410. Geography and Film 3.00
- GEOG 427. Water Resources of the World 3.00

- GEOG 429. Sustainability: An Ecological Perspective 3.00
or
- ISAT 429. Sustainability: An Ecological Perspective 3.00

- GEOG 430. Geography of Crop Plants 3.00
- GEOG 440. Global Biodiversity 3.00
- GEOG 470. Senior Seminar in Environmental Conservation, Sustainability and Development 3.00
- GEOG 476. Sustainable Cities Seminar 3.00
- GEOG 490. Senior Research or Field Practicum 3.00
- GEOG 491. International Studies 1.00 - 3.00
- GEOG 495. Internship in Geography 3.00 - 6.00
- GEOG 497. Independent Study 3.00
- ISAT 425. Environmental Hydrology 3.00
- ISAT 473. Local Agriculture and Farm Internships 4.00
- ISAT 474. Political Ecology 3.00

Cognate Course: 3 Credit Hours

(three credit hours selected from the following)

- GEOG 365. Cartography and Geospatial Visualization 3.00
- GEOG 366. Intermediate Geographic Information Science 3.00
- GEOG 385. Principles of Remote Sensing 3.00

Geographic Science, Environmental Conservation, Sustainability and Development Concentration, B.S.

Environmental Conservation, Sustainability and Development Concentration

Geographic Science graduates trained in resource analysis, environmental conservation and sustainable development find jobs with local, state and federal governments, non-profit organizations, and for-profit agencies.

Organizations hire geographers to work in environmental and land use planning, resource management (including hydrology, forestry, wildlife and soil conservation, and recreation management), area or regional specialties, international business, community development, and development of human and natural resources in foreign countries. Many geographic science graduates move on to graduate degrees (M.A., M.S. and Ph.D.) and become educators in higher education (community colleges and universities) or obtain higher-level positions in both the private and public sector.

Private environmental organizations and consulting firms, as well as government agencies, hire students completing the environmental studies concentration at JMU. Principal employers include the Environmental Protection Agency, the U.S. Forest Service, the National Park Service, U.S. Geological Survey, and non-profit organizations including the Nature Conservancy and Peace Corps.

Degree and Major Requirements

Degree Requirements

Required Courses

- General Education *41-44 Credit Hours*¹
- Quantitative requirement (in addition to General Education) *3 Credit Hours*
- Scientific Literacy requirement (in addition to General Education) *3-4 Credit Hours*
- Major requirements *46 Credit Hours*
- Electives *23-27 Credit Hours*

Total: 120 Credit Hours

Footnote

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary. ISAT 251 for the math requirement in Cluster Three is strongly recommended, as is GEOG 200 in Cluster Four.

Major Requirements

Core Courses

- ISAT 251. Topics in Applied Statistics in ISAT [C3QR] *3.00*
or
- MATH 220. Elementary Statistics [C3QR] *3.00*

- GEOG 210. Physical Geography (2, 2) *4.00*
- GEOG 215. Introduction to Geographic Information Science and Cartography *3.00*
- GEOG 216. Earth Observation and GPS *3.00*
- GEOG 280. Human Geography: The Cultural Landscape *3.00*

- GEOG 290. Human-Environment Interactions *3.00*
or
- GEOG 308. Environment, Nature and Society *3.00*
- Advanced Sequence GEOG 400-level (Selected in consultation with the adviser) *6 Credit Hours*^{1, 2}
- Concentration courses *21 Credit Hours*

Total: 46 Credit Hours

Footnotes

¹ For Honors students, the advanced sequence is GEOG 499 A, B, C.

² Students may opt for a capstone experience that entails three or six hours of independent research (GEOG 490), with the approval of and in close consultation with a project adviser.

Additional Information

In addition to the geography core courses, students must choose a concentration, listed in the "Concentrations" section. All courses for the major must be taken on a graded basis. Students must earn a "C" or better in each of the core courses as they are prerequisites to most concentration courses.

Concentration Requirements

The environmental conservation, sustainability and development (ECSD) concentration focuses on the geographical contexts within which people and places interact. Required and elective course work allows students to explore spatial and temporal patterning between human communities and the natural environment at multiple scales. The curriculum addresses global issues such as global climate change and globalization; environment and human interactions including political, economic, physical and ethical factors; human and ecological aspects of sustainable development; natural resource management including energy, forests, wildlife and biodiversity; cultural ecology; regional geography; and population issues.

In addition to the geography core requirements, students in the environmental conservation, sustainability and development concentration must complete the following course work.

Required Courses

- ECSD Electives *15 Credit Hours*
- Cognate course *3 Credit Hours*

Senior seminar course, selected from the following: **3 Credit Hours**

- GEOG 410. Geography and Film *3.00*
- GEOG 427. Water Resources of the World *3.00*
- GEOG 429. Sustainability: An Ecological Perspective *3.00*
- GEOG 440. Global Biodiversity *3.00*
- GEOG 470. Senior Seminar in Environmental Conservation, Sustainability and Development *3.00*
- GEOG 476. Sustainable Cities Seminar *3.00*
- GEOG 491. International Studies *1.00 - 3.00*

Total: 21 Credit Hours

ECSD Electives

Students select four courses from the list below. These 300-level courses are identified on the concentration form, which will be reviewed and approved by the student's academic adviser.

In consultation with the academic adviser, a student may select one non-geographic science course as an elective.

- GEOG 200. Geography: The Global Dimension [C4GE] *3.00*
- GEOG 300. Population Geography *3.00*

- GEOG 301. Introduction to Natural Disasters *3.00*
- or
- HUMN 301. Introduction to Natural Disasters Response *3.00*

- GEOG 310. Environmental Issues *1.00 - 4.00*
- GEOG 315. Field Studies in Geography *3.00*
- GEOG 320. Human Dimensions of Global Change *3.00*
- GEOG 322. Agricultural Systems *3.00*
- GEOG 323. The Geography of Human Genetics, Infectious Diseases and Diet *3.00*
- GEOG 325. Environmental Ethics *3.00*
- GEOG 327. Climatology *3.00*
- GEOG 329. Global Climate Change *3.00*
- GEOG 331. Geography of Virginia *3.00*
- GEOG 332. Geography of Europe *3.00*
- GEOG 334. Geography of East and Southeast Asia *3.00*
- GEOG 335. Geography of Africa *3.00*
- GEOG 336. Environmental Hazards: A Focus on Southeast Asia *3.00*
- GEOG 337. Geography of Latin America *3.00*
- GEOG 338. Geography of the Philippine Islands: Problems and Possibilities *3.00*
- GEOG 339. Geography of the Caribbean *3.00*
- GEOG 340. Biogeography *3.00*
- GEOG 341. Wilderness Techniques *3.00*
- GEOG 342. Management and Protection of Natural Resources *3.00*
- GEOG 343. Wildlife Management *3.00*
- GEOG 345. Geography of Poverty *3.00*
- GEOG 348. Indigenous Geographies *3.00*
- GEOG 350. Topics in Geography *1.00 - 3.00*
- GEOG 355. Global Positioning Systems *3.00*

- GEOG 360. GIS for Humanitarian Assistance *3.00*
or
- HUMN 360. GIS for Humanitarian Assistance *3.00*

- GEOG 375. Political Geography *3.00*
- GEOG 376. Urban Geography *3.00*
- GEOG 380. Cultural Geography *3.00*

- GEOG 402. Forest Ecology *4.00*
or
- BIO 402. Forest Ecology *4.00*

- GEOG 406. Forest Inventory: A Geospatial Approach *3.00*
- GEOG 410. Geography and Film *3.00*
- GEOG 427. Water Resources of the World *3.00*

- GEOG 429. Sustainability: An Ecological Perspective *3.00*
or
- ISAT 429. Sustainability: An Ecological Perspective *3.00*

- GEOG 430. Geography of Crop Plants *3.00*
- GEOG 440. Global Biodiversity *3.00*
- GEOG 470. Senior Seminar in Environmental Conservation, Sustainability and Development *3.00*
- GEOG 476. Sustainable Cities Seminar *3.00*
- GEOG 490. Senior Research or Field Practicum *3.00*
- GEOG 491. International Studies *1.00 - 3.00*

- GEOG 495. Internship in Geography *3.00 - 6.00*
- GEOG 497. Independent Study *3.00*
- ISAT 425. Environmental Hydrology *3.00*
- ISAT 473. Local Agriculture and Farm Internships *4.00*
- ISAT 474. Political Ecology *3.00*

Cognate Course: 3 Credit Hours

(three credit hours selected from the following)

- GEOG 365. Cartography and Geospatial Visualization *3.00*
- GEOG 366. Intermediate Geographic Information Science *3.00*
- GEOG 385. Principles of Remote Sensing *3.00*

Integrated Science and Technology Minor

Minor Requirements

The minor in ISAT mirrors the major by having a breadth component and a depth component. The breadth component is satisfied through nine credit hours in Issues in Science and Technology and Instrumentation and Measurement. The depth component is satisfied through focused study in a strategic sector.

Students should note that many courses have ISAT prerequisites that are outside the minor (although equivalents to ISAT prerequisite courses will be accepted). In planning a sequence of courses for the minor, students are encouraged to meet with an ISAT adviser to ensure that all needed prerequisites will be taken in due course. In addition, before a student pursuing an ISAT minor can take any ISAT course, a grade equal to or higher than "C-" is required for all ISAT foundation courses that are prerequisites for another required ISAT foundation course.

The minimum requirements for the minor in ISAT are as follows:

Courses

Choose three courses from the following: 9-11 Credit Hours

- ISAT 112. Environmental Issues in Science and Technology (2,3) [C3PP] *4.00*
- ISAT 113. Biotechnology Issues in Science and Technology (2,2) [C3NS] *4.00*
- ISAT 211. Issues in Modern Production Systems *3.00*
- ISAT 212. Energy Issues in Science and Technology *3.00*
- ISAT 253. Instrumentation and Measurement in ISAT *3.00*

Choose one of the following sequences: 6-7 Credit Hours

Energy (7 credits)

- ISAT 301. Instrumentation and Measurement in Energy (0, 2) *1.00*
- ISAT 310. Energy Fundamentals I *3.00*
- ISAT 311. Role of Energy in Modern Society *3.00*

Environment (7 credits)

- ISAT 320. Fundamentals of Environmental Science & Technology I *4.00*
- ISAT 321. Fundamentals of Environmental Science & Technology II *3.00*

Production Systems (7 credits)

- ISAT 330. Sustainable Manufacturing Systems *3.00*
- ISAT 331. Cyber-Physical Industry *3.00*

Information and Knowledge Management (6 credits)

- ISAT 340. Software Development *3.00*
- ISAT 341. Machine Learning and Data Science *3.00*

Applied Biotechnology (7 credits)

- ISAT 305. Instrumentation and Measurement in Biotechnology (0, 2) *1.00*
- ISAT 350. Biotechnology for the New Millennium I *3.00*
- ISAT 351. Biotechnology for the New Millennium II *3.00*

Telecommunications, Networking, and Security (7 credits)

- ISAT 360. Introduction to Networking & Security *3.00*
- ISAT 361. Fundamentals of Data Communications and Networking II *3.00*
- ISAT 306. Instrumentation and Measurements in Data Communications and Networking *1.00*

One additional Integrated Science and Technology course at the 300 or 400 level: 3
Credit Hours

Total: 18-21 Credit Hours

Integrated Science and Technology, B.S.

Degree Requirements

While completing the ISAT courses, the student will also pursue the university's general education curriculum that is required of all students and is a cornerstone of the education received by every student. The required ISAT courses are listed below. A total of 120 credit hours are required for graduation.

In addition, a grade equal to or higher than "C-" is required for ISAT 151, ISAT 152, ISAT 212 and ISAT 251.

Required Courses

- Issues in Science and Technology I-V *17 Credit Hours (ISAT 112, 113, 211, 212, 215)*
- Social Context of Technology and Science *6 Credit Hours (ISAT 171 and 271)*
- Analytical Methods I-IV *14 Credit Hours (ISAT 151, 152, 251 and 252)*

- Holistic Problem Solving *10 Credit Hours (ISAT 190, 290, 390 and 391)*
- Strategic Sectors (*13-14 credit hours*):
 - Choose two of the following five sets of classes:
 - Energy (ISAT 301, 310 and 311);
 - Environment (ISAT 320 and 321);
 - Production Systems (ISAT 303, 330 and 331);
 - Information and Knowledge Management (ISAT 340 and 341); and
 - Applied Biotechnology (ISAT 305, 350 and 351)
- Concentration Courses *12 Credit Hours*

- Senior Capstone Project *6 Credit Hours (ISAT 490, 491 , 492 , 493)*
- General Education courses and electives *41-42 Credit Hours*¹

Total: 120 Credit Hours

Footnote

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

Major Requirements

The Bachelor of Science degree in integrated science and technology produces a graduate broadly acquainted with basic science, technology and social science. All students pursue a common program through their sophomore year that provides a foundation of science and an introduction to its technology applications. Studies are integrated and include mathematics, statistics, physics, chemistry, biology, knowledge-based systems, internet networking and security, environmental science, modern production, energy, and the role of science and technology in society. During their junior and senior years, all students pursue deeper study of strategically significant areas that include applied biotechnology, energy, environmental studies, production systems and information and knowledge management. Each student selects a concentration in any of these areas and pursues additional study in the concentration culminating in a senior project. Students rely heavily upon the computer as a problem-solving tool throughout the curriculum, work in teams extensively and engage in laboratory experiences in the requisite sciences.

Analytical Methods

This sequence of four courses (ISAT 151, 152, 251 and 252) provides students with basic methods and tools for understanding and analyzing problems in science and technology. Subjects are taught in an integrated manner with applications as the unifying factor. Topics include calculus, elements of the physical sciences, statistics, project management, the computer, knowledge-based systems, and instrumentation and measurement.

- ISAT 151. Topics in Applied Calculus in ISAT [C3QR] *4.00*
- ISAT 152. Topics in Applied Physics in Isat *4.00*
- ISAT 251. Topics in Applied Statistics in ISAT [C3QR] *3.00*
- ISAT 252. Programming and Problem Solving *3.00*

First Year Student and Sophomore Courses

- ISAT 112. Environmental Issues in Science and Technology (2,3) [C3PP] *4.00*
- ISAT 113. Biotechnology Issues in Science and Technology (2,2) [C3NS] *4.00*
- ISAT 211. Issues in Modern Production Systems *3.00*

- ISAT 212. Energy Issues in Science and Technology 3.00
- ISAT 215. Telecommunications, Networking and Security 3.00

Issues in Science and Technology

This sequence of five courses (ISAT 112, 113 , 211 , 212 and 215) engages students in the practice of science, both to motivate and to provide understanding of science and technology in the context of important current social issues. Current areas from which issues are selected are living systems, the environment, modern production, internet networking and security, and energy.

- ISAT 112. Environmental Issues in Science and Technology (2,3) [C3PP] 4.00
- ISAT 113. Biotechnology Issues in Science and Technology (2,2) [C3NS] 4.00
- ISAT 211. Issues in Modern Production Systems 3.00
- ISAT 212. Energy Issues in Science and Technology 3.00
- ISAT 215. Telecommunications, Networking and Security 3.00

Social Context of Technology and Science

This two-course sequence (ISAT 171 and 271) introduces the student to the broader issues encountered in science and technology problem-solving, particularly social, ethical, economic and legal issues.

Junior and Senior Courses

Strategic Sectors in Science and Technology

Students complete 13-14 credit hours of instruction in strategic sectors during their junior year. The strategic sectors, developed from national critical technologies lists, represent areas of current strategic importance in the world economy.

The current areas for the sectors are

- Applied biotechnology
- Energy
- Production systems
- Environment
- Information and knowledge management

These are the same topic areas as for the concentrations in ISAT. Sector level classes are 300 level and concentration classes are 400 level.

Concentration Requirements

Students are provided the opportunity to focus their program of study by taking four additional courses in a particular area of concentration. The current areas for a concentration are

- Applied Biotechnology
- Energy
- Production Systems
- Environment
- Information and Knowledge Management

Students also have the option to tailor their area of concentration with the help of their adviser and the approval of the ISAT program director.

Senior Capstone Project

Students take the last senior project class and the rest of their four concentration classes.

- ISAT 490. Capstone Experience I *1.00*
- ISAT 491. Senior Capstone Project I *1.00*
- ISAT 492. Senior Capstone Project II *2.00*
- ISAT 493. Senior Capstone Project III *2.00*

Holistic Problem Solving

This four-course sequence introduces the students to holistic problem solving and has them study a complex problem in an area of technology.

- ISAT 190. Introduction to Holistic Problem Solving in the ISAT Major *1.00*
- ISAT 290. Introduction to Systems Thinking for Complex Problems *3.00*
- ISAT 390. Holistic Problem Solving Workshop I *3.00*
- ISAT 391. Holistic Problem Solving Workshop 2 *3.00*

Recommended Schedule for Majors

First Year

Fall Semester

- ISAT 113. Biotechnology Issues in Science and Technology (2,2) [C3NS] *4.00*
- ISAT 151. Topics in Applied Calculus in ISAT [C3QR] *4.00*
- ISAT 190. Introduction to the Bachelor of Science in Integrated Science and Technology Program *3.00*

Total: 9 Credit Hours

Spring Semester

- ISAT 112. Environmental Issues in Science and Technology (2,3) [C3PP] *4.00*
- ISAT 152. Topics in Applied Physics in Isat *4.00*
- ISAT 171. Governance of Sociotechnical Systems *3.00*

Total: 11 Credit Hours

Second Year

Fall Semester

- ISAT 212. Energy Issues in Science and Technology *3.00*
- ISAT 215. Telecommunications, Networking and Security *3.00*
- ISAT 251. Topics in Applied Statistics in ISAT [C3QR] *3.00*
- ISAT 271. Technology, Science and Society *3.00*

Total: 12 Credit Hours

Spring Semester

- ISAT 211. Issues in Modern Production Systems *3.00*
- ISAT 252. Programming and Problem Solving *3.00*
- ISAT 290. Introduction to Systems Thinking for Complex Problems *3.00*

Total: 9 Credit Hours

Third Year

Fall Semester

- ISAT Strategic Sector I *3 Credit Hours*
- ISAT Strategic Sector I Lab *1 Credit Hour*
- ISAT Strategic Sector II *3 Credit Hours*
- ISAT 390. Holistic Problem Solving Workshop I *3.00*
- ISAT 490. Capstone Experience I *1.00*

Total: 10-12 Credit Hours

Spring Semester

- ISAT Strategic Sector I *3 Credit Hours*
- ISAT Strategic Sector II *3 Credit Hours*
- ISAT Strategic Sector II Lab *1 Credit Hour*
- ISAT 391. Holistic Problem Solving Workshop 2 *3.00*
- ISAT 491. Senior Capstone Project I *1.00*

Total: 10-12 Credit Hours

Fourth Year

Fall Semester

Students take the third senior project class and on the average two concentration classes.

- ISAT 492. Senior Capstone Project II *2.00*
- ISAT Concentration I *3 Credit Hours*
- ISAT Concentration II *3 Credit Hours*

Total: 8 Credit Hours

Spring Semester

Students take the last senior project class and the rest of their four concentration classes.

- ISAT 493. Senior Capstone Project III 2.00
- ISAT Concentration III 3 *Credit Hours*
- ISAT Concentration IV 3 *Credit Hours*

Total: 8 Credit Hours

Integrated Science and Technology Major with Pre-health Preparation

Students majoring in ISAT desiring to prepare for higher education in health careers (dentistry, optometry, medicine, pharmacy, physical therapy, veterinary) may waive some required ISAT courses if they take equivalent courses required by the pre-health programs.

These equivalencies are not generally granted outside of a pre-health preparation program. Students who begin a preparation but do not finish it may be able to have some of the courses waived. Contact Paul Henriksen, Coordinator for Students, for more information.

Required Courses for Pre-Health ISAT Courses Waived

BIO 140, BIO 240	ISAT 113
CHEM 131, CHEM 132	ISAT 112
PHYS (140, 150) or (240, 250)	ISAT 152, ISAT 212
MATH 205, 235 or 231 and 232	ISAT 151
MATH 220	ISAT 251

Intelligence Analysis, B.S.

Degree and Major Requirements

Degree Requirements

Required Courses: 120 Credit Hours

- General Education 41 *Credit Hours*¹
- Quantitative requirement (in addition to General Education) 3 *Credit Hours*
- Scientific Literacy requirement (in addition to General Education) 3-4 *Credit Hours*
- IA foundations and methods courses 48 *Credit Hours*
- IA elective courses 6 *Credit Hours*
- Subject Matter Specialty 18-21 *Credit Hours*
- General Elective Courses 3-6 *Credit Hours*

Footnote

¹ The General Education program contains a set of requirements each student must fulfill.

General Education Courses: 41 Credit Hours

- Cluster One (PHIL 120 recommended) *9 Credit Hours*
- Cluster Two (REL 101 recommended) *9 Credit Hours*
- Cluster Three (ISAT 251 or MATH 220 required) *10 Credit Hours*
- Cluster Four (POSC 200 or POSC 225 recommended) *7 Credit Hours*
- Cluster Five (PSYC 101 recommended) *6 Credit Hours*

IA Foundation and Core Courses: 48 Credit Hours

IA Foundations Courses: 24 Credits

- IA 150. Introduction to Intelligence Analysis *3.00*
- IA 200. Introduction to National Security Intelligence *3.00*
- IA 210. Introduction to Global Competitive Intelligence *3.00*
- IA 250. Research Design and Writing for Intelligence Analysis *3.00*
- IA 300. Seminar on Issues in Intelligence Analysis *3.00*
- IA 405. Ethics, Law and Intelligence Analysis *3.00*
- IA 440. Intelligence Analysis Capstone Project Preparation *3.00*
- IA 450. Capstone Project in Intelligence Analysis *3.00*

Technology Methods Courses: 12 Credits

- IA 240. Technology Applications in a Networked World *3.00*
- IA 241. Introduction to Programming and Data Science *3.00*
- IA 340. Data Mining, Modeling and Knowledge Discovery *3.00*
- IA 342. Visualization Methods, Technologies and Tools for Intelligence Analysis *3.00*

Reasoning Methods Courses: 12 Credits

- IA 261. Hypothesis Testing *3.00*
- IA 312. Causal Analysis *3.00*
- IA 313. Counterfactual Reasoning *3.00*
- IA 314. Strategy Assessment (Rational Decision Theory) *3.00*

IA Elective Courses: 6 Credits

Students must take two of the following IA elective courses:

- IA 341. System Dynamics Modeling, Simulation and Analysis *3.00*
- IA 360. Terrorism and Counterterrorism *3.00*
- IA 363. Apocalypticism, Religious Terrorism and Peace *3.00*
- IA 365. Cyber Intelligence *3.00*
- IA 370. Advanced Competitive Intelligence *3.00*
- IA 400. Cognitive Science and Intelligence Analysis *3.00*
- IA 459. Awareness and Understanding of Chemical, Biological and Radiological Weapons of Mass Destruction *3.00*
- IA 460. All Hazards Response And Management Systems *3.00*
- IA 480. Selected Topics in Intelligence Analysis *3.00* (IA 480 may be taken twice)

- GEOG 375. Political Geography 3.00
 - One course approved by an IA program adviser

Subject Matter Specialty: 18-21 Credits

Students must complete a minor or a second major in another field (at least 18 credits). With the approval of an IA adviser, students may, in special cases, design their own custom concentration of six courses that fit together thematically and support the educational objectives of the IA program.

Interdisciplinary Liberal Studies (IDLS) is the undergraduate major for students pursuing teaching licensure in inclusive early childhood education (early childhood education, preK-3 and early childhood special education, birth to five), elementary education (PreK-6), middle grades education (6-8) and special education (K-12). The IDLS major meets Virginia teacher competencies by providing breadth and integration across the content areas of English and language arts, history, social sciences, mathematics, natural sciences, and technology.

IDLS requirements vary by education program, as outlined in this section. Students declaring the IDLS major must also declare one of the teacher education programs listed. Detailed information on teacher education programs is in the College of Education section of this catalog.

In the unusual circumstance that a student exits the education licensure pre-professional program late in his/her college career, the IDLS director may permit the student to complete the IDLS degree with the addition of an appropriate minor.

Interdisciplinary Liberal Studies for Inclusive Early Childhood Education, Elementary Education and Special Education Licensure, B.S.

Degree Requirements

Required Courses

- IDLS and General Education core 53 *Credit Hours*

- Remaining General Education *6 Credit Hours*
- IDLS upper-level concentration *21 Credit Hours*
- Education program *35-47 Credit Hours*
- Elective *0-5 Credit Hours*

Total: 120 Credit Hours

Core Requirements

Language Arts and Communication

Writing: 3 Credit Hours

- WRTC 103. Rhetorical Reading and Writing [C1W] *3.00*

Oral Communication: 3 Credit Hours

(choose one)

- SCOM 121. Fundamental Human Communication: Presentations [C1HC] *3.00*
- SCOM 122. Fundamental Human Communication: Individual Presentations [C1HC] *3.00*
- SCOM 123. Fundamental Human Communication: Group Presentations [C1HC] *3.00*

Literature: 3 Credit Hours

(choose one)

- ENG 235. Survey of English Literature: From Beowulf to the Eighteenth Century [C2L] *3.00*
- ENG 236. Survey of English Literature: Eighteenth Century to Modern [C2L] *3.00*
- ENG 239. Studies in World Literature [C2L] *3.00*
- ENG 247. Survey of American Literature: From the Beginning to the Civil War [C2L] *3.00*
- ENG 248. Survey of American Literature: From the Civil War to the Modern Period [C2L] *3.00*
- ENG 260. Survey of African-American Literature [C2L] *3.00*

History/Social Sciences

Global History: 6 Credit Hours

(both required)

- HIST 101. World History to 1500 [C2HQC] *3.00*
- HIST 102. World History Since 1500 [C2HQC] *3.00*

U.S. History: 4 Credit Hours

- HIST 225. U.S. History [C4AE] *4.00*

Government: 4 Credit Hours

- POSC 225. U.S. Government [C4AE] 4.00

Economics: 3 Credit Hours

(choose one)

- ECON 200. Introduction to Macroeconomics [C4GE] 3.00
- ECON 201. Introduction to Microeconomics 3.00

Geography: 3 Credit Hours

(choose one)

- GEOG 200. Geography: The Global Dimension [C4GE] 3.00
- GEOG 280. Human Geography: The Cultural Landscape 3.00
- ANTH 195. Cultural Anthropology [C4GE] 3.00 (C, R)

Psychology: 3 Credit Hours

- PSYC 160. Life Span Human Development [C5SD] 3.00

Health: 3 Credit Hours

(choose one)

- KIN 100. Lifetime Fitness & Wellness (2,2) [C5W] 3.00
- HTH 100. Personal Wellness [C5W] 3.00

Mathematics

Fundamentals of Math: 9 Credit Hours

(all required)

- MATH 107. Fundamentals of Mathematics I [C3QR] 3.00
- MATH 108. Fundamentals of Mathematics II 3.00
- MATH 207. Fundamentals of Mathematics III 3.00

Natural Sciences: 9 Credit Hours

- ISCI 171. Earth and Planetary Science for Teachers [C3NS] 3.00
- ISCI 172. Physical Science for Teachers [C3PP] 3.00
- ISCI 173. Life and Environmental Science for Teachers [C3L] 3.00

Upper Level concentration requirement: 21 Credit Hours

IDLS Concentration

In addition to the IDLS core, students will complete an IDLS concentration to provide depth and integration beyond core requirements. The four concentration options are noted below, with each option requiring seven upper-level courses.

- Option 1: Math and Science and Technology. Take four courses in math and three in science and technology, or take three in math and four in science and technology.
- Option 2: Humanities and Social Sciences. Choose a humanities and social science track (1-7) and take six courses in that track, plus the IDLS 400 capstone.
- Option 3: Math and Humanities and Social Sciences. Choose a humanities and social science track (1-7). Take three courses in the humanities and social sciences track and four in math, or take four in the humanities and social sciences track and three in math. The humanities and social sciences courses can include IDLS 400, but it is not required.
- Option 4: Science and Technology and Humanities and Social Sciences. Choose a humanities and social science track (1-7). Take three courses in the humanities and social sciences track and four in science and technology, or take four in the humanities and social sciences track and three in science and technology. The humanities and social sciences courses can include IDLS 400, but it is not required.

The current list of concentration courses is available on the IDLS website.

IDLS Advisement

IDLS majors are assigned two advisers, one to guide them through teacher education program requirements and another to guide them through IDLS major requirements. Students should check with both advisers regularly to ensure timely graduation. These advisers are assigned when students officially declare their education program and IDLS major. To declare, students must acquire education and IDLS academic unit head signatures on a "Change or Declaration of Major" form.

Teacher Licensure

To be eligible for teacher licensure in inclusive early childhood, elementary, middle school and special education, students graduating with the Bachelor of Science degree in IDLS must complete the appropriate teacher education program at the undergraduate and graduate (Master of Arts in Teaching) levels.

Interdisciplinary Liberal Studies for Middle Education Licensure, B.S.

Required Courses

- IDLS and General Education core *46 Credit Hours*
- IDLS upper-level concentration *36-42 Credit Hours*
- Education program *32 Credit Hours*
- Elective *0-6 Credit Hours*

Total: 120 Credit Hours

Core Requirements for IDLS Middle Education

The IDLS middle education curriculum consists of 46 hours of core requirements and 36-42 hours in the content concentrations, depending upon which concentrations are selected. Students will select two concentrations from four: science, mathematics,

social studies and language arts. Mathematics and science concentrations are 18 hours. Language arts and social studies concentrations are 21 hours. Any combination of concentrations will satisfy the teacher licensure endorsement requirements for middle grades licensure in Virginia. The middle grades curriculum of IDLS is open only to middle grades licensure students.

Students follow the General Education planning guide for their catalog year, and complete these specific IDLS core requirements:

- Cluster 2: Must select HIST 102 from Group One
- Cluster 3: Must select Track 2 (the ISCI 17X series); must complete the series with ISCI 173; must take MATH 108 in addition to MATH 107
- Cluster 4: Must select ECON 200
- Cluster 5: Must select PSYC 160

Middle Education Concentration Options

Middle education students will complete the required courses for any two of the four concentration areas: science, mathematics, language arts and social studies. IDLS middle education concentrations provide depth and integration beyond core requirements. The current list of concentration courses is available on the IDLS website.

IDLS Advisement

IDLS majors are assigned two advisers, one to guide them through teacher education program requirements and another to guide them through IDLS major requirements. Students should check with both advisers regularly to ensure timely graduation. These advisers are assigned when students officially declare their education program and IDLS major. To declare, students must acquire education and IDLS academic unit head signatures on a "Change or Declaration of Major" form.

Teacher Licensure

To be eligible for teacher licensure in inclusive early childhood, elementary, middle school and special education, students graduating with the Bachelor of Science degree in IDLS must complete the appropriate teacher education program at the undergraduate and graduate (Master of Arts in Teaching) levels.

Liberal Studies Minor

Liberal Studies is the required content-area minor for students majoring in elementary education and is recommended for students majoring in exceptional education. The Liberal Studies minor ensures classroom teachers have appropriate subject-area knowledge to work with young students. The curriculum meets Virginia teacher competencies by providing breadth and integration across the content areas of language arts, social sciences, mathematics, natural sciences and technology.

Required General Education courses: 18 Credit Hours

When completing the General Education requirements for C4GE, C2HQC, C4AE, C3NS, C3PP, C3L and C3QR, students in the Liberal Studies Minor must complete specific courses to meet VDOE standards in content areas of History, Geography, Mathematics and Natural Sciences.

Human Questions and Contexts Required Course

Complete one of the following courses: 3 Credit Hours

- HIST 101. World History to 1500 [C2HQC] 3.00
- HIST 102. World History Since 1500 [C2HQC] 3.00

The Natural World Required Courses

Complete all four of the following courses: 12 Credit Hours

Natural Systems

- ISCI 171. Earth and Planetary Science for Teachers [C3NS] 3.00

Physical Principles

- ISCI 172. Physical Science for Teachers [C3PP] 3.00

Lab Experience

- ISCI 173. Life and Environmental Science for Teachers [C3L] 3.00

Quantitative Reasoning

- MATH 107. Fundamentals of Mathematics I [C3QR] 3.00

Social and Cultural Processes: The Global Experience Required Course

Complete one of the following courses: 3 Credit Hours

- ANTH 195. Cultural Anthropology [C4GE] 3.00 (C, R)
- ECON 200. Introduction to Macroeconomics [C4GE] 3.00
- GEOG 200. Geography: The Global Dimension [C4GE] 3.00

Required Mathematics Courses: 6 Credit Hours

Complete both of the following courses:

- MATH 108. Fundamentals of Mathematics II 3.00
- MATH 207. Fundamentals of Mathematics III 3.00

Required Social Sciences Courses: 6 Credit Hours

Complete two of the following courses:

- ANTH 377. Space/Culture/Power 3.00 (C)
- HIST 303. Early America 3.00
- HIST 434. Recent America 3.00

- IDLS 395. Topics in IDLS 1.00 - 6.00 (People, Money, and Place taken for 3.00 Credit Hours)
- IDLS 400. Seminar in Liberal Studies 3.00
- ISS 330. Maps, Money and World Trade 3.00
- POSC 335. Comparative Politics for Teachers 3.00
- SOCI 357. Sociology of Disasters 3.00

Required Humanities/Language Arts course: 3 Credit Hours

Complete one of the following courses:

- ENG 299. Writing About Literature 3.00
- ENG 302. Special Topics in Literature and Language 3.00 (Children's Literature)
- ENG 391. Introduction to Creative Writing – Nonfiction 3.00
- IDLS 350. Literacy and Society 3.00

Total: 33 Credit Hours

International Affairs

International Affairs, Comparative Study Concentration, B.A.

Major and Degree Requirements

International affairs is a 50-credit hour major, with a 32-credit common core and 18 credits of concentration study. For further information and a complete list of the distribution requirements and eligible courses, contact the coordinator.

Degree Requirements

Required Courses

- General Education 41 Credit Hours¹
- Foreign Language classes (intermediate level required) 0-14 Credit Hours²
- Philosophy course (in addition to General Education courses) 3 Credit Hours³
- University electives 12-26 Credit Hours
- Major requirements (listed below) 50 Credit Hours

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² The foreign language requirement may be satisfied by successful completion of the second semester of the intermediate level of the student's chosen language (typically 232), or by placing out of that language through the Department of Foreign Languages, Literatures and Cultures' placement test. The international affairs major requires an additional year of language study. That is, students must have three years of a foreign language appropriate to their course of study in the major. Students majoring in

international affairs who use proficiency in a native language to meet the INTA language requirement must make the following substitutions for the two 300-level foreign language courses: AMST 200 and one of the following courses: HIST 225, ENG 247 or ENG 248. Such students who have a diploma from a U.S. high school may take six credits of any foreign language, at any level, instead of the above two courses. These courses must focus on grammar, oral and written communication; they cannot be literature, cinema or civilization courses.

³ If students have taken a PHIL course to meet their General Education requirements, they must take an additional course to meet the B.A. degree philosophy requirement. PHIL 120 and PHIL 150 cannot be used to fulfill the B.A. philosophy requirement.

Major Requirements

Students may choose one of four concentrations: comparative study; foreign policy and global governance; global human development; or international security and conflict. The international affairs major requires that all students complete a common core. Students should be aware that it is not always possible to offer courses on their regular rotation and that new courses may be added and existing ones deleted. Therefore, key requirements should not be left until just before graduation. Any course substitutions must be approved by the international affairs coordinator in consultation with other faculty members.

Core Courses

- ECON 201. Introduction to Microeconomics 3.00
- ECON 270. International Economics 3.00 ¹
- ECON 200. Introduction to Macroeconomics [C4GE] 3.00
- INTA 295. CrossNational Research Skills 4.00 ²
- INTA 489. Senior Seminar in International Affairs 3.00-4.00 ³
- POSC 230. International Relations 3.00
- POSC 240. Comparative Politics 3.00
- FL 300. Grammar and Communication 3.00 ⁴
- FL 320. Oral and Written Communication 3.00 ⁴

Choose one of the following: 3 Credit Hours

- HIST 330. U.S. Diplomatic History 3.00 ⁴
- POSC 370. U.S. Foreign Policy 3.00 ⁴

Total: 32 Credit Hours

Footnotes

¹ Students should complete these core economics requirements before enrolling in upper-level economics courses. Students double-majoring in economics and international affairs may substitute ECON 370 for ECON 270 to meet their core requirement.

² Students should note that MATH 220 is a prerequisite for INTA 295. If taken in the summer from an INTA faculty member, POSC 295 will count as INTA 295.

³ This course fulfills the College of Arts and Letters writing-intensive requirement for the major. Prerequisites: Completion of all courses in the core requirement of the major and senior standing.

⁴ Students must be proficient at the third-year level of a foreign language. In most languages this will require the completion of courses numbered 300 and 320. Some languages may not use this course numbering. In this instance, students must take two 300-level courses that focus on grammar, oral and written communication. The second 300-level course may not be a literature, cinema or civilization course. Some languages cannot be completed through the 300 level at JMU. Students studying these languages may have to complete course work during the summer or abroad at a specialized language program. Students should consult with the Foreign Languages, Literatures and Cultures, Department of on this point. Each student's foreign language must be appropriate for their track. French is acceptable for the Africa and Middle East tracks.

Comparative Study Concentration

The following international/cross-area courses and area courses are required in addition to the core courses listed under Major Requirements. Students in the comparative study concentration must complete the requirements for all three areas. Students may use three credits of INTA 301W for international/cross-area or area credit. INTA 301W will always count as a political science course. The precise manner in which INTA 301W will count toward the major will be determined in consultation between students wishing to take INTA 301W and the international affairs coordinator.

International and Cross-Area Courses

Each course must come from a different field of study. The potential fields are listed below.

Complete two courses: 6 Credit Hours

No course taken for this requirement may be used to fulfill a requirement elsewhere in the major.

Cross-Cultural

- ANTH 195. Cultural Anthropology [C4GE] 3.00 (C, R)
- SCOM 248. Intercultural Communication 3.00
- SOCI 336. Race and Ethnicity 3.00

- SOCI 348. Introduction to Developing Societies 3.00
- or
- SOWK 348. Introduction to Developing Societies 3.00

Economics

Students double-majoring in economics and international affairs may count ECON 372. International Finance and Payments as an international and cross-area course, in the economics box.

- ECON 312. Comparative Economic Systems 3.00
- ECON 365. Economic Development 3.00

Geography

- GEOG 280. Human Geography: The Cultural Landscape 3.00
- GEOG 300. Population Geography 3.00
- GEOG 325. Environmental Ethics 3.00
- GEOG 344. Globalization and Development 3.00
- GEOG 345. Geography of Poverty 3.00
- GEOG 375. Political Geography 3.00
- GEOG 380. Cultural Geography 3.00

History

- HIST 330. U.S. Diplomatic History 3.00
- HIST 469. A History of International Development in the Twentieth Century 3.00

Humanities

- HUM 252. Global Cultures [C2HQC] 3.00 (When topic is Gandhi, Nonviolence and Global Transformation)

Political Science

- POSC 340. Politics of Development 3.00
- POSC 347. Comparative Public Policy 3.00
- POSC 348. The Politics of Cultural Pluralism 3.00
- POSC 361. Topics in International Relations 3.00 ¹
- POSC 370. U.S. Foreign Policy 3.00
- POSC 371. Topics in Comparative Politics 3.00 ¹

- POSC 392. Peace Studies 3.00
or
- JUST 392. Peace Studies 3.00

- POSC 395. International Law 3.00
- POSC 396. International Organizations 3.00
- POSC 397. The Politics of International Economic Relations 3.00
- POSC 398. Simulations 3.00 ¹
- POSC 430. International Security and Conflict Management 3.00
- POSC 458. International Political Analysis 3.00

Footnote

When course topic is appropriate for the chosen concentration. Students should consult with the INTA coordinator about the suitability of a particular course.

Area Requirements

Students may choose from five tracks to fulfill the area requirement: Africa, Asia, Europe, Latin America or the Middle East. Students must complete four courses for their specific area. These courses must come from at least three fields of study. The potential fields are listed below. At least one of these courses must be a history course. Students with advanced language skills may also enroll in a 400-level literature course to meet the culture requirement. The following lists the potential courses for each of these areas.

Africa Track

These courses must come from at least three fields of study. The potential fields are listed below.

Complete four courses: 12 Credit Hours

No course taken for this requirement may be used to fulfill a requirement elsewhere in the major.

Africana Studies

- AAAD 400. Advanced Topics in African, African American and Diaspora Studies 3.00 ¹

Culture

- ANTH 280. Peoples and Cultures of Sub-Saharan Africa 3.00 (C)
- ANTH 391. Study Abroad 1.00 - 6.00 (May be A, B, C, F) (in Kenya only; East Africa Field School)
- ANTH 395. Special Topics in Anthropology 3.00 (May be A, B, or C) ¹
- ARTH 210. African Art & Culture in the Humanities 3.00
- ARTH 312. African Art: Sub-Saharan 3.00
- ARTH 419. Topics in African Art 3.00
- ARTH 424. Arts of Ancient Egypt 3.00
- ENG 377. Introduction to African Literature 3.00
- ENG 432. Advanced Studies in African Literature 3.00
- REL 300. Selected Topics in Religion 3.00 ¹
- REL 305. Islamic Religious Tradition 3.00
- REL 330. Religions of Africa and the African Diaspora 3.00

- SOCI 348. Introduction to Developing Societies 3.00
or
- SOWK 348. Introduction to Developing Societies 3.00

Economics

- ECON 365. Economic Development 3.00

Geography

- GEOG 335. Geography of Africa 3.00 ²

History

- HIST 263. Africa 3.00
- HIST 341. Selected Themes in World History 3.00 ¹
- HIST 361**. Class and Ethnicity in Africa 3.00
- HIST 436**. Afro-Latin America 3.00
- ANTH 436. Afro-Latin America 3.00 (C)
- HIST 470. Modern Africa 3.00
- HIST 489. Selected Topics in World History 3.00 ¹

Political Science

- POSC 353. African Politics 3.00
- POSC 371. Topics in Comparative Politics 3.00 ¹

Footnotes

¹ May be taken only when the subject matter is appropriate for this geographic concentration. Students should consult with the INTA coordinator about the suitability of a particular course.

² This course is found in the university catalog but is taught very infrequently. As such student should not count on this course being available in a timely fashion.

Asia Track

These courses must come from at least three fields of study. The potential fields are listed below.

Complete four courses: 12 Credit Hours

No course taken for this requirement may be used to fulfill a requirement elsewhere in the major.

Culture

- ANTH 295. People and Cultures of East Asia 3.00 (C)
- ANTH 395. Special Topics in Anthropology 3.00 (May be A,B, or C) ¹
- ARTH 430. Far Eastern Art 3.00
- ENG 378. Studies in South Asian Literature 3.00
- REL 300. Selected Topics in Religion 3.00 ¹
- REL 310. (Re)thinking Order and Chaos: An Introduction to Hinduism 3.00
- REL 410. Dharma/Adharma: Hindu Ethical Reasoning 3.00

Geography

Footnote

¹ May be taken only when the subject matter is appropriate for this geographic concentration. Students should consult with the INTA coordinator about the suitability of a particular course.

Internships

A maximum of three credits in the major may be earned through an internship. Students must consult with the international affairs coordinator PRIOR to doing an internship to check on its applicability to the major.

Study Abroad and Washington Semester

Many of the courses available to students through JMU's Office of International Programs and the Washington Semester program can be used to fulfill requirements in the INTA major. Students planning to go abroad should keep this in mind in working out their schedules and must consult the INTA coordinator for course approvals and substitutions.

If you have questions about the Washington Semester, review the program website (<http://www.jmu.edu/polisci/washington.shtml>) and contact the program director, Dr. David Jones.

International Affairs, Foreign Policy and Global Governance Concentration, B.A.

Major and Degree Requirements

International affairs is a 50-credit hour major, with a 32-credit common core and 18 credits of concentration study. For further information and a complete list of the distribution requirements and eligible courses, contact the coordinator.

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Foreign Language classes (intermediate level required) *0-14 Credit Hours*²
- Philosophy course (in addition to General Education courses) *3 Credit Hours*³
- University electives *12-26 Credit Hours*
- Major requirements (listed below) *50 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² The foreign language requirement may be satisfied by successful completion of the second semester of the intermediate level of the student's chosen language (typically 232), or by placing out of that language through the Department of Foreign Languages, Literatures and Cultures' placement test. The international affairs major requires an additional year of language study. That is, students must have three years of a foreign language appropriate to their course of study in the major. Students majoring in international affairs who use proficiency in a native language to meet the INTA language requirement must make the following substitutions for the two 300-level foreign language courses: AMST 200 and one of the following courses: HIST 225, ENG 247 or ENG 248. Such students who have a diploma from a U.S. high school may take six credits of any foreign language, at any level, instead of the above two courses. These courses must focus on grammar, oral and written communication; they cannot be literature, cinema or civilization courses.

³ If students have taken a PHIL course to meet their General Education requirements, they must take an additional course to meet the B.A. degree philosophy requirement. PHIL 120 and PHIL 150 cannot be used to fulfill the B.A. philosophy requirement.

Major Requirements

Students may choose one of four concentrations: comparative study; foreign policy and global governance; global human development; or international security and conflict. The international affairs major requires that all students complete a common core. Students should be aware that it is not always possible to offer courses on their regular rotation and that new courses may be added and existing ones deleted. Therefore, key requirements should not be left until just before graduation. Any course substitutions must be approved by the international affairs coordinator in consultation with other faculty members.

Core Courses

- ECON 201. Introduction to Microeconomics 3.00
- ECON 270. International Economics 3.00 ¹
- ECON 200. Introduction to Macroeconomics [C4GE] 3.00
- INTA 295. CrossNational Research Skills 4.00 ²
- INTA 489. Senior Seminar in International Affairs 3.00-4.00 ³
- POSC 230. International Relations 3.00
- POSC 240. Comparative Politics 3.00
- FL 300. Grammar and Communication 3.00 ⁴
- FL 320. Oral and Written Communication 3.00 ⁴

Choose one of the following: 3 Credit Hours

- HIST 330. U.S. Diplomatic History 3.00 ⁴
- POSC 370. U.S. Foreign Policy 3.00 ⁴

Total: 32 Credit Hours

Footnotes

¹ Students should complete these core economics requirements before enrolling in upper-level economics courses. Students double-majoring in economics and international affairs may substitute ECON 370 for ECON 270 to meet their core requirement.

² Students should note that MATH 220 is a prerequisite for INTA 295. If taken in the summer from an INTA faculty member, POSC 295 will count as INTA 295.

³ This course fulfills the College of Arts and Letters writing-intensive requirement for the major. Prerequisites: Completion of all courses in the core requirement of the major and senior standing.

⁴ Students must be proficient at the third-year level of a foreign language. In most languages this will require the completion of courses numbered 300 and 320. Some languages may not use this course numbering. In this instance, students must take two 300-level courses that focus on grammar, oral and written communication. The second 300-level course may not be a literature, cinema or civilization course. Some languages cannot be completed through the 300 level at JMU. Students studying these languages may have to complete course work during the summer or abroad at a specialized language program. Students should consult with the Foreign Languages, Literatures and Cultures, Department of on this point. Each student's foreign language must be appropriate for their track. French is acceptable for the Africa and Middle East tracks.

I. Political Dynamics of Foreign Policy and Global Governance: 3 Credit Hours

Choose one of the following:

- POSC 395. International Law 3.00

- POSC 396. International Organizations *3.00*
- POSC 397. The Politics of International Economic Relations *3.00*
- POSC 440. Post-Conflict Societies *3.00*

Religion

- HUM 252. Global Cultures [C2HQC] *3.00* (When topic is Gandhi, Nonviolence and Global Transformation)

Internships

A maximum of three credits in the major may be earned through an internship. Students must consult with the international affairs coordinator PRIOR to doing an internship to check on its applicability to the major.

Study Abroad and Washington Semester

Many of the courses available to students through JMU's Office of International Programs and the Washington Semester program can be used to fulfill requirements in the INTA major. Students planning to go abroad should keep this in mind in working out their schedules and must consult the INTA coordinator for course approvals and substitutions.

If you have questions about the Washington Semester, review the program website (<http://www.jmu.edu/polisci/washington.shtml>) and contact the program director, Dr. David Jones.

International Affairs, International Conflict and Security Concentration, B.A.

Major and Degree Requirements

International affairs is a 50-credit hour major, with a 32-credit common core and 18 credits of concentration study. For further information and a complete list of the distribution requirements and eligible courses, contact the coordinator.

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Foreign Language classes (intermediate level required) *0-14 Credit Hours*²
- Philosophy course (in addition to General Education courses) *3 Credit Hours*³
- University electives *12-26 Credit Hours*
- Major requirements (listed below) *50 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² The foreign language requirement may be satisfied by successful completion of the second semester of the intermediate level of the student's chosen language (typically 232), or by placing out of that language through the Department of Foreign Languages, Literatures and Cultures' placement test. The international affairs major requires an additional year of language study. That is, students must have three years of a foreign language appropriate to their course of study in the major. Students majoring in international affairs who use proficiency in a native language to meet the INTA language requirement must make the following substitutions for the two 300-level foreign language courses: AMST 200 and one of the following courses: HIST 225, ENG 247 or ENG 248. Such students who have a diploma from a U.S. high school may take six credits of any foreign language, at any level, instead of the above two courses. These courses must focus on grammar, oral and written communication; they cannot be literature, cinema or civilization courses.

³ If students have taken a PHIL course to meet their General Education requirements, they must take an additional course to meet the B.A. degree philosophy requirement. PHIL 120 and PHIL 150 cannot be used to fulfill the B.A. philosophy requirement.

Major Requirements

Students may choose one of four concentrations: comparative study; foreign policy and global governance; global human development; or international security and conflict. The international affairs major requires that all students complete a common core. Students should be aware that it is not always possible to offer courses on their regular rotation and that new courses may be added and existing ones deleted. Therefore, key requirements should not be left until just before graduation. Any course substitutions must be approved by the international affairs coordinator in consultation with other faculty members.

Core Courses

- ECON 201. Introduction to Microeconomics 3.00
- ECON 270. International Economics 3.00 ¹
- ECON 200. Introduction to Macroeconomics [C4GE] 3.00
- INTA 295. CrossNational Research Skills 4.00 ²
- INTA 489. Senior Seminar in International Affairs 3.00-4.00 ³
- POSC 230. International Relations 3.00
- POSC 240. Comparative Politics 3.00
- FL 300. Grammar and Communication 3.00 ⁴
- FL 320. Oral and Written Communication 3.00 ⁴

Choose one of the following: 3 Credit Hours

- HIST 330. U.S. Diplomatic History 3.00 ⁴
- POSC 370. U.S. Foreign Policy 3.00 ⁴

Total: 32 Credit Hours

Footnotes

¹ Students should complete these core economics requirements before enrolling in upper-level economics courses. Students double-majoring in economics and international affairs may substitute ECON 370 for ECON 270 to meet their core requirement.

² Students should note that MATH 220 is a prerequisite for INTA 295. If taken in the summer from an INTA faculty member, POSC 295 will count as INTA 295.

³ This course fulfills the College of Arts and Letters writing-intensive requirement for the major. Prerequisites: Completion of all courses in the core requirement of the major and senior standing.

⁴ Students must be proficient at the third-year level of a foreign language. In most languages this will require the completion of

courses numbered 300 and 320. Some languages may not use this course numbering. In this instance, students must take two 300-level courses that focus on grammar, oral and written communication. The second 300-level course may not be a literature, cinema or civilization course. Some languages cannot be completed through the 300 level at JMU. Students studying these languages may have to complete course work during the summer or abroad at a specialized language program. Students should consult with the Foreign Languages, Literatures and Cultures, Department of on this point. Each student's foreign language must be appropriate for their track. French is acceptable for the Africa and Middle East tracks.

I. Political Dynamics of International Conflict and Security: 3 Credit Hours

Choose one course from the following:

- POSC 394. International Conflict *3.00*
- POSC 430. International Security and Conflict Management *3.00*

- POSC 372. Ethics and International Politics *3.00*
or
- JUST 372. Ethics and International Politics *3.00*

II. Historical Patterns: 3 Credit Hours

Choose one course from the following:

Africa

- HIST 263. Africa *3.00*
- HIST 361**. Class and Ethnicity in Africa *3.00*
- HIST 470. Modern Africa *3.00*

Asia

- HIST 274. Modern East Asia *3.00*
- HIST 371**. India *3.00*
- HIST 377**. History of Korea *3.00*
- HIST 378**. China in the Modern World *3.00*

Europe

- HIST 202. Europe Since 1815 *3.00*
- HIST 301*. European Military History *3.00*
- HIST 309*. French History Since 1648 *3.00*
- HIST 321*. European Women's History *3.00*
- HIST 384*. England and the Empire-Commonwealth *3.00*
- HIST 386*. Russia and the Soviet Union from 1881 to 1991 *3.00*
- HIST 475. Modern Russia *3.00*
- HIST 478. Eastern Europe *3.00*
- HIST 486. Europe Since 1914 *3.00*

Latin America

- HUM 252. Global Cultures [C2HQC] 3.00 (When topic is Latin American Cultures)
- ANTH 436. Afro-Latin America 3.00 (C)
or
- HIST 436**. Afro-Latin America 3.00
- HIST 444**. Revolution and Social Change in Latin America 3.00
- HIST 445**. A Cultural History of Latin America, the Caribbean, and the United States 3.00
- HIST 447**. South America 3.00
- HIST 448**. Gender in Latin America and the Iberian World 3.00

The Middle East

- HIST 270. Modern Middle East 3.00
- HIST 373. History of the Ottoman Empire, 1453-1922 3.00
- HIST 473. Early Modern Islamic Empires 3.00
- HIST 485. Colonialism in the Middle East and South Asia 3.00

III. Regional and Cross Regional Sociopolitical Dynamics: 3 Credit Hours

Choose one course from the following:

- ANTH 195. Cultural Anthropology [C4GE] 3.00 (C, R)
- ECON 312. Comparative Economic Systems 3.00
- GEOG 280. Human Geography: The Cultural Landscape 3.00
- GEOG 380. Cultural Geography 3.00
- POSC 200. Global Politics [C4GE] 3.00
- POSC 340. Politics of Development 3.00
- POSC 344. Politics of the European Union 3.00
- POSC 345. Politics of Western Europe 3.00
- POSC 346. Politics of Central and Eastern Europe 3.00
- POSC 350. Latin American Politics 3.00
- POSC 354. Politics of the Middle East 3.00
- POSC 355. East Asian Politics 3.00
- POSC 356. Politics of China 3.00
- POSC 371. Topics in Comparative Politics 3.00
- SOCI 348. Introduction to Developing Societies 3.00
or
- SOWK 348. Introduction to Developing Societies 3.00

IV. Depth Component: 9 Credit Hours

Choose three courses from the following, from at least two disciplines. At least one course must be in a discipline other than history or political science.

Economics

- ECON 327. Game Theory 3.00

Communication

- SCOM 331. Communication and Conflict *3.00*
- SCOM 332. Mediation *3.00*
- SCOM 334. Alternative Dispute Resolution *3.00*
- SCOM 248. Intercultural Communication *3.00*

Culture

- ANTH 366. Anthropology of War *3.00 (A, C)*

History

- HIST 300. U.S. Military History *3.00*
- HIST 301*. European Military History *3.00*

Justice Studies

- JUST 322. Understanding Violence and Nonviolence *3.00*
- JUST 331. Human Rights in Theory and Practice *3.00*
or
- POSC 331. Human Rights in Theory and Practice *3.00*
- JUST 372. Ethics and International Politics *3.00*
or
- POSC 372. Ethics and International Politics *3.00*
- JUST 373. Rebuilding Post Conflict Societies *3.00*
- JUST 374. War and Justice *3.00*
- JUST 375. Genocide in the 20th Century *3.00*
- JUST 392. Peace Studies *3.00*
or
- POSC 392. Peace Studies *3.00*

Political Science

- POSC 361. Topics in International Relations *3.00*
- POSC 371. Topics in Comparative Politics *3.00*
- POSC 393. Human Security *3.00*
- POSC 394. International Conflict *3.00*
- POSC 395. International Law *3.00*
- POSC 396. International Organizations *3.00*
- POSC 398. Simulations *3.00*
- POSC 430. International Security and Conflict Management *3.00*
- POSC 435. International Terrorism *3.00*
- POSC 440. Post-Conflict Societies *3.00*

- POSC 458. International Political Analysis 3.00

Religion

- REL 363. Apocalypticism, Religious Terrorism and Peace 3.00

Internships

A maximum of three credits in the major may be earned through an internship. Students must consult with the international affairs coordinator PRIOR to doing an internship to check on its applicability to the major.

Study Abroad and Washington Semester

Many of the courses available to students through JMU's Office of International Programs and the Washington Semester program can be used to fulfill requirements in the INTA major. Students planning to go abroad should keep this in mind in working out their schedules and must consult the INTA coordinator for course approvals and substitutions.

Assistant Professors

P. Mutreja

Lecturers

P. Heap, D. Parker, D. Zisk

Mission

The mission of the Program of International Business is to provide nationally competitive undergraduate education in the study of international business. The program is cross disciplinary and designed to prepare students for participation in organizations that require a broad business perspective, applicable skills in global business and an understanding of the complexity of the globalized world. The program also prepares students for graduate programs in business and related fields.

Goals

- To provide a strong foundation in the international implications for the business disciplines.
- To develop students' cultural understanding through course work and a required semester abroad.
- To enable students to gain proficiency in a second language.
- To enable students to develop extensive knowledge of a specific region of the world related to the second language.
- To develop students' competencies in addressing specific managerial issues related to international business, such as ethical considerations, managing foreign exchange risk, managing a multicultural work force, etc.
- To facilitate students' continuing development of written and oral communication skills.

Career Opportunities

- Consumer marketing and business-to-business marketing, including sales, consumer relations and market analysis.
- Consulting, including management analysis, strategic planning, expansion overseas and market entry strategies.
- Marketing research, including database management and account analysis.
- Corporate finance, financial analyst, project management, junior analyst-finance, planning and administration.
- Capital management, credit manager, assistant treasurer – funds flow and risk management.
- Banking and financial institutions, lending officer and marketing officer.
- Foreign commercial service officer in the U.S. Department of Commerce.
- Careers that require analytic acumen and the ability to adapt quickly to diverse and changing environments.

Co-curricular Activities and Organizations

Global Commerce Club. This student club is open to all JMU students. It sponsors speakers, informational sessions and social events.

Epsilon Chi Omicron. This organization, founded in 1987 at JMU, is the international honor society for international business. The purpose of the organization is to encourage and recognize scholarly achievement. Membership requires an outstanding academic record while at JMU.

American Marketing Association. This student club is affiliated with the American Marketing Association, a national marketing association for marketing professionals, faculty and students. MMA is open to all JMU students. MMA is comprehensive with its marketing programming and offers students information and activities in direct marketing, retailing and marketing management.

Pi Sigma Epsilon. This is a professional fraternity, which focuses on programming and extracurricular experiences in marketing, personal selling and sales management.

Financial Management Association. FMA is an organization designed for those interested in pursuing a career in the financial arena.

International Business, B.B.A.

Degree and Major Requirements

The B.B.A. degree in international business requires a minimum of 120 credit hours of undergraduate work.

The credit hour requirements are as follows:

Degree Requirements

International Business Required Courses

- General Education courses *41 Credit Hours*^{1,2}
- B.B.A. core courses *45 Credit Hours*
- International business major requirements *24 Credit Hours*³
- Nonbusiness major requirements *12 Credit Hours*

Total: 122 Credit Hours

Footnotes

¹ Students are encouraged to choose general education courses having a foreign or international content. The program office has a list of these courses. The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² Some language and general education courses may be completed during the semester abroad.

³ Students are required to spend the equivalent of a semester abroad. See below for details.

Additional Information

Students planning to major in international business must complete the 27 to 28 hour, lower-level B.B.A. curriculum prior to enrolling in upper-level core courses, normally taken in the first semester of the junior year. It is expected that the lower-level core curriculum along with most of the university general education curriculum will be completed during the first two years of study. Failing to complete all lower-level core requirements on time will delay enrollment in upper-level core and major courses until at least the second semester of the junior year.

The foreign language requirements of the major begin at the advanced level. Consequently, students with little or no foreign language training must use elective credits to obtain proficiency through the intermediate level.

Major Requirements

Students majoring in international business must carefully plan their individual course work because not all required courses are offered each semester and because each student in the major is required to study or work abroad. The study/work abroad requirement is for a minimum of six weeks outside of the United States, unless express permission is granted by the program director for another option. The primary language spoken in the country chosen by each student for the study/work abroad requirement is not to be English and must be the language chosen by the student to meet the IB language requirement. Approval of the study/work abroad requirement must be obtained from the program director (approval forms are available online). International students should see the program director to determine appropriate requirements for this aspect of the curriculum.

International business majors must select a world region on which to concentrate that coincides with their selected language. For example, an international business major who selects French as his/her second language could choose Europe, Africa or Asia as a world region. Also, a student who selects Spanish as the second language could select either Europe or the Americas. The acceptable world regions are Africa/Middle East, Americas, Asia and Europe.

As part of the JMU assessment program, graduating seniors are required to participate in assessment activities. Assessment information is used to assist the COB faculty in modifying curricula and co-curricular events.

Required Courses

- BLAW 497. Legal Aspects of International Business 3.00 ¹
- IB 200. Introduction to International Business 3.00
- IB 480. International Business Theory and Policy 3.00 ²
- MGT 340. International Management 3.00
- Foreign language 300. Grammar and Communication
- Foreign language 307-308. Civilization
- Foreign language 330. Business
- Foreign language 375. Business and Society ³

Footnotes

¹ Offered fall semester only.

² Offered spring semester only.

³ Students choosing Spanish to meet the IB language requirement should take either SPAN 485 or SPAN 486 to fulfill this requirement.

The remaining courses will depend upon which of the following three concentrations the student selects:

- General
- Marketing
- Finance

The requirements for each of the three concentrations are outlined above.

B.B.A. Core Component

B.B.A. Lower-Level Core Component

B.B.A. majors must complete all of the B.B.A. core components as part of their degree program. The following courses comprise the B.B.A. Lower-Level Core Component:

- COB 191. Business Analytics I 3.00 ¹
- COB 202. Interpersonal Skills 3.00
- COB 204. Computer Information Systems 3.00
- COB 241. Financial Accounting 3.00
- COB 242. Managerial Accounting 3.00 ^{4,5}
- COB 291. Business Analytics II 3.00 ²
- ECON 200. Introduction to Macroeconomics [C4GE] 3.00
- ECON 201. Introduction to Microeconomics 3.00

- MATH 205. Introductory Calculus I [C3QR] 3.00 ³
or
- MATH 235. Calculus I [C3QR] 4.00 ³

B.B.A. Upper-Level Core Component

The following courses comprise the B.B.A. Upper-Level Core Component:

- COB 300A. Integrative Business: Management 3.00^{5,6}
- COB 300B. Integrative Business: Finance 3.00^{5,6}
- COB 300C. Integrative Business: Operations 3.00^{5,6}
- COB 300D. Integrative Business: Marketing 3.00^{5,6}
- COB 318. Legal and Ethical Environment of Business 3.00⁷
- COB 487. Strategic Management 3.00⁸

Footnotes

¹ MATH 220 may be substituted for COB 191.

² COB 191 or equivalent and MATH 205 or equivalent are prerequisites for COB 291.

³ Calculus is required but not used in calculating the B.B.A. core GPA. MATH 235 is preferred for Finance majors.

⁴ COB 241 must be taken before COB 242.

⁵ COB 242 is a prerequisite for COB 300 but is not used in calculating the B.B.A. core GPA.

⁶ All four COB 300 courses must be taken during the same semester.

⁷ COB 300 is a prerequisite or corequisite for COB 318. COB 318 is a prerequisite for COB 487.

⁸ COB 487 must be taken during the senior year.

Recommended Schedule for Majors, International Business

Third Year

- COB 300A. Integrative Business: Management 3.00
- COB 300B. Integrative Business: Finance 3.00
- COB 300C. Integrative Business: Operations 3.00
- COB 300D. Integrative Business: Marketing 3.00
- COB 318. Legal and Ethical Environment of Business 3.00
- ECON 270. International Economics 3.00²
- General Education courses 6.00
- Foreign language (300) grammar and communication 3.00¹
- Foreign language (307-308) civilization course 3.00¹

Total: 30 Credit Hours

Footnotes

¹ International business major requirement.

² International business major requirement. Students with a finance concentration must take ECON 370 in place of ECON 270. ECON 370 is offered fall semester only.

International Business, Finance Concentration, B.B.A.

Concentration Requirements

Mission

Justice studies is committed to offering an cross disciplinary, intellectually challenging and vocationally relevant course of study for persons interested in academic or applied careers in justice studies at the community, national or global level.

Goals

To carry out this mission, justice studies seeks to:

- Help students develop a comprehensive understanding of justice studies.
- Examine and explain justice and injustice and their impact on individuals, communities, institutions and/or nations.
- Understand human behavior and interactive systems with a focus on negotiation and conflict resolution in justice contexts.
- Sharpen students' ability to think and reason critically, to practice sound methodological skills and to communicate effectively.
- Prepare students to utilize and produce scholarship in the field of justice studies.

Career Opportunities

The justice studies major includes opportunities for field work and career-related internships as part of the curriculum.

- Peace Corps
- Non-government organizations
- Law enforcement
- Corrections
- Law
- Nonprofit groups (national and international)
- Human services
- Domestic and international security
- Intelligence analysis
- Diplomatic Corps
- Research and graduate study

Transfer Credit

A maximum of three courses may be transferred into the justice studies major from other institutions. No transfer credit will be given for any course offered in the major at the 300 or 400 level.

Justice Studies, Criminal Justice and Criminology Track, B.A.

Degree Requirements

Required Courses

- General Education *41 Credit Hours*
- Philosophy course *3 Credit Hours*¹
- Foreign language courses (intermediate level required) *1-14 Credit Hours*
- Major requirements (core courses and selected tracks) *41 Credit Hours*
- Electives *18-38 Credit Hours*

Total: 120 Credit Hours

Footnote

¹ Any PHIL course except PHIL 120 or PHIL 150. Consult the list of courses satisfying Bachelor of Arts degree requirements on the Registrar's website.

- JUST 323. Comparative Criminal Justice *3.00*
- JUST 328. Race, Class and Justice *3.00*

Choose one of the following (which is not required for your track): 3 Credit Hours

- JUST 210. Crime and Criminal Justice *3.00*
- JUST 212. Theories of Crime and Criminal Justice *3.00*
- JUST 221. Social Justice Theories *3.00*
- JUST 223. Social Justice Interventions and Policies *3.00*
- JUST 235. Justice in the Global Community *3.00*
- JUST 237. Dilemmas in Global Justice *3.00*

Total: 17 Credit Hours

Students must select one of the following tracks:

- Track A. Criminal Justice and Criminology
- Track B. Global Justice and Policy
- Track C. Social Justice Engagement

Justice Studies Track A. Criminal Justice and Criminology

This track focuses on the nature, causes and solutions for crime, primarily but not exclusively in the United States. All students in Track A must take JUST 210. Crime and Criminal Justice, and JUST 212. Theories of Crime and Criminal Justice. Students select six additional courses from the following. At least four of the six electives must have a JUST identifier.

Courses

Note: Other courses may be substituted with adviser's and department chair's consent.

Select six additional courses from the following:

- JUST 301. Advanced Level Special Topics in Justice Studies 3.00 (when topic is appropriate) ¹
- JUST 307. Justice and Crime 3.00
- JUST 309. Global Crime 3.00
- JUST 311. Women, Crime and Criminal Justice 3.00

- JUST 316. Human Development and Crime 3.00
or
- PSYC 316. Human Development and Crime 3.00

- JUST 317. Victimization of Children 3.00
- JUST 318. Sex Offenders 3.00
- JUST 320. Organized Crime 3.00
- JUST 322. Understanding Violence and Nonviolence 3.00
- JUST 324. Death Penalty 3.00
- JUST 327. Criminal Law 3.00
- JUST 329. Perspectives On Law 3.00

- JUST 330. Corrections 3.00
or
- SOWK 330. Corrections 3.00

- JUST 334. Media and Justice 3.00
- JUST 339. Mapping Justice 3.00
- JUST 341. Gender and Justice 3.00

- Scientific literacy requirement (in addition to General Education) *3-4 Credit Hours*
- Major requirements (core courses and selected track) *41 Credit Hours*
- Electives *28-35 Credit Hours*

Total: 120 Credit Hours

Justice Studies Major Requirements

Core Courses

- JUST 100. Justice Studies Proseminar *1.00*
- JUST 200. Introduction to Justice Studies *3.00*
- JUST 399. Justice Research Methods *4.00*
- JUST 400. Senior Seminar in Justice Studies *3.00*

Choose one of the following: 3 Credit Hours

- JUST 300. Perspectives On Comparative Justice *3.00*
- JUST 323. Comparative Criminal Justice *3.00*
- JUST 328. Race, Class and Justice *3.00*

Choose one of the following (which is not required for your track): 3 Credit Hours

- JUST 210. Crime and Criminal Justice *3.00*
- JUST 212. Theories of Crime and Criminal Justice *3.00*
- JUST 221. Social Justice Theories *3.00*
- JUST 223. Social Justice Interventions and Policies *3.00*
- JUST 235. Justice in the Global Community *3.00*
- JUST 237. Dilemmas in Global Justice *3.00*

Total: 17 Credit Hours

Students must select one of the following tracks:

- Track A. Criminal Justice and Criminology
- Track B. Global Justice and Policy
- Track C. Social Justice Engagement

Track C. Social Justice

This track is designed to investigate what is fair, equitable and just for society. Emphasizing the oppression and liberation of vulnerable, exploited and marginalized populations, this curriculum promotes sustainable and just solutions to social, political and economic problems.

Students in Track C must take JUST 221. Social Justice Theories, and JUST 223. Social Justice Interventions and Policies.

Students select six additional courses from the following. At least four of the six electives must have a JUST identifier.

Courses

Note: Other courses may be substituted with adviser's and department chair's consent.

Choose from the following:

- HIST 338. U.S. Urban History 3.00
- or
- SOCI 338. U.S. Urban History 3.00

- JUST 301. Advanced Level Special Topics in Justice Studies 3.00¹
- JUST 309. Global Crime 3.00
- JUST 311. Women, Crime and Criminal Justice 3.00
- JUST 322. Understanding Violence and Nonviolence 3.00
- JUST 324. Death Penalty 3.00
- JUST 334. Media and Justice 3.00¹
- JUST 339. Mapping Justice 3.00
- JUST 341. Gender and Justice 3.00
- JUST 343. Justice and Society 3.00
- JUST 352. Global Migration 3.00
- JUST 354. Native Justice and Resistance 3.00
- JUST 355. Solutions to Global Poverty 3.00
- JUST 356. Refugees and Humanitarian Response 3.00
- JUST 357. Environmental Justice 3.00
- JUST 361. Terrorism 3.00
- JUST 365. Justice in Literature, Film and Art 3.00
- JUST 375. Genocide in the 20th Century 3.00
- JUST 376. Global Social Movements 3.00
- JUST 385. Disability and Justice 3.00
- JUST 386. Sexual Orientation and Social Policy 3.00

- JUST 392. Peace Studies 3.00
- or
- POSC 392. Peace Studies 3.00

- JUST 401. Internship in Justice Studies 4.00¹
- JUST 402. Advanced Research in Justice Studies 3.00¹
- JUST 403. Nelson Institute Seminar 3.00¹
- JUST 404. Practicum in Community-Based Research 3.00¹
- JUST 405. Research Assistantship in Justice Studies 1.00-3.00
- MSCI 390. The Combat Experience 3.00
- POSC 326. Civil Rights 3.00
- POSC 348. The Politics of Cultural Pluralism 3.00
- POSC 383. Women and Politics in Comparative Perspective 3.00
- PSYC 310. The Psychology of Women and Gender 3.00²
- PSYC 320. Diversity Issues in Psychology 3.00

- REL 322. Sociology of Religion 3.00
- or
- SOCI 322. Sociology of Religion 3.00

- REL 450. Religion and Society 3.00
- SOCI 336. Race and Ethnicity 3.00
- SOCI 354. Social Inequality 3.00
- SOCI 367. Sociology of Sexuality 3.00

Total: 18 Credit Hours

Footnotes

¹ May be taken for elective credit in Track C when the topic is appropriate. Students should seek approval from their advisers or the department head.

² Course is only open to students who are double majoring in psychology.

Recommended Schedule for Majors

First Year

- JUST 200. Introduction to Justice Studies 3.00
- MATH 220. Elementary Statistics [C3QR] 3.00 (prerequisite for JUST 399) ¹
- Track core course 3 *Credit Hours*

Total: 9 Credit Hours

Second Year

- Track foundation course 3 *Credit Hours*
- Outside track foundation course 3 *Credit Hours*
- Track electives 6 *Credit Hours*

Total: 12 Credit Hours

Third Year

- JUST 100. Justice Studies Proseminar 1.00
- JUST 300. Perspectives On Comparative Justice 3.00
- JUST 399. Justice Research Methods 4.00
- Track electives 9 *Credit Hours*

Total: 17 Credit Hours

Fourth Year

- JUST 400. Senior Seminar in Justice Studies 3.00
- Track electives 3 *Credit Hours*

Total: 6 Credit Hours

Footnote

¹ Can be counted for General Education, Cluster Three.

Kinesiology, Department of

Dr. Janet Wigglesworth, **Department Head**

Phone: (540) 568-6145

Email: wigglejk@jmu.edu

Location: Godwin Hall, Room 213

Website: <http://www.jmu.edu/kinesiology>

Professors

S. Nye, M. Saunders, D. Wenos, J. Wigglesworth, J. Williams, C. Womack

Associate Professors

E. Edwards, T. Hargens, N. Luden, T. Moran, S. Carson Sackett

Assistant Professors

L. Gano-Overway, S. Kurti, C. McKay, G. Young

Instructors

C. Duncan, R. Lifka, P. McMahan, J. Walters

Mission

The Department of Kinesiology is dedicated to the development of future leaders in professions that maximize the potential of individuals and society through physical activity. Programs include exercise science and teacher education in physical education and health.

The department is committed to providing:

- Outstanding undergraduate programs based on the criteria of relevant professional associations which will enable graduates success in their professional endeavors.
- Programs that build upon the strong liberal studies background provided through General Education.
- Opportunities that challenge students to think critically.
- Use of technological advances.
- An appreciation of the global community.
- Quality graduate programs that complement the undergraduate programs and provide qualified students with an opportunity for advanced study in the kinesiology discipline.
- Contributions to the university's General Education curriculum through programs designed to promote lifelong fitness and wellness.
- Service to JMU, the professions and local community through our unique knowledge and expertise.
- Research and development projects that push back the boundaries of knowledge and promote effective practice in the kinesiology discipline.

Career Opportunities and Marketable Skills

- Athletic coach
- Exercise specialist
- Fitness facility manager
- Physical and health education
- Pre-professional health programs (pre-physical therapy, pre-medicine, pre-physician's assistant, pre-occupational therapy)

Coaching Education Minor

Minor Requirements

This minor prepares students for the coaching profession on the high school and younger level by complying with the requirements of the National Council for Accreditation of Coaching Education at Level 3, intermediate coach. Evidence of CPR/first aid certification must be presented prior to beginning the coaching practicum. To enroll in the practicum, all of the minor courses except KIN 450 must be successfully completed (minimum of a "C") and the student's overall GPA must be 2.0. To successfully complete the minor, students must:

- Complete the American Sport Education Program (ASEP) Coaching Principles course and earn ASEP certification (part of KIN 450).
- Earn a minimum grade of a "C" in each of the six courses and a "satisfactory" on the practicum (KIN 473).

Courses

- ATEP 205. Introduction to Athletic Training *3.00*
- KIN 202. Biological Foundations of Kinesiology & Recreation *3.00*
- KIN 353. Maximizing Sports Performance *3.00*
- KIN 425. Concepts of Strength and Conditioning *3.00*
- KIN 450. Principles of Coaching *3.00*
- KIN 473. Practicum in Coaching *3.00*
- Kinesiology techniques of sport class (with coordinator approval) *2 Credit Hours*

Total: 20 Credit Hours

Kinesiology, Exercise Science Concentration, B.S.

Degree and Major Requirements

Students are advised to be certain they complete all General Education requirements before applying for graduation.

The kinesiology major program leads to the Bachelor of Science degree. Students are advised to familiarize themselves with the B.S. degree requirements.

Students who major in kinesiology work toward a B.S. degree by selecting and completing one of the following concentrations:

- Exercise Science
- Physical and Health Education Teacher Education

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Quantitative requirement (in addition to General Education) *3 Credit Hours*
- Scientific Literacy requirement (in addition to General Education) *3-4 Credit Hours*

- Kinesiology Core Courses *12 Credit Hours*
- Major and concentration requirements *60-68 Credit Hours*²
- Electives *15-23 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² The number of credits taken to meet major and concentration requirements may vary if courses are double-counted for General Education.

Kinesiology Core Courses

Required Courses

- KIN 100. Lifetime Fitness & Wellness (2,2) [C5W] 3.00
- KIN 202. Biological Foundations of Kinesiology & Recreation 3.00
- KIN 303. Motor Development & Learning 3.00
- KIN 426. Physical Activity Behaviors 3.00

Total: 12 Credit Hours

Exercise Science Concentration

The concentration prepares students to pursue careers in the fitness industry as well as graduate education in exercise science, pre-professional or an allied health field.

Students interested in physical therapy, medicine or other pre-professional health programs should review the pre-professional health programs section for prerequisite courses and recommendations for entrance to graduate professional health programs. Pre-professional health program coordinators are available to assist students with career planning and preparation.

Admission Policy

Any student can declare the exercise science concentration; however, students must apply to be fully admitted to the major for a limited number of spaces. Declaring the exercise science concentration does not guarantee full admission to the major.

To apply for admission to the exercise science concentration, students must complete the following prerequisite courses:

- BIO 270. Human Physiology (3, 2) [C3NS]
- BIO 290. Human Anatomy (3, 3)
- CHEM 131. General Chemistry I [C3PP] and CHEM 131L. General Chemistry Laboratory [C3PP]
- KIN 100. Lifetime Fitness & Wellness (2,2) [C5W]
- KIN 202. Biological Foundations of Kinesiology & Recreation

Grades in the prerequisite courses are weighed heavily in the admission decision, and admission is offered to the top students on a space-available basis. Courses taken on a repeat/forgive basis will not be accepted. Only those grades received in prerequisite courses taken for the first time will be counted.

Applications are due October 15 for the spring semester and March 15 for summer and fall semester. Students denied admission may reapply during the next admission cycle.

Concentration Requirements

The following courses are required of all students who choose the exercise science concentration.

Courses

- Kinesiology Core Courses *12 Credit Hours*
- BIO 270. Human Physiology (3, 2) [C3NS] 4.00
- BIO 290. Human Anatomy (3, 3) 4.00
- MATH 205. Introductory Calculus I [C3QR] 3.00 ¹
- MATH 220. Elementary Statistics [C3QR] 3.00
- CHEM 131. General Chemistry I [C3PP] 3.00
- CHEM 131L. General Chemistry Laboratory [C3PP] 1.00
- CHEM 132. General Chemistry II 3.00
- CHEM 132L. General Chemistry Laboratory 1.00
- PHYS 140. College Physics I [C3PP] 3.00 ¹
- PHYS 140L. General Physics Laboratory [C3PP] 1.00 ¹
- KIN 302. Exercise Physiology 3.00
- KIN 302L. Exercise Physiology Laboratory 1.00
- KIN 306. Human Biomechanics 3.00
- KIN 306L. Human Biomechanics Laboratory 1.00
- KIN 321. Principles of Health Fitness Assessment 3.00
- KIN 322. Fundamentals of Exercise Prescription 3.00
- KIN 424. Exercise and Nutrition in Chronic Disease 3.00
- KIN 426. Physical Activity Behaviors 3.00
- KIN 471. Practicum in Exercise Science and Leadership 3.00
- KIN 481. Internship in Exercise Science and Leadership 4.00 - 12.00

Total: 65-73 Credit Hours

Footnote

¹ This course may be counted for both General Education and major degree requirements.

Departmental Electives

All students who choose the exercise science concentration are required to complete a minimum of six credits from the following courses:

Courses

- KIN 305. Social/Psychological Foundations in Kinesiology 3.00
- KIN 325. Kinesiology Honors Research Prep 3.00
- KIN 329. Social Aspects of Sport 3.00
- KIN 422. Advanced Principles of Group Exercise Leadership 3.00

- KIN 425. Concepts of Strength and Conditioning *3.00*
- KIN 428. Advanced Topics in Exercise Science and Leadership *3.00*
- KIN 429. Special Topics in Adapted Physical Education *3.00*
- KIN 430. Exercise Across the Lifespan *3.00*
- KIN 431. Environmental Exercise Physiology *3.00*
- KIN 432. Physiology of Endurance Performance *3.00*
- KIN 433. Exercise, Cardiovascular Disease and ECG Assessment *3.00*
- KIN 490. Special Studies in Kinesiology and Recreation *1.00 - 3.00*

Recommended Schedule for Exercise Science Concentration

First Year

- General Education courses *21 Credit Hours*
- KIN 100. Lifetime Fitness & Wellness (2,2) [C5W] *3.00*
- MATH 205. Introductory Calculus I [C3QR] *3.00*
- MATH 220. Elementary Statistics [C3QR] *3.00*

Total: 30 Credit Hours

Sophomore Year

- BIO 270. Human Physiology (3, 2) [C3NS] *4.00*
- BIO 290. Human Anatomy (3, 3) *4.00*
- CHEM 131. General Chemistry I [C3PP] *3.00*
- CHEM 131L. General Chemistry Laboratory [C3PP] *1.00*
- CHEM 132. General Chemistry II *3.00*
- CHEM 132L. General Chemistry Laboratory *1.00*
- KIN 202. Biological Foundations of Kinesiology & Recreation *3.00*
- KIN 303. Motor Development & Learning *3.00*
- NUTR 280. Nutrition for Wellness *3.00*
- General Education *4 Credit Hours*

Total: 29 Credit Hours

Junior Year

- KIN 302. Exercise Physiology *3.00*
- KIN 302L. Exercise Physiology Laboratory *1.00*
- KIN 306. Human Biomechanics *3.00*
- KIN 306L. Human Biomechanics Laboratory *1.00*
- KIN 321. Principles of Health Fitness Assessment *3.00*
- KIN 322. Fundamentals of Exercise Prescription *3.00*
- KIN 471. Practicum in Exercise Science and Leadership *3.00*
- PHYS 140. College Physics I [C3PP] *3.00*
- PHYS 140L. General Physics Laboratory [C3PP] *1.00*
- Electives *10 Credit Hours*

Total: 30 Credit Hours

Senior Year

- Departmental electives (x2) *6 Credit Hours*
- KIN 424. Exercise and Nutrition in Chronic Disease *3.00*
- KIN 426. Physical Activity Behaviors *3.00*
- KIN 481. Internship in Exercise Science and Leadership *4.00 - 12.00*
- Electives *6-14 Credit Hours*

Total: 30 Credit Hours

Kinesiology, Physical and Health Education Teacher Education Concentration, B.S.

Degree and Major Requirements

Students are advised to be certain they complete all General Education requirements before applying for graduation.

The kinesiology major program leads to the Bachelor of Science degree. Students are advised to familiarize themselves with the B.S. degree requirements.

Students who major in kinesiology work toward a B.S. degree by selecting and completing one of the following concentrations:

- Exercise Science
- Physical and Health Education Teacher Education

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Quantitative requirement (in addition to General Education) *3 Credit Hours*
- Scientific Literacy requirement (in addition to General Education) *3-4 Credit Hours*
- Kinesiology Core Courses *12 Credit Hours*
- Major and concentration requirements *60-68 Credit Hours*²
- Electives *15-23 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² The number of credits taken to meet major and concentration requirements may vary if courses are double-counted for General Education.

Kinesiology Core Courses

Required Courses

- KIN 100. Lifetime Fitness & Wellness (2,2) [C5W] 3.00
- KIN 202. Biological Foundations of Kinesiology & Recreation 3.00
- KIN 303. Motor Development & Learning 3.00
- KIN 426. Physical Activity Behaviors 3.00

Total: 12 Credit Hours

Physical and Health Education Teacher Education Concentration

The Physical and Health Education Teacher Education (PHETE) concentration is committed to educating future leaders in the profession of teaching physical and health education. The program encourages the teacher candidate to advocate for effective educational changes, work collaboratively and collectively for social change, and to continue to grow professionally.

The PHETE concentration is a five-year Master of Arts in Teaching (M.A.T.) program. Upon successful completion of the first four years, students earn a Bachelor of Science (B.S.) degree in kinesiology. The fifth year M.A.T. degree provides the requisite courses to obtain a Virginia teaching license in Health and Physical Education (PreK-12). It is necessary to be admitted to the teacher education program prior to enrolling in professional education courses. For more information contact the PHETE coordinator, Dr. Jacqueline Williams, Godwin Hall, Room 317, (540) 568-6957, williaja@jmu.edu.

Admission Policy

The admission and retention standards are designed to instill a professional attitude and commitment to the profession of teaching. The admission and retention standards complement the JMU Teacher Education application process. The following outlines the admission and retention standards and procedures for PHETE.

PHETE Admission Standards

1. Full acceptance to the JMU Teacher Education Program
2. Submission of:
 - Work Experience Verification Form
 - Professional Resume
 - Personal Statement
3. Successful completion of the following course work: BIO 290, EDUC 300, PSYC 160*, KIN 224, KIN 303*, KIN 312*

*Grade of "C" or better required

4. Demonstration and appreciation of professional dispositions

Concentration Requirements

Undergraduate Courses

- BIO 290. Human Anatomy (3, 3) 4.00

- EDUC 300. Foundations of American Education 3.00
- PSYC 160. Life Span Human Development [C5SD] 3.00
- KIN 100. Lifetime Fitness & Wellness (2,2) [C5W] 3.00
- KIN 202. Biological Foundations of Kinesiology & Recreation 3.00
- KIN 221. Skill Laboratory: Rhythmic and Dance Activities 2.00
- KIN 222. Skill Laboratory: Teaching Fitness & Wellness in Schools 2.00 - 10.00
- KIN 223. "Skill Laboratory: Individual & Lifetime Activities 2.00 - 10.00
- KIN 224. Skill Laboratory: Court & Field Games 2.00
- KIN 225. Skill Laboratory: Wilderness & Adventure Education 2.00 - 10.00
- KIN 303. Motor Development & Learning 3.00
- KIN 305. Social/Psychological Foundations in Kinesiology 3.00
- KIN 309. School Health Content 3.00
- KIN 310. Instructional Methods in Physical Education 3.00
- KIN 311. Elementary Curriculum in Physical Education 2.00
- KIN 312. The Profession of Teaching Health & Physical Education 2.00

The Department of Learning, Technology, and Leadership Education houses minors, certificates, and graduate programs that prepare students for advanced learning in educational technology, educational leadership, teacher leadership, and human resources development. Students are prepared for careers in education, government, business, and industry settings.

Educational Media Minor

Educational Media Minor

Coordinator: Dr. Michele Estes

Phone: (540) 568-4311

Coordinator: Dr. Jim Bywater

Phone: (540) 568-3888

The educational media minor prepares students for employment in education, business, communications, non-profit and consulting fields where the effective design of information, instruction and media are important. Students who minor in educational media will develop psychological and technological skills intended to enhance the major program of study and prepare for the workplace. Students who successfully complete the minor will possess skills appropriate for teaching, training, designing instruction and developing related multimedia. Underlying theories and concepts integrated into the course work include but are not limited to the diffusion of information, learning theory, message design, group dynamics and materials evaluation.

The educational media minor requires a minimum of 18 credit hours selected in consultation with an adviser for this program.

Required Courses

- PSYC 160. Life Span Human Development [C5SD] *3.00*
- LTLE 150. Information in Contemporary Society *3.00*
- LTLE 370. Instructional Technology *3.00*
- LTLE 372. Visual Literacy *3.00*
- LTLE 374. Photography for Learning *1.00*
- LTLE 376. Video for Learning *1.00*
- LTLE 378. Web Design for Learning *1.00*
- LTLE 385. Foundations of Instructional Design *3.00*

Total: 18 Credit Hours

Human Resource Development Minor

Human Resource Development Minor

Coordinator: Prof. Randy Snow

Phone: (540) 568-8842

The human resource development minor prepares students to develop and implement professional development and performance improvement programs and materials.

The minor is designed to provide students from a wide variety of content disciplines additional experiences and skill bases to seek employment in public and private sectors in the fields of training and development and performance improvement.

Students who minor in human resource development must complete 18 hours of course work, including LTLE 370.

Requirements

- HRD 240. Introduction to Human Resource Development *3.00*
- HRD 245. Leadership in Organizational Settings *3.00*
- LTLE 370. Instructional Technology *3.00*
- HRD 380. Performance and Task Analysis in Human Resource Development *3.00*
- HRD 480. Learning in Adulthood *3.00*
- HRD 485. Development of Materials and Programs *3.00*

Total: 18 Credit Hours

Mission

The mission of the Department of Management is to provide students with a nationally competitive undergraduate education in the field of management studies. The Department of Management major prepares future organizational leaders to manage effectively in a dynamic global business environment. The Department of Management faculty strive to develop students'

theoretical and practical managerial expertise, focusing on interpersonal and team skills, situational and data analysis, innovation and creativity, problem solving, evidence based decision making, and ethical reasoning.

Goals

The overall goals of the Department of Management (MGT) program are:

- To prepare graduates of the MGT major for a wide variety of management careers and leadership roles.
- To provide instruction relating to the study and practice of management to undergraduate and graduate students in the College of Business.

Core Management Objectives

After studying management, students will possess an advanced understanding of:

- The Functions of Management: Management majors will understand the basic managerial functions of planning, organizing, leading and controlling and how these functions are used to achieve organizational objectives in dynamic, culturally diverse, and competitive global business environments.
- The Legal and Ethical Environment of Management: Management majors will recognize and understand the behavioral implications of the ethical and legal boundaries of managerial decision making and subsequent actions.
- Effective Decision Making and Problem Solving: Management majors will develop and enhance critical thinking, analytical and decision making skills. These skills will be demonstrated in students' ability to engage successfully in situational analysis, problem recognition, integration of information from diverse sources, use of logic and reasoning to develop solutions, and alternative courses of action, and implementation of action plans.
- Organizational Strategy and Design: Management majors will be able to identify and explain elements of the internal and external environments that influence the formulation, implementation and evaluation of organizational strategy, structure and design.

Career Opportunities

- Project Manager
- Human Resources Generalist or Specialist
- Management Consultant
- Business Analyst
- Operations or Logistics Manager
- Supply Chain Analyst
- Labor Relations Specialist
- Small Business Owner/Manager
- Customer Service/Relations Manager
- Sales Manager
- Retail Manager
- Facility/Events Manager

Co-curricular Activities and Organizations

- Sigma Iota Epsilon (SIE): National honors fraternity for management majors.

- **Madison Entrepreneurs:** a chapter of the national Collegiate Entrepreneurs Organization (CEO). Encouraging and supporting entrepreneurial activity and enterprise creation.
- **Society for Human Resource Management (SHRM):** Student chapter of a national organization that provides students with opportunities to learn more about the field of human resource management through speakers, facility tours, networking and other activities.
- **Association for Supply Chain Management (APICS):** JMU chapter of APICS, a national professional organization that provides research, education and certification programs that foster supply chain excellence, innovation and resilience.
- **The JMU Society of Real Estate (SRE):** A professional business organization that allows students to explore different facets of the real estate industry through speaker events, workshops, company site visits, and other activities.

Management, B.B.A.

Degree and Major Requirements

The B.B.A. degree in management requires a minimum of 120 credit hours of undergraduate work.

The credit hour requirements for each of the program components are as follows:

Degree Requirements

Required Courses

- General Education requirements *41 Credit Hours*¹
- B.B.A. lower-level core courses *27 Credit Hours*
- B.B.A. upper-level core courses *18 Credit Hours*
- Management major requirements *24 Credit Hours*
- Electives *8-11 Credit Hours*

Total: 120 Credit Hours

Footnote

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

Major Requirements

Students planning to major in management must complete the 27-28 hours of lower-division B.B.A. core curriculum prior to enrolling in upper-division core courses normally taken in the first semester of their junior year. It is expected that the lower-division core curriculum will be completed during the first two years of study along with most of the university general education curriculum. Failing to complete all the lower-division core requirements on time will delay enrollment in upper-division core and major courses. Because of the demands of group, team and outside of classroom applied assignments, students will not be allowed to enroll in more than four courses with a MGT prefix in any given semester.

Management majors must choose one of the following options to complete the required eight courses in the MGT major:

- Option 1: Five MGT core courses, one concentration and one elective
- Option 2: Five MGT core courses and three MGT electives.

Required Core Courses

- MGT 320. Management of Innovation and Technology 3.00
- MGT 325. Project Management 3.00
- MGT 357. Evidence-Based Decision Making 3.00
- MGT 365. Fundamentals of Human Resource Management 3.00
- MGT 390. Organizational Leadership 3.00

Total: 15 Credit Hours

B.B.A. Core Component

B.B.A. Lower-Level Core Component

B.B.A. majors must complete all of the B.B.A. core components as part of their degree program. The following courses comprise the B.B.A. Lower-Level Core Component:

- COB 191. Business Analytics I 3.00¹
- COB 202. Interpersonal Skills 3.00
- COB 204. Computer Information Systems 3.00
- COB 241. Financial Accounting 3.00
- COB 242. Managerial Accounting 3.00^{4,5}
- COB 291. Business Analytics II 3.00²
- ECON 200. Introduction to Macroeconomics [C4GE] 3.00
- ECON 201. Introduction to Microeconomics 3.00

- MATH 205. Introductory Calculus I [C3QR] 3.00³
or
- MATH 235. Calculus I [C3QR] 4.00³

B.B.A. Upper-Level Core Component

The following courses comprise the B.B.A. Upper-Level Core Component:

- COB 300A. Integrative Business: Management 3.00^{5,6}
- COB 300B. Integrative Business: Finance 3.00^{5,6}
- COB 300C. Integrative Business: Operations 3.00^{5,6}
- COB 300D. Integrative Business: Marketing 3.00^{5,6}
- COB 318. Legal and Ethical Environment of Business 3.00⁷
- COB 487. Strategic Management 3.00⁸

Footnotes

¹ MATH 220 may be substituted for COB 191.

² COB 191 or equivalent and MATH 205 or equivalent are prerequisites for COB 291.

³ Calculus is required but not used in calculating the B.B.A. core GPA. MATH 235 is preferred for Finance majors.

⁴ COB 241 must be taken before COB 242.

⁵ COB 242 is a prerequisite for COB 300 but is not used in calculating the B.B.A. core GPA.

⁶ All four COB 300 courses must be taken during the same semester.

⁷ COB 300 is a prerequisite or corequisite for COB 318. COB 318 is a prerequisite for COB 487.

⁸ COB 487 must be taken during the senior year.

Recommended Schedule for Majors

Third Year

First Semester

- COB 300A. Integrative Business: Management *3.00*
- COB 300B. Integrative Business: Finance *3.00*
- COB 300C. Integrative Business: Operations *3.00*
- COB 300D. Integrative Business: Marketing *3.00*
- General Education or elective *3 Credit Hours*

Second Semester

- General Education or electives *6 Credit Hours*
- MGT 357. Evidence-Based Decision Making *3.00*

Two of the following MGT core requirements: *6 Credit Hours*

- MGT 320. Management of Innovation and Technology *3.00*
- MGT 325. Project Management *3.00*
- MGT 365. Fundamentals of Human Resource Management *3.00*
- MGT 390. Organizational Leadership *3.00*

Fourth Year

Required Courses

- Remaining two of five MGT core course requirements *6 Credit Hours*
- COB 487. Strategic Management *3.00*
- General Education or electives as needed

Choose One: *9 Credit Hours*

- Option 1: One concentration (two courses) plus one MGT elective
- Option 2: Three MGT electives.

Management, Business Analysis and Consulting Concentration, B.B.A.

Degree and Major Requirements

The B.B.A. degree in management requires a minimum of 120 credit hours of undergraduate work.

The credit hour requirements for each of the program components are as follows:

- COB 487. Strategic Management 3.00⁸

Footnotes

¹ MATH 220 may be substituted for COB 191.

² COB 191 or equivalent and MATH 205 or equivalent are prerequisites for COB 291.

³ Calculus is required but not used in calculating the B.B.A. core GPA. MATH 235 is preferred for Finance majors.

⁴ COB 241 must be taken before COB 242.

⁵ COB 242 is a prerequisite for COB 300 but is not used in calculating the B.B.A. core GPA.

⁶ All four COB 300 courses must be taken during the same semester.

⁷ COB 300 is a prerequisite or corequisite for COB 318. COB 318 is a prerequisite for COB 487.

⁸ COB 487 must be taken during the senior year.

Business Analysis and Consulting

The business analysis and consulting (BAC) concentration is designed to develop and enhance students' critical thinking, problem solving and decision-making skills. In this concentration students engage in research and analysis to build a strong foundation for learning and implementing the business analysis and consulting process. This focus area is suggested for students interested in working as a business analyst, consultant or solutions manager, or in any position that requires strong analytical and problem solving skills. MGT 357. Evidence-Based Decision Making is considered the first course in this concentration.

Required Courses

- MGT 457. Business Analysis and Consulting Fundamentals 3.00

- MGT 467. Management Consulting 3.00

Total: 6 Credit Hours

Recommended Schedule for Majors

Third Year

First Semester

- COB 300A. Integrative Business: Management 3.00
- COB 300B. Integrative Business: Finance 3.00
- COB 300C. Integrative Business: Operations 3.00
- COB 300D. Integrative Business: Marketing 3.00
- General Education or elective 3 *Credit Hours*

Second Semester

- General Education or electives 6 *Credit Hours*
- MGT 357. Evidence-Based Decision Making 3.00

Two of the following MGT core requirements: 6 Credit Hours

- MGT 320. Management of Innovation and Technology 3.00
- MGT 325. Project Management 3.00
- MGT 365. Fundamentals of Human Resource Management 3.00
- MGT 390. Organizational Leadership 3.00

Fourth Year

Required Courses

- Remaining two of five MGT core course requirements 6 *Credit Hours*
- COB 487. Strategic Management 3.00
- General Education or electives as needed

Choose One: 9 Credit Hours

- Option 1: One concentration (two courses) plus one MGT elective
- Option 2: Three MGT electives.

Management, Human Resource Management Concentration, B.B.A.

- COB 300C. Integrative Business: Operations 3.00^{5,6}
- COB 300D. Integrative Business: Marketing 3.00^{5,6}
- COB 318. Legal and Ethical Environment of Business 3.00⁷
- COB 487. Strategic Management 3.00⁸

Footnotes

¹ MATH 220 may be substituted for COB 191.

² COB 191 or equivalent and MATH 205 or equivalent are prerequisites for COB 291.

³ Calculus is required but not used in calculating the B.B.A. core GPA. MATH 235 is preferred for Finance majors.

⁴ COB 241 must be taken before COB 242.

⁵ COB 242 is a prerequisite for COB 300 but is not used in calculating the B.B.A. core GPA.

⁶ All four COB 300 courses must be taken during the same semester.

⁷ COB 300 is a prerequisite or corequisite for COB 318. COB 318 is a prerequisite for COB 487.

⁸ COB 487 must be taken during the senior year.

Human Resource Management

The human resource management (HRM) concentration is designed to help students broaden and deepen their understanding of the acquisition, development, management and retention of human capital in organizations. This focus area is suggested for students who intend to work in human resource (HR) generalist or specialist positions, students planning on a career in labor relations or employment law, students who plan to start or manage a business, and students who want to attend graduate school in an HR-related field. MGT 365. Fundamentals of Human Resource Management is considered the first course in this concentration.

Required Courses

- MGT 470. Acquiring and Developing Human Capital *3.00*
- MGT 475. Managing and Retaining Human Capital *3.00*

Total: 6 Credit Hours

Recommended Schedule for Majors, Human Resource Management Concentration

Third Year

First Semester

- COB 300A. Integrative Business: Management *3.00*
- COB 300B. Integrative Business: Finance *3.00*
- COB 300C. Integrative Business: Operations *3.00*
- COB 300D. Integrative Business: Marketing *3.00*
- General Education or elective 3 Credit Hours

Second Semester

- COB 318. Legal and Ethical Environment of Business *3.00*
- MGT 365. Fundamentals of Human Resource Management *3.00*
- General Education or electives *6 Credit Hours*

Two of the following core requirements:

- MGT 320. Management of Innovation and Technology *3.00*
- MGT 325. Project Management *3.00*
- MGT 357. Evidence-Based Decision Making *3.00*
- MGT 390. Organizational Leadership *3.00*

Fourth Year

Required Courses

- COB 487. Strategic Management *3.00*
- Remaining two of five MGT core course requirements *6 Credit Hours*
- General Education or electives as needed

Choose one of the following options: 9 Credit Hours

- Option 1: One concentration (two courses) plus one MGT elective
- Option 2: Three MGT electives

Management, Innovation and Entrepreneurship Concentration, B.B.A.

Degree and Major Requirements

The B.B.A. degree in management requires a minimum of 120 credit hours of undergraduate work.

The credit hour requirements for each of the program components are as follows:

Degree Requirements

Required Courses

- General Education requirements *41 Credit Hours*¹
- B.B.A. lower-level core courses *27 Credit Hours*
- B.B.A. upper-level core courses *18 Credit Hours*
- Management major requirements *24 Credit Hours*
- Electives *8-11 Credit Hours*

Total: 120 Credit Hours

Footnote

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

Major Requirements

Students planning to major in management must complete the 27-28 hours of lower-division B.B.A. core curriculum prior to enrolling in upper-division core courses normally taken in the first semester of their junior year. It is expected that the lower-division core curriculum will be completed during the first two years of study along with most of the university general education curriculum. Failing to complete all the lower-division core requirements on time will delay enrollment in upper-division core and major courses. Because of the demands of group, team and outside of classroom applied assignments, students will not be allowed to enroll in more than four courses with a MGT prefix in any given semester.

Management majors must choose one of the following options to complete the required eight courses in the MGT major:

- Option 1: Five MGT core courses, one concentration and one elective
- Option 2: Five MGT core courses and three MGT electives.

Required Core Courses

- MGT 320. Management of Innovation and Technology *3.00*
- MGT 325. Project Management *3.00*
- MGT 357. Evidence-Based Decision Making *3.00*
- MGT 365. Fundamentals of Human Resource Management *3.00*
- MGT 390. Organizational Leadership *3.00*

Total: 15 Credit Hours

B.B.A. Core Component

B.B.A. Lower-Level Core Component

B.B.A. majors must complete all of the B.B.A. core components as part of their degree program. The following courses comprise the B.B.A. Lower-Level Core Component:

- COB 191. Business Analytics I 3.00¹
- COB 202. Interpersonal Skills 3.00
- COB 204. Computer Information Systems 3.00
- COB 241. Financial Accounting 3.00
- COB 242. Managerial Accounting 3.00^{4,5}
- COB 291. Business Analytics II 3.00²
- ECON 200. Introduction to Macroeconomics [C4GE] 3.00
- ECON 201. Introduction to Microeconomics 3.00

- MATH 205. Introductory Calculus I [C3QR] 3.00³
or
- MATH 235. Calculus I [C3QR] 4.00³

B.B.A. Upper-Level Core Component

The following courses comprise the B.B.A. Upper-Level Core Component:

- COB 300A. Integrative Business: Management 3.00^{5,6}
- COB 300B. Integrative Business: Finance 3.00^{5,6}
- COB 300C. Integrative Business: Operations 3.00^{5,6}
- COB 300D. Integrative Business: Marketing 3.00^{5,6}
- COB 318. Legal and Ethical Environment of Business 3.00⁷
- COB 487. Strategic Management 3.00⁸

Footnotes

¹ MATH 220 may be substituted for COB 191.

² COB 191 or equivalent and MATH 205 or equivalent are prerequisites for COB 291.

³ Calculus is required but not used in calculating the B.B.A. core GPA. MATH 235 is preferred for Finance majors.

⁴ COB 241 must be taken before COB 242.

⁵ COB 242 is a prerequisite for COB 300 but is not used in calculating the B.B.A. core GPA.

⁶ All four COB 300 courses must be taken during the same semester.

⁷ COB 300 is a prerequisite or corequisite for COB 318. COB 318 is a prerequisite for COB 487.

⁸ COB 487 must be taken during the senior year.

Innovation and Entrepreneurship

The innovation and entrepreneurship (ENT1) concentration is designed to provide students with an introduction to the role of innovation in business development, a solid foundation in the principle elements of entrepreneurship and small business

management, and the opportunity to gain hands-on experience working with a team to create a new business venture. This focus area is suggested for students interested in creating and managing a new business venture, students intending to work for larger firms that encourage innovation and intrapreneurship, and students planning to work in small or family run businesses. MGT 320. Management of Innovation and Technology is considered the first course in this concentration.

Required Courses

- MGT 471. Entrepreneurship and Small Business Management *3.00*
- MGT 472. New Venture Creation *3.00*

Total: 6 Credit Hours

Recommended Schedule for Majors, Innovation and Entrepreneurship Concentration

Third Year

First Semester

- COB 300A. Integrative Business: Management *3.00*
- COB 300B. Integrative Business: Finance *3.00*
- COB 300C. Integrative Business: Operations *3.00*
- COB 300D. Integrative Business: Marketing *3.00*
- General Education or elective *3 Credit Hours*

Second Semester

- MGT 320. Management of Innovation and Technology *3.00*
 - General Education or electives *6 Credit Hours*

Two of the following MGT core requirements:

- MGT 325. Project Management *3.00*
- MGT 357. Evidence-Based Decision Making *3.00*
- MGT 365. Fundamentals of Human Resource Management *3.00*
- MGT 390. Organizational Leadership *3.00*

Fourth Year

Required Courses

- COB 487. Strategic Management *3.00*
- Remaining two of five MGT core course requirements *6 Credit Hours*
- General Education or electives as needed

Choose one of the following options: 9 Credit Hours

- Option 1: One concentration (two courses) plus one MGT elective
- Option 2: Three MGT electives

Mission

The marketing department's mission is to develop highly successful marketing professionals who deliver exceptional value to their customers, employers and communities and to advance the practice of marketing through academic and professional engagement.

The marketing curriculum focuses on traditional and emerging marketing skills needed in various business settings and industries. The curriculum seeks to develop competence in five areas: factual and conceptual knowledge, problem-solving skills, communication skills, experiential learning and the use of information technology. Students will be prepared to enter corporate, small business or not-for-profit environments with highly valued skills and an understanding of the need for continuous learning.

Concentrations in Professional Sales and Digital Marketing are available to all marketing students.

Goals

- To deliver a solid foundation of the concepts and theories of the marketing discipline, including market environmental issues; strategic market planning, implementation, and evaluation; marketing research; buyer behavior and market segmentation; and development of marketing programs.
- To engage students in critical thinking processes, requiring an in-depth analysis of qualitative and quantitative market data and the development of subsequent marketing strategies based on this analysis.
- To enable students to evaluate marketing alternatives and commit to a course of action, using financial, organizational, environmental and ethical criteria as bases for decision making.
- To teach students a variety of information technology tools and techniques to improve marketing and overall business performance and deliver greater value to customers.
- To facilitate students' continuing development of listening, writing and oral communication skills.
- To develop students' marketing-based interpersonal skills, such as group-based negotiation, consensus building, delegation and performance evaluation.

- To integrate classroom study with exposure to industry practices throughout the marketing curriculum and ensure marketing students access to experiential learning opportunities in marketing career tracks.
- To introduce students to the fundamentals of professional selling and develop students' interpersonal communication skills through face-to-face role-play scenarios.

Career Opportunities

- Consumer marketing and business-to-business marketing: direct marketing, market analysis, product development, digital marketing and customer relationship management.
- Sales: Product and service sales positions across a broad range of companies and industries as sales development representatives, account managers, inside sales representatives and outside sales representatives.
- Digital Marketing: search engine marketing, search engine optimization, mobile marketing, digital account management, content marketing, social media marketing and marketing analytics.
- Consulting: marketing consultation, data analysis and data sales.
- Marketing research: database management, market research analyst and project management.
- Product/Brand management: business-to-business sales, product specialist, channel development and promotional marketing.
- Retailing: store management, merchandise buying, trend analysis, omnichannel retail management and visual merchandising.
- Not-for-profit marketing: fund-raising, public relations and customer service.

Co-curricular Activities and Organizations

Ad Club (MAAF). The Madison American Advertising Federation (MAAF) is JMU's only student advertising club and a student chapter of the American Advertising Federation (AAF).

AMA. This student club is affiliated with the American Marketing Association, a national marketing association for marketing professionals, faculty, and students. AMA is open to all JMU students. AMA is comprehensive with its marketing programming and offers students information and activities in direct marketing, retailing, and marketing management.

DECA. Collegiate DECA is a student-driven business organization that values competence, innovation, integrity, and teamwork. DECA prepares emerging leaders and entrepreneurs in marketing, finance, hospitality, and management.

Delta Mu Sigma. DMS is a newly established honor society dedicated to the commitment of growth, innovation, and integrity of digital, direct, and database marketing scholarship and practice. The society hosts guest speakers and networking events with digital marketing professionals.

Mu Kappa Tau. M.K.T. is an honorary marketing society for students with high collegiate scholastic records. Admission is by invitation only. The society engages in joint programming with other JMU marketing student organizations.

Pi Sigma Epsilon. PSE is a national, professional fraternity that focuses on programming and extracurricular experiences in marketing, personal selling, and sales management.

Professional Sales Club. This organization strives to help all students who are interested in sales and give them the knowledge and skills they need to be successful in a professional sales role.

Transfer Credit Policy

The marketing program will accept no more than two courses for transfer credit toward the major. These courses must be from AACSB institutions. In addition to this general College of Business policy, there are restrictions on which courses will be accepted for transfer credit.

Students must take the following courses at JMU:

- MKTG 482. Marketing Analytics
- MKTG 485. Marketing Management

Marketing, B.B.A.

Degree and Major Requirements

Marketing majors conform to the general structure of the B.B.A. degree program. The B.B.A. degree in marketing requires a minimum of 120 credit hours of undergraduate course work.

Degree Requirements

Required Courses

- General Education requirements *41 Credit Hours*¹
- B.B.A. lower-level core courses *27-28 Credit Hours*²
- B.B.A. upper-level core courses *18 Credit Hours*
- Marketing major requirements *27 Credit Hours*
- Electives *7-13 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

Major Requirements

Students planning to major in marketing must complete the 27-28 hour, lower-level B.B.A. core requirements (see the College of Business section for the list of courses) prior to enrolling in upper-level B.B.A. core and marketing courses. Upper-level courses normally begin in the first semester of the junior year. The lower-level core curriculum should be completed during the first two years of study along with most of the university General Education curriculum. Failing to complete all lower-level core requirements on time will delay enrollment in upper-level core and major courses. The following upper-level B.B.A. core courses are required: COB 300A, COB 300B, COB 300C, and COB 300D; COB 318; and COB 487.

Marketing Curriculum

The marketing curriculum consists of 27 credit hours in marketing. The required courses equip students with the knowledge and skills all marketers should have. Elective courses allow students to pursue areas of special interest and prepare for specific career tracks in marketing. Students may choose to complete an optional concentration in Professional Sales or Digital Marketing.

Required Courses

Core Courses 15 Credit Hours

- MKTG 384. Integrated Marketing Communications 3.00
- MKTG 385. Consumer Behavior 3.00
- MKTG 430. Professional Selling 3.00
- MKTG 482. Marketing Analytics 3.00
- MKTG 485. Marketing Management 3.00

Concentration and elective courses 12 Credit Hours

Total: 27 Credit Hours

B.B.A. Core Component

B.B.A. Lower-Level Core Component

B.B.A. majors must complete all of the B.B.A. core components as part of their degree program. The following courses comprise the B.B.A. Lower-Level Core Component:

- COB 191. Business Analytics I 3.00¹
- COB 202. Interpersonal Skills 3.00
- COB 204. Computer Information Systems 3.00
- COB 241. Financial Accounting 3.00
- COB 242. Managerial Accounting 3.00^{4,5}
- COB 291. Business Analytics II 3.00²
- ECON 200. Introduction to Macroeconomics [C4GE] 3.00
- ECON 201. Introduction to Microeconomics 3.00

- MATH 205. Introductory Calculus I [C3QR] 3.00³
or
- MATH 235. Calculus I [C3QR] 4.00³

B.B.A. Upper-Level Core Component

The following courses comprise the B.B.A. Upper-Level Core Component:

- COB 300A. Integrative Business: Management 3.00^{5,6}
- COB 300B. Integrative Business: Finance 3.00^{5,6}
- COB 300C. Integrative Business: Operations 3.00^{5,6}
- COB 300D. Integrative Business: Marketing 3.00^{5,6}
- COB 318. Legal and Ethical Environment of Business 3.00⁷
- COB 487. Strategic Management 3.00⁸

Footnotes

¹ MATH 220 may be substituted for COB 191.

² COB 191 or equivalent and MATH 205 or equivalent are prerequisites for COB 291.

³ Calculus is required but not used in calculating the B.B.A. core GPA. MATH 235 is preferred for Finance majors.

⁴ COB 241 must be taken before COB 242.

⁵ COB 242 is a prerequisite for COB 300 but is not used in calculating the B.B.A. core GPA.

⁶ All four COB 300 courses must be taken during the same semester.

⁷ COB 300 is a prerequisite or corequisite for COB 318. COB 318 is a prerequisite for COB 487.

⁸ COB 487 must be taken during the senior year.

Marketing Required Courses

Core Courses: *15 Credit Hours*

- **MKTG 384. Integrated Marketing Communications** 3.00
- **MKTG 385. Consumer Behavior** 3.00
- **MKTG 430. Professional Selling** 3.00
- **MKTG 482. Marketing Analytics** 3.00
- **MKTG 485. Marketing Management** 3.00

Choose four marketing electives: 12 Credit Hours

- MKTG 386. Services Marketing 3.00
- MKTG 388. Omnichannel Retailing 3.00
- MKTG 410. Social Media Marketing 3.00²
- MKTG 450. Business Marketing 3.00
- MKTG 455. Sales Leadership 3.00¹
- MKTG 460. Global Marketing 3.00
- MKTG 462. International Logistics 3.00
- MKTG 465. CRM Technology for Sales Professionals 3.00¹
- MKTG 466. Advanced Professional Selling 3.00¹
- MKTG 470. Strategic Internet Marketing 3.00²
- MKTG 477. Digital Marketing Practicum 3.00²
- MKTG 480. Product Development and Management 3.00
- MKTG 490. Special Studies in Marketing 1.00 - 3.00
- MKTG 494. Marketing Internship 3.00 - 6.00

Total: 27 Credit Hours

Footnotes

¹ MKTG 455, MKTG 465 and MKTG 466 are electives applied toward the Professional Sales Concentration, B.B.A.

² MKTG 410, MKTG 470 and MKTG 477 are electives applied toward the Digital Marketing Concentration, B.B.A.

Recommended Schedule for Majors

Marketing majors should follow the course schedule below to complete the final two years of their program. It is possible to deviate from this schedule but care must be taken to ensure that all course prerequisites are met.

Third Year

First Semester

- COB 300A. Integrative Business: Management 3.00
- COB 300B. Integrative Business: Finance 3.00
- COB 300C. Integrative Business: Operations 3.00
- COB 300D. Integrative Business: Marketing 3.00
- Electives 3 *Credit Hours*

Second Semester

- MKTG 384. Integrated Marketing Communications 3.00
- MKTG 385. Consumer Behavior 3.00
- MKTG 430. Professional Selling 3.00
- COB 318. Legal and Ethical Environment of Business 3.00
- Electives 3 *Credit Hours*

Fourth Year

First Semester

- MKTG 482. Marketing Analytics 3.00
- Required marketing courses not completed junior year 3 *Credit Hours*
- Marketing electives 9 *Credit Hours*
- Electives 1-6 *Credit Hours as needed*

Second Semester

- COB 487. Strategic Management 3.00
or
- Elective 1-6 *Credit Hours as needed*
- MKTG 485. Marketing Management 3.00
- Marketing electives 3 *Credit Hours*

Marketing, Digital Marketing Concentration, B.B.A.

The emerging digital marketing sector is attracting marketing graduates interested in paid search, display advertising, marketing analytics, search engine optimization, content marketing, mobile marketing, email marketing and social media. Students who graduate with the digital marketing concentration will understand the foundational theory and best practices related to driving website traffic and making data-driven decisions. Students will complete industry-recognized certifications within the digital marketing electives and will be encouraged to complete other external certifications that relate to their career goals. Students will learn to use appropriate industry tools for the classes in which they enroll such as website builders, email service providers, content creation tools, social media planning dashboards and keyword planning tools. Students will learn the development process for digital marketing platforms and to connect the creation of materials to marketing strategies and measurable objectives. After completing the concentration, students will have an understanding of the use of digital marketing in contributing to the overall achievement of the organization's business objectives. Courses in this concentration build on the content of MKTG 384. Students should complete this course as soon as possible after completing COB 300.

Digital Marketing Concentration Requirements

Required Marketing Courses: 15 Credit Hours

- MKTG 384. Integrated Marketing Communications 3.00
- MKTG 385. Consumer Behavior 3.00
- MKTG 430. Professional Selling 3.00
- MKTG 482. Marketing Analytics 3.00
- MKTG 485. Marketing Management 3.00

Electives: 12 Credit Hours

Complete twelve credits through one of the following paths below. The Department of Marketing encourages Digital Marketing Concentration students to pursue Path 1:

Path 1:

Three digital marketing-focused marketing electives (nine credits) and one other marketing elective (three credits)

Path 2:

Two digital marketing-focused marketing electives (six credits) and two other marketing electives (six credits)

Digital Marketing-Focused Electives

- MKTG 410. Social Media Marketing 3.00
- MKTG 470. Strategic Internet Marketing 3.00
- MKTG 477. Digital Marketing Practicum 3.00

Total: 27 Credit Hours

Recommended Schedule for Marketing, Digital Marketing Concentration, B.B.A

Marketing majors pursuing a concentration in Digital Marketing should follow the course schedule below to complete the final two years of their program. It is possible to deviate from this schedule but care must be taken to ensure that all course prerequisites are met. In order to meet the requirements of the Digital Marketing Concentration, students should complete MKTG 384 in the semester immediately following the successful completion of CoB 300.

Third Year

First Semester

- COB 300A. Integrative Business: Management 3.00
- COB 300B. Integrative Business: Finance 3.00
- COB 300C. Integrative Business: Operations 3.00
- COB 300D. Integrative Business: Marketing 3.00
- Electives 3 Credit Hours

Total: 15 Credit Hours

Second Semester

- MKTG 384. Integrated Marketing Communications 3.00
- MKTG 385. Consumer Behavior 3.00
- MKTG 430. Professional Selling 3.00
- COB 318. Legal and Ethical Environment of Business 3.00
- Electives 3 *Credit Hours*

Total: 15 Credit Hours

Fourth Year

The recommended schedule for the fourth-year below is based on Path 1 by completing three Digital Marketing-focused electives (9 Credit Hours) and one Marketing elective (3 Credit Hours). Students may pursue Path 2 to fulfill Digital Marketing concentration requirements by completing two Digital Marketing-focused electives (6 Credit Hours) and two Marketing electives (6 Credit Hours).

First Semester

- MKTG 410. Social Media Marketing 3.00
- MKTG 470. Strategic Internet Marketing 3.00
- MKTG 482. Marketing Analytics 3.00
- Marketing elective 3 *Credit Hours*
- Electives 1-6 *Credit Hours as needed*

Total: 15 Credit Hours

Second Semester

- COB 487. Strategic Management 3.00
- MKTG 477. Digital Marketing Practicum 3.00
- MKTG 485. Marketing Management 3.00
- Electives 1-6 *Credit Hours as needed*

Total: 12-15 Credit Hours

Marketing, Professional Sales Concentration, B.B.A.

Professional Sales Concentration Requirements

This concentration prepares students for careers in sales that focus on business customers and, in most cases, on the selling of relatively complex and technical products and services.

Courses in this concentration build on the content of MKTG 430. Students should complete this course as soon as possible after completing COB 300.

Required Courses

Core Courses: 15 Credit Hours

- MKTG 384. Integrated Marketing Communications 3.00
- MKTG 385. Consumer Behavior 3.00
- MKTG 430. Professional Selling 3.00
- MKTG 482. Marketing Analytics 3.00
- MKTG 485. Marketing Management 3.00

Electives: 12 Credit Hours

Complete twelve credits through one of the following paths below. The Department of Marketing encourages Professional Sales Concentration students to pursue Path 1.

Path 1

- MKTG 466. Advanced Professional Selling 3.00
- Two sales-focused marketing electives 6 *Credit Hours*
- One other marketing elective 3 *Credit Hours*

Path 2

- MKTG 466. Advanced Professional Selling 3.00
- One sales-focused marketing elective 3 *Credits Hours*
- Two other marketing electives 6 *Credits Hours*

Sales-Focused Marketing Electives

- MKTG 455. Sales Leadership 3.00
- MKTG 465. CRM Technology for Sales Professionals 3.00

Total: 27 Credit Hours

Recommended Schedule for Marketing, Professional Sales Concentration B.B.A.

Marketing majors pursuing a concentration in Professional Sales should follow the course schedule below to complete the final two years of their program. It is possible to deviate from this schedule but care must be taken to ensure that all course prerequisites are met. In order to meet the requirements of the Professional Sales Concentration, students should complete MKTG 430 in the semester immediately following the successful completion of COB 300.

Third Year

First Semester

- COB 300A. Integrative Business: Management 3.00
- COB 300B. Integrative Business: Finance 3.00
- COB 300C. Integrative Business: Operations 3.00
- COB 300D. Integrative Business: Marketing 3.00
- Electives 3 *Credit Hours*

Total: 15 Credit Hours

Second Semester

- Electives *6 Credit Hours*
- MKTG 384. Integrated Marketing Communications *3.00*
- MKTG 385. Consumer Behavior *3.00*
- MKTG 430. Professional Selling *3.00*
- COB 318. Legal and Ethical Environment of Business *3.00*
- Electives *3 Credit Hours*

Total: 15 Credit Hours

Fourth Year

The recommended schedule for the fourth-year below is based on Path 1. Students may pursue Path 2 to fulfill Professional Sales concentration requirements by replacing MKTG 455 or MKTG 465 with a Marketing elective.

First Semester

- MKTG 455. Sales Leadership *3.00*
- MKTG 465. CRM Technology for Sales Professionals *3.00*
- MKTG 482. Marketing Analytics *3.00*
- Marketing elective *3 Credit Hours*
- Electives *1-6 Credit Hours as needed*

Total: 15 Credit Hours

Second Semester

- COB 487. Strategic Management *3.00*
- MKTG 466. Advanced Professional Selling *3.00*
- MKTG 485. Marketing Management *3.00*
- Electives *1-6 Credit Hours as needed*

Total: 15 Credit Hours

Mathematics and Statistics, Department of

Dr. LouAnn Lovin, **Interim Department Head**

Phone: (540) 568-6184

Email: lovinla@jmu.edu

Location: Roop Hall, Room 305

Professors

D. Carothers, S. Garren, H. Hamdan, N. Jahan, B. Jones, P. Kohn, R. Lee, J. Liu, L. Lovin, C. Lubert, S. Lucas, J. Marafino, K. Nashimoto, S. Prins, J. Rosenhouse, J. Sochacki, L. Taalman, A. Tongen, L. Van Wyk, D. Walton, D. Warne, P. Warne

Associate Professors

E. A. Arnold, E. Brown, L. Chen, J. Ducey, R. Field, M. Oh, E. O'Shea, K. Quertermous, D. Sharma, H. Shehadeh, J. Siegfried, A. Stevens, E. Strawbridge, R. Thelwell, J. Webb, C. Williams, L. Xu

Assistant Professors

E. G. Arnold, R. Busi, B. Cochran, D. Duncan, C. Hoang, T. Olson, E. Ward, J. Willingham, D. Withana Gamage, C. Woodruff

Visiting Assistant Professors

E. Abdurasul, H. Thakorlal Gandhi

Instructors

A. Casiple, H. Cong, J. Gibson, D. Hall, S. Horn, G. Jansen, E. Lahiere, T. Sprolden, C. Watson, A. Wilander

Mission

The Department of Mathematics and Statistics provides a program of study in the mathematical sciences that meets the needs of a wide variety of students and makes a continuing contribution to the advancement of mathematical and statistical knowledge and its dissemination. The program provides opportunities for in-depth study that can lead to careers as mathematicians and statisticians in private and public sectors, teachers of mathematics, and further study in graduate school. The program provides support for the mathematical and statistical needs of students in the natural sciences, integrated sciences, social sciences, and professional and pre-professional programs. The program meets the general education needs of all students, providing an understanding of mathematical and statistical thinking and approaches to problem solving.

We are committed to promoting mathematics and statistics as an art of human endeavor as well as a fundamental method of inquiry into the sciences and a vast array of other disciplines. We are committed to encouraging an attitude of appreciation and support for mathematics and statistics in current university students and, through them, the next generation of citizens. We are also committed to fostering an appreciation for the effective use of applied mathematics and statistics in connection with and support of other disciplines for those students majoring in other subjects.

Goals

As a major in mathematics or statistics, a student can expect to use and build on skills such as:

- Thinking critically
- Formulating and solving problems
- Communicating solutions clearly, both orally and in writing

These skills have been gained in previous courses in mathematics, statistics and other areas. As the breadth of knowledge of the subject grows, students gain an increased understanding and appreciation of the fact that mathematics is truly a universal language whose creation and applications cut across all boundaries of race, class, culture and time.

There also will be opportunities for students to experience the challenges and rewards of faculty-mentored research, individually or as a member of a team, as they investigate mathematical and statistical problems that extend beyond those normally encountered in the classroom. Students increase their abilities to prove theorems, understand complex structures and apply mathematics and statistics in many real-world settings. The program students choose will make it possible for them to acquire strong preparation for graduate work or for professional applications in mathematics and statistics, teaching, natural and social sciences or other technical areas.

Programs

The Department of Mathematics and Statistics offers the B.A. and B.S. degrees with a major in mathematics and the B.S. degree with a major in statistics. There is a program for a major in mathematics that qualifies a student for initial teaching licensure. A concentration in computational sciences is also available. Minors are offered in mathematics and statistics.

The department also recognizes the importance of providing courses for non-specialists who need to make effective use of mathematics or statistics in their chosen careers.

The university is an institutional/educational member of the American Mathematical Society, the American Statistical Association, the Mathematical Association of America, and the Society for Industrial and Applied Mathematics.

Students are strongly encouraged to participate in the numerous undergraduate research opportunities as well as individual and small group projects available in the department. Opportunities exist through the Center for Mathematical Modeling, the Statistical Consulting Center, honors theses and independent studies with individual faculty mentors.

Majors in the department are expected to participate in assessment activities. Assessment information is used to assist faculty members in modifying curricula.

Mathematics Minor

Mathematics Minor

The mathematics minor is open to students not majoring in mathematics or statistics. Each student must obtain prior approval of all courses to be counted in the minor from the adviser, Dr. Peter D. Kohn, or from the department head.

A minor in mathematics requires a minimum of 18 credit hours. At least six hours must be earned within the JMU Department of Mathematics and Statistics.

Credit by Examination

The Mathematics and Statistics, Department of offers credit by examination for some of the courses taught in the department. Students who want to take an examination must apply to the department head. Upon application students will receive details regarding approval to take the examination.

Core Courses

- MATH 231. Calculus with Functions I [C3QR] 3.00
and
 - MATH 232. Calculus with Functions II 3.00
and
 - MATH 236. Calculus II 4.00
- or
- MATH 235. Calculus I [C3QR] 4.00 and
 - MATH 236. Calculus II 4.00

- Mathematics courses numbered MATH 237 or above, excluding mathematics courses numbered 301-309 *10 Credit Hours*

Total: 18-20 Credit Hours

Mathematics, B.A.

Credit by Examination

The Department of Mathematics offers credit by examination for some of the courses taught in the department. Students who want to take an examination must apply to the department head. Upon application students will receive details regarding approval to take the examination.

Degree Requirements

Required Courses

- General Education *41 Credit Hours*^{1,2}
- Foreign Language classes (intermediate level required) *0-14 Credit Hours*
- Philosophy course (in addition to General Education) *3 Credit Hours*
- University electives *19-35 Credit Hours*
- Major requirements (listed below) *41-45 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ MATH 231 or MATH 235 must be included and students seeking secondary teaching licensure must include PSYC 160.

² The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

Major Requirements

Mathematics requirements depend on whether or not the student is seeking secondary teaching licensure. All students must complete 29-33 credit hours of the following required core mathematics courses and 12 credit hours of mathematics courses beyond the core.

Core Courses Required of All Majors

- MATH 236. Calculus II *4.00*
- MATH 237. Calculus III *4.00*
- MATH 245. Discrete Mathematics *3.00*
- MATH 248. Computers & Numerical Algorithms *4.00*

- MATH 300. Linear Algebra *3.00* and
- MATH 336. Elementary Differential Equations *3.00*¹

- MATH 410. Advanced Calculus I 3.00
- MATH 430. Abstract Algebra I 3.00

Choose one of the following:

- MATH 318. Introduction to Probability and Statistics 4.00
or
- MATH 229. Introduction to Applied Statistics Using R [C3QR] 3.00 and
- MATH 329. Introduction to Probability and Theoretical Statistics 3.00 ²

Total: 29-33 Credit Hours

Footnotes

¹ MATH 238. Linear Algebra with Differential Equations may be substituted for MATH 300 and MATH 336 if the student is completing a double major, seeking the computational sciences concentration, or received credit for MATH 238 before declaring a math major.

² MATH 229 and MATH 329 is recommended. For students choosing MATH 318, a course with statistical data analysis (MATH 321, 322, 324, 327 or 354) is recommended.

Additional Requirements for Students Seeking Secondary Teaching Licensure

Students seeking secondary teaching licensure must (in addition to the required core courses):

- Complete the 22-24 credit hours that comprise the pre-professional education program in secondary education.
- Complete 12 credit hours of mathematics courses:
- One of MATH 310 or MATH 315
- MATH 415
- MATH 470
- MATH 475

Students seeking secondary teaching licensure earn the Bachelor of Arts or Bachelor of Sciences degree and then complete the Master of Arts in Teaching degree.

It is necessary to be admitted to the teacher education program prior to enrolling in pre-professional education courses. For a full description of the program in secondary education, refer to the College of Education, Middle, Secondary and Mathematics Education, Department of.

Additional Requirements for Students Not Seeking Secondary Teaching Licensure

Students not seeking secondary teaching licensure track must complete (in addition to the required core courses) one of the following options, each consisting of 12 credit hours of mathematics courses:

- One of MATH 411, MATH 431, MATH 434 or MATH 435, and nine hours of mathematics electives 310 or above. No more than six of the nine hours may be MATH 486 and/or MATH 497.
- One of the pairs of courses MATH 426 and MATH 427, MATH 440 and MATH 441, or MATH 448 and MATH 449, and six hours of mathematics electives numbered 310 or above.

The option chosen and the courses chosen to satisfy an option by a student are made in consultation with the student's adviser and are dependent upon the student's interests and career objectives. Students interested in pursuing graduate studies in mathematics are strongly urged to complete both MATH 411 and MATH 431.

Recommended Schedule for Majors Seeking Secondary Licensure

Recommended Schedule for Majors Seeking Secondary Licensure

First Year

- Cluster One: Skills for the 21st Century *9-12 Credit Hours*
- MATH 229. Introduction to Applied Statistics Using R [C3QR] *3.00*
- MATH 235. Calculus I [C3QR] *4.00*
- MATH 236. Calculus II *4.00*
- MATH 245. Discrete Mathematics *3.00*
- General Education courses *3-6 Credit Hours*

Total: 30 Credit Hours

Second Year

- MATH 237. Calculus III *4.00*
- MATH 248. Computers & Numerical Algorithms *4.00*
- MATH 300. Linear Algebra *3.00*
- MATH 329. Introduction to Probability and Theoretical Statistics *3.00*
- MATH 336. Elementary Differential Equations *3.00*
- Pre-professional education requirements *6 Credit Hours*
- General Education courses/electives *7 Credit Hours*

Total: 30 Credit Hours

Third Year

- MATH 430. Abstract Algebra I *3.00*
- Pre-professional education requirements and General Education courses/electives *21 Credit Hours*

Choose two of the following: 6 Credit Hours

- MATH 310. Elem Number Theory *3.00*
- MATH 315. Real Number System *3.00*
- MATH 410. Advanced Calculus I *3.00*
- MATH 415. History of Mathematics *3.00*
- MATH 475. Fund Concepts of Geometry *3.00*
- Mathematics electives numbered MATH 310 or above

Total: 30 Credit Hours

Fourth Year

- Pre-professional education requirements and General Education courses/electives *21 Credit Hours*

Choose three from the following: 9 Credit Hours

- MATH 310. Elem Number Theory *3.00*
- MATH 315. Real Number System *3.00*
- MATH 410. Advanced Calculus I *3.00*
- MATH 415. History of Mathematics *3.00*
- MATH 470. Connections in Mathematics *3.00*
- MATH 475. Fund Concepts of Geometry *3.00*
- Mathematics elective(s) numbered at or above MATH 310

Total: 30 Credit Hours

Recommended Schedule for Majors Not Seeking Secondary Licensure

Recommended Schedule for Majors Not Seeking Secondary Licensure

First Year

- Cluster One: Skills for the 21st Century *9-12 Credit Hours*
- MATH 229. Introduction to Applied Statistics Using R [C3QR] *3.00*
- MATH 235. Calculus I [C3QR] *4.00*
- MATH 236. Calculus II *4.00*
- Discrete Mathematics *3 Credit Hours*
- General Education courses *4-7 Credit Hours*

Total: 30 Credit Hours

Second Year

- MATH 237. Calculus III *4.00*
- MATH 248. Computers & Numerical Algorithms *4.00*
- MATH 300. Linear Algebra *3.00*
- MATH 329. Introduction to Probability and Theoretical Statistics *3.00*
- MATH 336. Elementary Differential Equations *3.00*
- General Education courses/electives *13 Credit Hours*

Total: 30 Credit Hours

Third Year

- General Education courses/electives *18-21 Credit Hours*
- Mathematics required or elective courses numbered MATH 310 or above *6-9 Credit Hours*

Choose one of the following: 3 Credit Hours

- MATH 410. Advanced Calculus I 3.00
- MATH 430. Abstract Algebra I 3.00

Total: 30 Credit Hours

Fourth Year

- Mathematics required or elective courses MATH 310 or above 6-9 *Credit Hours*
- Electives 18-21 *Credit Hours*

Choose one of the following: 3 Credit Hours

- MATH 410. Advanced Calculus I 3.00
- MATH 430. Abstract Algebra I 3.00

Total: 30 Credit Hours

Mathematics, B.S.

Credit by Examination

The Department of Mathematics offers credit by examination for some of the courses taught in the department. Students who want to take an examination must apply to the department head. Upon application students will receive details regarding approval to take the examination.

Degree Requirements

Required Courses

- General Education 41 *Credit Hours*^{1,2}
- Scientific Literacy requirement (in addition to General Education) 3-4 *Credit Hours*
- University electives 32-35 *Credit Hours*
- Major requirements (listed below) 41-45 *Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ MATH 231 or MATH 235 must be included and students seeking secondary teaching licensure must include PSYC 160.

² The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

Major Requirements

Mathematics requirements depend on whether or not the student is seeking secondary teaching licensure. All students must complete 29-33 credit hours of the following required core mathematics courses and 12 credit hours of mathematics courses beyond the core.

Core Courses Required of All Majors

- MATH 236. Calculus II *4.00*
- MATH 237. Calculus III *4.00*
- MATH 245. Discrete Mathematics *3.00*
- MATH 248. Computers & Numerical Algorithms *4.00*

- MATH 300. Linear Algebra *3.00* and
- MATH 336. Elementary Differential Equations *3.00*¹

- MATH 410. Advanced Calculus I *3.00*
- MATH 430. Abstract Algebra I *3.00*

Choose one of the following:

- MATH 318. Introduction to Probability and Statistics *4.00*
or
- MATH 229. Introduction to Applied Statistics Using R [C3QR] *3.00* and
- MATH 329. Introduction to Probability and Theoretical Statistics *3.00*²

Total: 29-33 Credit Hours

Footnotes

¹ MATH 238. Linear Algebra with Differential Equations may be substituted for MATH 300 and MATH 336 if the student is completing a double major, seeking the computational sciences concentration, or received credit for MATH 238 before declaring a math major.

² MATH 229 and MATH 329 is recommended. For students choosing MATH 318, a course with statistical data analysis (MATH 321, 322, 324, 327 or 354) is recommended.

Additional Requirements for Students Seeking Secondary Teaching Licensure

Students seeking secondary teaching licensure must (in addition to the required core courses):

- Complete the 22-24 credit hours that comprise the pre-professional education program in secondary education.
- Complete 12 credit hours of mathematics courses:
- One of MATH 310 or MATH 315
- MATH 415
- MATH 470
- MATH 475

Students seeking secondary teaching licensure earn the Bachelor of Arts or Bachelor of Sciences degree and then complete the Master of Arts in Teaching degree.

It is necessary to be admitted to the teacher education program prior to enrolling in pre-professional education courses. For a full description of the program in secondary education, refer to the College of Education, Middle, Secondary and Mathematics Education, Department of.

Additional Requirements for Students Not Seeking Secondary Teaching Licensure

Students not seeking secondary teaching licensure track must complete (in addition to the required core courses) one of the following options, each consisting of 12 credit hours of mathematics courses:

- One of MATH 411, MATH 431, MATH 434 or MATH 435, and nine hours of mathematics electives 310 or above. No more than six of the nine hours may be MATH 486 and/or MATH 497.
- One of the pairs of courses MATH 426 and MATH 427, MATH 440 and MATH 441, or MATH 448 and MATH 449, and six hours of mathematics electives numbered 310 or above.

The option chosen and the courses chosen to satisfy an option by a student are made in consultation with the student's adviser and are dependent upon the student's interests and career objectives. Students interested in pursuing graduate studies in mathematics are strongly urged to complete both MATH 411 and MATH 431.

Recommended Schedule for Majors Seeking Secondary Licensure

Recommended Schedule for Majors Seeking Secondary Licensure

First Year

- Cluster One: Skills for the 21st Century *9-12 Credit Hours*
- MATH 229. Introduction to Applied Statistics Using R [C3QR] *3.00*
- MATH 235. Calculus I [C3QR] *4.00*
- MATH 236. Calculus II *4.00*
- MATH 245. Discrete Mathematics *3.00*
- General Education courses *3-6 Credit Hours*

Total: 30 Credit Hours

Second Year

- MATH 237. Calculus III *4.00*
- MATH 248. Computers & Numerical Algorithms *4.00*
- MATH 300. Linear Algebra *3.00*
- MATH 329. Introduction to Probability and Theoretical Statistics *3.00*
- MATH 336. Elementary Differential Equations *3.00*
- Pre-professional education requirements *6 Credit Hours*
- General Education courses/electives *7 Credit Hours*

Total: 30 Credit Hours

Third Year

- MATH 430. Abstract Algebra I *3.00*

- Pre-professional education requirements and General Education courses/electives *21 Credit Hours*

Choose two of the following: 6 Credit Hours

- MATH 310. Elem Number Theory *3.00*
- MATH 315. Real Number System *3.00*
- MATH 410. Advanced Calculus I *3.00*
- MATH 415. History of Mathematics *3.00*
- MATH 475. Fund Concepts of Geometry *3.00*
- Mathematics electives numbered MATH 310 or above

Total: 30 Credit Hours

Fourth Year

- Pre-professional education requirements and General Education courses/electives *21 Credit Hours*

Choose three from the following: 9 Credit Hours

- MATH 310. Elem Number Theory *3.00*
- MATH 315. Real Number System *3.00*
- MATH 410. Advanced Calculus I *3.00*
- MATH 415. History of Mathematics *3.00*
- MATH 470. Connections in Mathematics *3.00*
- MATH 475. Fund Concepts of Geometry *3.00*
- Mathematics elective(s) numbered at or above MATH 310

Total: 30 Credit Hours

Recommended Schedule for Majors Not Seeking Secondary Licensure

- MATH 430. Abstract Algebra I *3.00*

Total: 30 Credit Hours

Mathematics, Computational Sciences Concentration, B.A.

Concentration Requirements

For students majoring in mathematics or physics, the Departments of Mathematics and Physics offer a coordinated sequence of courses that prepare students for careers in the rapidly expanding field of computer modeling of complex systems. This program is structured so that students can earn a major in one department and a minor in the other. Students need not decide on a major field until their junior year.

The computational sciences concentration will prepare students to design and use computer models in any of those areas in which applied mathematics is used to understand complex systems (meteorology, astronomy, geology/geophysics, oceanography, physics, etc.). The preparation is appropriate for both those students who plan to enter the work force after graduation and those who plan to enter graduate school in applied mathematics, physics, or one of the other fields mentioned above.

Students should complete the following courses during the first two years of the program:

- MATH 235. Calculus I, MATH 236. Calculus II, MATH 237. Calculus III
- MATH 238. Linear Algebra with Differential Equations (MATH 300 and MATH 336 may be substituted.)
- MATH 248. Computers & Numerical Algorithms
- PHYS 240L. University Physics Laboratory I [C3T1G2], PHYS 250L. University Physics Laboratory II
- PHYS 240. University Physics I, PHYS 250. University Physics II, PHYS 260. University Physics III
- MATH 364/PHYS 364. Introduction to Fluid Mechanics

During their junior and senior years, students will normally complete the necessary course work for their major and minor. Mathematics majors will take PHYS 340. Mechanics, and MATH/PHYS 365, Introduction to Computational Fluid Mechanics, counted as a physics course to complete their physics minor. Physics majors will take MATH/PHYS 365 counted as a mathematics course and either MATH 337. Methods of Applied Calculus, or MATH 440. Fourier Analysis and Partial Differential Equation, to complete their mathematics minor. Seniors in either major must complete at least one topics or independent study/research course that involves computer modeling.

Credit by Examination

The Department of Mathematics offers credit by examination for some of the courses taught in the department. Students who want to take an examination must apply to the department head. Upon application students will receive details regarding approval to take the examination.

Degree Requirements

Required Courses

- General Education *41 Credit Hours*^{1,2}
- Foreign Language classes (intermediate level required) *0-14 Credit Hours*
- Philosophy course (in addition to General Education) *3 Credit Hours*
- University electives *19-35 Credit Hours*
- Major requirements (listed below) *41-43 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ MATH 231 or MATH 235 must be included and students seeking secondary teaching licensure must include PSYC 160.

² The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

Major Requirements

Mathematics requirements depend on whether or not the student is seeking secondary teaching licensure. All students must complete 29-33 credit hours of the following required core mathematics courses and 12 credit hours of mathematics courses beyond the core.

Core Courses Required of All Majors

- MATH 236. Calculus II 4.00
- MATH 237. Calculus III 4.00
- MATH 245. Discrete Mathematics 3.00
- MATH 248. Computers & Numerical Algorithms 4.00

- MATH 300. Linear Algebra 3.00 and
- MATH 336. Elementary Differential Equations 3.00 ¹

- MATH 410. Advanced Calculus I 3.00
- MATH 430. Abstract Algebra I 3.00

Choose one of the following:

- MATH 318. Introduction to Probability and Statistics 4.00
- or
- MATH 229. Introduction to Applied Statistics Using R [C3QR] 3.00 and
 - MATH 329. Introduction to Probability and Theoretical Statistics 3.00 ²

Total: 29-33 Credit Hours

Footnotes

¹ MATH 238. Linear Algebra with Differential Equations may be substituted for MATH 300 and MATH 336 if the student is completing a double major, seeking the computational sciences concentration, or received credit for MATH 238 before declaring a math major.

² MATH 229 and MATH 329 is recommended. For students choosing MATH 318, a course with statistical data analysis (MATH 321, 322, 324, 327 or 354) is recommended.

Additional Requirements for Students Seeking Secondary Teaching Licensure

Students seeking secondary teaching licensure must (in addition to the required core courses):

- Complete the 22-24 credit hours that comprise the pre-professional education program in secondary education.
- Complete 12 credit hours of mathematics courses:
- One of MATH 310 or MATH 315
- MATH 415
- MATH 470
- MATH 475

Students seeking secondary teaching licensure earn the Bachelor of Arts or Bachelor of Sciences degree and then complete the Master of Arts in Teaching degree.

It is necessary to be admitted to the teacher education program prior to enrolling in pre-professional education courses. For a full description of the program in secondary education, refer to the College of Education, Middle, Secondary and Mathematics Education, Department of.

Additional Requirements for Students Not Seeking Secondary Teaching Licensure

Students not seeking secondary teaching licensure track must complete (in addition to the required core courses) one of the following options, each consisting of 12 credit hours of mathematics courses:

- One of MATH 411, MATH 431, MATH 434 or MATH 435, and nine hours of mathematics electives 310 or above. No more than six of the nine hours may be MATH 486 and/or MATH 497.
- One of the pairs of courses MATH 426 and MATH 427, MATH 440 and MATH 441, or MATH 448 and MATH 449, and six hours of mathematics electives numbered 310 or above.

The option chosen and the courses chosen to satisfy an option by a student are made in consultation with the student's adviser and are dependent upon the student's interests and career objectives. Students interested in pursuing graduate studies in mathematics are strongly urged to complete both MATH 411 and MATH 431.

Mathematics, Mathematics for Middle Grades Teachers Minor

The mathematics for middle grades teachers minor is open to students not majoring in mathematics or statistics. Each student must obtain prior approval of all courses to be counted in the minor from the adviser, Dr. Peter D. Kohn, or from the department head.

The minor requires a minimum of 24 credit hours. At least six hours must be earned within the JMU **Department of Mathematics and Statistics**.

Credit by Examination

The **Department of Mathematics and Statistics** offers credit by examination for some of the courses taught in the department. Students who want to take an examination must apply to the department head. Upon application students will receive details regarding approval to take the examination.

Required Courses

- MATH 107. Fundamentals of Mathematics I [C3QR] *3.00*
 - MATH 108. Fundamentals of Mathematics II *3.00*
 - MATH 207. Fundamentals of Mathematics III *3.00*
 - MATH 304. Principles of Algebra *3.00*
 - MATH 305. Principles of Geometry *3.00*
 - MATH 306. Principles of Analysis *3.00*
 - MATH 307. Principles of Probability and Statistics *3.00*
 - MATH 135. Elementary Functions *4.00*
- or
- approved substitute *3.00-4.00 Credit Hours*

Total: 24-25 Credit Hours

Statistics Minor

A minor in statistics requires a minimum of 18 credit hours. Students seeking the minor in statistics must complete one of the following options.

Credit by Examination

The Mathematics and Statistics, Department of offers credit by examination for some of the courses taught in the department. Students who want to take an examination must apply to the department head. Upon application students will receive details regarding approval to take the examination.

Option 1

Not open to students majoring in mathematics. Students completing Option 1 must obtain prior approval of the courses to be counted in the minor from the statistics minor adviser, Dr. Nusrat Jahan.

Required Courses

- MATH 322. Applied Linear Regression *3.00*

Choose one of the following: 3-4 Credit Hours

- MATH 220. Elementary Statistics [C3QR] *3.00*
- MATH 229. Introduction to Applied Statistics Using R [C3QR] *3.00*
- MATH 318. Introduction to Probability and Statistics *4.00*
- MATH 329. Introduction to Probability and Theoretical Statistics *3.00*

Choose four of the following: 12 Credit Hours

- MATH 309. SAS Programming and Data Management *3.00*
- MATH 321. Analysis of Variance and Experimental Design *3.00*
- MATH 324. Applied Nonparametric Statistics *3.00*
- MATH 325. Survey Sampling Methods *3.00*
- MATH 326. Statistical Quality Control *3.00*
- MATH 327. Categorical Data Analysis *3.00*
- MATH 328. Time Series Analysis *3.00*

- BIO 454. Introduction to Biometrics (3, 1) *4.00*

- MATH 421. Applied Multivariate Statistical Analysis *3.00*
- MATH 423. Stochastic Process *3.00*
- MATH 424. Statistical Decision Theory *3.00*
- MATH 426. Probability and Mathematical Statistics I *3.00*
- MATH 427. Probability and Mathematical Statistics II *3.00*

Total: 18-19 Credit Hours

Option 2

Not open to students majoring in mathematics. Students completing Option 2 must obtain prior approval of the courses to be counted in the minor from the statistics minor adviser, Dr. Nusrat Jahan.

Required Courses

- MATH 236. Calculus II *4.00*
- MATH 237. Calculus III *4.00*
- MATH 322. Applied Linear Regression *3.00*

Choose one of the following:

- MATH 318. Introduction to Probability and Statistics *4.00*
- MATH 329. Introduction to Probability and Theoretical Statistics *3.00*

Choose two of the following: 6 Credit Hours

- MATH 321. Analysis of Variance and Experimental Design *3.00*
- MATH 326. Statistical Quality Control *3.00*
- MATH 423. Stochastic Process *3.00*
- MATH 426. Probability and Mathematical Statistics I *3.00*

Total: 20-21 Credit Hours

Option 3

The Option 3 minor in statistics is only open to students majoring in mathematics. Up to six hours may be double-counted towards the mathematics major. Students completing Option 3 must obtain prior approval of the courses to be counted in the minor from the statistics minor adviser, Dr. Nusrat Jahan.

Required Courses

- MATH 229. Introduction to Applied Statistics Using R [C3QR] *3.00*¹
- MATH 321. Analysis of Variance and Experimental Design *3.00*
- MATH 322. Applied Linear Regression *3.00*
- MATH 329. Introduction to Probability and Theoretical Statistics *3.00*¹

Electives: 6-10 Credit Hours

- MATH 324. Applied Nonparametric Statistics *3.00*
- MATH 325. Survey Sampling Methods *3.00*
- MATH 327. Categorical Data Analysis *3.00*
- MATH 328. Time Series Analysis *3.00*
- MATH 354. Introduction to Biometrics *4.00*
- MATH 421. Applied Multivariate Statistical Analysis *3.00*
- MATH 426. Probability and Mathematical Statistics I *3.00*

Total: 18-20 Credit Hours

Footnote

¹ MATH 318 may be substituted for MATH 229 and MATH 329 by students taking at least 9 hours of elective courses.

Statistics, B.S.

Bachelor of Science in Statistics

The Mathematics and Statistics, Department of offers a major in statistics to meet the needs of both the public and the private sectors for graduates with degrees in statistics. The required courses provide a balance of applications and theory, which allows students to prepare for immediate employment or graduate studies by proper selection of the program electives.

Degree Requirements

Required Courses

- General Education *41 Credit Hours* ^{1,2}
- Scientific Literacy requirement (in addition to General Education) *3-4 Credit Hours*
- University electives *29-32 Credit Hours*
- Major requirements (listed below) *44-46 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ MATH 231 or MATH 235 must be included.

² The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

Major Requirements

Requirements for a B.S. degree with a major in statistics are the following required courses and a minimum of six credit hours from the electives listed below. Students interested in pursuing graduate studies in statistics are strongly encouraged to double-major in statistics and mathematics.

Required Courses

- MATH 229. Introduction to Applied Statistics Using R [C3QR] *3.00* ¹
- MATH 236. Calculus II *4.00*
- MATH 237. Calculus III *4.00*
- MATH 321. Analysis of Variance and Experimental Design *3.00*
- MATH 322. Applied Linear Regression *3.00*
- MATH 327. Categorical Data Analysis *3.00*
- MATH 329. Introduction to Probability and Theoretical Statistics *3.00*
- MATH 421. Applied Multivariate Statistical Analysis *3.00*
- MATH 426. Probability and Mathematical Statistics I *3.00*

- MATH 428. Statistical Consulting *3.00*

Choose one of the following: 3-4 Credit Hours

- MATH 248. Computers & Numerical Algorithms *4.00*
- MATH 309. SAS Programming and Data Management *3.00*

Choose one of the following: 3-4 Credit Hours

- MATH 238. Linear Algebra with Differential Equations *4.00*
- MATH 300. Linear Algebra *3.00*

Electives: 6 Credit Hours

- MATH 324. Applied Nonparametric Statistics *3.00*
- MATH 325. Survey Sampling Methods *3.00*
- MATH 326. Statistical Quality Control *3.00*
- MATH 328. Time Series Analysis *3.00*

- BIO 454. Introduction to Biometrics (3, 1) *4.00*

- MATH 410. Advanced Calculus I *3.00*
- MATH 411. Advanced Calculus II *3.00*²
- MATH 423. Stochastic Process *3.00*
- MATH 424. Statistical Decision Theory *3.00*
- MATH 427. Probability and Mathematical Statistics II *3.00*
- MATH 429. Research Project in Statistics *1.00 - 3.00*

Total: 44-46 Credit Hours

Footnotes

¹MATH 220 with a grade of "B-" or better may be substituted for MATH 229 if the student received credit for MATH 220 before declaring a statistics major.

²MATH 411 is recommended for students planning to do graduate work in statistics.

Recommended Schedule for Statistics

First Year

- Cluster One: Skills for the 21st Century *9 Credit Hours*
- MATH 229. Introduction to Applied Statistics Using R [C3QR] *3.00*
- MATH 236. Calculus II *4.00*
- MATH 309. SAS Programming and Data Management *3.00*¹
- General Education courses *11 Credit Hours*

Total: 30 Credit Hours

Second Year

- MATH 237. Calculus III *4.00*
- MATH 321. Analysis of Variance and Experimental Design *3.00*
- MATH 322. Applied Linear Regression *3.00*
- MATH 329. Introduction to Probability and Theoretical Statistics *3.00*
- General Education courses/electives *17 Credit Hours*

Total: 30 Credit Hours

Third Year

- MATH 300. Linear Algebra *3.00*²
- MATH 327. Categorical Data Analysis *3.00*
- General Education courses/electives *24 Credit Hours*

Total: 30 Credit Hours

Fourth Year

- MATH 421. Applied Multivariate Statistical Analysis *3.00*
- MATH 426. Probability and Mathematical Statistics I *3.00*
- MATH 428. Statistical Consulting *3.00*
- Electives *21 Credit Hours*

Total: 30 Credit Hours

Footnotes

¹ MATH 248. Computers & Numerical Algorithms may be substituted.

² MATH 238. Linear Algebra with Differential Equations may be substituted.

Media Arts and Design, School of

Dr. Gwyneth Mellinger, **Director**

Phone: (540) 568-7007

Email: smad@jmu.edu

Location: Harrison Hall, Room 0283

Website: <http://www.jmu.edu/smad>

Professors

S. Anderson, D. Flamiano, R. Greene, J. Hinshaw, J. Holman, M. Johnson, A. Leidholdt, D. Maune, G. Mellinger, K. Reynolds, R. Soenksen

Associate Professors

M. Grundmann, S. Hokanson, A. Vilela, S. Wright, N. Zheng

Assistant Professors

R. Alessi, N. Dinc, C. Guo, A. Hooker, T. Mitchell, I. O'Reilly, R. Parkhurst, D. Wang

Instructors

J. Loyacano

Mission Statement

The School of Media Arts and Design prepares students to serve as creative, reflective, and highly skilled media producers and storytellers, sensitive to the personal and social impact of the messages they create and to the important role media can play in advancing the public interest.

Vision

To be a national leader in media education, providing innovative programs that embrace and integrate traditional media concepts, values, and skills with new and evolving technologies.

We value:

- Inquiry-based learning, both independent and collaborative, that emphasizes the creative process and is distinctly innovative, challenging, cooperative and collegial.
- Historical, legal and ethical literacy and critical thinking skills that enable students to reach thoughtful and principled decisions throughout their careers.
- Diverse communities and global perspectives acquired through study and experience.
- Strong co-curricular, extracurricular and internship activities that enrich education and enhance an understanding of the role of media in society.

Goals

To help fulfill the above mission, the school requires students:

- To write clearly, concisely, accurately and effectively for a mass media situation: journalistic, cinematic or electronic.
- To demonstrate computer literacy.
- To demonstrate competency in information gathering for a variety of media situations.
- To recall the process involved in producing a publication (newspaper, magazine, radio, television or multimedia presentation).
- To understand how mass media businesses operate.
- To demonstrate competency in conducting pertinent media research.
- To recognize the history, theories, functions, and effects of mass media in society.
- To recall the history of legal and regulatory constraints on the mass media and new information technologies.
- To recognize ethical constraints on the mass media.
- To apply knowledge of the media in professional environments under academic supervision.

Career Opportunities

The school integrates the fields and study of mass communication, advertising, corporate communication, digital video and cinema, interactive media, journalism, and mediated visual and aural expression. It offers a program of study that prepares students for careers that incorporate mass media and related areas of expertise, and for graduate study in mass communication and related areas.

Co-curricular Activities and Organizations

Majors and interested non-majors are encouraged to participate in co-curricular activities and organizations associated with the school. Cocurricular activities entail practical media arts and design experiences for which credit is available through practica or other applied courses. Co-curricular organizations are student clubs and honorary societies associated with the school's programs of study.

Co-curricular Activities

- The Breeze is the student newspaper.
- Curio is a feature magazine covering life in the Shenandoah Valley.
- WMRA-FM is the campus public radio station.

Co-curricular Organizations

- SMAD Club is a student organization that promotes the School of Media Arts and Design, brings in speakers and organizes departmental events.
- Madison AAF, a chapter of the American Advertising Federation, is a club for those interested in careers in advertising.
- Society of Professional Journalists is the JMU chapter of a national organization for students and professionals working in the various fields of journalism.

Special Admission and Retention Requirements

Admission to the School of Media Arts and Design is limited and competitive. There are two pathways to full admission to the SMAD major.

Direct Admission

Entering freshmen and transfer students who are awarded a competitive scholarship by the university, the College of Arts and Letters, or by the School of Media Arts and Design will be fully and directly admitted to SMAD. Their concentration will be determined by the SMAD Director, in consultation with faculty. Such scholarship holders are exempt from the admission application requirement but must fulfill any conditions attached to their awards.

Admission by Application

Students interested in majoring in the programs offered by the school must apply for a limited number of spaces in the major. An admission committee in the school reviews applications and offers admission based on availability to the most qualified students. A student may apply no more than two times for admission to the school.

September Application Period

The September application process is only for transfer students matriculating to JMU in the current fall semester or the immediately preceding spring or summer semesters and have declared the SMAD major. These students must be officially admitted to JMU as transfer students and must have earned at least 30 hours of JMU approved post high school college credit.

They must be degree-seeking students and must be enrolled in at least 12 hours at JMU during the fall semester. The application is due on Friday of the second week of the fall semester.

January Application Period

Currently enrolled JMU students (including transfer students matriculating in January or in previous semesters) may apply during the January application period. Students applying to the major at JMU must be degree-seeking and have completed at least 12 hours or be enrolled in at least 12 hours at JMU. The application is due on the last Friday in January.

Process

Students interested in applying for admission to this major must "declare" SMAD as a major and apply to become a "fully admitted" major. Declaring a SMAD major does not guarantee the student will be fully admitted into the SMAD major. Students must declare SMAD as a major prior to being eligible to enroll in SMAD 101. A declared SMAD student may take SMAD 101, but the student is restricted from SMAD courses beyond SMAD 101 until being fully admitted into the major.

A complete application to the major includes the following:

- Completion of SMAD 101 or enrollment in SMAD 101.
- Completion of the SMAD Admission Test. (Instructions for the SMAD Admission Test are given in SMAD 101).
- An application letter/personal essay expressing reasons for your interest in your first choice and second choice concentrations. Conduct research and then indicate what you know about careers in the concentration.
- A completed change of major form (available on MyMadison).
- A completed SMAD major card (available in the SMAD office).
- A completed SMAD questionnaire (available in the SMAD office).
- Unofficial transcripts (Transfer students must include the record of JMU transfer credit evaluation).
- Completed SMAD Application Package Checklist and Contract.

The student will present the required information in a manila folder to the main SMAD office with the student's last name, first name and student identification number on the tab of the folder. The student must supply the folder.

Following the review by the SMAD Admission Committee, students will be notified about their acceptance into the major. If accepted, students will be eligible to register for SMAD courses. Students not accepted into the major will be notified and may reapply the following January or a later January. Students may apply to the major no more than two times.

Change of Concentration

Students accepted into the major must pick a concentration. Students who wish to change concentrations after being accepted into the major may do so only during the annual application period. To change a concentration, a letter must be submitted explaining why you want to change concentrations. This letter should be addressed to the Admission Committee and be no more than two pages in length. A Change of Concentration form must accompany the letter. A student, after consulting with his/her adviser and gaining approval of the admissions committee, will be permitted to change concentrations; however, there are no guarantees that the change request will be granted.

Minimum Grades

If a student enrolled in SMAD 101 is accepted in the major and makes an "F" in the course, the student will be dropped from the major. In order to be eligible to reapply for the major, the student must re-take SMAD 101 and reapply. If a student enrolled in SMAD 101 is accepted in the major and makes a "D+," "D" or "D-" in the course, the student may continue to take classes in the major; however, the student must retake SMAD 101 the next semester and earn at least a "C-". Students are limited to taking

SMAD 101 twice. Failure to achieve a grade of at least a "C-" after the second time will result in the student being dropped from the major, including being dropped from any SMAD courses for which the student is preregistered, and the student may not reapply for admission to the major.

To graduate with a degree in media arts and design, a student must have a grade point average of 2.0 ("C") or better in the major.

Media Arts and Design Teaching Licensure

In addition to the general education and academic major requirements, media arts and design majors desiring to add an endorsement in journalism to a secondary teacher license in another content area must be admitted to teacher education, complete the pre-professional program in secondary education at the undergraduate level and complete the graduate level Master of Arts in Teaching degree.

It is critical that students seeking licensure consult regularly with both their education adviser and their major adviser to support their progression through the programs. For a full description of the program in secondary teaching, refer to the Middle, Secondary and Mathematics Education, Department of.

Media Arts and Design, Creative Advertising Concentration, B.A.

Degree and Major Requirements

A student must complete a minimum of 39 SMAD credits. In addition to courses in the School of Media Arts and Design, students must complete at least 75 non-SMAD credits.

Concentrations

Creative Advertising

This professionally oriented concentration provides students with the knowledge and skills to create and manage advertising programs emphasizing new media. In addition to the theoretical concepts underlying advertising, students learn strategic creative writing, effective message design, and media production. Students also learn strategic planning, implementation and evaluation of new media technologies, and research and analysis of current trends and applications. The program reviews ethical and legal issues involved in the creative advertising process and the use of new media. Students planning careers in creative advertising should obtain a broad liberal arts education to better understand the characteristics that make the diversified communication process effective across various media and organizations.

Degree and Major Requirements

A student must complete a minimum of 39 SMAD credits. In addition to courses in the Media Arts and Design, School of, students must complete at least 75 non-SMAD credits.

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹

- Foreign Language classes (intermediate level required) *0-14 Credit Hours*²
- Philosophy course (in addition to General Education courses) *3 Credit Hours*
- University electives *23-37 Credit Hours*
- Major requirements (listed below) *39 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² The foreign language requirement may be satisfied by successful completion of the second semester of the intermediate level of the student's chosen language (typically 232) or by placing out of that language through the Department of Foreign Languages, Literatures and Cultures' placement test.

Major Requirements

Core Requirements

- SMAD 101. Introduction to Media Arts and Design *3.00*
- SMAD 201. Foundations of Visual Communication Design *3.00*
- SMAD 202. Foundations of Audio-Visual Storytelling *3.00*
- SMAD 203. Foundations of User Experience Design *3.00*

- SMAD 301. The Media Arts: Culture By Design *3.00*¹
or
- SMAD 301L. The Media Arts: Culture By Design *3.00*¹

- SMAD 400. Senior Assessment in Media Arts and Design *0.00*

Choose one of the following programs: 24 Credit Hours

- Converged Media
- Creative Advertising
- Digital Video and Cinema
- Journalism

Total: 39 Credit Hours

Footnote

¹ Students may receive SMAD credit for either SMAD 301 or SMAD 301L, but not both.

Concentration Requirements

Course Requirements

- SMAD Core Requirements *15 Credit Hours*

- SMAD 242. Introduction to Advertising and New Media 3.00
- SMAD 252. Copywriting for Advertising 3.00 ¹
- SMAD 342. Elements of Creative Advertising 3.00
- SMAD 443. Creative Advertising Campaigns 3.00

Choose one of the following: 3 Credit Hours

- SMAD 330. New Media Law 3.00
- SMAD 370. Mass Communication Law 3.00

Choose one of the following Applied Skills courses: 3 Credit Hours

- SMAD 210. News Reporting and Writing 3.00
- SMAD 220. Copy Editing 3.00
- SMAD 225. Photojournalism 3.00
- SMAD 305. Special Topics in Media Production 3.00 ²
- SMAD 307. Interactive Design Web I 3.00
- SMAD 311. Feature Writing 3.00 ¹
- SMAD 332. Visual Communication Design 3.00
- SMAD 422. Multimedia Journalism 3.00

Choose two of the following Critical Analysis courses: 6 Credit Hours

- SMAD 360L. British Media and Society 3.00
- SMAD 372. Media History 3.00
- SMAD 373. Media Analysis and Criticism 3.00
- SMAD 398. Critical Studies in Media Arts and Design 3.00 ²
- SMAD 470. New Media and Society 3.00

- SMAD 472. Media and Politics 3.00 ³
- or
- SMAD 472L. Media and Politics 3.00 ³

- SMAD 498. Senior Seminar in Media Arts and Design 3.00

Total: 39 Credit Hours

Footnotes

¹ This course fulfills the College of Arts and Letters writing-intensive requirement for the major.

² These courses satisfy concentration requirements when the topic is appropriate.

³ Students may receive SMAD credit for either SMAD 301 or SMAD 301L, and SMAD 472 or SMAD 472L, but not both.

Recommended Schedule for Majors

First Year

- SMAD 101. Introduction to Media Arts and Design 3.00

Media Arts and Design, Digital Video and Cinema Concentration, B.A.

Degree and Major Requirements

A student must complete a minimum of 39 SMAD credits. In addition to courses in the School of Media Arts and Design, students must complete at least 75 non-SMAD credits.

The core mission of the Digital Video and Cinema concentration is to prepare students to be visual storytellers. Students will develop a broad understanding of the aesthetics, techniques and technologies that embody the visual storytelling process as well as a critical perspective of how media tools are used to create content, convey information and impact audiences.

The program offers preparation in writing, development, production, and post-production in various genres, and an exploration of the continuously evolving commercial and artistic potential of visual media and story. Digital Video and Cinema students are encouraged to complement their concentration with a robust liberal arts experience that could include a minor and/or a second major. An internship is also recommended.

Digital Video and Cinema

The core mission of the Digital Video and Cinema concentration is to prepare students to be visual storytellers. Media Arts and Design, Digital Video and Cinema Concentration, B.S.

Degree and Major Requirements

A student must complete a minimum of 39 SMAD credits. In addition to courses in the School of Media Arts and Design, students must complete at least 75 non-SMAD credits.

The core mission of the Digital Video and Cinema concentration is to prepare students to be visual storytellers. Students will develop a broad understanding of the aesthetics, techniques and technologies that embody the visual storytelling process as well as a critical perspective of how media tools are used to create content, convey information and impact audiences.

The program offers preparation in writing, development, production, and post-production in various genres, and an exploration of the continuously evolving commercial and artistic potential of visual media and story. Digital Video and Cinema students are encouraged to complement their concentration with a robust liberal arts experience that could include a minor and/or a second major. An internship is also recommended.

Digital Video and Cinema

The core mission of the Digital Video and Cinema concentration is to prepare students to be visual storytellers. Students will develop a broad understanding of the aesthetics, techniques and technologies that embody the visual storytelling process as well as a critical perspective of how media tools are used to create content, convey information and impact audiences.

The program offers preparation in writing, development, production and post-production in various genres, and an exploration of the continuously evolving commercial and artistic potential of visual media and story. Media Arts and Design, Interactive Design Concentration, B.A.

Degree and Major Requirements

A student must complete a minimum of 39 SMAD credits. In addition to courses in the School of Media Arts and Design, students must complete at least 75 non-SMAD credits.

Interactive Design

This concentration serves students interested in digital convergence – the delivery of content via multiple media formats such as text, images, audio, video and interactive websites. Students are involved in content creation and distribution using diverse communications media and are prepared for a variety of roles in media industries. Class work and practical experiences are grounded in online media and provide students with opportunities to develop additional skills using other media formats. At the same time, the program encourages students to obtain a broad liberal arts education so they will understand the theories, design, legalities and applications of convergence in society.

Degree and Major Requirements

A student must complete a minimum of 39 SMAD credits. In addition to courses in the Media Arts and Design, School of, students must complete at least 75 non-SMAD credits.

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Foreign Language classes (intermediate level required) *0-14 Credit Hours*²
- Philosophy course (in addition to General Education courses) *3 Credit Hours*
- University electives *23-37 Credit Hours*
- Major requirements (listed below) *39 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² The foreign language requirement may be satisfied by successful completion of the second semester of the intermediate level of the student's chosen language (typically 232) or by placing out of that language through the Department of Foreign Languages, Literatures and Cultures' placement test.

Major Requirements

Core Requirements

- SMAD 101. Introduction to Media Arts and Design *3.00*

Media Arts and Design, Journalism Concentration, B.S.

Degree and Major Requirements

A student must complete a minimum of 39 SMAD credits. In addition to courses in the School of Media Arts and Design, students must complete at least 75 non-SMAD credits.

Journalism

This professionally-oriented program enables students to develop reporting, writing, editing and production skills needed to work in magazines, newspapers, video/broadcast and new media journalism through course work, internships and other practical

experiences. At the same time the program encourages students to obtain a broad liberal arts education so they will understand many of the issues facing contemporary society.

Degree and Major Requirements

A student must complete a minimum of 39 SMAD credits. In addition to courses in the Media Arts and Design, School of, students must complete at least 75 non-SMAD credits.

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Quantitative requirement *3 Credit Hours*²
- Scientific Literacy requirement *3-4 Credit Hours*²
- University electives *33-34 Credit Hours*
- Major requirements *39 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² In addition to course work taken to fulfill General Education requirements.

Major Requirements

Core Requirements

- SMAD 101. Introduction to Media Arts and Design *3.00*
- SMAD 201. Foundations of Visual Communication Design *3.00*
- SMAD 202. Foundations of Audio-Visual Storytelling *3.00*
- SMAD 203. Foundations of User Experience Design *3.00*

- SMAD 301. The Media Arts: Culture By Design *3.00*
or
- SMAD 301L. The Media Arts: Culture By Design *3.00*

- SMAD 400. Senior Assessment in Media Arts and Design *0.00*

Choose one of the following concentrations: 24 Credit Hours

- Converged Media
- Creative Advertising
- Digital Video and Cinema

- Journalism

Total: 39 Credit Hours

Footnote

¹ Students may receive SMAD credit for either SMAD 301 or SMAD 301L, but not both.

Visiting
M. Wolfe

The Department of Middle, Secondary and Mathematics Education houses undergraduate and graduate programs that prepare students for teaching careers in middle and high school. All programs include extensive fieldwork to ensure varied experiences working with children and families in school settings.

Education, Middle Grades Education, B.S.

Grades Six Through Eight Licensure Program

The Middle Grades Education Major is an undergraduate program designed to develop content-area teachers of grades 6-8. In Middle Education, students learn the developmental characteristics of students aged 10 to 14, the social, emotional, physical and intellectual abilities and needs of diverse middle school students, and the design of appropriate cross-disciplinary curriculum and instruction while completing multiple field experiences in local middle school classrooms.

The middle grades education major provides students with course offerings and experiences that form the required foundation for licensure in middle education at James Madison University. Students major in middle grades education while completing licensure area course requirements in a discipline closely associated with the desired teaching area. The state approved licensure areas in the middle education major at JMU are English, mathematics, science and social studies. Students must earn licensure in one concentration; it is also possible to work toward licensure in two concentrations. In most cases, licensure courses may be counted toward a minor. Licensure endorsements for specialized teaching areas (e.g., algebra I, journalism, TESOL, gifted education) are available as add-on programs. Students interested in pursuing any licensure option must consult with a middle education adviser regarding requirements and scheduling.

Students must earn a grade of "B-" or better in all required courses in the middle education major and earn credit in all licensure area content course work to continue in and complete the licensure area.

Students should consult with a Middle Grades Education adviser as soon as possible (e.g., in the first year) to obtain information concerning completion of General Education, middle education major, and licensure area requirements. In addition to declaring the middle grades education major, students must apply for and meet the requirements for admission to teacher education. Students must be fully admitted to teacher education prior to registering for MSSE 240.

Note: Actual teacher licensure requirements may differ from the listed catalog requirements because of changes enacted by the Virginia Department of Education and/or national accrediting agencies. Students are encouraged to confer regularly with their adviser to determine their progress toward graduation.

Middle Grades Education Major and Degree Requirements

Degree Requirements

- General Education¹²³ *41 Credit Hours*
- Quantitative Requirement *3 Credit Hours*
- Scientific Literacy Requirement *3 Credit Hours*

Education, Secondary Education, B.S.

Grades Six through Twelve Licensure Program

The undergraduate major in Secondary Education provides candidates with course offerings and experiences that form the required foundation for licensure in secondary education through James Madison University. In addition to the Secondary Education major, students also complete a major or the equivalent in a discipline closely associated with the desired teaching area. The state approved licensure areas in the Secondary Education concentration at JMU include: English, mathematics, biology, chemistry, physics, earth science, and history/social sciences. Licensure endorsements for other teaching areas (e.g., Algebra I, Journalism, TESOL, and Gifted Education) are available as add-on programs. Students should contact the department of Middle, Secondary, and Mathematics Education for information concerning those programs.

For successful completion of the Secondary Education major, students must earn a grade of "B-" or better in all required Secondary Education courses and earn credit in all licensure area content coursework. Satisfactory completion of both the Secondary Education major and the licensure courses are necessary to receive a recommendation through JMU for a teaching license.

Students should be aware that there is a teacher education admission process that must be completed after a Secondary Education major is declared. Students must be fully admitted to Teacher Education prior to registering for MSSE 240. Students should also note that actual teacher licensure requirements may differ from the catalog requirements listed because of changes enacted by the Virginia Department of Education or accrediting agencies after the catalog copy is approved. Therefore, it is important for students to confer regularly with their Secondary Education advisers.

Secondary Education Degree and Major Requirements

Degree Requirements

- General Education¹²³ *41 Credit Hours*
- Quantitative Requirement *3 Credit Hours*
- Scientific Literacy Requirement *3 Credit Hours*
- Secondary Education Major Requirements *45 Credit Hours*

Footnote

⁴ Students are responsible for transportation to field placements at local schools.

Before beginning the licensure portion of the professional program, candidates must meet all criteria for admission to teacher education (e.g., 2.7 or higher GPA, passing Praxis Subject Assessment scores). Candidates are expected to complete all admission processes early in their sophomore year. Candidates must meet all additional requirements of the program before completion.

Total: 125-128 Credit Hours

Middle Education, Grades Six Through Eight Master's Level Licensure

Middle Grades Education

The middle grades education major is an undergraduate program designed to develop content-area teachers of grades 6-8. In middle grades education, students learn the developmental characteristics of students aged 10 to 14; the social, emotional, physical and intellectual abilities and needs of diverse middle school students; and the design of appropriate cross-disciplinary curriculum and instruction while completing multiple field experiences in local middle school classrooms. The middle grades education major and approved licensure area minors are necessary to receive a recommendation through JMU for a teaching license at the middle school level.

The middle grades education major provides students with course offerings and experiences that form the required foundation for licensure in middle education through James Madison University. Students major in middle grades education while completing licensure area minors/content areas in a discipline closely associated with the desired teaching area. The state approved licensure areas in middle education are English, mathematics, science and social studies. Students must earn licensure in one content area; it is also possible to work toward licensure in two content areas. In most cases, licensure courses may be counted towards a minor. Licensure endorsements for specialized teaching areas (e.g., algebra I, journalism, TESOL, gifted education) are available as add-on programs. Students interested in pursuing any licensure option must consult with a middle grades education adviser regarding requirements and scheduling.

For successful completion of the middle grades education major, students must earn a grade of "B-" or better in all major courses offered through the College of Education. Satisfactory completion of both the middle grades education major and licensure area minor are necessary to receive a recommendation through JMU for a teaching license

Students should consult with a middle grades education adviser as soon as possible (e.g., in the first year) to obtain information concerning completion of the major and other requirements. In addition to declaring the middle grades education major, students must apply for and meet the requirements for admission to Teacher Education. Students must be fully admitted to Teacher Education prior to registering for MSSE 240.

Note: Actual teacher licensure requirements may differ from the listed catalog requirements because of changes enacted by the Virginia Department of Education and/or national accrediting agencies. Students are encouraged to confer regularly with their adviser to determine their progress toward graduation.

B.A./B.S. Undergraduate Degree Requirements

Courses

- General Education *46 Credit Hours*¹
- Interdisciplinary Liberal Studies Major *36-42 Credit Hours*
- Pre-Professional Studies in Education M.A.T. Program *37 Credit Hours*
- Graduate Level Professional Studies *32 Credit Hours*

Total: 151-157 Credit Hours

Footnote

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

Recommended Schedule for Middle Education

Undergraduate Course Requirements

- MSSE 101. Orientation to the Profession *1.00*¹
- PSYC 160. Life Span Human Development [C5SD] *3.00*
- EDUC 300. Foundations of American Education *3.00*

Additional Information

Students must declare the middle education pre-professional licensure program and be fully admitted into teacher education prior to enrolling in the remaining courses. Contact the MSME department office to determine the requirements for admission to teacher education. The first three courses listed are corequisite offerings and must be completed before enrolling in the next two courses which are also corequisites.

Courses

- EDUC 310. Teaching in a Diverse Society *3.00*
- MIED 311. Field Experience in Middle Education *1.00*¹
- LED 312. Foundations of Literacy for Middle School Teachers *3.00*
- MSSE 370. General Instructional Methods for Grades 6-12 *3.00*
- MSSE 371. Clinical Experience in Adolescent Education *1.00*
- LED 472. Literacy Assessment & Instruction in the Content Areas for the Middle Grades *3.00*
- MSSE 470. Content Methods Courses: (complete two in appropriate areas)
- MSSE 470E. English/Language Arts Teaching Methods, Grades 6-8
- MSSE 470H. Social Studies Teaching Methods, Grades 6-8
- MSSE 470S. Natural Sciences Teaching Methods, Grades 6-8
- MSSE 470M. Mathematics Teaching Methods, Grades 6-8
- MSSE 471. Content Area Field Experience in Middle Schools^{1,2}
- EXED 460. Differentiation of Instruction and Academic Collaboration *3.00*

Total: 37 Credit Hours

Footnotes

¹ Students are responsible for transportation to field placements at local schools.

² Choose practicum to correlate with the two content 470 courses. Students complete course twice in appropriate content for a total of six credit hours.

Graduate Courses

Candidates beginning the graduate portion of the program must meet all graduate school requirements and criteria for admission (e.g., 2.7 or higher GPA, passing Praxis Subject Assessment scores); it is expected that candidates will complete the graduate admission process early in their senior year. In addition, candidates must meet all graduate level graduation requirements (culminating teaching project, etc.). See the Graduate Catalog for additional details.

Required Courses

- EDUC 540. Educational Technology *3 Credit Hours*
- EXED 512. Behavior Management in the Classroom *3 Credit Hours*
- MIED 610. Collaborative Leadership in Schools *3 Credit Hours*
- MIED 620. Assessment in Middle Education *3 Credit Hours*
- MSSE 630. Inquiry in the Classroom *3 Credit Hours*
- MIED 656. Seminar in Middle Education *3 Credit Hours*
- MSSE 690. Internship in Middle Education *8 Credit Hours*
- MSSE 650. Internship Seminar *3 Credit Hours*
- Approved graduate-level elective *3 Credit Hours*

Total: 32 Credit Hours

Secondary Education, Grades Six Through Twelve Master's Level Licensure

Secondary Education

Grades Six through Twelve Master's Level Licensure Program

The program in secondary education, including the undergraduate component and the M.A.T., is designed to prepare teachers who are reflective decision-makers. Teachers who are reflective decision-makers are able to choose from among known educational alternatives to maximize student learning in a variety of instructional situations.

The undergraduate program in secondary education is designed to provide candidates with the prerequisite course offerings and experiences that form the required foundation for admission to the Master of Arts in Teaching (M.A.T.) program. Completion of

the M.A.T. program is required for a recommendation for licensure in secondary education through JMU. Undergraduate candidates who are planning to pursue licensure to teach in an academic area at the secondary school level should complete the 23 credit hour pre-professional program in education.

Candidates should also complete a major or the equivalent in one of the arts and sciences disciplines closely associated with the desired teaching area. The state approved licensure areas in the secondary education program at JMU include: English, mathematics, the natural sciences (biology, chemistry, physics, earth science), and history/social science (social studies). Licensure endorsements for other teaching areas (e.g., algebra I, journalism and gifted education) are available as add-on programs. Candidates should contact the departmental office for information concerning those programs.

Candidates should consult with the department head or an adviser in secondary education early during the first year or as soon, thereafter, as possible to obtain information concerning completing the related General Education and content area requirements, as well as the undergraduate and graduate education requirements.

The secondary education licensure program is an integrated program of undergraduate and graduate requirements and experiences. It is important for candidates to understand that they must meet the requirements for a baccalaureate degree and that the appropriate undergraduate pre-professional courses and experiences must be completed satisfactorily before they will be admitted to the M.A.T. program.

Candidates must earn a grade of "B-" or better in all required pre-professional undergraduate courses in the education program and at least a "C-" in content course work to continue in and complete the pre-professional program. Consult the Graduate Catalog for M.A.T. graduate requirements. Admission to and the satisfactory completion of the M.A.T. program are required in order to receive a recommendation through JMU for a teaching license at the secondary school level.

Candidates should note that they must be fully admitted to teacher education prior to registering for courses in the pre-professional secondary education program. Candidates should also note that actual teacher licensure requirements may differ from the catalog requirements listed for a program because of changes enacted by the Virginia Department of Education or accrediting agencies after the catalog copy is approved. Therefore, it is important for students to confer with their education advisers on a regular basis.

B.S./B.A. Undergraduate Degree Requirements

Courses

- General Education *41-44 Credit Hours*¹
- Discipline Major *36-60 Credit Hours*
- Pre-Professional Studies in Education *23 Credit Hours*
- M.A.T. Program (Graduate)
- Graduate Level Professional Studies *35 Credit Hours*

Total: 135-162 Credit Hours

Footnote

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

Recommended Schedule for Secondary Education

First and/or Second Year

- MSSE 101. Orientation to the Profession *1.00*
- PSYC 160. Life Span Human Development [C5SD] *3.00*
- EDUC 300. Foundations of American Education *3.00*

Additional Information

Students must declare the secondary education pre-professional licensure program and be fully admitted into Teacher Education prior to enrolling in the remaining courses. Contact the departmental office to determine the requirements for admission to teacher education. The first three courses listed are corequisite offerings and must be completed before enrolling in the next three courses which are also corequisites.

Third and/or Fourth Year

- EDUC 310. Teaching in a Diverse Society *3.00*
- MSSE 370. General Instructional Methods for Grades 6-12 *3.00*
- MSSE 371. Clinical Experience in Adolescent Education *1.00*
- MSSE 470. Content Methods Course for Middle School *3 Credit Hours*
- MSSE 471. Content Area Field Experience in Middle Schools *3 Credit Hours*¹
- LED 440. Disciplinary Literacy in Secondary Education *3.00*

Total: 23 Credit Hours

Footnote

¹ Students are responsible for transportation to field placements at local schools.

Graduate Courses

Before beginning the graduate portion of the professional program, candidates must meet all criteria for admission to teacher education and for admission to the Graduate School (e.g., 2.7 or higher GPA, passing Praxis Subject Assessment scores). Candidates are expected to complete the admission processes early in their senior year. Candidates must meet all additional requirements of the program and The Graduate School before completing the program. See the Graduate Catalog for additional information. The following courses are required for completion of the graduate portion of the licensure program in secondary education.

Courses

- MSSE 607. Middle and Secondary School Curriculum and Co-Curriculum *3 Credit Hours*
- MSSE 625. Assessment in Secondary Education *3 Credit Hours*
- EDUC 540. Educational Technology *3 Credit Hours*
- EXED 512. Behavior Management in the Classroom *3 Credit Hours*
- MSSE 630. Inquiry in the Classroom *3 Credit Hours*
- EXED 520. Differentiation of Instruction and Academic Collaboration *3 Credit Hours*
- MSSE 570. Content Methods Course for High School *3 Credit Hours*
- MSSE 571. Content Area Field Experience in High School *3 Credit Hours*
- MSSE 675. Internship in Middle and Secondary Education *8 Credit Hours*
- MSSE 650. Internship Seminar *3 Credit Hours*

Total: 35 Credit Hours

Program Advising

First-year candidates planning to become teachers in secondary schools must enroll in MSSE 101. Orientation to the Profession. Candidates should contact an education adviser concerning job opportunities in the various secondary subject areas, proper sequence of education courses, practicum opportunities in local secondary schools and special programs. By consulting regularly with their program adviser in secondary education, candidates can continually evaluate their academic objectives.

Vocational Education Courses

For persons employed by school divisions, to teach in vocational programs, the following courses are available and can be used by trade and industrial education teachers to upgrade their provisional license to the technical professional teaching license.

Courses

- PSYC 160. Life Span Human Development [C5SD] 3.00
- EDUC 490. Special Topics in Education 1.00 - 4.00
- VOED 383. Curriculum & Instructional Procedures in Vocational Education 3.00

Total: 9 Credit Hours

Mission

The James Madison University Army ROTC Duke Battalion mission is to recruit, develop, educate and provide quality leadership training, practical hands-on experience and Army values character development in order to commission agile and adaptive leaders to serve as the future officer leadership in the Army, Army Reserve or Army National Guard. Additionally, it is our mission to motivate young people through caring leadership to be better citizens committed to lifelong service of the community and nation.

Goals

The program offers two, three and four year options, allowing students to complete the requirements to earn a commission as an Army officer. The three and four year programs consist of a basic course and an advanced course. A two year option allows students with at least two academic years remaining in either undergraduate or graduate studies to complete all requirements for commissioning as a second lieutenant in the active Army, Army National Guard or Army Reserves. Additionally, students not intending to pursue a career in the military will gain valuable leadership, teambuilding and communication skills, which transfer into marketable civilian job skills.

Career Opportunities and Marketable Skills

Army ROTC provides students with highly marketable leadership skills. The curriculum imparts leadership principles, concepts of human development, and aspects of health and fitness. Practical application of classroom instruction in lab develops one's leadership style, communication and organizational skills, and strengthens personal character. Development of these skills implicitly builds one's self-confidence, discipline and professional attributes.

Army Reservists or Army National Guardsmen who are continuing their education full time may be eligible for the Simultaneous Membership Program, which combines Reserve Forces duty with Army ROTC on campus and enables the student to earn approximately \$5,000 in two years. Graduates of the program earn an Army commission and may serve four years in career areas as diverse as medical service, signal, infantry, law enforcement, aviation or nursing.

There are also opportunities for students seeking graduate degrees to delay going on active duty in order to pursue a graduate study program in law, medicine or other subjects. Further, Army ROTC scholarships are competitive for graduate students with no prior Army ROTC experience.

Co-curricular Activities and Organizations

- Color Guard
- JMU Cannon Crew
- JMU Ranger Group
- Scabbard and Blade Military Honor Society
- Army Ten Miler Team
- Ranger Challenge

Special Admission and Retention Requirements

Advanced military science courses are normally taken during the junior and senior years, or during graduate school. Qualified students pursuing a commission as a second lieutenant are contracted and paid a subsistence allowance of \$300-\$500 per month for up to 10 months during the school year. Prior to commissioning, each cadet must successfully complete the four-week ROTC Leader Development Assessment Course (LDAC) at Ft. Knox, Kentucky. Cadets must maintain at least a 2.0 GPA, meet DoD medical fitness standards and meet Army physical fitness and weight control standards.

Mission Statement

The Air Force ROTC program is designed to recruit, educate and commission officer candidates through college campus programs based on Air Force requirements. Units are located at 145 college and university campuses throughout the United States and Puerto Rico. Students from schools near Air Force ROTC host institutions can attend classes through 1025 separate crosstown enrollment programs or consortium agreements.

Goals

The Air Force Reserve Officers' Training Corps (AFROTC) at James Madison University is established under a cross-town agreement with the University of Virginia. JMU students will take AFROTC classes at the University of Virginia for JMU credit. AFROTC provides a program of leadership development that prepares college men and women for service as commissioned officers in the United States Air Force. After graduation, they assume active duty positions in both flying and non-flying specialties. To accomplish this, the Department of Air Science recruits, selects, retains and commissions officer candidates as second lieutenants in the United States Air Force. AFROTC:

- Provides ethics and values education, stressing the Air Force core values of integrity first, service before self and excellence in all we do.
- Prepares cadets to be commissioned as second lieutenants through a curriculum that develops leadership and management skills and provides opportunities to use these skills in a variety of practical applications.
- Provides an understanding of how to lead and influence small organizations, with a strong emphasis on personal integrity, honor and individual responsibility. The techniques of effective leadership and quality management are stressed to achieve mission accomplishment.
- Enhances the cadets' understanding of the role of the military in society and provides an in-depth orientation to history and tradition of the Air Force and how the Air Force serves the nation. This goal is reinforced by summer hands-on leadership training and career orientation opportunities at Air Force bases around the country.
- Provides programs and experiences that increase self-confidence, self-discipline, accountability, physical stamina, poise and other traits essential to the development of a leader of character who is prepared to serve the nation in and out of uniform. The curriculum and leader development programs of the Department of Air Science are mentally and physically challenging. Cadets learn basic military skills and participate in physical conditioning program starting in the first year. The program moves progressively from followership to leadership experiences and culminates with the fourth-year class cadets planning, organizing and administering all leadership training for the cadet wing. On-campus instruction is conducted both in the classroom by Air Force officers and in the field environment by both officer and cadet leaders. A demanding summer field training encampment prior to the junior year prepares the cadet for acceptance into the commissioning track.

Air Force ROTC offers four-and three-year tracks. All cadets must complete four credits of AFROTC academics prior to a four-week summer encampment. The three-year track cadets must complete both first and second year academic courses during their first year in ROTC. Students who have Junior ROTC, other-service ROTC, national guard, reserve or active duty military experience may request credit and advanced placement.

Unless the student earns an AFROTC scholarship, there is no service obligation inside the first two years of the four year program. However, all students who enter into the Professional Officer Course (the last two years) enter into a contractual obligation with the Air Force to serve on active duty upon commissioning.

After graduation and commissioning as second lieutenants in the Air Force, graduates serve in any number of career fields for a four-year active duty service commitment. Interested and qualified students may compete to become Air Force pilots, combat systems officers (CSO), air battle managers (ABM) or remotely piloted aircraft pilots (RPA). Successful pilot candidates serve a 10 year active duty service commitment, and CSO, ABM or RPA candidates incur a six year active duty service commitment after completion of career field training.

Co-curricular Activities and Organizations

- Arnold Air Society
- Drill Team

Special Admission and Retention Requirements

The Professional Officer Course is normally taken during the junior and senior years. Qualified students pursuing a commission as a second lieutenant are contracted and paid a subsistence allowance of \$300-\$500 per month. Cadets must maintain at least a 2.5 GPA, meet DoD medical fitness standards and meet Air Force physical fitness and weight control standards.

AFROTC Scholarships

Merit-based financial scholarships may be offered to highly academically competitive and qualified students already enrolled in the program. Awardees may be offered an AFROTC scholarship for full or partial college tuition, incidental fees and textbook allowances and a monthly subsistence allowance of \$300-\$500 depending on academic year. Scholarship students incur a military obligation after their first year.

Degree Requirements

The Leadership Laboratory (LLab) course taken during the first year is a weekly laboratory that touches on the topics of Air Force customs and courtesies, health and physical fitness, and drill and ceremonies. The second year LLab course provides students with the opportunity to demonstrate fundamental management skills and prepares them for Field Training. The third year LLab course provides the opportunity to develop fundamental management skills while planning and conducting cadet activities. Finally, the fourth year LLab course provides the opportunity to use leadership skills in planning and conducting cadet activities. It prepares students for commissioning and entry into the active-duty Air Force.

The air science curriculum is divided into two phases:

Phase One: General Military Courses

- AIRS 100. Leadership Laboratory *0.00* (every semester)
- AIRS 110. The Foundations of the United States Air Force I *1.00* (fall, first year)
- AIRS 120. The Foundations of the United States Air Force II *1.00* (spring, first year)
- AIRS 210. The Evolution of Air and Space Power I *1.00* (fall, second year)
- AIRS 220. The Evolution of Air and Space Power II *1.00* (spring, second year)

Total: 4 Credit Hours

Phase Two: Professional Officer Courses

- AIRS 100. Leadership Laboratory *0.00* (every semester)
- AIRS 310. Concepts of Air Force Leadership and Management I *3.00* (fall, third year)
- AIRS 320. Concepts of Air Force Leadership and Management II *3.00* (spring, third year)
- AIRS 410. National Security Affairs/Preparation for Active Duty I *3.00* (fall, fourth year)
- AIRS 420. National Security Affairs/Preparation for Active Duty II *3.00* (spring, fourth year)

Total: 12 Credit Hours

Military Leadership Minor

Minor Requirements

Courses

- Basic military science courses *16 Credit Hours*
- Advanced military science courses *24 Credit Hours*
- Military History course (MSCI 150) *3 Credit Hours*

Total: 43 Credit Hours

Military Science

Degree Requirements

The Military Science curriculum is divided into two phases:

Phase One: Basic Military Science

- MSCI 100. Leadership Laboratory *2.00* (two semesters)
- MSCI 101. Introduction to Leadership and the Army *2.00*
- MSCI 102. Leadership Development Fundamentals *2.00*
- MSCI 200. Intermediate Leadership Laboratory *2.00* (two semesters)
- MSCI 201. Leadership Styles - Theory and Application *2.00*
- MSCI 202. Developing Leader Skills *2.00*

Total: 16 Credit Hours

Note on basic military science

The basic course is open to all JMU students. There is no military obligation incurred for taking 100- and 200-level military science courses. This curriculum is designed to help students in the near-term as leaders on campus. The classes will also help

students be more effective leaders in the long-term, whether they serve in the military or as leaders in civilian life. Topics addressed include problem solving, critical thinking, problem-solving methods, leadership theory, followership, group cohesion, goal setting, feedback mechanisms, physical fitness and land navigation.

Lessons are taught in a seminar format, emphasizing student discussions and practical exercises. Courses are open to all students with no prerequisites and no military obligation. Students must enroll in both the lab and the classroom instruction.

Placement credit for the basic course may be awarded through multiple programs including: prior military service, basic training, or successful completion of the ROTC summer leadership training course at Ft. Knox, Ky.

Phase Two: Advanced Military Science

- MSCI 300. Advanced Leadership Laboratory *3.00* (two semesters)
- MSCI 310. Leading Small Organizations *3.00*
- MSCI 320. Developing Advanced Leader Skills *3.00*
- MSCI 400. Advanced Leadership Laboratory II *3.00* (two semesters)
- MSCI 410. Seminar Command Management *3.00*
- MSCI 420. Seminar on Officership Transition *3.00*

Total: 24 Credit Hours

Note on advanced military science

The advanced course focuses on instruction and case studies which build leadership competencies and military skills in preparation for future responsibilities as Army officers and successful completion of the Leader Development Assessment Course (LDAC) at Ft. Knox, KY. Instruction includes the principles of war, decision-making processes, planning models and risk assessment. Advanced leadership instruction focuses on motivational theory, the role and actions of leaders, and organizational communications. Courses are only open to advanced course-contracted cadets with prerequisites and a military obligation is incurred

Scholarships

Contact the department's enrollment officers at (540) 568-3633 for scholarship information.

Mission

The mission of the School of Music is to provide the highest level of musical training in a comprehensive program that prepares students in conducting, music education, music industry, music performance, theory, composition and music history and to prepare them to be thoughtful and productive citizens. Specifically, the school's mission is to:

- Select undergraduate and graduate majors and minors who have demonstrated a commitment to developing their musical skills and talents.
- Motivate music enthusiasts to explore musical concepts by exposing them to and including them in music performance, composition and education.
- Foster a sense of community that encourages intellectual curiosity, creative endeavor, cultural diversity and respect for various perspectives.
- Encourage excellence from faculty members as educators, researchers, performers, clinicians and supporters so that they develop students into motivated, competent professionals and outstanding world citizens.
- Provide music majors and non-music majors with knowledge of music and develop appropriate skill levels and musicianship.
- Offer curricula that prepare students to be professionals in music performance, composition, education or industry.
- Broaden students' understanding of music through innovative teaching, creative experiences and scholarly research.
- Provide a wide variety of cultural events for the JMU and Shenandoah Valley communities.
- Expose students to current technology employed in the music field, such as computers, music instruction software, electronic devices, and advanced audio and visual equipment.
- Prepare D.M.A. students to teach at the college level, not just in their principal areas but also in many of the core curriculum classes, such as theory, music history and music appreciation.

The School of Music is an accredited institutional member of the National Association of School of Music.

Objectives

The ten major degree concentrations are each designed to establish a set of skills and a knowledge base necessary for success as a practitioner in specific career areas in the broad field of music. These objectives are achieved through School of Music classes:

- Through core music classes, students will attain a general level of functional musicianship sufficient to begin and sustain a professional career in the music field.
- To gain awareness and basic competency in composition and analysis of the standard forms and styles of western music.
- To gain a broad historical perspective on the development of the forms and styles of western music, as well as diverse world musics.
- To develop a knowledge base enabling the placement of music within stylistic and chronological eras through cues that can be aurally identified.
- To develop a minimal ability to use a piano keyboard in the study, analysis and performance of music.
- To learn and practice the basic skills of conducting a musical ensemble and leading a rehearsal.
- Through attendance at musical performances, students will gain awareness and acceptance of a broad variety of music, as well as of the traditional practices of concert musicians through listening to and watching others perform.
- Through specialized classes in each concentration, students will attain skills and attitudes necessary for the establishment and maintenance of a career as a professional musician.

- Students in all concentrations will take weekly lessons in a primary instrument until they have mastered the skills of performance on that instrument sufficiently well to pass the graduation level for the specific concentration and to successfully complete a senior recital in performance or composition.
- Students in all concentrations will perform regularly in both solo and ensemble situations, allowing them to gain a variety of professional-level performing experiences. At least one ensemble per semester is required of all music students until they have completed all the major requirements for the B.M. degree.
- Students in all concentrations will take specialized classes at the upper levels to learn the skills and more concentrated knowledge bases of the individual concentration areas. These classes may be aimed at developing a broad survey knowledge of music literature or history in a particular segment of the repertoire, or at the discovery and development of skills needed in the field but not necessarily to be mastered through individual practice and performance.
- In some major concentrations, internships are required that put the student into the work world in a supervised off-campus learning activity designed to give practical workplace experience in the field.

Career Opportunities

The various programs offered by the school can lead students to a wide range of careers. Programs in performance or composition are intended for students who desire to continue their musical training in graduate programs that will prepare them for professional careers in performance, composition and/or teaching at the college level.

Those who elect the emphasis in music industry will be prepared for positions in a broad area of music-business occupations and for admission to graduate professional schools of business.

The music education program prepares students to teach vocal and/or instrumental music in public schools.

The music theatre program is designed to prepare vocal music majors for the field of popular Broadway musical theatre performance as well as for careers in opera and operetta.

The jazz studies program prepares students for the rigors of graduate study in jazz performance, equips students with the jazz vocabulary necessary for professional performance, and provides knowledge and skills necessary for employment in private instruction or as a jazz specialist in public schools.

The following list of careers is only a small sample of possibilities:

- Artists' manager
- Composer
- Conductor
- Entertainment lawyer
- Music educator
- Music journalist
- Music librarian
- Music software developer
- Orchestra manager
- Performing artist
- Professional accompanist
- Professor/teacher
- Record producer

Co-curricular Activities and Organizations

These activities are open to all JMU students without audition:

- Concert Band
- Marching Royal Dukes
- Men's and Women's Choruses

These activities are open to all JMU students with audition or instructor permission:

- Bach Aria Group
- Brass Ensembles
- Camerata Strings
- Chamber Orchestra
- Chorale
- Clarinet Choir
- Collegium Musicum
- Flute Choir
- Guitar Ensemble
- Horn Choir
- Jazz Band
- Jazz Chamber Ensembles
- Jazz Ensemble
- Madison Singers
- Opera Theatre
- Opera Theatre Orchestra
- Percussion Ensemble
- Piano Accompanying
- Steel Drum Band
- String Ensembles
- Symphonic Band
- Symphony Orchestra
- Treble Chamber Choir
- Trombone Choir
- Trumpet Ensemble
- Tuba and Euphonium Ensemble
- Wind Symphony
- Woodwind Ensembles

Admission Requirements

Students choosing to major in music must possess a solid background and experience in the performance medium they elect for their major, and they should display sufficient musical talent to indicate promise in their field.

To be considered for undergraduate admission to the music program, all entering first year students, transfer students and previously enrolled students seeking re-admission must complete the following:

- Submit an application for admission to JMU's Office of Admission.
- Submit the Undergraduate Music Audition Application to select an audition date.
- Successfully complete an audition.

Audition guidelines may be found on the music website.

Students are encouraged to contact the applied faculty on their area of performance expertise with specific questions about their audition. General questions about the music degree programs may be answered by an admissions assistant at (540) 568-3851 or by sending a message to music_admit@jmu.edu.

Audition, Exam and Placement Test

No student will be accepted into the music degree programs until an audition is successfully completed and passed. A piano placement test will also be taken but has no bearing on acceptance. The piano test primarily determines keyboard skills class-level placement.

All candidates are expected to perform the entrance audition on one of the scheduled audition dates. The school does not encourage special appointments and will arrange them only when applicants have serious conflicts with the scheduled auditions.

Because assessing a student's ability through a recorded performance is difficult, only students who live at great distances are encouraged to send audition recordings. All recordings submitted must be of high quality and demonstrate the student's ability.

The audition should reveal the student's highest level of musical attainment. Appropriate literature in at least two varying styles and tempos is suggested so that the school can evaluate the candidate's ability accurately. If you have specific questions regarding appropriate audition literature, please contact the applied professor of your area of performance.

In addition to meeting the audition requirements above, all students who intend to major in the Bachelor of Music, emphasis in music industry or the music industry minor are required to first complete MUI 221 and then enroll in MUI 231 and MUI 230. To successfully complete MUI 230, prospective majors and minors must submit a portfolio for review, showing evidence of their interest and potential for success in the music industry. The portfolio should represent work completed in the above classes with assistance in resume preparation from Career and Academic Planning. Portfolios will be reviewed once each fall and once each spring semester. Following the portfolio review, students who are recommended for the major or minor will be eligible to register for upper level music industry classes. Students who are not recommended for admission to the major or minor may reapply the following semester. To obtain the schedule of portfolio review sessions, as well as other specific information about the admission process, contact the School of Music, music industry area.

Students who score a 4 or 5 on the Music Theory – Aural Subscore Advanced Placement exam may bypass a diagnostic test administered by the school.

All major concentrations in the School of Music require potential candidates to develop additional qualifications before full admission to the concentrations. These gateways are generally attempted at the end of the first or second year in the major. For additional details, see the School of Music's Undergraduate Music Student Handbook.

Class Fees

There is a once per semester fee for enrollment in MUAP 200, MUAP 214 and MUAP 300. Applied Music Lesson (Undergraduate). See MyMadison for details.

Music Scholarships

The entrance audition also serves as the scholarship audition. All music scholarships are awarded on the basis of merit. Recorded auditions will not qualify a prospective student for consideration to receive a music scholarship.

A transfer student on scholarship at another school can only be considered for a scholarship at JMU if the music executive of the current school sends a written release to the director of the School of Music.

Retention Policy

Students admitted as music majors must meet school standards published in the School of Music Student Handbook to continue. To ensure that these standards are met, the Music Academic Review Coordinator examines each music major's progress at the end of each semester in accordance with policies stated in the handbook.

Music majors must earn a minimum grade of "C-" in all music courses required for their degree. In situations where courses are sequential, with prerequisites (for example, MUS 141-MUS 142 , MUS 241-MUS 242 , or MUS 100-MUS 101-MUS 202-MUS 303), if a grade lower than "C-" is earned, it does not constitute fulfillment of the prerequisite. A student who wishes to take MUS 142 must first pass MUS 141, with a "C-" or higher.

General Music Minor

Minor Requirements

General Music Minor¹

Open to all JMU undergraduate students, the general music minor develops both the performing and non-performing musician's understanding of music. The minor requires the successful completion of six hours drawn from three areas – fundamentals, literature and history, and electives – for a total of 18 credit hours. Students must earn 50 percent of the required curriculum at JMU.

Required Courses

Fundamentals: 3-6 Credit Hours

- MUS 131. Fundamentals of Music *3.00*
- MUS 140. Introduction to Music Theory and Aural Skills *4.00*

Literature and History: 6-9 Credit Hours

- MUS 200. Music in General Culture [C2VPA] *3.00*
- MUS 203. Music in America [C2VPA] *3.00*
- MUS 206. Introduction to Global Music [C2VPA] *3.00*
- MUS 356. History of Jazz in America *3.00*
- MUS 357. Music Theatre History and Analysis *3.00*

- MUS 373. Music History *3.00*
or
- MUS 374. Music History *2.00*
or
- MUS 375. Music History *3.00*

Electives – Any music course may count in this category: 6 Credit Hours

- All music ensembles
- MUJ 221. Survey of Music Industry *3.00*
- MUJ 315. Songwriting *3.00*
- MUJ 422. Concert Production & Promotion *3.00*
- MUED 380. Music in the Elem School *2.00*
- MUS 204. History of Rock *3.00*

- MUS 240. Jazz Improvisation Laboratory I *2.00*
or
- MUS 440. Jazz Improvisation Laboratory II *2.00*

Total: 18 Credit Hours

Footnote

¹ The minor in music does not qualify a student to teach music in Virginia public schools.

Jazz Studies Minor

Jazz Studies Minor

Open to all undergraduate students at JMU, the jazz studies minor helps students majoring in other disciplines understand and perform the jazz art form. The minor requires the successful completion of 15 credit hours in specified music courses and five credit hours in jazz ensembles. Students must earn 50 percent of the required curriculum at JMU.

Required Courses

Fundamentals: 15 credits total

- MUS 240. Jazz Improvisation Laboratory I *2.00*
- MUS 356. History of Jazz in America *3.00*
- MUS 440. Jazz Improvisation Laboratory II *2.00* (repeat three times)

Choose one four-credit option:

- MUS 140. Introduction to Music Theory and Aural Skills *4.00*
or
- MUS 141. Foundations of Music Theory *3.00* and
- MUS 143. Aural Skills I *1.00*

Ensembles (choose from the following): 5 Credit Hours

- MUAP 347. Jazz Ensemble *2.00*
- MUAP 348. Jazz Band *1.00*
- MUAP 355. Jazz Chamber Ensemble *1.00*

Total: 20 Credit Hours

Jazz Studies, B.M.

Bachelor of Music Degree

The Bachelor of Music degree offers six specialized majors: performance, composition, music industry, music education, jazz studies and music theatre. All music majors must complete the General Education program and a 30 credit hour core program of music courses common to all the majors' curricula. The remaining hours are specified under each of the various majors and concentrations.

All undergraduate music majors must perform on the primary instrument in one assigned ensemble each semester when one or more of the following indicators applies:

- They are enrolled for a minimum of 12 credit hours on campus.
- They are enrolled for applied lessons on the primary instrument.
- They have not completed all of the requirements in the music major.
- They are not enrolled in an off-campus internship or in student teaching.

While students are required to participate in only one ensemble each semester, they are encouraged to take advantage of the many performance opportunities offered by the School of Music by participating in more than one ensemble. For information regarding the ensemble audition process, see the Undergraduate Music Student Handbook.

If piano is the primary instrument, see the specific requirements in the Undergraduate Music Student Handbook.

All music students should enroll in class piano each semester until they meet the keyboard skills requirements appropriate to their specific degree or concentration. Graduating seniors must participate in assessment activities including assessment day, as represented by MUS 220.

Another vital aspect of the programs is attendance at recitals and concerts. Attending these events contributes to the breadth of students' knowledge of music literature. Hearing performances also allows students to observe performing techniques from the student to the professional levels. Consequently, undergraduate music majors must attend a minimum of 10 recitals per semester for six semesters, totaling 60 attendances during their degree studies. Students must continue to register for MUS 195 until they fulfill this requirement.

Degree Requirements

Required Courses

- General Education courses *35-41 Credit Hours*¹
- Core music program courses *30 Credit Hours*
- Major concentration courses and electives *54-62 Credit Hours*

Total: 128-131 Credit Hours

Footnote

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

Major Requirements

Required Courses

- MUS 143. Aural Skills I *1.00*
- MUS 144. Aural Skills II *1.00*
- MUS 195. Recital Attendance *0.00* (six semesters)
- MUS 206. Introduction to Global Music [C2VPA] *3.00*¹
- MUS 220. Assessment Tests – School of Music *0.00*
- MUS 243. Aural Skills III *1.00*
- MUS 244. Aural Skills IV *1.00*
- MUS 317. Basic Conducting *2.00*
- MUS 373. Music History *3.00*
- MUS 374. Music History *2.00*
- MUS 375. Music History *3.00*

Choose one of the following: 1 Credit Hour

- MUS 101. Keyboard Skills II *1.00* (required for music industry majors and prerequisite for MUS 202-MUS 303)
- MUS 303. Keyboard Skills IV *1.00* (all music majors except music industry; must be passed prior to student teaching)

Written Music Theory Path One: 6 Credit Hours

Choose this path if you have passed the music theory diagnostic exam. None of the courses in this section may be repeated for credit.

- MUS 241. Diatonic and Chromatic Harmony *3.00*
- MUS 252. Analysis of Music 1900-1950 *3.00*
or
- MUS 253. Analysis of Music 1950-Present *3.00*

Choose two of the following courses: 6 Credit Hours

None of the courses in this section may be repeated for credit.

- MUS 250. Form and Analysis: Baroque and Classical *3.00*
- MUS 251. Form and Analysis: Romantic *3.00*
- MUS 252. Analysis of Music 1900-1950 *3.00*
- MUS 253. Analysis of Music 1950-Present *3.00*
- MUS 254. Form and Analysis: Popular Music *3.00*
- MUS 256. Contrapuntal Techniques *3.00*

Path One Total: 12 Credit Hours

Written Music Theory Path Two: 9 Credit Hours

Choose this path if you have not successfully passed the music theory diagnostic exam. None of the courses in this section may be repeated for credit.

- MUS 141. Foundations of Music Theory *3.00*
- MUS 241. Diatonic and Chromatic Harmony *3.00*
- MUS 252. Analysis of Music 1900-1950 *3.00*
- or
- MUS 253. Analysis of Music 1950-Present *3.00*

Choose one of the following: 3 Credit Hours

None of the courses in this section may be repeated for credit.

- MUS 250. Form and Analysis: Baroque and Classical *3.00*
- MUS 251. Form and Analysis: Romantic *3.00*
- MUS 252. Analysis of Music 1900-1950 *3.00*
- MUS 253. Analysis of Music 1950-Present *3.00*
- MUS 254. Form and Analysis: Popular Music *3.00*
- MUS 256. Contrapuntal Techniques *3.00*

Path Two Total: 12 Credit Hours

Total: 30 Credit Hours

Footnote

¹ MUS 206 will count for the Music Core and also for the General Education, Cluster Two, Part 2 if desired. There will be a specific music major section of MUS 206 offered once each academic year.

Recommended Schedule for First Year Majors

The first year of study shares a common curriculum for all concentrations. The year is devoted to courses from the basic music core requirements, General Education courses, ensemble participation and applied study in the major applied area.

First Year

First Semester

- MUS 141. Foundations of Music Theory *3.00*
- MUS 143. Aural Skills I *1.00*
- MUS 195. Recital Attendance *0.00*
- WRTC 103. Rhetorical Reading and Writing [C1W] *3.00*
- Applied music major course *2 Credit Hours*
- Music ensemble course *1-2 Credit Hours*
- General Education courses (from Cluster One) *6 Credit Hours*

Choose one of the following (According to placement decision): 1 Credit Hour

- MUS 100. Keyboard Skills *1.00*
- MUS 101. Keyboard Skills II *1.00*
- MUS 202. Keyboard Skills III *1.00*
- MUS 303. Keyboard Skills IV *1.00*

Total: 15-16 Credit Hours

Second Semester

- MUS 144. Aural Skills II *1.00*
- MUS 195. Recital Attendance *0.00*
- Applied music major course *2 Credit Hours*
- Music ensemble course *1-2 Credit Hours*
- General Education courses (MUS 206 and final course from Cluster One) *6 Credit Hours*

Choose one of the following: 1 Credit Hour

- MUS 101. Keyboard Skills II *1.00*
- MUS 202. Keyboard Skills III *1.00*
- MUS 303. Keyboard Skills IV *1.00*

Total: 14-15 Credit Hours

Additional Information

For a recommended eight-semester outline of curricular requirements for each major concentration, see the School of Music's Undergraduate Music Student Handbook.

Bachelor of Music in Jazz Studies

Coordinator: Dr. Charles Dotas

Phone: (540) 568-6180

Degree Requirements

Required Courses

- General Education courses *38-41 Credit Hours*¹
- Core music program courses *30 Credit Hours*
- Major concentration courses and electives *60 Credit Hours*

Total: 128-131 Credit Hours

Footnote

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

Major Requirements

Courses

Additional requirements: Admission to the Jazz Studies program by successful completion of Level 4 in applied music study (primary instrument) and jazz performance audition, no sooner than end of second year as approved music major.

- MUS 146. Jazz Theory and Ear Training 2.00
- MUS 305. Jazz Keyboard Skills 1.00
- MUAP 300. Applied Music Lesson (Undergraduate) 1.00 - 3.00 (Jazz Study, Level 5-8) ²
- MUS 345. Small Ensemble Jazz Arranging 3.00
- MUS 346. Large Ensemble Jazz Arranging 3.00
- MUS 356. History of Jazz in America 3.00
- MUS 395. Junior or Senior Half Recital 0.00 ³
- MUS 440. Jazz Improvisation Laboratory II 2.00 ⁴
- MUS 495. Senior Graduation Recital 1.00
- MUED 473. Jazz Ensemble Procedures and Techniques 2.00
- MUAP 355. Jazz Chamber Ensemble 1.00 (in addition to major ensemble requirement) ⁵
- Applied music study (primary instrument), Level 1-4 8 Credit Hours ⁶
- Ensembles (one each semester) 8 Credit Hours ⁷
- Approved jazz electives 5 Credit Hours ⁸

Total: 60 Credit Hours

Footnotes

² Applied Jazz Study (3 credit hours) taken after acceptance into the Jazz Studies program. Applied Jazz Study (2 credit hours) recommended for students interested in preparing for the Jazz Studies audition. Student must be enrolled in Applied Jazz Study during the semesters in which the Half Recital and Graduation Recital are presented.

³ Presented at the end of the junior year, jazz repertoire.

⁴ MUS 440 is a corequisite with Applied Jazz Study and can be repeated each semester.

⁵ Students accepted into the Jazz Studies program must enroll in MUAP 355 each semester until graduation.

⁶ To be taken during the first and second years. Students accepted into Jazz Studies program may continue applied music study (in addition to applied jazz study) with consent of primary applied instructor.

⁷ Prior to acceptance into Jazz Studies program, ensemble placement determined by primary instrument applied faculty and Ensemble Committee. Students accepted into the Jazz Studies program must enroll in MUAP 347. Jazz Ensemble (or MUAP 348. Jazz Band with jazz studies coordinator permission) each semester until graduation. Students in the Jazz Studies program are encouraged to continue participation in additional School of Music ensembles.

⁸ Approved electives include: MUS 446. Jazz Composition, MUS 480. Advanced Seminar in Musicological Topics and MUS 485. Advanced Jazz Topics Seminar.

Music Composition, B.M.

Bachelor of Music Degree

The Bachelor of Music degree offers six specialized majors: performance, composition, music industry, music education, jazz studies and music theatre. All music majors must complete the General Education program and a 30 credit hour core program of music courses common to all the majors' curricula. The remaining hours are specified under each of the various majors and concentrations.

Total: 14-15 Credit Hours

Additional Information

For a recommended eight-semester outline of curricular requirements for each major concentration, see the School of Music's Undergraduate Music Student Handbook.

Bachelor of Music in Composition

Coordinator: Dr. Jason Haney

Phone: (540) 568-6664

Degree Requirements

Required Courses

- General Education courses *38-41 Credit Hours* ¹
- Core music program courses *30 Credit Hours*
- Major concentration courses and electives *61 Credit Hours*

Total: 129-132 Credit Hours

Footnote

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

Major Requirements

Courses

Additional requirements: Admission to this concentration by approval of theory/composition faculty. Grades no lower than "B" in all theory and composition courses.

- MUS 253. Analysis of Music 1950-Present *3.00* ¹
- MUS 256. Contrapuntal Techniques *3.00* ²
- MUS 352. Music Composition *2.00 - 3.00*
- MUS 435. Instrumentation *3.00*
- MUS 445. Orchestration *3.00*
- MUS 450. Topics in Music Analysis *3.00* ³
- MUS 480. Advanced Seminar in Musicological Topics *3.00* ⁴
- MUS 495. Senior Graduation Recital *1.00*
- Applied major study *12 Credit Hours*
- Ensembles (one each semester) *8 Credit Hours* ⁵
- Approved music electives *2 Credit Hours* ⁶

Total: 60 Credit Hours

Footnotes

¹MUS 253 must be taken in addition to MUS 252, which is required as part of the 4 courses in the music theory core. In other words, composition majors should take both MUS 252 and MUS 253.

²MUS 256 must be taken in addition to the 4 courses required as part of the music theory core.

³Must include two different iterations of MUS 450.

⁴ The MUS 480 requirement will be fulfilled by taking the class when the seminar focuses on a topic within the past century. MUS 480 can also be repeated to fulfill the requirements for a music literature elective or the approved music electives.

⁵ Various ensembles approved by adviser.

⁶ Approved music electives may not be fulfilled by additional ensemble credits.

Music Education, Instrumental Track, B.M.

Endorsement in Both Vocal and Instrumental Music

Students desiring licensure in both instrumental and vocal music should consult the coordinator of music education to plan their programs.

Additional Information

For a recommended eight-semester outline of curricular requirements for each major concentration, see the School of Music's Undergraduate Music Student Handbook.

Bachelor of Music in Music Education

Phone: (540) 568-6753

The Bachelor of Music degree in Music Education is designed primarily for those preparing to teach vocal or instrumental music in public schools. In addition to the School of Music requirements outlined below, students seeking a degree in music education must meet all the criteria for admission to the teacher education program and complete the professional education sequence for teaching licensure.

Teaching Licensure Requirements

Students who want to pursue the music education program must earn acceptance into the teaching licensure program offered by the College of Education.

Professional Education Sequence

Required Courses

- EDUC 300. Foundations of American Education *3.00*
- MUED 480. Student Teaching *6.00-12.00* (senior year)
- PSYC 160. Life Span Human Development [C5SD] *3.00*
Pre-adolescent and Adolescent Child
- LED 420. Content Area Literacy, K-12 *2.00*

Total: 20 Credit Hours

Instrumental Track

(Applied study in winds, strings, percussion, piano) ¹

Degree Requirements

Required Courses

- General Education courses *38-41 Credit Hours* ²
- Core music program courses *30 Credit Hours*
- Major concentration courses and electives *42-43 Credit Hours*
- Professional education sequence *20 Credit Hours*

Total: 130-134 Credit Hours

Footnotes

¹ Students whose major instrument is piano must pass an interview with music education faculty, an audition on a band or orchestra instrument, and participate in instrumental ensembles each semester except for two during which they must elect MUAP 357. Piano Accompanying and Piano Ensemble. Performance in these ensembles will be on the secondary instrument with one semester on piano permitted as ensemble needs dictate.

² PSYC 160 may double count as a Cluster Five course in General Education

Major Requirements

Courses

- MUED 200. Small Ensemble for Instrumental Music Education Majors *0.00*
- MUED 271. Music Education: A Professional Choice *1.00*
- MUED 273. Music Education: Professional Practice *1.00*
- MUED 310. Vocal Techniques *1.00*
- MUED 371. Beginning Methods and Materials for Instrumental Music *2.00*
- MUED 373. Advanced Methods and Materials for Instrumental Music *2.00*
- MUS 150. Introduction to Technological Applications in Music *1.00*
- MUS 319. Intermediate Instrumental Conducting *2.00*
- MUS 395. Junior or Senior Half Recital *0.00*
- MUS 442. Instrumental Arranging *3.00*
- Applied music study (major instrument) *13 Credit Hours*
- Ensembles (one each semester for seven semesters) *7 Credit Hours*^{2,3}

Instrumental Techniques classes

One credit required in major instrument area. Two credits are required in other three instrumental areas. In the case of piano students, two credits are required in each instrument area for a total of eight credits.

- MUED 301. Woodwind Techniques- MUED 302. Woodwind Techniques
- MUED 303. Brass Techniques-MUED 304. Brass Techniques
- MUED 305. Percussion Techniques- MUED 306. Percussion Techniques
- MUED 307. String Techniques- MUED 308. String Techniques

Choose one of the following: 2 Credit Hours

- MUED 470. Marching Band Procedures *2.00*
- MUED 472. Survey String Orch Rep *2.00*
- MUED 474. Guitar Pedagogy and Classroom Methods *2.00*

Total: 42-43 Credit Hours

Footnote

² Wind and percussion majors are required to participate in marching band for a minimum of two years, but participation every year is recommended.

³ Students whose major instrument is piano must pass an interview with music education faculty, an audition on a band or orchestra instrument, and participate in instrumental ensembles each semester except for two during which they must elect MUAP 357. Piano Accompanying and Piano Ensemble.

Additional Information

Performance in these ensembles will be on the secondary instrument with one semester on piano permitted as ensemble needs dictate.

Music Education, Vocal Track, B.M.

Endorsement in Both Vocal and Instrumental Music

Students desiring licensure in both instrumental and vocal music should consult the coordinator of music education to plan their programs.

Bachelor of Music Degree

The Bachelor of Music degree offers six specialized majors: performance, composition, music industry, music education, jazz studies and music theatre. All music majors must complete the General Education program and a 30 credit hour core program of music courses common to all the majors' curricula. The remaining hours are specified under each of the various majors and concentrations.

All undergraduate music majors must perform on the primary instrument in one assigned ensemble each semester when one or more of the following indicators applies:

- They are enrolled for a minimum of 12 credit hours on campus.
- They are enrolled for applied lessons on the primary instrument.
- They have not completed all of the requirements in the music major.
- They are not enrolled in an off-campus internship or in student teaching.

While students are required to participate in only one ensemble each semester, they are encouraged to take advantage of the many performance opportunities offered by the School of Music by participating in more than one ensemble. For information regarding the ensemble audition process, see the Undergraduate Music Student Handbook.

If piano is the primary instrument, see the specific requirements in the Undergraduate Music Student Handbook.

All music students should enroll in class piano each semester until they meet the keyboard skills requirements appropriate to their specific degree or concentration. Graduating seniors must participate in assessment activities including assessment day, as represented by MUS 220.

Another vital aspect of the programs is attendance at recitals and concerts. Attending these events contributes to the breadth of students' knowledge of music literature. Hearing performances also allows students to observe performing techniques from the student to the professional levels. Consequently, undergraduate music majors must attend a minimum of 10 recitals per semester for six semesters, totaling 60 attendances during their degree studies. Students must continue to register for MUS 195 until they fulfill this requirement.

Degree Requirements

Required Courses

- General Education courses *35-41 Credit Hours*¹
- Core music program courses *30 Credit Hours*
- Major concentration courses and electives *54-62 Credit Hours*

Total: 128-131 Credit Hours

Footnote

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

Major Requirements

Required Courses

- MUS 143. Aural Skills I *1.00*
- MUS 144. Aural Skills II *1.00*
- MUS 195. Recital Attendance *0.00* (six semesters)
- MUS 206. Introduction to Global Music [C2VPA] *3.00*¹
- MUS 220. Assessment Tests – School of Music *0.00*
- MUS 243. Aural Skills III *1.00*
- MUS 244. Aural Skills IV *1.00*
- MUS 317. Basic Conducting *2.00*
- MUS 373. Music History *3.00*
- MUS 374. Music History *2.00*
- MUS 375. Music History *3.00*

Choose one of the following: 1 Credit Hour

- MUS 101. Keyboard Skills II *1.00* (required for music industry majors and prerequisite for MUS 202-MUS 303)
- MUS 303. Keyboard Skills IV *1.00* (all music majors except music industry; must be passed prior to student teaching)

Written Music Theory Path One: 6 Credit Hours

Choose this path if you have passed the music theory diagnostic exam. None of the courses in this section may be repeated for credit.

- MUS 241. Diatonic and Chromatic Harmony *3.00*
- MUS 252. Analysis of Music 1900-1950 *3.00*
- or
- MUS 253. Analysis of Music 1950-Present *3.00*

Choose two of the following courses: 6 Credit Hours

None of the courses in this section may be repeated for credit.

- MUS 250. Form and Analysis: Baroque and Classical *3.00*
- MUS 251. Form and Analysis: Romantic *3.00*
- MUS 252. Analysis of Music 1900-1950 *3.00*
- MUS 253. Analysis of Music 1950-Present *3.00*
- MUS 254. Form and Analysis: Popular Music *3.00*
- MUS 256. Contrapuntal Techniques *3.00*

Path One Total: 12 Credit Hours

Written Music Theory Path Two: 9 Credit Hours

Choose this path if you have not successfully passed the music theory diagnostic exam. None of the courses in this section may be repeated for credit.

- MUS 141. Foundations of Music Theory *3.00*
- MUS 241. Diatonic and Chromatic Harmony *3.00*
- MUS 252. Analysis of Music 1900-1950 *3.00*
or
- MUS 253. Analysis of Music 1950-Present *3.00*

Choose one of the following: 3 Credit Hours

None of the courses in this section may be repeated for credit.

- MUS 250. Form and Analysis: Baroque and Classical *3.00*
- MUS 251. Form and Analysis: Romantic *3.00*
- MUS 252. Analysis of Music 1900-1950 *3.00*
- MUS 253. Analysis of Music 1950-Present *3.00*
- MUS 254. Form and Analysis: Popular Music *3.00*
- MUS 256. Contrapuntal Techniques *3.00*

Path Two Total: 12 Credit Hours

Total: 30 Credit Hours

Footnote

¹ MUS 206 will count for the Music Core and also for the General Education, Cluster Two, Part 2 if desired. There will be a specific music major section of MUS 206 offered once each academic year.

Recommended Schedule for First Year Majors

The first year of study shares a common curriculum for all concentrations. The year is devoted to courses from the basic music core requirements, General Education courses, ensemble participation and applied study in the major applied area.

First Year

First Semester

- MUS 141. Foundations of Music Theory *3.00*
- MUS 143. Aural Skills I *1.00*
- MUS 195. Recital Attendance *0.00*
- WRTC 103. Rhetorical Reading and Writing [C1W] *3.00*
- Applied music major course *2 Credit Hours*
- Music ensemble course *1-2 Credit Hours*
- General Education courses (from Cluster One) *6 Credit Hours*

Choose one of the following (According to placement decision): 1 Credit Hour

- MUS 100. Keyboard Skills *1.00*

- MUS 101. Keyboard Skills II *1.00*
- MUS 202. Keyboard Skills III *1.00*
- MUS 303. Keyboard Skills IV *1.00*

Total: 15-16 Credit Hours

Second Semester

- MUS 144. Aural Skills II *1.00*
- MUS 195. Recital Attendance *0.00*
- Applied music major course *2 Credit Hours*
- Music ensemble course *1-2 Credit Hours*
- General Education courses (MUS 206 and final course from Cluster One) *6 Credit Hours*

Choose one of the following: 1 Credit Hour

- MUS 101. Keyboard Skills II *1.00*
- MUS 202. Keyboard Skills III *1.00*
- MUS 303. Keyboard Skills IV *1.00*

Total: 14-15 Credit Hours

Additional Information

For a recommended eight-semester outline of curricular requirements for each major concentration, see the School of Music's Undergraduate Music Student Handbook.

Bachelor of Music in Music Education

Phone: (540) 568-6753

The Bachelor of Music degree in Music Education is designed primarily for those preparing to teach vocal or instrumental music in public schools. In addition to the School of Music requirements outlined below, students seeking a degree in music education must meet all the criteria for admission to the teacher education program and complete the professional education sequence for teaching licensure.

Teaching Licensure Requirements

Students who want to pursue the music education program must earn acceptance into the teaching licensure program offered by the College of Education.

Professional Education Sequence

Required Courses

- EDUC 300. Foundations of American Education *3.00*
- MUED 480. Student Teaching *6.00-12.00* (senior year)

- PSYC 160. Life Span Human Development [C5SD] 3.00
Pre-adolescent and Adolescent Child
- LED 420. Content Area Literacy, K-12 2.00

Total: 20 Credit Hours

Vocal Track

(Applied study in voice or piano)

Degree Requirements

Required Courses

- General Education courses 38-41 *Credit Hours*¹
- Core music program courses 30 *Credit Hours*
- Major concentration courses and electives 42 *Credit Hours*
- Professional education sequence 20 *Credit Hours*

Total: 130-133 Credit Hours

Footnote

¹ PSYC 160 may double count as a Cluster Five course in General Education.

Major Requirements

Courses

- MUED 201. Small Ensemble for Vocal Music Education Majors 0.00
- MUED 206. Instrumental Music Methods for Vocal MUED Majors 1.00
- MUED 271. Music Education: A Professional Choice 1.00
- MUED 273. Music Education: Professional Practice 1.00
- MUED 372. General Music Practices 2.00
- MUED 376. Choral Music Mat & Tech 2.00
- MUED 380. Music in the Elem School 2.00
- MUED 471. School Musical, Jazz and Show Choir Procedures 2.00
- MUS 120. Diction for Singers 1.00
- MUS 121. Diction for Singers II 1.00
- MUS 150. Introduction to Technological Applications in Music 1.00
- MUS 318. Intermediate Choral Conducting 2.00
- MUS 395. Junior or Senior Half Recital 0.00
- MUS 441. Vocal Arranging 3.00
- MUS 477. Vocal Pedagogy 2.00
- Applied major study (voice or keyboard) 12 *Credit Hours*
- Applied secondary area (voice for piano majors; MUS 304. Advanced Keyboard Skills for voice majors) 2 *Credit Hours*¹
- Ensembles (one each semester for seven semesters) 7 *Credit Hours*²

Total: 42 Credit Hours

Footnotes

¹ Vocal majors must pass the Advanced Keyboard Skills exam.

² Piano majors may elect MUAP 357. Piano Accompanying and Piano Ensemble for two semesters.

Music Industry Minor

Music Industry Minor

Open to all JMU undergraduate students, the music industry minor provides students majoring in other disciplines with a foundation for exploring career opportunities in the entertainment industry. The minor requires successful completion of MUI 221. Survey of Music Industry; MUI 231. Legal Aspects of Music Industry and of an additional 12 elective credit hours. Students must earn 50 percent of the required curriculum at JMU.

Required Courses

- MUI 221. Survey of Music Industry *3.00*
- MUI 231. Legal Aspects of Music Industry *3.00*
- MUI 230. Music Industry Gateway *0.00*

Electives – Any MUI course may count in this category: 12 Credit Hours

- MUI 324. Introduction to Audio Devices *3.00*
- MUI 330. Music Publishing *3.00*
- MUI 400. Multitrack Rec Tech I *3.00*
- MUI 405. Logic Pro *3.00*
- MUI 315. Songwriting *3.00*
- MUI 411. Audio Postproduction *3.00*
- MUI 422. Concert Production & Promotion *3.00*
- MUI 430. Artist Management *3.00*
- MUI 435. Marketing of Recorded Music *3.00*
- MUI 440. Entrepreneurship in Music Industry *3.00*
- MUI 492. Internship in Mus Ind *3.00 - 6.00*

Total: 18 Credit Hours

Music Performance, Instrumental Track, B.M.

Bachelor of Music Degree

The Bachelor of Music degree offers six specialized majors: performance, composition, music industry, music education, jazz studies and music theatre. All music majors must complete the General Education program and a 30 credit hour core program of music courses common to all the majors' curricula. The remaining hours are specified under each of the various majors and concentrations.

All undergraduate music majors must perform on the primary instrument in one assigned ensemble each semester when one or more of the following indicators applies:

- They are enrolled for a minimum of 12 credit hours on campus.
- They are enrolled for applied lessons on the primary instrument.
- They have not completed all of the requirements in the music major.
- They are not enrolled in an off-campus internship or in student teaching.

While students are required to participate in only one ensemble each semester, they are encouraged to take advantage of the many performance opportunities offered by the School of Music by participating in more than one ensemble. For information regarding the ensemble audition process, see the Undergraduate Music Student Handbook.

If piano is the primary instrument, see the specific requirements in the Undergraduate Music Student Handbook.

All music students should enroll in class piano each semester until they meet the keyboard skills requirements appropriate to their specific degree or concentration. Graduating seniors must participate in assessment activities including assessment day, as represented by MUS 220.

Another vital aspect of the programs is attendance at recitals and concerts. Attending these events contributes to the breadth of students' knowledge of music literature. Hearing performances also allows students to observe performing techniques from the student to the professional levels. Consequently, undergraduate music majors must attend a minimum of 10 recitals per semester for six semesters, totaling 60 attendances during their degree studies. Students must continue to register for MUS 195 until they fulfill this requirement.

Degree Requirements

Required Courses

- General Education courses *35-41 Credit Hours*¹
- Core music program courses *30 Credit Hours*
- Major concentration courses and electives *54-62 Credit Hours*

Total: 128-131 Credit Hours

Footnote

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

Major Requirements

Required Courses

- MUS 143. Aural Skills I *1.00*
- MUS 144. Aural Skills II *1.00*
- MUS 195. Recital Attendance *0.00* (six semesters)
- MUS 206. Introduction to Global Music [C2VPA] *3.00*¹
- MUS 220. Assessment Tests – School of Music *0.00*
- MUS 243. Aural Skills III *1.00*
- MUS 244. Aural Skills IV *1.00*
- MUS 317. Basic Conducting *2.00*

- MUS 373. Music History *3.00*
- MUS 374. Music History *2.00*
- MUS 375. Music History *3.00*

Choose one of the following: 1 Credit Hour

- MUS 101. Keyboard Skills II *1.00* (required for music industry majors and prerequisite for MUS 202-MUS 303)
- MUS 303. Keyboard Skills IV *1.00* (all music majors except music industry; must be passed prior to student teaching)

Written Music Theory Path One: 6 Credit Hours

Choose this path if you have passed the music theory diagnostic exam. None of the courses in this section may be repeated for credit.

- MUS 241. Diatonic and Chromatic Harmony *3.00*
- MUS 252. Analysis of Music 1900-1950 *3.00*
or
- MUS 253. Analysis of Music 1950-Present *3.00*

Choose two of the following courses: 6 Credit Hours

None of the courses in this section may be repeated for credit.

- MUS 250. Form and Analysis: Baroque and Classical *3.00*
- MUS 251. Form and Analysis: Romantic *3.00*
- MUS 252. Analysis of Music 1900-1950 *3.00*
- MUS 253. Analysis of Music 1950-Present *3.00*
- MUS 254. Form and Analysis: Popular Music *3.00*
- MUS 256. Contrapuntal Techniques *3.00*

Path One Total: 12 Credit Hours

Written Music Theory Path Two: 9 Credit Hours

Choose this path if you have not successfully passed the music theory diagnostic exam. None of the courses in this section may be repeated for credit.

- MUS 141. Foundations of Music Theory *3.00*
- MUS 241. Diatonic and Chromatic Harmony *3.00*
- MUS 252. Analysis of Music 1900-1950 *3.00*
or
- MUS 253. Analysis of Music 1950-Present *3.00*

Choose one of the following: 3 Credit Hours

None of the courses in this section may be repeated for credit.

- MUS 250. Form and Analysis: Baroque and Classical *3.00*
- MUS 251. Form and Analysis: Romantic *3.00*
- MUS 252. Analysis of Music 1900-1950 *3.00*

- MUS 253. Analysis of Music 1950-Present *3.00*
- MUS 254. Form and Analysis: Popular Music *3.00*
- MUS 256. Contrapuntal Techniques *3.00*

Path Two Total: 12 Credit Hours

Total: 30 Credit Hours

Footnote

¹ MUS 206 will count for the Music Core and also for the General Education, Cluster Two, Part 2 if desired. There will be a specific music major section of MUS 206 offered once each academic year.

Recommended Schedule for First Year Majors

The first year of study shares a common curriculum for all concentrations. The year is devoted to courses from the basic music core requirements, General Education courses, ensemble participation and applied study in the major applied area.

First Year

First Semester

- MUS 141. Foundations of Music Theory *3.00*
- MUS 143. Aural Skills I *1.00*
- MUS 195. Recital Attendance *0.00*
- WRTC 103. Rhetorical Reading and Writing [C1W] *3.00*
- Applied music major course *2 Credit Hours*
- Music ensemble course *1-2 Credit Hours*
- General Education courses (from Cluster One) *6 Credit Hours*

Choose one of the following (According to placement decision): 1 Credit Hour

- MUS 100. Keyboard Skills *1.00*
- MUS 101. Keyboard Skills II *1.00*
- MUS 202. Keyboard Skills III *1.00*
- MUS 303. Keyboard Skills IV *1.00*

Total: 15-16 Credit Hours

Second Semester

- MUS 144. Aural Skills II *1.00*
- MUS 195. Recital Attendance *0.00*
- Applied music major course *2 Credit Hours*
- Music ensemble course *1-2 Credit Hours*
- General Education courses (MUS 206 and final course from Cluster One) *6 Credit Hours*

Choose one of the following: 1 Credit Hour

- MUS 101. Keyboard Skills II *1.00*
- MUS 202. Keyboard Skills III *1.00*
- MUS 303. Keyboard Skills IV *1.00*

Total: 14-15 Credit Hours

Additional Information

For a recommended eight-semester outline of curricular requirements for each major concentration, see the School of Music's Undergraduate Music Student Handbook.

Instrumental Track

Co-coordinators: Dr. Susan Barber, Dr. Carl Donakowski and Prof. Kevin Stees

Phone: (540) 568-6197

Track Degree Requirements

Required Courses

- General Education courses *38-41 Credit Hours*¹
- Core music program courses *30 Credit Hours*
- Major concentration courses and electives *54 Credit Hours*

Total: 122-125 Credit Hours

Footnote

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

Track Major Requirements

Courses

Additional requirements: Admission to this concentration by successful completion of performance audition, no sooner than end of first year as approved music major.

- MUS 319. Intermediate Instrumental Conducting *2.00*
- MUS 395. Junior or Senior Half Recital *0.00*
- MUS 472. Instrumental Pedagogy *1.00*
- MUS 480. Advanced Seminar in Musicological Topics *3.00*²
- MUS 495. Senior Graduation Recital *1.00*
- Applied music courses (major instrument) *22 Credit Hours*
- Chamber ensembles (in addition to the eight semester major ensemble requirement) *6 Credit Hours*
- Ensembles (one each semester) *8 Credit Hours*

- Advanced music literature or seminar elective *3 Credit Hours*
- Approved music electives *6 Credit Hours*³

Music Theory Elective: 3 Credit Hours

Choose one of the following courses that has not previously been taken.

- MUS 250. Form and Analysis: Baroque and Classical *3.00*
- MUS 251. Form and Analysis: Romantic *3.00*
- MUS 252. Analysis of Music 1900-1950 *3.00*
- MUS 253. Analysis of Music 1950-Present *3.00*
- MUS 254. Form and Analysis: Popular Music *3.00*
- MUS 256. Contrapuntal Techniques *3.00*

Total: 54 Credit Hours

Footnotes

² The MUS 480 requirement will be fulfilled by taking the class when the seminar focuses on a topic within the past century. MUS 480 can also be repeated to fulfill the requirements for an advanced music literature elective or the approved music electives.

³ Approved music electives may not be fulfilled by additional ensemble credits. A maximum of two credits may be counted in secondary applied music study.

Music Performance, Piano Track - Subtrack in Accompanying/Coaching, B.M.

Bachelor of Music Degree

The Bachelor of Music degree offers six specialized majors: performance, composition, music industry, music education, jazz studies and music theatre. All music majors must complete the General Education program and a 30 credit hour core program of music courses common to all the majors' curricula. - MUS 319. Intermediate Instrumental Conducting 2.00

Music theory elective. Choose one of the following: 3 credit hours

The chosen course should be one not taken to fulfill the music theory core requirements.

- MUS 250. Form and Analysis: Baroque and Classical 3.00
- MUS 251. Form and Analysis: Romantic 3.00
- MUS 252. Analysis of Music 1900-1950 3.00
- MUS 253. Analysis of Music 1950-Present 3.00
- MUS 254. Form and Analysis: Popular Music 3.00
- MUS 256. Contrapuntal Techniques 3.00

Total: 58 Credit Hours

Footnote

¹ Approved music electives may not be fulfilled by additional ensemble credits.

Music Performance, Piano Track, B.M.

Bachelor of Music Degree

The Bachelor of Music degree offers six specialized majors: performance, composition, music industry, music education, jazz studies and music theatre. All music majors must complete the General Education program and a 30 credit hour core program of music courses common to all the majors' curricula. The remaining hours are specified under each of the various majors and concentrations.

All undergraduate music majors must perform on the primary instrument in one assigned ensemble each semester when one or more of the following indicators applies:

- They are enrolled for a minimum of 12 credit hours on campus.
- They are enrolled for applied lessons on the primary instrument.
- They have not completed all of the requirements in the music major.
- They are not enrolled in an off-campus internship or in student teaching.

While students are required to participate in only one ensemble each semester, they are encouraged to take advantage of the many performance opportunities offered by the School of Music by participating in more than one ensemble. For information regarding the ensemble audition process, see the Undergraduate Music Student Handbook.

If piano is the primary instrument, see the specific requirements in the Undergraduate Music Student Handbook.

All music students should enroll in class piano each semester until they meet the keyboard skills requirements appropriate to their specific degree or concentration. Graduating seniors must participate in assessment activities including assessment day, as represented by MUS 220.

Another vital aspect of the programs is attendance at recitals and concerts. Attending these events contributes to the breadth of students' knowledge of music literature. Hearing performances also allows students to observe performing techniques from the

student to the professional levels. Consequently, undergraduate music majors must attend a minimum of 10 recitals per semester for six semesters, totaling 60 attendances during their degree studies. Students must continue to register for MUS 195 until they fulfill this requirement.

Degree Requirements

Required Courses

- General Education courses *35-41 Credit Hours*¹
- Core music program courses *30 Credit Hours*
- Major concentration courses and electives *54-62 Credit Hours*

Total: 128-131 Credit Hours

Footnote

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

Major Requirements

Required Courses

- MUS 143. Aural Skills I *1.00*
- MUS 144. Aural Skills II *1.00*
- MUS 195. Recital Attendance *0.00* (six semesters)
- MUS 206. Introduction to Global Music [C2VPA] *3.00*¹
- MUS 220. Assessment Tests – School of Music *0.00*
- MUS 243. Aural Skills III *1.00*
- MUS 244. Aural Skills IV *1.00*
- MUS 317. Basic Conducting *2.00*
- MUS 373. Music History *3.00*
- MUS 374. Music History *2.00*
- MUS 375. Music History *3.00*

Choose one of the following: 1 Credit Hour

- MUS 101. Keyboard Skills II *1.00* (required for music industry majors and prerequisite for MUS 202-MUS 303)
- MUS 303. Keyboard Skills IV *1.00* (all music majors except music industry; must be passed prior to student teaching)

Written Music Theory Path One: 6 Credit Hours

Choose this path if you have passed the music theory diagnostic exam. None of the courses in this section may be repeated for credit.

- MUS 241. Diatonic and Chromatic Harmony *3.00*
- MUS 252. Analysis of Music 1900-1950 *3.00*

or

- MUS 253. Analysis of Music 1950-Present 3.00

Choose two of the following courses: 6 Credit Hours

None of the courses in this section may be repeated for credit.

- MUS 250. Form and Analysis: Baroque and Classical 3.00
- MUS 251. Form and Analysis: Romantic 3.00
- MUS 252. Analysis of Music 1900-1950 3.00
- MUS 253. Analysis of Music 1950-Present 3.00
- MUS 254. Form and Analysis: Popular Music 3.00
- MUS 256. Contrapuntal Techniques 3.00

Path One Total: 12 Credit Hours

Written Music Theory Path Two: 9 Credit Hours

Choose this path if you have not successfully passed the music theory diagnostic exam. None of the courses in this section may be repeated for credit.

- MUS 141. Foundations of Music Theory 3.00
- MUS 241. Diatonic and Chromatic Harmony 3.00
- MUS 252. Analysis of Music 1900-1950 3.00
- or
- MUS 253. Analysis of Music 1950-Present 3.00

Choose one of the following: 3 Credit Hours

None of the courses in this section may be repeated for credit.

- MUS 250. Form and Analysis: Baroque and Classical 3.00
- MUS 251. Form and Analysis: Romantic 3.00
- MUS 252. Analysis of Music 1900-1950 3.00
- MUS 253. Analysis of Music 1950-Present 3.00
- MUS 254. Form and Analysis: Popular Music 3.00
- MUS 256. Contrapuntal Techniques 3.00

Path Two Total: 12 Credit Hours

Total: 30 Credit Hours

Footnote

¹ MUS 206 will count for the Music Core and also for the General Education, Cluster Two, Part 2 if desired. There will be a specific music major section of MUS 206 offered once each academic year.

Recommended Schedule for First Year Majors

The first year of study shares a common curriculum for all concentrations. The year is devoted to courses from the basic music core requirements, General Education courses, ensemble participation and applied study in the major applied area.

First Year

First Semester

- MUS 141. Foundations of Music Theory *3.00*
- MUS 143. Aural Skills I *1.00*
- MUS 195. Recital Attendance *0.00*
- WRTC 103. Rhetorical Reading and Writing [C1W] *3.00*
- Applied music major course *2 Credit Hours*
- Music ensemble course *1-2 Credit Hours*
- General Education courses (from Cluster One) *6 Credit Hours*

Choose one of the following (According to placement decision): 1 Credit Hour

- MUS 100. Keyboard Skills *1.00*
- MUS 101. Keyboard Skills II *1.00*
- MUS 202. Keyboard Skills III *1.00*
- MUS 303. Keyboard Skills IV *1.00*

Total: 15-16 Credit Hours

Second Semester

- MUS 144. Aural Skills II *1.00*
- MUS 195. Recital Attendance *0.00*
- Applied music major course *2 Credit Hours*
- Music ensemble course *1-2 Credit Hours*
- General Education courses (MUS 206 and final course from Cluster One) *6 Credit Hours*

Choose one of the following: 1 Credit Hour

- MUS 101. Keyboard Skills II *1.00*
- MUS 202. Keyboard Skills III *1.00*
- MUS 303. Keyboard Skills IV *1.00*

Total: 14-15 Credit Hours

Additional Information

For a recommended eight-semester outline of curricular requirements for each major concentration, see the School of Music's Undergraduate Music Student Handbook.

Piano Track

Coordinator: Dr. Lori Piitz

Phone: (540) 568-6646

Track Degree Requirements

Required Courses

- General Education courses *38-41 Credit Hours*¹
- Core music program courses *30 Credit Hours*
- Major concentration courses and electives *56 Credit Hours*

Total: 124-127 Credit Hours

Footnote

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

Track Major Requirements

Courses

Additional requirements: Admission to this concentration by successful completion of performance audition, no sooner than end of first year as approved music major.

- MUS 371. Private Piano Pedagogy *3.00*
- MUS 372. Supervised Private Piano Teaching *1.00*
- MUS 395. Junior or Senior Half Recital *0.00*
- MUS 420. Piano Technology *1.00 - 2.00*
- MUS 450. Topics in Music Analysis *3.00*
- MUS 460. Piano Literature I *2.00*
- MUS 470. Piano Literature II *2.00*
- MUS 480. Advanced Seminar in Musicological Topics *3.00*²
- MUS 495. Senior Graduation Recital *1.00*
- Applied piano study *22 Credit Hours*
- Ensembles (one each semester) *8 Credit Hours*
- Approved music electives *3 Credit Hours*³

Music theory elective. Choose one of the following: 3 credit hours

The chosen course should be one not taken to fulfill the music theory core requirements.⁴

- MUS 250. Form and Analysis: Baroque and Classical *3.00*
- MUS 251. Form and Analysis: Romantic *3.00*
- MUS 252. Analysis of Music 1900-1950 *3.00*

- MUS 253. Analysis of Music 1950-Present 3.00
- MUS 254. Form and Analysis: Popular Music 3.00
- MUS 256. Contrapuntal Techniques 3.00

Total: 56 Credit Hours

Footnotes

² Must include two different iterations of MUS 480. Advanced Seminar in Musicological Topics.

³ Approved music electives may not be fulfilled by additional ensemble credits.

⁴Course may not have already been taken as part of the music theory core curriculum. In other words, piano performance majors should be selecting a fifth course from the music theory menu of options.

- MUS 195. Recital Attendance *0.00*
- Applied music major course *2 Credit Hours*
- Music ensemble course *1-2 Credit Hours*
- General Education courses (MUS 206 and final course from Cluster One) *6 Credit Hours*

Choose one of the following: 1 Credit Hour

- MUS 101. Keyboard Skills II *1.00*
- MUS 202. Keyboard Skills III *1.00*
- MUS 303. Keyboard Skills IV *1.00*

Total: 14-15 Credit Hours

Additional Information

For a recommended eight-semester outline of curricular requirements for each major concentration, see the School of Music's Undergraduate Music Student Handbook.

Bachelor of Music with an Emphasis in Music Industry

Coordinator: Dr. David Cottrell

Phone: (540) 568-6303

Degree Requirements

Required Courses

- General Education courses *38-41 Credit Hours*¹
- Core music program courses *30 Credit Hours*
- Major concentration courses and electives *57 Credit Hours*

Total: 128 Credit Hours

Footnote

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

Major and Emphasis Requirements

Courses

- ACTG 244. Accounting for Non-Business Majors *3.00*
- MGT 305. Management and Organizational Behavior *3.00*
- MKTG 380. Principles of Marketing *3.00*
- MUJ 221. Survey of Music Industry *3.00*
- MUJ 231. Legal Aspects of Music Industry *3.00*
- MUJ 230. Music Industry Gateway *0.00*
- MUJ 440. Entrepreneurship in Music Industry *3.00*
- MUJ 492. Internship in Mus Ind *3.00 - 6.00*
- Applied major study *14 Credit Hours*
- Ensembles (one each semester for seven semesters) *7 Credit Hours*
- Music industry electives *12 Credit Hours*
- Approved music electives *3 Credit Hours*¹
- MUS 395. Junior or Senior Half Recital *0.00*

Total: 57 Credit Hours

Footnote

¹ Approved music electives may not be fulfilled by additional ensemble credits.

Music, Music Theatre Emphasis, B.M.

Bachelor of Music Degree

The Bachelor of Music degree offers six specialized majors: performance, composition, music industry, music education, jazz studies and music theatre. All music majors must complete the General Education program and a 30 credit hour core program of music courses common to all the majors' curricula. The remaining hours are specified under each of the various majors and concentrations.

All undergraduate music majors must perform on the primary instrument in one assigned ensemble each semester when one or more of the following indicators applies:

- They are enrolled for a minimum of 12 credit hours on campus.
- They are enrolled for applied lessons on the primary instrument.
- They have not completed all of the requirements in the music major.
- They are not enrolled in an off-campus internship or in student teaching.

While students are required to participate in only one ensemble each semester, they are encouraged to take advantage of the many performance opportunities offered by the School of Music by participating in more than one ensemble. For information regarding the ensemble audition process, see the Undergraduate Music Student Handbook.

If piano is the primary instrument, see the specific requirements in the Undergraduate Music Student Handbook.

All music students should enroll in class piano each semester until they meet the keyboard skills requirements appropriate to their specific degree or concentration. Graduating seniors must participate in assessment activities including assessment day, as represented by MUS 220.

Another vital aspect of the programs is attendance at recitals and concerts. Attending these events contributes to the breadth of students' knowledge of music literature. Hearing performances also allows students to observe performing techniques from the student to the professional levels. Consequently, undergraduate music majors must attend a minimum of 10 recitals per semester for six semesters, totaling 60 attendances during their degree studies. Students must continue to register for MUS 195 until they fulfill this requirement.

Degree Requirements

Required Courses

- General Education courses *35-41 Credit Hours* ¹
- Core music program courses *30 Credit Hours*
- Major concentration courses and electives *54-62 Credit Hours*

Total: 128-131 Credit Hours

Footnote

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

Major Requirements

Required Courses

- MUS 143. Aural Skills I *1.00*
- MUS 144. Aural Skills II *1.00*
- MUS 195. Recital Attendance *0.00* (six semesters)
- MUS 206. Introduction to Global Music [C2VPA] *3.00* ¹
- MUS 220. Assessment Tests – School of Music *0.00*
- MUS 243. Aural Skills III *1.00*
- MUS 244. Aural Skills IV *1.00*
- MUS 317. Basic Conducting *2.00*
- MUS 373. Music History *3.00*
- MUS 374. Music History *2.00*
- MUS 375. Music History *3.00*

Choose one of the following: 1 Credit Hour

- MUS 101. Keyboard Skills II *1.00* (required for music industry majors and prerequisite for MUS 202-MUS 303)
- MUS 303. Keyboard Skills IV *1.00* (all music majors except music industry; must be passed prior to student teaching)

Written Music Theory Path One: 6 Credit Hours

Choose this path if you have passed the music theory diagnostic exam. None of the courses in this section may be repeated for credit.

- MUS 241. Diatonic and Chromatic Harmony *3.00*

- MUS 252. Analysis of Music 1900-1950 3.00
- or
- MUS 253. Analysis of Music 1950-Present 3.00

Choose two of the following courses: 6 Credit Hours

None of the courses in this section may be repeated for credit.

- MUS 250. Form and Analysis: Baroque and Classical 3.00
- MUS 251. Form and Analysis: Romantic 3.00
- MUS 252. Analysis of Music 1900-1950 3.00
- MUS 253. Analysis of Music 1950-Present 3.00
- MUS 254. Form and Analysis: Popular Music 3.00
- MUS 256. Contrapuntal Techniques 3.00

Path One Total: 12 Credit Hours

Written Music Theory Path Two: 9 Credit Hours

Choose this path if you have not successfully passed the music theory diagnostic exam. None of the courses in this section may be repeated for credit.

- MUS 141. Foundations of Music Theory 3.00
- MUS 241. Diatonic and Chromatic Harmony 3.00
- MUS 252. Analysis of Music 1900-1950 3.00
- or
- MUS 253. Analysis of Music 1950-Present 3.00

Choose one of the following: 3 Credit Hours

None of the courses in this section may be repeated for credit.

- MUS 250. Form and Analysis: Baroque and Classical 3.00
- MUS 251. Form and Analysis: Romantic 3.00
- MUS 252. Analysis of Music 1900-1950 3.00
- MUS 253. Analysis of Music 1950-Present 3.00
- MUS 254. Form and Analysis: Popular Music 3.00
- MUS 256. Contrapuntal Techniques 3.00

Path Two Total: 12 Credit Hours

Total: 30 Credit Hours

Footnote

¹ MUS 206 will count for the Music Core and also for the General Education, Cluster Two, Part 2 if desired. There will be a specific music major section of MUS 206 offered once each academic year.

Recommended Schedule for First Year Majors

The first year of study shares a common curriculum for all concentrations. The year is devoted to courses from the basic music core requirements, General Education courses, ensemble participation and applied study in the major applied area.

First Year

First Semester

- MUS 141. Foundations of Music Theory *3.00*
- MUS 143. Aural Skills I *1.00*
- MUS 195. Recital Attendance *0.00*
- WRTC 103. Rhetorical Reading and Writing [C1W] *3.00*
- Applied music major course *2 Credit Hours*
- Music ensemble course *1-2 Credit Hours*
- General Education courses (from Cluster One) *6 Credit Hours*

Choose one of the following (According to placement decision): 1 Credit Hour

- MUS 100. Keyboard Skills *1.00*
- MUS 101. Keyboard Skills II *1.00*
- MUS 202. Keyboard Skills III *1.00*
- MUS 303. Keyboard Skills IV *1.00*

Total: 15-16 Credit Hours

Second Semester

- MUS 144. Aural Skills II *1.00*
- MUS 195. Recital Attendance *0.00*
- Applied music major course *2 Credit Hours*
- Music ensemble course *1-2 Credit Hours*
- General Education courses (MUS 206 and final course from Cluster One) *6 Credit Hours*

Choose one of the following: 1 Credit Hour

- MUS 101. Keyboard Skills II *1.00*
- MUS 202. Keyboard Skills III *1.00*
- MUS 303. Keyboard Skills IV *1.00*

Total: 14-15 Credit Hours

Additional Information

For a recommended eight-semester outline of curricular requirements for each major concentration, see the School of Music's Undergraduate Music Student Handbook.

Bachelor of Music with an Emphasis in Music Theatre

Director of Opera and Music Theatre: Dr. Don Rierson

Phone: (540) 568-4164

Degree Requirements

Required Courses

- General Education courses *38-41 Credit Hours*¹
- Core music program courses *30 Credit Hours*
- Major concentration courses and electives *54 Credit Hours*

Total: 122-125 Credit Hours

Footnote

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

Major and Emphasis Requirements

Courses

Additional requirements: Admission to this concentration by successful completion of performance audition, no sooner than end of first year as approved music major.

- MUJ 221. Survey of Music Industry *3.00*
- MUS 120. Diction for Singers *1.00*
- MUS 121. Diction for Singers II *1.00*
- MUS 357. Music Theatre History and Analysis *3.00*
- or
- THEA 357. Music Theatre History and Analysis *3.00*
- MUS 395. Junior or Senior Half Recital *0.00*
- MUS 465. Opera History and Literature *3.00*
- THEA 251. Acting I: Basic Acting *3.00*
- THEA 353. Music Theatre Performance *2.00*
- Applied voice study *16 Credit Hours*
- Approved music, theatre or dance electives *2 Credit Hours*²
- Ensembles (one each semester, as listed below) *8 Credit Hours*³

Choose one of the following: 3 Credit Hours

- STAD 171. Performance Production *3.00*
- THEA 273. Design Aspects of Performance *3.00*

Choose one of the following courses: 2-3 Credit Hours

- THEA 261. Voice for the Stage 3.00
- THEA 303. Topics in Theater 1.00 - 3.00
- THEA 351. Acting II: Intermediate Acting 3.00
- THEA 454. Advanced Music Theatre Performance 2.00

Choose two of the following: 4-5 Credit Hours

- DANC 245. Dance Improvisation (0, 4) 2.00
- MUS 343. Basic Movement and Acting Skills for the Opera Stage 2.00
- THEA 281. Movement for the Actor 3.00

Choose two dance classes of appropriate level from modern, ballet, ballroom, jazz or tap: 4 Credit Hours

- DANC 140. Elementary Modern Dance (0, 4) 2.00
- DANC 440. Advanced Modern Dance (0, 4) 2.00
- DANC 142. Elementary Ballet (0, 4) 2.00
- DANC 442. Advanced Ballet (0, 4) 2.00
- DANC 144. Ballroom Dance (0, 4) 2.00
- DANC 146. Jazz Dance (0, 4) 2.00
- DANC 446. Advanced Jazz 2.00
- DANC 147. Tap Dance (0, 4) 2.00
- DANC 247. Intermediate Tap 2.00

Total: 54 Credit Hours

Footnotes

² Approved music electives may not be fulfilled by additional ensemble credits.

³ Bachelor of Music in music theatre majors must participate in MUAP 343. Opera Theatre, in an on-stage capacity for at least three semesters. They may elect to fill the ensemble requirement in their remaining semesters by taking any of the credited vocal ensembles of the school – Men's or Women's Chorus; Treble Chamber Choir; Chorale; Madison Singers; Opera Theatre. A minimum of one credit of ensemble must be selected each semester.

Assistant Professors

H. Buchanan, M. Choshi, L. Donovan, D. Elkins, J. Gandy, B. Herron, B. Houlahan, K. Jagiello, T. Kiser, C. Lam, M. Leisen, J. Robinson, D. Schminkey, J. Sutherland

Instructors

C. Brown, L. Carmines, C. Fasching-Maphis, M. Fox, J. Haynes, L. Mullen, N. Puffenbarger, H. Soper, S. Stowell Condra, K. Weeks

Lecturers

S. Beckler, C. Atkinson, L. Childers, M. Defibaugh, B. Landes, J. Secrist, T. Whelden

Mission

We engage students, faculty and communities through dynamic and innovative nursing education, practice and scholarship to influence health in our world.

Vision

To be a SON nationally recognized for academic excellence and innovative contributions to health care.

Values

We are committed to:

- **Integrity:** being honest, sincere and just in all of our endeavors
- **Caring:** sharing compassion, kindness and authenticity with those we encounter
- **Excellence:** pursuing the highest quality in teaching, learning, scholarship and service
- **Collaboration:** cultivating partnerships built on respect, trust and commitment
- **Advocacy:** providing a voice for those we serve and promoting policies that improve healthcare for all
- **Inclusivity:** honoring the richness that diverse perspectives bring to our world
- **Resilience:** achieving inner strength and wisdom by adapting to life's challenges

Career Opportunities and Marketable Skills

- Preparation as a professional nurse leading to a Bachelor of Science in Nursing (B.S.N.) degree.
- Eligibility to take the National Certification and Licensure (NCLEX) Exam to become a registered nurse (R.N.).
- Preparation for entry-level positions in a wide range of health care settings.
- Upon completion of the R.N. – B.S.N. program of study, students may be eligible for leadership positions in a wide range of health care settings.
- Preparation for graduate study in nursing.

Co-curricular Activities and Organizations

- JMU Chapter of the Virginia Nursing Student Association
- Omega Zeta of Sigma Theta Tau International Nursing Honor Society
- B.S.N. Student Advisory Council
- Nursing Students without Borders

Accreditation

The JMU Bachelor of Science in Nursing program is approved by the Virginia Board of Nursing. The baccalaureate and master's programs at James Madison University are accredited by the Commission on Collegiate Nursing Education, 655 K Street, NW, Suite 750, Washington, DC 20001, (202) 463-6930.

Program Options

The School of Nursing offers two program options. The traditional B.S.N. program is designed to prepare undergraduate students to practice at the baccalaureate level of professional nursing. The R.N. to B.S.N. program provides flexible learning opportunities at the baccalaureate level for students who are graduates of community college or diploma schools and are licensed registered nurses (R.N.).

Special Admission and Retention Requirements

Traditional B.S.N. Program

Admission to the nursing program is limited and competitive. Each semester 90 students are admitted into junior level nursing courses. All students, including transfer students, must complete the B.S.N. Admission application following admission to the university. B.S.N. admission applications are available on the nursing school website.

A completed B.S.N. admission application must be received by December 1 to be considered for the following fall semester and by July 1 to be considered for admission for the spring semester of the following year. Students not admitted to the program must reapply to be considered in the applicant pool for the following admission cycle.

To be considered for admission to the nursing major, students must:

- Be currently enrolled as a JMU student as a declared nursing major.
- Transfer students must complete one semester as a full-time student at JMU prior to applying the B.S.N. program.
- Have earned a minimum JMU cumulative GPA of 3.00 as verified by the academic record (Admission is competitive, based on cumulative GPA and nursing prerequisite course grades and limited to a set number of qualified students).
- Have completed and/or enrolled in 36 academic credits at the time of application.
- Complete the following nursing prerequisite courses (or approved equivalents) with a grade of "C-" or higher: CHEM 120, MATH 220 and at least two of the required biology courses (BIO 245, BIO 270 or BIO 290) by the end of the fall semester of the sophomore year (to be considered for the following fall) or by the end of spring semester (to be considered for the following spring).
- Students may elect to repeat up to two courses during their enrollment at JMU on a repeat/forgive basis following university policy. For repeat credit courses specifically, Biology, Chemistry and Statistics at JMU or other institutions which apply to the calculation for admission, the nursing program will average the grade of the repeated course for a final grade used in the admission metric calculation.

In order to begin the nursing program, at time of entry to the first full semester, students must:

- Have completed all required nursing prerequisite courses (CHEM 120, MATH 220, PSYC 160, NUTR 280, BIO 245 , BIO 270 and BIO 290).
- Have completed JMU General Education requirements.
- Maintain a GPA of at least 3.00 or higher.
- Meet the department's technical standards.

Admission criteria are available online. Students must meet the school's technical standards for nursing practice. Technical standards are basic physical, cognitive and psychosocial skills and abilities that are required for nursing practice. The technical standards are posted on the nursing website.

The nursing curriculum is designed as a full time program. The Associate Director for Undergraduate Programs must approve any deviation from the full time enrollment pattern as outlined in the catalog. Once fully admitted to the program, the student must earn a minimum grade of "C-" or "Pass" in each required nursing course to remain in good standing in the nursing program. A grade of "D", "F" or "Fail" is considered a failure. A student who for the first time receives a failure in a nursing course may, with school approval, repeat the course. A student who receives a failure in a second nursing course will not be permitted to continue in the program.

Other academic and related policies in effect for students in the nursing program are outlined on the school website.

R.N. to B.S.N. Program

The R.N. to B.S.N. program provides flexible online learning opportunity for students who are graduates of community college or diploma schools and are licensed registered nurses (R.N.). Classes are offered online to allow students to maintain employment while completing the B.S.N. degree. The program provides a foundation for professional practice and will equip students for further opportunities afforded through graduate study and advance practice.

JMU will award nurses up to 37 experiential learning credits for their prior learning and work experience, as well as 40 transfer credits toward the General Education requirements for a B.S.N.

Six additional co-requisite and thirteen general education credits will be required but may be taken concurrently at a local community college and transferred to JMU for credit. Students will complete 30 credits in the R.N. to B.S.N. program in three semesters of full time study or five semesters of part-time study, thus completing a total of 120 semester hours for the baccalaureate degree. Nurses can apply to the R.N.to B.S.N program after which an academic transcript review will be completed. Additional program eligibility criteria include:

- Associate Degree or Diploma in Nursing from an accredited college/university.
- Completion of the General Education courses required for the Bachelor of Science. May be taken concurrently with nursing course work but must be completed prior to graduation.
- Cumulative GPA of 2.5 or better on a 4-point scale.
- TOEFL scores greater than 570 for international applicants.
- Completion of all prerequisite courses with a grade of "C" or better.
- Current unrestricted R.N. license in any state, Washington, D.C., or a U.S. possession or territory or an equivalent credential in another country.
- Employment as an R.N. for a minimum of four months and/or plans to practice concurrently with course work.
- Graduates of foreign nursing schools, who are licensed outside of the United States, are required to pass the Qualifying Exam of the Commission on Graduates of Foreign Nursing Schools (CGFNS) prior to application and include the exam report with their application materials.
- Ability to meet the school's technical standards for nursing practice (posted on the nursing website).

Admission to the program is contingent on admission to the university.

Once fully admitted to the program, the student must earn a minimum grade of "C-" or "Pass" in each required nursing course to remain in good standing in the nursing program. A grade of "D", "F," "Fail" or "WF" (withdrawn failing) is considered a failure. A student who for the first time receives a failure in a nursing course may, with school approval, repeat the course. A student who receives a failure in a second nursing course will not be permitted to continue in the program.

Special Expenses

A differential tuition of \$90 per credit hour is added to the standard charge for courses carrying the NSG prefix. This charge applies to all students, both in-state and out-of-state, at the undergraduate and graduate levels, with exception of students enrolled in the R.N. to B.S.N. program.

Nursing, B.S.N.

Degree and Major Requirements

Generic B.S.N. Degree Requirements

Required Courses

- General Education, prerequisite and elective courses *59 Credit Hours*¹
- Nursing courses (including nursing electives) *61 Credit Hours*

Total: 120 Credit Hours

Footnote

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

General Education and Nursing Prerequisite Requirements

The following are course prerequisites required for the Nursing major. Courses must be completed with "C-" or higher.

Prerequisites

- PSYC 160. Life Span Human Development [C5SD] *3.00*²
- CHEM 120. Concepts of Chemistry [C3PP] *3.00*¹
- MATH 220. Elementary Statistics [C3QR] *3.00*¹
- BIO 245. General Microbiology (3, 2) *4.00*
- BIO 290. Human Anatomy (3, 3) *4.00*
- BIO 270. Human Physiology (3, 2) [C3NS] *4.00*¹
- NUTR 280. Nutrition for Wellness *3.00*

Footnote

¹ Contained in General Education Cluster Three.

² Contained in General Education Cluster Five.

Total: 24 Credit Hours

Required Courses

- NSG 350. Foundations of Nursing *2.00*

- NSG 351. Health Assessment *3.00*
- NSG 352. Clinical Applications & Reasoning in Nursing Care I *4.00*
- NSG 352L. Clinical Applications & Reasoning in Nursing Care I Clinical *2.00*
- NSG 353. Pathophysiology & Pharmacology *4.00*
- NSG 354. The Art and Science of Nursing *2.00*
- NSG 355. Women's Health *3.00*
- NSG 355L. Women's Health Clinical *1.00*
- NSG 356. Clinical Applications & Reasoning in Nursing Care II *4.00*
- NSG 356L. Clinical Applications & Reasoning in Nursing Care II Clinical *2.00*
- NSG 357. Psychiatric Mental Health Nursing *3.00*
- NSG 357L. Psychiatric Mental Health Nursing Clinical *1.00*
- NSG 450. Nursing Inquiry and Research Methods *3.00*
- NSG 451. Child Health *3.00*
- NSG 451L. Child Health Clinical *1.00*
- NSG 452. Clinical Applications and Reasoning in Nursing Care III *4.00*
- NSG 452L. Clinical Applications & Reasoning III Clinical *2.00*
- NSG 453. Population-Centered Care in the Community *3.00*
- NSG 453L. Population-Centered Care in the Community Clinical *2.00*
- NSG 454. Transition to Practice *3.00*
- NSG 455. Nursing Informatics *2.00*
- NSG 456. Capstone *5.00*
- Nursing Electives *2 Credit Hours*

Total: 61 Credit Hours

Additional Information

Students can seek fall or spring admission to the program. Students must complete 36 credit hours before they will be considered for admission to the program.

Cluster One normally is completed during the first year. General Education courses in clusters two, three, four and five can be scheduled as desired by the student across the first and second years.

Most students can complete general education and prerequisite courses in four semesters, but some students find it necessary to enroll in summer school or an additional year to complete the work satisfactorily.

Major Requirements

Additional information regarding the nursing curriculum can be found on the nursing website.

Junior/Senior Year

Can be taken anytime during junior or senior year.

- Nursing Electives *2 Credit Hours*

First Semester

- NSG 350. Foundations of Nursing *2.00*

- NSG 351. Health Assessment *3.00*
- NSG 352. Clinical Applications & Reasoning in Nursing Care I *4.00*
- NSG 352L. Clinical Applications & Reasoning in Nursing Care I Clinical *2.00*
- NSG 353. Pathophysiology & Pharmacology *4.00*

Total: 15 Credit Hours

Second Semester

- NSG 354. The Art and Science of Nursing *2.00*
- NSG 355. Women's Health *3.00*
- NSG 355L. Women's Health Clinical *1.00*

Professors

C. Bolyard, R. Brown, F. Flannery, J. Goodman, W. Hawk, S. Hoeltzel, A. Kirk, T. Lupher, S. Mittal, W. O'Meara, A. Veltman, A. Wiles

Associate Professors

T. Adajian, P. Fleming, W. Knorpp, A. Levinovitz, M. Piper, A. van Leeuwen

Assistant Professors

R. Fischbach, E. Gravett, C. Kilby, D. Kirkpatrick

Mission

Both philosophy and the academic study of religion prepare students to meet a rapidly changing world. Students completing a philosophy and religion major will be able to think critically, rigorously analyze arguments, listen carefully to the viewpoints of others, construct views that are based on sound reasoning and evidence, and communicate clearly and persuasively in writing and in speaking. They will grapple with the insights of some of the greatest figures in history as they learn to contextualize texts, issues and phenomena to arrive at well-informed and enlightened interpretations.

The department awards a combined major in Philosophy and Religion, with students choosing one of four possible concentrations: philosophy (B.A. or B.S.), religion (B.A. only), interdisciplinary philosophy (B.A. or B.S.) or interdisciplinary religion (B.A. only).

Emphases of the Philosophy Program

Philosophy is a discipline that explores fundamental questions about the meaning of life, the nature of knowledge and the mind, what actions are moral and what exists. Students completing a major with a concentration in philosophy or interdisciplinary philosophy will become versed in the major movements, problems, writings and concepts in the history of Western philosophy. The program concentrates on contemporary movements such as analytic philosophy, existentialism, American philosophy and feminist philosophy, as well as on the major subdivisions of philosophy, including logic, ethics, metaphysics, epistemology, aesthetics, philosophy and law, philosophy of science and philosophy of religion.

Emphases of the Religion Program

The religion program ensures that students gain both breadth, through exposure to an issues-oriented and world religions approach (e.g., Hinduism, Buddhism, Judaism, Christianity, Islam), as well as depth, with specialized knowledge in at least one

religious tradition or area of issues-oriented study. Students completing a major with a concentration in religion or interdisciplinary religion will also gain experience in a range of disciplinary approaches used in the academic study of religion (anthropology, sociology, literary studies, history, aesthetics, linguistics, archaeology, environmental history, etc.) as well as in critical methodologies (e.g. ritual studies, feminist theories, postcolonial theories, to name but a few).

Students completing these concentrations should be able to:

- Apply the approaches of the academic study of religion to texts, rituals and other phenomena while weighing and exploring various cultural and religious perspectives.
- Analyze historical and contemporary expressions of religions in their relevant social, political and cultural contexts.
- Construct informed interpretations of sacred texts by integrating skills in critical reading, critical thinking and contextualization.
- Conduct cogent analyses of historical or contemporary challenges facing one or more religious traditions.
- Pose increasingly sophisticated questions regarding both "solvable" problems as well as "unanswerable" questions about the construction of ultimate reality.
- Immerse oneself in the perspective of persons holding another worldview, stemming from differences in background, religion, heritage, historical period, geographical location, embodiment and/or life experiences.
- Demonstrate proficient written and oral communication in a variety of settings for different audiences, formulating reasonable arguments based on evidence.
- Apply problem solving and critical thinking skills by conducting research or designing projects, exhibiting rigorous inquiry and weighing evidence.
- Practice sound information literacy through verifying the reliability and value of sources, including detecting bias.

Career Opportunities and Marketable Skills

The Philosophy and Religion programs greatly enhance students' ability to navigate a dynamic and changing world by fostering nimbleness of mind, religious and philosophical literacy, a grounding in ethics, a habit of logical thinking, structured and disciplined argumentation, and practices in rigorous analysis. Our programs also equip students with solid skills in analysis, research, writing, speaking and presentations. As a result, our majors find rewarding and meaningful work in a wide variety of career fields. Many students of philosophy and religion find careers in intelligence analysis, government contracting, public health, business, public service, the non-profit sector, the technology sector, education, counseling, university administration or communications. Others have opened their own businesses, and many have attended seminary, graduate school, medical school or law school. Throughout their time in the programs, majors are guided along their career paths with the help of the department as well as the office of Career and Academic Planning. While not requiring a second major, the interdisciplinary philosophy and religion concentrations certainly make it possible to combine this major with many others, which may also enhance students' future employment opportunities.

Student Activities and Organizations in Philosophy and Religion

The department has excellent opportunities for building student community, engaging in student social activities and fostering intellectual development outside of the classroom, including a student-led Religion and Philosophy Society, a philosophy honor society (Phi Sigma Tau), and a religion honor society (Theta Alpha Kappa).

Preparation for Law School

Coordinator: Dr. William Hawk

Email: hawkwj@jmu.edu

Phone: (540) 568-4088

Students who plan to attend law school should seriously consider Philosophy and Religion as an undergraduate major, with a concentration in philosophy or interdisciplinary philosophy. Philosophy majors have historically scored among the highest on the LSAT, GRE and GMAT. Philosophy courses emphasize the kinds of skills that prepare students for the LSAT and the law school curriculum: reading, comprehending and analyzing complex texts; organizing and synthesizing information and drawing reasonable inferences from it; analyzing and evaluating the reasoning and arguments of others; and researching and writing essays and papers.

Law schools recommend that students choose an undergraduate major that challenges them and provides them with an understanding of what shapes human experience. Philosophy does an outstanding job on both counts. The requirements of the major leave students plenty of opportunity to acquire a broad education by exploring other areas.

Preparation for Theological Studies

Coordinator: Dr. Robert Brown

Email: brownre@jmu.edu

Phone: (540) 568-5415

Students join the pre-theology program to prepare for careers in the service of religious communities. Usually, these careers—such as ministry, religious education, counseling and chaplaincy—require specialized training and graduate degrees from theological seminaries, rabbinical schools or university divinity schools. The pre-theology adviser guides students toward courses and experiential learning at JMU that will provide an academic foundation for graduate studies in theology as well as an opportunity to develop their practical skills or vocational gifts. Students in this program may major in any field, although the Association for Theological Schools recommends substantial pre-professional training in philosophy and religion.

In the Department of Philosophy and Religion, pre-theology students will find a robust offering of courses ranging from the interpretation of religious texts to theology and ethics, and from the histories of particular religious traditions to cross-cultural topics in global religion. Class assignments develop students' skills in critical thinking, ethical reasoning, scriptural hermeneutics, and written and oral communication, all of which theological schools highly value. The pre-theology adviser may direct students to relevant courses in foreign languages, social work, non-profit studies, humanitarian affairs, education or justice studies to complement their academic training in religion. Qualified students are encouraged to undertake independent studies or write honors theses in order to explore in greater depth the theological topics most important to them.

The department also offers students the opportunity to receive academic credit for practical supervised field work with social agencies and religious organizations in order to help students explore the particular forms of religious service they would like to pursue. Making connections with faith leaders within their own traditions helps students access larger networks of tradition-specific resources and contacts as they reflect on their goals and decide where to apply for further study in theology. We encourage students to visit various theological schools during the application season and to meet with representatives that the department invites to campus to discuss theology programs with students.

Christian Studies Minor

This minor is designed to provide students with a systematic and comprehensive understanding of the nature and history of Christianity as a religion of global significance. Students begin their studies by exploring the history, beliefs and practices of diverse Christian traditions, from the ancient to the modern. Additional courses address the complex relationship between Christianity and various facets of the contemporary world, such as politics, culture, religious pluralism, terrorism and race.

Required Courses

- REL 202. Introduction to the New Testament 3.00
- REL 340. Introduction to Christianity 3.00
- REL 348. Christianity in Global Context 3.00

Choose three courses from the following, at least two of which must be at the 300- or 400-level: 9 Credit Hours

- REL 201. Introduction to Hebrew Bible/Old Testament 3.00
- REL 218. Philosophy of Religion 3.00
- REL 240. Jesus and the Moral Life 3.00
- REL 280. Religion and Science 3.00
- REL 324. Latinx and Latin American Christianity 3.00
- REL 325. Catholicism in the Modern World 3.00
- REL 332. Born Again Religion 3.00
- REL 336. African-American Religion 3.00
- REL 360. History of Christian Thought 3.00
- REL 363. Apocalypticism, Religious Terrorism and Peace 3.00
- REL 380. Contemporary Theologies 3.00
- REL 450. Religion and Society 3.00
- REL 460. Topics in Ancient Jewish and Early Christian Literature 3.00

Total: 18 Credit Hours

Ethics Minor

Ethics

The 18 hour minor in ethics offers students an opportunity for deeper study into respected ethical thinkers and how ethical theory from philosophy and religion can be used to understand our individual and social lives. Students are to choose six courses total from either of the lists below. At least one of the six must be from the philosophy list, and at least one of the six must be from the religion list. Philosophy or religion majors may double count two courses (6 credits) from their major toward the minor.

Other courses with a sufficiently ethical focus from philosophy, religion, or another department may be able to count towards the minor with the approval of the ethics minor coordinator.

Philosophy

- PHIL 262. Problems in Applied Ethics 3.00
- PHIL 330. Moral Theory 3.00
- PHIL 335. The Individual, the State, and Justice 3.00

- PHIL 350. The Philosophy of Feminism 3.00
- or
- WGSS 350. The Philosophy of Feminism 3.00

- PHIL 367. Topics of Philosophy of Law 3.00
- PHIL 440. Advanced Moral Philosophy 3.00

Religion

- REL 240. Jesus and the Moral Life 3.00

- REL 306. Women and Gender in Islam *3.00*
- REL 309. Jihad in Islamic Traditions *3.00*
- REL 315. Women and Religion *3.00*
- REL 363. Apocalypticism, Religious Terrorism and Peace *3.00*
- or
- IA 363. Apocalypticism, Religious Terrorism and Peace *3.00*

- REL 410. Dharma/Adharma: Hindu Ethical Reasoning *3.00*
- REL 450. Religion and Society *3.00*

Global Religion and Global Issues Minor

Global Religion and Global Issues

The minor is intended for students who want to better understand the role played by religion in contemporary global events: from religious terrorism to nonviolence, from the suppression of women to the advocacy of civil rights. In this minor, students will study major global religions and their impact on real-world social and political issues. The minor may be of particular interest to students in the social sciences but all students with an interest in the subject are welcome.

Required Courses

- REL 101. Religions of the World [C2HQC] *3.00*
- One Global Religious Traditions course 3 Credit Hours
- One Religion and Social/Political Engagement course 3 Credit Hours
- Three electives chosen from either group 9 Credit Hours

Total: 18 Credit Hours

Global Religious Traditions

- REL 250. Islamic Religious Traditions *3.00*
- REL 310. (Re)thinking Order and Chaos: An Introduction to Hinduism *3.00*
- REL 320. Judaism *3.00*
- REL 330. Religions of Africa and the African Diaspora *3.00*
- REL 348. Christianity in Global Context *3.00*
- REL 388. Tibetan Buddhism *3.00*

Religion and Social/Political Engagement

- REL 306. Women and Gender in Islam *3.00*
- REL 309. Jihad in Islamic Traditions *3.00*
- REL 314. Gandhi and the Other 9/11 *3.00*
- REL 315. Women and Religion *3.00*
- REL 363. Apocalypticism, Religious Terrorism and Peace *3.00*
- or
- IA 363. Apocalypticism, Religious Terrorism and Peace *3.00*

- REL 366. Religion, Animals and the Environment *3.00*
- REL 380. Contemporary Theologies *3.00*
- REL 450. Religion and Society *3.00*
- REL 488. Buddhism in the Modern World *3.00*

Philosophy and Religion, Interdisciplinary Philosophy Concentration, B.A.

This option is designed for students who want to concentrate in philosophy but also apply philosophical ideas to work in other departments. Part of the requirements for this concentration is a cognate of nine credit hours from a different but related discipline.

Degree and Major Requirements

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Foreign Language classes (intermediate level required) *0-14 Credit Hours*²
- Philosophy course (in addition to General Education courses) *3 Credit Hours*
- University electives *26-43 Credit Hours*
- Major requirements (listed below) *33-36 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² The foreign language requirement may be satisfied by successful completion of the second semester of the intermediate level of the student's chosen language (typically 232) or by placing out of that language through the Department of Foreign Language's placement test.

Major Requirements

Concentration Core Courses

- PHIL 250. Introduction to Symbolic Logic *3.00*
- PHIL 330. Moral Theory *3.00*
- PHIL 340. Ancient Greek Philosophy *3.00*
- PHIL 341. Modern Philosophy *3.00*

Choose one of the following Metaphysics/Epistemology courses: 3 Credit Hours

Depending on the manner in which they are taught, the following topics classes may be counted toward the metaphysics/epistemology requirement if they are approved by petition to the academic unit head: PHIL 390, PHIL 391 and PHIL 475 .

- REL 218. Philosophy of Religion *3.00*
or
- PHIL 218. Philosophy of Religion *3.00*

- PHIL 300. Knowledge & Belief *3.00*
- PHIL 311. Metaphysics *3.00*
- PHIL 392. Philosophy of Mind *3.00*
- PHIL 394. Self and Identity *3.00*
- PHIL 396. Philosophy of Physics *3.00*
- PHIL 397. Philosophy of Space and Time *3.00*
- PHIL 398. Philosophy of Quantum Theory *3.00*
- PHIL 410. Philosophy of Science *3.00*
- PHIL 420. Philosophy of Language *3.00*

Philosophy electives (nine credits at the 300 level or above): 12 Credit Hours

If the student takes PHIL 101 as part of Cluster Two in the General Education program it can double count as one course of this elective section. Neither PHIL 120 nor PHIL 150 can be used as an elective.

Cognate of three courses from one or more disciplinary areas outside of philosophy: 9 Credit Hours

Total: 36 Credit Hours

Recommended Schedule for Majors

The following outline is a sample four-year program. The actual courses and sequence a student takes may vary.

First Year

- Introductory courses in major *6 Credit Hours*
- B.A. or B.S. Requirements *6-8 Credit Hours*
- General Education courses *6-18 Credit Hours*¹

Total: 30 Credit Hours

Second Year

- Required courses in major *6 Credit Hours*
- B.A. or B.S. Requirements or Electives *6 Credit Hours*
- General Education courses *18 Credit Hours*

Total: 30 Credit Hours

Third Year

- Requirements and electives in philosophy or religion *12 Credit Hours*
- Electives (may be outside of major) *12 Credit Hours*
- General Education courses *6 Credit Hours*

Total: 30 Credit Hours

Footnote

¹ Students should adjust General Education and foreign language load to achieve 30 hours total.

Philosophy and Religion, Interdisciplinary Philosophy Concentration, B.S.

This option is designed for students who want to concentrate in philosophy but also apply philosophical ideas to work in other departments. Part of the requirements for this concentration is a cognate of nine credit hours from a different but related discipline.

Degree and Major Requirements

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Quantitative requirement (in addition to General Education courses) *3 Credit Hours*
- Scientific literacy requirement (in addition to General Education courses) *3-4 Credit Hours*
- Major in Philosophy concentration *33 Credit Hours*
- Electives *40-41 Credit Hours*

Total: 120 Credit Hours

Footnote

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

Major Requirements

Concentration Core Courses

- PHIL 250. Introduction to Symbolic Logic *3.00*
- PHIL 330. Moral Theory *3.00*
- PHIL 340. Ancient Greek Philosophy *3.00*

- PHIL 341. Modern Philosophy 3.00

Choose one Metaphysics/Epistemology courses: 3 Credit Hours

Depending on the manner in which they are taught, the following topics classes may be counted toward the metaphysics/epistemology requirement if they are approved by petition to the academic unit head: PHIL 390, PHIL 391 and PHIL 475 .

- REL 218. Philosophy of Religion 3.00
or
- PHIL 218. Philosophy of Religion 3.00

- PHIL 300. Knowledge & Belief 3.00
- PHIL 311. Metaphysics 3.00
- PHIL 392. Philosophy of Mind 3.00
- PHIL 394. Self and Identity 3.00

- PHIL 397. Philosophy of Space and Time 3.00
- PHIL 398. Philosophy of Quantum Theory 3.00
- PHIL 410. Philosophy of Science 3.00
- PHIL 420. Philosophy of Language 3.00

Philosophy electives (nine credits must be at the 300 level or above): 12 Credit Hours

If the student takes PHIL 101 as part of Cluster Two in the General Education program it can double count as one course of this elective section. Neither PHIL 120 nor PHIL 150 can be used as an elective.

Cognate of three courses from one or more disciplinary areas outside of philosophy: 9 Credit Hours

Total: 36 Credit Hours

Recommended Schedule for Majors

The following outline is a sample four-year program. The actual courses and sequence a student takes may vary.

First Year

- Introductory courses in major 6 Credit Hours
- B.A. or B.S. Requirements 6-8 Credit Hours
- General Education courses 6-18 Credit Hours ¹

Total: 30 Credit Hours

Second Year

- Required courses in major 6 Credit Hours
- B.A. or B.S. Requirements or Electives 6 Credit Hours

- General Education courses *18 Credit Hours*

Total: 30 Credit Hours

Third Year

- Requirements and electives in philosophy or religion *12 Credit Hours*
- Electives (may be outside of major) *12 Credit Hours*
- General Education courses *6 Credit Hours*

Total: 30 Credit Hours

Footnote

¹ Students should adjust General Education and foreign language load to achieve 30 hours total.

Philosophy and Religion, Interdisciplinary Religion Concentration, B.A.

This option is designed for students who want to concentrate in religion but also integrate their work in religion with work in another, complementary disciplinary area. A student electing this option will fulfill the requirements for the regular concentration in religion, with one change: nine credits from one or more disciplinary areas outside of religion (must be chosen in consultation with the adviser) will substitute for six of the religion elective credits required for the concentration in religion. Accordingly, the total required elective credits for the interdisciplinary concentration will be 18 (nine religion elective credits, nine interdisciplinary elective credits), giving a total of 36 credit hours to complete the program.

Degree and Major Requirements

Degree Requirements

Required Courses

- General Education *41 Credit Hours* ¹
- Foreign Language classes (intermediate level required) *0-14 Credit Hours* ²
- Philosophy course (in addition to General Education courses) *3 Credit Hours*

- PHIL 341. Modern Philosophy *3.00*

Choose one History of Philosophy courses: 3 Credit Hours

Depending on the manner in which they are taught, the following topics classes may be counted toward the history requirement if they are approved by petition to the academic unit head: PHIL 390, PHIL 391, PHIL 460, PHIL 465, PHIL 470 and PHIL 475 .

- PHIL 342. Medieval Philosophy *3.00*
- PHIL 343. Stoics, Sceptics and Epicureans *3.00*
- PHIL 344. Existentialism *3.00*
- PHIL 370. American Philosophy *3.00*

- PHIL 375. Nineteenth Century Philosophy and Theology *3.00*
or
- REL 375. Nineteenth Century Philosophy and Theology *3.00*

- PHIL 376. Nietzsche *3.00*

- PHIL 377. Hermeneutics *3.00*
or
- REL 377. Hermeneutics *3.00*

- PHIL 430. Analytic Philosophy *3.00*
- PHIL 466. Kant *3.00*
- PHIL 468. Phenomenology *3.00*

Choose one Metaphysics/Epistemology courses: 3 Credit Hours

Depending on the manner in which they are taught, the following topics classes may be counted toward the metaphysics/epistemology requirement if they are approved by petition to the academic unit head: PHIL 390, PHIL 391 and PHIL 475 .

- PHIL 218. Philosophy of Religion *3.00*
or
- REL 218. Philosophy of Religion *3.00*

- PHIL 300. Knowledge & Belief *3.00*
- PHIL 311. Metaphysics *3.00*
- PHIL 392. Philosophy of Mind *3.00*
- PHIL 394. Self and Identity *3.00*
- PHIL 396. Philosophy of Physics *3.00*
- PHIL 397. Philosophy of Space and Time *3.00*
- PHIL 398. Philosophy of Quantum Theory *3.00*
- PHIL 410. Philosophy of Science *3.00*
- PHIL 420. Philosophy of Language *3.00*

Philosophy electives (nine credits at the 300 level or above): 15 Credit Hours

If the student takes PHIL 101 as part of Cluster Two in the General Education program it can double count as one course of this elective section. Neither PHIL 120 nor PHIL 150 can be used as an elective.

Total: 33 Credit Hours

Recommended Schedule for Majors

The following outline is a sample four-year program. The actual courses and sequence a student takes may vary.

First Year

- Introductory courses in major *6 Credit Hours*
- B.A. or B.S. Requirements *6-8 Credit Hours*
- General Education courses *6-18 Credit Hours*¹

Total: 30 Credit Hours

Second Year

- Required courses in major *6 Credit Hours*
- B.A. or B.S. Requirements or Electives *6 Credit Hours*
- General Education courses *18 Credit Hours*

Total: 30 Credit Hours

Third Year

- Requirements and electives in philosophy or religion *12 Credit Hours*

- Electives (may be outside of major) *12 Credit Hours*
- General Education courses *6 Credit Hours*

Total: 30 Credit Hours

Footnote

¹ Students should adjust General Education and foreign language load to achieve 30 hours total.

Philosophy and Religion, Philosophy Concentration, B.S.

Degree and Major Requirements

Degree Requirements

Required Courses

- General Education *41 Credit Hours* ¹
- Quantitative requirement (in addition to General Education courses) *3 Credit Hours*
- Scientific literacy requirement (in addition to General Education courses) *3-4 Credit Hours*
- Major in Philosophy concentration *33 Credit Hours*
- Electives *40-41 Credit Hours*

Total: 120 Credit Hours

Footnote

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

Major Requirements

Concentration Core Courses

- PHIL 250. Introduction to Symbolic Logic *3.00*
- PHIL 330. Moral Theory *3.00*
- PHIL 340. Ancient Greek Philosophy *3.00*
- PHIL 341. Modern Philosophy *3.00*

Choose one History of Philosophy courses: 3 Credit Hours

Depending on the manner in which they are taught, the following topics classes may be counted toward the history requirement if they are approved by petition to the academic unit head: PHIL 390, PHIL 391, PHIL 460, PHIL 465 , PHIL 470 and PHIL 475 .

- PHIL 342. Medieval Philosophy *3.00*
- PHIL 343. Stoics, Skeptics and Epicureans *3.00*

- PHIL 344. Existentialism *3.00*
- PHIL 370. American Philosophy *3.00*

- PHIL 375. Nineteenth Century Philosophy and Theology *3.00*
or
- REL 375. Nineteenth Century Philosophy and Theology *3.00*

- PHIL 376. Nietzsche *3.00*

- PHIL 377. Hermeneutics *3.00*
or
- REL 377. Hermeneutics *3.00*

- PHIL 430. Analytic Philosophy *3.00*
- PHIL 466. Kant *3.00*
- PHIL 468. Phenomenology *3.00*

Choose one Metaphysics/Epistemology courses: 3 Credit Hours

Depending on the manner in which they are taught, the following topics classes may be counted toward the metaphysics/epistemology requirement if they are approved by petition to the academic unit head: PHIL 390, PHIL 391 and PHIL 475 .

- PHIL 218. Philosophy of Religion *3.00*
or
- REL 218. Philosophy of Religion *3.00*

- PHIL 300. Knowledge & Belief *3.00*
- PHIL 311. Metaphysics *3.00*
- PHIL 392. Philosophy of Mind *3.00*
- PHIL 394. Self and Identity *3.00*
- PHIL 396. Philosophy of Physics *3.00*
- PHIL 397. Philosophy of Space and Time *3.00*
- PHIL 398. Philosophy of Quantum Theory *3.00*
- PHIL 410. Philosophy of Science *3.00*
- PHIL 420. Philosophy of Language *3.00*

Philosophy electives (nine credits must be at the 300 level or above): 15 Credit Hours

If the student takes PHIL 101 as part of Cluster Two in the General Education program it can double count as one course of this elective section. Neither PHIL 120 nor PHIL 150 can be used as an elective.

Total: 33 Credit Hours

Recommended Schedule for Majors

The following outline is a sample four-year program. The actual courses and sequence a student takes may vary.

First Year

- Introductory courses in major *6 Credit Hours*
- B.A. or B.S. Requirements *6-8 Credit Hours*
- General Education courses *6-18 Credit Hours*¹

Total: 30 Credit Hours

Second Year

- Required courses in major *6 Credit Hours*
- B.A. or B.S. Requirements or Electives *6 Credit Hours*
- General Education courses *18 Credit Hours*

Total: 30 Credit Hours

Third Year

- Requirements and electives in philosophy or religion *12 Credit Hours*
- Electives (may be outside of major) *12 Credit Hours*
- General Education courses *6 Credit Hours*

Total: 30 Credit Hours

Footnote

¹ Students should adjust General Education and foreign language load to achieve 30 hours total.

Philosophy and Religion, Religion Concentration, B.A.

Degree and Major Requirements

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Foreign Language classes (intermediate level required) *0-14 Credit Hours*²
- Philosophy course (in addition to General Education courses) *3 Credit Hours*
- University electives *26-43 Credit Hours*
- Major requirements (listed below) *33-36 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² The foreign language requirement may be satisfied by successful completion of the second semester of the intermediate level of the student's chosen language (typically 232) or by placing out of that language through the Department of Foreign Language's placement test.

Major Requirements

Concentration Core Courses

- REL 101. Religions of the World [C2HQC] 3.00
- REL 200. Exploring Religion 3.00

Capstone (choose one of the following): 3 Credit Hours

- REL 410. Dharma/Adharma: Hindu Ethical Reasoning 3.00
- REL 440. Topics in Religion in America 3.00
- REL 460. Topics in Ancient Jewish and Early Christian Literature 3.00
- REL 450. Religion and Society 3.00
- REL 488. Buddhism in the Modern World 3.00

Track Requirements: 12 Credit Hours

Choose 4 courses from one track. This will be your home track.

Breadth Requirements: 12 Credit Hours

Choose 4 additional courses: one from each of the other tracks and one more from any of the three other tracks. None of these can be cross-listed in your home track.

Total: 33 Credit Hours

Courses

Track 1: Eastern Traditions

- HUM 252. Global Cultures [C2HQC] 3.00 (when topic is Gandhi, Non-violence and Global Transformation)
- REL 288. Introduction to Buddhism 3.00.
- REL 310. (Re)thinking Order and Chaos: An Introduction to Hinduism 3.00
- REL 313. Classical Chinese Thought 3.00
- REL 314. Gandhi and the Other 9/11 3.00
- REL 317. Introduction to Daoism 3.00
- REL 323. Comparative Ethics East and West 3.00
- REL 386. Topics in Buddhist Studies 3.00
- REL 387. Buddhist Literature and Liberation 3.00
- REL 388. Tibetan Buddhism 3.00
- REL 410. Dharma/Adharma: Hindu Ethical Reasoning 3.00
- REL 488. Buddhism in the Modern World 3.00

Track 2: Western Traditions

- HUM 252. Global Cultures [C2HQC] 3.00 (when topic is Islamic Civilization)
- REL 201. Introduction to Hebrew Bible/Old Testament 3.00
- REL 202. Introduction to the New Testament 3.00
- REL 210. Religion in America 3.00
- REL 240. Jesus and the Moral Life 3.00
- REL 250. Islamic Religious Traditions 3.00
- REL 306. Women and Gender in Islam 3.00
- REL 309. Jihad in Islamic Traditions 3.00
- REL 320. Judaism 3.00
- REL 323. Comparative Ethics East and West 3.00
- REL 324. Latinx and Latin American Christianity 3.00
- REL 325. Catholicism in the Modern World 3.00
- REL 330. Religions of Africa and the African Diaspora 3.00
- REL 332. Born Again Religion 3.00
- REL 334. New Religious Movements 3.00
- REL 336. African-American Religion 3.00
- REL 340. Introduction to Christianity 3.00
- REL 342. The Historical Jesus Quest 3.00
- REL 343. Paul and the Origins of Christianity 3.00
- REL 348. Christianity in Global Context 3.00
- REL 360. History of Christian Thought 3.00

- REL 362. Introduction to U.S. Religious History 3.00
or
- HIST 362. Introduction to U.S. Religious History 3.00
- REL 363. Apocalypticism, Religious Terrorism and Peace 3.00

- REL 375. Nineteenth Century Philosophy and Theology 3.00
or
- PHIL 375. Nineteenth Century Philosophy and Theology 3.00

- REL 380. Contemporary Theologies 3.00
- REL 440. Topics in Religion in America 3.00
- REL 460. Topics in Ancient Jewish and Early Christian Literature 3.00

Track 3: Biblical Studies and Theology

- REL 102. God, Meaning & Morality [C2HQC] 3.00
- REL 201. Introduction to Hebrew Bible/Old Testament 3.00
- REL 202. Introduction to the New Testament 3.00

- REL 218. Philosophy of Religion 3.00
or
- PHIL 218. Philosophy of Religion 3.00

- REL 325. Catholicism in the Modern World 3.00
- REL 333. Angels, Demons and Dreams in Ancient Judaism and Christianity 3.00
- REL 340. Introduction to Christianity 3.00

- REL 341. Early Christian Gospels: Origins, History, and Conflict 3.00
- REL 342. The Historical Jesus Quest 3.00
- REL 343. Paul and the Origins of Christianity 3.00
- REL 360. History of Christian Thought 3.00

- REL 366. Religion, Animals and the Environment 3.00
or
- ENVT 366. Religion, Animals and the Environment 3.00

- REL 375. Nineteenth Century Philosophy and Theology 3.00
or
- PHIL 375. Nineteenth Century Philosophy and Theology 3.00

- REL 377. Hermeneutics 3.00
or
- PHIL 377. Hermeneutics 3.00

- REL 380. Contemporary Theologies 3.00
- REL 460. Topics in Ancient Jewish and Early Christian Literature 3.00

Track 4: Religion and Society

- HUM 252. Global Cultures [C2HQC] 3.00 (when topic is Gandhi, Non-violence and Global Transformation)
- REL 210. Religion in America 3.00
- REL 280. Religion and Science 3.00
- REL 306. Women and Gender in Islam 3.00
- REL 310. (Re)thinking Order and Chaos: An Introduction to Hinduism 3.00
- REL 315. Women and Religion 3.00

- REL 322. Sociology of Religion 3.00
or
- SOCI 322. Sociology of Religion 3.00

- REL 324. Latinx and Latin American Christianity 3.00
- REL 330. Religions of Africa and the African Diaspora 3.00
- REL 332. Born Again Religion 3.00
- REL 334. New Religious Movements 3.00
- REL 336. African-American Religion 3.00
- REL 348. Christianity in Global Context 3.00

- REL 363. Apocalypticism, Religious Terrorism and Peace 3.00
or
- IA 363. Apocalypticism, Religious Terrorism and Peace 3.00

- REL 450. Religion and Society 3.00
- REL 365. Religion and Film 3.00
- REL 366. Religion, Animals and the Environment 3.00
- REL 383. The Global Refugee Crisis and Religion 3.00
- REL 388. Tibetan Buddhism 3.00
- REL 410. Dharma/Adharma: Hindu Ethical Reasoning 3.00
- REL 488. Buddhism in the Modern World 3.00

Recommended Schedule for Majors

The following outline is a sample four-year program. The actual courses and sequence a student takes may vary.

First Year

- Introductory courses in major *6 Credit Hours*
- B.A. or B.S. Requirements *6-8 Credit Hours*
- General Education courses *6-18 Credit Hours*¹

Total: 30 Credit Hours

Second Year

- Required courses in major *6 Credit Hours*
- B.A. or B.S. Requirements or Electives *6 Credit Hours*
- General Education courses *18 Credit Hours*

Total: 30 Credit Hours

Third Year

- Requirements and electives in philosophy or religion *12 Credit Hours*
- Electives (may be outside of major) *12 Credit Hours*
- General Education courses *6 Credit Hours*

Total: 30 Credit Hours

Footnote

¹ Students should adjust General Education and foreign language load to achieve 30 hours total.

Philosophy Minor

Required Courses

- PHIL 101. Introduction to Philosophy [C2HQC] *3.00*

Choose two of the following: 6 Credit Hours

- PHIL 340. Ancient Greek Philosophy *3.00*
- PHIL 341. Modern Philosophy *3.00*
- PHIL 342. Medieval Philosophy *3.00*
- PHIL 375. Nineteenth Century Philosophy and Theology *3.00*

Three electives: 9 Credit Hours

At least two of which must be above PHIL 300 ¹

Total: 18 Credit Hours

Footnote

¹ Neither PHIL 120 nor PHIL 150 can be used as electives.

Religion Minor

Foundational Courses

- REL 101. Religions of the World [C2HQC] 3.00

Choose one course in each track: 12 Credit Hours

(At least one of these must be 300 or 400 level)

Choose one REL elective: 3 Credit Hours

Total: 18 Credit Hours

Physics and Astronomy, Department of

Dr. W. Christopher Hughes, **Department Head**

Phone: (540) 568-6109

Email: physics@jmu.edu

Location: Physics/Chemistry Building, Suite 2186

Website: <https://jmu.edu/Physics>

Professors

K. Giovanetti, W. C. Hughes, B. Newcomer, G. Niculescu, I. Niculescu, S. Scully

Associate Professors

G. Albright, A. Banu, H. Butner, A. Constantin, C. Constantin, K. Feitosa, K. Fukumura, M. Mattson, S. Paulson, G. Scarel

Assistant Professors

T. Finch, M. Kaveh-Baghdadorani, I. Melnikov, S. Pendleton, C. Rost, K. Weaver

Instructors

L. Lucatorto, J. Sterlace

Mission

The mission of the Department of Physics and Astronomy is the preparation of scientifically enlightened citizens. Science literacy is promoted by the production of teachers, researchers, technical professionals and knowledgeable individuals through the integration of classroom and experiential learning.

Vision

We strive to be a leading undergraduate physics and astronomy department by building a research-active, student-centered community.

Values

Excellence, integrity and mutual respect are the core values that define our department. The vigorous pursuit of research with undergraduates is central to extending our understanding of nature and the engagement of students directly in the practice of physics and astronomy.

Service to the university, the public and the profession is essential for continued vitality of science education and research.

Goals

To help students:

- Develop competence in using computers for computation, data acquisition, numerical control, device development, and information acquisition and processing.
- Appreciate the role of science in society and the historical development of physics in the ongoing quest to discover the structure of the universe.
- Gain an understanding of the basic principles and the experimental basis of the various fields of physics and the logical relationships of the various fields.
- Become capable problem solvers using techniques that require mathematical skills, conceptual and mathematical models, order-of-magnitude estimates, and an understanding of limiting cases.
- Develop competence in designing, constructing, and using laboratory instruments, and to draw valid conclusions from experimental data.
- Improve written and oral technical communication skills.

Co-Curricular and Organizations

- Society of Physics Students

Astronomy Minor

Minor Requirements

The minimum requirement for a minor in astronomy is 21 credit hours selected as follows:

Astronomy Minor Electives

- ASTR 220. General Astronomy I: The Night Sky, the Solar System and Stars 3.00

- ASTR 221. General Astronomy II: Star Systems, the Interstellar Medium, and Cosmology 4.00
- ASTR 320. Astronomical Techniques 3.00

Choose one of the following: 6 Credit Hours

- PHYS 140. College Physics I [C3PP] 3.00 and
- PHYS 150. College Physics II 3.00

- PHYS 240. University Physics I [C3PP] 3.00 and
- PHYS 250. University Physics II 3.00

Choose one of the following: 2 Credit Hours

- PHYS 140L. General Physics Laboratory [C3PP] 1.00 and
- PHYS 150L. General Physics Laboratory 1.00
- or
- PHYS 240L. University Physics Laboratory I [C3PP] 1.00 and
- PHYS 250L. University Physics Laboratory II 1.00

One course selected from the following: 3 Credit Hours

- GEOL 307. Planetary Geology (2, 2) 3.00

- ASTR 480. Astrophysics 3.00
- HON 300Z. Life Beyond Earth

- ASTR 297. Topics in Astronomy 1.00 - 4.00 or
(Appropriate topics could include the relativity, cosmology, cosmic rays or other astronomy-related topics with approval of minor adviser.)
- PHYS 297. Topics in Physics 1.00 - 4.00 or
(Appropriate topics could include the relativity, cosmology, cosmic rays or other astronomy-related topics with approval of minor adviser.)
- PHYS 397. Topics in Physics 1.00 - 4.00 or
(Appropriate topics could include the relativity, cosmology, cosmic rays or other astronomy-related topics with approval of minor adviser.)
- PHYS 497. Topics in Physics 1.00 - 4.00
(Appropriate topics could include the relativity, cosmology, cosmic rays or other astronomy-related topics with approval of minor adviser.)

- ASTR 330. Relativity 4.00 or
- PHYS 330. Relativity 4.00

Total: 21 Credit Hours

Physics Minor

Minor Requirements

The minimum requirement for a minor in physics is 22 credit hours selected as follows:

Physics Minor Electives

- PHYS 260. University Physics III *3.00*

Choose one of the following: 6 Credit Hours

- PHYS 140. College Physics I [C3PP] *3.00* and
- PHYS 150. College Physics II *3.00*
or
- PHYS 240. University Physics I [C3PP] *3.00* and
- PHYS 250. University Physics II *3.00*

Choose one of the following: 2 Credit Hours

- PHYS 140L. General Physics Laboratory [C3PP] *1.00* and
- PHYS 150L. General Physics Laboratory *1.00*
or
- PHYS 240L. University Physics Laboratory I [C3PP] *1.00* and
- PHYS 250L. University Physics Laboratory II *1.00*

Ten credits selected from the following: 10 Credit Hours

- Physics courses numbered above 260
- ASTR 320. Astronomical Techniques *3.00*
- ASTR 480. Astrophysics *3.00*

Total: 22 Credit Hours

Physics Minor for Engineers

Dr. Ioana Niculescu, **Coordinator**

Phone: (540) 568-2980

Email: niculemi@jmu.edu

The minor in physics for engineering students is a program that enables JMU undergraduate students majoring in engineering to take a minor in physics. Interested students will take courses in upper-level physics to explore physical phenomena related to their professional development as an engineer.

Physics Minor for Engineers Electives

- PHYS 270. Modern Physics *4.00*
- PHYS course at the 300-level or above ¹

Choose one of the following: 6 Credit Hours

- PHYS 140. College Physics I [C3PP] 3.00 and
 - PHYS 150. College Physics II 3.00
- or
- PHYS 240. University Physics I [C3PP] 3.00 and
 - PHYS 250. University Physics II 3.00

Choose one of the following: 2 Credit Hours

- PHYS 140L. General Physics Laboratory [C3PP] 1.00 and
 - PHYS 150L. General Physics Laboratory 1.00
- or
- PHYS 240L. University Physics Laboratory I [C3PP] 1.00 and
 - PHYS 250L. University Physics Laboratory II 1.00

Choose one of the following: 4 Credit Hours

- ENGR 313. Circuits and Instrumentation 4.00
- PHYS 360. Analog Electronics 4.00

Total: 19-20 Credit Hours

Footnote

¹ May not include PHYS 360

Physics, Individual Option Concentration, B.A.

Physics Degree and Major Requirements, B.A.

Degree and major requirements for the B.A. program in physics.

Degree Requirements

Required Courses

- General Education 41 *Credit Hours*¹
- Foreign Language classes (intermediate level required) 0-14 *Credit Hours*²
- Philosophy course (in addition to General Education courses) 3 *Credit Hours*
- University electives 23-37 *Credit Hours*
- Major core requirements 39 *Credit Hours*³
- Major concentration requirements 26-39 *Credit Hours*³

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² The foreign language requirement may be satisfied by successful completion of the second semester of the intermediate level (typically 232) of the student's chosen language or by placing out of that language through the Department of Foreign Languages, Literatures and Cultures' placement test.

³ Some of the courses required for the major complete Cluster Three of General Education. PHIL 101 is part of Cluster Two.

Major Core Requirements

Required Courses: 27 Credits

- PHYS 105. Foundations of Physics *1.00*
- PHYS 247. Data Acquisition and Analysis Techniques II *1.00*
- PHYS 260. University Physics III *3.00*
- PHYS 270. Modern Physics *4.00*
- MATH 235. Calculus I [C3QR] *4.00*
- MATH 236. Calculus II *4.00*
- MATH 237. Calculus III *4.00*
- CHEM 131. General Chemistry I [C3PP] *3.00*
- CHEM 131L. General Chemistry Laboratory [C3PP] *1.00*
- PHYS 391. Seminar *0.00*
- PHYS 392. Seminar *1.00*
- PHYS 491-492. Physics Assessment and Seminar *0.00 - 1.00*

Choose one of the following pairs of introductory courses: 6 Credit Hours

- PHYS 140. College Physics I [C3PP] *3.00* and
- PHYS 150. College Physics II *3.00*

or

- PHYS 240. University Physics I [C3PP] *3.00* and
- PHYS 250. University Physics II *3.00*

Choose one of the following pairs of lab courses: 2 Credit Hours

- PHYS 140L. General Physics Laboratory [C3PP] *1.00* and
- PHYS 150L. General Physics Laboratory *1.00*

or

- PHYS 240L. University Physics Laboratory I [C3PP] *1.00* and
- PHYS 250L. University Physics Laboratory II *1.00*

Choose one of the following: 4 Credit Hours

- BIO 140. Foundations of Biology I (3,3) [C3NS] *4.00*
- GEOL 110. Physical Geology [C3NS] *3.00*

Total: 39 Credit Hours

Program Concentrations

Each student, in consultation with his/her faculty adviser, will choose one of the following program concentrations:

- Individual Option
- Professional

Individual Option

The individual option is a course of study chosen specifically to match the interest and career plans of the student. This option will allow custom-designed cross disciplinary majors such as the history of physics and physics and the fine arts.

A student electing the individual option must complete the major core requirements of the B.A. in physics and will select a program consisting of a coherent collection of a minimum of 26 additional credits of physics courses numbered above 270, astronomy courses numbered above 301 and courses in related fields. This individualized program must be selected in consultation with a faculty adviser in the department and must be approved by that adviser, the department head and one other faculty member in the department. The student needs to declare this concentration at least 3 semesters prior to graduation.

The individualized program, as approved by the department and accepted by the student, becomes the major requirements for the student.

Students are expected to review progress toward completion of the selected program of study with their faculty adviser.

Physics, Individual Option Concentration, B.S.

Physics Degree and Major Requirements, B.S.

Degree and major requirements for the B.S. program in physics.

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Quantitative requirement (in addition to General Education) *3 Credit Hours*
- Scientific Literacy requirement (in addition to General Education) *3-4 Credit Hours*
- University electives *0-19 Credit Hours*
- Major core requirements (listed below) *50 Credit Hours*²
- Major program concentration requirements *13-36 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² Some major core courses simultaneously satisfy degree and some General Education requirements so that a student need not take more than 120 credit hours to satisfy graduation requirements.

Major Core Requirements

Shared Core Requirements for All B. S. Physics Majors.

Required Courses

- PHYS 105. Foundations of Physics *1.00*
- PHYS 247. Data Acquisition and Analysis Techniques II *1.00*
- PHYS 260. University Physics III *3.00*
- PHYS 270. Modern Physics *4.00*
- PHYS 340. Mechanics *3.00*
- PHYS 344. Advanced Physics Laboratory I *1.00*
- PHYS 345. Advanced Physics Laboratory II *1.00*
- PHYS 350. Electricity & Magnetism *3.00*
- PHYS 391. Seminar *0.00*
- PHYS 392. Seminar *1.00*

Choose one of the following pair of introductory courses: 6 Credit Hours

Introductory Courses

- PHYS 140. College Physics I [C3PP] *3.00* and
- PHYS 150. College Physics II *3.00*
- or
- PHYS 240. University Physics I [C3PP] *3.00* and
- PHYS 250. University Physics II *3.00*

Choose one of the following pair of laboratory courses: 2 Credit Hours

- PHYS 140L. General Physics Laboratory [C3PP] *1.00*
- and
- PHYS 150L. General Physics Laboratory *1.00*
- or
- PHYS 240L. University Physics Laboratory I [C3PP] *1.00*
- and
- PHYS 250L. University Physics Laboratory II *1.00*

Cognate Disciplines

Courses in related fields required of all B. S. Physics Majors.

- CHEM 131. General Chemistry I [C3PP] *3.00*
- CHEM 131L. General Chemistry Laboratory [C3PP] *1.00*
- CHEM 132. General Chemistry II *3.00*
- CHEM 132L. General Chemistry Laboratory *1.00*
- MATH 235. Calculus I [C3QR] *4.00*
- MATH 236. Calculus II *4.00*

- MATH 237. Calculus III *4.00*
- MATH 238. Linear Algebra with Differential Equations *4.00*

Total: 50 Credit Hours

Includes the Physics Required Introductory, Laboratory, 200 Level and above, as well as Cognate Required Courses. This is the shared core for the overall Physics B. S.

Individual Option Concentration

The individual option is a course of studies chosen specifically to match the interest and career plans of the student. This option will allow custom designed cross disciplinary majors such as chemical physics, as well as majors designed for students whose educational and career goals are not met by the existing concentrations in the major.

A student electing the individual option must complete the core requirements for the B.S. in physics and will select a program consisting of a coherent collection of a minimum of 25 additional credits of physics courses numbered above 270, astronomy courses numbered above 301 and courses in related fields.

This individualized program must be selected in consultation with a faculty adviser in the department, and must be approved by that adviser, the department head and one other faculty member in the department. **The student needs to declare this concentration at least three semesters prior to graduation.**

The individualized program, as approved by the department and accepted by the student, becomes the major requirements for that student.

Students are expected to review progress toward completion of the selected program of study with their faculty adviser.

Recommended Schedule for Physics Majors, B.S.

First Year

- CHEM 131. General Chemistry I [C3PP] *3.00*
- CHEM 131L. General Chemistry Laboratory [C3PP] *1.00*
- CHEM 132. General Chemistry II *3.00*
- CHEM 132L. General Chemistry Laboratory *1.00*
- General Education, Cluster One: Skills for the 21st Century *9 Credit Hours*
- MATH 235. Calculus I [C3QR] *4.00*
- MATH 236. Calculus II *4.00*
- PHYS 105. Foundations of Physics *1.00*

Choose one of the following pair of courses: 6 Credit Hours

Introductory Physics Courses for Majors.

- PHYS 140. College Physics I [C3PP] *3.00* and
- PHYS 150. College Physics II *3.00*
- or
- PHYS 240. University Physics I [C3PP] *3.00* and
- PHYS 250. University Physics II *3.00*

Choose one of the following pair of laboratory courses: 2 Credit Hours

The corresponding laboratory courses associated with either PHYS 240/PHYS 250 or PHYS 140/PHYS 150.

- PHYS 140L. General Physics Laboratory [C3PP] 1.00 and
 - PHYS 150L. General Physics Laboratory 1.00
- or
- PHYS 240L. University Physics Laboratory I [C3PP] 1.00 and
 - PHYS 250L. University Physics Laboratory II 1.00

Total: 34-37 Credit Hours

Second Year

- MATH 237. Calculus III 4.00
- MATH 238. Linear Algebra with Differential Equations 4.00
- PHYS 247. Data Acquisition and Analysis Techniques II 1.00
- PHYS 260. University Physics III 3.00
- PHYS 270. Modern Physics 4.00
- General Education courses 11-15 *Credit Hours*
and recommended for Physics B.S. Majors NOT doing the Physics Education Program:
- MATH 248. Computers & Numerical Algorithms 4.00

Total: 31-35 Credit Hours

Third and Fourth Years

During their junior and senior years, students will select courses to complete the specific program concentration which they are following. These course selections will be made with the assistance of a faculty adviser.

Physics, Multidisciplinary Concentration: Secondary Education Track, B.S.

Physics Degree and Major Requirements, B.S.

Degree and major requirements for the B.S. program in physics.

Degree Requirements

Required Courses

- General Education 41 *Credit Hours*¹
- Quantitative requirement (in addition to General Education) 3 *Credit Hours*
- Scientific Literacy requirement (in addition to General Education) 3-4 *Credit Hours*
- University electives 0-19 *Credit Hours*
- Major core requirements (listed below) 50 *Credit Hours*²

- Major program concentration requirements *13-36 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² Some major core courses simultaneously satisfy degree and some General Education requirements so that a student need not take more than 120 credit hours to satisfy graduation requirements.

Major Core Requirements

Shared Core Requirements for All B. S. Physics Majors.

Required Courses

- PHYS 105. Foundations of Physics *1.00*
- PHYS 247. Data Acquisition and Analysis Techniques II *1.00*
- PHYS 260. University Physics III *3.00*
- PHYS 270. Modern Physics *4.00*
- PHYS 340. Mechanics *3.00*
- PHYS 344. Advanced Physics Laboratory I *1.00*
- PHYS 345. Advanced Physics Laboratory II *1.00*
- PHYS 350. Electricity & Magnetism *3.00*
- PHYS 391. Seminar *0.00*
- PHYS 392. Seminar *1.00*

Choose one of the following pair of introductory courses: 6 Credit Hours

Introductory Courses

- PHYS 140. College Physics I [C3PP] *3.00* and
- PHYS 150. College Physics II *3.00*
- or
- PHYS 240. University Physics I [C3PP] *3.00* and
- PHYS 250. University Physics II *3.00*

Choose one of the following pair of laboratory courses: 2 Credit Hours

- PHYS 140L. General Physics Laboratory [C3PP] *1.00*
- and
- PHYS 150L. General Physics Laboratory *1.00*
- or
- PHYS 240L. University Physics Laboratory I [C3PP] *1.00*
- and
- PHYS 250L. University Physics Laboratory II *1.00*

Cognate Disciplines

Courses in related fields required of all B. S. Physics Majors.

- CHEM 131. General Chemistry I [C3PP] 3.00
- CHEM 131L. General Chemistry Laboratory [C3PP] 1.00
- CHEM 132. General Chemistry II 3.00
- CHEM 132L. General Chemistry Laboratory 1.00
- MATH 235. Calculus I [C3QR] 4.00
- MATH 236. Calculus II 4.00
- MATH 237. Calculus III 4.00
- MATH 238. Linear Algebra with Differential Equations 4.00

Total: 50 Credit Hours

Includes the Physics Required Introductory, Laboratory, 200 Level and above, as well as Cognate Required Courses. This is the shared core for the overall Physics B. S.

Multidisciplinary Concentration

The multidisciplinary concentration is designed to provide a solid foundation in physics for students whose interests extend beyond traditional physics fields. The track of secondary education opens doors to the pursuit of graduate degrees in education and other career paths requiring a technical background.

The following are also required for all tracks in the multidisciplinary concentration:

Courses

- PHYS 340. Mechanics 3.00
- PHYS 350. Electricity & Magnetism 3.00
- PHYS 380. Thermodynamics and Statistical Mechanics 3.00
- PHYS 391. Seminar 0.00
- PHYS 392. Seminar 1.00
- PHYS 491-492. Physics Assessment and Seminar 0.00 - 1.00

Two credits from the following: 2 Credit Hours

- PHYS 398. Independent Study in Physics or Astronomy 1.00 - 3.00
or
- ASTR 398. Independent Study in Physics or Astronomy 1.00 - 3.00, repeatable to 4 credits
- PHYS 498R. Undergraduate Research in Physics or Astronomy 1.00 - 4.00
or
- ASTR 498R. Undergraduate Research in Physics or Astronomy 1.00 - 4.00, repeatable to 6 credits
- ISCI 450. Interscience Research 2.00
- PHYS 499. Honors 1.00 - 3.00, repeatable ¹

Total: 24 Credit Hours

Footnote

¹ Students completing honors theses should take PHYS 499 in both the fall and spring semesters of their senior year for a total of 6 credit hours.

Total Credits before Track 91-95 Credit Hours

Secondary Education Track

The Secondary Education Track provides the student with the background to achieve certification as a teacher in Virginia Public Schools. Aside from the courses listed below, necessary to earn a Bachelor of Science in Physics, the student will need to enroll in the Master of Arts in Education to complete all of the coursework required for certification. For further information, contact Dr. Scott Paulson of the Department of Physics and Astronomy.

Courses

- MSSE 101. Orientation to the Profession *1.00*
- PSYC 160. Life Span Human Development [C5SD] *3.00*
- BIO 140. Foundations of Biology I (3,3) [C3NS] *4.00*
- GEOL 110. Physical Geology [C3NS] *3.00*
- GEOL 110L. Physical Geology Laboratory [C3NS] *1.00*

Students must be fully admitted into pre-professional teacher education prior to enrolling in these courses:

- EDUC 310. Teaching in a Diverse Society *3.00*
- MSSE 370. General Instructional Methods for Grades 6-12 *3.00*
- MSSE 371. Clinical Experience in Adolescent Education *1.00*
- MSSE 470S. Natural Sciences Teaching Methods, Grades 6-8 *3.00*
- MSSE 471. Content Area Experiences in Middle Schools *3.00*
- LED 440. Disciplinary Literacy in Secondary Education *3.00*

Total: 28 Credit Hours

Total Credits w/SEED 116-120 Credit Hours

Additional Information

In addition to the above requirements, students must declare a minor in Secondary Education and complete those requirements.

Beyond the General Education, academic major, and secondary education minor requirements, physics majors desiring secondary education teacher licensure must be admitted to teacher education, complete the pre-professional program in secondary education at the undergraduate level and complete the graduate level Master of Arts in Teaching degree.

It is critical that students seeking licensure consult regularly with both their education adviser and their major adviser to support their progression through the programs. For a full description of the program in secondary teaching, refer to the Department of Middle, Secondary and Mathematics Education, in addition to the College of Education section of the catalog.

Recommended Schedule for Physics Majors, B.S.

First Year

- CHEM 131. General Chemistry I [C3PP] 3.00
- CHEM 131L. General Chemistry Laboratory [C3PP] 1.00
- CHEM 132. General Chemistry II 3.00
- CHEM 132L. General Chemistry Laboratory 1.00
- General Education, Cluster One: Skills for the 21st Century 9 *Credit Hours*
- MATH 235. Calculus I [C3QR] 4.00
- MATH 236. Calculus II 4.00
- PHYS 105. Foundations of Physics 1.00

Choose one of the following pair of courses: 6 Credit Hours

Introductory Physics Courses for Majors.

- PHYS 140. College Physics I [C3PP] 3.00 and
- PHYS 150. College Physics II 3.00
- or
- PHYS 240. University Physics I [C3PP] 3.00 and
- PHYS 250. University Physics II 3.00

Choose one of the following pair of laboratory courses: 2 Credit Hours

The corresponding laboratory courses associated with either PHYS 240/PHYS 250 or PHYS 140/PHYS 150.

- PHYS 140L. General Physics Laboratory [C3PP] 1.00 and
- PHYS 150L. General Physics Laboratory 1.00
- or
- PHYS 240L. University Physics Laboratory I [C3PP] 1.00 and
- PHYS 250L. University Physics Laboratory II 1.00

Total: 34-37 Credit Hours

Second Year

- MATH 237. Calculus III 4.00
- MATH 238. Linear Algebra with Differential Equations 4.00
- PHYS 247. Data Acquisition and Analysis Techniques II 1.00
- PHYS 260. University Physics III 3.00
- PHYS 270. Modern Physics 4.00
- General Education courses 11-15 *Credit Hours*
and recommended for Physics B.S. Majors NOT doing the Physics Education Program:
- MATH 248. Computers & Numerical Algorithms 4.00

Total: 31-35 Credit Hours

Third and Fourth Years

During their junior and senior years, students will select courses to complete the specific program concentration which they are following. These course selections will be made with the assistance of a faculty adviser.

Physics, Professional Concentration, Pre-Medical Preparation Track, B.A.

Physics Degree and Major Requirements, B.A.

Degree and major requirements for the B.A. program in physics.

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Foreign Language classes (intermediate level required) *0-14 Credit Hours*²
- Philosophy course (in addition to General Education courses) *3 Credit Hours*
- University electives *23-37 Credit Hours*
- Major core requirements *39 Credit Hours*³
- Major concentration requirements *26-39 Credit Hours*³

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² The foreign language requirement may be satisfied by successful completion of the second semester of the intermediate level (typically 232) of the student's chosen language or by placing out of that language through the Department of Foreign Languages, Literatures and Cultures' placement test.

³ Some of the courses required for the major complete Cluster Three of General Education. PHIL 101 is part of Cluster Two.

Major Core Requirements

Required Courses: 27 Credits

- PHYS 105. Foundations of Physics *1.00*
- PHYS 247. Data Acquisition and Analysis Techniques II *1.00*
- PHYS 260. University Physics III *3.00*
- PHYS 270. Modern Physics *4.00*
- MATH 235. Calculus I [C3QR] *4.00*
- MATH 236. Calculus II *4.00*
- MATH 237. Calculus III *4.00*
- CHEM 131. General Chemistry I [C3PP] *3.00*
- CHEM 131L. General Chemistry Laboratory [C3PP] *1.00*
- PHYS 391. Seminar *0.00*
- PHYS 392. Seminar *1.00*

- PHYS 491-492. Physics Assessment and Seminar *0.00 - 1.00*

Choose one of the following pairs of introductory courses: 6 Credit Hours

- PHYS 140. College Physics I [C3PP] *3.00* and
- PHYS 150. College Physics II *3.00*

or

- PHYS 240. University Physics I [C3PP] *3.00* and
- PHYS 250. University Physics II *3.00*

Choose one of the following pairs of lab courses: 2 Credit Hours

- PHYS 140L. General Physics Laboratory [C3PP] *1.00* and
- PHYS 150L. General Physics Laboratory *1.00*

or

- PHYS 240L. University Physics Laboratory I [C3PP] *1.00* and
- PHYS 250L. University Physics Laboratory II *1.00*

Choose one of the following: 4 Credit Hours

- BIO 140. Foundations of Biology I (3,3) [C3NS] *4.00*
- GEOL 110. Physical Geology [C3NS] *3.00*

Total: 39 Credit Hours

Program Concentrations

Each student, in consultation with his/her faculty adviser, will choose one of the following program concentrations:

- Individual Option
- Professional

Professional

Students in this concentration must complete the following courses in addition to core requirements:

Required Courses

- MATH 238. Linear Algebra with Differential Equations *4.00*
- PHYS 340. Mechanics *3.00*
- PHYS 350. Electricity & Magnetism *3.00*
- Three credits chosen from PHYS courses at the 265-level or higher *3 Credit Hours*

Additional Information

Students are expected to review progress toward completion of the selected program of study with their faculty adviser.

Pre-Medical Preparation Track

Students pursuing the B.A. in physics and astronomy with a professional concentration may complete a track in pre-medical preparation. In addition to degree and General Education requirements, students complete the following courses.

First Year Courses

- PHYS 105. Foundations of Physics *1.00*
- PHYS 240. University Physics I [C3PP] *3.00*

- PHYS 140L. General Physics Laboratory [C3PP] *1.00*
or
- PHYS 240L. University Physics Laboratory I [C3PP] *1.00*

- PHYS 250. University Physics II *3.00*

- PHYS 150L. General Physics Laboratory *1.00*
or
- PHYS 250L. University Physics Laboratory II *1.00*

- MATH 235. Calculus I [C3QR] *4.00*
- MATH 236. Calculus II *4.00*
- CHEM 131. General Chemistry I [C3PP] *3.00*
- CHEM 131L. General Chemistry Laboratory [C3PP] *1.00*
- CHEM 132. General Chemistry II *3.00*
- CHEM 132L. General Chemistry Laboratory *1.00*

Second Year Courses

- PHYS 247. Data Acquisition and Analysis Techniques II *1.00*
- PHYS 260. University Physics III *3.00*
- PHYS 270. Modern Physics *4.00*
- MATH 237. Calculus III *4.00*
- MATH 238. Linear Algebra with Differential Equations *4.00*
- CHEM 241. Organic Chemistry I *3.00*
- CHEM 242. Organic Chemistry II *3.00*
- CHEM 242L. Organic Chemistry Laboratory *2.00*

Third Year Courses

- PHYS 340. Mechanics *3.00*
- PHYS 350. Electricity & Magnetism *3.00*
- PHYS 391. Seminar *0.00*
- PHYS 392. Seminar *1.00*
- PHYS elective 265 or higher (PHYS 326 recommended)
- CHEM 361. Biochemistry I *3.00*
- BIO 140. Foundations of Biology I (3,3) [C3NS] *4.00*
- BIO 150. Foundations of Biology II (3,3) *4.00*

Fourth Year Courses

- Two PHYS electives 265 or higher
- PHYS 491-492. Physics Assessment and Seminar *0.00 - 1.00*
 - Additional courses suggested by the Pre-professional Health program

Physics, Professional Concentration, Teaching Licensure Preparation Track, B.A.

Physics Degree and Major Requirements, B.A.

Degree and major requirements for the B.A. program in physics.

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Foreign Language classes (intermediate level required) *0-14 Credit Hours*²
- Philosophy course (in addition to General Education courses) *3 Credit Hours*
- University electives *23-37 Credit Hours*
- Major core requirements *39 Credit Hours*³
- Major concentration requirements *26-39 Credit Hours*³

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² The foreign language requirement may be satisfied by successful completion of the second semester of the intermediate level (typically 232) of the student's chosen language or by placing out of that language through the Department of Foreign Languages, Literatures and Cultures' placement test.

³ Some of the courses required for the major complete Cluster Three of General Education. PHIL 101 is part of Cluster Two.

Major Core Requirements

Required Courses: 27 Credits

- PHYS 105. Foundations of Physics *1.00*
- PHYS 247. Data Acquisition and Analysis Techniques II *1.00*
- PHYS 260. University Physics III *3.00*
- PHYS 270. Modern Physics *4.00*
- MATH 235. Calculus I [C3QR] *4.00*
- MATH 236. Calculus II *4.00*
- MATH 237. Calculus III *4.00*

- CHEM 131. General Chemistry I [C3PP] 3.00
- CHEM 131L. General Chemistry Laboratory [C3PP] 1.00
- PHYS 391. Seminar 0.00
- PHYS 392. Seminar 1.00
- PHYS 491-492. Physics Assessment and Seminar 0.00 - 1.00

Choose one of the following pairs of introductory courses: 6 Credit Hours

- PHYS 140. College Physics I [C3PP] 3.00 and
- PHYS 150. College Physics II 3.00

or

- PHYS 240. University Physics I [C3PP] 3.00 and
- PHYS 250. University Physics II 3.00

Choose one of the following pairs of lab courses: 2 Credit Hours

- PHYS 140L. General Physics Laboratory [C3PP] 1.00 and
- PHYS 150L. General Physics Laboratory 1.00

or

- PHYS 240L. University Physics Laboratory I [C3PP] 1.00 and
- PHYS 250L. University Physics Laboratory II 1.00

Choose one of the following: 4 Credit Hours

- BIO 140. Foundations of Biology I (3,3) [C3NS] 4.00
- GEOL 110. Physical Geology [C3NS] 3.00

Total: 39 Credit Hours

Program Concentrations

Each student, in consultation with his/her faculty adviser, will choose one of the following program concentrations:

- Individual Option
- Professional

Professional

Students in this concentration must complete the following courses in addition to core requirements:

Required Courses

- MATH 238. Linear Algebra with Differential Equations 4.00
- PHYS 340. Mechanics 3.00

- PHYS 350. Electricity & Magnetism *3.00*
- Three credits chosen from PHYS courses at the 265-level or higher *3 Credit Hours*

Additional Information

Students are expected to review progress toward completion of the selected program of study with their faculty adviser.

Teaching Licensure Preparation Track

Students pursuing the B.A. in physics and astronomy with a professional concentration may complete a track in teaching licensure at the secondary education level.

In addition to degree and General Education requirements, students must complete BIO 140, GEOL 110, GEOL 110L and MSSE 101. The student must also be admitted to the secondary education program and meet those requirements. The necessary courses and when they are usually taken are shown below.

First Year Courses

- PHYS 105. Foundations of Physics *1.00*
- PHYS 240. University Physics I [C3PP] *3.00*

- PHYS 140L. General Physics Laboratory [C3PP] *1.00*
or
- PHYS 240L. University Physics Laboratory I [C3PP] *1.00*

- PHYS 250. University Physics II *3.00*

- PHYS 150L. General Physics Laboratory *1.00*
or
- PHYS 250L. University Physics Laboratory II *1.00*

- MATH 235. Calculus I [C3QR] *4.00*
- MATH 236. Calculus II *4.00*
- BIO 140. Foundations of Biology I (3,3) [C3NS] *4.00*
- MSSE 101. Orientation to the Profession *1.00*

Second Year Courses

- PHYS 247. Data Acquisition and Analysis Techniques II *1.00*
- PHYS 260. University Physics III *3.00*
- PHYS 270. Modern Physics *4.00*
- PHYS 397. Topics in Physics *1.00 - 4.00*
- MATH 237. Calculus III *4.00*
- MATH 238. Linear Algebra with Differential Equations *4.00*
- CHEM 131. General Chemistry I [C3PP] *3.00*
- CHEM 131L. General Chemistry Laboratory [C3PP] *1.00*
- CHEM 132. General Chemistry II *3.00*
- CHEM 132L. General Chemistry Laboratory *1.00*
- EDUC 300. Foundations of American Education *3.00*

Third Year Courses

- PHYS 340. Mechanics *3.00*
- PHYS 350. Electricity & Magnetism *3.00*
- PHYS 391. Seminar *0.00*
- PHYS 392. Seminar *1.00*
- PHYS elective 265 or higher
- GEOL 110. Physical Geology [C3NS] *3.00*
- GEOL 110L. Physical Geology Laboratory [C3NS] *1.00*
- EDUC 310. Teaching in a Diverse Society *3.00*
- MSSE 370. General Instructional Methods for Grades 6-12 *3.00*
- MSSE 371. Clinical Experience in Adolescent Education *1.00*

Fourth Year Courses

- Two PHYS electives 265 or higher (PHYS 380 recommended)
- PHYS 491-492. Physics Assessment and Seminar *0.00 - 1.00*
- MSSE 470S. Natural Sciences Teaching Methods, Grades 6-8 *3.00*
- MSSE 471. Content Area Field Experiences in Middle Schools
- LED 440. Disciplinary Literacy in Secondary Education *3.00*

Additional Information

To achieve teaching licensure, a student needs to supplement this curriculum with a fifth-year in the College of Education; see their website for more details.

Political Science, Department of

Dr. Jonathan W. Keller,

Department Head

Professors

M. Adams, J. Adolino, C. Blake, A. Broscheid, J. Byrne, J. Chen, M. Cohen, K. Ferraiolo, S. Hammond, M. Jamal, D. Jones, B. Kaussler, J. Keller, T. LaPira, H. Lubert, R. Roberts, K. Rutherford, J. Scherpereel, V. Sulfaro, Y. Yang

Associate Professors

R. Alexander, K. Crawford, K. Grant, J. Hulsey, H. Lee, F. Mayhew, L. Peaslee, N. Swartz, A. Teye, K. Wylie

Assistant Professors

J. Park, M. Richardson, J. Taylor

Lecturer

E. Chisek

Mission Statement

The Department of Political Science offers strong major and minor programs sharing a focus on public concerns. We are committed to providing our students with the tools and competence to succeed in their lives, their graduate education and their careers by instilling academic rigor, information access and research skills, dedication to life-long learning and respect for diversity in cultures, nations and institutions of democracy.

Goals

To carry out the above mission, the Department of Political Science seeks to:

- Offer strong major programs: the B.A. in political science, the B.S. in public policy and administration and the B.A. in international affairs (cross disciplinary).
- Offer strong minor programs: political science, public policy & administration and political communication (cross disciplinary).
- Enhance critical thinking, communication and information gathering skills.
- Foster active learning through research, simulations and internships.

Career Opportunities

The political science department offers programs that lead students to careers in the following fields:

- Administration and management
- Federal, state and local government
- International organizations
- Law
- Not-for-profit organizations
- Politics
- Private sector

To enhance the marketability of its students, the political science department supports career-related internships. For information contact the political science office, Miller Hall, Room 2120, (540)568-6149 or contact the internship coordinator, Dr. Jennifer Taylor (taylo2ja@jmu.edu).

Co-curricular Activities and Organizations

- Pi Alpha Alpha: public administration honor society
- Pi Sigma Alpha: political science honor society
- Pre-Law Society
- Sigma Iota Rho: international affairs honor society
- PASO: JMU Public Affairs Student Organization

Majors in the Department of Political Science

The Department of Political Science offers the B. A. degree with a major in political science, the B.S. degree with a major in public policy and administration and the B.A. degree with a major in international affairs.

Washington Semester

Website: <https://www.jmu.edu/polisci/washington.shtml>

Dr. David Jones,

Program Director

Phone: (202) 422-6161

Email: jones3da@jmu.edu

Location: 1400 16th St. NW, Suite 320, Washington, D.C., 20036

Website: <https://www.jmu.edu/polisci/washington.shtml>

The Washington Semester program enables students to explore the wealth of political and cultural opportunities available in the Washington, D.C. area. The program includes semester-length internships, courses taught on-site, panel discussions by people in various professions, cultural activities, and networking opportunities with JMU alumni working in the DC area.

The Washington Semester program is open to all majors and is offered every semester. Students not majoring in political science, international affairs, or public administration should consult with their departments about how the internship and coursework fits their academic plans; some departments may be willing to arrange course substitutions.

Political Science Minor

A student may minor in political science by completing 19 credit hours of approved courses from the following list. Check with the department office for department availability of the minor.

Courses

- POSC 201. Introduction to Western Political Theory *3.00*
- POSC 225. U.S. Government [C4AE] *4.00*

Choose one upper-level American government course: 3 Credit Hours

- POSC 300. Politics and Film *3.00*
- POSC 301W. The Washington Semester Experience *3.00*
- POSC 302. State & Local Gov *3.00*
- POSC 325. Constitutional Law *3.00*
- POSC 326. Civil Rights *3.00*
- POSC 351. Topics in American Politics *3.00*
- POSC 362. Political Behavior *3.00*
- POSC 364. Political Parties in America *3.00*
- POSC 365. American Political Campaigning *3.00*
- POSC 367. U.S. Immigration Politics and Policy *3.00*
- POSC 368. Interest Groups, Lobbying and Public Policy *3.00*
- POSC 369. Elections and Voting Behavior *3.00*
- POSC 380. The U.S. Presidency *3.00*
- POSC 382. The Role of Religion in American Politics *3.00*
- POSC 384. Minority Group Politics *3.00*
- POSC 385. The U.S. Congress *3.00*
- POSC 386. The U.S. Judiciary *3.00*
- POSC 387. The Appellate Process and Practice *3.00*

- POSC 472. Media and Politics *3.00*
or
- SCOM 472. Media and Politics *3.00*
or
- SMAD 472. Media and Politics *3.00*

**Elective chosen from 300 level courses listed above or from the following: 3
Credit Hours**

- PPA 200. Introduction to Public Policy *3.00*
- PPA 265. Public Administration *3.00*
- POSC 200. Global Politics [C4GE] *3.00*
- POSC 310. Political Theory: Ancient to Early Modern *3.00*
- POSC 315. Political Theory: Early Modern to the 19th Century *3.00*
- POSC 316. Contemporary Political Theory *3.00*
- POSC 321. Political Theory and Ideology *3.00*
- POSC 330. American Political Thought *3.00*
- POSC 333. American Political Thought II: Civil War to the Present *3.00*
- POSC 334. Political Thought of James Madison *3.00*
- POSC 381. Topics in Political Theory *3.00*
- POSC 391. Topics in Public Policy *3.00*

Choose Option One or Option Two: 6 Credit Hours

Option One:

- POSC 230. International Relations *3.00*

Choose one of the following:

- POSC 331. Human Rights in Theory and Practice *3.00*
or
- JUST 331. Human Rights in Theory and Practice *3.00*

- POSC 361. Topics in International Relations *3.00*
- POSC 370. U.S. Foreign Policy *3.00*

- POSC 372. Ethics and International Politics *3.00*
or
- JUST 372. Ethics and International Politics *3.00*

- POSC 392. Peace Studies *3.00*
or
- JUST 392. Peace Studies *3.00*

- POSC 393. Human Security *3.00*
- POSC 395. International Law *3.00*
- POSC 396. International Organizations *3.00*

- POSC 397. The Politics of International Economic Relations 3.00
- POSC 430. International Security and Conflict Management 3.00
- POSC 435. International Terrorism 3.00
- POSC 458. International Political Analysis 3.00

Option Two:

- POSC 240. Comparative Politics 3.00

Choose one of the following:

- POSC 340. Politics of Development 3.00
- POSC 341. Social Movements in the U.S. and Abroad 3.00
- POSC 344. Politics of the European Union 3.00
- POSC 345. Politics of Western Europe 3.00
- POSC 346. Politics of Central and Eastern Europe 3.00
- POSC 347. Comparative Public Policy 3.00
- POSC 348. The Politics of Cultural Pluralism 3.00
- POSC 350. Latin American Politics 3.00
- POSC 353. African Politics 3.00
- POSC 354. Politics of the Middle East 3.00
- POSC 355. East Asian Politics 3.00
- POSC 356. Politics of China 3.00
- POSC 371. Topics in Comparative Politics 3.00

- POSC 383. Women and Politics in Comparative Perspective 3.00
- or
- WGSS 383. Women and Politics in Comparative Perspective 3.00

- POSC 440. Post-Conflict Societies 3.00

Total: 19 Credit Hours

Political Science, B.A.

Majors in the Department of Political Science

The Department of Political Science offers the B. A. degree with a major in political science, the B.S. degree with a major in public policy and administration and the B.A. degree with a major in international affairs.

Coordinator: Dr. Scott Hammond

Location: Miller Hall, Room 2127

Email: hammonsj@jmu.edu

Phone: (540) 568-6313

For a major in political science, the student must satisfactorily complete a minimum of 39 credit hours, including:

- A 17-hour core introducing students to the conduct of political inquiry in the major areas of the discipline, an awareness of global issues and cultural diversity, and the techniques of original research.

- An 18-hour depth requirement in which students take at least one course from three of the major areas of political inquiry and acquire additional experience in the application of research techniques.
- A four-hour capstone experience designed to bring together knowledge gained in different courses into a coherent whole, to foster a capacity for lifelong learning, to connect the major to experiences outside the university and to provide the opportunity to work individually with a faculty member.

Degree and Major Requirements

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Foreign Language classes (intermediate level required) *0-14 Credit Hours*²
- Philosophy course (in addition to General Education courses) *3 Credit Hours*
- University electives *25-36 Credit Hours*
- Major requirements (listed below) *39 Credit Hours*

Total: 120 credit hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² The foreign language requirement may be satisfied by successful completion of the second semester of the intermediate level of the student's chosen language (typically 232) or by placing out of that language through the Department of Foreign Language's placement test.

Major Requirements

Core Requirements

- POSC 225. U.S. Government [C4AE] *4.00*
- POSC 201. Introduction to Western Political Theory *3.00*
- POSC 295. Research Methods *4.00*¹
- POSC 230. International Relations *3.00*
- POSC 240. Comparative Politics *3.00*

Footnote

¹ MATH 220, POSC 225 and either POSC 230 or PPA 265 are prerequisites for POSC 295.

Electives

In addition to the core requirements, political science majors must elect 18 hours of approved courses as shown, including at least one upper-level course from each of the three major areas of political inquiry. Students are encouraged to complete the core requirements before taking elective courses. A political science major may seek permission to count a completed Senior Honors

Project as a three-credit elective within the major. Students must consult with the political science program coordinator prior to conducting an honors project to clarify the specific nature of its potential applicability to the major's elective options.

Elective Courses

Choose one course from each of the four areas: 12 Credit Hours

Comparative Politics

- POSC 340. Politics of Development *3.00*
- POSC 341. Social Movements in the U.S. and Abroad *3.00*
- POSC 344. Politics of the European Union *3.00*
- POSC 345. Politics of Western Europe *3.00*
- POSC 346. Politics of Central and Eastern Europe *3.00*
- POSC 347. Comparative Public Policy *3.00*
- POSC 348. The Politics of Cultural Pluralism *3.00*
- POSC 350. Latin American Politics *3.00*
- POSC 353. African Politics *3.00*
- POSC 354. Politics of the Middle East *3.00*
- POSC 355. East Asian Politics *3.00*
- POSC 356. Politics of China *3.00*
- POSC 371. Topics in Comparative Politics *3.00*

- POSC 383. Women and Politics in Comparative Perspective *3.00*
or
- WGSS 383. Women and Politics in Comparative Perspective *3.00*

- POSC 440. Post-Conflict Societies *3.00*

- POSC 457. Comparative Empires *3.00*
or
- HIST 457. Comparative Empires *3.00*

International Relations

- POSC 331. Human Rights in Theory and Practice *3.00*
or
- JUST 331. Human Rights in Theory and Practice *3.00*

- POSC 361. Topics in International Relations *3.00*
- POSC 370. U.S. Foreign Policy *3.00*

- POSC 372. Ethics and International Politics *3.00*
or
- JUST 372. Ethics and International Politics *3.00*

- POSC 392. Peace Studies *3.00*
or
- JUST 392. Peace Studies *3.00*

- POSC 393. Human Security *3.00*
- POSC 394. International Conflict *3.00*
- POSC 395. International Law *3.00*
- POSC 396. International Organizations *3.00*
- POSC 397. The Politics of International Economic Relations *3.00*
- POSC 430. International Security and Conflict Management *3.00*
- POSC 435. International Terrorism *3.00*
- POSC 458. International Political Analysis *3.00*

Political Theory

- POSC 310. Political Theory: Ancient to Early Modern *3.00*
- POSC 315. Political Theory: Early Modern to the 19th Century *3.00*
- POSC 316. Contemporary Political Theory *3.00*
- POSC 321. Political Theory and Ideology *3.00*
- POSC 330. American Political Thought *3.00*
- POSC 333. American Political Thought II: Civil War to the Present *3.00*
- POSC 334. Political Thought of James Madison *3.00*
- POSC 381. Topics in Political Theory *3.00*

American Government

- POSC 302. State & Local Gov *3.00*
- POSC 325. Constitutional Law *3.00*
- POSC 326. Civil Rights *3.00*
- POSC 351. Topics in American Politics *3.00*
- POSC 362. Political Behavior *3.00*
- POSC 364. Political Parties in America *3.00*
- POSC 365. American Political Campaigning *3.00*
- POSC 367. U.S. Immigration Politics and Policy *3.00*
- POSC 368. Interest Groups, Lobbying and Public Policy *3.00*
- POSC 369. Elections and Voting Behavior *3.00*
- POSC 380. The U.S. Presidency *3.00*
- POSC 382. The Role of Religion in American Politics *3.00*
- POSC 384. Minority Group Politics *3.00*
- POSC 385. The U.S. Congress *3.00*
- POSC 386. The U.S. Judiciary *3.00*
- POSC 387. The Appellate Process and Practice *3.00*
- POSC 472. Media and Politics *3.00*

Two additional electives chosen from the 300 or 400 level: 6 Credit Hours

For three of these six credit hours, students may also take one of the following courses:

- POSC 200. Global Politics [C4GE] *3.00*
- POSC 300. Politics and Film *3.00*
- POSC 301W. The Washington Semester Experience *3.00*
- POSC 391. Topics in Public Policy *3.00*
- POSC 398. Simulations *3.00*

- POSC 493. Political Communication Internship *4.00*
- POSC 493W. Political Communication Internship in Washington *6.00*
- POSC 495. Internship in Political Science *4.00*
- POSC 495W. Washington Semester Internship in Political Science *6.00*
- PPA 200. Introduction to Public Policy *3.00*
- PPA 265. Public Administration *3.00*

Senior Capstone

Students should fulfill the senior capstone requirement for each major and minor separately. This means that senior experiences completed for one major or minor cannot normally be counted for another. Students who have questions about a particular situation should see the academic unit head or appropriate academic unit coordinator for clarification.

- POSC 492. Senior Seminar in Political Science *3.00-4.00*²

Footnote

² This course fulfills the College of Arts and Letters writing-intensive requirement for the major.

Public Policy and Administration Minor

The minor in public policy and administration seeks to give students a foundation in the nature and practice of public policy and public administration. Students get exposure to the application of policy and administration by doing an internship capstone course. The minor in public policy and administration requires 20 credit hours of course work.

Courses

- POSC 225. U.S. Government [C4AE] *4.00*
- PPA 200. Introduction to Public Policy *3.00*
- PPA 265. Public Administration *3.00*

Public Policy: 3 Credit Hours

Choose one:

- POSC 367. U.S. Immigration Politics and Policy *3.00*
- PPA 460. Regionalism and Urban Management *3.00*
- PPA 461. Education and Social Policy *3.00*
- PPA 462. Social Welfare and Local Government Policy *3.00*
- PPA 483. Special Topics in Public Management *3.00* Emerging Issues in Public Administration¹
- PPA 484. Environmental Regulatory Policy and Politics *3.00*

Footnote

¹ When PPA 483 is a policy-related course.

Public Administration: 3 Credit Hours

Choose one of the following:

- MGT 365. Fundamentals of Human Resource Management 3.00
- PPA 381. Budgetary Process 3.00
- PPA 415. Legal Environment of Public Administration 3.00
- PPA 420. Public Management 3.00
- PPA 483. Special Topics in Public Management 3.00 Emerging Issues in Public Administration ²

Footnote

² When PPA 483 is an administration-related course.

Required Capstone: 4 Credit Hours

- PPA 496. Internship in Public Management 4.00

Total: 20 Credit Hours

Public Policy and Administration, Public Management Concentration, B.S.

Coordinator: Dr. Liliokanaio Peaslee

Location: Miller Hall, Room 2167

Email: peaslelx@jmu.edu

Phone: (540) 568-5829

The major in public policy and administration provides students with a general foundation in the nature of public policy, the public workplace and its political, legal and managerial environments. This major prepares students for professional employment and leadership in government and nonprofit organizations. The program consists of a core of courses offering general knowledge essential for understanding and working in the public arena. This core provides students with an appreciation of the political culture and economic environment of public work, measurement techniques and a basic understanding of the policy process.

Students are offered a choice between two concentration options: public policy or public management.

In the public policy concentration students acquire knowledge of the nature, dynamics, implementation and substance of public policy and its analysis. Courses address:

- Policy processes.
- Techniques for analyzing policy options.
- The dynamics and substance of particular policy issues.

The public management concentration emphasizes management and management-related skills. Courses address:

- The legal environment of public work.
- Organization theories.
- Management theories and applications.
- Management best practices.

In addition, courses in both concentrations heighten students' critical, analytical and communication skills through case studies, exercises and the intensive writing requirement. The public policy concentration requires a senior seminar experience that seeks to bring policy theory and analytical skills to bear on a practical issue of public policy. Public management students must

complete the dual capstone requirements of a public management seminar and an internship, requiring an integration of knowledge from both general studies and major studies by focusing students on specific cases and workplace applications.

Because the public policy and administration major develops techniques and skills applicable to varied career paths in public service, students are encouraged to choose a complementary minor with a narrower, substantive focus. The minors recommended for students' consideration include criminal justice, environmental information systems, environmental management, environmental studies, family studies, gerontology, health information systems, nonprofit studies, political communication, substance abuse intervention, telecommunications, urban and regional studies, communication studies, conflict analysis and intervention, sociology, technical and scientific communication, economics, human resource development, computer science, public health and integrated science and technology.

Interested students may apply to participate in the Fifth Year Master of Public Administration degree program, which allows qualified students to earn an M.P.A. degree with one additional year of study. Students should apply for this program in their sophomore year. See the Graduate Catalog for more information.

Degree and Major Requirements

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Quantitative requirement *3 Credit Hours*^{2,3}
- Scientific Literacy requirement *3 Credit Hours*²
- University electives *34 Credit Hours*
- Major requirements (listed below) *39 Credit Hours*

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² In addition to course work taken to fulfill General Education requirements.

³ For this requirement, public policy and administration majors should take MATH 220, the prerequisite for POSC 295, a required core course in the major.

Total: 120 Credit Hours

Major Requirements

Core Requirements

- POSC 225. U.S. Government [C4AE] *4.00*
- ECON 200. Introduction to Macroeconomics [C4GE] *3.00*
- PPA 200. Introduction to Public Policy *3.00*
- PPA 265. Public Administration *3.00*
- POSC 295. Research Methods *4.00*¹

Footnote

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

Total: 17 Credit Hours

Public Management Concentration

Core Requirements: 17 Credit Hours

Required Concentration Courses: 12 Credit Hours

- ACTG 244. Accounting for Non-Business Majors 3.00
- MGT 365. Fundamentals of Human Resource Management 3.00
- PPA 381. Budgetary Process 3.00
- PPA 415. Legal Environment of Public Administration 3.00

Process, Issue and Application course (choose one): 3 Credit Hours

- GEOG 215. Introduction to Geographic Information Science and Cartography 3.00
 - GEOG 216. Earth Observation and GPS 3.00
 - GEOG 344. Globalization and Development 3.00
 - GEOG 345. Geography of Poverty 3.00
 - NPS 300. Introduction to Nonprofits 3.00
 - PPA 460. Regionalism and Urban Management 3.00
 - PPA 461. Education and Social Policy 3.00

Pre-Professional Health Advising

Dr. Sharon Babcock, **Director**

Phone: (540) 568-6652

Email: pph@jmu.edu

Website: <http://www.jmu.edu/pph>

Pre-professional health (PPH) advisory programs outline recommended courses, activities and competencies for students who are preparing for careers in health professions that require masters or doctoral education. PPH programs are advisory; they are not undergraduate majors, minors, concentrations or tracks.

Health profession schools are most concerned with the overall scope and quality of an applicant's undergraduate performance. Students are encouraged to select a major based on interests and aptitudes. Regardless of baccalaureate degree program, competitive applicants must demonstrate excellence in academic accomplishments, prerequisite course work, career exploration, health-related experience, community service and standardized admission tests, as well as intra- and inter-personal competencies. Students are encouraged to establish mentoring relationships with faculty, clinical mentors and supervisors. Pre-professional health advisers are available to assist students in making academic and career-related decisions. Planning and evaluation services are available for students and alumni during the application process to health profession schools.

Requests from current students to declare a PPH minor are reviewed by Pre-Professional Health Advising prior to assigning an advisor. . If the minor has admission standards, those standards will be reviewed prior to approving the declaration request.

Pre-Athletic Training Minor

Dr. Louise Gilchrist, **Coordinator**

Phone: (540) 568-4982

Email: gilchrla@jmu.edu

Pre-professional health minor programs do not ensure that all prerequisites for admission to health professions schools are met. Students should inquire with schools of interest, including JMU, to confirm details of admission requirements.

Additional Information

Requirements for the pre-athletic training minor are based on the prerequisite courses of 60 Athletic Training Education Programs in 16 states (CT, DE, FL, GA, MA, MD, ME, NC, NH, NJ, NY, PA, SC, TN, VA and WV). Students should review individual athletic training programs' prerequisites to assure completion of all prerequisite course work.

Courses: 33 Credit Hours

- BIO 140. Foundations of Biology I (3,3) [C3NS] 4.00
 - BIO 270. Human Physiology (3, 2) [C3NS] 4.00
 - BIO 290. Human Anatomy (3, 3) 4.00
 - CHEM 131. General Chemistry I [C3PP] 3.00
 - CHEM 131L. General Chemistry Laboratory [C3PP] 1.00
 - HTH 210. Medical Terminology 3.00
 - KIN 302. Exercise Physiology 3.00
 - KIN 302L. Exercise Physiology Laboratory 1.00
 - NUTR 280. Nutrition for Wellness 3.00
 - PHYS 140. College Physics I [C3PP] 3.00
 - PHYS 140L. General Physics Laboratory [C3PP] 1.00
 - PSYC 101. General Psychology [C5SD] 3.00
- ATEP 205 (Introduction to Athletic Training) is a *recommended* course.

Recommended elective (not required):

- ATEP 205. Introduction to Athletic Training 3.00

Biomechanics: 3-4 Credit Hours

Choose one of the following:

- KIN 306. Human Biomechanics 3.00 and
- KIN 306L. Human Biomechanics Laboratory 1.00 or
- KIN 407. Biomechanics for the Healthcare Professional 3.00

Total: 45-46 Credit Hours

Pre-Dentistry

Sharon Babcock, **Coordinator**

Phone: (540) 568-6652

Email: babcocks@jmu.edu

Declaring Pre-Dentistry (Admission Standards)

Incoming first year and transfer students can declare pre-dentistry without verification from PPH Advising. After initial enrollment, current students can request to declare the pre-dentistry minor through My Madison but will need approval for the request to be granted. If the student has completed fewer than 13 hours of biology, chemistry, physics or math (BCPM) credits, the request will be granted after verification of course work. If the student has completed 13 hours or more BCPM credits, the request will be granted if the cumulative GPA is 3.00 or greater and the BCPM GPA is 2.90 or greater.

Access to Pre-Dentistry Advising (Progression Standards)

Once students have completed 13 hours of biology, chemistry, physics and math (BCPM) coursework, they become subject to twice yearly review of their academic progress. Performance queries will be conducted after summer and fall semester grades are posted. If the review indicates successful progress (meeting the standard of a 3.00 cumulative GPA and a 2.90 BCPM GPA), they will be invited to formal advising activities. Topics include learning about different dental programs and discussing fulfillment of non-academic requirements and recommendations (shadowing, volunteering, research, leadership). Assuming continued progress, students planning for the applicant stage (typically spring of the junior or senior year) are invited to participate in application planning seminars.

Pre-dentistry students who fall below the standard of a 3.00 cumulative GPA and a 2.90 BCPM GPA are at high risk of not being admitted to a dental school. Targeted advising for these students focuses on strengthening academic skills as well as career exploration. If a student falls below the standard in a subsequent performance review, they will be administratively dropped from the pre-dentistry minor. This action will not impede a student from applying to dental schools, nor will it have an impact on a student's degree program as the pre-dentistry program is not a major.

Students who wish to re-enter the pre-dentistry program may do so as long as they meet the GPA standard (3.00 cumulative GPA and 2.90 BCPM GPA).

Additional Information

Pre-professional health advisory programs do not ensure that all prerequisites for admission to health professions schools are met. Students should inquire with schools of interest, including JMU, to confirm details of admission requirements.

Courses

- BIO 140. Foundations of Biology I (3,3) [C3NS] 4.00
- BIO 150. Foundations of Biology II (3,3) 4.00

English: 6 Credit Hours

- One course in Composition [C1W] (WRTC 103) and one course in Literature [C2L] including HUM 200

Mathematics: 6 Credit Hours

Recommend one course in statistics and one course in calculus

Behavioral (PSYC) or social science (SOCL): 3 Credit Hours

Pre-Medicine

Katie Fisher and Sharon Babcock, **Co-coordinators**

Phone: (540) 568-6652

Email: pph@jmu.edu

Declaring Pre-Medicine (Admission Standards)

Incoming First year and transfer students can declare pre-medicine upon entry to the university. Declaring the minor after initial enrollment can be done in MyMadison. Declaration requests from current students will be reviewed and ultimately approved by PPH Advising.

Access to Pre-Medicine Advising (Progression Standards)

Once students have completed 13 hours of biology, chemistry, physics or math (BCPM) coursework, they become subject to twice yearly review of their academic progress. Performance queries will be conducted after summer and fall semester grades are posted. If the review indicates successful progress (meeting the standard of a 3.00 cumulative GPA and BCPM GPA), they will be invited to formal advising activities. Topics include learning about different medical schools and discussing fulfillment of non-academic requirements and recommendations (shadowing, volunteering, research, leadership). Assuming continued progress, students planning for the applicant stage (typically spring of the junior or senior year) are invited to participate in application planning seminars.

Pre-medicine students who fall below the standard of a 3.00 cumulative GPA and BCPM GPA are at high risk of not being admitted to medical school. Targeted advising for these students focuses on strengthening academic skills as well as career exploration. If a student falls below the standard in a subsequent performance review, they will be administratively dropped from the pre-medicine minor. This action will not impede a student from applying to medical school, nor will it have an impact on a student's degree program as the pre-medicine program is not a major.

Students who wish to re-enter the Pre-medicine minor may do so as long as they meet the GPA standards.

Additional Information

Requirements for the pre-medicine minor are based on the MCAT, successful medical applicant profiles and regional scans of medical schools' prerequisites. Students should review individual medical schools' prerequisites to assure completion of all prerequisite course work.

Courses

Pre-Occupational Therapy

Dr. Louise Gilchrist, **Coordinator**

Phone: (540) 568-4982

Email: gilchrla@jmu.edu

Declaring Pre-Occupational Therapy (Admission Standards)

Incoming freshmen and transfer students can declare pre-OT without verification from PPH Advising. Current students can request declaration of the pre-OT minor (through My Madison) but will need approval for the request to be granted. If the student has completed fewer than 9 hours of the prerequisite courses included in the minor the request will be granted after verification of course work. If the student has completed 9 hours or more of the prerequisite courses, the request will be granted only if the prerequisite GPA is 2.8 or greater.

Access to Pre-Occupational Therapy Advising (Progression Standards)

Once students have completed 9 hours of the prerequisite courses, they become subject to twice yearly review of their academic progress. Performance queries will be conducted after summer and fall semester grades are posted. If the review indicates successful progress (meeting the standard of a 2.8 prerequisite GPA), they will be invited to formal advising activities. Topics include learning about different OT programs, deciding where to apply and discussing fulfillment of non-academic requirements and recommendations (shadowing, volunteering). Assuming continued progress, students will reach the applicant stage (typically spring of the junior year), during which they will be invited to participate in application related activities.

Pre-OT students who fall below the standard of a 2.8 prerequisite GPA are at high risk of not being admitted to a OT program. Targeted advising for these students focuses on improving/developing academic skills as well as career exploration. If students fall below the standard in a subsequent performance review, they will be administratively dropped from the pre-OT minor. This action will not impede a student from applying to OT programs, nor will it have any impact on a student's degree program as the pre-OT designation is not a major.

Students who wish to re-enter the pre-OT minor may do so as long as they meet the GPA standard (2.8 prerequisite GPA).

Additional Information

Pre-professional health programs do not ensure that all prerequisites for admission to health professions schools are met. Students should inquire with schools of interest, including JMU, to confirm details of admission requirements.

Pre-Pharmacy

Mary Hildebrand, **Coordinator**

Phone: (540) 568-6652

Email: pph@jmu.edu

Declaring Pre-Pharmacy (Admission Standards)

Incoming first year and transfer students can declare pre-pharmacy without verification from PPH Advising. After initial enrollment, current students can request to declare the pre-pharmacy minor through My Madison but will need approval for the

request to be granted. If the student has completed fewer than 10 hours of foundational science credits in the pre-pharmacy minor, the request will be granted after verification of course work. If the student has completed 10 or more hours of foundational science credits, the request will be granted if the science GPA is 2.50 or greater.

Access to Pre-Pharmacy Advising (Progression Standards)

Once students have completed 10 hours of foundational biology, chemistry, and physics (BCP) science coursework, they become subject to twice yearly review of their academic progress. Performance queries will be conducted after summer and fall semester grades are posted. If the review indicates successful progress (meeting the standard of a 2.50 BCP GPA), they will be invited to participate in formal advising activities. Topics include learning about different pharmacy schools, strategies for fulfilling non-academic requirements and recommendations (shadowing, volunteering, research, and pharmacy tech certification).

Pre-pharmacy students who fall below the standard of a 2.50 BCP science GPA are at high risk of not being admitted to a pharmacy school. Targeted advising for these students focuses on strengthening academic skills as well as career exploration. If a student falls below the standard in a subsequent performance review, they will be administratively dropped from the pre-pharmacy minor. This action will not impede a student from applying to pharmacy schools, nor will it have an impact on a student's degree program as the pre-pharmacy program is not a major.

Students who wish to re-enter the pre-pharmacy program may do so as long as they meet the science GPA standard (2.50 BCP science GPA).

Additional Information

Pre-professional health programs do not ensure that all prerequisites for admission to health professions schools are met. Students should inquire with pharmacy schools of interest to confirm details of admission requirement.

Pre-Physician Assistant

Katie Fisher, **Coordinator**

Phone: (540) 568-6652

Email: fishermk@jmu.edu

Declaring Pre-Physician Assistant (Admission Standards)

Incoming First year and transfer students can declare pre-physician assistant upon entry to the university. Declaring the minor after initial enrollment can be done in MyMadison. Declaration requests from current students will be reviewed and ultimately approved by PPH Advising.

Access to Pre-Physician Assistant Advising (Progression Standards)

Once students have completed 12 hours of biology or chemistry (BC) coursework, they become subject to twice yearly review of their academic progress. Performance queries will be conducted after summer and fall semester grades are posted. If the review indicates successful progress (meeting the standard of a 3.00 cumulative GPA and a 2.70 BC GPA), they will be invited to formal advising activities. Topics include learning about different PA programs and discussing fulfillment of non-academic requirements and recommendations (shadowing, volunteering, research, leadership). Assuming continued progress, students planning for the applicant stage (typically spring of the junior or senior year) are invited to participate in application planning seminars.

Pre-PA students who fall below the standard of a 3.00 cumulative GPA and a 2.70 BC GPA are at high risk of not being admitted to a PA program. Targeted advising for these students focuses on strengthening academic skills as well as career exploration. If a student falls below the standard in a subsequent performance review, they will be administratively dropped from the pre-PA minor. This action will not impede a student from applying to PA programs, nor will it have an impact on a student's degree program as the pre-PA program is not a major.

Students who wish to re-enter the Pre-Physician Assistant minor may do so as long as they meet the GPA standards.

Additional Information

Pre-professional health programs do not ensure that all prerequisites for admission to health professions schools are met. Students should inquire with schools of interest, including JMU, to confirm details of admission requirements.

- CHEM 131. General Chemistry I [C3PP] 3.00
- CHEM 131L. General Chemistry Laboratory [C3PP] 1.00
- CHEM 132. General Chemistry II 3.00
- CHEM 132L. General Chemistry Laboratory 1.00
- CHEM 241. Organic Chemistry I 3.00
- CHEM 242. Organic Chemistry II 3.00
- CHEM 242L. Organic Chemistry Laboratory 2.00
- CHEM 361. Biochemistry I 3.00
- MATH 220. Elementary Statistics [C3QR] 3.00
- PHYS 140. College Physics I [C3PP] 3.00
- PHYS 140L. General Physics Laboratory [C3PP] 1.00
- PHYS 150. College Physics II 3.00
- PHYS 150L. General Physics Laboratory 1.00
- English, Literature and Writing course work (WRTC 103, ENG or HUM 200) 6 Credit Hours

- Public Speaking course work (SCOM 121, 122 or 123) *3 credit hours*

Intermediate and advanced BIO course work: 13 Credit Hours

Recommend choosing from:

- BIO 320. Comparative Anatomy of Vertebrates (2, 4) *4.00*
- BIO 343. Immunology (3, 0) *3.00*
- BIO 370. Animal Physiology (3, 3) *4.00*
- BIO 420. Medical Parasitology (3, 0) *3.00*
- BIO 480. Advanced Molecular Biology (2, 5) *4.00*
- BIO 482. Human Histology (3, 3) *4.00*
and cell biology

Calculus: 3-4 Credit Hours

Choose from:

- MATH 205. Introductory Calculus I [C3QR] *3.00*
- MATH 231. Calculus with Functions I [C3QR] *3.00*
- MATH 235. Calculus I [C3QR] *4.00*

Recommended electives (not required):

- CHEM 366L. Biochemistry Laboratory *2.00*
- PSYC 101. General Psychology [C5SD] *3.00*

Pre-Professional Programs

Pre-Forensic Studies

Forensic scientists apply the knowledge and techniques of science to the purposes of law. Forensic studies incorporate a wide array of disciplines and can be vital to enforcing criminal laws and government regulations, settling civil disputes, and to protecting public health. Preparation guidelines are outlined for three common areas of graduate study in forensic studies:

Forensic Biology

A biology or chemistry major is recommended with the following:

- BIO 140. Foundations of Biology I (3,3) [C3NS] *4.00*
- BIO 150. Foundations of Biology II (3,3) *4.00*
- BIO 240. Genetics (3,3) *4.00*
- BIO 324. Human Genetics (3, 0) *3.00*
- BIO 343. Immunology (3, 0) *3.00*

- BIO 361. Biochemistry I (3, 0) *3.00*
or
- CHEM 361. Biochemistry I *3.00*

- CRJU 215. Introduction to Criminal Justice 3.00

Forensic Chemistry

A biology or chemistry major is recommended with the following:

- CHEM 375. An Introduction to Materials Science 3.00
or
- MATS 375. An Introduction to Materials Science 3.00
or
- PHYS 375. An Introduction to Materials Science 3.00

- CHEM 331. Physical Chemistry I 3.00
- CHEM 351. Analytical Chemistry 4.00

- CHEM 361. Biochemistry I 3.00
or
- BIO 361. Biochemistry I (3, 0) 3.00

- CRJU 215. Introduction to Criminal Justice 3.00

Forensic Anthropology

An anthropology (biological anthropology concentration) or biology major is recommended with the following:

- ANTH 196. Biological Anthropology [C3NS] 3.00 (*B, R*)

- BIO 270. Human Physiology (3, 2) [C3NS] 4.00
or
- BIO 370. Animal Physiology (3, 3) 4.00

- BIO 290. Human Anatomy (3, 3) 4.00

- BIO 426. Topics in Biology 1.00 - 4.00 (when topic is Forensic Anatomy)
or
- ANTH 395. Special Topics in Anthropology 3.00 (*May be A, B, or C*) (when topic is Forensic Anatomy)

Choose two of the following: 6 Credit Hours

- MATH 321. Analysis of Variance and Experimental Design 3.00
- MATH 324. Applied Nonparametric Statistics 3.00
- MATH 421. Applied Multivariate Statistical Analysis 3.00

Additional Information

Students are encouraged to take advanced course work in BIO 410. Advanced Human Anatomy (1, 6) and ANTH 319. Human Osteology.

Pre-Law

Dr. Melinda Adams, **Coordinator**

Phone: (540) 568-3377

Email: adams2mj@jmu.edu

Students who plan to apply to law school may select their major from a wide range of fields, depending upon their interests. The scope of the law is broad and offers room for individuals of varied educational and intellectual backgrounds. Students should choose courses that provide them with broad informational and cultural preparation and develop their reasoning abilities.

Especially valuable to a pre-law program are courses in:

- Communication, including composition, language and speech, which enable students to express themselves well.
- The humanities and social sciences, which help students to appreciate and perform effectively in their culture and society.
- Logic, mathematics and the natural sciences, which develop skills of fact discrimination, analysis and synthesis.
- Accounting and economics.

Also important to the pre-law program is Phi Alpha Delta, a student organization that organizes law-related activities.

Pre-Theology

Dr. Robert E. Brown, **Coordinator**

Phone: 540-568-5418

Email: brownre@jmu.edu

The pre-theology program prepares students to enter professional schools of religion (divinity schools, seminaries, theological schools). These professional schools prepare the student for a variety of careers, such as ministry, religious education and religious work with youth and others. The program at JMU will provide excellent preparation not only for acceptance at these schools but also for enriched professional training.

A student in this program may major in any field he/she chooses, although the American Association for Theological Schools recommends substantial pre-professional training in philosophy and religion. This professional accrediting agency also recommends a broad background in English language and literature; history (American and European); both the physical and the life sciences; the social sciences (particularly psychology, anthropology and sociology); and interdisciplinary studies on the relationship between the "political" and religion(s) (variously defined); biblical and classical (Greek and Latin) languages and, of course, religion, including the sacred scriptures, history of religious traditions and theology.

Psychology, Department of

TBD, **Department Head**

Phone: (540) 568-6114

Email: TBD

Location: Miller Hall, Room 1120

Website: <http://www.psyc.jmu.edu/undergraduate>

Professors

J. Andre, K. Apple, S. Baker, K. Barron, D. Daniel, J. Dyche, W. Evans, P. Gibson, M. Hall, J. Irons, N. Kerr, J. Kurtz, S. Lovell, C. Lyons, M. Reis-Bergan, B. Saville, M. Stoloff, T. Zinn

Associate Professors

K. Fogler, D. Holt, K. Jakobsen, M. Shoup-Knox, D. Szwedo

Assistant Professors

B. Blankenship, G. Hendy, R. Kondrad, K. Melchiori, J. Taft-Young, S. Upadhyay

Lecturer

K. DuVall

Mission Statement

The mission of the Department of Psychology is to educate students in, and contribute to, the science of psychology.

Goals

The vision of the Department of Psychology is to sustain and advance a nationally recognized department focused on promoting scientific proficiency within the cross disciplinary field of psychology. To that end, the curriculum is designed to provide students with a strong foundation in psychological science that reflects multiple perspectives within the discipline. The hallmarks of our program are learning opportunities that promote the skills necessary to conduct and evaluate research and to interpret findings. The department trains our students to be responsive to emerging trends and apply their knowledge of psychological science as responsible global citizens.

The Department of Psychology is a dynamic contributor to the General Education program and the university community through the delivery of high quality courses and other educational experiences emphasizing psychological science. We also contribute to the M.A. program in psychological science. Our faculty strive to create and implement creative and effective pedagogy, embracing the dual role of teacher/scholar. The department will foster a collegial and collaborative environment within which divergent opinions as well as cultural diversity are respected, valued and promoted.

Co-curricular Activities and Organizations

- Active Minds. This organization promotes mental health, awareness and education and works to reduce the stigma of mental illness.
- Psi Chi. The local chapter of the national honor society in psychology is open to students with a strong interest in psychology and an exceptional academic record.
- Psychology Club. This club is open to all students with an interest in psychology.
- Psychology Service Organization. This organization strives to meet the needs of the JMU and local communities by sponsoring and participating in service projects.

Special Admission Requirements

Students interested in completing the intermediate and advanced courses required for the psychology major must meet the department's progression standards and be fully admitted to the major.

Students who meet all of the following criteria will be allowed to change their status from declared to fully admitted and will be permitted to make progress in the psychology major beyond a few preliminary courses. Equivalent courses completed at another university for which the student has earned JMU approved transfer credit are acceptable.

- Complete PSYC 101. General Psychology [C5SD], with a grade of "C-" or better. Equivalent courses completed at other institutions that transfer to JMU are acceptable.
- Complete MATH 220, MATH 205, MATH 231, MATH 235 or another acceptable math course (<http://psyc.jmu.edu/ug/mathchart.html>) with a grade of "C-" or better. Equivalent courses completed at other institutions that transfer to JMU are acceptable.

- Complete any General Education Psychology course (PSYC 101, PSYC 122 or PSYC 160) with a grade of "B" or higher. Earning a 4 on the AP Psychology exam meets this requirement. With departmental approval, grades from other institutions can fulfill this requirement.
 - Complete an online orientation and application, available from the Department of Psychology website.
- Students can declare at any time and should apply for fully admitted status when they are enrolled in (or have completed) the admissions requirements above. Admission decisions are made at the end of each semester and during the summer. Students not admitted to the major may reapply the following semester.

Retention

All psychology courses taken must carry a grade of "C-" or better to apply to the major. A psychology course completed with a grade of "D" may be credited toward graduation requirements but may not be included in courses credited toward the psychology major.

Prerequisites

Psychology majors must complete PSYC 101 and two statistics and research methodology courses (PSYC 210-PSYC 211 or PSYC 212-PSYC 213) before enrolling in courses numbered 330 and above. The prerequisites for PSYC 210 and PSYC 212 are any mathematics course numbered 205 or above and PSYC 101. Most psychology courses numbered 330 and above have specific prerequisites. See course listings for details. Non-psychology students may enroll in the 300- and 400-level courses only if they have fulfilled course prerequisites.

Registration and Assessment

During registration, psychology majors will be given priority for course selection. Graduating majors must participate in assessment activities. Assessment information helps the faculty modify the curriculum to meet student needs.

Psychology, B.A.

Degree and Major Requirements

A student must complete a minimum of 44 PSYC credits and at least 60 non-PSYC credits.

Degree and Major Requirements

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Foreign Language classes (intermediate level required) *0-14 Credit Hours*
- Philosophy course(s) (in addition to General Education courses) *3 Credit Hours*
- Major requirements (listed below) *44 Credit Hours*
- Electives *18-32 Credit Hours*

Total: 120 Credit Hours

Major Requirements

The courses listed below are required of all students pursuing a Bachelor of Arts degree, regardless of whether psychology is their first or second major.

- PSYC 101. General Psychology [C5SD] 3.00

Methodology Core: 8 Credit Hours

PSYC 210 and PSYC 211 are offered every semester; PSYC 212 is offered only during the fall semester; PSYC 213 is offered only during the spring semester.

Choose one of the following sequences:

- PSYC 210. Psychological Measurement and Statistics 4.00 and
- PSYC 211. Psychological Research Methods 4.00

- PSYC 212. Psychological Research Design and Data Analysis I 4.00 and
- PSYC 213. Psychological Research Design and Data Analysis II 4.00

SS Content Core – Psychology as a Social Science: 9 Credit Hours

Choose at least three of the following:

- PSYC 330. Psychology of Personality 3.00
- PSYC 335. Abnormal Psychology 3.00
- PSYC 345. Social Psychology 3.00
- PSYC 365. Developmental Psychology 3.00

NS Content Core – Psychology as a Natural Science: 9 Credit Hours

Choose at least three of the following:

- PSYC 375. Sensation & Perception 3.00
or
- BIO 375. Sensation and Perception 3.00

- PSYC 380. Cognitive Psychology 3.00

- PSYC 385. Biopsychology 3.00
or
- BIO 385. Biopsychology 3.00

- PSYC 390. Psychology of Learning 3.00

- PSYC 395. Comparative Animal Behavior 3.00
or
- BIO 395. Comparative Animal Behavior (3, 0) 3.00

Upper Level Specialty Content Courses: 3 Credit Hours

Choose at least one of the following:

- PSYC 400. Advanced Topics in Psychology *1.00 - 3.00*
- PSYC 410. Psychology of the Workplace *3.00*
- PSYC 415. Forensic Psychology *3.00*
- PSYC 420. Advanced Psychological Statistics *3.00*
- PSYC 425. School Psychology *3.00*
- PSYC 427. Tests and Measurements *3.00*
- PSYC 428. Educational Psychology *3.00*
- PSYC 430. Clinical Psychology *3.00*
- PSYC 435. Community Psychology *3.00*
- PSYC 450. Psychology of Child Abuse and Neglect *3.00*
- PSYC 452. Child Psychopathology *3.00*
- PSYC 460. Community Psychology Within Developing Societies *3.00*
- PSYC 461. Advanced Study Abroad in Psychology *1.00-4.00*
- PSYC 475. Psychology of Adulthood *3.00*
- PSYC 480. Applied Behavior Analysis *3.00*

Psychology electives: 9 Credit Hours

At least three hours must be at the 400 level

Capstone course: 3 Credit Hours

Departmental approval is required for students to enroll in more than one psychology capstone course.

Choose one of the following:

- PSYC 492. History of Psychology *3.00*
- PSYC 493. Laboratory in Psychology *3.00*
- PSYC 495. Field Placement in Psychology *4.00*
- PSYC 497. Senior Seminar *3.00*²

- PSYC 499A. Honors *2.00*²
and
- PSYC 499B. Honors *2.00*²
and
- PSYC 499C. Honors *2.00*²

Sociocultural Competency: 0 Credit Hours

Choose one of the following:

- PSYC 220. Psychology and Culture *3.00*
- PSYC 308. Health Psychology *3.00*
- PSYC 310. The Psychology of Women and Gender *3.00*
- PSYC 320. Diversity Issues in Psychology *3.00*
- PSYC 325. Counseling Psychology *3.00*

- PSYC 410. Psychology of the Workplace 3.00
- PSYC 460. Community Psychology Within Developing Societies 3.00
- Other course sections that meet the sociocultural competency requirement

Total: 44 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² Some sections of this course may meet the sociocultural awareness requirement depending on the content; when this course does meet the requirement it will be listed in the notes section of the course listing in MyMadison.

Recommended Schedule for Majors

The following program sample is intended as a guide. Courses must be taken in the sequence outlined; however, the semester during which a particular course is taken depends on a number of factors, including readiness to take 200-level math, the semester the psychology major is started and other majors or minors the student is completing.

Students are encouraged to meet regularly with their psychology academic adviser to plan their personal course schedule. Because of course sequencing requirements, even with the most compressed program, a minimum of five semesters (or four semesters and summer school) is required to complete the psychology major.

First Year

First Semester

- MATH 220. Elementary Statistics [C3QR] 3.00 ¹
- PSYC 101. General Psychology [C5SD] 3.00
- General Education courses 9 *Credit Hours*

Total: 15 Credit Hours

Second Semester

- General Education, B.A./B.S. degree requirement, B.S. Psychology Cognate and/or minor program courses 15 *Credit Hours*

Total: 15 Credit Hours

Second Year

First Semester

- PSYC 210. Psychological Measurement and Statistics 4.00 ²
or

- PSYC 212. Psychological Research Design and Data Analysis I *4.00*²
- General Education, B.A./B.S. degree requirement, B.S. Psychology Cognate, minor program and/or Psychology elective courses *11 Credit Hours*

Total: 15 Credit Hours

Second Semester

- PSYC 211. Psychological Research Methods *4.00*
or
- PSYC 213. Psychological Research Design and Data Analysis II *4.00*⁴
- General Education, B.A./B.S. degree requirement, B.S. Psychology Cognate, minor program and/or Psychology elective courses *11 Credit Hours*

Total: 15 Credit Hours

Third Year

Courses

- SS content core courses *9 Credit Hours*
- NS content core courses *9 Credit Hours*
- Minor program courses or electives *12 Credit Hours*

Total: 30 Credit Hours

Fourth Year

Courses

- Psychology Upper level Specialty Content Course *3 Credit Hours*
- Psychology 400 level elective *3 Credit Hours*
- Psychology capstone course *3 Credit Hours*
- Psychology, minor program or elective courses *21 Credit Hours*

Total: 30 Credit Hours

Footnotes

¹ A preliminary math course may be suggested after placement examinations. If suggested, the preliminary course should be taken first semester and MATH 220 second semester. Other 200-level mathematics courses may be substituted for MATH 220 . Any MATH course numbered 205 or above is an acceptable prerequisite for the psychology major.

² Any MATH course numbered 205 or above is a prerequisite for PSYC 210 and PSYC 212. MATH 220 is recommended.

³ PSYC 210 is a prerequisite for PSYC 211 .

⁴ PSYC 212 is a prerequisite for PSYC 213.

Recommended Courses

The following courses are recommended for all psychology majors especially those who plan to pursue advanced study at the graduate level after earning their bachelor's degrees.

Participate in experiential learning, such as:

- PSYC 202. Directed Studies in Psychology *1.00 - 3.00*
- PSYC 203. Directed Research in Psychology *1.00 - 3.00*
- PSYC 402. Independent Study in Psychology *1.00 - 4.00*
- PSYC 403. Independent Research in Psychology *1.00 - 4.00*
- PSYC 495. Field Placement in Psychology *4.00*

- PSYC 499A. Honors *2.00* and
- PSYC 499B. Honors *2.00* and
- PSYC 499C. Honors *2.00*

Taking an advanced statistics course is highly recommended. Consider the following:

- MATH 309. SAS Programming and Data Management *3.00*
- MATH 321. Analysis of Variance and Experimental Design *3.00*
- MATH 322. Applied Linear Regression *3.00*
- MATH 324. Applied Nonparametric Statistics *3.00*
- MATH 325. Survey Sampling Methods *3.00*
- MATH 327. Categorical Data Analysis *3.00*

Additional Information

A minor or a selection of courses from other departments that complements the psychology major for the professional field you are pursuing might be helpful. Discuss your professional goals with your faculty adviser and ask for recommendations. Consider taking courses that emphasize writing skills, quantitative skills, critical thinking and analysis and/or oral communication.

Students should discuss their career aspirations with their academic adviser throughout their academic program. Students interested in applying to graduate school should discuss the necessary preparation with their adviser early in their academic program. Students are encouraged to visit the department's Peer Advising Office in Miller Hall where materials are available about career and graduate school opportunities.

Other Psychology Programs

Graduate Programs

The Department of Graduate Psychology at James Madison University offers the following graduate degree programs:

Master of Arts

- Clinical Mental Health Counseling
- Psychological Sciences
- School Psychology

Master of Education

- School Counseling
- College Student Personnel Administration

Educational Specialist

- Counseling Psychology
- School Psychology

Doctor of Philosophy

- Assessment and Measurement
- Counseling and Supervision

Doctor of Psychology

- Combined/Integrated Program in Clinical and School Psychology
- Additional information about these programs, including admission requirements and procedures, is available at <http://psyc.jmu.edu/gradpsyc>.

Psychology, B.S.

Degree and Major Requirements

A student must complete a minimum of 44 PSYC credits and at least 60 non-PSYC credits.

Degree and Major Requirements

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Quantitative requirement (in addition to General Education) *3 Credit Hours*
- Scientific Literacy requirement (in addition to General Education) *3-4 Credit Hours*

- Major requirements (including cognate, listed below) *47-51 Credit Hours*
- Electives *18-32 Credit Hours*

Total: 120 Credit Hours

Footnote

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

Major Requirements

The courses and cognate described below are required of all students pursuing a Bachelor of Science degree, regardless of whether psychology is their first or second major.

- PSYC 101. General Psychology [C5SD] *3.00*

Choose one of the following sequences: 8 Credit Hours

- PSYC 210. Psychological Measurement and Statistics *4.00* and
- PSYC 211. Psychological Research Methods *4.00*
or
- PSYC 212. Psychological Research Design and Data Analysis I *4.00* and
- PSYC 213. Psychological Research Design and Data Analysis II *4.00*

SS Content Core – Psychology as a Social Science: 9 Credit Hours

Choose at least three of the following:

- PSYC 330. Psychology of Personality *3.00*
- PSYC 335. Abnormal Psychology *3.00*
- PSYC 345. Social Psychology *3.00*
- PSYC 365. Developmental Psychology *3.00*

NS Content Core – Psychology as a Natural Science: 6 Credit Hours

Choose at least two of the following:

- PSYC 375. Sensation & Perception *3.00*
or
- BIO 375. Sensation and Perception *3.00*

- PSYC 380. Cognitive Psychology *3.00*
- PSYC 390. Psychology of Learning *3.00*

- PSYC 395. Comparative Animal Behavior *3.00*
or
- BIO 395. Comparative Animal Behavior (3, 0) *3.00*

Biopsychology: 3 Credit Hours

- PSYC 385. Biopsychology 3.00
- or
- BIO 385. Biopsychology 3.00

Upper Level Specialty Content Courses: 3 Credit Hours

Choose at least one of the following:

- PSYC 400. Advanced Topics in Psychology 1.00 - 3.00²
- PSYC 410. Psychology of the Workplace 3.00
- PSYC 415. Forensic Psychology 3.00
- PSYC 420. Advanced Psychological Statistics 3.00
- PSYC 425. School Psychology 3.00
- PSYC 427. Tests and Measurements 3.00
- PSYC 428. Educational Psychology 3.00
- PSYC 430. Clinical Psychology 3.00
- PSYC 435. Community Psychology 3.00
- PSYC 450. Psychology of Child Abuse and Neglect 3.00
- PSYC 452. Child Psychopathology 3.00
- PSYC 460. Community Psychology Within Developing Societies 3.00
- PSYC 461. Advanced Study Abroad in Psychology 1.00-4.00
- PSYC 475. Psychology of Adulthood 3.00
- PSYC 480. Applied Behavior Analysis 3.00

Psychology electives: 9 Credit Hours

At least three hours must be at the 400 level

Capstone course: 3 Credit Hours

Departmental approval is required for students to enroll in more than one capstone course.

Choose one of the following:

- PSYC 492. History of Psychology 3.00
- PSYC 493. Laboratory in Psychology 3.00
- PSYC 495. Field Placement in Psychology 4.00
- PSYC 497. Senior Seminar 3.00²

- PSYC 499A. Honors 2.00² and
- PSYC 499B. Honors 2.00² and
- PSYC 499C. Honors 2.00²

Sociocultural Competency: 0 Credit Hours

Choose one of the following:

- PSYC 220. Psychology and Culture 3.00

- PSYC 308. Health Psychology 3.00
- PSYC 310. The Psychology of Women and Gender 3.00
- PSYC 320. Diversity Issues in Psychology 3.00
- PSYC 325. Counseling Psychology 3.00
- PSYC 410. Psychology of the Workplace 3.00
- PSYC 460. Community Psychology Within Developing Societies 3.00

Total: 44 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² Some sections of this course may meet the sociocultural awareness requirement depending on the content; when this course does meet the requirement, it will be listed in the notes section of the course listing in MyMadison.

Cognate Requirements

Quantitative Competency: 6-9 Credit Hours

(This may include credit hours that count toward General Education and degree requirements.)

Choose one of the following:

- Two 200-level MATH courses
- or
- One 200-level MATH course and six credits of additional MATH courses at any level

Scientific Literacy: 6 Credit Hours

(These courses are taken in addition to the General Education requirement. They may count toward the B.S. degree requirement, second major and/or minor requirements.)

- Choose at least two courses from the list of courses meeting B.S. degree scientific literacy requirements.

Recommended Schedule for Majors

The following program sample is intended as a guide. Courses must be taken in the sequence outlined; however, the semester during which a particular course is taken depends on a number of factors, including readiness to take 200-level math, the semester the psychology major is started and other majors or minors the student is completing.

Students are encouraged to meet regularly with their psychology academic adviser to plan their personal course schedule. Because of course sequencing requirements, even with the most compressed program, a minimum of five semesters (or four semesters and summer school) is required to complete the psychology major.

Footnotes

¹ A preliminary math course may be suggested after placement examinations. If suggested, the preliminary course should be taken first semester and MATH 220 second semester. Other 200-level mathematics courses may be substituted for MATH 220 . Any MATH course numbered 205 or above is an acceptable prerequisite for the psychology major.

² Any MATH course numbered 205 or above is a prerequisite for PSYC 210 and PSYC 212. MATH 220 is recommended.

³ PSYC 210 is a prerequisite for PSYC 211 .

⁴ PSYC 212 is a prerequisite for PSYC 213.

Recommended Courses

The following courses are recommended for all psychology majors especially those who plan to pursue advanced study at the graduate level after earning their bachelor's degrees.

Participate in experiential learning, such as:

- PSYC 202. Directed Studies in Psychology *1.00 - 3.00*
- PSYC 203. Directed Research in Psychology *1.00 - 3.00*
- PSYC 402. Independent Study in Psychology *1.00 - 4.00*
- PSYC 403. Independent Research in Psychology *1.00 - 4.00*
- PSYC 495. Field Placement in Psychology *4.00*

- PSYC 499A. Honors *2.00* and
- PSYC 499B. Honors *2.00* and
- PSYC 499C. Honors *2.00*

Taking an advanced statistics course is highly recommended. Consider the following:

- MATH 309. SAS Programming and Data Management *3.00*
- MATH 321. Analysis of Variance and Experimental Design *3.00*
- MATH 322. Applied Linear Regression *3.00*
- MATH 324. Applied Nonparametric Statistics *3.00*
- MATH 325. Survey Sampling Methods *3.00*
- MATH 327. Categorical Data Analysis *3.00*

Additional Information

A minor or a selection of courses from other departments that complements the psychology major for the professional field you are pursuing might be helpful. Discuss your professional goals with your faculty adviser and ask for recommendations. Consider taking courses that emphasize writing skills, quantitative skills, critical thinking and analysis and/or oral communication.

Students should discuss their career aspirations with their academic adviser throughout their academic program. Students interested in applying to graduate school should discuss the necessary preparation with their adviser early in their academic program. Students are encouraged to visit the department's Peer Advising Office in Miller Hall where materials are available about career and graduate school opportunities.

Other Psychology Programs

Graduate Programs

The Department of Graduate Psychology at James Madison University offers the following graduate degree programs:

Master of Arts

- Clinical Mental Health Counseling
- Psychological Sciences
- School Psychology

Master of Education

- School Counseling
- College Student Personnel Administration

Educational Specialist

- Counseling Psychology
- School Psychology

Doctor of Philosophy

- Assessment and Measurement
- Counseling and Supervision

Doctor of Psychology

- Combined/Integrated Program in Clinical and School Psychology

Additional information about these programs, including admission requirements and procedures, is available at <http://psyc.jmu.edu/gradpsyc>.

Professors

B.J. Bryson, C. Hunter, L. McGuire, H. Yeom

Associate Professors

N. Poe

Assistant Professors

S. Isom, K. Myers, L. Trull

Mission Statement

The Department of Social Work prepares generalist social workers committed to strengthening community life for diverse individuals, families and organizations and promoting social justice through advocacy and action. It offers a program, accredited by the Council on Social Work Education, which leads to the B.S.W. degree. In addition, the department offers minors in family studies, gerontology and nonprofit studies.

The Department of Social Work is committed to the following:

- Preparing students to work effectively in a broad spectrum of social service agencies by providing an environment geared to addressing poverty, multiple forms of oppression, social injustice and other human rights violations.
- Preparing students for advanced academic study by providing an environment geared toward achieving academic excellence.
- Advancing excellence and integrity through the development of high quality academic programs as well as contributions to professional knowledge and service.
- Responding to the professional and the university's service region by providing supportive services and continuing education opportunities.

Career Opportunities and Marketable Skills

Career Opportunities

- Aging services
- Child and adult day care centers
- Children and youth services
- Community action agencies
- Criminal justice agencies
- Domestic violence programs
- Family service agencies
- Homeless shelters
- Hospitals/home health programs/hospices
- Income maintenance programs
- Legal services agencies

- Behavioral and mental health services
- Services to people with developmental disabilities
- Nursing homes and residential communities
- Public child welfare/child protection services
- Residential treatment facilities
- School programs
- Substance abuse programs
- Vocational rehabilitation services

Marketable Skills

- Advocacy
- Assessment
- Case management/brokering
- Communication
- Community outreach
- Crisis intervention
- Group facilitation
- Intake/referral
- Intervention/service planning
- Interviewing
- Networking
- Policy analysis
- Problem solving
- Program development/evaluation
- Recording/writing
- Relationship-building/interpersonal
- Research
- Service provision
- Team/group/collaborative

Co-curricular Activities and Organizations

The Social Work Organization (SWO) offers the opportunity to socialize, meet professionals and volunteer in the community. Membership in SWO is open to any student interested in a career in the helping professions.

Phi Alpha Honor Society for Social Work's purpose is to promote academic excellence among social work students. Membership in Phi Alpha is by invitation to students with a minimum of nine credit hours in required social work course, holding a major grade point average (GPA) of 3.25 and a cumulative GPA of 3.0.

Admission Requirements

Social Work Program

Students may declare a major in social work at any time; however, they must apply for admission to the social work program the semester following completion of SOWK 287. Intro to Social Work and SOWK 288. Human Rights, Social, Economic and Environmental Justice. For unconditional admittance, students must have a cumulative GPA of 2.0 with no single grade lower than a "C" (2.0) in SOWK 287 and SOWK 288, and have completed the 20 hours of community service work required in SOWK

287. Students are evaluated on the basis of community service and life experiences, academic performance, communication skills, work related habits, ability to work with others, motivation, value orientation and career plans. Students must complete this process or admission to upper-level courses will be restricted. See the Social Work Handbook or the social work website for guidelines.

Applications are reviewed by two or more social work faculty members who make a recommendation to the head of the social work department. The student will be notified of the decision in writing. Decisions are to admit, to admit conditionally, not to admit or to defer decision. You will have one opportunity per semester to resubmit the application. If you fail to submit or resubmit a document that is still incorrect, you will be required to wait until the next semester deadline to resubmit. While this could potentially slow your progression in the major, it acknowledges your role of accountability in the process, a quality that will be essential for professional practice.

If admitted conditionally, the conditions for acceptance will be described. If the decision is deferred, the student will be notified in writing as to why. If not admitted, the student may appeal the decision to the head of the Department of Social Work.

Field Practicum Application

Students admitted into the social work practicum are seniors who have completed the core social work requirements, with no grade lower than a "C" (2.0) in SOWK 287, SOWK 288, SOWK 305, SOWK 317, SOWK 320, SOWK 335, SOWK 465, SOWK 466, SOWK 467 and SOWK 493 have an overall GPA of 2.0, and who have completed 50 community service hours related to human services after SOWK 287, are eligible for field practicum.

During the field practicum, students spend four days a week for one semester completing a minimum of 472 hours of directed field practice. Students seeking admission to SOWK 481. Social Work Field Practicum I and SOWK 482. Social Work Field Practicum II must complete a field placement application and interview with the director of field placement. The field placement director, with the assistance of social work faculty members, will determine the acceptance and placement of students.

See the Social Work Student Handbook or the social work website for the field application, documentation of community service guidelines and guidelines for the placement process. Students must have no grade lower than a "C" (2.0) in SOWK 481, SOWK 482 and SOWK 494, which is taken concurrently with the field practicum.

Social Work, B.S.W.

Degree and Major Requirements

Degree Requirements

Required Courses

- General Education courses *41 Credit Hours*¹
- Social Work core courses *44 Credit Hours*
- Social Work electives *6 Credit Hours*
- Electives *31-34 Credit Hours*

Total: 120 Credit Hours

Footnote

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

Major Requirements

Core Courses

- SOWK 287. Intro to Social Work *3.00*
- SOWK 288. Human Rights, Social, Economic and Environmental Justice *3.00*
- SOWK 305. Social Work Research Methods *3.00*
- SOWK 317. Skills for Generalist Social Work *3.00*
- SOWK 320. Human Behavior in the Social Environment *3.00*
- SOWK 335. Social Policy *3.00*
- SOWK 465. Social Work Practice in Mezzo Systems *3.00*
- SOWK 466. Social Work Practice in Micro Systems *3.00*
- SOWK 467. Social Work Practice in Macro Systems *3.00*
- SOWK 481. Social Work Field Practicum I *6.00*
- SOWK 482. Social Work Field Practicum II *6.00*
- SOWK 493. Professional Forum I: Preparation for Field *1.00*
- SOWK 494. Professional Forum II: Transition to Professional Practice *3.00*
- SOWK Electives: Elective courses are offered on a rotating basis. *6 Credit Hours*
- IPE 415. Ethical Decision-Making in Healthcare: an Interprofessional Approach *1.00*

Total: 50 Credit Hours

Additional Information

The minimum requirement for the B.S.W. degree is completion of the General Education requirements, 44 credit hours of core social work courses, prerequisite courses as specified in course descriptions and elective hours, six of which must be in social work, for a total of 120 credit hours. If a grade of "C" (2.0) or above is not achieved the first time a social work course is taken, the student may repeat the course only once. All social work majors are expected to abide by the NASW Code of Ethics. Additionally, all majors participate in social work student outcome assessment measures.

Recommended Schedule for Majors

First Year

- Cluster One: Skills for the 21st Century *9-12 Credit Hours*
- General Education courses *18-21 Credit Hours*¹

Total: 27-33 Credit Hours

Second Year

- SOWK 287. Intro to Social Work *3.00*
- SOWK 288. Human Rights, Social, Economic and Environmental Justice *3.00*

Total: 27-33 Credit Hours

Third Year

- SOWK 305. Social Work Research Methods 3.00²
- SOWK 317. Skills for Generalist Social Work 3.00
- SOWK 320. Human Behavior in the Social Environment 3.00²
- SOWK 335. Social Policy 3.00²
- SOWK elective 3 Credit Hours
- Electives 15 Credit Hours

Total: 30 Credit Hours

Fourth Year

- SOWK 465. Social Work Practice in Mezzo Systems 3.00²
- SOWK 466. Social Work Practice in Micro Systems 3.00²
- SOWK 467. Social Work Practice in Macro Systems 3.00²
- IPE 415. Ethical Decision-Making in Healthcare: an Interprofessional Approach 1.00
- SOWK 493. Professional Forum I: Preparation for Field 1.00
- SOWK elective 3 Credit Hours
- Elective 3 Credit Hours
- SOWK 481. Social Work Field Practicum I 6.00²
- SOWK 482. Social Work Field Practicum II 6.00²
- SOWK 494. Professional Forum II: Transition to Professional Practice 3.00²

Total: 32 Credit Hours

Footnotes

¹ Certain General Education courses may also meet prerequisite requirements for social work courses. Pay close attention to General Education requirements when selecting the following courses: MATH 220, Cluster 3; ANTH 195, POSC 225 and SOCI 110, Cluster 4; PSYC 101 or PSYC 160, Cluster 5.

² Check prerequisite requirements.

Affiliated Cross Disciplinary Program:

- Historical Archaeology Minor

Anthropology Minor

Anthropology Minor

Students complete a minor in anthropology by completing 18 hours in anthropology including the core courses ANTH 195. Cultural Anthropology [C4GE]; ANTH 196. Biological Anthropology [C3NS] and ANTH 197. Archaeology. Students must receive at least a "C-" in a class to have it count toward the minor.

Anthropology Course Designations

Archaeology (A)

- ANTH 197. Archaeology 3.00 (A,R)
- ANTH 205. Buried Cities, Lost Tribes: The Rise and Fall of Early Human Societies [C2HQC] 3.00 (A)
- ANTH 250. Anthropology of the American Southwest 3.00 (A)
- ANTH 307. Climate, Culture and Change 3.00 (A)
- ANTH 311. Archaeology of Virginia 3.00 (A)
- ANTH 312. The Native Americans 3.00 (A)
- ANTH 325. Aztec, Maya & Their Predecessors 3.00 (A)
- ANTH 327. Ancient North American Civilizations 3.00 (A)
- ANTH 331. Historical Archaeology 3.00 (A)
- ANTH 366. Anthropology of War 3.00 (A, C)
- ANTH 391. Study Abroad 1.00 - 6.00 (May be A, B, C, F)
- ANTH 395. Special Topics in Anthropology 3.00 (May be A,B, or C)
- ANTH 410. Spatial Analysis for Anthropologists 4.00 (A,B or C)

- ANTH 455. Archaeology: Methods of Analysis and Interpretation 4.00 (A,F)
- ANTH 486. Internship in Anthropology 1.00 - 6.00 (May be A,B or C)
- ANTH 490. Special Studies in Anthropology 1.00 - 3.00 (May be A, B or C)
- ANTH 492. Material Culture 3.00 (A)
- ANTH 494. Field Techniques in Archaeology 4.00 - 8.00 (A,F)
- ANTH 496. Research Thesis 3.00 (A)
- ANTH 499. Honors Thesis 6.00 (May be A, B, or C). Three Semesters

Biological Anthropology (B)

- ANTH 196. Biological Anthropology [C3NS] 3.00 (B, R)
- ANTH 315. Human Evolution 3.00 (B)
- ANTH 316. Human Evolutionary Psychology 3.00 (B)
- ANTH 317. Primate Evolutionary Ecology 3.00 (B)
- ANTH 318. The Evolution of Primate Sexuality and Reproduction 3.00 (B)
- ANTH 319. Human Osteology 3.00 (B)
- ANTH 352. Birth, Death, Sex: Exploring Demography 3.00 (B,C)
- ANTH 391. Study Abroad 1.00 - 6.00 (May be A, B, C, F)
- ANTH 395. Special Topics in Anthropology 3.00 (May be A,B, or C)
- ANTH 410. Spatial Analysis for Anthropologists 4.00 (A,B or C)
- ANTH 415. Anthropological Genetics 3.00 (B)
- ANTH 430. Primate Conservation Biology 3.00 (B)
- ANTH 445. Methods and Research Perspectives in Biological Anthropology (B) 4.00
- ANTH 486. Internship in Anthropology 1.00 - 6.00 (May be A,B or C)
- ANTH 490. Special Studies in Anthropology 1.00 - 3.00 (May be A, B or C)
- ANTH 499. Honors Thesis 6.00 (May be A, B, or C). Three Semesters

Cultural Anthropology (C)

- ANTH 195. Cultural Anthropology [C4GE] 3.00 (C, R)
- ANTH 265. Peoples and Cultures of Latin America and the Caribbean 3.00 (C).
- ANTH 280. Peoples and Cultures of Sub-Saharan Africa 3.00 (C)
- ANTH 295. People and Cultures of East Asia 3.00 (C)
- ANTH 300. The Anthropology of Food 3.00 (C)
- ANTH 305. Language and Culture 3.00 (C)
- ANTH 306. Japanese Society and Culture 3.00 (C)
- ANTH 323. Anthropology and Photography 3.00 (C)
- ANTH 324. Mindfulness and Anthropology 3.00 (C)
- ANTH 350. Magic, Witchcraft and Religion 3.00 (C)
- ANTH 352. Birth, Death, Sex: Exploring Demography 3.00 (B,C)
- ANTH 360. Medical Anthropology 3.00 (C)
- ANTH 364. U.S./Latin American Borders 3.00 (C)
- ANTH 366. Anthropology of War 3.00 (A, C)
- ANTH 368. Contemporary American Culture 3.00 (C)
- ANTH 370. Topics in the Anthropology of Gender 3.00 (C)
- ANTH 375. Anthropological Theory 3.00 (C,R,W)
- ANTH 376. Anthropology of Reproduction 3.00 (C)
- ANTH 377. Space/Culture/Power 3.00 (C)
- ANTH 388. Prisons, Punishment and the State 3.00
- ANTH 389. Ethnographic Experience in Dominica 3.00 (C)

- ANTH 390. Topics in Cultural Studies 3.00 (C)
- ANTH 391. Study Abroad 1.00 - 6.00 (May be A, B, C, F)
- ANTH 395. Special Topics in Anthropology 3.00 (May be A,B, or C)
- ANTH 405. Topics in Linguistic Anthropology 3.00 (C)
- ANTH 410. Spatial Analysis for Anthropologists 4.00 (A,B or C)
- ANTH 411. Topics in Ethnographic Film 3.00 (C)
- ANTH 435. Ethnographic Genres and Methods 4.00 (C,F)
- ANTH 436. Afro-Latin America 3.00 (C)
- ANTH 486. Internship in Anthropology 1.00 - 6.00 (May be A,B or C)
- ANTH 490. Special Studies in Anthropology 1.00 - 3.00 (May be A, B or C)
- ANTH 499. Honors Thesis 6.00 (May be A, B, or C). Three Semesters

Field Experience (F)

- ANTH 391. Study Abroad 1.00 - 6.00 (May be A, B, C, F)
- ANTH 435. Ethnographic Genres and Methods 4.00 (C,F)
- ANTH 455. Archaeology: Methods of Analysis and Interpretation 4.00 (A,F)
- ANTH 494. Field Techniques in Archaeology 4.00 - 8.00 (A,F)

Required for All Anthropology Majors (R)

- ANTH 195. Cultural Anthropology [C4GE] 3.00 (C, R)
- ANTH 196. Biological Anthropology [C3NS] 3.00 (B, R)
- ANTH 197. Archaeology 3.00 (A,R)
- ANTH 201. The Discipline of Anthropology 1.00 (R)
- ANTH 375. Anthropological Theory 3.00 (C,R,W)

Writing Intensive (W)

- ANTH 375. Anthropological Theory 3.00 (C,R,W)

Anthropology, Archaeology Concentration, B.A.

Degree Requirements

Required Courses

- General Education 41 Credit Hours¹
- Foreign Language classes (intermediate level required) 0-14 Credit Hours²
- Philosophy course (in addition to General Education courses) 3 Credit Hours
- University electives (beyond major) 25-39 Credit Hours
- Major requirements (listed below) 41 Credit Hours

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² The foreign language requirement may be satisfied by successful completion of the second semester of the intermediate level of the student's chosen language (typically 232) or by placing out of that language through the Department of Foreign Languages, Literatures and Cultures' placement test.

Major Requirements

To earn a B.A. or B.S. degree in anthropology, students complete 41 credit hours in the major. Given the diverse opportunities the discipline provides, the major is designed to allow students the opportunity to work closely with their advisers to develop a curriculum appropriate to their personal and professional interests. Those students wishing to do so may elect to pursue a concentration in one of the three sub-disciplines of cultural, biological or archaeological anthropology.

The concentrations guide students in choosing courses to enhance opportunities for graduate school or allow them to pursue an area of personal interest within the larger discipline of anthropology. Up to two elective courses from a discipline outside of anthropology may be applied to the major. Elective courses from outside of the program must be approved by the student's adviser and must be at the 300- or 400-level. Students must receive at least a "C-" in a class to have it count toward the major.

Archaeology Concentration

Archaeology is the study of the development and change of human societies from the prehistoric past to the present through the recovery, analysis and interpretation of material remains. Our program emphasizes an anthropological approach to archaeology and has close ties to anthropology's other subdisciplines. Archaeology has developed its own body of theories and methods for addressing the human story, many of which are focused on understanding what human material culture reveals about peoples' lives.

The archaeology concentration builds student expertise in a variety of areas of archaeological practice, including field methods, the analysis and interpretation of archaeological data, and an understanding of the culture histories of many world regions. Elective courses and independent projects allow students to explore a variety of facets of archaeological theory and practice, with an emphasis on hands-on experience and engagement with real world data and artifacts. Students work with faculty to determine what electives within and outside the program best serve their scholarly and professional interests. Archaeology concentrators can benefit from expertise gained in upper-level electives in history, the geographic sciences, geology, art history, and biology. Intensive training in field methods, though not required for the concentration, is strongly encouraged and is provided by a summer archaeological field school. Those interested in historical archaeology should consider the cross-disciplinary Historical Archaeology Minor.

Required Courses

- ANTH 195. Cultural Anthropology [C4GE] 3.00 (C, R)
- ANTH 196. Biological Anthropology [C3NS] 3.00 (B, R)
- ANTH 197. Archaeology 3.00 (A,R)
- ANTH 201. The Discipline of Anthropology 1.00 (R)
- ANTH 375. Anthropological Theory 3.00 (C,R,W) ¹

- ANTH 410. Spatial Analysis for Anthropologists 4.00 (A,B or C) ²
or
- ANTH 490. Special Studies in Anthropology 1.00 - 3.00 (May be A, B or C) ²

- ANTH 455. Archaeology: Methods of Analysis and Interpretation 4.00 (A,F)
- One upper division course in cultural and biological anthropology 6 Credit Hours
- Electives 11-12 Credit Hours³

One Regional Archaeology Course

- ANTH 250. Anthropology of the American Southwest 3.00 (A)
- ANTH 311. Archaeology of Virginia 3.00 (A)
- ANTH 327. Ancient North American Civilizations 3.00 (A)

Total: 41 Credit Hours

Footnotes

¹ Students should take two of ANTH 195, ANTH 196 or ANTH 197 and at least one anthropology elective before taking ANTH 375.

² Students electing to take ANTH 490. Special Studies in Anthropology to satisfy this requirement will complete a project that requires the analysis and interpretation of archaeological data. This course requires permission of instructor and must be taken for 3 credits. Total credits for the archaeology concentration must still add to at least 41.

³ Students may take up to two adviser-approved electives at the 300 or 400 level from courses outside of the program. GEOL 442. Field Geophysics, ARTH 396. Introduction to Public History/HIST 396. Introduction to Public History and ARTH 394. Introduction to Museum Work/HIST 394. Introduction to Museum Work are particularly recommended.

Anthropology Course Designations

Archaeology (A)

- ANTH 197. Archaeology 3.00 (A,R)
- ANTH 205. Buried Cities, Lost Tribes: The Rise and Fall of Early Human Societies [C2HQC] 3.00 (A)

Anthropology, Archaeology Concentration, B.S.

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Quantitative requirement *3 Credit Hours*²
- Scientific Literacy requirement *3-4 Credit Hours*²
- University electives *35-36 Credit Hours*
- Major requirements (listed below) and electives *41 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² MATH 220. Elementary Statistics [C3QR], is strongly recommended for those students who have not taken that course or an equivalent as part of their General Education.

Major Requirements

To earn a B.A. or B.S. degree in anthropology, students complete 41 credit hours in the major. Given the diverse opportunities the discipline provides, the major is designed to allow students the opportunity to work closely with their advisers to develop a

curriculum appropriate to their personal and professional interests. Those students wishing to do so may elect to pursue a concentration in one of the three sub-disciplines of cultural, biological or archaeological anthropology.

The concentrations guide students in choosing courses to enhance opportunities for graduate school or allow them to pursue an area of personal interest within the larger discipline of anthropology. Up to two elective courses from a discipline outside of anthropology may be applied to the major. Elective courses from outside of the program must be approved by the student's adviser and must be at the 300- or 400-level. Students must receive at least a "C-" in a class to have it count toward the major.

Archaeology Concentration

Archaeology is the study of the development and change of human societies from the prehistoric past to the present through the recovery, analysis and interpretation of material remains. Our program emphasizes an anthropological approach to archaeology and has close ties to anthropology's other subdisciplines. Archaeology has developed its own body of theories and methods for addressing the human story, many of which are focused on understanding what human material culture reveals about peoples' lives.

The archaeology concentration builds student expertise in a variety of areas of archaeological practice, including field methods, the analysis and interpretation of archaeological data, and an understanding of the culture histories of many world regions. Elective courses and independent projects allow students to explore a variety of facets of archaeological theory and practice, with an emphasis on hands-on experience and engagement with real world data and artifacts. Students work with faculty to determine what electives within and outside the program best serve their scholarly and professional interests. Archaeology concentrators can benefit from expertise gained in upper-level electives in history, the geographic sciences, geology, art history, and biology. Intensive training in field methods, though not required for the concentration, is strongly encouraged and is provided by a summer archaeological field school. Those interested in historical archaeology should consider the cross-disciplinary Historical Archaeology Minor.

Required Courses

- ANTH 195. Cultural Anthropology [C4GE] 3.00 (C, R)
- ANTH 196. Biological Anthropology [C3NS] 3.00 (B, R)
- ANTH 197. Archaeology 3.00 (A,R)
- ANTH 201. The Discipline of Anthropology 1.00 (R)
- ANTH 375. Anthropological Theory 3.00 (C,R,W) ¹

- ANTH 410. Spatial Analysis for Anthropologists 4.00 (A,B or C) ²
or
- ANTH 490. Special Studies in Anthropology 1.00 - 3.00 (May be A, B or C) ²

- ANTH 455. Archaeology: Methods of Analysis and Interpretation 4.00 (A,F)
- One upper division course in cultural and biological anthropology 6 Credit Hours
- Electives 11-12 Credit Hours³

One Regional Archaeology Course

- ANTH 250. Anthropology of the American Southwest 3.00 (A)
- ANTH 311. Archaeology of Virginia 3.00 (A)
- ANTH 327. Ancient North American Civilizations 3.00 (A)

Total: 41 Credit Hours

Footnotes

¹ Students should take two of ANTH 195, ANTH 196 or ANTH 197 and at least one anthropology elective before taking ANTH 375.

² Students electing to take ANTH 490. Special Studies in Anthropology to satisfy this requirement will complete a project that requires the analysis and interpretation of archaeological data. This course requires permission of instructor and must be taken for 3 credits. Total credits for the archaeology concentration must still add to at least 41.

³ Students may take up to two adviser-approved electives at the 300 or 400 level from courses outside of the program. GEOL 442. Field Geophysics, ARTH 396. Introduction to Public History/HIST 396. Introduction to Public History and ARTH 394. Introduction to Museum Work/HIST 394. Introduction to Museum Work are particularly recommended.

Anthropology, Biological Anthropology Concentration, B.A.

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Foreign Language classes (intermediate level required) *0-14 Credit Hours*²
- Philosophy course (in addition to General Education courses) *3 Credit Hours*
- University electives (beyond major) *25-39 Credit Hours*
- Major requirements (listed below) *41 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² The foreign language requirement may be satisfied by successful completion of the second semester of the intermediate level of the student's chosen language (typically 232) or by placing out of that language through the Department of Foreign Languages, Literatures and Cultures' placement test.

Major Requirements

To earn a B.A. or B.S. degree in anthropology, students complete 41 credit hours in the major. Given the diverse opportunities the discipline provides, the major is designed to allow students the opportunity to work closely with their advisers to develop a curriculum appropriate to their personal and professional interests. Those students wishing to do so may elect to pursue a concentration in one of the three sub-disciplines of cultural, biological or archaeological anthropology.

The concentrations guide students in choosing courses to enhance opportunities for graduate school or allow them to pursue an area of personal interest within the larger discipline of anthropology. Up to two elective courses from a discipline outside of anthropology may be applied to the major. Elective courses from outside of the program must be approved by the student's adviser and must be at the 300- or 400-level. Students must receive at least a "C-" in a class to have it count toward the major.

Biological Anthropology Concentration

The focus of biological anthropology is the study of human biology from an evolutionary perspective. Biological anthropology is interested in understanding how and why the human species became what it is today. Thus, it involves the study of human evolution, human biology and its variation, human ecology (how humans interrelate with their environment) and primate behavior and biology (to place humans in the proper comparative context). Biological anthropologists also recognize that human culture, and learned behavior in general, are fundamentally important to understanding the human condition which leads them to emphasize a bio-cultural approach in which both biology and culture are integrated into a holistic understanding of humanity.

Students work closely with biological anthropology faculty to choose electives from both within and outside of the department to refine their own research and scholarly interests. Upper-level electives in biology, psychology and/or geographic sciences are recommended depending on the student's particular goals. Students might consider taking a minor or second major in these disciplines. Students are strongly encouraged to gain practical experience in biological anthropology through study abroad, internships or independent study with faculty.

Required Courses

- ANTH 195. Cultural Anthropology [C4GE] 3.00 (C, R)
- ANTH 196. Biological Anthropology [C3NS] 3.00 (B, R)
- ANTH 197. Archaeology 3.00 (A,R)
- ANTH 201. The Discipline of Anthropology 1.00 (R)
- ANTH 375. Anthropological Theory 3.00 (C,R,W) ¹
- ANTH 445. Methods and Research Perspectives in Biological Anthropology (B) 4.00
- One upper-division course in archaeology and cultural anthropology 6 *Credit Hours*
- Electives^{2,3} 12 *Credit Hours*

Choose two of the following courses: 6 Credit Hours

- ANTH 315. Human Evolution 3.00 (B)
- ANTH 316. Human Evolutionary Psychology 3.00 (B)
- ANTH 317. Primate Evolutionary Ecology 3.00 (B)

Total: 41 Credit Hours

Footnotes

¹ Students should take two of ANTH 195, ANTH 196 or ANTH 197 and at least one anthropology elective before taking ANTH 375.

² Students may take up to two adviser approved electives at the 300 or 400-level from courses outside of the program. BIO 270. Human Physiology (3, 2) [C3NS] and BIO 290. Human Anatomy (3, 3) are accepted electives.

³ In addition to biological anthropology courses, students are encouraged to take electives from across the breadth of cultural and linguistic anthropology and archaeology.

Anthropology, Cultural Anthropology Concentration, B.A.

Degree Requirements

Required Courses

- General Education 41 Credit Hours ¹
- Foreign Language classes (intermediate level required) 0-14 Credit Hours ²
- Philosophy course (in addition to General Education courses) 3 Credit Hours
- University electives (beyond major) 25-39 Credit Hours
- Major requirements (listed below) 41 Credit Hours

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² The foreign language requirement may be satisfied by successful completion of the second semester of the intermediate level of the student's chosen language (typically 232) or by placing out of that language through the Department of Foreign Languages, Literatures and Cultures' placement test.

Major Requirements

To earn a B.A. or B.S. degree in anthropology, students complete 41 credit hours in the major. Given the diverse opportunities the discipline provides, the major is designed to allow students the opportunity to work closely with their advisers to develop a curriculum appropriate to their personal and professional interests. Those students wishing to do so may elect to pursue a concentration in one of the three sub-disciplines of cultural, biological or archaeological anthropology.

The concentrations guide students in choosing courses to enhance opportunities for graduate school or allow them to pursue an area of personal interest within the larger discipline of anthropology. Up to two elective courses from a discipline outside of anthropology may be applied to the major. Elective courses from outside of the program must be approved by the student's adviser and must be at the 300- or 400-level. Students must receive at least a "C-" in a class to have it count toward the major.

Cultural Anthropology Concentration

Cultural anthropology is at the core of anthropology. It provides students with in-depth experience in the interpretation and comparison of cultures. It is closely linked to the humanities and to other social sciences. Students learn what culture is, how different cultural systems and forms of social organization work, how language both reflects and constitutes culture, and methodological and theoretical frameworks for interpreting cultural differences and similarities. Students work closely with cultural anthropology faculty to choose a series of electives from both within and outside of the department to refine their own research interests.

Students are encouraged (but not required) to become proficient in a foreign language beyond the level required for the B.A. and to develop a regional area of specialization through course work or a minor (e.g., Latin American studies, Africana studies, Middle Eastern studies, Asian studies). Outside upper-level electives are recommended in history, sociology, economics, religion, modern foreign languages and political science. Students are encouraged to pursue study abroad, ethnographic field school and internship opportunities.

Required Courses

- ANTH 195. Cultural Anthropology [C4GE] 3.00 (C, R)
- ANTH 196. Biological Anthropology [C3NS] 3.00 (B, R)
- ANTH 197. Archaeology 3.00 (A,R)
- ANTH 201. The Discipline of Anthropology 1.00 (R)
- ANTH 375. Anthropological Theory 3.00 (C,R,W) ¹
- ANTH 435. Ethnographic Genres and Methods 4.00 (C,F)
- One upper-division course archaeology and biological anthropology 6 Credit Hours
- Electives 15 Credit Hours ^{2,3}

One regional cultural anthropology course: 3 Credit Hours

- ANTH 265. Peoples and Cultures of Latin America and the Caribbean 3.00 (C).
- ANTH 280. Peoples and Cultures of Sub-Saharan Africa 3.00 (C)
- ANTH 295. People and Cultures of East Asia 3.00 (C)
- ANTH 306. Japanese Society and Culture 3.00 (C)
- ANTH 364. U.S./Latin American Borders 3.00 (C)
- ANTH 368. Contemporary American Culture 3.00 (C)
- ANTH 389. Ethnographic Experience in Dominica 3.00 (C)
- ANTH 436. Afro-Latin America 3.00 (C)

Total: 41 Credit Hours

Footnotes

¹ Students should take two of ANTH 195, ANTH 196 or ANTH 197 and at least one anthropology elective before taking ANTH 375.

² Students may take up to two adviser approved electives at the 300 or 400 level from courses outside of the program.

³ Suggested electives include ANTH 305, additional area studies courses and upper-level topical courses.

Anthropology Course Designations

Anthropology, Cultural Anthropology Concentration, B.S.

Degree Requirements

Required Courses

- General Education 41 Credit Hours ¹
- Quantitative requirement 3 Credit Hours ²
- Scientific Literacy requirement 3-4 Credit Hours ²
- University electives 35-36 Credit Hours
- Major requirements (listed below) and electives 41 Credit Hours

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² MATH 220. Elementary Statistics [C3QR], is strongly recommended for those students who have not taken that course or an equivalent as part of their General Education.

Major Requirements

To earn a B.A. or B.S. degree in anthropology, students complete 41 credit hours in the major. Given the diverse opportunities the discipline provides, the major is designed to allow students the opportunity to work closely with their advisers to develop a curriculum appropriate to their personal and professional interests. Those students wishing to do so may elect to pursue a concentration in one of the three sub-disciplines of cultural, biological or archaeological anthropology.

The concentrations guide students in choosing courses to enhance opportunities for graduate school or allow them to pursue an area of personal interest within the larger discipline of anthropology. Up to two elective courses from a discipline outside of anthropology may be applied to the major. Elective courses from outside of the program must be approved by the student's adviser and must be at the 300- or 400-level. Students must receive at least a "C-" in a class to have it count toward the major.

Cultural Anthropology Concentration

Cultural anthropology is at the core of anthropology. It provides students with in-depth experience in the interpretation and comparison of cultures. It is closely linked to the humanities and to other social sciences. Students learn what culture is, how different cultural systems and forms of social organization work, how language both reflects and constitutes culture, and methodological and theoretical frameworks for interpreting cultural differences and similarities. Students work closely with cultural anthropology faculty to choose a series of electives from both within and outside of the department to refine their own research interests.

Students are encouraged (but not required) to become proficient in a foreign language beyond the level required for the B.A. and to develop a regional area of specialization through course work or a minor (e.g., Latin American studies, Africana studies,

Middle Eastern studies, Asian studies). Outside upper-level electives are recommended in history, sociology, economics, religion, modern foreign languages and political science. Students are encouraged to pursue study abroad, ethnographic field school and internship opportunities.

Students must receive at least a "C-" in a class to have it count toward the major.

General Concentration

The general program provides students with a holistic introduction to the breadth of anthropology highlighting experience in the subdisciplines of cultural, archaeological and biological anthropology, as well as introductory experiences in linguistics. The program is designed to provide students with a well-rounded understanding of the discipline in preparation for advanced graduate training or as an adjunct to their personal and professional aspirations.

Required Courses

- ANTH 195. Cultural Anthropology [C4GE] 3.00 (C, R)
- ANTH 196. Biological Anthropology [C3NS] 3.00 (B, R)
- ANTH 197. Archaeology 3.00 (A,R)
- ANTH 201. The Discipline of Anthropology 1.00 (R)
- ANTH 375. Anthropological Theory 3.00 (C,R,W) ¹
- One elective from each of the following: cultural anthropology, biological anthropology and archaeology 9 Credit Hours
- Other electives ^{2,3}

One course from the following: 4 Credit Hours

- ANTH 435. Ethnographic Genres and Methods 4.00 (C,F)
- ANTH 445. Methods and Research Perspectives in Biological Anthropology (B) 4.00
- ANTH 455. Archaeology: Methods of Analysis and Interpretation 4.00 (A,F)

Total: 41 Credit Hours

Footnotes

¹ Students should take two of ANTH 195, ANTH 196 or ANTH 197 and at least one anthropology elective before taking ANTH 375.

² Students may take up to two adviser approved electives at the 300 or 400 level from courses outside the program.

³ Students should consider including ANTH 305. Language and Culture as one of their electives.

Anthropology Course Designations

Archaeology (A)

- ANTH 197. Archaeology 3.00 (A,R)
- ANTH 205. Buried Cities, Lost Tribes: The Rise and Fall of Early Human Societies [C2HQC] 3.00 (A)
- ANTH 250. Anthropology of the American Southwest 3.00 (A)
- ANTH 307. Climate, Culture and Change 3.00 (A)
- ANTH 311. Archaeology of Virginia 3.00 (A)
- ANTH 312. The Native Americans 3.00 (A)
- ANTH 325. Aztec, Maya & Their Predecessors 3.00 (A)
- ANTH 327. Ancient North American Civilizations 3.00 (A)
- ANTH 331. Historical Archaeology 3.00 (A)
- ANTH 366. Anthropology of War 3.00 (A, C)
- ANTH 391. Study Abroad 1.00 - 6.00 (May be A, B, C, F)
- ANTH 395. Special Topics in Anthropology 3.00 (May be A,B, or C)
- ANTH 410. Spatial Analysis for Anthropologists 4.00 (A,B or C)
- ANTH 455. Archaeology: Methods of Analysis and Interpretation 4.00 (A,F)
- ANTH 486. Internship in Anthropology 1.00 - 6.00 (May be A,B or C)
- ANTH 490. Special Studies in Anthropology 1.00 - 3.00 (May be A, B or C)
- ANTH 492. Material Culture 3.00 (A)
- ANTH 494. Field Techniques in Archaeology 4.00 - 8.00 (A,F)
- ANTH 496. Research Thesis 3.00 (A)
- ANTH 499. Honors Thesis 6.00 (May be A, B, or C). Three Semesters

Biological Anthropology (B)

- ANTH 196. Biological Anthropology [C3NS] 3.00 (B, R)
- ANTH 315. Human Evolution 3.00 (B)
- ANTH 316. Human Evolutionary Psychology 3.00 (B)
- ANTH 317. Primate Evolutionary Ecology 3.00 (B)
- ANTH 318. The Evolution of Primate Sexuality and Reproduction 3.00 (B)
- ANTH 319. Human Osteology 3.00 (B)
- ANTH 352. Birth, Death, Sex: Exploring Demography 3.00 (B,C)
- ANTH 391. Study Abroad 1.00 - 6.00 (May be A, B, C, F)
- ANTH 395. Special Topics in Anthropology 3.00 (May be A,B, or C)
- ANTH 410. Spatial Analysis for Anthropologists 4.00 (A,B or C)
- ANTH 415. Anthropological Genetics 3.00 (B)
- ANTH 430. Primate Conservation Biology 3.00 (B)
- ANTH 445. Methods and Research Perspectives in Biological Anthropology (B) 4.00
- ANTH 486. Internship in Anthropology 1.00 - 6.00 (May be A,B or C)
- ANTH 490. Special Studies in Anthropology 1.00 - 3.00 (May be A, B or C)
- ANTH 499. Honors Thesis 6.00 (May be A, B, or C). Three Semesters

Cultural Anthropology (C)

- ANTH 195. Cultural Anthropology [C4GE] 3.00 (C, R)
- ANTH 265. Peoples and Cultures of Latin America and the Caribbean 3.00 (C).
- ANTH 280. Peoples and Cultures of Sub-Saharan Africa 3.00 (C)
- ANTH 295. People and Cultures of East Asia 3.00 (C)
- ANTH 300. The Anthropology of Food 3.00 (C)
- ANTH 305. Language and Culture 3.00 (C)
- ANTH 306. Japanese Society and Culture 3.00 (C)
- ANTH 323. Anthropology and Photography 3.00 (C)
- ANTH 324. Mindfulness and Anthropology 3.00 (C)
- ANTH 350. Magic, Witchcraft and Religion 3.00 (C)
- ANTH 352. Birth, Death, Sex: Exploring Demography 3.00 (B,C)
- ANTH 360. Medical Anthropology 3.00 (C)
- ANTH 364. U.S./Latin American Borders 3.00 (C)
- ANTH 366. Anthropology of War 3.00 (A, C)
- ANTH 368. Contemporary American Culture 3.00 (C)
- ANTH 370. Topics in the Anthropology of Gender 3.00 (C)
- ANTH 375. Anthropological Theory 3.00 (C,R,W)
- ANTH 376. Anthropology of Reproduction 3.00 (C)
- ANTH 377. Space/Culture/Power 3.00 (C)
- ANTH 388. Prisons, Punishment and the State 3.00
- ANTH 389. Ethnographic Experience in Dominica 3.00 (C)
- ANTH 390. Topics in Cultural Studies 3.00 (C)
- ANTH 391. Study Abroad 1.00 - 6.00 (May be A, B, C, F)
- ANTH 395. Special Topics in Anthropology 3.00 (May be A,B, or C)
- ANTH 405. Topics in Linguistic Anthropology 3.00 (C)
- ANTH 410. Spatial Analysis for Anthropologists 4.00 (A,B or C)
- ANTH 411. Topics in Ethnographic Film 3.00 (C)
- ANTH 435. Ethnographic Genres and Methods 4.00 (C,F)
- ANTH 436. Afro-Latin America 3.00 (C)
- ANTH 486. Internship in Anthropology 1.00 - 6.00 (May be A,B or C)
- ANTH 490. Special Studies in Anthropology 1.00 - 3.00 (May be A, B or C)
- ANTH 499. Honors Thesis 6.00 (May be A, B, or C). Three Semesters

Field Experience (F)

- ANTH 391. Study Abroad 1.00 - 6.00 (May be A, B, C, F)
- ANTH 435. Ethnographic Genres and Methods 4.00 (C,F)
- ANTH 455. Archaeology: Methods of Analysis and Interpretation 4.00 (A,F)
- ANTH 494. Field Techniques in Archaeology 4.00 - 8.00 (A,F)

Required for All Anthropology Majors (R)

- ANTH 195. Cultural Anthropology [C4GE] 3.00 (C, R)
- ANTH 196. Biological Anthropology [C3NS] 3.00 (B, R)
- ANTH 197. Archaeology 3.00 (A,R)
- ANTH 201. The Discipline of Anthropology 1.00 (R)
- ANTH 375. Anthropological Theory 3.00 (C,R,W)

Writing Intensive (W)

- ANTH 375. Anthropological Theory 3.00 (C,R,W)

Anthropology, General Concentration, B.S.

Degree Requirements

Required Courses

- General Education 41 Credit Hours ¹
- Quantitative requirement 3 Credit Hours ²
- Scientific Literacy requirement 3-4 Credit Hours ²
- University electives 35-36 Credit Hours
- Major requirements (listed below) and electives 41 Credit Hours

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² MATH 220. Elementary Statistics [C3QR], is strongly recommended for those students who have not taken that course or an equivalent as part of their General Education.

Major Requirements

To earn a B.A. or B.S. degree in anthropology, students complete 41 credit hours in the major. Given the diverse opportunities the discipline provides, the major is designed to allow students the opportunity to work closely with their advisers to develop a curriculum appropriate to their personal and professional interests. Those students wishing to do so may elect to pursue a concentration in one of the three sub-disciplines of cultural, biological or archaeological anthropology.

The concentrations guide students in choosing courses to enhance opportunities for graduate school or allow them to pursue an area of personal interest within the larger discipline of anthropology. Up to two elective courses from a discipline outside of anthropology may be applied to the major. Elective courses from outside of the program must be approved by the student's adviser and must be at the 300- or 400-level. Students must receive at least a "C-" in a class to have it count toward the major.

General Concentration

The general program provides students with a holistic introduction to the breadth of anthropology highlighting experience in the subdisciplines of cultural, archaeological and biological anthropology, as well as introductory experiences in linguistics. The program is designed to provide students with a well-rounded understanding of the discipline in preparation for advanced graduate training or as an adjunct to their personal and professional aspirations.

Required Courses

- ANTH 195. Cultural Anthropology [C4GE] 3.00 (C, R)

- ANTH 196. Biological Anthropology [C3NS] 3.00 (B, R)
- ANTH 197. Archaeology 3.00 (A,R)
- ANTH 201. The Discipline of Anthropology 1.00 (R)
- ANTH 375. Anthropological Theory 3.00 (C,R,W) ¹
- One elective from each of the following: cultural anthropology, biological anthropology and archaeology 9 Credit Hours
- Other electives ^{2,3}

One course from the following: 4 Credit Hours

- ANTH 435. Ethnographic Genres and Methods 4.00 (C,F)
- ANTH 445. Methods and Research Perspectives in Biological Anthropology (B) 4.00
- ANTH 455. Archaeology: Methods of Analysis and Interpretation 4.00 (A,F)

Total: 41 Credit Hours

Footnotes

¹ Students should take two of ANTH 195, ANTH 196 or ANTH 197 and at least one anthropology elective before taking ANTH 375.

² Students may take up to two adviser approved electives at the 300 or 400 level from courses outside the program.

³ Students should consider including ANTH 305. Language and Culture as one of their electives.

Writing Intensive (W)

- ANTH 375. Anthropological Theory 3.00 (*C, R, W*)

Sociology Minor

Sociology Minor

To minor in sociology, a student must complete a minimum of 18 credit hours of sociology course work including three core credit hours and 15 elective credit hours.

Core Requirements

- SOCI 200. Development of Sociological Thought and Method 3.00
- Sociology electives *15 Credit Hours*

Total: 18 Credit Hours

Sociology, B.A.

Degree and Major Requirements

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Foreign Language classes (intermediate level required) *0-14 Credit Hours*²
- Philosophy course (in addition to General Education courses) *3 Credit Hours*
- University electives *23-37 Credit Hours*
- Major requirements (listed below) and electives *39 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² The foreign language requirement may be satisfied by successful completion of the second semester of the intermediate level of the student's chosen language (typically 232) or by placing out of that language through the Department of Foreign Language's placement test.

Major Requirements

To earn the B.A. degree with a sociology major, students must complete a minimum of 39 credit hours in sociology. Of these credit hours, 18 are required courses; the remaining 21 credit hours are electives chosen from over 30 sociology courses.

Students must earn at least a "C-" in all sociology classes or any course that is substituted for a sociology core course. If a student earns below a "C-" in a course, he/she can re-take the course once in order to meet the "C-" standard.

Courses

- SOCI 110. Social Issues in a Global Context [C4GE] *3.00*
- SOCI 140. Microsociology: The Individual in Society [C5SD] *3.00*
- SOCI 200. Development of Sociological Thought and Method *3.00*¹
- SOCI 231. Introduction to Social Statistics *3.00*²
- SOCI 300. Sociological Inquiry *3.00*³
- SOCI 480. Senior Seminar in Sociology *3.00*^{4,5,6}
- Sociology electives *21 Credit Hours*⁷

Total: 39 Credit Hours

Footnotes

¹ Prerequisite for SOCI 200: SOCI 110, SOCI 140 or SOCI 101.

² Students may substitute SOCI 231 with MATH 220, PSYC 210 or COB 191, but must take an additional sociology course to complete the required 39 hours of sociology.

³ Prerequisite for SOCI 300: SOCI 200 and SOCI 231 (or equivalent), sociology majors only.

⁴ Prerequisite for SOCI 480: SOCI 300.

⁵ This course fulfills the College of Arts and Letters writing-intensive requirement for the major.

⁶ Students may fulfill the senior seminar requirement by completing a supervised internship with a substantial writing expectation. Students must secure their own internship placement before enrolling in the internship course and should consult an adviser or the sociology program coordinator for details. Students may also fulfill the senior seminar requirement by successfully completing the SOCI 499 Honors Thesis sequence.

⁷ If a course other than SOCI 231 is used to meet the statistics requirement, 24 elective credits will be required to reach the 39 credit hour total.

Recommended Schedule for Majors

Transfer students on a two-year course of study should change "Year" in this sequence to "Semester."

The following is an example of a four-year course of study for a student seeking a degree in sociology:

First Year

- SOCI 110. Social Issues in a Global Context [C4GE] 3.00
- SOCI 140. Microsociology: The Individual in Society [C5SD] 3.00
- Sociology elective 3 *Credit Hours*

Total: 9 Credit Hours

Second Year

- SOCI 200. Development of Sociological Thought and Method 3.00
- SOCI 231. Introduction to Social Statistics 3.00
- Sociology electives 3 *Credit Hours*

Total: 9 Credit Hours

Third Year

- SOCI 300. Sociological Inquiry 3.00
- Electives 6-9 *Credit Hours*

Total: 9-12 Credit Hours

Fourth Year

- Sociology electives 6-9 *Credit Hours*
- SOCI 480. Senior Seminar in Sociology 3.00 (majors take this any time after completing SOCI 300)

Total: 9-12 Credit Hours

Sociology, B.S.

Degree and Major Requirements

Degree Requirements

Required Courses

- General Education 41 *Credit Hours*¹

- Quantitative requirement 3 Credit Hours ²
- Scientific Literacy requirement 3-4 Credit Hours ²
- University electives 32-33 Credit Hours
- Major requirements (listed below) 39 Credit Hours

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² In addition to course work taken to fulfill General Education requirement.

Major Requirements

To earn the B.S. degree with a sociology major, students must complete a minimum of 39 credit hours in sociology. Of these credit hours, 18 are required courses; the remaining 21 credit hours are electives chosen from over 30 sociology courses. Students must observe the prerequisite sequencing of required courses as shown in the course descriptions.

Students must earn at least a "C-" in all sociology classes or any course that is substituted for a sociology core course. If a student earns below a "C-" in a course, he/she can re-take the course once in order to meet the "C-" standard.

Courses

⁷ If a course other than SOCI 231 is used to meet the statistics requirement, 24 elective credits will be required to reach the 39 credit hour total.

Concentrations

The sociology program encourages majors to select electives that create a coherent program of study suited to their special needs and interests. Such a focus would involve four or more courses from the following concentration groupings: ¹

Communities, Inequalities and Public Policy

- SOCI 280. Social Gerontology *3.00*
or
- GERN 280. Social Gerontology *3.00*

- SOCI 303. Sociology of Death & Dying *3.00*

Footnote

¹ Within any of the defined concentrations students may gain credits toward completing the concentration through certain special topics or other courses. On occasion, courses taken outside the major or university may qualify. For special topics courses in sociology, see the instructor of record for that course. For other questions or possibilities see an adviser or the sociology program coordinator.

Recommended Schedule for Majors

Transfer students on a two-year course of study should change "Year" in this sequence to "Semester."

The following is an example of a four-year course of study for a student seeking a degree in sociology:

First Year

- SOCI 110. Social Issues in a Global Context [C4GE] 3.00
- SOCI 140. Microsociology: The Individual in Society [C5SD] 3.00
- Sociology elective 3 *Credit Hours*

Total: 9 Credit Hours

Second Year

- SOCI 200. Development of Sociological Thought and Method 3.00
- SOCI 231. Introduction to Social Statistics 3.00
- Sociology electives 3 *Credit Hours*

Total: 9 Credit Hours

Third Year

- SOCI 300. Sociological Inquiry 3.00
- Electives 6-9 *Credit Hours*

Total: 9-12 Credit Hours

Fourth Year

- Sociology electives 6-9 *Credit Hours*
- SOCI 480. Senior Seminar in Sociology 3.00 (majors take this any time after completing SOCI 300)

Total: 9-12 Credit Hours

Sociology, Communities, Inequalities and Public Policy, B.S.

Degree and Major Requirements

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Quantitative requirement *3 Credit Hours*²
- Scientific Literacy requirement *3-4 Credit Hours*²
- University electives *32-33 Credit Hours*
- Major requirements (listed below) *39 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² In addition to course work taken to fulfill General Education requirement.

Major Requirements

To earn the B.S. degree with a sociology major, students must complete a minimum of 39 credit hours in sociology. Of these credit hours, 18 are required courses; the remaining 21 credit hours are electives chosen from over 30 sociology courses. Students must observe the prerequisite sequencing of required courses as shown in the course descriptions.

Students must earn at least a "C-" in all sociology classes or any course that is substituted for a sociology core course. If a student earns below a "C-" in a course, he/she can re-take the course once in order to meet the "C-" standard.

Courses

- SOCI 110. Social Issues in a Global Context [C4GE] *3.00*
- SOCI 140. Microsociology: The Individual in Society [C5SD] *3.00*
- SOCI 200. Development of Sociological Thought and Method *3.00*¹
- SOCI 231. Introduction to Social Statistics *3.00*²
- SOCI 300. Sociological Inquiry *3.00*³
- SOCI 480. Senior Seminar in Sociology *3.00*^{4,5,6}
- Sociology electives *21 Credit Hours*⁷

Total: 39 Credit Hours

Footnotes

¹ Prerequisite for SOCI 200: SOCI 110, SOCI 140 or SOCI 101.

² Students can substitute SOCI 231 with MATH 220, PSYC 210 or COB 191, but must take an additional sociology course to complete the required 39 hours of sociology.

³ Prerequisite for SOCI 300: SOCI 200 and SOCI 231 (or equivalent), sociology majors only.

⁴ Prerequisite for SOCI 480: SOCI 300.

⁵ This course fulfills the College of Arts and Letters writing-intensive requirement for the major.

⁶ Students may fulfill the senior seminar requirement by completing a supervised internship with a substantial writing expectation. Students must secure their own internship placement before enrolling in the internship course and should consult an

adviser or the sociology program coordinator for details. Students may also fulfill the senior seminar requirement by successfully completing the SOCI 499 Honors Thesis sequence.

⁷ If a course other than SOCI 231 is used to meet the statistics requirement, 24 elective credits will be required to reach the 39 credit hour total.

Concentrations

The sociology program encourages majors to select electives that create a coherent program of study suited to their special needs and interests. Such a focus would involve four or more courses from the following concentration groupings: ¹

Communities, Inequalities and Public Policy

- SOCI 280. Social Gerontology *3.00*
or
- GERN 280. Social Gerontology *3.00*

- SOCI 303. Sociology of Death & Dying *3.00*
- SOCI 304. Social Deviance *3.00*
- SOCI 309. Capitalism and Alternative Economies *3.00*
- SOCI 311. Sociology of the Environment *3.00*
- SOCI 318. Sociology of Immigration *3.00*
- SOCI 321. Politics in Society *3.00*

- SOCI 322. Sociology of Religion *3.00*
or
- REL 322. Sociology of Religion *3.00*
- SOCI 328. Digital Inequality *3.00*
- SOCI 334. Self & Society *3.00*
- SOCI 335. Disability and Society *3.00*
- SOCI 336. Race and Ethnicity *3.00*

- SOCI 337. Sociology of Gender *3.00*
or
- WGSS 337. Sociology of Gender *3.00*

- SOCI 341. Sociology of Education *3.00*
- SOCI 347. Queer Theories of Gender and Inequality *3.00*

- SOCI 352. Birth, Death, Sex: Exploring Demography *3.00*
or
- ANTH 352. Birth, Death, Sex: Exploring Demography *3.00 (B,C)*

- SOCI 354. Social Inequality *3.00*
- SOCI 357. Sociology of Disasters *3.00*
- SOCI 360. Social Movements *3.00*
- SOCI 367. Sociology of Sexuality *3.00*
- SOCI 372. Sociology of the Community *3.00*
- SOCI 374. Sociology of Families *3.00*
- SOCI 375. Medical Sociology *3.00*
- SOCI 382. Qualitative Sociology *3.00*

- SOCI 385. Madness and Society: the Sociology of Mental Health and Illness 3.00
- SOCI 386. Sociology of Nonprofit Organizations 3.00

Footnote

¹ Within any of the defined concentrations students may gain credits toward completing the concentration through certain special topics or other courses. On occasion, courses taken outside the major or university may qualify. For special topics courses in sociology, see the instructor of record for that course. Sociology Program

Mission Statement

The mission of the sociology program is to develop students' ability to analyze the social world by using diverse sociological theories and research methods that stress the importance of social, cultural and historical contexts for understanding relationships between social actors and structures.

Goals and Objectives

To fulfill its mission, the sociology program cultivates the sociological imagination, providing students the following sets of skills and experience. Upon completion of the B.A. or B.S. degree in sociology, students will be able to:

- Recognize and understand the social dimension of the human experience and the diverse social arrangements and practices found within and across societies and cultures.
- Recognize how developing a sociological lens is a practical skill for living a productive and meaningful life.
- Identify and understand sociology's major theories, schools of thoughts and analytical paradigms.
- Identify and understand sociology's origin, development and practice within its social and historical contexts.
- Demonstrate the use of skills in investigating the social world utilizing methodological components such as concept formation, measurement strategies, data analysis, summary and presentation of findings.
- Demonstrate the use of the scholarly tools needed to practice sociology, including rigor, perceptiveness, creativity, logical consistency, tenacity and discipline.
- Recognize the norms of the scholarly community and of a participatory society, including collegiality, openness to public scrutiny, testing reinterpretation and refutation.

Career Opportunities and Marketable Skills

Working as a professional sociologist most often requires a graduate degree, but the following careers, some supplemented with collateral training, are representative of our previous graduates.

- Teacher, professor, social worker, researcher, case manager, biostatistician
- Admissions officer, demographer, data analyst, personnel interviewer
- Nursing home director, hospice coordinator, day care provider/director, epidemiologist
- Mediator, congressional aide, writer/author, advocacy worker, job analyst

- Population specialist, management trainee, sociologist, market research analyst
- Secret service agent, customs/immigration officer, labor relations specialist
- Personnel administrator, public relations specialist, public health statistician
- Urban/regional planner, race relations specialist, underwriter, fundraiser
- Education specialist, community services director
- Criminologist, probation/parole officer, police officer, corrections officer

A major in sociology provides skills and perspectives that enhance all careers. Students who study sociology gain:

- Increased general knowledge.
- Broadened viewpoints informed by sociological perspectives.
- Sensitivity to organizational issues and social change.
- Abilities in critical thinking, analysis, writing and communication, examination of attitudes and values and enhancement of computer skills.
- Further information about careers in sociology is available from the American Sociological Association website under Careers and Jobs.

Co-curricular Activities and Organizations

- Alpha Kappa Delta, the Sociological Honorary Society
- Student Research Symposium
- The Sociology Club

Anthropology Program

Mission Statement

Anthropology is unique among the social sciences in that it celebrates humans as biological organisms and as innovative, creative, culture-bearing beings. Through course work, field schools, study abroad, independent studies and internships, students learn about cultural, linguistic, and biological diversity, human biological characteristics, and the human past as revealed by archaeology. The anthropology program provides globally-oriented courses that stress critical thinking, method and theory, gathering and interpreting data, intensive reading and writing, hands-on learning and the research methods and techniques used by anthropologists to understand contemporary human problems.

Goals

The Anthropology program has the following goals:

- To introduce students to the nature of culture and of diverse cultural systems, their social organization and how anthropologists interpret cultural differences and similarities.
- To introduce students to the relevance of human biology for understanding contemporary human populations and biological variation and disease and to provide them with the fundamentals of evolutionary theory and the fossil and genetic evidence that supports it.
- To develop student understanding of cultural origins and the development of human societies through the analysis of material remains (artifacts) left by prehistoric and historic cultures.
- To encourage an integrative approach to understanding the human condition that incorporates the contributions of all sub-disciplines of anthropology.

Career Opportunities and Marketable Skills

An undergraduate degree in Anthropology provides a solid foundation for a wide range of rewarding careers. Students with a B.A. or B.S. degree in anthropology have gone on to become:

- Graduate students in archaeology, cultural anthropology, biological anthropology, linguistics and area studies programs.
- Professors of anthropology in each of the sub-disciplines
- Professional students in law, medicine, education, international affairs, public policy and public health
- Americorps and Peace Corps volunteers
- Archivists
- Business executives
- City planners and government officials
- College librarians
- Field archaeologists
- Cultural affairs directors
- Historical preservationists
- Museum and zoo curators and staff
- International aid workers and development consultants
- Management trainees
- Nurses, medical technicians and physicians assistants
- Forensic analysts
- Coroners
- Technical writers
- Conservation scientists and practitioners

The anthropology major is a liberal arts program that stresses such marketable skills as:

- Data analysis
- Computer skills
- Critical thinking
- Global knowledge
- Research skills
- Rigorous writing and presentation skills

Co-curricular Activities and Organizations

- Lambda Alpha, Anthropology Honors Society
- Student Anthropology Club

Degree and Major Requirements

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Foreign Language classes (intermediate level required) *0-14 Credit Hours*²
- Philosophy course (in addition to General Education courses) *3 Credit Hours*
- University electives *23-37 Credit Hours*

- Major requirements (listed below) and electives *39 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² The foreign language requirement may be satisfied by successful completion of the second semester of the intermediate level of the student's chosen language (typically 232) or by placing out of that language through the Department of Foreign Language's placement test.

Major Requirements

To earn the B.A. degree with a sociology major, students must complete a minimum of 39 credit hours in sociology. Of these credit hours, 18 are required courses; the remaining 21 credit hours are electives chosen from over 30 sociology courses.

Students must earn at least a "C-" in all sociology classes or any course that is substituted for a sociology core course. If a student earns below a "C-" in a course, he/she can re-take the course once in order to meet the "C-" standard.

Courses

- SOCI 140. Microsociology: The Individual in Society [C5SD] *3.00*
- SOCI 200. Development of Sociological Thought and Method *3.00*¹
- SOCI 231. Introduction to Social Statistics *3.00*²
- SOCI 300. Sociological Inquiry *3.00*³
- SOCI 480. Senior Seminar in Sociology *3.00*^{4,5,6}
- Sociology electives *21 Credit Hours*⁷

Total: 39 Credit Hours

Footnotes

¹ Prerequisite for SOCI 200: SOCI 110, SOCI 140 or SOCI 101.

² Students may substitute SOCI 231 with MATH 220, PSYC 210 or COB 191, but must take an additional sociology course to complete the required 39 hours of sociology.

³ Prerequisite for SOCI 300: SOCI 200 and SOCI 231 (or equivalent), sociology majors only.

⁴ Prerequisite for SOCI 480: SOCI 300.

⁵ This course fulfills the College of Arts and Letters writing-intensive requirement for the major.

⁶ Students may fulfill the senior seminar requirement by completing a supervised internship with a substantial writing expectation. Students must secure their own internship placement before enrolling in the internship course and should consult an adviser or the sociology program coordinator for details. Students may also fulfill the senior seminar requirement by successfully completing the SOCI 499 Honors Thesis sequence.

⁷ If a course other than SOCI 231 is used to meet the statistics requirement, 24 elective credits will be required to reach the 39 credit hour total.

Concentrations

The sociology program encourages majors to select electives that create a coherent program of study suited to their special needs and interests. Such a focus would involve four or more courses from the following concentration groupings¹:

Health, Medicine and Society

- SOCI 280. Social Gerontology 3.00
or
- GERN 280. Social Gerontology 3.00

- SOCI 303. Sociology of Death & Dying 3.00
- SOCI 315. Technology and Society 3.00
- SOCI 328. Digital Inequality 3.00
- SOCI 336. Race and Ethnicity 3.00

- SOCI 337. Sociology of Gender 3.00
or
- WGSS 337. Sociology of Gender 3.00

- SOCI 347. Queer Theories of Gender and Inequality 3.00

- SOCI 352. Birth, Death, Sex: Exploring Demography 3.00
or
- ANTH 352. Birth, Death, Sex: Exploring Demography 3.00 (B,C)

- SOCI 354. Social Inequality 3.00
- SOCI 357. Sociology of Disasters 3.00

- SOCI 367. Sociology of Sexuality 3.00
or
- WGSS 367. Sociology of Sexuality 3.00

- SOCI 375. Medical Sociology 3.00
- SOCI 385. Madness and Society: the Sociology of Mental Health and Illness 3.00
- SOCI 386. Sociology of Nonprofit Organizations 3.00

Footnote

¹ Within any of the defined concentrations students may gain credits toward completing the concentration through certain special topics or other courses. On occasion, courses taken outside the major or university may qualify. For special topics courses in sociology, see the instructor of record for that course. For other questions or possibilities see an adviser or the sociology program coordinator.

Recommended Schedule for Majors

Transfer students on a two-year course of study should change "Year" in this sequence to "Semester."

The following is an example of a four-year course of study for a student seeking a degree in sociology:

First Year

- SOCI 110. Social Issues in a Global Context [C4GE] 3.00
- SOCI 140. Microsociology: The Individual in Society [C5SD] 3.00
- Sociology elective 3 *Credit Hours*

Total: 9 Credit Hours

Second Year

- SOCI 231. Introduction to Social Statistics 3.00
- Sociology electives 3 *Credit Hours*

Total: 9 Credit Hours

Third Year

- SOCI 300. Sociological Inquiry 3.00
- Electives 6-9 *Credit Hours*

Total: 9-12 Credit Hours

Fourth Year

- Sociology electives 6-9 *Credit Hours*
- SOCI 480. Senior Seminar in Sociology 3.00 (majors take this any time after completing SOCI 300)

Total: 9-12 Credit Hours

Sociology, Health, Medicine and Society Concentration, B.S.

Sociology Program

Mission Statement

The mission of the sociology program is to develop students' ability to analyze the social world by using diverse sociological theories and research methods that stress the importance of social, cultural and historical contexts for understanding relationships between social actors and structures.

Goals and Objectives

To fulfill its mission, the sociology program cultivates the sociological imagination, providing students the following sets of skills and experience. Upon completion of the B.A. or B.S. degree in sociology, students will be able to:

- Recognize and understand the social dimension of the human experience and the diverse social arrangements and practices found within and across societies and cultures.
- Recognize how developing a sociological lens is a practical skill for living a productive and meaningful life.
- Identify and understand sociology's major theories, schools of thoughts and analytical paradigms.
- Identify and understand sociology's origin, development and practice within its social and historical contexts.
- Demonstrate the use of skills in investigating the social world utilizing methodological components such as concept formation, measurement strategies, data analysis, summary and presentation of findings.
- Demonstrate the use of the scholarly tools needed to practice sociology, including rigor, perceptiveness, creativity, logical consistency, tenacity and discipline.
- Recognize the norms of the scholarly community and of a participatory society, including collegiality, openness to public scrutiny, testing reinterpretation and refutation.

Career Opportunities and Marketable Skills

Working as a professional sociologist most often requires a graduate degree, but the following careers, some supplemented with collateral training, are representative of our previous graduates.

- Teacher, professor, social worker, researcher, case manager, biostatistician
- Admissions officer, demographer, data analyst, personnel interviewer
- Nursing home director, hospice coordinator, day care provider/director, epidemiologist
- Mediator, congressional aide, writer/author, advocacy worker, job analyst
- Population specialist, management trainee, sociologist, market research analyst
- Secret service agent, customs/immigration officer, labor relations specialist
- Personnel administrator, public relations specialist, public health statistician
- Urban/regional planner, race relations specialist, underwriter, fundraiser
- Education specialist, community services director
- Criminologist, probation/parole officer, police officer, corrections officer

A major in sociology provides skills and perspectives that enhance all careers. Students who study sociology gain:

- Increased general knowledge.
- Broadened viewpoints informed by sociological perspectives.
- Sensitivity to organizational issues and social change.
- Abilities in critical thinking, analysis, writing and communication, examination of attitudes and values and enhancement of computer skills.
- Further information about careers in sociology is available from the American Sociological Association website under Careers and Jobs.

Co-curricular Activities and Organizations

- Alpha Kappa Delta, the Sociological Honorary Society
- Student Research Symposium
- The Sociology Club

Anthropology Program

Mission Statement

Anthropology is unique among the social sciences in that it celebrates humans as biological organisms and as innovative, creative, culture-bearing beings. Through course work, field schools, study abroad, independent studies and internships, students learn about cultural, linguistic, and biological diversity, human biological characteristics, and the human past as revealed by archaeology. The anthropology program provides globally-oriented courses that stress critical thinking, method and theory, gathering and interpreting data, intensive reading and writing, hands-on learning and the research methods and techniques used by anthropologists to understand contemporary human problems.

Goals

The Anthropology program has the following goals:

- To introduce students to the nature of culture and of diverse cultural systems, their social organization and how anthropologists interpret cultural differences and similarities.
- To introduce students to the relevance of human biology for understanding contemporary human populations and biological variation and disease and to provide them with the fundamentals of evolutionary theory and the fossil and genetic evidence that supports it.
- To develop student understanding of cultural origins and the development of human societies through the analysis of material remains (artifacts) left by prehistoric and historic cultures.
- To encourage an integrative approach to understanding the human condition that incorporates the contributions of all sub-disciplines of anthropology.

Career Opportunities and Marketable Skills

An undergraduate degree in Anthropology provides a solid foundation for a wide range of rewarding careers. Students with a B.A. or B.S. degree in anthropology have gone on to become:

- Graduate students in archaeology, cultural anthropology, biological anthropology, linguistics and area studies programs.
- Professors of anthropology in each of the sub-disciplines
- Professional students in law, medicine, education, international affairs, public policy and public health
- Americorps and Peace Corps volunteers
- Archivists
- Business executives
- City planners and government officials
- College librarians
- Field archaeologists
- Cultural affairs directors
- Historical preservationists
- Museum and zoo curators and staff
- International aid workers and development consultants
- Management trainees
- Nurses, medical technicians and physicians assistants
- Forensic analysts
- Coroners
- Technical writers
- Conservation scientists and practitioners

The anthropology major is a liberal arts program that stresses such marketable skills as:

- Data analysis
- Computer skills
- Critical thinking

- Global knowledge
- Research skills
- Rigorous writing and presentation skills

Co-curricular Activities and Organizations

- Lambda Alpha, Anthropology Honors Society
- Student Anthropology Club

Degree and Major Requirements

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Quantitative requirement *3 Credit Hours*²
- Scientific Literacy requirement *3-4 Credit Hours*²
- University electives *32-33 Credit Hours*
- Major requirements (listed below) *39 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² In addition to course work taken to fulfill General Education requirement.

Major Requirements

To earn the B.S. degree with a sociology major, students must complete a minimum of 39 credit hours in sociology. Of these credit hours, 18 are required courses; the remaining 21 credit hours are electives chosen from over 30 sociology courses. Students must observe the prerequisite sequencing of required courses as shown in the course descriptions.

Students must earn at least a "C-" in all sociology classes or any course that is substituted for a sociology core course. If a student earns below a "C-" in a course, he/she can re-take the course once in order to meet the "C-" standard.

Courses

- SOCI 110. Social Issues in a Global Context [C4GE] *3.00*
- SOCI 140. Microsociology: The Individual in Society [C5SD] *3.00*
- SOCI 200. Development of Sociological Thought and Method *3.00*¹
- SOCI 231. Introduction to Social Statistics *3.00*²
- SOCI 300. Sociological Inquiry *3.00*³
- SOCI 480. Senior Seminar in Sociology *3.00*^{4,5,6}
- Sociology electives *21 Credit Hours*⁷

Total: 39 Credit Hours

Footnotes

¹ Prerequisite for SOCI 200: SOCI 110, SOCI 140 or SOCI 101.

² Students can substitute SOCI 231 with MATH 220, PSYC 210 or COB 191, but must take an additional sociology course to complete the required 39 hours of sociology.

³ Prerequisite for SOCI 300: SOCI 200 and SOCI 231 (or equivalent), sociology majors only.

⁴ Prerequisite for SOCI 480: SOCI 300.

⁵ This course fulfills the College of Arts and Letters writing-intensive requirement for the major.

⁶ Students may fulfill the senior seminar requirement by completing a supervised internship with a substantial writing expectation. Students must secure their own internship placement before enrolling in the internship course and should consult an adviser or the sociology program coordinator for details. Students may also fulfill the senior seminar requirement by successfully completing the SOCI 499 Honors Thesis sequence.

⁷ If a course other than SOCI 231 is used to meet the statistics requirement, 24 elective credits will be required to reach the 39 credit hour total.

Concentrations

The sociology program encourages majors to select electives that create a coherent program of study suited to their special needs and interests. Such a focus would involve four or more courses from the following concentration groupings¹:

Health, Medicine and Society

- SOCI 280. Social Gerontology 3.00
or
- GERN 280. Social Gerontology 3.00

- SOCI 303. Sociology of Death & Dying 3.00
- SOCI 315. Technology and Society 3.00
- SOCI 328. Digital Inequality 3.00
- SOCI 336. Race and Ethnicity 3.00

- SOCI 337. Sociology of Gender 3.00
or
- WGSS 337. Sociology of Gender 3.00

- SOCI 347. Queer Theories of Gender and Inequality 3.00

- SOCI 352. Birth, Death, Sex: Exploring Demography 3.00
or
- ANTH 352. Birth, Death, Sex: Exploring Demography 3.00 (B,C)

- SOCI 354. Social Inequality 3.00
- SOCI 357. Sociology of Disasters 3.00

- SOCI 367. Sociology of Sexuality 3.00
or
- WGSS 367. Sociology of Sexuality 3.00

- SOCI 375. Medical Sociology 3.00

- SOCI 385. Madness and Society: the Sociology of Mental Health and Illness 3.00
- SOCI 386. Sociology of Nonprofit Organizations 3.00

Footnote

¹ Within any of the defined concentrations students may gain credits toward completing the concentration through certain special topics or other courses. On occasion, courses taken outside the major or university may qualify. For special topics courses in sociology, see the instructor of record for that course. For other questions or possibilities see an adviser or the sociology program coordinator.

Recommended Schedule for Majors

Transfer students on a two-year course of study should change "Year" in this sequence to "Semester."

The following is an example of a four-year course of study for a student seeking a degree in sociology:

First Year

- SOCI 110. Social Issues in a Global Context [C4GE] 3.00
- SOCI 140. Microsociology: The Individual in Society [C5SD] 3.00
- Sociology elective 3 *Credit Hours*

Total: 9 Credit Hours

Second Year

- SOCI 200. Development of Sociological Thought and Method 3.00
- SOCI 231. Introduction to Social Statistics 3.00
- Sociology electives 3 *Credit Hours*

Total: 9 Credit Hours

Third Year

- SOCI 300. Sociological Inquiry 3.00
- Electives 6-9 *Credit Hours*

Total: 9-12 Credit Hours

Fourth Year

- Sociology electives 6-9 *Credit Hours*
- SOCI 480. Senior Seminar in Sociology 3.00 (majors take this any time after completing SOCI 300)

Total: 9-12 Credit Hours

Sociology, Markets and Cultures Concentration, B.A.

Degree and Major Requirements

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Foreign Language classes (intermediate level required) *0-14 Credit Hours*²
- Philosophy course (in addition to General Education courses) *3 Credit Hours*
- University electives *23-37 Credit Hours*
- Major requirements (listed below) and electives *39 Credit Hours*

Total: 120 Credit Hours

Footnotes

1 The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

2 The foreign language requirement may be satisfied by successful completion of the second semester of the intermediate level of the student's chosen language (typically 232) or by placing out of that language through the Department of Foreign Language's placement test.

Major Requirements

To earn the B.A. degree with a sociology major, students must complete a minimum of 39 credit hours in sociology. Of these credit hours, 18 are required courses; the remaining 21 credit hours are electives chosen from over 30 sociology courses.

Students must earn at least a "C-" in all sociology classes or any course that is substituted for a sociology core course. If a student earns below a "C-" in a course, he/she can re-take the course once in order to meet the "C-" standard.

Courses

- SOCI 110. Social Issues in a Global Context [C4GE] *3.00*
- SOCI 140. Microsociology: The Individual in Society [C5SD] *3.00*
- SOCI 200. Development of Sociological Thought and Method *3.00*¹
- SOCI 231. Introduction to Social Statistics *3.00*²
- SOCI 300. Sociological Inquiry *3.00*³
- SOCI 480. Senior Seminar in Sociology *3.00*^{4,5,6}
- Sociology electives *21 Credit Hours*⁷

Total: 39 Credit Hours

Footnotes

¹ Prerequisite for SOCI 200: SOCI 110, SOCI 140 or SOCI 101.

² Students may substitute SOCI 231 with MATH 220, PSYC 210 or COB 191, but must take an additional sociology course to complete the required 39 hours of sociology.

³ Prerequisite for SOCI 300: SOCI 200 and SOCI 231 (or equivalent), sociology majors only.

⁴ Prerequisite for SOCI 480: SOCI 300.

⁵ This course fulfills the College of Arts and Letters writing-intensive requirement for the major.

⁶ Students may fulfill the senior seminar requirement by completing a supervised internship with a substantial writing expectation. Students must secure their own internship placement before enrolling in the internship course and should consult an adviser or the sociology program coordinator for details. Students may also fulfill the senior seminar requirement by successfully completing the SOCI 499 Honors Thesis sequence.

⁷ If a course other than SOCI 231 is used to meet the statistics requirement, 24 elective credits will be required to reach the 39 credit hour total.

Concentrations

The sociology program encourages majors to select electives that create a coherent program of study suited to their special needs and interests. Such a focus would involve four or more courses from the following concentration groupings: ¹

Markets and Cultures

- SOCI 306. Japanese Society and Culture 3.00
- SOCI 309. Capitalism and Alternative Economies 3.00
- SOCI 315. Technology and Society 3.00
- SOCI 318. Sociology of Immigration 3.00
- SOCI 328. Digital Inequality 3.00
- SOCI 329. Sociology of Sport 3.00
- SOCI 334. Self & Society 3.00
- SOCI 341. Sociology of Education 3.00
- SOCI 342. Social Movements in the Middle East 3.00
- SOCI 344. Work and Society 3.00
- SOCI 358. Sociology of Consumption 3.00
- SOCI 361. Sociology of Organizations 3.00
- SOCI 363. Sociology of Culture 3.00
- SOCI 367. Sociology of Sexuality 3.00
- SOCI 368. Contemporary American Culture 3.00
- SOCI 382. Qualitative Sociology 3.00
- SOCI 386. Sociology of Nonprofit Organizations 3.00

Footnote

¹ Within any of the defined concentrations students may gain credits toward completing the concentration through certain special topics or other courses. On occasion, courses taken outside the major or university may qualify. For special topics courses in sociology, see the instructor of record for that course. OR
- ANTH 352. Birth, Death, Sex: Exploring Demography 3.00 (B,C)

- SOCI 354. Social Inequality 3.00
- SOCI 360. Social Movements 3.00
- SOCI 361. Sociology of Organizations 3.00

- SOCI 363. Sociology of Culture 3.00
- SOCI 375. Medical Sociology 3.00
- SOCI 382. Qualitative Sociology 3.00
- SOCI 386. Sociology of Nonprofit Organizations 3.00

Footnote

¹ Within any of the defined concentrations students may gain credits toward completing the concentration through certain special topics or other courses. On occasion, courses taken outside the major or university may qualify. For special topics courses in sociology, see the instructor of record for that course. For other questions or possibilities see an adviser or the sociology program coordinator.

Recommended Schedule for Majors

Transfer students on a two-year course of study should change "Year" in this sequence to "Semester."

The following is an example of a four-year course of study for a student seeking a degree in sociology:

First Year

- SOCI 110. Social Issues in a Global Context [C4GE] 3.00
- SOCI 140. Microsociology: The Individual in Society [C5SD] 3.00
- Sociology elective 3 *Credit Hours*

Total: 9 Credit Hours

Second Year

- SOCI 200. Development of Sociological Thought and Method 3.00
- SOCI 231. Introduction to Social Statistics 3.00
- Sociology electives 3 *Credit Hours*

Total: 9 Credit Hours

Third Year

- SOCI 300. Sociological Inquiry 3.00
- Electives 6-9 *Credit Hours*

Total: 9-12 Credit Hours

Fourth Year

- Sociology electives 6-9 *Credit Hours*
- SOCI 480. Senior Seminar in Sociology 3.00 (majors take this any time after completing SOCI 300)

Total: 9-12 Credit Hours

Associate Professors

K. Arecchi, E. Becher-McKeever, R. Corriston, I. De Sanctis, R. Finkelstein, B. Lambert, K. Sherrill

Assistant Professors

J. Brent, J. Del Vecchio, Z. Dorsey, T. Ellis, E. Oleson, L. Olyan Pendell, J. Stewart, J. Streeter

Mission

The School of Theatre and Dance is rooted in the belief that the relevant artist is the thinking artist who couples the mastery and embodiment of concrete skills with knowledge of and sensitivity to the cultural environments of ideas, artistic forms and other persons. The school trains and educates artists, scholars and teachers in the rich traditions and current practices of dance, theatre and musical theatre. Dedicated to the value of the intensive B.A., the school's programs blend liberal arts education and critical thinking with intensive, pre-professional training and practice. Faculty foster an environment that values and cultivates creative, passionate, disciplined, curious, innovative, engaged, articulate, collaborative and independent-thinking artists and scholars. Committed to a teaching approach that emphasizes mentorship and individual attention to students, faculty members of the school empower students in the development of their own personal strengths, provide them with tools and opportunities to realize their potential, and equip them for successful work in professional environments, graduate programs and to be lifelong learners.

Goals

To realize this mission, the School of Theatre and Dance strives to:

- Develop in students the ability to work productively and sensitively in creative and collaborative processes.
- Offer multiple opportunities for students to self-initiate and self-produce work in a context supportive of experimentation.
- Produce performances and creative experiences of high quality.
- Present performances by and learning experiences with visiting artists.
- Motivate students to take active responsibility for their work, processes and careers.
- Promote, support and enable faculty professional development so that teachers continue to provide the education for students that only growing, current and active creative artists and scholars can provide.
- Inspire and prepare students to be advocates for the arts.
- Foster an understanding of the roles of the artist and the arts in society.
- Advance dynamic partnerships with diverse communities.

Career Opportunities

For information about career opportunities in theatre, dance and musical theatre, contact the appropriate coordinator:

- Theatre Coordinator: Ben Lambert, lamberbc@jmu.edu
- Dance Coordinator: Suzanne Miller-Corso, mille2sm@jmu.edu
- Musical Theatre Coordinator: Kate Arecchi, arecchk@jmu.edu

Co-curricular Activities and Organizations

The School of Theatre and Dance offers a number of co-curricular activities and organizations. They allow students to apply and experiment with the theories they learn in the classroom and gain practical experience in their field.

- Alpha Psi Omega
- Associate Dance Ensemble
- Madison New Works Lab
- Contemporary Dance Ensemble
- Dance Studio Productions
- Dance Theatre
- Studio Theatre Productions
- Experimental Series Productions
- Workshop Productions
- Mainstage Productions
- National Honor Society for Dance Arts
- Stratford Players
- Virginia Repertory Dance Company
- USITT Student Chapter

Special Admission and Retention Requirements

Admission to the dance major is competitive and an audition/interview is required. Contact the school office by calling (540) 568-6342 or visit the School of Theatre and Dance website for current audition information.

Admission to the musical theatre major is competitive and an audition/interview is required. Contact the school office by calling (540) 568-6342 or visit the School of Theatre and Dance website for current audition information.

Admission to the theatre major is competitive and an audition or portfolio review and interview is required. Contact the school office by calling (540) 568-6342 or visit the School of Theatre and Dance website for current audition information. A grade of "C" or better must be achieved in all courses that apply to a major in the School of Theatre and Dance. All School of Theatre and Dance majors must complete the requirements for a Bachelor of Arts degree, and must complete the General Education program. Theatre/Musical Theatre majors cannot take THEA 210. Introduction to Theatre [C2VPA] to meet the visual and performing arts requirements. Courses from other academic units may not be counted both for the School of Theatre and Dance majors and for another major.

Dance Minor

Dance Minor Adviser: Suzanne Miller-Corso

Email: mille2sm@jmu.edu

Phone: (540) 568-3924

Minor Requirements

The School of Theatre and Dance offers a minor with options in theatre or dance. No audition or portfolio review is required for the theatre minor or dance minor. A grade of "C" or better must be achieved in all School of Theatre and Dance courses that apply to a minor in the School of Theatre and Dance.

Courses

- DANC 245. Dance Improvisation (0, 4) 2.00
- DANC 248. History of Dance: Renaissance Through the 20th Century 3.00
- Electives from contemporary dance techniques and/or folk and ballroom techniques with approval of minor adviser 10.00
Credit Hours
- Electives selected from dance-designated courses and/or dance related courses at the 300 or 400 level with approval of minor adviser. 6.00 *Credit Hours*

Total: 21 Credit Hours

Dance Teaching Licensure

Teacher Licensure in Dance

In addition to general education and theatre and dance requirements, students desiring PreK-12 teaching licensure in dance must complete 16 credits of additional course work in kinesiology, health science, education, psychology and 12 credits of student teaching. It is necessary to be admitted to the teacher education program prior to enrolling in professional education courses.

Course Requirements

Students seeking licensure are encouraged to consult regularly with the faculty adviser of dance education. The undergraduate degree leading to licensure must include the following:

- Credit must be earned in each area: ballet, folk, jazz and modern dance (8 credits)
- Credit must be earned beyond the beginning level of ballet, jazz and modern dance (3 credits)
- Credit must be earned in dance composition, dance improvisation and dance production (minimum of 7 credits)
- Credit must be earned in human anatomy, kinesiology, and injury prevention and care for dance (9 credits)
- Credit must be earned in history of dance (3 credits)

Required Courses

- ATEP 205. Introduction to Athletic Training 3.00 (spring, junior)
- DANC 325. Dance in Community 3.00
- DANC 490. Special Studies in Dance 1.00 - 3.00 (prior to student teaching)
- EDUC 300. Foundations of American Education 3.00
- DANC 480. Student Teaching 3.00 - 12.00
- PSYC 160. Life Span Human Development [C5SD] 3.00 (may double count)
- KIN 202. Biological Foundations of Kinesiology & Recreation 3.00 (fall, junior)
- LED 420. Content Area Literacy, K-12 2.00

Total: 30 Credit Hours

Dance, B.A.

Bachelor of Arts in Dance

The School of Theatre and Dance offers a B.A. in dance. A dance major must fulfill degree and major requirements.

Degree and Major Requirements

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Foreign Language classes (intermediate level required) *0-14 Credit Hours*²
- Philosophy course (in addition to General Education courses) *3 Credit Hours*
- University electives *14-28 Credit Hours*
- Major requirements (listed below) *48-49 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² The foreign language requirement may be satisfied by successful completion of the second semester of the intermediate level of the student's chosen language (typically 232) or by placing out of that language through the Department of Foreign Languages, Literatures and Cultures' placement test.

Major Requirements

All students pursuing a B.A. degree in dance must complete the core requirements.

Core Courses

- STAD 100. Theatre and Dance Colloquium *0.00* (4 enrollments)
- STAD 171. Performance Production *3.00*

- THEA 250. The Collaborative Artist: Sophomore Studio *3.00*
or
- DANC 250. The Collaborative Artist: Sophomore Studio *3.00*

Choose one of the following: 2-3 Credit Hours

- DANC 142. Elementary Ballet (0, 4) 2.00
- DANC 143. International Folk Dance (0, 4) 2.00
- DANC 144. Ballroom Dance (0, 4) 2.00
- DANC 147. Tap Dance (0, 4) 2.00
- DANC 325. Dance in Community 3.00
- DANC 390. Directed Projects 1.00 - 3.00
- THEA 251. Acting I: Basic Acting 3.00

Total: 8-9 Credit Hours

Program Requirements

Core Courses

- Core Courses 8-9 Credit Hours
- DANC 245. Dance Improvisation (0, 4) 2.00
- DANC 248. History of Dance: Renaissance Through the 20th Century 3.00
- DANC 320. Anatomy and Somatic Studies for the Dancer 3.00
- DANC 345. Dance Composition I (2, 2) 3.00
- DANC 445. Dance Composition II (2, 2) 3.00
- DANC 449. The Dance Professional 3.00
- DANC 479. Methods of Teaching Dance 3.00

Technique Courses

The student is required to complete 10 credits in modern and four credits in ballet technique, with placement to be assessed in conference with dance faculty. Modern, ballet and jazz technique classes all have an advanced level course in the curriculum. The requirements listed below are the minimum level expected of dance major students. Most majors will take additional technique courses as university electives throughout their study in the dance program.

Two semesters for a total of four credits:

- DANC 240. Intermediate Modern Dance I (0, 4) 2.00

Two semesters for a total of four credits:

- DANC 340. Intermediate Modern Dance II (0, 4) 2.00

One semester for a total of two credits:

- DANC 440. Advanced Modern Dance (0, 4) 2.00

Select four credits from the following courses:

- DANC 242. Intermediate Ballet I (0, 4) 2.00
- DANC 342. Intermediate Ballet II (0, 4) 2.00

Ensemble Courses

- DANC 110. Associate Group Dance Repertory I (0, 4) *1.00*
- DANC 210. Associate Group Dance Repertory II (0, 4) *1.00*
- DANC 211. Contemporary Dance Ensemble Repertory I (0, 4) *2.00*
- DANC 311. Contemporary Dance Ensemble Repertory II (0, 4) *2.00*

Total: 48-49 Credit Hours

Recommended Schedule for Dance Majors

First Year

- DANC 110. Associate Group Dance Repertory I (0, 4) *1.00* (fall)
- DANC 210. Associate Group Dance Repertory II (0, 4) *1.00* (spring)
- DANC 240. Intermediate Modern Dance I (0, 4) *2.00* (fall and spring)
- DANC 242. Intermediate Ballet I (0, 4) *2.00*
- DANC 245. Dance Improvisation (0, 4) *2.00*
- STAD 100. Theatre and Dance Colloquium *0.00* (fall and spring)

Second Year

- DANC 143. International Folk Dance (0, 4) *2.00*
or
- DANC 144. Ballroom Dance (0, 4) *2.00*
or
- DANC 390. Directed Projects *1.00 - 3.00*
or
- DANC 325. Dance in Community *3.00*

- DANC 211. Contemporary Dance Ensemble Repertory I (0, 4) *2.00* (fall)
- DANC 311. Contemporary Dance Ensemble Repertory II (0, 4) *2.00* (spring)
- DANC 340. Intermediate Modern Dance II (0, 4) *2.00* (fall and spring)

- DANC 342. Intermediate Ballet II (0, 4) *2.00*
or
- DANC 442. Advanced Ballet (0, 4) *2.00*

- DANC 345. Dance Composition I (2, 2) *3.00*
- DANC 248. History of Dance: Renaissance Through the 20th Century *3.00*

- STAD 100. Theatre and Dance Colloquium *0.00* (fall and spring)
or
- THEA 250. The Collaborative Artist: Sophomore Studio *3.00*
or
- DANC 250. The Collaborative Artist: Sophomore Studio *3.00*

Third Year

- DANC 320. Anatomy and Somatic Studies for the Dancer *3.00*
- DANC 445. Dance Composition II (2, 2) *3.00*

- DANC 479. Methods of Teaching Dance 3.00
- DANC 411. Contemporary Dance Ensemble Repertory III (0, 4) 2.00
or
- DANC 312. Virginia Repertory Dance Company II (0, 4) 2.00
- Repertory III or Virginia Repertory Dance Company
- Other dance technique courses to fit the student's schedule.

Fourth Year

- DANC 449. The Dance Professional 3.00
- Other dance technique and ensemble courses to fit the student's schedule.

Musical Theatre, B.A.

The Theatre and Dance, School of offers a B.A. in musical theatre. A musical theatre major must fulfill degree and major requirements.

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Foreign Language classes (intermediate level required) *0-14 Credit Hours*²
- Philosophy course (in addition to General Education courses) *3 Credit Hours*
- University electives *0-14 Credit Hours*
- Major requirements (listed below) *62 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² The foreign language requirement may be satisfied by successful completion of the second semester of the intermediate level of the student's chosen language (typically 232) or by placing out of that language through the Department of Foreign Languages, Literatures and Cultures' placement test.

Major Requirements

All students pursuing a B.A. degree in musical theatre must complete the core requirements listed below.

Core Courses

- STAD 100. Theatre and Dance Colloquium 0.00 (4 enrollments)
- STAD 171. Performance Production 3.00

- THEA 250. The Collaborative Artist: Sophomore Studio 3.00
or
- DANC 250. The Collaborative Artist: Sophomore Studio 3.00

Choose one of the following: 2 Credit Hours

- DANC 140. Elementary Modern Dance (0, 4) 2.00
- DANC 142. Elementary Ballet (0, 4) 2.00
- DANC 143. International Folk Dance (0, 4) 2.00
- DANC 144. Ballroom Dance (0, 4) 2.00
- DANC 147. Tap Dance (0, 4) 2.00
- DANC 245. Dance Improvisation (0, 4) 2.00

Total: 8 Credit Hours

Required Courses

- Core Requirements 8 *Credit Hours*
- THEA 208. Theatre Practicum: Performance 1.00
or
- THEA 308. Theatre Practicum: Performance 1.00

Program Requirements:

Choose three of the following: 3 Credit Hours

(One credit each from scenery, lighting, costumes or management)

- THEA 204. Theatre Practicum: Scenery 1.00
or
- THEA 304. Theatre Practicum: Scenery 1.00

- Other technique courses to fit the student's schedule

Theatre Minor

Theatre Minor Adviser: Zachary Dorsey

Email: dorseyza@jmu.edu

Phone: (540) 568-4551

Minor Requirements

The School of Theatre and Dance offers a minor with options in theatre or dance. No audition or portfolio review is required for the theatre minor or dance minor. A grade of "C" or better must be achieved in all School of Theatre and Dance courses that apply to a minor in the School of Theatre and Dance.

Courses

Choose one of the following: 3 Credit Hours

- STAD 171. Performance Production *3.00*
- THEA 273. Design Aspects of Performance *3.00*

Choose one of the following: 3 Credit Hours

- THEA 210. Introduction to Theatre [C2VPA] *3.00*
- THEA 211. Performance Analysis *3.00*

Electives: 15 Credit Hours

Electives selected from the theatre-designated courses with the approval of the minor adviser

Total: 21 Credit Hours

Theatre Teaching Licensure

In addition to general education and theatre major requirements, students desiring PK-12 licensure in theatre must complete additional course work in education, psychology and theatre. It is necessary to be admitted to the teacher education program prior to enrolling in professional education courses. For a complete description of admission and retention policies and procedures for teacher education, refer to the College of Education.

Students seeking licensure are encouraged to consult regularly with the theatre education program adviser. The undergraduate degree leading to licensure must include the following minimum requirements in theatre:

- Theatre education concentration requirements (12 credits)
- All theatre major core requirements (8 credits)
- All theatre major non-concentration requirements (25 credits)
- Directing to fulfill the major performance requirement (3 credits)

Required Theatre Courses

- THEA 320. Theatre Teaching Methods - Primary Level *3.00* (second or third year)
- THEA 321. Theatre Teaching Methods - Secondary Level *3.00* (second or third year)
- THEA 490. Special Studies in Theatre *1.00 - 3.00* (Practicum) (fall semester fourth year)
- THEA 355. Directing for the Theatre *3.00* (must be taken to fulfill the concentration performance requirement)

Total: 15 Credit Hours

Required Education and Psychology Courses

- PSYC 160. Life Span Human Development [C5SD] *3.00*
- EDUC 300. Foundations of American Education *3.00*
- LED 420. Content Area Literacy, K-12 *2.00*
- THEA 480. Student Teaching *3.00 - 12.00*

Total: 20 Credit Hours

Theatre, B.A.

The School of Theatre and Dance offers a B.A. in theatre. A theatre major must fulfill degree and major requirements.

Credit by Examination

A student may earn credit for a course in the School of Theatre and Dance by passing an examination. The school administers credit by examination tests during only the first two weeks of a fall or spring semester. The tests will not be offered during summer sessions. A student can take a credit by examination test only once during a semester.

A student must request permission for credit by examination by the end of the semester that precedes the semester in which he/she wants to take the examination. Theatre and dance majors who want to meet a major requirement through examination must take the examination before their final year of study. The school does not offer credit by examination for performance or design courses such as acting, directing, scene design, lighting design, costume design, makeup, stage management, dance technique, composition and ensembles.

Degree and Major Requirements

Degree Requirements

Program Requirements

- General Education *41 Credit Hours*¹
- Foreign Language classes (intermediate level required) *0-14 Credit Hours*²
- Philosophy course (in addition to General Education courses) *3 Credit Hours*
- University electives *17-28 Credit Hours*
- Major requirements (listed below) *48 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² The foreign language requirement may be satisfied by successful completion of the second semester of the intermediate level of the student's chosen language (typically 232) or by placing out of that language through the Department of Foreign Languages, Literatures and Cultures' placement test.

Major Requirements

All students pursuing a B.A. degree in theatre must complete the core requirements.

Choose one of the following: 2 Credit Hours

- DANC 140. Elementary Modern Dance (0, 4) 2.00
- DANC 142. Elementary Ballet (0, 4) 2.00

Total: 39 Credit Hours

Concentration Courses

Theatre majors may fulfill the requirements for one or more concentrations or complete nine THEA credits not already applied to the major.

Students in concentrations receive concentration-related advising. In order to formally pursue a concentration, student must apply for the concentration, which can happen as early as the fall of sophomore year for the theatre education concentration and as early as the spring of sophomore year for the theatre studies, performance and design/technology concentrations.

Theatre Studies

Choose any nine THEA credits not already applied to the major or six THEA credits and one of the following courses:

- THEA 449. London Theatre *3.00*
- THEA 485. American Theatre *3.00*
or
- ENG 485. American Theatre
- ENG 317. Shakespeare's Tragedies and Romances *3.00*
- ENG 318. Shakespeare's Comedies and Histories *3.00*
- ENG 320L. Shakespeare on the Page and Stage in London
- ENG 334. Contemporary Drama *3.00*

Recommended Schedule for Theatre Majors

First Year

- STAD 100. Theatre and Dance Colloquium *0.00*
- STAD 171. Performance Production *3.00*
- THEA 211. Performance Analysis *3.00*
- THEA 251. Acting I: Basic Acting *3.00*
- Theatre Major General Requirements

Second Year

- STAD 100. Theatre and Dance Colloquium *0.00*
or
- THEA 250. The Collaborative Artist: Sophomore Studio *3.00*
or
- DANC 250. The Collaborative Artist: Sophomore Studio *3.00*
- THEA 273. Design Aspects of Performance *3.00*
- THEA 315. World Theatre Histories, Texts and Performances I *3.00*
- THEA 316. World Theatre Histories, Texts and Performances II *3.00*
- Theatre Major General Requirements
- Theatre Major Performance or Design/Technology Requirement
- Dance Core Requirement

Third Year

- THEA 317. World Theatre Histories, Texts and Performances III *3.00*
- Theatre Major General Requirements

- Theatre Major Performance or Design/Technology Requirements
- Concentration Requirements

Fourth Year

- THEA 441. Senior Seminar in Theatre *3.00*
or
- THEA 442. Senior Seminar *1.00*
- THEA 499. Honors in Theatre *1.00 - 3.00*
- Theatre Major Performance or Design/Technology Requirements
- Concentration Requirements

Writing, Rhetoric and Technical Communication, School of

Michael Smith, **Director**

Phone: (540) 568-6004

Email: smithmx@jmu.edu

Location: Harrison Hall, Room 2252

Website: <http://www.jmu.edu/wrtc/index.shtml>

Professors

L. Burton, M. Hawthorne, S. Lunsford, S. O'Connor, K. Schick, M. Smith, T. Zimmerman

Associate Professors

S. Aley, J. Almjeld, A. Crow, J. Featherstone, S. Ghiaciuc, E. Gumnior, M. Klein, S. McCarthy, C. Molloy, A. Parrish, E. Pass, J. Zimmerman

Assistant Professors

H. Comfort, L. De Hertogh, V. Rouillon, L. Schubert

Instructors

C. Allen, M. Hickman, K. Jefferson, C. Martin, K. McDonnell, C. Radcliffe

Mission Statement

The School of Writing, Rhetoric and Technical Communication is a community committed to preparing its students — both writers and technical and scientific communicators — for lives of enlightened, global citizenship.

Goals

The goals of WRTC are to help students:

- Develop into accomplished writers and editors.
- Evaluate the effectiveness of communication based upon the principles of rhetoric.
- Develop proficiency in critical thinking, technological and analytical skills.
- Create for themselves an area of expertise applicable to work as professional communicators.

Career Opportunities

In the WRTC major, students learn the kinds of research, analytical and reasoning skills that will allow them to become successful professionals in a wide range of fields. WRTC graduates can expect career opportunities in writing, editing or production positions with a variety of business, educational or industry employers, including the computer hardware and software industry, law firms, journalism, health care providers, pharmaceutical manufacturers, education, engineering companies, publishing houses, environmental organizations, not-for-profit or political organizations, and technical translation groups of multinational corporations.

Professional Activities and Organizations

Internships

The WRTC internship is a requirement for all B.A. and B.S. students. It allows students to utilize the preparation that they received from their WRTC coursework to design, write, edit and produce professional documents for internship providers in academia, business, industry and government. Information about internships may be obtained through the WRTC website.

RhetTech Journal

RhetTech is the newest, student-run, online journal in WRTC. It aims to publish high-quality compositions in a variety of genres from students working in the disciplines of writing, rhetoric and technical communication. *RhetTech* is created and managed by students enrolled in WRTC 328. These practicum students develop the criteria used to evaluate essays, read and discuss each submission, and work individually with winning essayists to prepare their work for publication.

Pre-Law

Pre-law at JMU is not a major, minor or concentration, but a number of WRTC students elect to pursue law school after graduation. The director of WRTC serves the College of Arts and Letters as a pre-law adviser and can assist students in selecting courses that will best provide the intellectual challenge and skills necessary for success in law school.

STC Student Chapter

The Society for Technical Communication offers a unique opportunity for members to seek recognition for their work and obtain professional contacts. STC is the world's largest and oldest professional association dedicated to the advancement of the field of technical communication. The Society's members span the field of the technical communication profession from students and academics to practitioners and managers.

The James Madison University STC Student Chapter was established in the fall of 1999, offering students a venue for exploring networking and applied skills.

Service to the University

Interdisciplinary Liberal Studies

WRTC faculty are active participants in creating and sustaining the interdisciplinary liberal studies (IDLS) major for teacher education students, K-8.

Honors College

WRTC faculty regularly offer Honors seminars.

Madison Writing Awards

The Madison Writing Awards (MWA) is a university-wide competition that celebrates writing across the curriculum in all undergraduate academic programs, regardless of medium and genre, from traditional papers to multimodal productions. These awards reflect the commitment of James Madison University, the College of Arts and Letters, and the School of Writing, Rhetoric and Technical Communication to prepare students for educated and enlightened global citizenship through the outlets of writing and rhetoric. The MWA biennial awards ceremony features a showcase of winning pieces as well as the presentation of cash prizes.

Writing, Rhetoric and Technical Communication Minor

The minimum requirement for a minor in WRTC is 18 credit hours.

Minor Requirements

- WRTC 200. Introduction to Studies in Writing, Rhetoric and Technical Communication *3.00*
- WRTC 201. Theory and Methods in Writing, Rhetoric and Technical Communication *3.00*
- WRTC 300. Professional Editing *3.00*
- WRTC 301. Language, Law and Ethics *3.00*
- Choose any two WRTC electives *6 Credit Hours*

Total: 18 Credit Hours

Writing, Rhetoric and Technical Communication, Technical and Scientific Communication Concentration, B.A.

Degree and Major Requirements

The study of writing, rhetoric and technical communication includes two concentrations in the undergraduate major: technical and scientific communication and writing and rhetoric. The WRTC major emphasizes scholarly, humanistic and social scientific perspectives on the function and application of communication technologies, with instruction in areas such as:

- literacy studies
- rhetorical traditions
- writing pedagogy
- editing
- website theory and design
- publications management

- knowledge and information management
- writing for professional communities such as government, medical, scientific and academic

In addition to offering students the rhetorical tools with which to excel as professional communicators, the B.A. and B.S. programs also prepare graduates for academic studies in writing, rhetoric and technical communication at the master's level as well as for professional programs such as law school.

The B.A. and B.S. programs in WRTC unite three disciplines into a flexible, yet historically and theoretically grounded degree program. The WRTC degree teaches students to think in ways that cross disciplinary lines and to demonstrate accomplishment in multiple genres of writing, rhetoric and technical communication.

Students work with their WRTC advisers to design a program that fits their unique educational needs and career aspirations.

Course requirements differ between the B.A. and B.S. programs, and students should maintain regular contact with their WRTC adviser to ensure timely graduation. Requirements and eligible courses for the B.A. and B.S. in each of the two concentrations are outlined below.

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Foreign language classes (intermediate level required) *0-14 Credit Hours*²
- Philosophy course (in addition to General Education courses) *3 Credit Hours*
- University electives *23-37 Credit Hours*
- Major requirements *39 Credit Hours*

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² The foreign language requirement may be satisfied by successful completion of the second semester of the intermediate level (typically 232) of the student's chosen language or by placing out of that language through the Department of Foreign Language, Literature and Cultures' placement test.

Total: 120 Credit Hours

Major Requirements

B.A. and B.S. students must complete 18 hours of core requirements.

Major Requirements

- Core requirements *18 Credit Hours*
- Concentration requirements (Students must choose a concentration in either technical and scientific communication or writing and rhetoric.) *12 Credit Hours*
- WRTC electives *9 Credit Hours*

Total: 39 Credit Hours

Core Requirements

- WRTC 200. Introduction to Studies in Writing, Rhetoric and Technical Communication *3.00*
- WRTC 201. Theory and Methods in Writing, Rhetoric and Technical Communication *3.00*
- WRTC 300. Professional Editing *3.00*
- WRTC 301. Language, Law and Ethics *3.00*
- WRTC 495. Internship in Writing, Rhetoric and Technical Communication *3.00*
- WRTC 496. Capstone in Writing, Rhetoric and Technical Communication *3.00*

Total: 18 Credit Hours

Prerequisites

Prerequisites for most WRTC 200 and above level courses require completion of WRTC 200 and WRTC 201. Students may enroll in some courses for which they have not taken the prerequisite courses with permission of the instructor.

Concentrations

All students must choose a concentration in either technical and scientific communication (TSC) or writing and rhetoric (WR). In addition to the 18 credit hours of core requirements, students must take an additional 21 credit hours of WRTC electives, 12 of which are concentration-specific.

Technical and Scientific Communication

All TSC concentrators must take WRTC 350 and choose three additional WRTC courses from the following list of TSC electives. In addition, TSC concentrators must take one WR elective, one crossover elective and one community-based learning elective.

TSC Concentration Courses

- WRTC 350. Foundations of Technical Communication *3.00*

TSC Electives (Choose three): 9 Credit Hours

- WRTC 352. Online Design I *3.00*
- WRTC 354. Document Design *3.00*
- WRTC 356. Web Theory and Design *3.00*
- WRTC 358. Writing About Science and Technology *3.00*
- WRTC 412. Content Strategy *3.00*
- WRTC 450. Digital Rhetoric *3.00*
- WRTC 452. Online Design II *3.00*
- WRTC 454. Publication Management *3.00*
- WRTC 456. Usability Testing *3.00*
- WRTC 458. Scientific and Medical Communication *3.00*
- WRTC 460. Legal Writing *3.00*
- WRTC 462. Government Writing *3.00*

WR Electives (Choose one): 3 Credit Hours

- WRTC 330. Rhetorical Analysis and Criticism 3.00
- WRTC 332. Creative Approaches to Digital Storytelling 3.00
- WRTC 334. Introduction to Popular Writing 3.00
- WRTC 336. Writing Consultation 3.00
- WRTC 338. Genre Theory 3.00
- WRTC 340. Writing as Leading 3.00
- WRTC 342. Writing Place 3.00

- WRTC 430. Contemporary Rhetorical Theory and Practice 3.00
or
- SCOM 343. Contemporary Rhetorical Theory and Practice 3.00

- WRTC 432. Rhetoric of the Personal Narrative 3.00
- WRTC 434. Advanced Popular Writing 3.00
- WRTC 436. Teaching Writing 3.00

Crossover Electives (Choose one): 3 Credit Hours

- WRTC 310. Semiotics 3.00
- WRTC 312. Studies in Literacy 3.00
- WRTC 314. Writing in the Public Sphere 3.00
- WRTC 316. Research Methodologies in WRTC 3.00
- WRTC 318. Intercultural Professional Communication 3.00

- WRTC 326. Environmental Communication and Advocacy 3.00
or
- SCOM 354. Environmental Communication and Advocacy 3.00

- WRTC 328. Practicum 1.00 - 3.00, repeatable up to 6 credits
- WRTC 416. Rhetoric of Environmental Science and Technology 3.00
or
- SCOM 465. Rhetoric of Environmental Science and Technology 3.00

- WRTC 420. Feminist Rhetorics 3.00
or
- SCOM 420. Feminist Rhetorics 3.00
or
- WGSS 420. Feminist Rhetorics 3.00

- WRTC 426. Special Topics in Writing, Rhetoric and Technical Communication 3.00

Community-Based Learning Electives (Choose one): 3 Credit Hours

- WRTC 480. Writing for Business and Industry 3.00
- WRTC 484. Writing for Nonprofits 3.00
- WRTC 486. Writing in the Community 3.00
- WRTC 488. Writing in the Health Sciences 3.00

Total: 21 Credit Hours

Recommended Schedule for B.A. Majors

Students are encouraged to begin their WRTC course work as soon as possible in their degree plans. The following sample program of study illustrates how a WRTC major might earn a B.A. degree.

First Year

First Semester

- Foreign language course *3-4 Credit Hours*¹
- General Education Cluster One *9 Credit Hours*
- General Education Cluster Three *3 Credit Hours*

Total: 15-16 Credit Hours

Footnote

¹ Completion of an intermediate level foreign language is required for the B.A. degree (usually six hours if begun at the intermediate level) unless the language requirement is satisfied by an exemption test. In that case, university electives may be substituted for additional hours indicated as foreign language courses.

Second Semester

- Foreign language course *3-4 Credit Hours*
- WRTC 200. Introduction to Studies in Writing, Rhetoric and Technical Communication *3.00*
- General Education Cluster Three course *3 Credit Hours*
- General Education courses *6 Credit Hours*

Total: 15-16 Credit Hours

Second Year

First Semester

- Foreign language course *0-3 Credit Hours*
- WRTC 201. Theory and Methods in Writing, Rhetoric and Technical Communication *3.00*
- B.A. Degree philosophy course *3 Credit Hours*
- General Education Cluster Three course *4 Credit Hours*
- General Education courses *0-9 Credit Hours*

Total: 16 Credit Hours

Second Semester

- Foreign language course *0-3 Credit Hours*
- WRTC 300. Professional Editing *3.00*
- WRTC 301. Language, Law and Ethics *3.00*
- General Education course *3 Credit Hours*
- University electives *3 Credit Hours*

WRTC Concentration Requirement: 3 Credit Hours

- WRTC 330. Rhetorical Analysis and Criticism *3.00* (for WR)
- WRTC 350. Foundations of Technical Communication *3.00* (for TSC)

Total: 15-18 Credit Hours

Third Year

First Semester

- WRTC concentration-specific electives *6 Credit Hours*
- General Education courses *6 Credit Hours*
- University elective *3 Credit Hours*

Total: 15 Credit Hours

Second Semester

- WRTC concentration-specific elective *3 Credit Hours*
- WRTC elective *3 Credit Hours*
- General Education courses *3-6 Credit Hours*
- University electives *6 Credit Hours*

Total: 15-18 Credit Hours

Fourth Year

First Semester

- WRTC electives *3-6 Credit Hours*
- University electives *6-9 Credit Hours*

Total: 15-18 Credit Hours

Second Semester

- WRTC elective *0-3 Credit Hours*
- WRTC 495. Internship in Writing, Rhetoric and Technical Communication *3.00*
- WRTC 496. Capstone in Writing, Rhetoric and Technical Communication *3.00*
- University electives *6-9 Credit Hours*

Total: 15-16 Credit Hours

Writing, Rhetoric and Technical Communication, Technical and Scientific Communication Concentration, B.S.

Degree and Major Requirements

The study of writing, rhetoric and technical communication includes two concentrations in the undergraduate major: technical and scientific communication and writing and rhetoric. The WRTC major emphasizes scholarly, humanistic and social scientific perspectives on the function and application of communication technologies, with instruction in areas such as:

- literacy studies
- rhetorical traditions
- writing pedagogy
- editing
- website theory and design
- publications management
- knowledge and information management
- writing for professional communities such as government, medical, scientific and academic

In addition to offering students the rhetorical tools with which to excel as professional communicators, the B.A. and B.S. programs also prepare graduates for academic studies in writing, rhetoric and technical communication at the master's level as well as for professional programs such as law school.

The B.A. and B.S. programs in WRTC unite three disciplines into a flexible, yet historically and theoretically grounded degree program. The WRTC degree teaches students to think in ways that cross disciplinary lines and to demonstrate accomplishment in multiple genres of writing, rhetoric and technical communication.

Students work with their WRTC advisers to design a program that fits their unique educational needs and career aspirations.

Course requirements differ between the B.A. and B.S. programs, and students should maintain regular contact with their WRTC adviser to ensure timely graduation. Requirements and eligible courses for the B.A. and B.S. in each of the two concentrations are outlined below.

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Quantitative requirement *3 Credit Hours*²
- Scientific literacy requirement *3-4 Credit Hours*²
- University electives *33-35 Credit Hours*
- Major requirements *39 Credit Hours*

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² In addition to course work taken to fulfill General Education requirement.

Total: 120 Credit Hours

Major Requirements

B.A. and B.S. students must complete 18 hours of core requirements.

Major Requirements

- Core requirements *18 Credit Hours*
- Concentration requirements (Students must choose a concentration in either technical and scientific communication or writing and rhetoric.) *12 Credit Hours*
- WRTC electives *9 Credit Hours*

Total: 39 Credit Hours

- WRTC 496. Capstone in Writing, Rhetoric and Technical Communication *3.00*

Total: 18 Credit Hours

Prerequisites

Prerequisites for most WRTC 200 and above level courses require completion of WRTC 200 and WRTC 201. Students may enroll in some courses for which they have not taken the prerequisite courses with permission of the instructor.

Concentrations

All students must choose a concentration in either technical and scientific communication (TSC) or writing and rhetoric (WR). In addition to the 18 credit hours of core requirements, students must take an additional 21 credit hours of WRTC electives, 12 of which are concentration-specific.

Writing and Rhetoric Concentration

All writing and rhetoric (WR) concentrators must take WRTC 330 and choose three additional WRTC courses from the following list of WR electives. In addition, WR concentrators must take one TSC elective, one crossover elective and one community-based learning elective.

WR Concentration Courses

- WRTC 330. Rhetorical Analysis and Criticism *3.00*

WR Electives (Choose three): 9 Credit Hours

- WRTC 332. Creative Approaches to Digital Storytelling *3.00*
- WRTC 334. Introduction to Popular Writing *3.00*
- WRTC 336. Writing Consultation *3.00*
- WRTC 338. Genre Theory *3.00*
- WRTC 340. Writing as Leading *3.00*
- WRTC 342. Writing Place *3.00*

- WRTC 430. Contemporary Rhetorical Theory and Practice *3.00*
or
- SCOM 343. Contemporary Rhetorical Theory and Practice *3.00*

- WRTC 432. Rhetoric of the Personal Narrative *3.00*
- WRTC 434. Advanced Popular Writing *3.00*
- WRTC 436. Teaching Writing *3.00*

TSC Electives (Choose one): 3 Credit Hours

- WRTC 350. Foundations of Technical Communication *3.00*
- WRTC 352. Online Design I *3.00*
- WRTC 354. Document Design *3.00*
- WRTC 356. Web Theory and Design *3.00*
- WRTC 358. Writing About Science and Technology *3.00*
- WRTC 412. Content Strategy *3.00*
- WRTC 450. Digital Rhetoric *3.00*
- WRTC 452. Online Design II *3.00*
- WRTC 454. Publication Management *3.00*
- WRTC 456. Usability Testing *3.00*
- WRTC 458. Scientific and Medical Communication *3.00*
- WRTC 460. Legal Writing *3.00*
- WRTC 462. Government Writing *3.00*

Crossover Electives (Choose one): 3 Credit Hours

- WRTC 310. Semiotics 3.00
- WRTC 312. Studies in Literacy 3.00
- WRTC 314. Writing in the Public Sphere 3.00
- WRTC 316. Research Methodologies in WRTC 3.00
- WRTC 318. Intercultural Professional Communication 3.00

- WRTC 326. Environmental Communication and Advocacy 3.00
or
- SCOM 354. Environmental Communication and Advocacy 3.00

- WRTC 328. Practicum 1.00 - 3.00, repeatable up to 6 credits

- WRTC 416. Rhetoric of Environmental Science and Technology 3.00
or
- SCOM 465. Rhetoric of Environmental Science and Technology 3.00

- WRTC 420. Feminist Rhetorics 3.00
or
- SCOM 420. Feminist Rhetorics 3.00
or
- WGSS 420. Feminist Rhetorics 3.00

- WRTC 426. Special Topics in Writing, Rhetoric and Technical Communication 3.00

Community-Based Learning Electives (Choose one): 3 Credit Hours

- WRTC 480. Writing for Business and Industry 3.00
- WRTC 484. Writing for Nonprofits 3.00
- WRTC 486. Writing in the Community 3.00
- WRTC 488. Writing in the Health Sciences 3.00

Total: 21 Credit Hours

Recommended Schedule for B.A. Majors

Students are encouraged to begin their WRTC course work as soon as possible in their degree plans. The following sample program of study illustrates how a WRTC major might earn a B.A. degree.

First Year

First Semester

- Foreign language course 3-4 Credit Hours ¹
- General Education Cluster One 9 Credit Hours
- General Education Cluster Three 3 Credit Hours

Total: 15-16 Credit Hours

Footnote

¹ Completion of an intermediate level foreign language is required for the B.A. degree (usually six hours if begun at the intermediate level) unless the language requirement is satisfied by an exemption test. In that case, university electives may be substituted for additional hours indicated as foreign language courses.

Second Semester

- Foreign language course *3-4 Credit Hours*
- WRTC 200. Introduction to Studies in Writing, Rhetoric and Technical Communication *3.00*
- General Education Cluster Three course *3 Credit Hours*
- General Education courses *6 Credit Hours*

Total: 15-16 Credit Hours

Second Year

First Semester

- Foreign language course *0-3 Credit Hours*
- WRTC 201. Theory and Methods in Writing, Rhetoric and Technical Communication *3.00*
- B.A. Degree philosophy course *3 Credit Hours*
- General Education Cluster Three course *4 Credit Hours*
- General Education courses *0-9 Credit Hours*

Total: 16 Credit Hours

Second Semester

- Foreign language course *0-3 Credit Hours*
- WRTC 300. Professional Editing *3.00*
- WRTC 301. Language, Law and Ethics *3.00*
- General Education course *3 Credit Hours*
- University electives *3 Credit Hours*

WRTC Concentration Requirement: 3 Credit Hours

- WRTC 330. Rhetorical Analysis and Criticism *3.00* (for WR)
- WRTC 350. Foundations of Technical Communication *3.00* (for TSC)

Total: 15-18 Credit Hours

Third Year

First Semester

- WRTC concentration-specific electives *6 Credit Hours*
- General Education courses *6 Credit Hours*
- University elective *3 Credit Hours*

Total: 15 Credit Hours

Second Semester

- WRTC concentration-specific elective *3 Credit Hours*
- WRTC elective *3 Credit Hours*
- General Education courses *3-6 Credit Hours*
- University electives *6 Credit Hours*

Total: 15-18 Credit Hours

Fourth Year

First Semester

- WRTC electives *3-6 Credit Hours*
- University electives *6-9 Credit Hours*

Total: 15-18 Credit Hours

Second Semester

- WRTC elective *0-3 Credit Hours*
- WRTC 495. Internship in Writing, Rhetoric and Technical Communication *3.00*
- WRTC 496. Capstone in Writing, Rhetoric and Technical Communication *3.00*
- University electives *6-9 Credit Hours*

Total: 15-16 Credit Hours

Writing, Rhetoric and Technical Communication, Writing and Rhetoric Concentration, B.S.

Degree and Major Requirements

The study of writing, rhetoric and technical communication includes two concentrations in the undergraduate major: technical and scientific communication and writing and rhetoric. The WRTC major emphasizes scholarly, humanistic and social scientific perspectives on the function and application of communication technologies, with instruction in areas such as:

- literacy studies
- rhetorical traditions
- writing pedagogy
- editing
- website theory and design
- publications management
- knowledge and information management
- writing for professional communities such as government, medical, scientific and academic

In addition to offering students the rhetorical tools with which to excel as professional communicators, the B.A. and B.S. programs also prepare graduates for academic studies in writing, rhetoric and technical communication at the master's level as well as for professional programs such as law school.

The B.A. and B.S. programs in WRTC unite three disciplines into a flexible yet historically and theoretically grounded degree program. The WRTC degree teaches students to think in ways that cross disciplinary lines and to demonstrate accomplishment in multiple genres of writing, rhetoric and technical communication.

Students work with their WRTC advisers to design a program that fits their unique educational needs and career aspirations.

Course requirements differ between the B.A. and B.S. programs and students are advised to maintain regular contact with their WRTC adviser to ensure timely graduation. Requirements and eligible courses for the B.A. and B.S. in each of the two concentrations are outlined below.

Degree Requirements

Required Courses

- General Education *41 Credit Hours*¹
- Quantitative requirement *3 Credit Hours*²
- Scientific literacy requirement *3-4 Credit Hours*²
- University electives *33-35 Credit Hours*
- Major requirements *39 Credit Hours*

Total: 120 Credit Hours

Footnotes

¹ The General Education program contains a set of requirements each student must fulfill. The number of credit hours necessary to fulfill these requirements may vary.

² In addition to course work taken to fulfill General Education requirement.

Major Requirements

B.A. and B.S. students must complete 18 hours of core requirements.

Major Requirements

- Core requirements *18 Credit Hours*
- Concentration requirements (Students must choose a concentration in either technical and scientific communication or writing and rhetoric.) *12 Credit Hours*
- WRTC electives *9 Credit Hours*

Total: 39 Credit Hours

Core Requirements

- WRTC 200. Introduction to Studies in Writing, Rhetoric and Technical Communication 3.00
- WRTC 201. Theory and Methods in Writing, Rhetoric and Technical Communication 3.00
- WRTC 300. Professional Editing 3.00
- WRTC 301. Language, Law and Ethics 3.00
- WRTC 495. Internship in Writing, Rhetoric and Technical Communication 3.00
- WRTC 496. Capstone in Writing, Rhetoric and Technical Communication 3.00

Total: 18 Credit Hours

Prerequisites

Prerequisites for most WRTC 200 and above level courses require completion of WRTC 200 and WRTC 201. Students may enroll in some courses for which they have not taken the prerequisite courses with permission of the instructor.

Concentrations

All students must choose a concentration in either technical and scientific communication (TSC) or writing and rhetoric (WR). In addition to the 18 credit hours of core requirements, students must take an additional 21 credit hours of WRTC electives, 12 of which are concentration-specific.

Writing and Rhetoric Concentration

All writing and rhetoric (WR) concentrators must take WRTC 330 and choose three additional WRTC courses from the following list of WR electives. In addition, WR concentrators must take one TSC elective, one crossover elective and one community-based learning elective.

WR Concentration Courses

- WRTC 330. Rhetorical Analysis and Criticism 3.00

WR Electives (Choose three): 9 Credit Hours

- WRTC 332. Creative Approaches to Digital Storytelling 3.00
- WRTC 334. Introduction to Popular Writing 3.00
- WRTC 336. Writing Consultation 3.00
- WRTC 338. Genre Theory 3.00
- WRTC 340. Writing as Leading 3.00
- WRTC 342. Writing Place 3.00

- WRTC 430. Contemporary Rhetorical Theory and Practice 3.00
or
- SCOM 343. Contemporary Rhetorical Theory and Practice 3.00

- WRTC 432. Rhetoric of the Personal Narrative 3.00
- WRTC 434. Advanced Popular Writing 3.00
- WRTC 436. Teaching Writing 3.00

TSC Electives (Choose one): 3 Credit Hours

- WRTC 350. Foundations of Technical Communication 3.00
- WRTC 352. Online Design I 3.00
- WRTC 354. Document Design 3.00
- WRTC 356. Web Theory and Design 3.00
- WRTC 358. Writing About Science and Technology 3.00
- WRTC 412. Content Strategy 3.00
- WRTC 450. Digital Rhetoric 3.00
- WRTC 452. Online Design II 3.00
- WRTC 454. Publication Management 3.00
- WRTC 456. Usability Testing 3.00
- WRTC 458. Scientific and Medical Communication 3.00
- WRTC 460. Legal Writing 3.00
- WRTC 462. Government Writing 3.00

Crossover Electives (Choose one): 3 Credit Hours

- WRTC 310. Semiotics 3.00
- WRTC 312. Studies in Literacy 3.00
- WRTC 314. Writing in the Public Sphere 3.00
- WRTC 316. Research Methodologies in WRTC 3.00
- WRTC 318. Intercultural Professional Communication 3.00

- WRTC 326. Environmental Communication and Advocacy 3.00
or
- SCOM 354. Environmental Communication and Advocacy 3.00

- WRTC 328. Practicum 1.00 - 3.00, repeatable up to 6 credits

- WRTC 416. Rhetoric of Environmental Science and Technology 3.00
or
- SCOM 465. Rhetoric of Environmental Science and Technology 3.00

- WRTC 420. Feminist Rhetorics 3.00
or
- SCOM 420. Feminist Rhetorics 3.00
or
- WGSS 420. Feminist Rhetorics 3.00

- WRTC 426. Special Topics in Writing, Rhetoric and Technical Communication 3.00

Community-Based Learning Electives (Choose one): 3 Credit Hours

- WRTC 480. Writing for Business and Industry 3.00
- WRTC 484. Writing for Nonprofits 3.00
- WRTC 486. Writing in the Community 3.00
- WRTC 488. Writing in the Health Sciences 3.00

Total: 21 Credit Hours

Recommended Schedule for B.S. Majors

Students are encouraged to begin their WRTC course work as soon as possible in their degree plans. The following sample program of study illustrates how a WRTC major might earn a B.S. degree.

First Year

First Semester

- General Education Cluster One courses *9 Credit Hours*
- General Education Cluster Three courses *3-6 Credit Hours*
- General Education courses *3 Credit Hours*

Total: 15-18 Credit Hours

Second Semester

- WRTC 200. Introduction to Studies in Writing, Rhetoric and Technical Communication *3.00*
- WRTC 201. Theory and Methods in Writing, Rhetoric and Technical Communication *3.00*
- General Education Cluster Three courses *3-4 Credit Hours*
- General Education courses *6 Credit Hours*

Total: 15-16 Credit Hours

Second Year

First Semester

- WRTC 300. Professional Editing *3.00*
- General Education Cluster Three course *0-4 Credit Hours*
- General Education courses *9-12 Credit Hours*

Total: 15-16 Credit Hours

Second Semester

- WRTC 301. Language, Law and Ethics *3.00*
- B.S. Quantitative requirement *3 Credit Hours*
- General Education courses *9 Credit Hours*

WRTC concentration requirement: 3 Credit Hours

- WRTC 330. Rhetorical Analysis and Criticism *3.00* (for WR)
- WRTC 350. Foundations of Technical Communication *3.00* (for TSC)

Total: 15-18 Credit Hours

Third Year

First Semester

- WRTC concentration-specific electives *6 Credit Hours*
- B.S. Scientific Literacy requirement *3 Credit Hours* ¹
- University electives *6-9 Credit Hours*

Total: 15-18 Credit Hours

Footnote

¹ Completion of the B.S. degree requires a student to complete either a natural science or a social science course in addition to those required for the General Education program.

Second Semester

- WRTC concentration-specific elective *3 Credit Hours*
- WRTC elective *3 Credit Hours*
- University electives *9 Credit Hours*

Total: 15 Credit Hours

Fourth Year

First Semester

- WRTC elective *3-6 Credit Hours*
- University electives *6-9 Credit Hours*

Total: 12-15 Credit Hours

Second Semester

- WRTC electives *3 Credit Hours*
- WRTC 495. Internship in Writing, Rhetoric and Technical Communication *3.00*
- WRTC 496. Capstone in Writing, Rhetoric and Technical Communication *3.00*
- University electives *6-9 Credit Hours*

Total: 13-16 Hours

Course Descriptions

ACTG 244. Accounting for Non-Business Majors

3.00

For non-business majors only. Introduces basic business and accounting topics such as revenue, investments, expenditures,

liabilities, credit, cash management, and taxation. Heavy emphasis is placed on the measurement of operating performance, and interpretation and use of accounting data for organizational decision-making. *Prerequisite: Sophomore standing or higher.*

ACTG 295. Accounting Ethics and Social Responsibility

3.00

This course examines ethical perspectives and values in decision making for accountants from both philosophical and professional perspectives. Students analyze the nature of ethical dilemmas faced by accountants in making decisions and exercising responsibilities to the public, and they apply professional guidance on ethics in accounting. *Prerequisite: Junior standing. Open to accounting majors only.*

ACTG 302. Introduction to the Profession: Role of Accountants

1.00

This class relies heavily on discussions with practicing accountants in public accounting, industry and government. Topics include career preparation and the role of accountants in business and capital markets. Written assignments are used to enhance communication skills. *Prerequisite: Completion of both COB 241 and COB 242 with grades of "B" or better in each and COB 300. Corequisite: COB 300.*

ACTG 303. Basic Spreadsheet Skills for Accountants

1.00

This class provides students with hands-on learning and practice with basic Excel skills necessary in the workplace. Topics include creating and printing professional documents, navigating through workbooks, creating and editing formulas, using basic logical and statistical functions, and creating charts. *Prerequisite: ACTG 302 or permission of the department head. Corequisite: ACTG 302 or permission of the department head.*

ACTG 304. Advanced Spreadsheet Skills for Analysis and Reporting Accounting Information

1.00

This class provides students with hands-on learning and practice with advanced Excel skills. This class focuses on preparing students to become Microsoft Certified Application Specialists in Excel. Topics include customizing charts, using advanced financial, logical, and statistical functions, pivot tables and pivot charts, evaluation of formulas, and collaboration of workbooks. *Prerequisite: Completion of ACTG 303 with a grade of "C-" or better.*

ACTG 313. Accounting Information Systems

3.00

Covers the use of accounting systems for the collection, organization, analysis and reporting of accounting data. Topics include: internal controls, documentation of accounting systems, transaction processing cycles, auditing information technology, computer and information systems security and integration of business functions in the accounting process. *Prerequisite: ACTG 303. Corequisite: ACTG 303.*

ACTG 343. Corporate Financial Reporting I

3.00

Provides a theoretical framework to explain and critically evaluate financial reporting by businesses. In addition to studying the authoritative standards for preparing financial statements, students develop the ability to read, use, analyze and interpret financial statements. Students gain an understanding that managers can shape the financial information communicated to investors and

creditors. *Prerequisite: ACTG 302 or permission of the department head. Corequisite: ACTG 302 or permission of the department head.*

ACTG 344. Corporate Financial Reporting II

3.00

Continues the development of a theoretical framework to read, use, analyze, interpret, explain and critically evaluate financial reporting by businesses. Selected topics include financial instruments, leases, pensions, deferred taxes, stockholders' equity and other corporate reporting issues. *Prerequisite: ACTG 343 with a grade of "C-" or better.*

ACTG 377. Federal Income Tax Accounting

3.00

Designed to introduce students to the federal income tax system, including individual and business entity taxation. Topics include income, exclusions, deductions and property transactions. Also facilitates development of research skills. *Prerequisite: ACTG 302 or permission of the department head. Corequisite: ACTG 302 or permission of the department head.*

ACTG 410. Auditing

3.00

A study of techniques available for gathering, summarizing, analyzing and interpreting the data presented in financial statements and procedures used in verifying the fairness of the information. Also emphasizes ethical and legal aspects and considerations. *Prerequisite: ACTG 313, ACTG 303 and ACTG 344 with grades of "C-" or better.*

ACTG 440. Advanced Information Technology for Accountants

3.00

This course is offered only for accounting majors seeking a minor in CIS. Topics include legacy systems, the systems development life cycle, telecommunications, distributed processing, networking and information security, taught from an accounting perspective. *Prerequisite: ACTG 313 with a grade of "C-" or better and declared CIS minor.*

ACTG 475. Accounting Decision Making and Control

3.00

The study of cost accounting concepts and information used by business organizations to make strategic, organizational and operational decisions. Topics include the role of planning and control in attaining organizational goals and objectives; the relationship among cost structure, cost behavior, and operating income; traditional and activity-based costing approaches to product costing, differential analysis in decision making; and ethical issues for accountants. *Prerequisite: ACTG 343 with a grade of "C-" or better and ACTG 304. Corequisite: ACTG 304.*

ACTG 483. International Accounting and Financial Reporting

3.00

Designed to develop a fundamental knowledge of the assumptions, environmental considerations and techniques underlying the collection and reporting of financial information on an international scale. *Prerequisite: COB 300. Open to International Business Majors Only.*

ACTG 490. Special Studies in Accounting

1.00 - 6.00 each semester

Designed to give capable students in accounting an opportunity to do independent study under faculty supervision. Admission only by recommendation of the instructor and permission of the director.

ACTG 499A. Honors

1.00

ACTG 499B. Honors Thesis

3.00

ACTG 499C. Honors

2.00

AAAD 200. Introduction to African, African American and Diaspora Studies [C4GE]

3.00

An introductory survey of basic theoretical concepts to analyze the Black experience, with special focus on the general historical process common to Africa and the African Diaspora. May be used for general education credit.

AAAD 300. Special Topics in African, African American and Diaspora Studies

3.00

Examination of selected topics of importance to the field of African, African Americans and Diaspora studies.

AAAD 400. Advanced Topics in African, African American and Diaspora Studies

3.00

Selected topics in African, African American and Diaspora studies are studied in depth. Course may be repeated when content changes.

AAAD 401. Internship in African, African American and Diaspora Studies

1.00-6.00

This internship course provides the student with the opportunity to apply knowledge learned in the classroom in a practical/real-world setting(s). It prepares students for working independently in the field. Any internship experience must be approved by the internship coordinator in advance, and details of supervision and evaluation should be spelled out in advance by the supervising faculty member. If the internship is through an academic unit, it must be approved for credit by the African, African American and Diaspora Studies internship coordinator in advance of the experience.

AAAD 488. African American Art

3.00

Crosslisted with ARTH 488

This course examines visual arts produced by people of African descent in the United States from the colonial period until the present. Course themes include debates about the relationship between racial identity and artistic production; the complex

interchange between African American art and the cultural traditions of Africa and Europe; black artists' engagement with popular representations of African Americans; and the intersection of race with class, gender and sexuality. *Prerequisite: ARTH 206, AAAD 200 or permission of the instructor.*

AAAD 489. African, African American and Diaspora Studies Senior Research Experience

1.00

In this research-oriented experience, students design and complete research projects relevant to their interests in African, African American and Diaspora studies, as well as connect their projects to previous course work and experiences within the AAAD studies minor. *Prerequisite: AAAD 200, senior standing and permission of the instructor.*

AIRS 100. Leadership Laboratory

0.00

This course is a mandatory laboratory in leadership and followership development for Air Force Reserve Officer Training Course (AFROTC) cadets. As a complement to the air science classes, this laboratory focuses on applying leadership principles and understanding leaders' responsibilities while emphasizing the benefits of practical experience. JMU students will take AFROTC classes at the University of Virginia for JMU credit. *Corequisite: Any Air Force ROTC class.*

AIRS 110. The Foundations of the United States Air Force I

1.00

This course introduces the United States Air Force and Air Force Reserve Officers Training Corps. Topics include mission and organization of the Air Force, officership and professionalism, military customs and courtesies, Air Force officer opportunities and communication skills. JMU students will take AFROTC classes at the University of Virginia for JMU credit. AFROTC cadets and students interested in joining Air Force ROTC must also register for AIRS 100 , Leadership Laboratory.

AIRS 120. The Foundations of the United States Air Force II

1.00

This course introduces the United States Air Force and Air Force Reserve Officers Training Corps. Topics include mission and organization of the Air Force, officership and professionalism, military customs and courtesies, Air Force officer opportunities and communication skills. JMU students will take AFROTC classes at the University of Virginia for JMU credit. *Corequisite: AIRS 100.*

AIRS 210. The Evolution of Air and Space Power I

1.00

historical perspective, from the first balloons and dirigibles to the space age global positioning systems of the Persian Gulf War. Topics include principles of war, tenets of air and space power, historical Air Force leaders, and employment of air and space power. JMU students will take AFROTC classes at the University of Virginia for JMU credit. *Corequisite: AIRS 100.*

AIRS 220. The Evolution of Air and Space Power II

1.00

This course examines general aspects of air and space power through a historical perspective, from the first balloons and dirigibles to the space age global positioning systems of the Persian Gulf War. Topics include principles of war, tenets of air and space power, historical Air Force leaders, and employment of air and space power. JMU students will take AFROTC classes at the University of Virginia for JMU credit. *Corequisite: AIRS 100.*

AIRS 310. Concepts of Air Force Leadership and Management I

3.00

This course studies leadership, management fundamentals and professional knowledge, Air Force personnel and evaluation systems, leadership ethics, and communication skills required of Air Force junior officers. The class examines Air Force leadership and management situations, using case studies as a means of demonstrating and applying the concepts under consideration. JMU students will take AFROTC classes at the University of Virginia for JMU credit. *Corequisite: AIRS 100.*

AIRS 320. Concepts of Air Force Leadership and Management II

3.00

This course studies leadership, management fundamentals and professional knowledge, Air Force personnel and evaluation systems, leadership ethics, and communication skills required of Air Force junior officers. The class examines Air Force leadership and management situations, using case studies as a means of demonstrating and applying the concepts under consideration. JMU students will take AFROTC classes at the University of Virginia for JMU credit. *Corequisite: AIRS 100.*

AIRS 410. National Security Affairs/Preparation for Active Duty I

3.00

This course examines the national security process, regional studies, advanced leadership ethics and Air Force doctrine. Topics include the military as a profession, officership, military justice, civilian control of the military, preparation for active duty and current issues affecting the military profession. JMU students will take AFROTC classes at the University of Virginia for JMU credit. *Corequisite: AIRS 100.*

AIRS 420. National Security Affairs/Preparation for Active Duty II

3.00

This course examines the national security process, regional studies, advanced leadership ethics and Air Force doctrine. Topics include the military as a profession, officership, military justice, civilian control of the military, preparation for active duty and current issues affecting the military profession. JMU students will take AFROTC classes at the University of Virginia for JMU credit. *Corequisite: AIRS 100.*

AMST 200. Introduction to American Studies [C2HQC]

3.00

This interdisciplinary course will highlight the student's role in interrogating the cultural and political function of representations of America in literature, history, philosophy, religion, popular culture, music and art. Students will gain an understanding of why definitions of American identity matter and learn about the contemporary debates that inform the discipline of American Studies today. Questions about the changing role of national studies in the face of globalization are central. May be used for general education credit.

AMST 302. Immigrants in American Society

3.00

Immigrants today come to America from many countries, but because scholarly research had tended to concentrate on only a few of the largest nationality groups, the full range of immigrant experience has yet to be explored and documented. In this cross-disciplinary course, we will give special attention to two groups, Mexicans and Vietnamese, about whom much has been written, as examples of the varying ways that immigrants come to the U.S. and adapt to living here while maintaining important ties to their homelands and cultures. We will also consider the consequences of immigration for both the first and second generations of immigrants as well as for the communities that receive them, including the Central Shenandoah Valley.

ANTH 195. Cultural Anthropology [C4GE]

3.00 (C, R)

An introduction to the nature of culture and its relationship to language, economics, politics, kinship and other institutions in diverse cultures. The course also provides an overview of the theories, methods and ethical responsibilities involved in the study of cultural systems and ethnographic writing. May be used for general education credit.

ANTH 196. Biological Anthropology [C3NS]

3.00 (B, R)

An introduction to the origins, evolution and genetic variability of humans and their relationship to nonhuman primates. Examination of the fossil record, the relationship between biology and culture and human genetics are included. Theories and methods used in the study of biological anthropology are also introduced. May be used for general education credit.

ANTH 197. Archaeology

3.00 (A,R)

An introduction to the goals, methods and theory of anthropological archaeology. The course examines the variety of techniques archaeologists use to reconstruct the past from material remains. Archaeological ethics and the impact of the past on contemporary society are also considered.

ANTH 201. The Discipline of Anthropology

1.00 (R)

This required course introduces students to the subdisciplines of cultural, biological, linguistic and archaeological anthropology and the logic of their integration within the larger discipline of anthropology. Students will be introduced to current research questions within anthropology and how they are addressed from the perspective of the various subdisciplines. *Prerequisite: Major status or permission of the instructor. It is recommended that students have had at least one of the introductory-level ANTH courses (ANTH 195, ANTH 196 or ANTH 197).*

ANTH 205. Buried Cities, Lost Tribes: The Rise and Fall of Early Human Societies [C2HQC]

3.00 (A)

This course takes an archaeological and comparative perspective on the origins of human institutions, including art, architecture, religion, centralized political formations and urban life. The development and collapse of early societies in multiple world regions, including Mesopotamia, Egypt, the Indus Valley, Mesoamerica and the Andes will be explored. May be used for general education credit.

ANTH 250. Anthropology of the American Southwest

3.00 (A)

This course examines the development of Southwestern societies from early hunter-gatherers to the Native American communities of today. Major issues of anthropological interest, such as the adoption of agriculture, the development of village life, migration and abandonment, the spread of religious "cults," the extent of Mesoamerican influence and the effects of the Spanish conquest are explored.

ANTH 265. Peoples and Cultures of Latin America and the Caribbean

3.00 (C).

Anthropological and historical perspectives on the cultures of Latin America and the Caribbean through such themes as colonialism, nationalism, ethnicity, development, aesthetic traditions, gender, religion and urban and rural resistance movements.

ANTH 280. Peoples and Cultures of Sub-Saharan Africa

3.00 (C)

This is an introductory course emphasizing cultural diversity of sub-Saharan African societies. Basic anthropological concepts are used in analyzing African economics, political systems, marriage patterns and family organization, religious beliefs and the impacts of colonialism and post-colonial development practices.

ANTH 295. People and Cultures of East Asia

3.00 (C)

This introductory course examines the peoples and cultures of the core East Asian countries – China, Japan and Korea. The course is organized around anthropological perspectives on topics such as nationalism, consumption, gender, ethnicity and development but also emphasizes the cultural, social and historical characteristics of various groups in these nations, in addition to important cultural flows within region.

ANTH 300. The Anthropology of Food

3.00 (C)

This course explores anthropological approaches to food production, distribution, preparation and consumption in the contemporary world. Topics include food preferences and taboos, food and the senses, ritual and identity, technological risks, diet and nutrition, cuisine and class and the political economy of food. *Prerequisite: Any lower-level course in anthropology or permission of the instructor.*

ANTH 305. Language and Culture

3.00 (C)

Crosslisted with SCOM 305

An introduction to linguistic anthropology. Explores the complex relationships between language and culture through topics such as language acquisition and socialization; language, thought and worldview; language and identity; multilingualism; how and why languages change; literacy; and the politics of language use and language ideologies.

ANTH 306. Japanese Society and Culture

3.00 (C)

Crosslisted with SOCI 306

This introductory course takes a critical and interdisciplinary approach to exploring Japan. We will apply Sociological, Anthropological, and Demographic perspectives to comparatively understand, analyze, and discuss Japanese society and culture. Students will read and discuss issues related to history, socio-demographic change, gender, work, social class, race/ethnicity, family, health care, and aging in Japanese society.

ANTH 307. Climate, Culture and Change

3.00 (A)

This course explores the implications of climate change for human cultures. The overall perspective will be historical, but the relevance of past experiences to contemporary circumstances will be under constant discussion. A series of case studies drawn

from archaeological and historical records will attest to a range of possible human responses, including examples that involve both naturally- and culturally-induced change. Students will be introduced to the fundamentals of paleoclimatology, such as basic processes that influence climate change, as well as the sources of long-term climate records. Under an anthropological perspective, students will also become acquainted with the range of documented human reactions to climate change and their ramifications. Each case study will be addressed in three parts over the course of two class sessions: lecture/presentation, discussion and supplemental analysis.

ANTH 311. Archaeology of Virginia

3.00 (A)

A comprehensive survey of human experience in the Old (Old!) Dominion. Archaeological discoveries in Virginia, ranging from evidence of Ice Age pioneers to colonial-era plantations, will be the basis for charting wider cultural developments in eastern North America. Through these cases, basic archaeological principles, methods and theories will be reinforced. Activities and assignments will involve manipulation of original archaeological data using basic quantitative analysis. The course will also feature profiles of prominent Virginia archaeologists and sites, as well as an overview of the discipline as it is practiced in the state today. ANTH 197. Archaeology is recommended, though not required.

ANTH 312. The Native Americans

3.00 (A)

A study of the nature of Indian societies occupying different environmental areas of North America at the time of earliest historic contact. Indian groups such as Shawnee, Mandan, Nuunamiut, Natchez, Creek, Iroquois and Sioux will be considered.

ANTH 315. Human Evolution

3.00 (B)

Discusses the emergence of the hominids as a lineage distinct from other apes. Provides evidence for the evolution of bipedalism, tool use, hunting/gathering, major increases in brain size, language and material culture and the hypotheses that have been developed to explain the emergence of these characteristics *Prerequisite: ANTH 196 , or BIO 140 and BIO 150, or permission of the instructor.*

ANTH 316. Human Evolutionary Psychology

3.00 (B)

An exploration of human behavior from an evolutionary perspective. Emphasis is placed on the critical evaluation of adaptive hypotheses purported to explain fundamental human behaviors such as survival and mating strategies, reproduction and parenting, kinship and cooperation, dominance and aggression, cultural evolution and religion. *Prerequisite: ANTH 196 or permission of instructor.*

ANTH 317. Primate Evolutionary Ecology

3.00 (B)

This course explores the interface between an organism and its environment, illustrated with examples from the primates. Behaviors related to feeding, moving, grouping and socializing are considered from an evolutionary perspective. Topics to be discussed include feeding ecology, functional anatomy, the ecology of primate social systems, ranging behaviors, community ecology and the role humans play in shaping primate communities. *Prerequisite: ANTH 196 or permission of instructor.*

ANTH 318. The Evolution of Primate Sexuality and Reproduction

3.00 (B)

A survey of non-human primate sexuality from an evolutionary perspective. Emphasis is placed on the diversity of behavioral, anatomical and physiological aspects of mating and reproduction across the order Primates. Where appropriate, comparisons with human sexuality are made. *Prerequisite: ANTH 196 or permission of instructor.*

ANTH 319. Human Osteology

3.00 (B)

An analysis of the individual bones and teeth that comprise the human skeleton. Emphasis is placed on learning individual bones and teeth as well as the numerous osteological and dental landmarks that characterize them. Applied topics such as bone growth and the analysis of age, sex, stature, pathology and geographic ancestry will also be addressed. *Prerequisite: ANTH 196 or permission of the instructor*

ANTH 323. Anthropology and Photography

3.00 (C)

This course explores the anthropological use of photographic data for the description, analysis, communication and interpretation of human behavior. Topics include phenomenological, cross-cultural and historical understanding of still photography; the social life of photographs; visual cultural production and the consumption of photographs; and still photography after colonialism, globalization, and postmodernity.

ANTH 324. Mindfulness and Anthropology

3.00 (C)

Mindfulness provides ways of attending to the world in its present moment in a nonjudgmental manner. Students study and practice contemporary mindfulness practices, while applying these techniques to the holistic collection, analysis and presentation of ethnographic data. The course considers recent ethnographic practice and theory in the context of mindfulness, including the anthropology of poetic expression, the senses and embodied experience. *Prerequisite: ANTH 195 or permission of the instructor.*

ANTH 325. Aztec, Maya & Their Predecessors

3.00 (A)

Survey of the Olmec, Toltec, Teotihuacan, Maya and Aztec civilizations and the factors leading to their development, persistence and decline.

ANTH 327. Ancient North American Civilizations

3.00 (A)

Studies the emergence of Native American societies prior to historic contact. Emphasizes prehistoric developments in the eastern United States.

ANTH 331. Historical Archaeology

3.00 (A)

Crosslisted with HIST 331

The course introduces students to the purposes, subject matter, methodology and historical background of the discipline of historical archaeology. Building on research issues and methodologies of anthropological archaeology and history, the multidisciplinary aspects of this field are introduced through field trips, projects, guest lectures, readings and classroom presentations.

ANTH 350. Magic, Witchcraft and Religion

3.00 (C)

Anthropological study of religion in society. The influence of religion on the development of social, legal, governmental and economic aspects of culture is emphasized.

ANTH 352. Birth, Death, Sex: Exploring Demography

3.00 (B,C)

Crosslisted with SOCI 352

Fertility (birth) and mortality (death) and their biological and social determinants in cross-cultural and evolutionary/historical frameworks. Exploration of the dynamic between the material constraints on and symbolic significance of, reproduction, sexuality and death within a cultural context. Critical examination of population growth as a global "problem." Basic demographic methods. *Prerequisite: Any lower level course in anthropology or sociology or permission of the instructor.*

ANTH 360. Medical Anthropology

3.00 (C)

This course takes an anthropological approach to the study of health, illness and healing; how do different cultural systems and social institutions influence the experience and interpretation of different bodily states? Material covers critical analyses of Western medicine and ethnomedicine in both specific cultural settings and their global circulation. Topics include disease epidemics, illness narratives, public health, suffering, pharmaceuticals, disability and health care systems. *Prerequisite: ANTH 195 or permission of the instructor.*

ANTH 364. U.S./Latin American Borders

3.00 (C)

This course examines the experiences of Latin American migrants to the United States. It stresses the cultural expression of those experiences, globalization and its effects on local communities in Latin America, the U.S. responses to migration and migrants.

ANTH 366. Anthropology of War

3.00 (A, C)

This course examines the causes, conduct and consequences of warfare in non-state societies using both ethnographic and archaeological data. Case studies drawn from throughout the world are used to examine topics such as the co-evolution of war and society, the impact of colonialism on native warfare, the process of making peace and claims about the biological "inevitability" of war.

ANTH 368. Contemporary American Culture

3.00 (C)

Crosslisted with SOCI 368

This course analyzes contemporary American society in relation to popular cultural formations and representations. Cultural expressions found in music, literature, theatre, film, television, cyberspace and sports will be examined with respect to values, sentiments, identity constructions and lived experiences of differentially situated social actors.

ANTH 370. Topics in the Anthropology of Gender

3.00 (C)

This course examines the many ways in which gender is constructed and negotiated in different historical and social contexts. Topics will vary with the instructor to include both cultural and biocultural perspectives.

ANTH 375. Anthropological Theory

3.00 (C,R,W)

This course introduces the major social theories and debates that inform anthropological analysis. Special emphasis is given to their analytical or explanatory power for understanding human behavior and our cultural and social worlds, the contexts in which they were produced, and their contributions to ongoing debates. Fulfills the College of Arts and Letters writing-intensive requirement for the major. *Prerequisite: ANTH 195 and junior standing.*

ANTH 376. Anthropology of Reproduction

3.00 (C)

This course provides students with a critical and cross-cultural perspective on human reproduction. Examining how individuals draw on social and symbolic resources to sort out complicated private decisions, we will discuss how reproductive experiences are embedded in local, national and transnational politics. Topics covered may include: cross-cultural perspectives on childbearing and childlessness, kinship, and the globalization of new reproductive technologies such as in vitro fertilization.

Prerequisite: ANTH 195 or permission of the instructor.

ANTH 377. Space/Culture/Power

3.00 (C)

An introduction to social-scientific approaches to space. We will think critically about how people across cultures shape—and are shaped by—the spaces we occupy. Drawing on examples from around the world we examine the intersections of space, culture and power through such topics as segregation, maps, architecture, prisons, schools, migration politics and more. The course encourages students to think of space—and its intersections with culture and power—in new and sophisticated ways.

Prerequisite: ANTH 195.

ANTH 388. Prisons, Punishment and the State

3.00

Crosslisted with SOCI 388

The course investigates the nature of punishment and the particular forms of punishment meted out by the state. Questions include: What is the purpose of punishment? Why does the state choose incarceration as its standard punishment? What forms of punishment exist in other cultures? We focus on the contexts in which prisons emerged in the US and what they say about our society. Discussions center on power, race, class, gender, age and the political economics of the criminal justice system.

Prerequisite: ANTH 195 or permission of the instructor.

ANTH 389. Ethnographic Experience in Dominica

3.00 (C)

This course is an anthropological case study of Dominica, an independent postcolonial island nation in the Eastern Caribbean. The course entails extensive background study of the island's history, culture and languages, combined with hands-on ethnographic, service-learning and cross-cultural experiences during an Alternative Spring Break in Dominica.

Prerequisite: Permission of the instructor.

ANTH 390. Topics in Cultural Studies

3.00 (C)

Crosslisted with SOCI 390

This course explores contemporary culture through a "cultural studies" lens, an interdisciplinary perspective interested in using empirical knowledge to encourage more just human relations. Specific topics of investigation will vary by semester, but each course will cover cultural studies' intellectual history and its application to cultural expressions found in everyday life, film, music and text.

ANTH 391. Study Abroad

1.00 - 6.00 (May be A, B, C, F)

Designed to encourage students to enhance their academic programs through studying abroad. Arrangements must be made with a faculty member who will direct the study with preparatory instructions and final requirements. May be repeated up to 12 credits.

ANTH 395. Special Topics in Anthropology

3.00 (May be A, B, or C)

Examination of selected topics which are of current importance to anthropology. May be repeated for credit when course content changes.

ANTH 405. Topics in Linguistic Anthropology

3.00 (C)

Examines current issues in the anthropology of language. Topics vary by semester, but each course will include hands-on analysis of social interaction and/or investigation of contemporary case studies of language policy, ideologies and use.

ANTH 410. Spatial Analysis for Anthropologists

4.00 (A, B or C)

The course teaches students how to identify and solve anthropological problems with spatial dimensions. Hands-on experience is stressed in the acquisition, analysis and display of spatial data using Geographic Information Systems software. Topics include the mapping of race and ethnicity, the spatial distribution of cultural variables and human modification and use of the landscape. *Prerequisite: ANTH 195, ANTH 196 or ANTH 197.*

ANTH 411. Topics in Ethnographic Film

3.00 (C)

An examination of current issues in the study of ethnographic film. The course studies the changing role, practice and methods of film in anthropological research and scholarship. Topics include methods and genres of ethnographic film composition; the scientific status of filmed data; cross-cultural visual literacies; narrative form as social scientific inquiry; film and sensory data; sound, subtitles and translations; "indigenous media;" and audience reception *Prerequisite: ANTH 195 or permission of the instructor.*

ANTH 415. Anthropological Genetics

3.00 (B)

Surveys the theory and methods of evolutionary genetics as applied to human evolution and human diversity. Emphasizes human evolution as illuminated by genetics, as well as the intersection of human genetics with social issues such as racism, bioethics and eugenics. *Prerequisite: ANTH 196.*

ANTH 430. Primate Conservation Biology

3.00 (B)

A discussion-based course that examines the impact of human activities on biodiversity, with an emphasis on the primates. Concepts and theories in conservation biology will be explored and applied to understanding the threats to wild primates and evaluating conservation strategies. Cultural and political perspectives and philosophical and ethical arguments for conserving biodiversity will also be considered. *Prerequisite: ANTH 196 or BIO 250 or permission of the instructor.*

ANTH 435. Ethnographic Genres and Methods

4.00 (C,F)

Explores ethnographic methods and conventions of ethnographic writing through close reading, analysis and production of ethnographic texts. Students develop critical skills in assessing ethnographic practice by examining how ethnographies are shaped by authors' fieldwork experiences, intellectual traditions and theoretical perspectives. Students engage in fieldwork and craft their own ethnographic accounts. *Prerequisite: ANTH 375.*

ANTH 436. Afro-Latin America

3.00 (C)

*Crosslisted with HIST 436***

Latin America and the Caribbean were the first and largest parts of the Western Hemisphere to be populated by Africans. Afro-Latin America examines cultural formations Africans brought to these regions. Beginning with an overview of the slave trade, it examines the histories of Africans and African-descent people throughout Latin America, as well as contemporary Afro-Latin American culture(s). *Prerequisite: One course in either Latin American or Africana studies (any discipline); upper-division status or permission of the instructor.*

ANTH 445. Methods and Research Perspectives in Biological Anthropology (B)

4.00

This course explores current research topics and methods in biological anthropology. Students will learn to write scientifically and critically evaluate the peer-reviewed literature and will receive training in data collection, analysis, interpretation and presentation. *Prerequisite: ANTH 196 and ANTH 375 (prerequisite or corequisite), or permission of instructor. Corequisite: ANTH 375.*

ANTH 455. Archaeology: Methods of Analysis and Interpretation

4.00 (A,F)

A review of the nature of inquiry, recent theory and the means by which archaeologists acquire, analyze and interpret their data. In addition to practical training in methods of analysis used in contemporary practice, students will gain experience in designing, conducting and reporting archaeological research. *Prerequisite: ANTH 195, ANTH 197 and one upper-level archaeology elective.*

ANTH 485. Anthropology Course Assistantship

1.00 - 3.00

Students participate as course assistants in anthropology. Assistantships provide students with a sense of what it is like to teach an anthropology course by allowing them to work closely with faculty members through different phases of course preparation, presentation and evaluation. Assistantships also allow for a deeper understanding of course material by providing opportunities for student assistants to lead discussion and to help their peers review the material outside of the classroom.

Prerequisite: Students must have junior /senior standing, must have earned a grade of "B" or better in the course for which

he/she will serve as assistant and may register by faculty invitation only. May be repeated up to six credits; only three credits can count toward the major. A student may only serve as a course assistant to the same course twice.

ANTH 486. Internship in Anthropology

1.00 - 6.00 (May be A,B or C)

Designed to encourage students to enhance their academic programs by employing and refining anthropological skills through internships in public or private agencies. Arrangements must be made with a faculty member who will oversee the internship. *Prerequisite: By permission only. May be repeated up to six credits.*

ANTH 490. Special Studies in Anthropology

1.00 - 3.00 (May be A, B or C)

Course offers students an opportunity to do independent study under staff supervision. *Prerequisite: Admission only by recommendation of the instructor. More than one repeat requires department head approval.*

ANTH 490A. Special Studies

3.00

ANTH 490B. Special Studies

2.00

ANTH 490C. Special Studies

3.00

ANTH 492. Material Culture

3.00 (A)

Crosslisted with ARTH 492, HIST 492

A broad introduction to the multidisciplinary "field" of material culture studies through readings, written assignments, in-class exercises and field trips. The course introduces ways of looking at and learning from objects and examines how scholars from several disciplines have used material culture in their work. *Prerequisite: HIST 395. Instructor's permission required to waive HIST 395 as prerequisite for non-history majors.*

ANTH 494. Field Techniques in Archaeology

4.00 - 8.00 (A,F)

Laboratory course directed at teaching students the basic field techniques and procedures of historic and prehistoric archaeology. Classroom lectures will present techniques and relevant aspects of method and theory.

ANTH 494A. Field Tech in Archeology

4.00 - 8.00

ANTH 496. Research Thesis

3.00 (A)

Crosslisted with HIST 496

Students will gather, analyze and interpret archaeological/historical data over two semesters. Students will work on a project that demonstrates theory, research design, data gathering and analysis, culminating in a written thesis. The course meets the capstone requirement for the historical archaeology minor but is also available to students in history and anthropology. *Prerequisite: Junior or senior standing.*

ANTH 499. Honors Thesis

6.00 (May be A, B, or C). Three Semesters

An independent research topic initiated and completed by qualified senior majors who want to graduate with distinction.

ANTH 499A. Honors

1.00

ANTH 499B. Honors

3.00

ANTH 499C. Honors

2.00

ARAB 101. Elementary Arabic I

4.00

The fundamentals of modern standard Arabic through listening, speaking, reading and writing. Practice in pronunciation and development of comprehension. One hour's work a week in the language laboratory. If a student has had two or more years of the language in high school, he/she will not receive credit for the course.

ARAB 102. Elementary Arabic II

4.00

The fundamentals of modern standard Arabic through listening, speaking, reading and writing. Practice in pronunciation and development of comprehension. One hour's work a week in the language laboratory. If student has had two or more years of the language in high school he/she will not receive credit for the course. *Prerequisite: ARAB 101.*

ARAB 109. Accelerated Review of Elementary Arabic

3.00

Reviews elementary Arabic grammar, reading, writing, speaking and listening skills in Arabic. One hour of work a week in the language laboratory. For students who have had no more than two or three years of Arabic in high school and qualify through the placement exam. Native speakers are excluded. *Prerequisite: Permission of the department head or sufficient score on the foreign language placement exam.*

ARAB 111. Intensive Arabic I

6.00

The fundamentals of Arabic through intensive listening, speaking, reading and writing. This four-week course is the equivalent of ARAB 101 -ARAB 102.

ARAB 212. Intensive Arabic II

6.00

A thorough review of grammar, vocabulary building, conversation, composition and reading at the intermediate level. This four-week course is the equivalent of ARAB 231-ARAB 232. *Prerequisite: ARAB 102, ARAB 109 or ARAB 111, or permission of the instructor.*

ARAB 231. Intermediate Arabic I

3.00

A thorough review of first-year grammar and vocabulary building. Conversation, composition and reading will be chosen to reach competency at the lower intermediate level Arabic. *Prerequisite: ARAB 102, ARAB 109 or ARAB 111, or permission of the instructor.*

ARAB 232. Intermediate Arabic II

3.00

A thorough review of grammar and vocabulary building, conversation, composition and reading. *Prerequisite: ARAB 231 or permission of the instructor.*

ARAB 300. Arabic Grammar and Communication

3.00

Intensive training in grammatical structures and their application to oral and written communication. Instruction is in Arabic. Fulfills the College of Arts and Letters writing-intensive requirement for the major. *Prerequisite: ARAB 212 or ARAB 232 or permission of the instructor.*

ARAB 307. A History of Islamic Civilization 600-1600 A.D.

3.00

A study of society, economics, politics, culture and the arts of the Islamic world from the rise of Islam to the establishment of the gunpowder empires (Ottoman, Safavid, and Mughal). Instruction is in English.

ARAB 308. Contemporary Islamic Civilization

3.00

A study of society, economics, politics, culture and the arts of the Islamic world, with a focus on the Arabic-speaking regions, from 1700 A.D. to the present. Instruction is in English.

ARAB 320. Arabic Oral and Written Communication

3.00

Intensive training in the use of modern, everyday Arabic with emphasis on conversation and composition. Readings in Arabic will provide a context for discussion and writing. *Prerequisite: ARAB 300 or permission of the instructor.*

ARAB 330. Business Arabic

3.00

A study of commercial and trade vocabulary and customs in conjunction with practice in commercial communication, including letter writing, interviews and interpretations. Instruction is in Arabic. *Prerequisite: ARAB 300 or permission of the instructor.*

ARAB 339. Literatures of the Islamic World 600-1500 A.D.

3.00

A thorough analysis of selected passages from important authors from early Arabic and Persian literature up to the beginning of the 16th century AD. The material studied will include Arabic poetry and prose from the period just before the rise of Islam to about 1500, and Persian poetry and prose from the spread of the use of New Persian in the 10th century to about 1500. *Prerequisite: ARAB 300 or permission of the instructor.*

ARAB 340. Intermediate Arabic Conversation

3.00

Course emphasizes oral communication at the intermediate level. Students will use the vocabulary they have learned in the previous Arabic language classes. In addition, students will acquire new vocabulary from in- and out- of class conversational situations. *Prerequisite: ARAB 212 or ARAB 232 or permission of the instructor.*

ARAB 371. Advanced Arabic Grammar and Translation

3.00

Arabic/English translation applied in several fields. In this course students analyze the main grammatical differences between Arabic and English with the focus on producing accurate and idiomatic translations into both languages. *Prerequisite: ARAB 300 or permission of the instructor.*

ARAB 385. The Arabian Nights

3.00

This course introduces the collection of popular tales known as "The Arabian Nights" or "The Thousand and One Nights." Readings also include medieval and modern European short stories that are adapted from the "Nights", or which appropriate themes and techniques from the "Nights." Instruction is in English. *Prerequisite: ARAB 300 or permission of the instructor.*

ARAB 386. Arabic Fables and Short Stories

3.00

This course provides an overview of short Arabic literary texts, ranging from the animal fables translated by Ibn al-Muqaffa' in the 8th century to Arabic short stories from the 20th century. Students will read a number of stories in English as well as a selection of texts in classical and modern standard Arabic by some of the most prominent Arabic-writing authors of the last thirteen centuries. Advanced topics in grammar will be addressed as the need arises. *Prerequisite: ARAB 300 or the permission of the instructor.*

ARAB 400. Advanced Arabic Writing and Conversation

3.00

Discussions and writings deal with topics of current interest. *Prerequisite: ARAB 300 or permission of the instructor.*

ARAB 405. The Arabic Novel

3.00

This course provides an introduction to novels written in the Arabic language. The goal is to study the development of the modern Arabic novel from the nineteenth century to the present through a selection of ten texts written by authors originating from a number of different Arabic countries. The texts will be placed within the social and political contexts in which they were written. Additionally, social, religious and historical aspects of modern Arab culture will be explored through the texts. The students will gain some familiarity with the major literary trends, themes and genres of this time period. Readings are in English and Arabic. *Prerequisite:* ARAB 300 or permission of the instructor.

ARAB 410. Media Arabic

3.00

An introduction to the vocabulary and language of Arabic press media and to the history of mass media in the Arabic speaking world. The focus is on print and Internet media, although media broadcasting in other forms is also covered. *Prerequisite:* ARAB 300 or permission of the instructor.

ARAB 411. Colloquial Egyptian Arabic I

3.00

This course provides an introduction to Egyptian Colloquial Arabic (ECA), the most widely spoken and understood Arabic dialect. Students will learn the phonological, morphological, syntactic, and semantic particularities of ECA, and the major differences between Modern Standard Arabic and ECA, while developing their listening and speaking skills necessary for personal everyday life. *Prerequisite:* ARAB 300 or permission of the instructor.

ARAB 412. Colloquial Egyptian Arabic II

3.00

This course is a continuation of Colloquial Egyptian Arabic I. It is the second part of an intensive introduction to Egyptian Colloquial Arabic (ECA). Students will build on previously learned material through scenarios of everyday life. *Prerequisite:* ARAB 300 or permission of the instructor.

ARAB 413. Colloquial Levantine Arabic I (Jordanian/Palestinian)

3.00

This course provides an introduction to Jordanian and Palestinian Colloquial Arabic (JCA and PCA), the Arabic dialects spoken in Jordan and Palestine/Israel. Students will learn the phonological, morphological, syntactic and semantic particularities of JCA and PCA, and the major differences between them and Modern Standard Arabic, while developing their listening and speaking skills necessary for personal everyday life. *Prerequisite:* ARAB 300 or permission of the instructor.

ARAB 414. Colloquial Levantine Arabic II (Syrian/Lebanese)

3.00

This course provides an introduction to Syrian and Lebanese Colloquial Arabic (SCA and LCA), the Arabic dialects spoken in Syria and Lebanon. Students will learn the phonological, morphological, syntactic and semantic particularities of SCA and LCA, and the major differences between them and Modern Standard Arabic, while developing their listening and speaking skills necessary for personal everyday life. *Prerequisite:* ARAB 300 or permission of the instructor.

ARAB 428. Muhammad and the Qur`An

3.00

A study of the life of the Prophet Muhammad and the contents of his message as found in the "Sira" (his biography), the Qur`an,

and the "hadith" (reports concerning his sayings and actions). Instruction is in English. *Prerequisite: ARAB 300 or permission of the instructor.*

ARAB 429. Intro To Qur`anic Arabic

3.00

An introduction to the Arabic vocabulary and grammar of the Qur`an and hadith literature. The course provides an intensive overview of Arabic grammar, from basic to advanced topics. Students will gain the ability to read excerpts from the Qur`an and other Islamic religious texts in Arabic. *Prerequisite: ARAB 300 or permission of the instructor.*

ARAB 446. Special Topics in Arabic Literature

3.00

Study of a particular topic in Arabic Literature. May cover all or specific Arabic literature genre. May be repeated if content changes. *Prerequisite: ARAB 300 or permission of the instructor.*

ARAB 447. Special Topics in Arabic Civilization and Culture

3.00

Students will study a particular topic in the civilization and /or culture of Arabic countries. Course may be repeated if content changes. *Prerequisite: ARAB 300 or Permission of the Instructor*

ARAB 448. Special Topics in Arabic Linguistics

3.00

Students will study a particular topic in Arabic linguistics. Topics could include an introduction to Arabic sociolinguistics and psycholinguistics. Course may be repeated if content changes. *Prerequisite: ARAB 300 or Permission of the Instructor*

ARAB 490. Special Studies in Arabic

1.00 - 4.00

Special topics or independent studies in Arabic. *Prerequisite: Permission of the instructor.*

ARCD 200. Architect Design Studio I

6.00

This studio focuses on the design process through the creation of objects and architectural spaces. Projects involve investigations into syntax and design language, program interpretation, materiality, ritual, use and the constructed order of built space. Emphasis is placed on experimentation, risk and play. Design projects will incorporate constructed drawings, sketching, diagramming, model-building and writing. *Prerequisite: All 200-level ARCD courses are restricted to declared art, art history, graphic design, architectural design and industrial design majors during the fall and spring semesters.*

ARCD 202. Architect Design Studio II

6.00

Design studio building on the fundamentals of ARCD 200. Projects will address both three-dimensional design of spaces and the objects within the spaces. Projects will include questions of ritual, ergonomics, material properties, mechanism and prototypes. Introduction of workshop, digital graphics and photography incorporated in studio work, with an emphasis on fabrication and constructed full-scale objects. *Prerequisite: ARCD 200.*

ARCD 208. Portfolio Review

0.00

Portfolio review required to enroll in architectural design courses at 300 level and above. *Prerequisite: ARCD 200. Corequisite: ARCD 202.*

ARCD 220. CAD I: 3D Modeling

3.00

Crosslisted with INDU 220

This course will introduce students to principles used in 3D Cad and BIM modeling. Technologies to draw three dimensionally on the computer will be considered as a discipline within itself, and students will be instructed to use the machine for design exploration. Various software packages will be utilized during the semester.

ARCD 292. Topics in Architectural Design

1.00-3.00

Study of selected topics in architectural design at the introductory level. May be repeated when course content changes. See MyMadison for current topics.

ARCD 300. Architect Design Studio III

6.00

Intermediate design studio building upon skills of ARCD 200-202 sequence. Projects will be of greater complexity, scope and technical requirement. Design studies will incorporate drawing, diagramming, models, digital studies and writing. Legal, industry and engineering requirements will be integrated into the learned poetics of design. *Prerequisite: ARCD 208 .*

ARCD 302. Architect Design Studio IV

6.00

Intermediate design studio building upon skills of ARCD 300. Projects will be an extension of ARCD 300 but with greater complexity, scope and technical requirements. Design studies will incorporate drawing, diagramming, models, digital studies and writing. Legal, industry and engineering requirements will be integrated into the learned poetics of design. *Prerequisite: ARCD 300.*

ARCD 330. Materials and Methods I

3.00

A lecture course introducing components and materials used in construction and building systems. *Prerequisite: ARCD 208*

ARCD 390. Independent Studies in Architectural Design

1.00 - 3.00

Independent activity at the intermediate level, such as research or studio practice, under faculty supervision. Projected studies in any area of the school's offering must be arranged with the instructors who will direct them. Offered only with the consent of the instructor.

ARCD 392. Topics in Architectural Design

3.00

Study of selected topics in architectural design at the intermediate level. May be repeated when course content changes. See MyMadison for current topics. *Prerequisite: ARCD 208*.

ARCD 400. Architect Design Studio V

6.00

An upper-level design studio building upon the design rigor and technical craft acquired in the ARCD 300-302 sequence. Expansion of the design role into collaborative teams, interdisciplinary teams, actual clients, service projects and competition projects. *Prerequisite: ARCD 302*.

ARCD 402. Architect Design Studio VI

6.00

Final upper-level architectural design studio culminating in a thesis project. Complete student initiative across every phase of the project. *Prerequisite: ARCD 400*.

ARCD 440. Professional Design Practices

3.00

Procedures and practices in the architectural design profession. *Prerequisite: ARCD 302 or permission of the instructor*.

ARCD 470. Contemporary Design

3.00

Seminar format class which explores influential ideas in contemporary design, including critical regionalism, postmodernism, minimalism, the neo-avantgarde, green design, Marxism and post-structuralism. *Prerequisite: ARCD 208 and ARTH 206*.

ARCD 490. Independent Studies in Architectural Design

1.00 - 3.00, repeatable

Independent activity, such as research or studio practice, under faculty supervision. Projected studies in any area of the school's offering must be arranged with the instructors who will direct them. Offered only with consent of the instructor.

ARCD 491. Studio Assistant

1.00 - 3.00, repeatable

Crosslisted with ARED 491, ART 491, GRPH 491, INDU 491

An on-campus program monitored on an individual basis designed to provide practical studio experience in the visual arts. Students will learn safe studio practices and management skills, including material use, inventory control and the proper operation of equipment found within various individual classroom studios. *Prerequisite: Permission of the instructor*.

ARCD 492. Topics in Architectural Design

3.00

Study of selected topics in architectural design at the advanced level. May be repeated when course content changes. See MyMadison for current topics. *Prerequisite: ARCD 208*.

ARCD 496. Internship

0.00

An off-campus program prepared and monitored on an individual basis. Internships are designed to provide practical experience in professional design settings. *Prerequisite: Permission of the instructor.*

ART 102. Two-Dimensional Design (0,6)

3.00

Application and appreciation of the principles and elements of design, with emphasis on line, form, color and texture as applied to two-dimensional space.

ART 104. Drawing I (0,6)

3.00

An introductory course composed of problems in landscape, perspective, figure and still-life in several media.

ART 106. Three-Dimensional Design (0,6)

3.00

A course exploring the basic problems in three-dimensional design.

ART 108. Drawing II (0,6)

3.00

A continuation of ART 104 involving more complex problems with emphasis on composition and expressive possibilities of a variety of media including ink, pencil, conte, charcoal and experimental materials. *Prerequisite: ART 104.*

ART 200. Art in General Culture [C2VPA]

3.00

An exploratory course that aims to develop a non-technical, general cultural understanding of the space arts, such as architecture, painting, sculpture and industrial design. Emphasis is on the contemporary. May be used for general education credit.

ART 205. Professional Practices in Art

3.00

A required course for studio art majors focused on the exploration and exchange of ideas related to embarking on a studio career. Contemporary issues and responsibilities faced by emerging artists are emphasized. Students will investigate various visual art disciplines offered by JMU, write an artist's statement, and construct a website and digital portfolio. *Corequisite: ART 102 and ART 104.*

ART 220. Introductory Ceramics: Potter's Wheel (0,9)

3.00

Explores the aesthetics, conceptualization and design of functional objects. Investigates tactility and the process of realizing form and the effective use of the wheel as a creative tool. Introduces historic and contemporary approaches, firing techniques and glaze application. *Prerequisite: ART 102, ART 104 and ART 106.*

ART 222. Introductory Ceramics: Handbuilding (0,9)

3.00

Forming techniques will be explored for both vessel and sculptural work. Addresses construction concerns such as timing, structure and mass. Conceptual issues of hand-formation and ceramic sculpture discussed. Introduces historic and contemporary approaches, firing techniques and glaze application. *Prerequisite: ART 102, ART 104 and ART 106*

ART 230. Introduction to Fiber Processes (0,9)

3.00

Introduction to and practice in basic weaving and other fiber arts. Emphasis will be placed on floor loom weaving and surface design on the fabric. *Prerequisite: ART 102 and ART 104*

ART 232. Introduction to Fiber Arts: Structures

3.00

In this introductory level studio course, students develop skills and cultivate conceptual concerns related to the fibers medium related to structural forms. Traditional and experimental materials will be used to explore such techniques as knitting, crochet, looping, felting, offloom weaving and embroidery. Topics will include the historical relevance of fibers; its relationship to ideas such as labor and identity; and what textiles have to offer within the expanded field of contemporary art. *Prerequisite: ART 102 and ART 104*

ART 234. Introduction to Fiber Arts: Surfaces

3.00

In this introductory level studio course, students develop skills and cultivate conceptual concerns related to the fibers medium related to surface design. Traditional and experimental materials will be used to explore such techniques as quilting, dyeing, piecing, shibori, dye printing and embroidery. Topics will include the historical relevance of fibers; its relationship to ideas such as labor and identity; and what textiles have to offer within the expanded field of contemporary art. *Prerequisite: ART 102 and ART 104*

ART 240. Metal & Jewelry (0,9)

3.00

An introduction to designing and executing jewelry and related objects through various fabrication and finishing techniques, and the exploration of metal as a medium of personal aesthetic expression. *Prerequisite: ART 102 and ART 104*

ART 242. Bladesmithing: Exploring Form and Function

3.00

Students will explore the complex interplay of form and function through the techniques, materials and concepts of knifemaking.

ART 252. Introductory Painting (0,9)

3.00

Introduction to basic materials and techniques in oil or acrylic painting. This class extends previous practice with design and drawing through introductory experiences in painting. *Prerequisite: ART 102 and ART 104 .*

ART 260. Introductory Photography: Black and White (0,9)

3.00

A creative approach to photography with emphasis on understanding materials and techniques. (Students must provide a fully manual 35mm camera and a light meter which may be built into the camera or separate.) *Prerequisite: ART 102 and ART 104.*

ART 270. Printmaking: Screenprint (0,9)

3.00

An introduction to the history and techniques of screenprinting. Lectures, demonstrations and projects will involve photographic and nonphotographic stencils, related digital processes and color registration. *Prerequisite: ART 102 and ART 104.*

ART 272. Printmaking: Relief and Intaglio

3.00

An introduction to the history and techniques of relief and intaglio printing. Lectures, demonstrations and projects will involve oil based and water soluble inks, linocut, woodcut, wood engraving, collagraph, drypoint, engraving, line etching, aquatint, softground, color registration and related photographic processes. Formerly ART 354. *Prerequisite: ART 102 and ART 104.*

ART 274. Printmaking: Lithography (0,9)

3.00

An introduction to the history and techniques of lithography printing. Lectures, demonstrations and projects will involve stone and plate lithography, color registration and related photographic processes. *Prerequisite: ART 102 and ART 104*

ART 276. Introductory Book Arts: Materials and Structures

3.00

This course offers students an opportunity to engage in the techniques, structures, tools, and materials used in creating artists' books. A broad range of studio practice will be explored as they examine the relationship of verbal, visual and structural content in books. Students will complete group and individual projects. *Prerequisite: ART 102 and ART 104*

ART 280. Sculpture (0,9)

3.00

Problems in three-dimensional form using traditional and modern techniques. Processes of modeling in clay, mold making, casting, carving in wood and stone and welded metal sculpture are explored. *Prerequisite: ART 106.*

ART 292. Topics in Art

1.00-3.00

Study of selected topics in art at the introductory level. May be repeated when course content changes. See MyMadison for current topics.

ART 300. Illustration (0, 9)

3.00

Crosslisted with GRPH 300

Through demonstrations, theory and practical application, students are introduced to numerous media and illustrative techniques. Encouraged experimentation is tempered by an understanding of problem solving and conceptualization. *Prerequisite: ART 108.*

ART 304. Methods of Art Criticism

3.00

The practical analysis and interpretation of works of art through oral and written forms. Emphasis is on the practice of art criticism in public settings such as the school classroom, art museum and college art studio.

ART 305. Seminar in Aesthetics

3.00

Crosslisted with PHIL 305

Readings and discussions in the persistent philosophical problems of the arts centering on consideration of the work of art, the artist and the audience. *Prerequisite: ART 200 , ARTH 205 , ARTH 206 or PHIL 101.*

ART 320. Intermediate Ceramics: Molds & Casting (0,9)

3.00

Mold-making systems and processes for ceramic slip casting and press molding. Conceptual issues of multiples, reproductions and material transformation discussed. Also suitable for students wanting to utilize molds with other materials in their artistic production. *Prerequisite: ART 220 or ART 222.*

ART 322. Intermediate Ceramics: Surface Development (0,9)

3.00

Research and experimentation with ceramic materials and finishes, glaze formulation, and application for finishing ceramic artwork. Forming processes may include any combination of the potter's wheel, handbuilding and mold making. *Prerequisite: ART 220 or ART 222 or by permission.*

ART 330. Intermediate Fiber Processes (0, 9). 3 credits, repeatable

3.00

Introduction to surface design techniques such as painting and printing on fabric. Further work may be in this area or in weaving or other fiber techniques. *Prerequisite: ART 230, ART 232 or ART 234 or permission of the instructor.*

ART 336. Pulp

3.00

Students will use raw, natural and recycled materials to explore the basic techniques, processes and concepts used in papermaking. Pulp materials and fabrication processes will be explored through techniques using traditional mold and deckle, sculptural mold making, and pulp inclusions. Students will gain skills in beating a variety of fibers, sheet forming, sculpting with pulp and pulp painting. *Prerequisite: ART 276*

ART 340. Intermediate Metal & Jewelry (0,9)

3.00

An intermediate course offering further exploration of metal as a medium of personal aesthetic expression as well as more advanced technical experience and experimentation. *Prerequisite: ART 240.*

ART 350. Figure Drawing (0,9)

3.00

An introductory course with problems stressing the fundamental skills, approaches and concepts involved in drawing the human figure. *Prerequisite: ART 104 and ART 108.*

ART 352. Intermediate Painting

3.00

Intermediate experiences in materials and techniques in oil, acrylic and nontraditional painting media. This class extends previous experiences introduced in ART 252, with a focus on developing a more personal iconography and content. A variety of materials, techniques, surfaces and philosophies of working are discussed in lecture, demonstration, and in both individual and group critique. *Prerequisite: ART 252.*

ART 354. Watercolor (0,9)

3.00

Study of and practice in transparent and opaque watercolor techniques. *Prerequisite: ART 102 and ART 104.*

ART 360. Intermediate Photography: Digital (0,9)

3.00

An intensive exploration of digital photography with an introduction to digital camera techniques, combinations of traditional and digital photographic methods, image manipulation and modes of output. *Prerequisite: ART 260.*

ART 362. Intermediate Photography: Experimental Black & White (0,9)

3.00

Intensive exploration of advanced black and white photography using alternative cameras, pinhole, a variety of film speeds and papers and sequential concepts. *Prerequisite: ART 260.*

ART 364. Intermediate Photography: Large Format (0,9)

3.00

An exploration of medium format and view camera techniques, film exposure and advanced black and white printing. *Prerequisite: ART 260.*

ART 375. Letterpress

3.00

Crosslisted with GRPH 375

This studio course offers students an opportunity to engage in the process and product of letterpress printing through various techniques and conceptual approaches. Instruction focuses on text and image relationships by integrating metal and wood type, and other type-high surfaces. Emphasis will be placed on the acquisition of skills and vocabulary and the creative use of type and image. The course will address the history of letterpress and its contribution to contemporary art and design. *Prerequisite: ART 102 and ART 104 ; For GRPH credit: GRPH 208.*

ART 376. Intermediate Book Arts: Concept, Content, Form

3.00

Crosslisted with GRPH 376

This course challenges the student to develop a limited edition hand-made artists' book. The appropriate format for each individual's concepts are identified, adapted, customized, applied, and produced. Content development, book design, integration of various media and the functionality of various bookmaking materials are explored. We will consider the artists' book as a sculptural form and locate it within the broader context of contemporary writing and visual art. *Prerequisite: ART 276. For GRPH: ART 276 and GRPH 208.*

ART 380. Intermediate Sculpture (0,9)

3.00

A study in casting techniques for sculpture using the lost wax process. Foundry operations, cold cast methods, ceramic shell and fiberglass are also explored. *Prerequisite: ART 280.*

ART 390. Independent Study in Art

1.00 - 3.00

Independent activity at the intermediate level, such as research or studio practice, under faculty supervision. Projected studies in any area of the school's offering must be arranged with the instructors who will direct them. Offered only with the consent of the instructor.

ART 392. Topics in Art

3.00

Study of selected topics in art at the intermediate level. May be repeated when course content changes. See MyMadison for current topics.

ART 420. Advanced Ceramics: Portfolio Development (0,9)

1.00 - 3.00, repeatable

Self-directed, focused course of study with supervision of the instructor. This course is the culmination of ceramic study, resulting in a body of work suitable for exhibition and that is representative of the student's research and development.

Prerequisite: ART 320 and ART 322 or permission of the instructor.

ART 430. Advanced Fiber Processes

1.00 - 3.00, repeatable

A series of fiber projects selected by the student with the approval of the instructor. *Prerequisite: ART 330*

ART 432. Digital Processes in Fibers

3.00

In this upperdivision course, students develop skills and conceptual concerns pertaining to screenprinting. Additionally, this class surveys a range of digital technologies specifically applicable to fibers. Students will leave this course with the knowledge of several software interfaces, practical experience planning for image generation and a portfolio of advanced fibers work.

Prerequisite: ART 230, ART 232 or ART 234

ART 434. Collaboration in Fiber Arts

3.00

The course will examine social practice in fiber arts including art and activism, network art, Social Aesthetics, poststudio

practices and Relational Aesthetics. This course will place a strong emphasis on contemporary examples of art and social practice. Through group activities, discussions, student led seminars and participatory projects, the class will work together to address contemporary issues in collaboration. *Prerequisite: ART 230, ART 232 or ART 234.*

ART 436. Woven Structures in Fiber Arts

3.00

Traditional and experimental use of materials, techniques and structures are used to understand weaving as a cross-disciplinary practice including exploration of floor-loom hand weaving. Students will explore various forms of encoding information and address personal strategies for developing individual art practices. Weaving's role within the larger contemporary art world will be discussed and understandings of what constitutes a woven structure will be challenged. *Prerequisite: ART 230, ART 232 or ART 234.*

ART 438. Iterative Structures in Fiber Arts

3.00

This course engages students in spatiality, object creation and physical construction and will supplement artistic practice and design methodologies for sculptural fiber art or experimental design. Strategies for engaging in off loom fiber art structures such as knitting, macrame, crochet and basketry techniques will be explored. Class activities will include demonstrations, lectures, critiques and discussions revolving around iterative design strategies in fiber art. *Prerequisite: ART 230, ART 232 or ART 234.*

ART 440. Advanced Metal and Jewelry (0,9)

1.00 - 3.00, repeatable

A series of metal arts projects selected by the student with the approval of the instructor. *Prerequisite: ART 340*

ART 450. Advanced Figure Drawing

1.00 - 3.00, repeatable

An advanced drawing course stressing inventive and in-depth approaches to portraying the human figure. *Prerequisite: ART 350*

ART 452. Advanced Painting (0,9)

1.00 - 3.00, repeatable

Advanced problems in media selected by the student with the advice of the instructor. *Prerequisite: ART 352.*

ART 454. Advanced Watercolor (0,9)

1.00 - 3.00, repeatable

Advanced problems in the use of watercolor and related water-based media. *Prerequisite: ART 354.*

ART 460. Advanced Photography: Alternative Processes (0,9)

1.00 - 3.00

Crosslisted with ART 560

Advanced study in photography focusing on alternative processes and experimental approaches including non-silver 19th century techniques, Polaroid and liquid emulsion among others. *Prerequisite: ART 360, ART 362 or ART 364.*

ART 462. Advanced Photography: the Prehistory of Photography, Magic and Illusion

1.00 - 3.00

Crosslisted with ART 562

An exploration of the culture and trends leading to the invention of photography, facilitating the formation of concepts and objects which create wonder. *Prerequisite: ART 360, ART 362 or ART 364.*

ART 464. Advanced Photography: The Photograph as Document

3.00

Crosslisted with ART 564

An exploration of technical, conceptual and theoretical approaches to making documentary-based photographic work using film, digital or video cameras. *Prerequisite: ART 360, ART 362 or ART 364.*

ART 466. Advanced Photography: Performance for the Lens

3.00

An exploration of technical, conceptual and theoretical approaches to making, staging and directing performance-based photographic work using film, digital or video cameras. *Prerequisite: ART 360, ART 362 OR ART 364.*

ART 468. Advanced Photography: Screen-Based Photo/Video

3.00

An exploration of technical, conceptual and theoretical approaches to making screen-based photographic projects culminating in a fully developed online presentation. *Prerequisite: ART 362.*

ART 469. Photography: Portfolio Development (0,9)

1.00 - 3.00, repeatable

An intensive exploration in photography focusing on a theme or process that results in a cohesive body of work from a self-directed project and a written artist's statement. *Prerequisite: ART 360, ART 362 or ART 364.*

ART 470. Advanced Printmaking (0,9)

1.00 - 3.00, repeatable

Advanced projects in printmaking to be determined by the student and instructor. *Prerequisite: ART 270, ART 272, or ART 274 .*

ART 480. Advanced Sculpture (0,9)

1.00 - 3.00, repeatable

Advanced study in sculpture focusing on projects chosen by the student in consultation with the instructor from an array of materials and processes used in contemporary sculpture. *Prerequisite: ART 380.*

ART 490. Independent Study in Art

1.00 - 3.00, repeatable

Independent activity, such as research or studio practice, under faculty supervision. Projected studies in any area of the school's offering must be arranged with the instructors who will direct them. Offered only with consent of the instructor.

ART 491. Studio Assistant

1.00 - 3.00, repeatable

Crosslisted with ARCD 491, ARED 491, GRPH 491, INDU 491

An on-campus program monitored on an individual basis designed to provide practical studio experience in the visual arts. Students will learn safe studio practices and management skills, including material use, inventory control and the proper operation of equipment found within various individual classroom studios. *Prerequisite: Permission of the instructor.*

ART 492. Topics in Art

3.00

Study of selected topics in art, art history, graphic design or interior design at the advanced level. May be repeated when course content changes. See MyMadison for current topics.

ART 493. Contemporary Art Theory

3.00

This is a reading, research and discussion seminar designed for upper level undergraduate and first-year graduate level studio art majors addressing historic and contemporary issues surrounding vision, the senses and aesthetics in the theory and practice of art.

ART 495. Capstone Seminar: Three-Dimensional Art

3.00

A team-taught, intensive seminar for B.F.A. in studio art seniors with concentrations in metals/jewelry, ceramics, fibers or sculpture, or with an emphasis in integrated 3D. Capstone seminar is designed to be a transition into professional life, to help students organize and prepare themselves for graduation and to provide opportunities to work with faculty on professional concerns beyond the studio. *Corequisite: ART 497.*

ART 496. Internship in Art

1.00 - 8.00

A program prepared and monitored on an individual basis. Internships are designed to provide practical experience in the arts. *Prerequisite: Permission of the instructor and ARTH 394 if in museums and galleries.*

ART 497. Capstone Studio: Three-Dimensional Art

3.00

An intensive studio for B.F.A. in studio art seniors with concentrations in metals/jewelry, ceramics, fibers or sculpture, or with an emphasis in integrated 3D. Working closely with their concentration adviser, students refine their artistic voice, build their portfolio and develop their senior thesis presentation. The course culminates in a professional-quality body of work ready for exhibition. *Corequisite: ART 495.*

ART 499. Honors

6 credits total for three semesters (1, 3, 2)

ARED 300. Elementary Art Education Methods (1, 4)

3.00

A study of the aims, philosophy, management, and current methods of art education in elementary school with an emphasis on child growth and development in visual expression. Experiences include developing thematic lessons with art techniques and

materials suitable from Kindergarten through grade five with emphasis on instructional art content, lesson plan preparation, teaching strategies, assessment of student learning, and professional dispositions. *Prerequisite: PSYC 160 , EDUC 300 and permission of instructor.*

ARED 302. Secondary Art Education Methods

3.00

The study of art education methods, philosophy and contemporary practices as they relate to public education secondary school and lifelong learning with adults. Experience with concepts and ideas relevant to secondary curriculum with a focus on instructional art content, lesson plan preparation, teaching strategies, assessment of student learning and professional dispositions. *Prerequisite: PSYC 160 , EDUC 300 and permission of instructor.*

ARED 400. Visual Arts Across the Curriculum (1,4)

3.00

Explores ways in which the art teacher can promote relationships among art and other subjects within the public school curriculum. Emphasis will be placed on how art experiences can be used to teach skills and concepts associated with other subjects. Includes a range of intensive non-art classroom field experiences at the middle grade level. *Prerequisite: ARED 300 , ARED 302 , EDUC 300 ,PSYC 160 and permission of instructor.*

ARED 480. Student Teaching

8.00

Enables students to apply, in the public school classrooms and the comprehensive child development programs, those skills and attitudes acquired in all components of teacher education. Under the guidance of university supervisors, students are provided activities designed to familiarize them with the classroom teacher's role. Two sections of student teaching are completed for a total of sixteen credits. Sections must include the elementary level and secondary level. *Prerequisite: ARED 300 , ARED 302 and ARED 400, the appropriate education courses, and permission of the coordinator of field experiences.*

ARED 490. Field Experiences in Art Education

1.00-3.00

Field experiences tied to the appropriate methods course at the elementary, middle, or high school levels under faculty supervision and an assigned cooperating teacher in the public schools. Practicum field experiences are arranged, approved, and directed by the methods course instructor in conjunction with the coordinator of field experiences. Offered only with the consent of the instructor. *Corequisite: Concurrent with the appropriate methods course: ARED 300, ARED 302 or ARED 400.*

ARED 491. Studio Assistant

1.00 - 3.00

Crosslisted with ARCD 491, ART 491, GRPH 491, INDU 491

An on-campus program monitored on an individual basis designed to provide practical studio experience in the visual arts. Students will learn safe studio practices and management skills, including material use, inventory control and the proper operation of equipment found within various individual classroom studios. *Prerequisite: Permission of the instructor.*

ARED 496. Internship in Art Education

1.00 - 8.00

A program prepared and monitored on an individual basis. Internships are designed to provide practical experience in the arts. *Prerequisite: Permission of the instructor and ARTH 394 if in museums and galleries.*

ARCD 303. History of Design

3.00

This course is an investigation into the domains of graphic, architectural and industrial design. The material will explore these disciplines through reading, lecture and an acquired visual literacy of the contextual, ideational and philosophic agendas.

Prerequisite: ARTH 206.

ARCD 370. History of Architecture

3.00

Survey of the evolution of architectural design from ancient to modern times. *Prerequisite: ARTH 206.*

ARCD 376. Modern Architecture

3.00

Survey of architecture from 1851 to the present day. Thematic investigations will include regional, philosophical and technical developments in architectural space. Architects may include Labrouste, Berlage, Wagner and Richardson, through Wright, Mies, Le Corbusier, to the avant-garde Murrut, Siza, Nouvel and Mockbee. *Prerequisite: ARTH 206.*

ARTH 205. Survey of World Art I: Prehistoric to Renaissance [C2VPA]

3.00

An introduction to the art and architecture of the world from cave painting through European pre-Renaissance art. Includes ancient through medieval art in Europe and the Near East, as well as Asian and African arts. May be used for general education credit.

ARTH 206. Survey of World Art II: Renaissance to Modern [C2VPA]

3.00

Introduction to art and architecture of the world from the Renaissance through Modern ages. Includes European Renaissance, Baroque, Enlightenment, 19th and 20th centuries, as well as Asian and African arts. May be used for general education credit.

ARTH 210. African Art & Culture in the Humanities

3.00

An interdisciplinary introduction to African art and culture with topics focusing on life ways, music, religion, philosophy, art, literature and cinema. This course provides a strong background for upper-division course work in the arts of African and the African Diaspora, as well as for students pursuing degrees in history and anthropology.

ARTH 289. Topics in Art History

3.00

Study of selected topics in art history, including museum studies, at the introductory level. May be repeated when course content changes. See MyMadison for current topics.

ARTH 300. Art History Seminar

3.00

Exploration of various methodological approaches in the history of art, including connoisseurship, iconography, formalism,

psychological studies and interpretations of art and society. Students will examine contrasting interpretations of major works of art. Seminar format. *Prerequisite: ARTH 205, ARTH 206 or permission of the instructor.*

ARTH 301. Institutions and Professions in Art History

3.00

This elective art history course prepares students for professions related to the field through exploration of the histories and missions of its important institutions. Organizations at the international, national and local levels that support the arts are considered. While conducting advanced research and writing on a chosen institution, or on an important issue in the field, students are exposed to a wide range of future opportunities in their professional lives.

ARTH 304. History of Photography

3.00

A survey of photography as an art form from its discovery to the present day. Emphasis is on 20th-century developments and recent contemporary trends.

ARTH 305. History of Decorative Arts

3.00

A history of the decorative arts in Europe and America from c. 1200 to c. 1930. This course provides a stylistic and contextual analysis, concentrating on domestic furnishings, including textiles, furniture, metals, ceramics and glass. *Prerequisite: ARTH 205 or ARTH 206.*

ARTH 309. Topics in Museum Studies

3.00

This course may include studies of select museums, or categories of museums, their histories and current missions and projects; the history of collecting, as well as the dispersal of collections; the repatriation of artworks; and consideration of significant issues in the field at the intermediate level. Topics vary. See MyMadison for current topics.

ARTH 312. African Art: Sub-Saharan

3.00

A survey of the arts and cultures of sub-Saharan Africa, focusing on the major style areas of the continent. Coverage will include: the historic sites of Nigeria, the Guinea Coast, and central, eastern and southern Africa. *Prerequisite: ARTH 205 or ARTH 206.*

ARTH 313. Masterpieces of Italian Renaissance Art

3.00 (*Semester in Florence only*)

A survey of Italian Renaissance painting and sculpture (1280-1550), including the works of Giotto, Donatello, Masaccio, Fra Angelico, Botticelli, Leonardo and Michelangelo. Weekly visits to the Uffizi, San Marco, the Accademia and other Florentine museums.

ARTH 314. Masterpieces of Spanish Art [C2VPA]

3.00 (*Semester in Salamanca*)

A survey of art in Spain from prehistoric cave painting through 20th-century art. Emphasis is given to 17th-18th century Baroque and modern artists including El Greco, Velasquez, Goya, Gaudi and Picasso. Visits to Altamira, the Alhambra, the Prado, Toledo, Santillana del Mar and other sites.

ARTH 316. Masterpieces of British Art

3.00 (Semester in London)

Survey of painting and sculpture in Britain (1530-1860) concentrating on 18th/19th-century painting. British art is viewed in the context of European civilization. Weekly visits to London museums including the Portrait Gallery, Sir John Soane's House, the Wallace Collection and the Tate Gallery.

ARTH 320. Travel Study in Art History

3.00

Art history credit is available to students participating in formal travel study programs with an emphasis on art history. Students maintain a journal with an emphasis on their art history experiences and write a research paper. *Prerequisite: Permission of the program leader and art history coordinator.*

ARTH 325. Topics in Non-Western Art and Architecture

3.00-9.00

This course will consider the study of a culture outside of the European and Anglo-American traditions at the intermediate level. Topics vary. See MyMadison for current topics.

ARTH 326. Topics in Cross-Cultural Art

3.00-9.00

This course will consider the study of two or more artistic traditions that intersect at the intermediate level. Topic varies. See MyMadison for current topics.

ARTH 327. Topics in Pre-Modern Art

3.00

This course will consider the study of a culture or tradition before the Modern Age at the Intermediate level. Topics vary. See MyMadison for current topics.

ARTH 328. Topics in Modern and Contemporary Art

3.00

This course will consider the study of a culture or tradition in the most recent centuries or decades at the Intermediate level. Topics vary. See MyMadison for current topics.

ARTH 332. Islamic Art and Architecture

3.00

This course will consider art from the age of the prophet Muhammad through the sixteenth century. The political and cultural contexts in which Islamic art developed will lay the foundations for understanding later traditions. These may include the role of the mosque in Muslim society; calligraphy and illustrated books; palace building and the arts of luxury; and modes of figural representation, including issues of gender.

ARTH 346. Italian Renaissance Art

3.00

A survey of the development of Italian Renaissance art and architecture 1300- 1550, including the revival of classical art, the development of Humanism, the invention of perspective and the formation of the High Renaissance style.

ARTH 360. Nineteenth Century Art

3.00

A study of European art (1750-1890) concentrating on Neoclassicism, Romanticism, Realism, Impressionism and Post-Impressionism in France. *Prerequisite: ARTH 206.*

ARTH 372. Modern Art From 1900-1945

3.00

A survey of avant-garde art movements from the late nineteenth century to mid-twentieth century. An analysis of the meanings of modernism and modernity in the context of urbanism, industrialism, colonialism and the world wars.

ARTH 380. American Art to 1870

3.00

American painting, sculpture, architecture and decorative arts from the Colonial period through 1870. Topics will include Colonial portraiture, African-American aesthetics, the definition of folk art, nationalism and landscape painting, and the question of American exceptionalism. The course will also introduce students to problems of interpretation in current scholarship. *Prerequisite: ARTH 206.*

ARTH 382. American Art from 1870

3.00

American painting, sculpture, architecture and decorative arts from 1870 to 1945. This course will address topics such as the American Renaissance, the Harlem Renaissance, Chicago School architecture, masculinity in Western American art, notions of decay in turn-of-the -century art and American modernism. It will also introduce methodological debates in current scholarship. *Prerequisite: ARTH 206.*

ARTH 389. Topics in Art History

3.00

Study of selected topics in art history, including museum studies, at the intermediate level. May be repeated when course content changes. See MyMadison for current topics.

ARTH 390. Independent Study in Art History

1.00 - 3.00

Independent activity at the intermediate level, such as research or studio practice, under faculty supervision. Projected studies in any area of the school's offering must be arranged with the instructors who will direct them. Offered only with the consent of the instructor.

ARTH 394. Introduction to Museum Work

3.00

Crosslisted with HIST 394

A study of the philosophy and practice of museum work including the areas of exhibit design, conservation registration, education and administration. Subject is taught from the perspective of the museum profession and is applicable to diverse discipline and types of collections.

ARTH 396. Introduction to Public History

3.00

Crosslisted with HIST 396

An introduction to the varied and interdisciplinary "field" of public history, such as community/local history, historic preservation, archives, historical archaeology, museum studies, business and policy history, documentary editing and publishing, and documentary films, through readings, class discussions, occasional guest speakers, and occasional field trips.

ARTH 400. Art History Research Portfolio

0.00

This course is required for all art history majors. In both the fall and spring semesters, majors with junior and senior standing enroll in ARTH 400.

ARTH 404. Topics in the History of Photography

3.00

This course may include studies of major photographers or consideration of thematic issues such as the documentary tradition and the New Deal. Topics vary. See MyMadison for current topics.

ARTH 406. Monticello

3.00

Crosslisted with HIST 406

A seminar on the architecture and material culture of Thomas Jefferson's Monticello. The course will examine the house's design, artwork, decorative arts, mechanical devices, landscape/garden design and Mulberry Row. Topics will include African-American artisans at the Monticello joinery, Jefferson's Indian Hall and European and African-American domestic life in the Federal Period. Required field trips.

ARTH 408. The Museum: History and Controversies

3.00

Crosslisted with HIST 408

This seminar centers on art museums in the United States. Topics include the historical development of museums, related cultures of display, recent debates on institutional mission and responsibility, and contemporary artists who employ the museum as medium, subject matter or site. Required field trips. *Prerequisite: ARTH 206.*

ARTH 409. Topics in Museum Studies

3.00

This course may include the advanced study of individual case studies or critical issues in the field. Topics vary. See MyMadison for current topics.

ARTH 418. Modern and Contemporary African Art

3.00

Crosslisted with ARTH 518

This course examines the rise of Modern and Contemporary art movements throughout Africa, from 1959 to the present. As colonial influence diminished, important artists, art schools and exhibition tactics have emerged. Developments in painting, sculpture, photography, video and film illustrate the tensions and triumphs of contemporary African nations. Course work centers on a substantial research paper based on primary source material. Additional assignments required for graduate level course.

ARTH 419. Topics in African Art

3.00

This course will deal with the current thematic or methodological issues such as contemporary African arts and artists, arts of the African Diaspora, a particular media (such as architecture or the textile arts), portraiture and identity, the royal arts of Africa, African film and performance, or gender in the arts of Africa. Topic varies. See MyMadison for current topics.

ARTH 424. Arts of Ancient Egypt

3.00

A study of the arts and culture of Ancient Egypt (c. 3000 B.C. to c. 300 B.C.). This course will focus on the art and architecture of the Old and New Kingdoms and also examine the enduring fascination with this unique artistic heritage from the excavations of Napoleon to the present.

ARTH 425. Advanced Topics in Non-Western Art

3.00

This course will consider the study of a culture outside of the European and Anglo-American traditions at the advanced level. Topics vary. See MyMadison for current topics.

ARTH 426. Advanced Topics in Cross-Cultural Art

3.00-9.00

This course will consider the study of two or more artistic traditions that intersect at the advanced level. Topics vary. See MyMadison for current topics.

ARTH 427. Advanced Topics in Pre-Modern Art

3.00

This course will consider the study of a culture or tradition before the Modern Age at the advanced level. Topics vary. See MyMadison for current topics.

ARTH 428. Advanced Topics in Modern and Contemporary Art

3.00

This course will consider the study of a culture or tradition in the most recent centuries or decades at the advanced level. Topics vary. See MyMadison for current topics.

ARTH 430. Far Eastern Art

3.00

A survey of East Asian art from prehistoric times to 19th century colonialism. Emphasis is on the areas of major production: India, China and Japan, with less attention to such centers as Cambodia, Siam and Korea. *Prerequisite: ARTH 205 or ARTH 206.*

ARTH 439. Topics in Medieval Art

3.00

This course may include the study of major buildings and artistic monuments in the medieval Mediterranean and in Western Europe, art in service of empire building, medieval audiences and modes of reception, and the afterlives of monuments into the contemporary period.

ARTH 440. City of Jerusalem

3.00

A critical examination of medieval and early modern Jerusalem, c. 1000-1800, with a special focus on the city's religious diversity evidenced through its art and architecture. The course will examine Islamic, Christian and Jewish cultural traditions in the city. *Prerequisite: ARTH 205 or ARTH 206; or MECM minor status.*

ARTH 446. Renaissance Art and the East

3.00

This seminar explores artistic exchange between the Christian west and competing cultures in the east from c. 1250-1600, focusing on the powers of Italy and their interaction with the Islamic dynasties, the Mamluks of Egypt and the Ottomans in Turkey, as well as the Christian state of Byzantium. Special topics of interest may include palace architecture and imperial ceremony; urban planning; portraiture and caricature; the exchange of luxury goods and the use of art as a diplomatic tool.

ARTH 448. Studies in Leonardo and Michelangelo

3.00

Seminar that examines the artworks of Leonardo da Vinci and Michelangelo Buonarroti. Discusses issues such as the artist's creative process, the development of the artist's style, the patron's role in artwork and interrelationships between the artist's visual and literary works. *Prerequisite: ARTH 206.*

ARTH 449. Topics in Renaissance Art

3.00

This course may include studies of major Italian or Northern Renaissance artists, the development of linear perspective, the Renaissance tomb chapel, or art and politics of the Protestant Reformation.

ARTH 459. Topics Seventeenth and Eighteenth Century Art

3.00

Topics in this course may include studies of particular artists such as Rembrandt, Caravaggio or Watteau; studies of particular styles such as the Rococo or thematic studies such as the history of garden design or the development of art theory. See MyMadison for current topics.

ARTH 460. Nineteenth Century Art

3.00

A study of European art (1750-1890) concentrating on Neoclassicism, Romanticism, Realism, Impressionism and Post-Impressionism in France.

ARTH 469. Topics in Nineteenth Century Art

3.00

Topics in nineteenth century art may include studies of major artists, such as Caspar David Friedrich or Edouard Manet, specific artists groups like the preRaphaelite brotherhood, or thematic issues such as the relationship between art and nationalism. See MyMadison for current topics. *Prerequisite: ARTH 206.*

ARTH 471. Commemoration and Controversy: Public Art in America

3.00

Crosslisted with HIST 471

This course examines the socio-historical, political, cultural and philosophical dimensions of public art in American society, from the Early Republic to the present day. Topics may include: the nature of public art, its uses and functions, as well as civic and official attitudes towards art in the public sphere. Issues of censorship, propaganda, and the "culture wars" of the 1980s and 90s will be highlighted.

ARTH 472. Modern Art Since 1945

3.00

A study of the many developments and trends in American and European art since 1945. This course will focus on such movements as abstract expressionism, pop, conceptual art, installation art, video, film and computer art with an understanding of the theoretical basis of those movements and the development of the art market during this period.

ARTH 479. Topics in Twentieth Century Art

3.00

Topics in twentieth century art may include studies of contemporary painters (i.e., Gerhard Richter), sculptors (i.e., Kiki Smith or Mona Hatoum), performance and video artists (i.e., Bill Viola) or thematic issues such as the relationships between art, technology and gender/racial politics. See MyMadison for current topics. *Prerequisite: ARTH 372 or ARTH 472.*

ARTH 484. Art of the Americas

3.00

Art of indigenous peoples in the Americas (Meso, Central, South and /or North) before European contact. The course will examine domestic and state architecture, painting, textiles, ceramics, metalwork, and earthworks within the context of geographic, state, religious and social issues. Other topics include museum display, repatriation and western taxonomies.

ARTH 488. African American Art

3.00

Crosslisted with AAAD 488

This course examines visual arts produced by people of African descent in the United States from the colonial period until the present. Course themes include debates about the relationship between racial identity and artistic production; the complex interchange between African-American art and the cultural traditions of Africa and Europe; black artists' engagement with

popular representations of African-Americans; and the intersection of race with class, gender and sexuality. *Prerequisite: ARTH 206, AAAD 200 or permission of the instructor.*

ARTH 489. Topics in Art History

3.00

Study of selected topics in art history at the advanced level. May be repeated when course content changes. See MyMadison for current topics.

ARTH 490. Independent Study in Art History

1.00 - 3.00, repeatable

Independent activity, such as research or studio practice, under faculty supervision. Projected studies in any area of the school's offering must be arranged with the instructors who will direct them. Offered only with consent of the instructor.

ARTH 491. Exhibition Seminar

3.00

Advanced seminar explores museum theory and practice through the collaborative design of an exhibition for an on-campus gallery space. The course focuses on developing and researching the exhibition topic, investigating the specific art objects and preparing critical educational materials or catalogue. The class project also includes mounting the exhibit in a real or virtual installation space. *Prerequisite: ARTH 205 or ARTH 206.*

ARTH 492. Material Culture

3.00

Crosslisted with ANTH 492, HIST 492

A broad introduction to the multidisciplinary "field" of material culture studies through readings, written assignments, in-class exercises, and field trips. The course introduces ways of looking at and learning from objects and examines how scholars from several disciplines have used material culture in their work. Instructor's permission required to waive HIST 395 prerequisite for non-history majors. *Prerequisite: History Majors must have earned credit for HIST 395 prior to enrolling in this course.*

ARTH 493. Historic Preservation

3.00

Crosslisted with HIST 493

An introduction to the philosophy and techniques of historic preservation, guidelines for restoration, state and National Register forms and procedures, historic architecture, structural analysis, restoration techniques as well as the business aspects of historic preservation projects. Field trips are a major component of the course. *Prerequisite: History Majors must have earned credit for HIST 395 prior to enrolling in this course.*

ARTH 495. Internship in Art History

1.00 - 3.00

An off-campus program prepared and monitored on an individual basis. Internships are designed to provide practical experience in the arts. *Prerequisite: Permission of the instructor and ARTH 394 if in museums and galleries.*

ARTH 499. Honors

6.00 credits total for three semesters (1,3,2)

ASTR 120. The Solar System [C3PP]

3.00

An introductory course in astronomy, which includes the following topics: motions of celestial objects, eclipses, historical development, the nature of light, telescopes, properties and evolution of the solar system. May be used for general education credit.

ASTR 121. Stars, Galaxies, & Cosmology [C3PP]

3.00

An introductory course in astronomy which includes the following topics: the Sun, stellar properties, stellar evolution, black holes, the Milky Way, galactic evolution, quasars, cosmology. May be used for general education credit.

ASTR 220. General Astronomy I: The Night Sky, the Solar System and Stars

3.00

ASTR 220 is the first in a two-course sequence in general astronomy intended for students with a background in physics. Topics covered include: appearance and movements of the night sky; astronomical coordinate systems and timekeeping; seasons, eclipses and planetary configurations; planetary motions and gravitation; fundamental forces; electromagnetic radiation and its detection; content, structure, formation and evolution of solar system; observations and models of the Sun, stellar interior models; stellar magnitudes and spectra, classifications; Hertzsprung-Russell diagram. *Prerequisite: PHYS 140 or PHYS 240.*

ASTR 221. General Astronomy II: Star Systems, the Interstellar Medium, and Cosmology

4.00

ASTR 221 is the second in a two-course sequence in general astronomy intended for students interested in science. Topics covered include: stellar evolution; variability and high-energy phenomena in stars and multiple-star systems; content, structure, and dynamics of the Milky Way; external galaxies, quasars and AGN; large-scale structure and the distance scale of the universe; the Big Bang model and alternative cosmologies, possible geometries and eventual fates of the universe. An observational astronomy laboratory component is part of this course. The lab component will cover basics of telescope set up and operation as well as astronomical coordinate systems. *Prerequisite: ASTR 220.*

ASTR 297. Topics in Astronomy

1.00 - 4.00

Topics in astronomy at the second year level. May be repeated for credit when course content changes. Topics selected may dictate prerequisites. Students should consult instructor prior to enrolling for course. *Prerequisite: Permission of the instructor.*

ASTR 301. Searching for Life in the Universe

3.00

A study of the search for life in the universe, with emphasis on teacher preparation. Topics include how life on earth can guide the search, conditions for life within our solar system, extrasolar planets that may be conducive to life, possible radio communications with other civilizations and technologies necessary for search. Significant time is spent developing student lesson plans. *Prerequisite: ISCI 171 and ISCI 172.*

ASTR 320. Astronomical Techniques

3.00

An overview of modern astronomical techniques with an emphasis on quantitative data collection and analysis. The design and use of various astronomical devices will be covered. Topics will include visible light telescopes and radio telescopes as well as CCD data collection in addition to other current astronomical techniques. Data reduction software will also be addressed.

Prerequisite: ASTR 220 and ASTR 221.

ASTR 330. Relativity

4.00

Crosslisted with PHYS 330

This course is a continuation of topics from mechanics, thermodynamics and statistical Mechanics, electricity and magnetism, and quantum mechanics. The course may include topics from mechanics (Lagrangian dynamics, rigid body motion), electricity and magnetism (solution of Maxwell's equations in the presence of matter), thermodynamics and statistical mechanics (dynamical statistical mechanics) and quantum mechanics (beyond the hydrogen atom). *Prerequisite: PHYS 260 and MATH 237, or permission of instructor.*

ASTR 398. Independent Study in Physics or Astronomy

1.00 - 3.00, repeatable to 4 credits

Crosslisted with PHYS 398

An individual project related to some aspect of physics or astronomy. Must be under the guidance of a faculty adviser. A student may not earn more than a total of four credits for ASTR/PHYS 398.

ASTR 480. Astrophysics

3.00

An introduction to the problems of modern astronomy and the quantitative application of physical principles to these problems. Topics of study include stellar structure and evolution, the interstellar medium and star formation, cosmic rays, pulsars, galactic structure, extragalactic astronomy and cosmology. *Prerequisite: PHYS 340 and PHYS 380.*

ASTR 498R. Undergraduate Research in Physics or Astronomy

1.00 - 4.00, repeatable to 6 credits

Crosslisted with PHYS 498R

Research in a selected area of physics or astronomy as arranged with a faculty research adviser. A student may not earn more than a total of six credits for ASTR/PHYS 498R. *Prerequisite: Proposal for study must be approved prior to registration.*

ATEP 205. Introduction to Athletic Training

3.00

This course provides a broad introduction to the profession of athletic training. Lectures focus on the domains of athletic training. Emphasis is placed on basic emergency management as well as injury prevention including environmental issues, strength and conditioning, and selection of equipment.

ATEP 206. Recognition and Management of Athletic Injuries

3.00

Building on the concepts learned in ATEP 205, the course will emphasize the recognition of common athletic injuries. Pathology,

mechanisms of injury, signs and symptoms, evaluation findings, and basic management of injuries will be explored. Athletic injuries of special populations will also be addressed. *Prerequisite: BIO 290 and ATEP 205 with a grade of "C" or better.*

ATEP 291. Pre-Professional Practicum in Athletic Training

2.00

This course is designed to help students better understand the duties and responsibilities of the athletic trainer. By focusing on psychomotor skills and the application of didactic knowledge, students build a foundation which prepares them for future clinical rotations. *Prerequisite: Permission of the instructor.*

ATEP 304A. Lower Quarter Evaluation (2, 2)

3.00

This course systematically focuses on orthopedic and neurological evaluation including functional testing of athletic injuries. The lower quarter consists of the lower extremity, pelvis and lumbar spine. Other topics include management of internal injuries and sudden death related to athletic participation. *Prerequisite: ATEP 206 and admission to the clinical component of the athletic training curriculum.*

ATEP 304B. Upper Quarter Evaluation (2, 2)

3.00

This course systematically focuses on orthopedic and neurological evaluation including functional testing of athletic injuries. The upper quarter consists of the upper extremity, head, neck and thorax. Other topics include management of crisis situations and facial injuries related to athletic participation. *Prerequisite: ATEP 304A.*

ATEP 305. Rehabilitation in Athletic Training: Lower Extremity (2,2)

3.00

This course explains the rehabilitation process of lower extremity muscular and joint injuries related to athletic activities. Additional topics include rehabilitation facility design, budget preparation and pre-season assessment. *Prerequisite: BIO 290 and admission to the clinical component of the athletic training curriculum.*

ATEP 306. Therapeutic Modalities (3,2)

4.00

This course provides a thorough overview of tissue injury, inflammatory response, healing process and neurophysiology applied to musculoskeletal injuries. Theory, application and clinical decision-making processes using therapeutic modalities during rehabilitation will be emphasized. Documentation, purchasing and maintenance are also addressed. *Prerequisite: ATEP 206 and admission to the clinical component of the athletic training curriculum.*

ATEP 307. Acute Care of Injuries and Illnesses

3.00

This course is designed for student athletic trainers to meet the educational competencies for national accreditation in the following areas: development of risk management/emergency action plans, primary assessment of athletic injuries, emergency care of athletic injuries, immediate care of spine injuries, prevention of injuries associated with the physically active, utilization of diagnostic tools and an overall understanding of protective equipment. *Prerequisite: Admission to clinical component of athletic training curriculum.*

ATEP 350. Measurement Techniques in Athletic Training

2.00

The purpose of this course is to introduce and develop proficiency with measurement techniques frequently used in athletic training. Students will learn clinical evaluation techniques such as manual muscle testing, goniometry, volumetric measurements and girth measurements. How these measures are used in research will also be presented. *Prerequisite: Admission to clinical component of athletic training curriculum.*

ATEP 355. Infectious Disease Control

1.00

Discussion includes theories of origins, statistics and characteristics of the causative pathogen, incubation, illness patterns, transmission, prevention and treatment of infectious and noninfectious disease. Emphasis is placed on STDs, HIV, Hepatitis and OSHA regulations. *Prerequisite: Admission to clinical component of athletic training curriculum.*

ATEP 376. Pharmacology for Athletic Trainers

2.00

This course is designed for students to understand knowledge, skills and values that an entry-level certified athletic trainer must possess in pharmacological applications, including awareness of the indications, contraindications, precautions and interactions of medications, and the governing regulations relevant to physically active individuals. *Prerequisite: Admission to clinical component of athletic training curriculum.*

ATEP 377. General Medicine in Athletic Training

2.00

This course is designed for students to understand knowledge, skills and values that an entry-level certified athletic trainer must possess in order to recognize, treat and refer when dealing with general medical conditions and disabilities related to athletes or others involved in physical activity. *Prerequisite: Admission to clinical component of athletic training curriculum.*

ATEP 378. Assessment Skills in Athletic Training

1.00

The purpose of this course is to develop knowledge and assessment skills related to general medical conditions. In addition, this course will cover body composition, bone density and quality of life outcome measurement tools. *Prerequisite: Admission to clinical portion of athletic training education program. Corequisite: ATEP 377.*

ATEP 392. Level II Practicum in Athletic Training

3.00

This course focuses on clinical performance and application of didactic knowledge. Clinical rotations, clinical competencies, inservices, case studies and professional journals are included in course content. Sport specific activities and clinical applications involving palpation and wound care are key components of this course. August preseason orientation and clinical participation required. *Prerequisite: Admission to clinical component of athletic training curriculum.*

ATEP 393. Level III Practicum in Athletic Training

2.00

This course focuses on clinical performance and application of didactic knowledge. Clinical rotations, clinical competencies, inservices, case studies and professional journal are included in course content. Sport specific activities and clinical applications involving manual muscle testing and equipment fitting are key components of this course. *Prerequisite: ATEP 392*

ATEP 405. Rehabilitation in Athletic Training: Upper Extremity

3.00

This course explains the rehabilitation process of upper-extremity muscular and joint injuries related to athletic activities. Additional topics include prevention of athletic injuries and aquatic rehabilitation. *Prerequisite: ATEP 305.*

ATEP 406. Organization and Administration in Athletic Training

3.00

This course is an overview of managerial issues including legal concerns, OSHA guidelines, budgeting/purchasing and staffing. In addition, this course provides a variety of experiences culminating in the knowledge and skills needed to meet entry-level competencies set by the National Athletic Trainers' Association. *Prerequisite: Permission of the instructor.*

ATEP 494. Level IV Practicum in Athletic Training

2.00 - 3.00

This course focuses on clinical performance and application of didactic knowledge. Clinical rotations, clinical competencies, inservices, case studies, and professional journal are included in course content. Sport specific activities and clinical applications involving orthopedic testing and emergency internal abdominal/chest evaluation are key components. *Prerequisite: ATEP 393*

ATEP 495. Level V Practicum in Athletic Training

2.00

This course focuses on clinical performance and application of didactic knowledge. Clinical rotations, clinical competencies, inservices, case studies and professional journal are included in course content. Sport specific activities and clinical applications involving cranial nerve assessment and neurological evaluation are key components of this course. *Prerequisite: ATEP 494*

BIO 103. Contemporary Biology (3, 0) [C3NS]

3.00

An in-depth exploration of selected biological concepts connected to current, relevant topics and emphasizing an understanding of science as a way of obtaining knowledge. Not available for major or minor credit in biology or biotechnology. Students may not receive credit for both ISCI 103 and BIO 103. May be used for general education credit. May not be used for major credit.

BIO 110. First Year Seminar in Biology

1.00

Orientation to the biology and biotechnology majors for first year students, including freshmen and transfer students. Course content includes introduction to the biology/biotechnology curriculum, academic plan building, time management and study skills, stress and anxiety management, campus student resources, undergraduate research, graduate school considerations, and discussion of biology career options. Course provides university elective credit. Not available for biology or biotechnology major credit. Course is offered credit/no-credit.

BIO 140. Foundations of Biology I (3,3) [C3NS]

4.00

The foundations of the cellular molecules, structures and processes that sustain life in the context of evolution will be explored. Topics will include structure and function; information flow, storage and exchange; pathways and transformations of energy and matter; and systems biology. The lab experience will allow students to participate in science as it is practiced and will prepare students to be scientifically and quantitatively literate.

BIO 150. Foundations of Biology II (3,3)

4.00

Foundations II focuses on the diversity of life, anatomy and physiology of organisms, and ecological organization in an evolutionary context. This class will explore structure and function; how information is transmitted; transformations of energy and matter; and how biological units act as integrated systems. The process of science, interdisciplinary approaches and the relevance of biology to society will be addressed. The research-based lab experience will emphasize core competencies of science. *Prerequisite: Grade of "C-" or better in BIO 140.*

BIO 201. Trelawny Learning Community Seminar I

1.00

in the Trelawny Learning Community. In addition to lab/field work with faculty or graduate students for 2-3 hours per week, students attend a weekly seminar. Seminar includes research skill and team-building exercises, guest speakers and case studies geared toward a career in science. Faculty and students interact with community members to provide perspectives on the major and research in a scientific network. *Prerequisite: Membership in the Trelawny Learning Community. Corequisite: BIO 114 or BIO 140.*

BIO 202. Trelawny Learning Community Seminar II

2.00

The second part of the research skills seminar for first-year students in the Trelawny Learning Community. Students will have already begun research projects during fall semester, and will continue their projects into spring semester while continuing to build research skills. Students will take part in community, campus, and social events and gain experience helping to run a research-based event.

Prerequisite: BIO 201. Corequisite: BIO 150.

BIO 203. Viral Discovery (0,4)

2.00

Crosslisted with ISAT 203

An exploratory laboratory experience, designed for incoming freshmen. Students will learn about the life cycle and ecology of viruses infecting bacteria. Soil samples will be collected, and techniques for isolation and purification of the viruses will be performed by the students. Isolated viruses will be visualized using electron microscopy. The genomic material will be isolated and prepared for nucleic acid sequencing.

BIO 204. Viral Genome and Bioinformatics (0,4)

2.00

Crosslisted with ISAT 204

A computer-based laboratory experience, designed for students completing the Viral Discovery course. Students will learn to identify genes in a viral genome, compare the predicted proteins with known proteins in databases, describe the contents of the genome and notate all the relevant information for publication. Students will also research the role of bacteriophages in ecology and evolution. *Prerequisite: BIO 203 or ISAT 203*

BIO 222. Interdisciplinary Biology for Engineering and Physical Sciences (3,0) [C3NS]

3.00

Case studies and an issues-based approach will provide a framework to understand the science of biology, to stimulate critical

thinking, and to appreciate the interdisciplinary nature of biological investigations. This interdisciplinary biology course is intended for students who have at least sophomore status and who are physical science, engineering or mathematics majors. This course is not available for credit toward the major or minor in biology or biotechnology. May be used for general education credit. *Prerequisite: MATH 231 or MATH 235.*

BIO 226. Introductory Topics in Biology (Variable)

1.00 - 4.00

Introductory studies in specific areas of biology. May be repeated for credit when course content changes.

BIO 240. Genetics (3,3)

4.00

Students will explore how genetic information is utilized throughout the lifetime of the organism. Labs will make use of common model organisms highlighting the growing base of knowledge on the genetics and molecular biology of developmental processes.

Prerequisite: Grade of "C-" or better in BIO 150.

BIO 245. General Microbiology (3, 2)

4.00

A study of the microorganisms, their significance, evolution, structure and function, genetics, and the systems in which they exist. *Prerequisite: BIO 103, BIO 140, CHEM 120, CHEM 131 or ISCI 101 or equivalent.*

Corequisite: BIO 103, BIO 140, CHEM 120, CHEM 131 or ISCI 101 or equivalent.

BIO 246. Microbiology Seminar

1.00

Seminars, readings and discussions of the primary scientific literature with a focus on the current research in the field of microbiology. *Prerequisite: BIO 140 and declared microbiology concentration.*

BIO 250. Quantitative Ecology and Evolution (3,3)

4.00

The relationship among evolution, ecology and the environment are woven together using current research from primary literature. Students will use an interactive e-text application to explore the changing natural world through modeling and simulation in a discovery-based classroom environment. Evolution is explored in many relevant contexts, including artificial and natural selection of GMOs, antibiotic resistance and biodiversity. In a module covering the evolution of decision making, students will learn quantitative approaches to game theory, optimal foraging and sexual selection. An understanding of population ecology and evolution is gained as students manipulate models to understand competition and predator-prey dynamics with real case studies of both microbes and endangered species. Climate change is discussed through the use of mathematical models and current and historical data. Labs will include experimental design and both statistical and quantitative analyses in laboratory and field settings, with an emphasis on oral and written professional communication. *Prerequisite: Grade of "C-" or better in BIO 150, GEOL 110, GEOG 210 or ISAT 112.*

BIO 260. Anatomy and Physiology for Secondary Education (2,2)

An introduction to anatomy (structure) and physiology (function) of the human body and its organ systems specifically designed for future secondary biology educators, which will provide a strong foundation in the relationship of human structure and function to prepare the secondary educator to teach its concepts effectively. BIO 260 is open only to biology majors with a biology education concentration. Credit may not be earned in both BIO 260 and BIO 270 or BIO 290. *Prerequisite: BIO 150 and declared biology majors with the biology education concentration.*

BIO 270. Human Physiology (3, 2) [C3NS]

4.00

An introduction to basic physiological principles using humans as the primary organism. Physiological adaptations will be examined at the molecular through organismal levels. Intended for students in healthrelated fields and Cluster 3 of the General Education program. Not available for biology or biotechnology major credit. *Prerequisite: CHEM 120 or CHEM 131 or equivalent, and MATH 220 or COB 191 or equivalent. Credit for BIO 270 and 290 may be transferred together to JMU only when transferrable credits for two semesters of anatomy and physiology (I& II) are completed at the same institution. A single semester transfer, or courses from different institutions, transfer as BIO 000. Corequisite: CHEM 120 or CHEM 131 or equivalent, and MATH 220 or COB 191 or equivalent. Credit for BIO 270 and 290 may be transferred together to JMU only when transferrable credits for two semesters of anatomy and physiology (I& II) are completed at the same institution. A single semester transfer, or courses from different institutions, transfer as BIO 000.*

BIO 290. Human Anatomy (3, 3)

4.00

A study of the basic body plan is reinforced by studies of dissected human cadavers and computer simulations. Emphasis is on the major body structures and systems. Credit for BIO 270 and BIO 290 may be transferred together to JMU only when transferrable credits for two semesters of Anatomy & Physiology (I & II) are completed at the same institution. A single semester, or courses from different institutions, transfer as BIO 000.

BIO 301. Introductory Neuroscience

3.00

This course will examine molecular control of neuronal function. Topics include the structure and function of neuronal excitability, chemical and contactmediated neuronal communication, developing and regenerating nervous systems, sensation and perception, learning and memory formation, repair from neuronal damage, and the neuronal pathways of sensation and motor control. In the context of these subjects, we will review the neuronal alterations that cause some common brain diseases. *Prerequisite: BIO 140 or BIO 214, and CHEM 132, or by permission of instructor for PSYC majors.*

BIO 304. Cell and Molecular Biology

3.00

Students will develop a deeper understanding of the molecular mechanisms employed by procaryotic and eucaryotic cells. Topics will include (1) macromolecular structure and function and how macromolecules coordinate to maintain life, (2) molecular mechanisms that regulate the synthesis and flow of genetic information and (3) molecular aspects of homeostasis, bioenergetics and cell signaling. *Prerequisite: A "C" or better in BIO 240 and CHEM 132/CHEM 132L.*

BIO 309. Marine and Freshwater Invertebrates (3, 0)

3.00

This is a course on animal diversity, the goal of which is to provide an understanding and appreciation of diverse ways animals function, reproduce and interact with their environment. Invertebrate groups will be surveyed. How evolution has resulted in the great richness and diversity of life on earth today will be explored using the principles of adaptation and phylogenetic analysis. *Prerequisite: BIO 250 or BIO 150.*

BIO 310. Marine Biology

3.00

An exploration of the functional biology, ecology, and biodiversity of marine organisms. Students will be provided with a general understanding of how the ocean works and how marine organisms operate within their environment. The diversity of marine

organisms in the open sea and benthos will be surveyed and a discussion of the numerous threats impacting various marine ecosystems will also be included. *Prerequisite: BIO 250.*

BIO 312. Animal Welfare

3.00

An examination of the biological basis of animal welfare. Topics include the evolution of domestic animals, physiological and behavioral measurements of stress, welfare assessment and pain perception. Case studies examine the use of animals for companionship, food, medical research and entertainment. *Prerequisite: BIO 250.*

BIO 316. Animal Development (3, 0)

3.00

This course integrates cell and molecular biology and genetics to understand the processes and mechanisms underlying body plan formation and organ formation in vertebrate animals and insects. The course additionally covers the development of muscle, skeleton and nervous tissues, the postembryonic phenomena of growth, metamorphosis and regeneration, and the developmental basis of evolutionary changes in animal anatomy. *Prerequisite: BIO 240.*

BIO 318. Experimental Vertebrate Development (0, 4)

2.00

Students design and carry out independent research projects on different aspects of frog or chick development. Skills include manipulating live embryos, raising embryos and larvae from eggs, using wax histology to make microscope slides, immunohistochemistry, 3D reconstruction and morphometry-based analyses, and filming animal behavior. Projects are hypothesis-driven and investigate patterns, mechanisms and behaviors involved in the development of skeleton, lungs, tails, limbs and other organs. *Prerequisite: BIO 140.*

BIO 320. Comparative Anatomy of Vertebrates (2, 4)

4.00

A study of the evolution of vertebrate organ systems that integrates structure, function and development. *Prerequisite: BIO 114, BIO 150 or BIO 290.*

BIO 324. Human Genetics (3, 0)

3.00

An intermediate genetics course with an emphasis on human biology. Topics include cytogenetics, pedigree analysis, quantitative traits, mutation, epigenetics, genomics and ethical issues raised by developing technologies. *Prerequisite: BIO 240.*

BIO 340. Morphology and Anatomy of Vascular Plants (2, 4)

4.00

A detailed study of the comparative morphology and anatomy of tracheophytes. *Prerequisite: BIO 250 or BIO 150.*

BIO 342. Mathematical Models in Biology

3.00

Crosslisted with MATH 342

Introduction to dynamical models (discrete and continuous time) applied to biology. Tools of mathematical analysis from linear

and nonlinear dynamics will be taught, including stability analysis of equilibria, as well as appropriate use of software packages. Emphasis will be on model development and interpretation in the context of applications, including effective written and oral presentation. *Prerequisite: MATH 232 or MATH 235 or equivalent.*

BIO 343. Immunology (3, 0)

3.00

A study of the molecular and cellular basis of the immune system. Topics include the properties of antigens and immunoglobulins, the development and regulation of humoral and cell-mediated immunity, resistance and immunization to infectious diseases, allergies and autoimmune and immunodeficiency disorders. *Prerequisite: BIO 214 , BIO 240 or permission of the instructor.*

BIO 343L. Immunology Laboratory (0, 4)

1.00

This course will introduce students to the theory and application of many of the methods currently used in clinical and research immunology. Laboratory exercises will focus on methods for identifying, quantifying and assessing functional activities of immune cells and molecules. Students will gain experience using experimental animals and in animal cell culture techniques. *Corequisite: BIO 343.*

BIO 345. Animal Field Biology

3.00

The course is designed to use the nutritional and energetic relationships between plants and animals to lead into the evolutionary relationship of members of the different animal phyla. Field study and lab specimens will be used to develop understanding of the ecological relationships of humans and local animals, insects and plants. *Prerequisite: BIO 114 or BIO 150.*

BIO 346. Bacterial Discovery

2.00

Students will learn techniques used in the microbiology laboratory and employ these techniques in the identification and characterization of bacteria isolated from the environment. *Prerequisite: "C" or better in BIO 245.*

BIO 348. Medical Microbiology

3.00

Students will learn about microorganisms of medical importance, mainly bacteria and viruses. Key topics for each organism include general cell structure, unique structures/functions, epidemiology of the disease that the organism causes, mechanisms of pathogenesis, isolation and identification of the organism, and treatment options. *Prerequisite: "C" or better in BIO 245.*

BIO 348L. Medical Microbiology Laboratory

1.00

Laboratory consisting of a series of case studies that require the students to identify the likely causative agent of the symptoms described in the case study. *Prerequisite: BIO 346 and BIO 348. Corequisite: BIO 348.*

BIO 350. Paleobiology (3, 2)

4.00

Crosslisted with GEOL 350

The evolution and ecological structure of the biosphere from the origin of life to the present, emphasizing the evolution and paleobiology of animal life as shown by the fossil record. Lectures discuss methods used to interpret the fossil record and cover topics such as phylogeny and systematics, functional morphology, biostratigraphy, paleoecology, evolution and extinction. Laboratories focus on the major groups of invertebrates that are common in the geologic record. *Prerequisite: GEOL 230, BIO 150 or permission of the instructor.*

BIO 354. Global Climate Change and Life: Ecological and Biological Impacts of Climate Variability (3, 3)

4.00

Global climate change is important to the distribution, diversity, health and survival of organisms. The biota have changed through evolution in part as a response to selection pressures from these variations. Living things can also adjust to change through phenotypic flexibility. This course examines, in a seminar/discussion format, the potential ecological impacts of past and current patterns of climate alteration on organisms. *Prerequisite: "C-" or better in one of the following: BIO 140, GEOL 110, GEOL 115, ISAT 112, GEOG 210 or CHEM 353.*

BIO 357. Galápagos Islands: Biodiversity and Conservation

3.00

A detailed study of the biodiversity, conservation, biogeography and natural history of the Galápagos Islands. *Prerequisite: BIO 150.*

BIO 360. Plant Biology (3, 0)

3.00

An introduction to the biology of plants including evolution, diversity, form and function, ecology and biotechnology. *Prerequisite: BIO 150, or BIO 124 and BIO 214.*

BIO 360L. Plant Biology Laboratory

1.00

An exploration of plant structure, function, evolution and biological diversity. *Prerequisite: BIO 360. Corequisite: BIO 360.*

BIO 361. Biochemistry I (3, 0)

3.00

Crosslisted with CHEM 361

An introduction to the molecules and chemical reactions of living systems. Structure and function of important classes of biomolecules are explored and the relationship of structure to function is stressed. Basic metabolic sequences are discussed. *Prerequisite: CHEM 241 and permission of the instructor.*

BIO 364. Human Uses of Plants (3, 0)

3.00

A survey of past, present and future uses of plants with emphasis on economically important plant families. Issues of cultivated plant origins, biodiversity and germplasm preservation are considered. *Prerequisite: BIO 250 or BIO 150.*

BIO 364L. Laboratory in Human Uses of Plants (0, 3)

1.00

An investigative examination of plants and their constituents with an emphasis on their physiological ecology, adaptations and economic utilization by humans. *Prerequisite: BIO 364. Corequisite: BIO 364.*

BIO 366. Environmental Ecology and Evolution (3, 3)

4.00

An exploration of contemporary environmental issues as they relate to ecological principles. Ecological changes and organismal adaptations will be viewed from an evolutionary context. Past and present resource management by humans will be examined along with implications for the future. *Prerequisite: ISCI 173 or BIO 250 or equivalent.*

BIO 367. Journey Through the Cell (4, 2)

4.00

Study of biological molecules, how these molecules interact to carry out lifesustaining processes, where these processes take place in the cell and how these foundations can be applied to solve biological problems. Students will develop the knowledge and skills necessary to deeply understand and effectively teach these concepts, as well as an understanding of the mental models that K-8 students have surrounding these concepts as a basis for developing meaningful pedagogies. *Prerequisite: Course is open only to IDLS majors and not available for biology or biotechnology major or minor credit.*

BIO 370. Animal Physiology (3, 3)

4.00

human and human animals. Class activities will emphasize problem-solving and collaborative and independent learning. The laboratories will utilize computer simulations and animal/human experiments to examine principles of both physiology and scientific investigation. *Prerequisite: BIO 304 or BIO 240, and CHEM 132 or permission of the instructor. One semester each of calculus and statistics is recommended.*

BIO 375. Sensation and Perception

3.00

Crosslisted with PSYC 375

Explores the nature and development of human sensory capabilities and processing, and how these affect perception of the environment. A potential list of the variety of systems reviewed includes hearing, vision, smell, taste, and touch/pain, as well as phenomena such as the perception of balance. *Prerequisite: Psychology majors: PSYC 211 or PSYC 213. Biology majors: Declared biology neuroscience concentration, PSYC 101 or PSYC 160, and MATH 220, MATH 285 or MATH 318.*

BIO 385. Biopsychology

3.00

Crosslisted with PSYC 385

A survey of the neurological and chemical mechanisms which control behavior. This course examines the brain and how it processes sensation, perception, cognition, movement, motivation, learning, memory and other behavioral processes of interest to psychologists. *Prerequisite: Psychology majors: PSYC 211 or PSYC 213. Biology majors: Declared biology neuroscience concentration, PSYC 101 or PSYC 160, and MATH 220, MATH 285 or MATH 318.*

BIO 386. Field Botany (3, 3)

4.00

An in-depth survey of vascular plants in the field with emphasis on identification, diversity of form and function, and ecology. Laboratory topics will include techniques for sampling plant communities, identifying local flora and preserving botanical materials. *Prerequisite: BIO 250 or BIO 150.*

BIO 387. Environmental Microbiology

3.00

An examination of microbial diversity in the environment and the functional role of microbes in ecosystems around the world. *Prerequisite: Grade of C- or better in BIO 245.*

BIO 387L. Environmental Microbiology Laboratory

1.00

A field-based investigative lab experience exploring the structure and function of microbial communities and applications of microbiology. *Prerequisite: BIO 346 and BIO 387. Corequisite: BIO 346 and BIO 387.*

BIO 395. Comparative Animal Behavior (3, 0)

3.00

Crosslisted with PSYC 395

This course covers aspects of the development, function and evolution of the behavior of nonhuman animals. Topics include intraspecies communication, feeding, aggression, territoriality, reproductive behavior and social behavior. *Prerequisite: Psychology majors: PSYC 211 or PSYC 213; biology or biotechnology majors: BIO 124 or BIO 250, and one of the following ("C-" or better): MATH 205, MATH 220, MATH 231, MATH 235, MATH 285, and MATH 318.*

BIO 400. Geology and Ecology of the Bahamas

3.00

Crosslisted with GEOL 400

This course explores the geology and ecology of the shallow-water marine environment by examining the preeminent modern example, the Bahamas platform. The Bahamas provide an excellent model for understanding modern and ancient carbonate and reef deposits and a variety of terrestrial/aquatic habitats. Biological processes are responsible for many of the geological features of the Bahamas, so the course considers the biology/ecology of marine organisms in addition to geological topics. *Prerequisite: GEOL 110, GEOL 211, or a 200-level GEOL or BIO course; at least four hours of additional lab science, at least sophomore status, and permission of the instructor.*

BIO 402. Forest Ecology

4.00

Crosslisted with BIO 502, GEOG 402

A study of the function, structure and composition of forested ecosystems. The effect of physical geography on the distribution of forest communities will be explored. Issues of forest management and restoration will also be considered. Field laboratory topics will include dendrology and sampling techniques within different forest successional stages. *Prerequisite: BIO 250.*

BIO 404. Evolutionary Analysis (3, 0)

3.00

An examination of the place of theoretical thought in biology. The concepts of phylogenetic relationships and the mechanisms of organic change as expressed through the principles of organic evolution will be stressed. *Prerequisite: BIO 240 or permission of the instructor.*

BIO 405. Vertebrate Paleontology (3, 1)

3.00

Crosslisted with GEOL 405

A study of the origin and evolution of the vertebrates. Emphasis will be on understanding how the processes of Earth evolution and biological evolution have interacted through time to produce a coherent picture of vertebrate history. *Prerequisite: GEOL 230 or BIO 250 or BIO 150 or permission of the instructor.*

BIO 410. Advanced Human Anatomy (1, 6)

3.00

An advanced study of topics in human anatomy using dissection techniques. *Prerequisite: BIO 290 and/or BIO 320 and permission of the instructor.*

BIO 412. Mammalogy

4.00

An introduction to the study of mammals, incorporating evolutionary history, general physiology, reproductive biology, systematics, ecology, wildlife management and behavior, followed by review of mammalian taxonomic orders. Lecture is reinforced with laboratory and field experience. Completion of BIO 320 recommended. *Prerequisite: BIO 250 or BIO 150.*

BIO 414. Clinical Anatomy for Occupational Therapists

4.00
