This course offers an in-depth study of the structure of the musculoskeletal and peripheral nervous systems of the human body. Specific structural and neural pathologies will be examined in regards to impact on occupational performance. Laboratory experiences involving cadaver dissection, skeletal material, models and audiovisual technology will be utilized. *Prerequisite: Admission to the Occupational Therapy program.*

BIO 415. Neuroanatomy and Neurogenic Communication Disorders

3.00

Crosslisted with CSD 415

Introduces neurogenic communication disorders from a neuroanatomical approach.

BIO 416. Human Embryology (3, 3)

4.00

An introduction to human development. Topics include the molecular and cellular process of gametogenesis, fertilization, gastrulation and organogenesis, as well as the macroscopic changes that occur from conception to birth. This course will provide a basis for understanding congenital malformations, cloning and stem cell research. *Prerequisite: BIO 240 or BIO 290.*

BIO 420. Medical Parasitology (3, 0)

3.00

Crosslisted with BIO 520

The study and medical implications of parasites that infect humans. Class activities will emphasize parasite morphology, modes of transmission, mechanisms of host entry and infection, niche selection, life cycles, pathogenesis, diagnosis, and treatment and control. *Prerequisite: BIO 214, BIO 240 or by permission of the instructor.*

BIO 420L. Medical Parasitology Lab (0, 3)

1.00

This course will introduce students to the techniques and procedures currently used in clinical and research parasitology. Laboratory exercises will focus on diagnostic methods and the use of animal models that illustrate parasitic life cycles, including their infectious stages and modes of transmission. *Prerequisite: BIO 420. Corequisite: BIO 420.*

BIO 426. Topics in Biology

1.00 - 4.00

Specified areas of biology. May be repeated for credit when course content changes. *Prerequisite: See MyMadison for prerequisites for specific topics.*

BIO 427. Topics in Biology with Laboratory

1.00 - 4.00

Laboratory studies in special areas of biology to accompany BIO 426 or stand alone. May be repeated for credit when course content changes. *Prerequisite: See MyMadison for prerequisites for specific topics.*

BIO 430. Ornithology: Research and Current Advances

4.00

Crosslisted with BIO 530.

Students will design and engage in course-based research projects using modern approaches to ornithology. Classes will investigate current primary literature on ornithological research, recent technological advances and conservation. Lectures and labs will explore the biodiversity of birds, identification by sight and sound, and the ecology, evolution, physiology and behavior of birds. Labs will involve fieldwork, data collection and workshops such as sound analysis and geographic tracking. BIO 430 will be taught concurrently with BIO 530.

Prerequisite: BIO 250. Credit may not be earned in both 430 and 530.

BIO 432. Light Microscopy (2, 4)

4.00

Crosslisted with BIO 532

This course covers the principles behind light microscopy, from the properties of light to the latest technologies in microscopy. Students will get hands-on experience with the different kinds of microscopes, including the confocal microscope. The course also covers fluorescent probes, advanced fluorescence techniques, digital imaging, methods of quantification and figure preparation for publication, with an emphasis on biological applications. *Prerequisite: BIO 222 or BIO 240.*

BIO 440. Functional Neuroscience for Occupational Therapists

3.00

This course will examine functional performance of all aspects of the human nervous system. Specific nervous system conditions will be introduced and their impact on occupational performance, performance components and environmental contexts discussed. *Prerequisite: Admission to the Occupational Therapy program.*

BIO 443. Understanding Techniques in Neuroscience

3.00

Crosslisted with BIO 543

A writing-intensive introduction to basic neurobiological processes that draws from molecular biology, genetics, biochemistry, behavioral biology, electrophysiology, pharmacology, computer science and optics. Topics will include both classic and state-of-the-art techniques. Special emphasis will be placed on framing techniques as tools to answer basic scientific questions in neuroscience. BIO 443 is taught concurrently with BIO 543. Credit may not be earned in both BIO 443 and BIO 543.

Prerequisite: BIO 240 or BIO 250 or equivalent. Credit may not be earned in both BIO 443 and BIO 543.

BIO 444. Virology (3, 0)

3.00

A study of the fundamental aspects of both basic and medical virology. Credit may not be earned in both BIO 444 and BIO 544.

Prerequisite: A grade of "C" or better in each of the following: CHEM 241, BIO 304, and BIO 240.

BIO 445. Neurobiology (3, 3)

4.00

Molecular, cellular and network mechanisms underlying behavior will be studied using problem-solving, discussion, lecture and critical reading of the primary literature. Similarities and differences between nervous systems and computers will be explored. Laboratories will utilize contemporary electrophysiology and computer simulation to examine the neurobiology of simple animal model systems. *Prerequisite: BIO 140 or BIO 304.*

BIO 446. Experimental Neurobiology

4.00

The experimental basis of neurobiology will be explored in invertebrates and humans using modern neurobiological techniques, such extracellular, intracellular, electromyogram and voltage clamp recording. The course will revolve primarily around the laboratory activities, with the single lecture section designed to support the laboratory. Students will be expected to complete a project that involves developing a new experimental approach or model system. *Prerequisite: BIO 140 or BIO 304.*

BIO 447. Evolution and Ecology of Infectious Disease (3, 0)

3.00

Crosslisted with BIO 547

An introduction to the evolution and ecology of pathogenic microorganisms, with an emphasis on the bacteria. Emphasis will be placed on the study, discussion, and critique of scientific literature, as well as formal presentation of scientific information and data. *Prerequisite: BIO 250, and BIO 245.*

BIO 448. Developmental Neurobiology

4.00

Crosslisted with BIO 548

Exploration of molecular and cellular mechanisms that determine neuronal identity, migration, synaptogenesis, synaptic plasticity and neural organization. Critical and intensive evaluation and oral communication of primary literature. Introduction to current research techniques in developmental neurobiology. *Prerequisite: BIO 240 or BIO 250.*

BIO 449. Insect Ecology (2, 4)

4.00

An overview of insect ecology from an evolutionary perspective, focusing on the processes that affect the diversity, distribution, and abundance of insects in natural and managed ecosystems. The role of insects as model systems in understanding ecological and evolutionary principles is included, and current literature in the field is highlighted. Field surveys and experiments are emphasized, including general insect collection and identification. *Prerequisite: BIO 250.*

BIO 451. Current Topics in Human Development and Evolution (3, 0)

3.00

Crosslisted with BIO 551

Discussion-based course on the developmental changes involved in our evolution from ape-like ancestors; using the science of cloning and embryonic stem cells to prolong human life; the evolutionary theory of aging; the genetic conflict theory of human pregnancy; the developmental basis of variation in human sexuality; and the direct effects of environment on modern human development and evolution. *Prerequisite: BIO 240 or equivalent.*

BIO 452. Population Ecology (2, 4)

4.00

Theoretical and applied aspects of distribution and abundance, population regulation, interactions between populations and conservation will be studied in selected organisms, including humans. Credit may not be earned in both BIO 452 and BIO 552. *Prerequisite: BIO 250.*

BIO 453. Microbial Ecology and Evolution (2, 4)

3.00

The ecology of microorganisms will be covered, including those important in human health and in natural environments. Emphasis will be placed on the study and critique of scientific literature. Credit may not be earned in both BIO 453 and 553. *Prerequisite: BIO 250 and BIO 245.*

BIO 454. Introduction to Biometrics (3, 1)

4.00

Crosslisted with MATH 354

This course discusses the role of statistics in biological research and interpretation of biological phenomena. The course will cover topics of sampling, correlation, regression analysis, tests of hypotheses, commonly observed distributions in natural populations, nonparametric tests, goodness-of-fit tests and ANOVA. In order to fully comprehend the statistical analysis of those publications, students will review approximately half a dozen publications from different fields of biology. *Prerequisite: MATH 220 or equivalent.*

BIO 455. Plant Physiology (3, 3)

4.00

Crosslisted with BIO 555

BIO 455. Plant Physiology (3, 3). 4 credits. An in-depth study of plant function including metabolism, water relations, transport phenomena, growth and development, physiological ecology, and responses to pathogens and abiotic stress. Credit may not be earned in both BIO 455 and BIO 555. *Prerequisite: BIO 240 and CHEM 132.*

BIO 456. Landscape Ecology (3, 3)

4.00

The functional and descriptive study of the interaction of the mosaic of ecosystems that comprise the landscape prevalent in a region. *Prerequisite: BIO 250; GEOG 210. Corequisite: BIO 124 or BIO 250.*

BIO 457. Biological Applications of Geographic Information Systems (2, 4)

4.00

This course will explore the various ways that geographic information systems (GIS) can be used to answer biological questions. Students will use GIS software to study applications in ecology, conservation biology and environmental biology. No prior GIS experience is required. *Prerequisite: BIO 250 or BIO 150.*

BIO 459. Freshwater Ecology (3, 3)

4.00

Functional relationships and productivity of freshwater communities are examined as they are affected by their physical, chemical and biotic environment. Organisms inhabiting lakes, ponds, rivers, streams and estuaries are studied at the population, community and ecosystem levels. Credit may not be earned in both BIO 459 and BIO 559. *Prerequisite: BIO 250 and CHEM 132.*

BIO 460. Plant Biotechnology (2, 4)

4.00

Crosslisted with BIO 560

Theory and practice of growing isolated plant cells, tissues and organs. Credit may not be earned in both BIO 460 and BIO 560. *Prerequisite: BIO 114 or BIO 150, and CHEM 132.*

BIO 465. Environmental Toxicology (2, 4)

4.00

The study of types, sources and biological effects of environmental pollutants. Class activities will include discussions of foundational material covering the biological effects of a broad range of pollutants. Labs will focus on the use of simulation models, geographic information systems and other software currently used in environmental toxicology for the analysis of environmental data. Credit may not be earned in both BIO 465 and BIO 565. *Prerequisite: BIO 240.*

BIO 466. Toxicology Seminar (3, 0)

3.00

Readings and discussions of the primary scientific literature with a focus on the biological effects of toxins at the genetic, cellular, physiological and ecological level. *Prerequisite: BIO 240.*

BIO 467. Human Cardiovascular Physiology

3.00

An in-depth look at the human cardiovascular system by means of advanced physiology with clinical applications and case-based learning. While the course is focused on the human heart and blood vessels, other body systems will be discussed in the context of their association and integration with the cardiovascular system. *Prerequisite: BIO 370 or "B-" or better in BIO 270.*

BIO 468. Endocrinology

3.00

Crosslisted with BIO 568

Study of endocrine organs and mechanisms of action of hormones. Students will be involved in interactive lectures and team-based learning activities to understand endocrine functions and disorders. *Prerequisite: BIO 370 or equivalent.*

BIO 470. Morphology of Nonvascular Plants (2, 4)

4.00

Crosslisted with BIO 570

Comparative morphology, ecology and taxonomy of representative algae, fungi and bryophytes. Credit may not be earned in both BIO 470 and BIO 570. *Prerequisite: BIO 250 or BIO 150.*

BIO 472. Human Metabolism (3, 0)

3.00

This course will focus on the cellular physiological mechanisms responsible for regulation of normal human metabolism and place them in the context of the development of chronic disease processes. *Prerequisite: CHEM 241, and BIO 214, BIO 240 or permission of the instructor.*

BIO 475. Advanced Cell Biology (3, 0)

3.00

This seminar-style course covers topics in advanced cell and molecular biology. Class format will be discussions from assigned review articles, followed by student-led presentations of assigned primary literature. Students write a research grant proposal and give an oral presentation of their proposal in class. *Prerequisite: A grade of "C" or better in each of the following: CHEM 241, and BIO 240, or BIO 304.*

BIO 477. The Genetics of Cancer (3, 0)

3.00

Crosslisted with BIO 577

Exploration of the genetic and epigenetic factors that drive the evolution of cancer cells, taking into account both inherited and environmental contributions to this process. The cellular mechanisms debilitated or subverted during cancer development will be studied, and student teams will demonstrate their understanding of the material through the diagnosis, genetic characterization and treatment of a hypothetical cancer patient. *Prerequisite: BIO 240.*

BIO 480. Advanced Molecular Biology (2, 5)

4.00

Cellular constituents and genetics are emphasized at the molecular level. Credit may not be earned in both BIO 480 and BIO 580. *Prerequisite: BIO 240 and CHEM 241 or CHEM 342.*

BIO 481. Genomics (3, 3)

4.00

An advanced biology course designed for students to learn about the structure and function of genomes, to develop facility in web-based tools and resources, and to appreciate the power and limitations of current resources and knowledge. Focus is on the biological questions that genomics can help to answer. Laboratory exercises will be sequencing and analyzing genomic DNA. *Prerequisite: BIO 240.*

BIO 482. Human Histology (3, 3)

4.00

Microscopic structure of cells, tissues and major organ systems of the body. Basic anatomical and physiological function is presented to emphasize the histological significance of the examined organ systems. *Prerequisite: BIO 270, BIO 290 or equivalent.*

BIO 483. Bioinformatics (3, 3)

4.00

Crosslisted with BIO 583

Focuses on building databases and computer programs to manage and analyze biological sequence data, and secondarily on theoretical aspects. The overall objective is to learn current information about the intersection of information science and biology, to develop facility in the many web-based tools and resources for further studies and research in genomics/bioinformatics, and to appreciate the power and limitations of current resources and knowledge. *Prerequisite: BIO 240.*

BIO 484. Aquatic Microbiology

3.00

Crosslisted with BIO 584

This research-embedded course will introduce students to the techniques and experimental design currently used in aquatic microbial ecology through both literature and laboratory procedures. Students will participate in projects that are currently a component of the instructor's research program. BIO 484 will be taught concurrently with BIO 584. Students may not earn credit in both BIO 484 and BIO 584. *Prerequisite: BIO 245 or equivalent. Students may not earn credit in both BIO 484 and BIO 584.*

BIO 486. Systematics of Vascular Plants (2, 4)

4.00

Study of systematic theory and an overview of the classification and evolution of higher plants with particular attention to flowering plant families. Techniques for plant identification and collection and for construction of phylogenies will be taught in lab. *Prerequisite: BIO 250 or BIO 150.*

BIO 490. Mechanics of Animal Movement (3, 3)

4.00

Crosslisted with BIO 590

The interactions of organisms with their physical environment. Concepts from fluid and solid mechanics are applied to biological form and function. *Prerequisite: BIO 114 , BIO 150 or permission of the instructor.*

BIO 491. Scientific Writing, Presentation and Critical Thinking

2.00

A discussion-based course for the development of the fundamental thinking, writing and presentation skills necessary to be a successful researcher. This course is required (as BIO 491H) for all Biology Track I and II Honors students in their sophomore year, and is strongly recommended for all Biology majors who are intending to do research. Offered as credit/no credit only.

Prerequisite: BIO 140 or by permission of the instructor.

BIO 492. Mentored Biology Course Assistant (0, 4)

1.00

Students are trained in the support and function of undergraduate biology courses. Students must contact and make arrangements with the supervising instructor in the term prior to registration. May be repeated when course content and/or student responsibilities within the course change. Offered as credit/no credit only. *Prerequisite: GPA of 2.5 or higher and permission of the instructor.*

BIO 493. Pre-Veterinary Student Internship (0, 7)

2.00

Students are supervised by veterinarians and lab technicians in diagnostic lab activities at a regional animal health laboratory. A proposal and final presentation are required. Enrollment is limited to 1-2 individuals per term and students are advised to contact the Pre-Veterinary coordinator to be waitlisted. Offered as credit/no credit only. *Prerequisite: Completion of BIO 240, GPA of 2.5 or higher and permission of the instructor.*

BIO 494. Internship in Biology (0, 4-8)

1.00 - 2.00

Students participate in research or applied biology outside of this university. Students must contact and obtain approval of a supervising instructor at the off campus location and with the department internship coordinator in the term prior to registration. A proposal must be approved prior to registration and a final paper or presentation will be completed. Offered as credit/no credit only. *Prerequisite: Biology or biotechnology major with a minimum of eight biology credit hours and a GPA of 2.5 or greater.*

BIO 495. Biotechniques (0, 4)

1.00

Students are trained in research theory and techniques. Students must contact and make arrangements with a supervising instructor in the term prior to registration. May be repeated for a maximum of two credits when course content changes. Offered as credit/no credit only. *Prerequisite: GPA of 2.5 or greater.*

BIO 496. Research Literature (0, 4)

1.00

Students pursue literature research in a selected area of biology. Students must contact and make arrangements with a supervising instructor in the term prior to registration. May be repeated for a maximum of two credits when course content changes. Offered as credit/no credit only. *Prerequisite: GPA of 2.5 or greater.*

BIO 497. Biological Research (0, 4-8)

1.00, repeatable

Students pursue a lab or field research project in a selected area of biology. For new projects (497A), students must contact and make arrangements with a supervising instructor in the term prior to registration and complete a 2-3 page proposal no later than five weeks after the start of the course. Course may be repeated as BIO 497B with the same instructor, or as BIO 497A with a different instructor. Offered as credit/no credit only. *Prerequisite: GPA of 2.5 or greater.*

BIO 499A. Senior Project

2.00

Three semester courses taken as Parts A, B and C; 2 credits each. Expectations, requirements and prerequisites are defined in the department senior project policy. Students must contact and make arrangements with a supervising instructor in the term prior to registration.

BIO 499B. Senior Project

2.00

Three semester courses taken as Parts A, B and C; 2 credits each. Expectations, requirements and prerequisites are defined in the department senior project policy. Students must contact and make arrangements with a supervising instructor in the term prior to registration.

BIO 499C. Senior Project

2.00

Three semester courses taken as Parts A, B and C; 2 credits each. Expectations, requirements and prerequisites are defined in the department senior project policy. Students must contact and make arrangements with a supervising instructor in the term prior to registration.

BIOT 260. Biotechnology Seminar

1.00

An introduction to biotechnology. Topics will include research opportunities, careers and current topics in biotechnology. Not available for biology major or minor credit.

BIOT 494. Internship in Biotechnology

1.00-2.00

Students participate in research or applied biotechnology outside of the university. A proposal must be approved by the biotechnology program's internship coordinator or director prior to registration. A final deliverable, in a format deemed appropriate for the learning experience, will be submitted at the conclusion of the course. *Prerequisite: Biotechnology major with a minimum of eight credit hours and a GPA of 2.5 or higher with instructor permission.*

BUS 160. Business Decision Making in a Modern Society [C1CT]

3.00

This course introduces the concepts of basic technology literacy, information retrieval via electronic and hard copy; along with critical thinking skills. Basic business principles will be introduced to reinforce these concepts and their relationships. The course provides opportunity for applying the skills of oral and written communication to a variety of learning activities. *Prerequisite: Students who have earned credit for a Critical Thinking course must receive permission to enroll in an additional Critical Thinking course. You may not take BUS 160 if you have completed COB 300.*

BUS 200. Personal Finance

3.00

This course covers the fundamentals of personal finance, enabling the student to make better financial decisions both as a student and upon graduation. This course is not part of the finance major requirements and will not be considered a FIN elective.

Prerequisite: ECON 200 and either MATH 155, MATH 205, MATH 231 or MATH 235.

BSAN 390. Statistical Modeling for Business Analytics

3.00

This course integrates data analytics with advanced analytical methods from statistics using computer applications. The emphasis is on applying statistical modeling and analysis of data from a variety of business processes to support managerial decision-making and improved predictive capabilities. *Prerequisite:* Declared BSAN minor or Declared BSAN concentration in CIS major, COB 291 or equivalent with a grade of "B-" or higher, and junior or senior standing.

BSAN 391. Decision Modeling for Business Analytics

3.00

This course addresses a wide range of complex business decision problems through quantitative modeling using management science techniques with appropriate computer applications. Approaches include optimization and sensitivity analysis, multi-objective decision making and simulation risk analysis. *Prerequisite:* Declared BSAN minor or declared BSAN concentration in CIS major, and BSAN 390.

BSAN 393. Data Mining for Business Analytics

3.00

Crosslisted with CIS 393

This course focuses on using statistical and machine learning techniques in computer applications that allow the extraction of useful, previously unrecognized information from large data sets for predictive purposes. By effectively sifting through databases such as those generated by many businesses, data mining allows the analyst to recognize potentially important patterns and clusters and to target business opportunities. *Prerequisite:* Declared BSAN minor or declared BSAN concentration in CIS major, BSAN 390 and BSAN 391.

BSAN 490. Special Studies in Computer Information Systems or Business Analytics

1.00 - 3.00

Crosslisted with CIS 490

An advanced course in information and/or business analytics designed to give qualified students an opportunity to complete independent study under faculty supervision. *Prerequisite:* Senior standing, recommendation of the instructor and written approval of the department head prior to registration.

BSAN 498. Special Topics in Business Analytics

3.00

An advanced course designed to allow exploration of current topics in business analytics. Course content will vary. See adviser for current content. *Prerequisite:* Permission of the instructor.

BLAW 360. Legal Analysis and Business Persuasion

3.00

This course addresses the principles of professional argumentation and writing in the context of the business world and the legal services industry. First, students research and write an analytical legal memorandum. Second, students research and prepare a persuasive business proposal that advocates for one business acquisition over other potential targets. Finally, students learn important day-to-day professional analytical and drafting skills. *Prerequisite: COB 300*

BLAW 470. Financial Products: Regulation and Protection

3.00

An inquiry into the legal environment of the financial marketplace. Topics explored include the role of regulatory agencies, the design of contracts which minimize credit risk and maximize marketability, and methods of protecting the proprietary component of innovative financial products. *Prerequisite: COB 318 and junior standing.*

BLAW 480. Estate Planning

3.00

Legal, financial and practical considerations in the creation, management and conservation of an estate. Includes trust principles and practices; various estate planning tools, including wills, trusts, life insurance and powers of appointment; and pertinent income, estate and gift provisions. *Prerequisite: COB 300 and COB 318 . Corequisite: COB 300 and COB 318*

BLAW 494. White Collar Crime

3.00

A study of white collar crime in America, a unique type of criminal activity that primarily affects businesses. The course explores the substance of white collar crime and focuses on the unique elements of various crimes through the study of actual cases. The course also examines how white collar crimes are prosecuted and defended in state and federal courts. Students are introduced to federal and state criminal procedure, substantive defenses, and the use of sentencing guidelines. *Prerequisite: COB 300.*

BLAW 495. Contract Law, Sales and Secured Transactions

3.00

A study of the law of contracts, Article Two of the Uniform Commercial Code, product liability, legal liability of accountants, secured transactions and bankruptcy with emphasis on the role these play in professional and personal decision making. The courts, the legislature and the interaction of these two branches of government in responding to a changing society are studied throughout. *Prerequisite: COB 318 and COB 300.*

BLAW 496. The Law of Business Organizations, Negotiable Property Instruments and Property

3.00

A study of Article Three of the Uniform Commercial Code, agency, partnerships, corporations, securities regulations, real property, trusts and decedents estates with emphasis on the role these play in professional and personal decision making. *Prerequisite: COB 318 and COB 300 or permission of the instructor.*

BLAW 497. Legal Aspects of International Business

3.00

Survey of legal implications of international business dealings including foreign direct sales, distributorship arrangements, licensing of technology and legal aspects of the multi-national corporation. The foreign legal environment, relevant conventions

and trade regulations, and the transnational reach of regulatory law will be considered. *Prerequisite: COB 318 and senior standing.*

BLAW 498. Special Topics in Business Law

3.00

This course is designed to allow explorations of areas of current topics in business law. Course content will vary by semester and instructor. For current content, consult the adviser. *Prerequisite: COB 300 and permission of the instructor.*

CHEM 120. Concepts of Chemistry [C3PP]

3.00

A one-semester introduction to the fundamental principles, laws and applications of chemistry. Examples relating to the health sciences are emphasized. Not available for major or minor credit in chemistry. May be used for general education credit.

CHEM 131. General Chemistry I [C3PP]

3.00

The first of a two-course general chemistry sequence for science majors. It is designed to introduce students to basic chemical concepts including atomic structure, periodic properties of the elements, nomenclature, basic stoichiometry, theories related to reactivity and bonding and the behavior of materials. May be used for general education credit. *Corequisite: CHEM 131L or CHEM 135L.*

CHEM 131L. General Chemistry Laboratory [C3PP]

1.00

This laboratory course is designed to complement and supplement the CHEM 131 lecture course. The laboratory and lecture portions must be taken concurrently. Chemistry majors are to take CHEM 135L and CHEM 136L. *Corequisite: CHEM 131.*

CHEM 131L-132L. General Chemistry Laboratories

1.00 each semester

These laboratory courses are designed to complement and supplement the CHEM 131-132 lecture courses. Chemistry majors take CHEM 135L and 136L. CHEM 131L may be used for general education credit. *Prerequisite: For CHEM 132L: Grades of "C-" or higher in CHEM 131 and either CHEM 131L or CHEM 135L.*

CHEM 132. General Chemistry II

3.00

A course designed to examine the mechanisms by which chemists obtain information about reacting systems. Major concepts covered include: chemical reactivity, chemical equilibrium, electrochemistry, thermodynamics and kinetics. *Prerequisite: Grades of "C-" or higher in CHEM 131 and either CHEM 131L or CHEM 135L. Corequisite: CHEM 132L or CHEM 136L.*

CHEM 132L. General Chemistry Laboratory

1.00

These laboratory courses are designed to complement and supplement the CHEM 131-132 lecture courses. Chemistry majors take CHEM 135L and 136L. CHEM 131L may be used for general education credit. *Prerequisite: Grades of "C-" or higher in CHEM 131 and either CHEM 131L or CHEM 135L.*

CHEM 135L. Special General Chemistry Laboratory I

1.00

An enriched laboratory course designed primarily for chemistry majors. May be used for general education credit. *Corequisite:* CHEM 131.

CHEM 136L. Special General Chemistry Laboratory II

2.00

An enriched laboratory course that includes special topics and experiments not presented in the regular CHEM 132 laboratory. *Prerequisite:* Grades of "C-" or higher in CHEM 131, CHEM 132 and either CHEM 131L or CHEM 135L. *Corequisite:* CHEM 132

CHEM 241. Organic Chemistry I

3.00

The major objective for this course is to teach the modern method of scientific problem solving using organic compounds as models. Emphasis will be on the chemical language (nomenclature and terminology), molecular electronic concepts, and stereochemistry followed by a brief survey of chemical reactions/mechanisms. Functional groups studied include alkyl halides, alcohols, alkenes, alkynes, carbonyl additions, carboxylic acids and their derivatives as well as alpha-carbon chemistry leading to the ability to perform multi-step synthetic problems. Credit cannot be earned in both *CHEM 241L* and *CHEM 242L*. *Prerequisite:* Grade of "C-" or higher in CHEM 132. *Prerequisite:* Grade of "C-" or higher in CHEM 132.

CHEM 241L. Concepts of Organic Chemistry Laboratory

1.00

Laboratory work will include training in the techniques of organic chemistry, preparation of compounds and some organic qualitative analysis. Credit cannot be earned in both CHEM 241L and CHEM 242L. *Prerequisite:* CHEM 241 *Corequisite:* CHEM 241

CHEM 242. Organic Chemistry II

3.00

The major objective for this course is to teach the modern method of scientific problem solving using organic compounds as models. Emphasis will be a more advanced study of chemical reactivity and mechanisms of the functional groups leading to applications in multi-step synthetic problems as well as structure elucidation of organic compounds. *Prerequisite:* Grade of "C-" or higher in CHEM 241. *It is strongly recommended that students take CHEM 242L with CHEM 242 lecture.*

CHEM 242L. Organic Chemistry Laboratory

2.00

This course will present laboratory techniques and experiments associated with organic chemistry, including an introduction to synthesis, spectroscopic methods, chromatographic techniques and some qualitative organic analysis. Credit cannot be earned in both CHEM 241L and 242L. *Prerequisite:* Grade of "C-" or higher in CHEM 241. *Corequisite:* CHEM 242

CHEM 260. Concepts of Biochemistry

3.00

A brief survey of the principal constituents of living cells, proteins, carbohydrates, lipids and nucleic acids, with emphasis on

their synthesis and transformations in vivo. Intermediary metabolism and protein replication will be stressed. Not available for major or minor credit. *Prerequisite: CHEM 241 and either CHEM 241L or CHEM 242L*

CHEM 260L. Concepts of Biochemistry Laboratory

1.00

The laboratory work will comprise experiments demonstrating some of the pertinent reactions including those of analytical value. *Prerequisite: CHEM 260 Corequisite: CHEM 260*

CHEM 270. Inorganic Chemistry I

3.00

A survey of the chemistry of the elements and modern theories of bonding. *Prerequisite: Grade of "C-" or higher in CHEM 132.*

CHEM 280. An Alternative Lower-Division Chemistry Experience

1.00 - 4.00

This course will provide a mechanism for offering a nontraditional, lower division, lecture and/or laboratory course. It will be offered only with the approval of the full-time teaching faculty. No course will be offered more than three times under the 280 designation. Students may repeat CHEM 280 for credit when course content changes.

CHEM 287L. Integrated Inorganic/Organic Laboratory I

2.00

An enriched, integrated introduction to the laboratory procedures associated with inorganic and organic chemistry. Topics include apparatus design and construction, synthesis, separation methods, spectroscopic analysis and application of computers in the laboratory. *Prerequisite: CHEM 241 Corequisite: CHEM 241*

CHEM 288L. Integrated Inorganic/Organic Laboratory II

2.00

An enriched, integrated introduction to the laboratory procedures associated with inorganic and organic chemistry. Topics include apparatus design and construction, synthesis, separation methods, spectroscopic analysis and application of computers in the laboratory. *Prerequisite: Grade of "C-" or better in CHEM 241 and CHEM 270. Corequisite: CHEM 270.*

CHEM 325. Chemical Hazards and Laboratory Safety

1.00

A brief introduction to physical and chemical hazards which may be encountered in a laboratory setting. Methods of personal protection will be emphasized.

CHEM 331. Physical Chemistry I

3.00

A study of thermodynamics, solutions, kinetics and macromolecules with applications of chemical and biological problems. *Prerequisite: CHEM 132, MATH 236 and PHYS 240.*

CHEM 336L. Applied Physical Chemistry Laboratory

2.00

A laboratory course which emphasizes the applied experimental aspects of physical chemistry. *Prerequisite: CHEM 331* *Corequisite: CHEM 331*

CHEM 351. Analytical Chemistry

4.00

The total analysis concept is introduced and developed. This framework encompasses the areas of experiment design, sample collection and treatment, and statistical evaluation of results, as well as standard analysis techniques. *Prerequisite: CHEM 132.*

CHEM 352. Instrumental Analysis

3.00

This course emphasizes the application of instrumental techniques to the quantitative determination of chemical composition. Both instrument theory and practical applications are presented. *Prerequisite: CHEM 351 and MATH 235.*

CHEM 352L. Instrumental Analysis Laboratory

2.00

This course will introduce students to the methodology and technology associated with the design and use of chemical instrumentation. Students perform experiments that illustrate the theoretical principles associated with instrument designs and the application of instruments to the solution of qualitative and quantitative analysis problems. *Corequisite: CHEM 352.*

CHEM 353. Environmental Chemistry

3.00

An introduction to chemical pollution of water in the air, soil, groundwater, streams and drinking water from a chemist's perspective. Topics include sources and methods of assessment, fates and reactions, and transport of chemicals in the environment. This course does not include laboratory activities. *Prerequisite: A grade of "C" or better in CHEM 241 or permission of the instructor.*

CHEM 354. Environmental Chemistry Field Camp

3.00

Fundamentals of environmental chemistry with laboratory and field trip components. The basic chemical principles of environmental problems are studied. Field trips and laboratory work on real samples are integrated with lecture material. *Prerequisite: CHEM 241 or permission of the instructor.*

CHEM 355. Geochemistry of Natural Waters

3.00

Crosslisted with GEOL 355

Study of chemical theory and reactions important in natural water systems. The role of atmospheric, geologic and biological inputs in determining the geochemistry of streams, rivers and oceans. *Prerequisite: CHEM 131 and CHEM 132 or equivalent.*

CHEM 361. Biochemistry I

3.00

Crosslisted with BIO 361

An introduction to the molecules and chemical reactions of living systems. Structure and function of important classes of biomolecules are explored and the relationship of structure to function is stressed. Basic metabolic sequences are discussed. *Prerequisite: Grade of "C-" or higher in CHEM 241 and permission of the instructor. Completion of CHEM 242 is strongly recommended.*

CHEM 362. Biochemistry II

3.00

A continuation of CHEM 361 including metabolic regulation, protein biosynthesis, analytical methods and isolation of biomolecules. *Prerequisite: CHEM 361 or permission of the instructor.*

CHEM 363. Biophysical Chemistry

3.00

The study of structure-function relationships in biological molecules as well as the theory and applications of biophysical methods used for the analysis of proteins and nucleic acids. Topics may include analytical ultracentrifugation, light scattering, fluorescence, calorimetry, surface plasmon resonance, single molecule approaches, X-ray diffraction, NMR, TEM, AFM, structure prediction and computational simulations. *Prerequisite: Grade of "C" or higher in CHEM 361.*

CHEM 366L. Biochemistry Laboratory

2.00

An introduction to laboratory techniques and experimental approaches associated with modern biochemistry. Isolation and characterization of enzymes and other biomolecules are emphasized. *Prerequisite: CHEM 361 and either CHEM 241L or CHEM 242L or CHEM 287L.*

CHEM 367L. Biochemistry Laboratory

2.00

An introduction to laboratory techniques and experimental approaches associated with modern biochemistry. Isolation and characterization of proteins is emphasized. *Prerequisite: Restricted to majors in Chemistry or Biophysical Chemistry, or by permission of the instructor.*

CHEM 368L. Biophysical Chemistry Laboratory

2.00

An introduction to experimental approaches used to characterize proteins. Techniques may include NMR, UV-Vis, AFM, circular dichroism and infrared spectroscopy. *Prerequisite: Restricted to majors in Chemistry or Biophysical Chemistry, or by permission of the instructor.*

CHEM 375. An Introduction to Materials Science

3.00

Crosslisted with MATS 375, PHYS 375

An introduction to materials science with emphasis on general properties of materials. Topics will include crystal structure, extended and point defects, and mechanical, electrical, thermal and magnetic properties of metals, ceramics, electronic materials, composites and organic materials. *Prerequisite: CHEM 131 and PHYS 150 or PHYS 250 or ISAT 212 or permission of the instructor.*

CHEM 390A. Problems in Chemistry

1.00-3.00

Repeatable for a total of 4 credits. A project is undertaken dealing with some aspect of chemistry under the guidance of a faculty adviser.

CHEM 390B. Problems in Chemistry

1.00 - 3.00

A project is undertaken dealing with some aspect of chemistry under the guidance of a faculty adviser. Repeatable up to four credit hours.

CHEM 390C. Problems in Chemistry

3.00

A project is undertaken dealing with some aspect of chemistry under the guidance of a faculty adviser. Repeatable up to nine credit hours.

CHEM 395. Perspectives in Chemistry

1.00

A description of the technical and nontechnical capabilities expected of a university graduate who enters industry, government or academia is presented. The student is introduced to the various laws governing the chemical industry as well as to the fields of toxicology and environmental health. Experts in various disciplines discuss current topics of concern to the chemistry and biology student.

CHEM 432. Physical Chemistry II

3.00

A study of atomic and molecular energy levels and structure as interpreted by quantum theory. *Prerequisite: CHEM 132 and MATH 236 and PHYS 250.*

CHEM 438L. Physical Chemistry Laboratory

2.00

A laboratory course which emphasizes the application of various physical measurement techniques as a means of obtaining data to test fundamental chemical theory. *Corequisite: CHEM 432.*

CHEM 440. Intermediate Organic Chemistry

3.00

An advanced study of the theory of organic chemistry as applied to chemical reactions and synthetic methods. Such topics as reaction mechanisms, spectroscopy and stereochemistry will be included. *Prerequisite: CHEM 242.*

CHEM 445. Polymer Chemistry

3.00

A study of the synthesis and characterization of macromolecules. Polymer chemistry is discussed in a manner that focuses most attention on the properties of macromolecules that can be understood at the molecular level. *Prerequisite: CHEM 242*

CHEM 445L. Polymer Chem Lab

1.00

A laboratory course focused on the synthesis and characterization of macromolecules. The experiments focus most on the properties of macromolecules so the materials can be understood at the molecular level. *Prerequisite: CHEM 242. Corequisite: CHEM 445.*

CHEM 450. Nuclear and Radiation Chemistry

3.00

A study of the fundamentals of radioactivity in chemistry. Topics include the effects of radiation on matter, measurement of radiation, activation analysis, tracer studies and the nuclear fuel cycle. Applications of radioactive materials and radiation in industry and medicine will be described. *Prerequisite: CHEM 132 and PHYS 250 or permission of the instructor.*

CHEM 450L. Laboratory for Nuclear and Radiation Chemistry

1.00

A laboratory course designed to demonstrate the topics covered in CHEM 450. *Prerequisite: CHEM 132 and PHYS 250 or permission of the instructor. Corequisite: CHEM 450.*

CHEM 455. Lasers and Their Applications to Physical Sciences

3.00

Crosslisted with PHYS 455

An introduction to both the theoretical and practical aspects of lasers and their applications in the physical sciences. *Prerequisite: PHYS 270, CHEM 331 or permission of the instructor.*

CHEM 470. Inorganic Chemistry II

3.00

A study of selected topics in the field of advanced inorganic chemistry. *Prerequisite: A grade of "C-" or higher in CHEM 270 and CHEM 331. Corequisite: CHEM 331.*

CHEM 480. Selected Topics in Chemistry

1.00 - 4.00 each semester

This course is designed to allow an in-depth study of specific topics in chemistry selected according to student and faculty interests.

CHEM 481. Literature and Seminar I

1.00

Provides instruction in methods of abstracting specific information from the body of chemical literature. Attendance at regularly scheduled department seminars is required. *Prerequisite: CHEM 242 or CHEM 288L.*

CHEM 482. Literature and Seminar II

1.00

Provides practice in preparing and presenting a literature-based seminar and paper on a chemical topic. Attendance at regularly scheduled department seminars is required. *Prerequisite: CHEM 481 or permission of the instructor.*

CHEM 485. Science of the Small

4.00

Crosslisted with PHYS 485

The chemistry and physics of materials of the nanometer scale will be explored. Lectures and laboratories will cover contemporary issues in surfaces, self-assembly and low dimensional materials. The intersection of biology, chemistry, engineering and physics will be explored through nanoscience. *Prerequisite: CHEM 132 and MATH 236. Prerequisite or corequisite: PHYS 150 or PHYS 250.*

CHEM 494. Internship in Chemistry

1.00 - 2.00, may be repeated for a maximum of 6 credits

Students participate in research or applied chemistry outside of the university. A proposal must be approved prior to registration, and a final paper will be completed

CHEM 497A. Undergraduate Chemical Research

1.00

Research in a selected area of chemistry, as arranged with and approved by a faculty research adviser the semester prior to registration. Research in a selected area of chemistry, as arranged with and approved by a faculty research adviser the semester prior to registration. Repeatable up to a total of six credits

CHEM 497B. Undergraduate Chemical Research

2.00

Research in a selected area of chemistry, as arranged with and approved by a faculty research adviser the semester prior to registration. Repeatable up to a total of six credits

CHEM 497C. Undergraduate Chemical Research

3.00

Research in a selected area of chemistry, as arranged with and approved by a faculty research adviser the semester prior to registration. Repeatable up to a total of nine credits

CHEM 499A. Honors

1.00

CHEM 499B. Honors

2.00

CHEM 499C. Honors

3.00

CHIN 101. Elementary Chinese I

3.00 - 4.00

The fundamentals of Mandarin Chinese through listening, speaking, reading and writing. Practice in pronunciation and development of comprehension. One hour's work a week in the language laboratory.

CHIN 102. Elementary Chinese II

3.00 - 4.00

The fundamentals of Mandarin Chinese through listening, speaking, reading and writing. Practice in pronunciation and development of comprehension. One hour's work a week in the language laboratory. If student has had two or more years of the language in high school he/she will not receive credit for the course. *Prerequisite: CHIN 101.*

CHIN 212. Intensive Chinese I

6.00

The fundamentals of Chinese through intensive listening, speaking, reading and writing at the intermediate level. This four-week course is the equivalent of CHIN 231-232. *Prerequisite: CHIN 102 or CHIN 111 or permission of the instructor.*

CHIN 231. Intermediate Chinese I

3.00

A more in-depth study of grammar, vocabulary building, conversation and reading. Includes an introduction to composition. *Prerequisite: CHIN 102, CHIN 111, or permission of the instructor.*

CHIN 232. Intermediate Chinese II

3.00

A thorough review of grammar, vocabulary building, conversation, composition and reading. *Prerequisite: CHIN 231 or permission of the instructor.*

CHIN 300. Chinese Grammar and Communication

3.00

Intensive training in grammatical structures and their applications to oral and written conversation. Instruction is in Chinese. *Prerequisite: CHIN 232 or CHIN 212 or permission of the instructor.*

CHIN 320. Chinese Oral and Written Communication

3.00

Intensive training in the use of modern, everyday Chinese with emphasis on conversation and composition. Readings in Chinese will provide a context for discussion and writing. *Prerequisite: CHIN 300 or permission of the instructor.*

CHIN 397. Intensive Reading and Writing in Chinese I

3.00

The major goal of this course is to help students intensively develop proficiency in reading and writing based on their

competence in listening and speaking. Students are expected to appropriately express their ideas in writing on a wide range of topics and achieve reading competence in Mandarin Chinese. *Prerequisite: Permission of the instructor.*

CHIN 398. Intensive Reading and Writing in Chinese II

3.00

Continuation of intensive training in the reading and writing of modern Mandarin Chinese. Instruction is in Chinese. *Prerequisite: CHIN 397 or permission of the instructor.*

CHIN 435. Translation Strategies

3.00

This course discusses the different theoretical strategies of translation and applies them in extensive practical experiences using internet-based language resources in various topics of interest, thus to improve students' knowledge of Chinese language and translation competence. *Prerequisite: CHIN 300.*

CHIN 446. Special Topics in Chinese Literature

3.00

Study of a particular topic in Chinese literature. It may cover all or a specific Chinese literature genre. Course may be repeated if content varies. *Prerequisite: For Chinese minors: CHIN 300. For other students: Permission of the instructor.*

CHIN 447. Special Topics in Chinese Civilization

3.00

Students will study a particular topic in the civilization and/or culture of Chinese-speaking countries. Course may be repeated if content varies. *Prerequisite: For Chinese minors: CHIN 300. For other students: Permission of the instructor.*

CHIN 448. Special Topics in Chinese Linguistics

3.00

Students will study a particular topic in Chinese linguistics. Topics could include an introduction to Chinese sociolinguistics or psycholinguistics. Course may be repeated if content varies. *Prerequisite: For Chinese minors: CHIN 300. For other students: Permission of the instructor.*

CLAS 100. Latin and Greek Roots of English Words

3.00

Intensive study of Latin and Greek word-roots, prefixes and suffixes in the forms they take in English words. An English vocabulary-development course for students with no knowledge of Latin or Greek. Does not count toward licensure in Latin.

CLAS 266. Greek and Roman Classics in Translation

3.00

Discussion of the writings that illustrate the cultural values and intellectual attitudes which constitute the most important legacy of Classical civilization. All readings are in English.

CLAS 338. Roman Religion

3.00

Roman religion will treat the history and nature of Roman religion from its earliest manifestations in the early Republic through the rise of Christianity and its legalisation in A.D. 313 and end in the fifth century AD after an examination of the interactions of paganism and Christianity. It will address the great diversity of pagan cults, the cross cultural interaction across the Mediterranean and beyond and the variety of cultic practice and thought.

CLAS 360. Topics in Greek and Roman Culture

3.00

A study of selected topics in the culture of Ancient Greece and Rome. May be repeated for credit with change of topics.

COB 110. First-Year Success Seminar

1.00

This course is designed to assist first year students with the transition from the high school classroom to the college classroom by developing a better understanding of the learning process while acquiring essential academic skills. Conducted in a seminar setting, this course provides a support group by discussing concerns confronting first year students. Throughout the semester students will engage with various guest speakers to learn about available resources and explore business career paths.

Prerequisite: Declared business major; first year students only.

COB 111. Business Learning Community Seminar

1.00

This course introduces students to business careers, academic course work in the James Madison University College of Business, and faculty, staff, and alumni who offer insights for success. Students will learn what is expected to achieve academic success and succeeding in the business world. Students will also engage in the JMU environment and develop leadership and civic responsibility skills. Students will reflect on learned concepts through written and oral assignments, guest lectures, and service learning. *Prerequisite: MadisonBiz Residential Learning Community students only.*

COB 191. Business Analytics I

3.00

The application of data analysis and statistical methods in business. Introduces data visualization, descriptive statistics, probability, sampling, estimation and hypothesis testing. Emphasis is on using spreadsheet tools and functions for statistical analysis to support analytical decision-making in a business environment. *Prerequisite: One of the following: MATH 155, MATH 156, MATH 205, MATH 231, MATH 235, ISAT 151, or sufficient score on the mathematics placement exam.*

COB 202. Interpersonal Skills

3.00

An applied course consisting of experiential exercises followed by class discussion. Cases are used as learning activities where the instructor acts as a facilitator to learning. Essential theory emanates from class discussions with a student-based rather than instructor-based format. Theory and application are intertwined by means of student self-assessment exercises and group discussion. *Prerequisite: Open only to sophomore business majors.*

COB 204. Computer Information Systems

3.00

An introduction to computer-based information systems for students with a major in the COB or a CIS minor. Emphasis is placed on the role of computers in business and society, computer hardware and software, analysis, design and implementation of

information systems, computer ethics, and collaboration using computers. Students will create databases and collaborate using computer-based tools.

COB 241. Financial Accounting

3.00

The role of financial data in contemporary society; the problems of measuring and reporting income, assets, liabilities and equities; interpretation of financial statements. *Prerequisite: Sophomore standing and declared business major.*

COB 242. Managerial Accounting

3.00

The attention-directing and problem-solving functions of accounting in relation to current planning and control, evaluation of performance, special decisions and long-range planning. *Prerequisite: COB 241.*

COB 291. Business Analytics II

3.00

The application of quantitative modeling and analysis to managerial decision-making. Introduces techniques from predictive and prescriptive analytics including linear optimization, decision analysis, queuing, regression, timeseries forecasting, and simulation. Emphasis is on implementing, solving, and interpreting results from spreadsheet models for business applications. *Prerequisite: COB 191 or MATH 220 and MATH 205 or equivalent.*

COB 300A. Integrative Business: Management

3.00

COB 300A is the management component of an integrated learning experience consisting of four courses, taken concurrently, which introduces the fundamental conceptual tools of management, finance, operation and marketing in such a way as to establish their mutual relevance and interdependence. Students work in small project teams on tasks designed to require the application in concert of conceptual tools from each of the function areas. *Prerequisite: Completion of all required 100- and 200-level B.B.A. core courses, junior standing (56 hours), formal admission to the College of Business and COB 242.*

COB 300B. Integrative Business: Finance

3.00

COB 300B is the finance component of an integrated learning experience consisting of four courses, taken concurrently, which introduces the fundamental conceptual tools of management, finance, operation and marketing in such a way as to establish their mutual relevance and interdependence. Students work in small project teams on tasks designed to require the application in concert of conceptual tools from each of the function areas. *Prerequisite: Completion of all required 100- and 200-level B.B.A. core courses, junior standing (56 hours), formal admission to the College of Business and COB 242.*

COB 300C. Integrative Business: Operations

3.00

COB 300C is the operations component of an integrated learning experience consisting of four courses, taken concurrently, which introduces the fundamental conceptual tools of management, finance, operation and marketing in such a way as to establish their mutual relevance and interdependence. Students work in small project teams on tasks designed to require the application in concert of conceptual tools from each of the function areas. *Prerequisite: Completion of all required 100- and 200-level B.B.A. core courses, junior standing (56 hours), formal admission to the College of Business and COB 242.*

COB 300D. Integrative Business: Marketing

3.00

COB 300D is the marketing component of an integrated learning experience consisting of four courses, taken concurrently, which introduces the fundamental conceptual tools of management, finance, operation and marketing in such a way as to establish their mutual relevance and interdependence. Students work in small project teams on tasks designed to require the application in concert of conceptual tools from each of the function areas. *Prerequisite: Completion of all required 100- and 200-level B.B.A. core courses, junior standing (56 hours), formal admission to the College of Business and COB 242.*

COB 301. European Integration, Culture and History

3.00

This course is designed to complement the COB 300 A-D and will only be offered as part of the semester in Antwerp program. Students will study European integration in the classroom and visit governmental institutions, historical places and cultural events associated with course content. *Prerequisite: Requires acceptance to the semester in Antwerp program. Cannot be used as an elective to fulfill any major or minor in COB. Corequisite: Must be taken with COB 300.*

COB 318. Legal and Ethical Environment of Business

3.00

A study of the law as a means of social, political and economic change. The course focuses on the law in positive leadership development and organizational success. The course has two main goals: To develop leaders who are able to achieve success by understanding the legal and ethical aspects of their business responsibilities and to show how organizations can achieve competitive advantage by reducing legal risk and using the law to create economic value, while also encouraging responsible conduct. The course examines legal and ethical issues that every businessperson should understand to make sound business decisions in a global environment. It provides an overview of the legal system, the nature and uses of law, ethical decision-making frameworks, business organizations and agency, contract law, torts and the law of product liability, criminal law, the regulatory environment, intellectual property, employment law, securities law, and mergers and acquisitions law. *Prerequisite: COB 300. Corequisite: COB 300.*

COB 487. Strategic Management

3.00

Strategic management is designed to be the capstone course for seniors completing their undergraduate studies in the various functional areas of business administration. The course is comprehensive and structured to build on the foundational knowledge students have gained through completing the interdisciplinary COB 300, Integrated Functional Systems, learning experience and from their respective concentrations. *Prerequisite: COB 300, COB 318, senior standing and completion of one full academic semester after completing COB 300.*

COB 490. Special Studies in Business Administration

1.00 - 3.00

Designed to give capable students an opportunity to complete a faculty supervised independent study apart from a specific major. *Prerequisite: Permission from the Associate Dean for Academic Affairs.*

CISE 480. Special Topics in Integrated Science and Engineering

1.00-6.00

This is a special topics course designator that can be used for any of a variety of topics that cut across disciplines within the broad realm of integrated science and engineering. Requisites may vary by section.

CISE 481. Robotics Project Summary

1.00

Students will reflect upon their experience gained in a prerequisite supervised robotics project course, a robotics internship, a robotics research project or an equivalent experience. Results will be disseminated to the academic community via a presentation, a report and/or other means.

CSM 199. Science Outreach in Schools

1.00

A service learning course in which students engage in outreach activities in area high schools. Emphasis is placed on planning and implementing effective tutoring or enrichment activities as well as reflection and assessment of outcomes.

CSM 299. General Instructional Methods for Science in Grades 6-12

2.00

This general teaching methods course provides a solid foundation for planning curriculum and instruction for middle and high school students. Topics include engaging adolescent learners, lesson design, instructional strategies and assessment models. Students in this course must have a science major and expressed a strong interest in becoming a secondary science teacher.

Prerequisite: PHYS 397, Topic: Science Pedagogy

CSD 200. Introduction to Communication Disorders

3.00

This course is an introduction to human communication, the most advanced of neurological functions which separates humans from all other species. It surveys both normal and communicatively disordered populations served by audiologists, speech-language pathologists, educators and neuropsychologists.

CSD 207. Phonetics

3.00

Instruction in various transcription techniques for phonetic and phonemic analysis of speech production.

CSD 208. Anatomy and Physiology of the Ear and Voice Mechanism

3.00

A detailed study of the anatomy and physiology of the speech mechanism.

CSD 209. Acoustics of Hearing and Speech

3.00

Introduction to acoustics of speech and hearing. Introduction to physical acoustics, sound generation and transmission, resonance, speech acoustics and speech perception.

CSD 300. Language Development

3.00

The study of language acquisition, development, structure and function in normal children. The development of language in all cultures and the universal nature of the developmental process is the foundation for continued study in speech-language hearing.

Prerequisite: A grade of "C" or better in CSD 207, CSD 208 and CSD 209; Open to CSD majors only.

CSD 301. Audiology

3.00

An introduction to the symptoms, causes and treatment of hearing disorders. Hearing test instrumentation and interpretation in clinical situations are emphasized. *Prerequisite: A grade of "C" or better in CSD 207, CSD 208 and CSD 209 or permission.*

CSD 314. Phonological and Language Disorders

3.00

An introduction to phonological and language disorders in children and adults. Etiological and maintaining factors are discussed, and an overview of assessment and (re)habilitation procedures is presented. *Prerequisite: CSD 300 or permission.*

CSD 318. Aural Rehabilitation

3.00

Concentrated attention is given to communication problems of the hearing handicapped. Aural rehabilitation is emphasized including lip reading and auditory training. *Prerequisite: CSD 301 or permission.*

CSD 400. Topics in Speech Production and Perception: Implications for Clinical Populations

2.00 - 3.00

This course is a focused study of topics in speech production and perception as related to communication sciences and disorders. The underlying mechanisms associated with these functions for human communication are surveyed and examined with an emphasis on the effects of communicative disorders. The interdisciplinary nature of communication sciences and disorders is highlighted. This course is relevant to a range of fields of study including (but not limited to) speech-language pathology, audiology, speech, language, hearing sciences, psychology, linguistics, health sciences, nursing and occupational therapy. *Prerequisite: PSYC 101, CSD 207, CSD 209 and MATH 220, or permission of the instructor.*

CSD 412. Professional Issues and Multicultural Considerations in Communication Disorders

3.00

This course will address professional issues including healthcare disparities, ethical service delivery, and considerations for effective service delivery to culturally and linguistically diverse populations. Linguistic and nonlinguistic features of different cultures and languages will be discussed. *Prerequisite: CSD 200 , CSD 207 , CSD 300 , CSD 314 and senior standing.*

CSD 415. Neuroanatomy and Neurogenic Communication Disorders

3.00

Crosslisted with BIO 415

Introduces neurogenic communication disorders from a neuroanatomical approach. *Prerequisite: For CSD 415: CSD 208 and senior standing, or departmental approval.*

For BIO 415: CSD 208 or permission.

CSD 416. Organic Disorders in Communication Sciences and Disorders

3.00

This course will discuss fundamental considerations for communication and swallowing disorders of organic etiology. Discussion of current evaluation methods and treatment strategies are explored. *Prerequisite: CSD 208, CSD 415 and senior standing.*

CSD 420. Introduction to Sign Language

3.00

Provides an introduction to American Sign Language, the deaf community and English-based signed systems.

CSD 421. Sign Language II

3.00

Focuses on developing conversational skills of students whose core vocabulary and knowledge of the grammar and pragmatics of sign language are basic; distinguishes ASL from English sign systems. *Prerequisite: CSD 420 or permission.*

CSD 470. Methods and Observation

3.00

Directed observation and participation in practical experiences. Introduction to the clinical process in speech-language pathology. Practical clinical methodology will be emphasized. *Prerequisite: CSD majors only; CSD 314 and senior standing or permission.*

CSD 471. Methods and Observation in Audiology

3.00

An introduction to the clinical process in audiology via directed observation and participation in laboratory and patient interactions. Practical clinical methodology is emphasized. Majors only with interest in graduate study in audiology. Repeatable for credit up to six credits. Must have senior status to enroll. *Prerequisite: CSD 301 and senior standing or permission.*

CSD 490. Special Studies in Communication Sciences and Disorders

1.00 - 3.00

Provides students opportunity for independent study and/or small class instruction in elective topics.

CSD 499. Honors

1.00 - 6.00

See catalog section "Graduation with Honors."

SCOM 121. Fundamental Human Communication: Presentations [C1HC]

3.00

Study of human communication as a process. Overview of the principles and practices of interpersonal, small group and public communication. Emphasis on examining the role of self-concept, perception, culture, verbal and nonverbal dimensions in the communication process, using power and managing conflict, applying critical listening, practicing audience analysis within informative speech making. Public speaking required. May be used for general education credit. May not be used for major credit.

SCOM 122. Fundamental Human Communication: Individual Presentations [C1HC]

3.00

Study of human communication as a process. Overview of the principles and practices of interpersonal, small group and public communication. Emphasis on examining the role of self-concept, perception, culture, verbal and nonverbal dimensions in the communication process, using power and managing conflict, applying critical listening, practicing audience analysis within informative speech making. Public speaking required. May be used for general education credit. May not be used for major credit.

SCOM 123. Fundamental Human Communication: Group Presentations [C1HC]

3.00

Study of human communication as a process. Overview of the principles and practices of communication in small group and public communication contexts. Emphasis on examining the role of self-concept, perception, culture, verbal and nonverbal dimensions in the communication process, using power and managing conflict, applying critical listening, practicing audience analysis, and constructing informative and persuasive group presentations. Public speaking required. May be used for general education credit. May not be used for major credit. SCOM 231. Introduction to Alternative Dispute Resolution. 3 credits. Study of conflict resolution processes including mediation, arbitration and negotiation. Consideration of litigation and hybrid dispute processes such as summary jury trial, rent-a-judge and panel evaluation.

SCOM 123H. Fundamental Human Communication: Group Pres - Honors [C1HC]

3.00

Study of human communication as a process. Overview of the principles and practices of communication in small group and public communication contexts. Emphasis on examining the role of self-concept, perception, culture, verbal and nonverbal dimensions in the communication process, using power and managing conflict, applying critical listening, practicing audience analysis, and constructing informative and persuasive group presentations. Public speaking required. May be used for general education credit. May not be used for major credit. *Prerequisite: Honors Students*

SCOM 240. Introduction to Communication Theory

2.00

Study of theories and models that inform understanding of human communication processes. Emphasis on the processes of theory building, comparison of theories, and the implications and application of theory to particular contexts. Consideration of role of communication in all human endeavors. The SCOM 241 lab and SCOM 240 [Inactive] lecture portions must be taken concurrently. *Prerequisite: SCOM major declared or SCOM minor declared students only, and any SCOM course.*

SCOM 241. Communication Theory Lab

1.00

This lab is designed to complement and supplement the SCOM 240 lecture course. Students will discuss, write and/or give presentations related to content covered in SCOM 240. The SCOM 241 lab and SCOM 240 lecture portions must be taken concurrently. *Prerequisite: SCOM major declared or SCOM minor declared students only, and any SCOM course.*

SCOM 242. Presentational Speaking

3.00

Study of methods for preparing and presenting public speeches. Consideration of impromptu and extemporaneous speaking, sales speeches, business presentations and other special occasion speeches. Emphasis on performance and evaluation. *Prerequisite: Any SCOM course. SCOM 243 /SMAD 243 /KIN 243 Sport Communication Techniques: Broadcasting. SCOM/SMAD 244/KIN 244 Sport Communication Techniques: Writing and Reporting.*

SCOM 245. Signs, Symbols and Social Interaction

3.00

The study of verbal and nonverbal communication as used in human interaction. Consideration given to the function of symbolic systems in self-concept development, the structuring of reality and social discourse. Attention is directed toward the use of signs and symbols by different ethnic groups, genders, age groups and geographic groups. *Prerequisite: SCOM major Declared' or 'SCOM minor Declared' students only and any SCOM course.*

SCOM 247. Small Group Communication

3.00

Study of communication processes involved in solving problems when working with others in a small group context. Emphasis on concepts of roles, norms, leadership and decision making. Consideration of small group factors which influence problem-solving effectiveness. *Prerequisite: SCOM 121, SCOM 122 or SCOM 123.*

SCOM 248. Intercultural Communication

3.00

The study of human communication in a variety of cultural settings and contexts. Emphasis on developing understanding and analytical skills regarding communication between people from different racial, ethnic and cultural backgrounds in both domestic and international settings. Consideration of relevance and application to social, business and political environments.

SCOM 260. Introduction to Public Relations

3.00

Study of basic principles and practices of public relations. Consideration given to public relations problems and pragmatic solutions utilizing oral, written and electronic communication media and skills.

SCOM 261. Public Relations Techniques I: Written

3.00

Study of writing fundamentals for public relations. Emphasis on practice of effective writing for a variety of media (press releases, public service announcements, brochures, newsletters). Must be able to use word processing software. *Prerequisite: SCOM 260.*

SCOM 280. Introduction to Communication Research

3.00

An introduction to the principles, methods and analysis techniques used in the field of communication. Emphasis on a broad-based understanding of the breadth of research in the field. Includes both qualitative and quantitative research methods, methods of literature review and research article critiques. Fulfills the College of Arts and Letters writing-intensive requirement for the major. *Prerequisite: SCOM 240.*

SCOM 301. Feminist Blogging: Writing for Shout Out! JMU

3.00

Crosslisted with WGSS 301.

The goal of this course is to work in a feminist collective to write daily blog posts for the Shout Out! JMU blog. Students will organize the blog, research and write blog posts, publicize the blog, and create dialogue by commenting on one another's blog posts as a means of consciousness raising.

SCOM 302. Third Wave Ecofeminism

3.00

Crosslisted with WGSS 302

This course explores the historically strong association between women and nature, in which the image of Mother Earth is central, and critiques the power-as-domination assumption of our culture shown in the exploitation of women and of the earth itself. Religious, psychological, social, historical and scientific manifestations of this assumption will be examined, along with alternative models of power and responsibility. Students will explore the considerable research on ecofeminism.

SCOM 303. Special Topics in Health Communication

3.00

Study of current topics and issues in health communication. Course content will vary by faculty. See MyMadison for the topic. May be repeated up to six credits

SCOM 305. Language and Culture

3.00

Crosslisted with ANTH 305

An introduction to linguistic anthropology. Explores the complex relationships between language and culture through topics such as language acquisition and socialization; language, thought, and worldview; language and identity; multilingualism; how and why languages change; literacy; and the politics of language use and language ideologies.

SCOM 313. Topics in Communication Studies

1.00 - 3.00

Study of current topics and issues in human communication. Emphasis on contemporary theories, research and principles. *Prerequisite: Nine hours of SCOM courses including SCOM 240 and one at 100 level.*

SCOM 314. Communication in Romantic Relationships

3.00

This class acquaints students with relevant theory and research associated with communication in various stages of romantic relationships including initiation, maintenance and dissolution. Emphasis is on honing one's ability to understand communication theory, research, and application while enhancing one's communication skills in romantic relationships. Additionally, students will improve their ability to communicate about relationship research through writing, presenting and discussing.

SCOM 318. Practicum in Communication Studies

1.00 - 6.00

Approved co-curricular activities and/or projects of a practical nature. No more than six hours of practicum credit can be applied to major. Proposals must be submitted to and approved by the course instructor for section and credit hour registration. To receive repeat credit, see school director. *Prerequisite: Permission of the school director.*

SCOM 320. Introduction to Interpersonal Communication

3.00

Introduction to the fundamental theoretical perspectives in interpersonal communication. Emphasis on the effects of verbal and

nonverbal messages on continuity and change in personal relationships. Consideration of the influence of cultural and social contexts on messages in relationships. Development of communication competence in diverse interpersonal contexts.

SCOM 330. Special Topics in Interpersonal Communication

3.00

Study of current topics and issues in interpersonal communication. Topics and issues may include, but are not limited to aging and lifespan, communication education, computer mediated relations, deception and secrecy, friendship and rivalry, relationship rejuvenation and social support. May be repeated up to six credits.

SCOM 331. Communication and Conflict

3.00

Consideration of theories of conflict emerging from the communication discipline and application to different forms of conflict at all levels of human interaction. An examination of communication and varied responses to conflict in diverse situations. Emphasis on competencies required for successful management, intervention and transformation of conflict. *Prerequisite: SCOM 240 or SCOM 245 recommended.*

SCOM 332. Mediation

3.00

Study of analysis and resolution of human conflict. Emphasis on role of mediation in dispute resolution focusing on relationships, language, listening and problem-solving techniques. Consideration of the interpersonal and group approaches to study of conflict management. *Prerequisite: SCOM 240 or SCOM 245 recommended.*

SCOM 333. Negotiations

3.00

This course provides an overview of Negotiation as a strategy for dealing with conflict.

SCOM 334. Alternative Dispute Resolution

3.00

Study of conflict resolution processes including mediation, arbitration and negotiation. Consideration of litigation and hybrid dispute processes such as summary jury trial, rent-a-judge and panel evaluation.

SCOM 335. Communication Consulting

3.00

Students learn and apply the best practices for communication consulting in a variety of contexts. Specific emphases may include consulting on public speaking, peer education, visual communication, marketing, group communication, data visualization, and data analysis. Based in contemporary human communication theory, Communication Consulting provides experiential learning opportunities through a practicum in team-based communication consulting. *Prerequisite: SCOM 121, SCOM 122 or SCOM 123.*

SCOM 338. The Art of Public Debate

3.00

This course focuses on the practical application and critical examination of debate in the public sphere. The course provides students with experience in researching, constructing and presenting topics for public debate. Additionally, students will be asked

to examine pieces of public debate in order to provide them with the tools to critically examine public discourse in a manner consistent with being a productive and active citizen. This course will culminate with a public debate tournament.

SCOM 340. Principles and Processes of Interviewing

3.00

Study of communication principles and processes in interviewing. Emphasis on interpersonal processes involved in interview structures, goals and question types. Development of communication skills in information, persuasive, counseling, health care, employment and performance appraisal interviews.

SCOM 341. Persuasion

3.00

The study of oral communication as a determinant of attitudinal and behavioral change. Emphasis on the various kinds of artistic and nonartistic proofs as they apply to human motivation. Consideration of the application of behavioral research findings to persuasion. *Prerequisite: SCOM 240.*

SCOM 342. Argument and Advocacy

3.00

The study of the techniques and principles of argument and advocacy. Emphasis on developing, presenting and defending a position on controversial questions. Consideration given to contemporary theories of public argument.

SCOM 343. Contemporary Rhetorical Theory and Practice

3.00

Crosslisted with WRTC 430

Examines contemporary rhetorical theory and practice in relation to specific social, economic and technological changes in the 20th century, with particular emphasis on theoretical frameworks. Students learn about the changing needs of postmodern communicators and how new rhetorical theories have developed to anticipate, respond to, and shape those changes. Also explored is the value of contemporary rhetorical theories for communicative and performative events. *Prerequisite: WRTC 200 and WRTC 201 or permission of instructor.*

SCOM 344. Oral Interpretation

3.00

Study and application of theories concerning the oral presentation of various forms of literature including prose, poetry, drama and nonfiction materials. Emphasis on performance. *Prerequisite: Any 100-level SCOM course.*

SCOM 345. Nonverbal Communication

3.00

Study of nonverbal means through which people relate to one another. Consideration of the communicative effects of environment, facial expression, voice, posture, gestures, touch, distance and physical appearance. *Prerequisite: Any 200-level SCOM course.*

SCOM 346. Free Speech in America

3.00

The study of the evolution of freedom of speech in America from Colonial times to the present day. Emphasis on the major periods of development and on the role of courts in defining freedom of speech. Special consideration of contemporary freedom of speech controversies.

SCOM 347. Communication, Diversity and Popular Culture

3.00

Study of the rhetorical dimension of communication practices and texts found in popular culture. Emphasis on issues of diversity as they are manifested in the communication practices found in popular culture. Emphasis on strategic communication choices in a diverse, multicultural world. Emphasis on critical thinking, self-reflexivity and communication analysis. *Prerequisite: SCOM 121, SCOM 122 or SCOM 123.*

SCOM 347L. Communication, Diversity and Popular Culture

3.00

Study of the rhetorical dimension of communication practices and texts found in British popular culture. Emphasis on issues of diversity as they are manifested in the communication practices found in British popular culture. Emphasis on strategic communication choices in a diverse, multicultural world. Emphasis on critical thinking, self-reflexivity and communication analysis.

SCOM 348. Communication and Gender

3.00

Crosslisted with WGSS 348

Study of theories and research regarding the influence of gender in various human communication contexts, both public and private. Emphasis on the critical analysis of existing theory and empirical research and the potential competent uses of communication for social change. *Prerequisite: Any 100-level SCOM course.*

SCOM 349. Ethnographic Approaches to Communication Studies

3.00

This course offers an examination of ethnographic approaches to interpersonal, organizational, health and public communication studies. Students will analyze the role of ethnographic methods and inductive research processes toward building theories of communication and assessing communication practices. *Prerequisite: Any 100-level SCOM course or permission of the instructor.*

SCOM 350. Organizational Communication

3.00

Students gain a complex understanding of organizing practices by investigating the evolution of how historical events have influenced organizational communication and managerial practices at work. Drawing upon communication theory, students analyze various organizational communication practices such as the management of workers, development of organizational culture, and interaction with larger systems. Learning is complemented by an experiential learning project.

SCOM 351. Visual Rhetoric

3.00

Crosslisted with WRTC 351, WRTC 351L

A study of the rhetorical foundations of visual and verbal arguments in academic disciplines and popular culture. Students will analyze and produce visual and verbal arguments in a variety of rhetorical contexts. *Prerequisite: WRTC 103 and any 100-level communication studies course or permission of the instructor.*

SCOM 352. Communication and Social Movements

3.00

A study of the use of communication in social movements. Emphasis on the types of communication used in social movements and on ways to produce and respond to such messages. This course examines a variety of different social movements within the political process including nonprofit organizations.

SCOM 353. American Political Culture and Communication

3.00

Study of functions performed by communication in politics. Emphasis on a variety of communication forms and techniques used by advocates both in campaigning and governing. Consideration of contemporary campaigns and the role of communication in their successes and failures. *Prerequisite: SCOM 240 and POSC 225 are recommended.*

SCOM 354. Environmental Communication and Advocacy

3.00

An exploration of the multifaceted aspects of environmental controversies including the rhetoric, advocacy campaigns, and decision-making processes that produce and attempt to manage environmental conflict. Emphasis on persuasive efforts by interest groups, corporations, resource managers, government agencies, scientific experts, politicians and citizens to influence public understanding of environmental issues, adoption of sustainable behavior and lifestyles and public policy outcomes.

SCOM 355. Food as Communication

3.00

This course examines food as symbolic in everyday life, with attention to negotiated understandings of identities, communities, cultures and environments. The course focuses on issues such as how we communicate identity through food consumed and not consumed; how food choices create, shape and reflect communities and cultures; how messages from mass media and government frame, influence and shape food practices; and how food practices intersect, communicate and impact surrounding environments. *Prerequisite: SCOM 121, SCOM 122 or SCOM 123.*

SCOM 357. Youth, Communication and Culture

3.00

Crosslisted with SMAD 357

Grounded in the cultural communication perspective, the course examines the relationship between communication, youth and popular culture. Defining youth as children, tweens, teens and college-aged young people, this course focuses on communication issues such as how youth are represented in various forms of popular culture; how they are defined by corporate discourse; how young people make sense of popular culture artifacts; and how they become cultural communicators as well as consumers.

SCOM 358. Business and Professional Communication Studies

3.00

Students investigate the nuance and complexity of communication in modern organizational life. A portion of the class is dedicated to the skills involved in a competitive, successful career search. In addition, students develop the skills to become an ethical and effective organizational citizen. *Prerequisite: Junior or senior status.*

SCOM 360L. British Media and Society

3.00

Crosslisted with HUM 251L, SMAD 360L, WRTC 360L

Study the history, nature, and impact of mass media in the United Kingdom. Emphasis on the impact modern media has on society, and society has on media. Consideration of similarities and differences in mass media in the United States and Great Britain. Consideration of the relationship between mass media and the arts. Focus on 20th century mass media in London, one of the world's preeminent and most influential centers.

SCOM 361. Public Relations Techniques II: Visual

3.00

Study of visual communication techniques for public relations. Survey of design principles and elements used for developing visually effective messages with an emphasis on publication design and production, photography, and computer-mediated presentations. Students should provide a camera and be familiar with desktop publishing and presentational software.

Prerequisite: SCOM 261; open to SCOM public relations concentration students only.

SCOM 362. Public Relations Theory and Concepts

3.00

The purpose of this course is to introduce students to the theoretical body of knowledge in public relations. In this course, students will learn core tenants of important theories and concepts and apply these to the ethical practice of public relations. The breadth of theories covered will be useful for any public relations specialization and builds an essential foundation to better understand the research-based character of the public relations process. *Prerequisite: SCOM 260.*

SCOM 363. International Public Relations

3.00

Explores the special professional challenges and opportunities arising from the dynamic global public relations developments characterizing the beginning of this century, taking into account social, economic, political, legal, and cultural factors as well as new media developments. *Prerequisite: SCOM 260.*

SCOM 365. Sports Public Relations

3.00

This class is designed to provide students with opportunities to explore the profession of sports public relations. In this class, students will discuss various sports communication issues including media relations, community relations, player relations, fan relations, crisis communication, sports social responsibility and more. *Prerequisite: SCOM 260.*

SCOM 367. Advanced Public Relations Writing

3.00

Offers advanced public relations students experience in the wide range of writing style and applications that are essential to successfully begin their professional careers. The course focuses on understanding and mastering action-oriented communication methods and best professional practices. Provides both a conceptual framework and in-depth training in advance techniques.

Prerequisite: SCOM 261. Open to SCOM public relations concentration students only.

SCOM 369. Topics in Engaged Public Relations

3.00

Students will explore specific context of public relations and how public relations theories, processes, and skills can be used in the context. During the semester, students will discuss specific publics within the context and apply ethical communication strategies and tactics to engage with those publics. Courses provided could include crisis communication, corporate social responsibility, social media management, fashion public relations, etc. based on the expertise of the instructor. *Prerequisite: SCOM 260.*

SCOM 370. Introduction to Health Communication

3.00

An introduction to the study of communication in health and illness contexts. Covers the impact of interpersonal relationships, sociocultural and organizational influences, and media and health campaigns on health beliefs and behaviors. Emphasizes strategies and approaches that promote effective communication in a variety of health contexts. *Prerequisite: Any 100-level SCOM course.*

SCOM 381. Rhetorical Research Methods

3.00

The study of rhetorical and critical research methods in various communication contexts. Emphasis is on developing and applying appropriate standards to consider communicative factors such as audience, tone, and rhetorical strategies. Consideration of criticism of public address, mass media, and other forms of persuasive communication. Students will be expected to conduct an original research project and present findings in a paper and/or oral presentation. *Prerequisite: SCOM 280.*

SCOM 383. Quantitative Experimental Research Methods

3.00

The study of quantitative research methods in various communication contexts. Emphasis is on ability to research literature, develop and evaluate experimental design, and apply and interpret statistical tests. Students will be expected to conduct an original research project and present findings in a paper and/or oral presentation. *Prerequisite: SCOM 280*

SCOM 385. Qualitative Research Methods

3.00

Study of interpretive approaches to communication research using a variety of qualitative research methods, including field observation, qualitative interviewing, focus groups, narrative analysis and discourse analysis. Students will plan and conduct an exploratory qualitative study, prepare a written research report including a literature review and make a research presentation. *Prerequisite: SCOM 280.*

SCOM 386. Survey Research Methods

3.00

The study of survey research methods in various communication contexts. Emphasis on using survey research methodology in communication audits, public relations problems and public opinion polling and the ability to research literature, develop and evaluate survey questions, and apply and interpret statistical tests. Students will be expected to conduct an original research project and present findings in a paper and/or oral presentation. *Prerequisite: SCOM 280.*

SCOM 388. Campaign Research Methods

3.00

The study of research methods in various communication contexts. Emphasis is on ability to use research methods at various stages of communication planning including background research, primary research, strategic planning, monitoring and

evaluation. Students will be expected to conduct an original research project and present findings in a paper and/or oral presentation. *Prerequisite: SCOM 280.*

SCOM 390. Directed Projects

2.00 - 3.00, repeatable up to 6 credits

Supervised projects related to any aspect of human communication. Emphasis on original individual or group programs beyond the school's usual curricular or co-curricular offerings. Formal report(s) required for awarding of credit. *Prerequisite: Permission of the school director.*

SCOM 395. Study Abroad Seminar

3.00 - 6.00

Intensive examination of specialized international communication topics arranged in cooperation with a faculty member. Prior arrangements must be made with the program director. *Prerequisite: Permission of the program director and school director required.*

SCOM 413. Advanced Topics in Communication Studies

1.00 - 6.00, repeatable to 6 credits

In-depth exploration and analysis of a communication-related theory, context, topic or problem, culminating in a research project documented in written, oral, visual and/or multimedia presentations. Course content varies based on faculty expertise. *Prerequisite: Senior standing and 15 hours of SCOM courses.*

SCOM 420. Feminist Rhetorics

3.00

Crosslisted with WRTC 420

Surveys key women figures in classical and contemporary rhetorical traditions and challenges the strategies used to historicize this tradition from feminist perspectives. Explores diverse feminist rhetorical discourses informed by race, sexual orientation, ethnicity and social class. *Prerequisite: WRTC 103 or equivalent and junior or senior standing, or permission of the instructor.*

SCOM 425. Leadership Communication

3.00

This course promotes understanding and development of organizational leadership through investigation of theory and analysis. Students explore varied and sometimes contradictory models of leadership and learn how to articulate and express ideas that encourage others to advocate for and bring about positive change. *Prerequisite: Junior or senior standing.*

SCOM 431. Legal Communication

3.00

Study of the role of communication in the legal process. Emphasis on communication questions/ problems which litigants, lawyers, judges and jurors face. Consideration of legal argument, negotiation, trial advocacy, decision making and communication technologies.

SCOM 432. Senior Seminar in Conflict Analysis and Intervention

3.00

An advanced seminar, capstone course open to all junior and senior SCOM students, and required for conflict majors and minors. Special topics are developed to include research in conflict analysis and intervention, current trends in dispute resolution, evolving practices in conflict transformation, peacemaking, and mediation, as well as other relevant and timely issues.

SCOM 440. Family Communication

3.00

Study of the processes and functions of family communication, including managing dating, marital, parent-child and intergenerational relations. Theoretical and applied examination of communication and cultural processes that define and construct family structures, systems and boundaries. Course also examines histories of family communication as constructed in popular culture. *Prerequisite: SCOM 280.*

SCOM 441. Oral History

3.00

Crosslisted with HIST 441

This course will explore the theory and practice of oral history. Through a series of readings, students will consider the many promises and challenges of the discipline, including issues related to memory, objectivity, ethics, the law, and technology. Students will also engage in an experiential learning exercise in which they collaborate to produce an oral history project. *Prerequisite: HIST 395 or permission of the instructor.*

SCOM 442. Advanced Topics in Advocacy Studies

3.00

Advanced topics in advocacy studies is the concentration's capstone. Through case studies, readings, discussions and experiential activities students investigate complex issues in the field of advocacy. Students apply theoretical knowledge and skills as they explore the interaction between advocacy and communication. *Prerequisite: Senior standing.*

SCOM 447. Facilitating Public and Organizational Engagement Processes

3.00

Students will learn theories and tools that help organizations and communities think through difficult issues in ways that are productive. Dialogue, deliberation, strategic planning and collaboration are communicative tools that help people deal with complex issues by promoting understanding of multiple viewpoints of the issues, engaging in processes to facilitate choice-making and ways to act together to implement these decisions. Hands-on experiences will be utilized. *Corequisite:* Communication majors or minors who have completed 12 credits in communication.

SCOM 448. Communication, Culture and Identity

3.00

This class examines theory and research of cultural communication, and reflexively considers how communication practices construct identities and arrange social relations within diverse contexts and applied settings. *Prerequisite: Any one of the following courses: SCOM 305, SCOM 347, SCOM 348, SCOM 349, SCOM 352, or SCOM 357.*

SCOM 449. Communication Training

3.00

Students learn to analyze organizations to manage and solve communication problems and improve organizational life. Through experiential learning students will become familiar with strategies and activities designed to help others improve their

communication skills. Students gain experience leading meetings, engaging an audience, collaborating, and facilitating difficult conversations. *Prerequisite: SCOM 242, junior standing and 12 hours in speech communication.*

SCOM 450. Advanced Studies in Organizational Communication

3.00

Advanced studies in organizational communication is the concentration's capstone. Through case studies, readings, discussions, and experiential activities students investigate complex issues that emerge for organizations and their members. Students apply theoretical knowledge and skills as they develop organizational communication concepts to analyze a communication problem. Expertise is showcased through an applied field study in an active organization. *Prerequisite: SCOM 350 and senior standing.*

SCOM 453. Political Campaign Communication

3.00

An advanced study of communication techniques, procedures and processes as they relate to political campaign communication. Emphasis upon the design, execution and production of various communication messages. Consideration of the impact and utilization of various technologies in political campaigns.

SCOM 460. Public Relations Management

3.00

Intensive study and research of advanced communication management skills, theory and principles using case and field studies. Special attention to systematic and ethical management of communication and action affecting an organization's internal and external publics. *Prerequisite: SCOM 260.*

SCOM 461. Public Relations Campaigns

3.00

SCOM 385 The capstone course for the public relations program of study. Students further their theoretical understanding and practical skills in the processes of research, planning, communication/action, and evaluation by conducting campaigns for specific organizations. *Prerequisite: SCOM 362, one advanced public relations technique course (SCOM 361 or SCOM 367), one advanced research method course (SCOM 381, SCOM 383, SCOM 385, SCOM 386, or SCOM 388), and one public relations context course (SCOM 363, SCOM 365, SCOM 369, or SCOM 460).*

SCOM 464. Communication, Culture and Sports

3.00

This course examines the interrelationship between communication, culture and sports in today's society and how that interrelationship reinforces social values and norms, and the impact of cultural identification of class, race, and gender in connecting sports values with cultural values. Drawing on theories of rhetoric and social criticism, students will study several critical approaches to sports and public discourse and will apply those approaches to sports coverage and organizations. *Prerequisite: Junior or senior standing.*

SCOM 465. Rhetoric of Environmental Science and Technology

3.00

Crosslisted with WRTC 416

This course offers an advanced study of the way the public receives, makes sense of, and influences scientific and technical information about environmental issues. Implications of these processes on environmental policy will be analyzed. Readings and assignments will concentrate on the interactions between technical and public spheres of communication, with an in-depth

examination of the way the media facilitates the transfer of information between scientific communities and public audiences.
Prerequisite: WRTC 103 or equivalent and junior or senior standing, or permission of the instructor.

SCOM 468. Patient-Provider Communication

3.00

This course prepares students to be effective communicators in the patient-provider context, whether they are in the patient or the provider role. Students will examine communication from the standpoint of the provider as well as the patient, and they will learn strategies to facilitate provider-patient collaboration and shared decision-making.

SCOM 470. Health Communication Campaigns

3.00

Focuses on the theoretical principles and practical considerations relevant to designing, implementing and evaluating health communication campaigns. Emphasis on the collection and analysis of formative research. The final project for the course involves designing a health campaign targeting a specific audience. *Prerequisite: SCOM 370 or permission of the Instructor.*

SCOM 471. Culture and Health Communication

3.00

This course explores the relationship between culture and health in different contexts. In particular, the course focuses on the role of communication in understanding diverse health beliefs and engaging in dialogue about our own health beliefs.

SCOM 472. Media and Politics

3.00

Crosslisted with POSC 472, POSC 472L, POSC 472W , SCOM 472L, SMAD 472, SMAD 472L

A study of the media's role in political campaigns, concentrating on past/present election, the media's role in covering political parties and coverage of the governing process. Discussion of electronic and print will occur. Topics to be examined include campaign videos, CSPAN, political ads, editorial cartoons, TV debates, convention coverage and radio talk show commentary.

SCOM 472L. Media and Politics

3.00

Crosslisted with POSC 472, POSC 472L, POSC 472W , SCOM 472, SMAD 472, SMAD 472L

A study of the media's role in political campaigns, concentrating on past/present election, the media's role in covering political parties and coverage of the governing process. Discussion of electronic and print will occur. Topics to be examined include campaign videos, CSPAN, political ads, editorial cartoons, TV debates, convention coverage and radio talk show commentary.

Prerequisite: Studies Abroad-London

SCOM 490. Special Studies in Communication Studies

1.00 - 3.00

An independent study for students to pursue individual research under the guidance of faculty. Limited to senior communication studies majors in good standing with permission of school director.

SCOM 495A. Internship in Communication Studies

3.00 - 6.00

Credit for the application of communication theory and skills in a directed, on-the-job learning experience. Open only to communication studies majors who meet specified criteria (see <http://cal.jmu.edu/scominternships>). Up to six credits may be applied as electives in the communication studies' major. *Prerequisite: Permission of the School Director.*

SCOM 495B. Internship in Communication Studies

3.00 - 6.00

Credit for the application of communication theory and skills in a directed, on-the-job learning experience. Open only to communication studies majors who meet specified criteria (see <http://cal.jmu.edu/scominternships>). Up to six credits may be applied as electives in the communication studies' major. *Prerequisite: Permission of the School Director.*

SCOM 495C. Internship in Comm Studies

3.00 - 6.00

Credit for the application of communication theory and skills in a directed, on-the-job learning experience. Open only to communication studies majors who meet specified criteria (see <http://cal.jmu.edu/scominternships>). Up to six credits may be applied as electives in the communication studies' major. *Prerequisite: Permission of the School Director.*

SCOM 499A. Honors in Communication Studies

6.00

Year course. *Prerequisite: Permission of the school director.*

SCOM 499B. Honors in Speech Comm

3.00

SCOM 499C. Honors in Speech Comm

2.00

CIS 204. Computer Information Systems Fundamentals for Non-Business Majors

3.00

An introduction to computer-based information systems. Emphasis is placed on the role of computers in organizations and society, computer hardware and software, uses of information systems, computer ethics, and collaboration using computers. Students will use typical business applications. This course is designed to fulfill requirements for the General Business Minor. Not open to business majors. This course may NOT be substituted for COB 204 by business majors or CIS minors. Not open to students who have completed COB 204 with a passing grade.

CIS 221. Principles of Programming

3.00

Students will be required to solve real-world business problems using a programming language. Projects will include the use of control structures (selection and iteration), collections/lists of data, functions and file processing logic. Students will also be introduced to objects and graphical user interfaces. *Prerequisite: Not open to students who have taken CS 139 or CS 149; or ISAT 252 or IA 241 with a grade of "C" or better; or are taking or have taken CS 159.*

CIS 301. Cloud Server Management

1.00

This is a lab-based course that introduces the student to operating systems and server administration in a business environment. Students will learn the basic functions of managing cloud servers through the hands-on use of cloud resources. Additionally, students will acquire hands-on server administration skills in order to better understand the operational and security demands of business applications. *Prerequisite:* For declared CIS minors: CIS 204 and junior or senior standing. For CIS majors: COB 300. *Corequisite:* For CIS majors: COB 300.

CIS 304. Enterprise Architecture

3.00

This course explores the analysis, design, implementation, evaluation and management of enterprise IT solutions. Emphasis will be placed on planning and modeling the enterprise. Topics include functional modeling, physical architecture design, security planning and recovery issues, project management, emerging technologies, and ethical, financial and global considerations. *Prerequisite:* For CIS majors: COB 300. For CIS minors: Junior or senior standing. *Corequisite:* For CIS majors: COB 300.

CIS 311. Analyzing Data in Organizations

3.00

This course provides an overview of how to work with databases and other data sources in order to access relevant information in a timely and user-friendly manner. It includes discussions of a variety of data representation types, including relational databases, XML documents and cloud data. Students learn essential database concepts and gain practical experience in querying, reporting, and analyzing data. *Prerequisite:* CIS 204 or equivalent knowledge (instructor permission is needed). Open only to Adult Degree Program students.

CIS 312. Systems Planning and Analysis

3.00

Information systems couple both technical (hardware, software, database, telecom) and socio-organizational (business processes, ethics, knowledge, users, developers) subsystems to create rich and available information for the purpose of optimizing business decisions. This course covers the techniques and common tools employed for planning and analyzing these systems. Emphasis will be placed on the system development life cycle, planning and analysis tools, and professional business writing. *Prerequisite:* CIS 204 or equivalent knowledge (instructor permission is needed). Open only to Adult Degree Program students.

CIS 313. Designing for the Web

3.00

This course is an introduction to the design and development of web pages and web sites. Major topics to be covered include: Hypertext Markup Language (HTML5), Cascading Style Sheets (CSS), the principles of design for user experience, responsive design, and JavaScript. *Prerequisite:* CIS 204 or equivalent. Not open to CIS majors or minors.

CIS 320. Computing and Telecommunications Networks

3.00

This course focuses on the underlying principles of telecommunications and how these principles are deployed to provide efficient and secure networks for providing voice, data, and video services. Emphasis is placed on understanding basic routing, switching, and data aggregation techniques; information security strategies; and understanding how basic information systems applications utilize telecommunications services. *Prerequisite:* CIS majors and minors: CIS 304. ISAT majors: ISAT 252. CS majors: CS 139 or CS 149. *Corequisite:* CIS majors and minors: CIS 304.

CIS 330. Database Design and Application

3.00

A study of the tools and techniques of database analysis and design including the implementation of the design using common database management system models. Not open to students who have taken CS 474. *Prerequisite:* For CIS majors: A grade of "C" or better in one of the following: COB 300, CS 139, CS 149, CIS 221 or ISAT 252. For CIS minors: A grade of "C" or better in one of the following: CS 139, CS 149, CIS 221 or ISAT 252 and junior or senior standing. *Corequisite:* COB 300.

CIS 331. Intermediate Computer Programming

3.00

Study of concepts and techniques used in object-oriented programming for business applications including program specification, design, development, testing, implementation and documentation. Topics include: basic programming structures; method, array and memory analysis; object-oriented principles (encapsulation, inheritance, polymorphism); graphical user interface (GUI) design and database connectivity. *Prerequisite:* For CIS majors and minors: CIS 330. *Corequisite:* For CIS majors and minors: CIS 330.

CIS 354. Advanced Visual Basic Programming

3.00

Advanced course in Visual Basic programming. Emphasis will be placed on Object-Oriented programming, sequential and random data files and error trapping. Other topics covered will include data access objects, client server, printing in VB and Crystal Reports. *Prerequisite:* A grade of "C" or better in one of the following: CIS 221, CS 139, CS 149, or ISAT 252 and CIS 330. *Corequisite:* CIS 330.

CIS 361. Computer Information Systems Internship

0.00

To enable students to gain valuable work experience in a CIS-related field. Requires 300 hours of approved computer information systems work experience. All work sites must be pre-approved. *Prerequisite:* CIS major and COB 300.

CIS 366. Web Design and Development

3.00

This course is an introduction to the design and development of web pages and websites. Major topics to be covered include: Hypertext Markup Language (HTML5), Cascading Style Sheets (CSS), the principles of design for user experience, responsive design and a programming language for web development. *Prerequisite:* Declared CIS major or CIS minor and a grade of "C" or better in CIS 221, CS 139, CS 149 or ISAT 252. *And:* CIS majors: COB 300; CIS minors: junior or senior standing.

CIS 393. Data Mining for Business Analytics

3.00

Crosslisted with BSAN 393

This course focuses on using statistical and machine learning techniques in computer applications that allow the extraction of useful, previously unrecognized information from large data sets for predictive purposes. By effectively sifting through databases such as those generated by many businesses, data mining allows the analyst to recognize potentially important patterns and clusters and to target business opportunities. *Prerequisite:* Declared BSAN minor or declared BSAN concentration in CIS major, BSAN 390 and BSAN 391.

CIS 420. Computer-Based Networking

3.00

An introduction to computer-based networks that incorporates data, voice and video traffic between computer systems and users. Topics include the theory, design and operation of local area networks, wide area networks and private branch exchange systems.

Prerequisite: CIS 320.

CIS 424. Computer Security Management

3.00

Instruction and discussion in the design, development and implementation of a computer security program including legal and ethical considerations. *Prerequisite:* CIS 304 and a grade of "C" or better in one of the following: CIS 221, CS 139, CS 149 or ISAT 252.

CIS 425. Defensive Cybersecurity

3.00

This course introduces the concepts of offensive web security through a series of hands-on labs that are built upon real world examples. Doing so allows students to understand the mechanisms of online attacks and learn how to respond to IT security breaches with counter measures. *Prerequisite:* CIS 320 or permission of the instructor. *Corequisite:* CIS 320 or permission of the instructor.

CIS 428. Mobile Computing and Security

3.00

The development of mobile software applications using current environments and frameworks is the primary objective of the class. Several different development and programming environments and platforms will be included as will the actual deployment of the application to a wireless device. An important aspect of the class will be the security implications of deploying mobile devices. *Prerequisite:* A grade of "C" or better in one of the following: CIS 221, CS 139, CS 149, or ISAT 252 and CIS 331. *Corequisite:* CIS 331.

CIS 434. Information Technology Consulting

3.00

This course investigates the tools used by and skills necessary for information technology consultants. The class will use a team-oriented project approach. Teams will be assigned professional consulting firms as manager/mentors and will work with their manager/mentor firm to complete projects that cover each phase of the consulting life cycle. *Prerequisite:* Permission of the instructor.

CIS 454. Systems Analysis and Design

3.00

An introduction to the techniques of systems analysis and design. Emphasizes concept of system life cycle and importance of users in system design. *Prerequisite:* Declared CIS major or minor; CIS 304 and CIS 330. *Corequisite:* CIS 304 and CIS 330.

CIS 463. Business Intelligence

3.00

This course provides a comprehensive discussion of advanced database techniques, data warehousing, online analytical processing (OLAP), data mining, data visualization, decision support systems (DSS), artificial intelligence (AI) methods and other business intelligence (BI) topics. Students gain practical experience using contemporary BI tools and technologies, and apply sound design principles for creating intelligent solutions to realistic business problems. *Prerequisite:* Grade of "C" or better in CIS 330.

CIS 464. Information Systems Project Management

3.00

Students will develop knowledge and expertise applying techniques and tools used by systems analysts and project managers to plan and manage information systems implementations. *Prerequisite:* For CIS majors: COB 300, and a grade of "C" or better in one of the following: CIS 221, CS 139, CS 149, or ISAT 252. For declared CIS minors: A grade of "C" or better in one of the following: CIS 221, CS 139, CS 149, or ISAT 252, and junior standing. *Corequisite:* For CIS majors: COB 300.

CIS 484. Information Systems Development and Implementation

3.00

Comprehensive development and implementation of enterprise-level systems using object-oriented methodologies, database driven architectures, systems analysis and design procedures, and project management skills. Topics covered will include advanced programming techniques, database processing, GUI design, object communication and a comprehensive group capstone project. *Prerequisite:* CIS 331 with a grade of "C" or better and CIS 330 with a grade of "C" or better. *Corequisite:* CIS 454

CIS 490. Special Studies in Computer Information Systems or Business Analytics

1.00 - 3.00

Crosslisted with BSAN 490

An advanced course in information and/or business analytics designed to give qualified students an opportunity to complete independent study under faculty supervision. *Prerequisite:* Senior standing, recommendation of the instructor and written approval of the department head prior to registration.

CIS 498. Special Topics in Computer Information Systems

3.00

An advanced course designed to allow exploration of current topics in computer information systems. Course content will vary. See adviser for current content. *Prerequisite:* Permission of the instructor.

CIS 499A. Honors

1.00 - 6.00

Year course. See catalog section "Graduation with Honors." *Prerequisite:* COB 300 is the prerequisite.

CIS 499B. Honors

3.00

Year course. See catalog section "Graduation with Honors." *Prerequisite:* COB 300 is the prerequisite.

CIS 499C. Honors

2.00

Year course. See catalog section "Graduation with Honors." *Prerequisite:* COB 300 is the prerequisite.

CS 101. Introduction to Computer Science

3.00

How to think like a computer scientist. Topics include an overview of the context of computing, computational operations, computational devices, algorithms and data structures, the storage and transmission of data, the presentation of information, and the limits of computing. Students learn about the design and implementation of computational systems, the value of abstraction, problem solving and the ways in which computation impacts society. *Prerequisite: Fully admitted Computer Science majors or minors only.*

CS 149. Introduction to Programming

3.00

Fundamental problem-solving techniques using a modern programming language. Topics include variables, input/output, decisions, loops, functions, arrays, and objects. Students learn about algorithm development, testing strategies, and software tools. Students may not receive credit for both CS 139 and CS 149. You may only enroll in CS 149 at most twice. *Prerequisite: MATH 155, MATH 156 or sufficient score on the Mathematics Placement Exam.*

CS 159. Advanced Programming

3.00

Students use advanced problem-solving strategies to develop algorithms using classes and objects and techniques such as recursion, exceptions and file I/O. This course also focuses on designing small applications and effective testing strategies. Students may not receive credit for both CS 159 and CS 239. You may only enroll in CS 159 at most twice. *Prerequisite: A grade of "B-" or better in CS 139 or CS 149 or equivalent.*

CS 227. Discrete Structures I

3.00

Crosslisted with MATH 227

An introduction to discrete mathematical structures including functions, relations, sets, logic, matrices, elementary number theory, proof techniques, basics of counting, graph theory, discrete probability, digital logic, finite state machines, integer and floating point representations. *Prerequisite: CS 159. Corequisite: CS 159.*

CS 240. Algorithms and Data Structures

3.00

Students learn how to implement stacks, queues, lists, sets and maps using arrays, linked lists, binary trees, heaps, binary search trees, balanced trees and hashing. Students study graph representations and algorithms. Students analyze recursive and non-recursive algorithms, illustrated by various searching and sorting algorithms. Additional topics may be included as time permits. You may only enroll in CS 240 at most twice. *Prerequisite: Fully admitted Computer Science majors or minors only and grades of "C-" or better in CS 159, CS 227 /MATH 227 or MATH 245, and MATH 231 or equivalent.*

CS 260. Technical Communication for Computer Science

3.00

An introduction to the process of planning, researching, producing, and revising technical documents attuned to specific audiences in the computing industry. Document forms studied include definitions, correspondence, descriptions, specifications, instructions, proposals, reports, resumes and plans. *Prerequisite: Fully admitted Computer Science majors or minors only.*

CS 261. Computer Systems I

3.00

Introduction to the operation of modern interrupt-driven computer systems. Explores the representation of software and information in binary memory, the primary components of a CPU, multithreaded programming and basic interactions with an Operating System. You may only enroll in CS 261 at most twice. *Prerequisite: Fully admitted Computer Science majors or minors only and grades of "C-" or better in either CS 227/MATH 227 or MATH 245, and in CS 159.*

CS 280. Projects in Computer Science

1.00 - 3.00

Projects or topics in computer science which are of interest to the lower division student. May be repeated for credit when course content changes. Topics may vary. *Prerequisite: Fully admitted Computer Science majors or minors only and students should consult the instructor prior to enrolling for the course.*

CS 327. Discrete Structures II

3.00

This course builds on the theoretical foundation developed in Discrete Structures I. Students study a range of topics from discrete mathematics and theoretical computer science including elementary number theory, matrices, graph theory, automata, computability and complexity theory. *Prerequisite: Fully admitted Computer Science majors or minors only and grade of "C-" or better in CS 227 /MATH 227 or MATH 245, and CS 240.*

CS 330. Societal and Ethical Issues in Computing

3.00

Overview of philosophical and professional ethics, and a survey of societal and ethical issues in computing such as privacy, intellectual property, computer security, computer crime, product liability, and the societal, environmental, and economic impact of computers. Students develop skills in assuming and defending positions on societal and ethical issues through oral presentations and written reports. *Prerequisite: Fully admitted Computer Science majors or minors only.*

CS 332. Technical Communication for Computer Science

3.00

A study of the process of planning, researching, producing and revising technical documents for specific audiences in the computing industry. Document forms studied include definitions, requirements specifications, design specifications, instructions, correspondence, descriptions, plans and reports. Specialized notations and languages are also considered. *Prerequisite: Fully admitted Computer Science majors or minors only.*

CS 345. Software Engineering

3.00

Study of modern methods and tools for the development of software products. Topics include software development process models, software development tools, design and construction principles and practice, software quality assurance and program management. *Prerequisite: Fully admitted Computer Science majors or minors only and a grade of "C-" or better in CS 159.*

CS 347. Web Development

3.00

This course covers design and development of World Wide Web applications. Students examine protocols, architectures, development languages and facilities, and issues such as accessibility, usability, security and reliability. Students work with a suite of development tools and languages to construct a client or server application that includes a GUI and a database. *Prerequisite: Grade of "C-" or better in CS 345. Fully admitted computer science majors or minors only.*

CS 349. Developing Interactive Multimedia

3.00

Students learn the concepts of multimedia, the issues in designing multimedia to interact effectively with users, the performance and speed issues in designing multimedia and how to implement interactive multimedia applications. *Prerequisite: Fully admitted Computer Science majors or minors only and a grade of "C-" or better in CS 240.*

CS 354. Introduction to Autonomous Robotics

3.00

A hands-on introduction to programming autonomous mobile robots. The focus of this course is on designing robotic systems that navigate independently in complex environments. Specific topics include localization, mapping, kinematics, path planning and computer vision. *Prerequisite: Fully admitted Computer Science majors or minors only and a grade of "C-" or better in CS 240.*

CS 361. Computer Systems II

3.00

Intermediate exploration of modern interrupt-driven computer systems. Explores models of computation and complex systems, techniques for communication and synchronization of parallel and concurrent software, and the protocols that make up the Internet. *Prerequisite: Fully admitted Computer Science majors or minors only and grades of "C-" or better in CS 240 and CS 261.*

CS 374. Database Systems

3.00

An introduction to database design and management with emphasis on data definition, data manipulation and query languages found in modern database management systems. *Prerequisite: Fully admitted Computer Science majors or minors only and a grade of "C-" or better in either CS 240 or CS 345 or equivalent.*

CS 412. Applied Algorithms

3.00

A practical study of algorithms and their use in problem solving. Algorithms are selected from categories including divide-and-conquer, greedy, backtracking, network flow and dynamic programming. The classes P and NP are introduced and intractable problems discussed. This is a programming intensive course. *Prerequisite: Fully admitted Computer Science majors or minors only and a grade of "C-" or better in CS 327. Students may not receive credit for both CS 412 and CS 452.*

CS 430. Programming Languages

3.00

Several actual programming languages are studied in terms of the fundamental principles of computer programming language design, including object-oriented programming, functional programming, concurrent programming and logic programming. *Prerequisite: Fully admitted Computer Science majors or minors only and grades of "C-" or better in CS 240 and CS 261.*

CS 432. Compilers

3.00

Introduction to the theory and implementation of compilers. Explores the lexical, syntactic, and semantic analysis of high-level language code as well as code generation, optimization techniques, and architectural or operating system considerations. Course

work includes a significant programming component. *Prerequisite: Fully admitted Computer Science majors or minors only and grades of "C-" or better in CS 327 and CS 361.*

CS 442. Logic in Computer Science

3.00

An exploration of some of the many connections between logic and computing, such as the application of classical and temporal logic in program verification, logic and logic programming, decidability, computability, automatic theorem proving, the computational complexity of logic algorithms, and applications of logic in artificial intelligence. A course in discrete mathematics or logic is recommended as preparation for this course. *Prerequisite: Fully admitted Computer Science majors and minors only and junior or senior standing.*

CS 444. Artificial Intelligence

3.00

Students will study the history, premises, goals, social impact and philosophical implications of artificial intelligence. Students will study heuristic algorithms for large state spaces and learn to develop recursive and non-deterministic algorithms. *Prerequisite: Fully admitted Computer Science majors or minors only and a grade of "C-" or better in CS 240*

CS 445. Machine Learning

3.00

An introduction to the field of machine learning. Explores key problems and algorithms in machine learning from both a theoretical and an applied perspective. Specific topics include supervised and unsupervised learning, anomaly detection, text mining and experimental design. Students who have completed BSAN 393, ISAT 341 and MATH 358 may also take this course. *Prerequisite: Fully admitted Computer Science majors or minors only and a grade of "C-" or better in CS 327 and one of the following: MATH 318, MATH 220 or MATH 229.*

CS 446. Software Analysis and Design

3.00

Contemporary software analysis and design methods, tools, notations, techniques, processes, principles and practices. Students solve analysis and design problems alone or in teams and present their work to their peers and the instructor. *Prerequisite: Fully admitted Computer Science majors or minors only and grades of "C-" or better in CS 240 and CS 345.*

CS 447. Interaction Design

3.00

Study of and practice with processes, principles, tools, models and techniques for designing interactions between humans and digital products and systems. Topics include physiological and psychological factors affecting interaction design, interaction design processes, interaction models, styles and paradigms, design notations and representations, prototyping, and interaction design evaluation. *Prerequisite: Fully admitted Computer Science majors or minors and a grade of "C-" or better in CS 345.*

CS 448. Numerical Analysis

3.00

Crosslisted with MATH 448

Study and analysis of algorithms used to solve nonlinear equations and systems of linear and nonlinear equations. Iterative methods for matrices and Newton-type methods. Numerical differential and integral calculus. Programming using a high-level

language and/or software packages. *Prerequisite: Fully admitted Computer Science majors or minors only and MATH 237, MATH 238 or MATH 300; and MATH 248.*

CS 449. Numerical Analysis for Differential Equations

3.00

Study and analysis of numerical techniques to solve ordinary and partial differential equations, including Euler, Runge-Kutta, Picard, finite-difference and finite-element methods. Programming using a high-level language and/or software packages. *Prerequisite: Fully admitted Computer Science majors or minors only and MATH 237, MATH 238 or MATH 336, and MATH 248.*

CS 450. Operating Systems

3.00

Introduction to the design and implementation of modern operating systems. Explores fundamental concepts of operating systems, memory management, virtualization, resource allocation, file systems and system protection mechanisms. Course work includes a significant programming component. *Prerequisite: Fully admitted Computer Science majors or minors only and a grade of "C-" or better in CS 361.*

CS 452. Design and Analysis of Algorithms

3.00

Crosslisted with MATH 452

An introduction to algorithm design techniques and the mathematical analysis of algorithms. Techniques covered include divide-and-conquer, greedy, backtracking, network flow and dynamic programming. The classes P and NP are introduced and intractable problems discussed. This is a proof intensive course. Students may not receive credit for both CS 412 and CS 452. *Prerequisite: CS 327. Discrete Structures IIA grade of "C-" or better in CS 327.*

CS 455. Advanced Computer Networking

3.00

An in depth analysis of networking protocols and tools to capture, analyze and synthesize network traffic. Includes significant programming projects that simulate the operation of network protocols. Introduces the design principles and implementation of client-server network applications. *Prerequisite: Fully admitted computer science majors or minors only with a grade of "C-" or better in CS 361.*

CS 456. Computer Architecture

3.00

Introduction to the design and implementation of modern CPU architectures. Explores hardware-based parallel execution, quantitative performance evaluation, I/O interfacing techniques and hardware descriptor languages. Course work includes a significant programming component. *Prerequisite: Fully admitted Computer Science majors or minors only and a grade of "C-" or better in CS 361.*

CS 457. Information Security

3.00

This course covers the basic issues of information system security. The roles of planning, management, policies, procedures and personnel in protecting the confidentiality, integrity and availability of information are described. Specific threats (malicious code, network attacks and hostile content) and widely used countermeasures (access control, mechanisms, firewalls and intrusion

detection systems) are also discussed. *Prerequisite: Fully admitted Computer Science majors or minors only and CS 361.*
Corequisite: CS 361.

CS 458. Cyber Defense

3.00

A hands-on, lab-based learning experience in which the students engage in a series of mini projects to perform security assessment, penetration testing and hardening of networked systems. Students also participate in a cyber defense exercise. *Prerequisite: Fully admitted Computer Science majors or minors only and grades of "C-" or better in CS 457 and CS 361.*

CS 461. Internetworking

3.00

Crosslisted with ISAT 461

Wide Area Network (WAN) and Metropolitan Area Network (MAN) design. Audio, voice, data and TV transmission over ATM/B-ISDN networks. The SONET signal hierarchy and Q3 standard interface model. Network security. Performance analysis of a given network. *Prerequisite: Fully admitted Computer Science majors or minors only and CS 361 or ISAT 460.*

CS 462. Network Applications Development

3.00

Design and implementation of network-based applications using languages and architectures such as sockets, JAVA, TL1 and CORBA. Concepts in distributed processing, including synchronization of interprocess communication and management of replicated data. Analysis of performance issues related to distributed applications. *Prerequisite: Fully admitted Computer Science majors or minors only and CIS 361.*

CS 470. Parallel and Distributed Systems

3.00

Introduction to parallel and distributed systems. Explores shared memory, cluster, grid, peer-to-peer, and cloud computing models along with parallel software patterns, distributed file systems and performance considerations. Course work includes a significant programming component. *Prerequisite: Fully admitted Computer Science majors or minors only and a grade of "C-" or better in CS 361.*

CS 474. Database Design and Application

3.00

Students study database design and management with emphasis placed on data definition languages, data manipulation languages, query languages and management of the database environment. *Prerequisite: Fully admitted Computer Science majors or minors only and grades of "C-" or better in CS 345 and either CS 159 or equivalent.*

CS 476. Database Administration

3.00

Students learn to administer a database by manipulating physical and logical components of a database management system. Topics include creation of an instance, managing of tables, indexes, privileges, profiles and roles. *Prerequisite: Fully admitted Computer Science majors or minors only and a grade of "C-" or better in CS 474.*

CS 480. Selected Topics in Computer Science

1.00 - 3.00

Topics in computer science which are of interest but not otherwise covered in the regular computer science offerings of the department. Offered only with the approval of the department head; may be repeated for credit when course content changes.

Prerequisite: Fully admitted Computer Science majors or minors only and a grade of "C-" or better in CS 159. Topics selected may dictate further prerequisites; students should consult the instructor prior to enrolling for course.

CS 482. Selected Topics in Information Security

1.00 - 3.00

Topics in information security. Offered only with the approval of the department head; may be repeated for credit when course content changes *Prerequisite: Fully admitted Computer Science majors or minors only and grades of "C-" or better in CS*

240 and CS 261. Topics selected may dictate further prerequisites; students should consult the instructor prior to enrolling for the course.

CS 488. Computer Graphics Applications

3.00

This course develops a computer graphics application package based on standard graphics functions as well as attributes of a graphical user interface. It includes experience in applying interactive computer graphics techniques to industrial problems.

Prerequisite: Fully admitted Computer Science majors or minors only and grades of "C-" or better in CS 240 and CS 261.

CS 497. Independent Study

1.00 - 3.00

An advanced course to give independent study experience under faculty supervision. May be taken multiple times for credit, but no more than three credits may be used in the computer science program graduation requirements. *Prerequisite: Fully admitted Computer Science majors or minors only and junior standing, and permission of the program coordinator.*

CE 490. Special Studies in Continuing Education

1.00 - 3.00

This course is designed to allow exploration of current topics of interest including various trends and issues in a given field of study. *Prerequisite: Continuing Education Students Only*

CRJU 215. Introduction to Criminal Justice

3.00

An introduction to the development of the American criminal justice system from early English beginnings to the present in its three dimensions: police, courts and corrections.

CRJU 225. Ethics in Criminal Justice

3.00

This class offers an overview of ethical issues in the various branches of the criminal justice system, and reviews approaches to establishing and using ethical practices. *Prerequisite: CRJU 215.*

CRJU 301. Advanced Level Special Topics in Criminal Justice

3.00

This course provides an advanced level examination of topics that are of current interest in the field of criminal justice. The class may be repeated for credit when course content changes. *Prerequisite: CRJU 215.*

CRJU 321. Criminalistics

3.00

This course introduces student to crime scene investigation and the major disciplines of modern forensic science. Topics include an examination of the historical background of forensic science in the criminal justice system, an assessment of general principles of the current practice of forensic science, examination of the role of expert testimony and likely interaction(s) of the forensic scientist with other individuals and components of the criminal justice system. *Prerequisite: CRJU 215.*

CRJU 325. Criminology

3.00

Study of the extent, causes and possible deterrents to crime including murder, assault, white-collar offenses and organized crime with attention to the role of the victim and policy implications. *Prerequisite: CRJU 215.*

CRJU 328. Criminal Procedure

3.00

Study of the criminal justice process from arrest through appeal with emphasis upon the rights of the accused including due process, the right to counsel, search and seizure, and the privilege against selfincrimination. *Prerequisite: CRJU 215.*

CRJU 329. Criminal Investigation and Evidence

3.00

Characteristics, legal aspects, organizational objectives, theories and systematic procedure of criminal investigation. Includes a survey of the investigative function, interviewing witnesses, interrogation, physical evidence, the investigation of common serious offenses and the principles of evidence, including the legal rules controlling the presentation of evidence in court.

CRJU 335. Law Enforcement

3.00

This course provides students with an overview of the practice of law enforcement, the legal and social issues associated with this work in the United States. *Prerequisite: CRJU 215.*

CRJU 337. Courts and the Judiciary

3.00

This class offers students an in-depth introduction to the workings of the court system in the United States.

Prerequisite: CRJU 215

CRJU 340. Administration of Justice

3.00

This course is designed to identify unique challenges to administrators of criminal justice organizations. The structures, functions, and processes in the administration of criminal justice organizations is examined. Topics of interest include a variety of

public management theories, the role of leadership, and communication as it relates to criminal justice organization. *Prerequisite: CRJU 215*

CRJU 401. Internship in Criminal Justice

3.00

This course allows students to receive academic credit for work experienced in an agency or organization related to the criminal justice minor. Students should consult the director of the criminal justice minor for assistance in arranging approved internships. *Prerequisite: CRJU 215 and permission of the instructor.*

CDS 301. Special Topics

1.00 - 3.00

This course allows instructors working through recognized university centers or institutes to offer an examination of current topics that are cross disciplinary in nature and not covered elsewhere in the curriculum. The course may be repeated for credit when course content changes.

CDS 401. Internship

1.00 - 3.00

This course allows students to receive academic credit for work experienced in a recognized JMU center or institute. Internships must be approved in advance by the center director and follow the guidelines established by the participating center or institute. Internship is granted at the discretion of the center director. *Prerequisite: Junior or senior standing and permission of the director.*

ENVT 225. Environmental Advocacy and the Psychology of Change

3.00

This is a summer study abroad course in Malta about environmental advocacy. Examines sense of place, nature connectedness and cultural influences on environmental advocacy and environmental movements through interaction with a variety of NGOs and government organizations. Explores the psychology of change and elements of cooperation and collaboration that strengthen efforts to protect the environment and engage citizens in their natural world.

DANC 110. Associate Group Dance Repertory I (0, 4)

1.00

Introduction to group dance experiences through rehearsal, performance, dance technique training and technical theatre practice. *Prerequisite: Dance majors only and concurrent enrollment in a dance technique course.*

DANC 140. Elementary Modern Dance (0, 4)

2.00

Emphasis on modern dance technique and fundamentals of improvisation and choreography. May be repeated for credit.

DANC 142. Elementary Ballet (0, 4)

2.00

Fundamentals of ballet technique, basic vocabulary and combinations. May be repeated for credit.

DANC 143. International Folk Dance (0, 4)

2.00

Traditional folk dance steps and international folk dances. Emphasis on dances from eastern and western Europe, Mexico and Israel. May be repeated for credit.

DANC 144. Ballroom Dance (0, 4)

2.00

Ballroom dance skills including steps, styling and leading, and following for American and Latin ballroom dance forms. May be repeated for credit.

DANC 146. Jazz Dance (0, 4)

2.00

Fundamentals of jazz technique, basic vocabulary and combinations. May be repeated for credit. *Prerequisite: School of Theatre and Dance majors and minors only.*

DANC 147. Tap Dance (0, 4)

2.00

Crosslisted with No change.

Fundamentals of tap dance, basic vocabulary and combinations. May be repeated for credit. *Prerequisite: School of Theatre and Dance majors and dance minors only. Corequisite: No change.*

DANC 210. Associate Group Dance Repertory II (0, 4)

1.00

Practice in group dance experiences through rehearsal, performance, dance technique training and technical theatre practice. *Prerequisite: DANC 110. Associate Group Dance Repertory I (0, 4) Dance majors only and concurrent enrollment in a dance technique course.*

DANC 211. Contemporary Dance Ensemble Repertory I (0, 4)

2.00

Introduction to a modern dance ensemble with performance, choreographic and technical theatre experiences. May be repeated for credit. *Prerequisite: Dance majors only and concurrent enrollment in a dance technique course.*

DANC 212. Virginia Repertory Dance Company I (0, 4)

2.00

Rehearsal, performance and technical theatre experiences in a modern dance company. May be repeated for credit. *Prerequisite: Dance majors only and concurrent enrollment in a dance technique course.*

DANC 240. Intermediate Modern Dance I (0, 4)

2.00

Intermediate skills in modern dance technique. May be repeated for credit. *Prerequisite: None for School of Theatre and Dance majors and dance minors. Non-majors: DANC 140 or permission of the instructor.*

DANC 242. Intermediate Ballet I (0, 4)

2.00

Intermediate skills in ballet technique. May be repeated for credit. *Prerequisite:* DANC 142. *Elementary Ballet (0, 4)*None for School of Theatre and Dance majors and dance minors. Non-majors: DANC 142 or permission of the instructor.

DANC 245. Dance Improvisation (0, 4)

2.00

Development of individual, group and environmental awareness; extension of individual movement vocabulary; and theory and exploration of the interrelationships of the visual and theatre arts through structured improvisation. *Prerequisite:* School of Theatre and Dance majors and dance minors only.

DANC 246. Intermediate Jazz

2.00

Intermediate skills in jazz dance technique, vocabulary and movement combinations. May be repeated for credit. *Prerequisite:* DANC 146. *Jazz Dance (0, 4)*None for School of Theatre and Dance majors and dance minors. Non-majors: DANC 146 or permission of the instructor.

DANC 247. Intermediate Tap

2.00

Intermediate skills in tap dance technique, vocabulary and models of sequencing. May be repeated for credit. *Prerequisite:* DANC 147. *Tap Dance (0, 4)*None for School of Theatre and Dance majors and dance minors. Non-majors: DANC 147 or permission of the instructor.

DANC 248. History of Dance: Renaissance Through the 20th Century

3.00

A survey of dance history in Western civilization from the Renaissance to the present. Emphasis is on the dance idioms of ballet and modern.

DANC 250. The Collaborative Artist: Sophomore Studio

3.00

Crosslisted with THEA 250

The course explores the creative and collaborative processes within the development of performance events. Emphasis is placed upon the role of the artist as a social and artistic force in society. Studio-based creative explorations along with the viewing and discussion of live and recorded performances are integral to the course in order for students to investigate, experience, and devise collaboratively within the context of various performanceforms across multiple disciplines and cultures. *Prerequisite:* School of Theatre and Dance majors only and sophomore standing.

DANC 303. Topics in Dance

1.00 - 3.00

Study of selected timely topics in dance. May be repeated when course content changes. See MyMadison for current topic.

DANC 311. Contemporary Dance Ensemble Repertory II (0, 4)

2.00

Intermediate-level experiences in performance, choreography and technical theatre with a modern dance ensemble. May be repeated for credit. *Prerequisite: DANC 211 or the equivalent and concurrent enrollment in a dance technique course.*

DANC 312. Virginia Repertory Dance Company II (0, 4)

2.00

Crosslisted with No changes.

Advanced rehearsal, performance and technical theatre experience in a modern dance company. May be repeated for credit. *Prerequisite: DANC 212 or the equivalent and concurrent enrollment in a dance technique course. Corequisite: No changes.*

DANC 320. Anatomy and Somatic Studies for the Dancer

3.00

An introduction to the structure and function of the human body, along with an overview of contemporary bodywork theories and techniques essential to the education of dancers. Emphasis will be on the application of knowledge within the context of dance technique. *Prerequisite: Sophomore, junior and senior dance majors only.*

DANC 325. Dance in Community

3.00

This course introduces students to the use of creative movement and dance in community settings. Emphasis is on concepts and skills utilized in designing and implementing movement experiences for diverse populations.

DANC 340. Intermediate Modern Dance II (0, 4)

2.00

Modern dance technique on an accelerated intermediate level. May be repeated for credit. *Prerequisite: DANC 240 or permission of the instructor.*

DANC 342. Intermediate Ballet II (0, 4)

2.00

Ballet technique on an accelerated intermediate level. May be repeated for credit. *Prerequisite: DANC 242 or permission of the instructor.*

DANC 345. Dance Composition I (2, 2)

3.00

Crosslisted with No changes.

Introductory studies of dance composition with focus on the learning and development of choreographic techniques and styles. Compositional movement studies and solo/duet dances will be utilized for exploring and developing the student's individual creativity. *Prerequisite: DANC 245. Dance Improvisation (0, 4) Dance majors only. Corequisite: No changes.*

DANC 346. Intermediate Jazz II/Musical Theatre Styles

2.00

Original description: A continuation of the jazz dance techniques in the dance program at the upper-intermediate level. Primary

focus of this class will be on the study and training of historic and contemporary musical theatre jazz movement. May be repeated for credit

Intermediate Jazz II / Musical Theatre Styles is a continuation of the jazz dance techniques in the dance program at the upper-intermediate level. The primary focus of this class will be on the study and training of historic and contemporary musical theatre jazz movement and its cultural influences. The course may be repeated for credit. *Prerequisite: DANC 246 or permission of the instructor.*

DANC 380. Dance Teaching Practicum

3.00

This course provides pre-service teachers with hands-on teaching experience prior to full-time student teaching. The course provides the opportunity for dance education students to observe certified teachers, plan lessons, reflect on effective teaching strategies, analyze the complexities of teaching and demonstrate professional behaviors that promote student learning. Course work includes topics on classroom management, assessment and effective teaching strategies.

DANC 390. Directed Projects

1.00 - 3.00

Supervised projects related to the study of dance. Credit given for original, individual or group programs beyond the usual course offerings in dance. A suitable completed project or report is required before credit will be given. Teaching assistantships are also registered as directed projects. May be repeated multiple times. *Prerequisite: Dance majors only*

DANC 411. Contemporary Dance Ensemble Repertory III (0, 4)

2.00

Advanced-level experiences in performance, choreography and technical theatre with a modern dance ensemble. May be repeated for credit. *Prerequisite: DANC 211. Contemporary Dance Ensemble Repertory I (0, 4) DANC 311 or the equivalent and concurrent enrollment in a dance technique course.*

DANC 412. Virginia Repertory Dance Company III (0, 4)

2.00

Advanced rehearsal, performance and technical theatre experience in a modern dance company for the professional level dancer. May be repeated for credit. *Prerequisite: DANC 312 or the equivalent and concurrent enrollment in a dance technique course.*

DANC 440. Advanced Modern Dance (0, 4)

2.00

Modern dance technique on an advanced level. May be repeated for credit. *Prerequisite: DANC 340 or the equivalent.*

DANC 442. Advanced Ballet (0, 4)

2.00

Ballet technique on an advanced level. May be repeated for credit. *Prerequisite: DANC 342 or the equivalent.*

DANC 445. Dance Composition II (2, 2)

3.00

Dance composition study involving the development and use of complex choreographic structures with emphasis on creating

small and large group dance compositions, as well as the exploration of contemporary choreographic styles and techniques.
Prerequisite: DANC 345 or permission of the instructor.

DANC 446. Advanced Jazz

2.00

A continuation of the dance technique in the dance program. Advanced skills in jazz technique with special emphasis on the development of performance skills. May be repeated for credit.

DANC 449. The Dance Professional

3.00

Introduction to the professional dance world through lectures, discussions and research. Emphasis will be placed on the preparation of skills and materials necessary to pursue dance as a career. Contemporary dance trends and issues will also be explored. *Prerequisite: Senior dance majors only.*

DANC 471. Stage Management

3.00

Crosslisted with THEA 471

Study and analysis of stage management. Consideration given to the methods and strategies for successful stage management for theatre, dance and other performances. Emphasis on developing management and organizational skills.

DANC 479. Methods of Teaching Dance

3.00

An exploration of teaching creative movement in elementary school and dance in secondary school. Topics include creative movement, dance education and arts integration. This course considers lesson planning, classroom management and assessment in middle and high school. *Prerequisite: Junior and senior dance majors only.*

DANC 480. Student Teaching

3.00 - 12.00

Enables students to apply, in the public school classrooms and the comprehensive child development programs, those skills and attitudes acquired in all components of teacher education. Under the guidance of university supervisors, students are provided activities designed to familiarize them with the classroom teacher's role. *Prerequisite: PSYC 160, EDUC 300 or EDUC 360, appropriate methods courses, and permission of the coordinator of field experiences.*

DANC 490. Special Studies in Dance

1.00 - 3.00

Special studies are independent studies for students to pursue individual research under the guidance of a faculty adviser. Special studies differ from directed projects in that they are more research-based than project-based, although some student mainstage designs might also be undertaken as special studies. Based on the agreed upon workload, this course may be assigned credit hours of 1-3 credits. *Prerequisite: Permission of the dance program coordinator.*

DANC 495. Internship

3.00 - 6.00

Internships may be registered for credit at the discretion of the individual faculty adviser. Overrides for internships must be completed no later than four weeks prior to the internship start date. Based on the agreed upon workload, this course may be assigned credit hours of 3-6 credits. *Prerequisite: Permission of dance area coordinator.*

DANC 499. Honors

1.00 - 3.00

Repeatable for a maximum of 6 credits.

DATA 200. Introduction to Data

3.00

An interdisciplinary introduction to how data is organized, managed, visualized and analyzed across STEM disciplines. Ethical collection and use of data, with real-world test cases. Fundamentals of the tools and applications used in the analysis of data sets.

DATA 358. Introduction to Machine Learning

3.00

This is an introductory course on machine learning with focus on regression and classification methods. The objective is to familiarize students with some basic models and algorithms for machine learning and prepare them for research or industry application of machine learning techniques. Several software libraries and publicly available datasets will be used to illustrate the application of these techniques. The emphasis will be on machine learning algorithms and application, with some broad explanation of the underlying principles. *Prerequisite: MATH 229, or MATH 220 with permission of the instructor.*

ECED 304. Diversity, Equity and Justice in Early Childhood Education

3.00

Considers current problems and issues in early childhood education.

ECED 310. Diversity in Early Childhood Education

3.00

This course guides students in critically examining their own perspectives regarding diversity, seeks to expand students' awareness and understanding of individuals and groups representing differences, and explores pedagogical issues and practices essential for embracing the whole community of learners and families.

ECED 372. Introduction to Early Childhood Education

3.00

Introductory study of the role of the teacher, the role of the learner and the developing child as the basis for designing programs and developing curriculum for children 0-8 with different abilities and from various cultures. *Prerequisite: Admission to teacher education. Corequisite: ELED 208, ELED 271 and LED 366.*

ECED 443. Practicum in Primary Grades

1.00

This two-hour, weekly practicum in first or second grade will provide students with experience in planning and implementing math and literacy experiences for young children. *Prerequisite: Grades of "C" or better in ELED 271, ECED 372 and LED 366. Corequisite: ECED 441, ECED 442; ELED 444 and LED 436.*

ECED 444. Mathematics Content and Pedagogy for Early Childhood Education I

3.00

This is the first of two courses that helps prospective early childhood teachers (PreK-3) develop mathematical content and pedagogical knowledge, skills and understanding to design and implement effective, developmentally appropriate mathematics instruction for grades PreK-3. Emphasis is on children's mathematical learning in the following mathematical strands: Number and Number Sense, Computation and Estimation, and Patterns, Functions and Algebra.

ECED 445. Mathematics Content and Pedagogy for Early Childhood Education II

3.00

This is the second of two courses that helps prospective early childhood teachers (PreK-3) develop mathematical content and pedagogical knowledge, skills and understanding to design and implement effective, developmentally appropriate mathematics instruction for grades PreK-3. Emphasis is on children's mathematical learning of geometry, measurement, data analysis and probability. *Prerequisite: ECED 444.*

ECED 461. Integrated Day Practicum

3.00

LED 366 This all-day, primary-grade practicum allows students to demonstrate their educational decision-making skills through planning, implementing and evaluating appropriate activities for children of diverse interests, needs and abilities. Strategies to assess learning, guide behavior, work with professionals and family involvement are applied in this practicum and accompanying seminar. *Prerequisite: Grades of "C" or better in ECED 361, ECED 372, ECED 441 , ECED 442 ,ECED 443 , LED 366, LED 436 and ELED 444, and current TB test. Corequisite: ECED 464, ELED 462.*

ECED 480. Student Teaching ECED

8.00

Enables students to apply in public school classrooms those understandings, skills and attitudes acquired in all components of teacher education. Under the guidance of university supervisors and cooperating teachers, students engage in full-time teaching responsibilities. *Prerequisite: Teacher Ed Program Flag 03*

ECED 481. Fieldwork in Family and Community

2.00

This fieldwork is designed to provide support for students and reinforces skills and concepts learned during the education program which are being applied during student teaching. Particular attention is given to school and family/community unity. *Prerequisite: Grades of "C" or better in ECED 361, ECED 372, ECED 441 , ECED 442 , ECED 443, ECED 454, ECED 461, LED 366 , LED 436, ELED 444 and ELED 462. Corequisite: ECED 480 .*

ECED 490. Special Studies in Early Childhood Education

1.00 - 3.00

Designed to give capable students opportunities to complete independent research on educational problems under faculty guidance. The plan for the study must be presented to the department head in prescribed form for approval prior to registration.

ECED 499. Honors in Early Childhood Education

1.00

ELED 271. Practicum in Early and Elementary Education

1.00-2.00

Field experiences in grades PK-6 will provide for extensive observation and experience with learners in elementary classrooms and the opportunity to assist teachers in daily activities. Through direct observation and interactions with children in classroom settings, candidates will examine and reflect on how children develop and learn, exploring their own personal attitudes, assumptions and behaviors towards students and their families are influenced by class, cultural and linguistic backgrounds.

Corequisite:

ELED 272.

ELED 272. Introduction to Early and Elementary Education

3.00

This course is designed to introduce elementary education students to teaching children in grades PK-6. Based on developmental and learning theories, the course focuses on building relationships with and among learners, establishing learning environments, guiding behavior, and providing instruction and assessment. Through observations and participation in practicum, seminars, workshops and lectures, students will construct an understanding of how teachers meet the developmental and learning needs of children by planning, implementing and assessing appropriate curriculum and instruction. *Corequisite: ELED 271.*

ECON 122. Introduction to an Economic Topic

1.00

A one-week course offered during winter term or summer that introduces an economic topic/issue that is currently capturing significant interest in today's world.

ECON 200. Introduction to Macroeconomics [C4GE]

3.00

Behavior of systems at the national and international levels. Topics include the methodology of economics as a social science, supply and demand, definition and measurement of important macroeconomic variables, and theoretical models of growth, inflation, interest rates, unemployment, business cycles, stabilization policy, exchange rates and the balance of payments. Not open to students who are enrolled in or who have received credit for ECON 332. May be used for general education credit.

ECON 200H. Introduction to Macroeconomics - Honors [C4GE]

3.00

Behavior of systems at the national and international levels. Topics include the methodology of economics as a social science, supply and demand, definition and measurement of important macroeconomic variables, and theoretical models of growth, inflation, interest rates, unemployment, business cycles, stabilization policy, exchange rates and the balance of payments. May be used for general education credit. *Prerequisite: Honors Student; Not open to students who are enrolled in or who have received credit for ECON 332.*

ECON 201. Introduction to Microeconomics

3.00

Topics covered include supply and demand, consumer choice, economics of the firm and industry, production costs, distribution theory, international trade, comparative economic systems and the philosophy of economics. Not open to students who are enrolled in or who have received credit for ECON 331 .

ECON 222. Contemporary Economic Issues and Policy Alternatives

3.00

Application of elementary economic theory to current economic issues. Special emphasis is placed on public policy alternatives. *Prerequisite: ECON 200 and ECON 201.*

ECON 270. International Economics

3.00

A survey of the relationships among national economies, including trade theory, trade policy, international monetary relations and the balance of payments. Not open to students who are enrolled in or have already received credit in ECON 370 or ECON 372. *Prerequisite: ECON 200 and ECON 201.*

ECON 284. Introduction to Quantitative Analysis in Economics

3.00

Students will learn key mathematical and statistical concepts used in economics. Topics will include linear algebra, optimization, probability theory, joint probability distribution and conditional expectations, and hypothesis testing. Concepts will be emphasized using economic examples. *Prerequisite: MATH 205 and COB 191 or MATH 220.*

ECON 300. Special Topics in Economics

3.00

Examination of special topics in theoretical or applied economics not covered in the current economics curriculum. Specific topics to be determined by the instructor. *Prerequisite: ECON 200 and ECON 201 or equivalent.*

ECON 302. History of Economic Thought

3.00

Major contributions within the history of economic thought are studied in relation to both the historical circumstances within which they arose and the role each played in shaping contemporary, competing economic doctrines. *Prerequisite: ECON 200 and ECON 201.*

ECON 305. Environmental Economics

3.00

An analysis of the problems of the environment, their causes and alternative proposed methods of solution. Air and water pollution will be stressed as case studies of environmental problems. *Prerequisite: ECON 201.*

ECON 310. Economic History of the United States

3.00

A survey of the economic growth and development of the United States from Colonial times to the present. *Prerequisite: ECON 200 and ECON 201.*

ECON 312. Comparative Economic Systems

3.00

An examination of the distinguishing characteristics, institutions and performances of the various types of major economic systems in the world today. *Prerequisite: ECON 200 and ECON 201.*

ECON 325. Money and Banking

3.00

Crosslisted with FIN 325

Examines the economic role of money, banking and monetary policy within current institutional settings and under alternative theories explaining the interrelationships between money, the financial system and economic activity. *Prerequisite: ECON 200 and ECON 201.*

ECON 326. Public Finance

3.00

Introduction to the field of public finance including theories and principles of taxation, government expenditure, public debt and fiscal administration. Studies interrelationships between federal, state and local finance, shifting and incidence of tax, and the burden of public debt. *Prerequisite: ECON 200 and ECON 201.*

ECON 327. Game Theory

3.00

Examines interdependent decision making in economics and other social sciences and covers both non-cooperative and cooperative games. Topics may include applications of game theory to industrial organization, law and economics, public choice, political economy, evolutionary biology, international affairs and theories of justice. *Prerequisite: ECON 200 and ECON 201 or permission of the instructor.*

ECON 328. Behavioral Economics

3.00

An introductory course in behavioral economics that combines insights from psychology with economics. Using data from field and lab experiments, we will examine the explanatory power of the standard economic model and learn new frameworks that incorporate psychologically realistic assumptions grounded in observed behavior. Among the topics studied are decision-making under uncertainty, intertemporal choice and others regarding preferences. The course will conclude by examining implications this approach to economic analysis has for public policy. *Prerequisite: ECON 201 .*

ECON 329. Health Economics

3.00

This course explores the structure, conduct, and performance of hospitals, physician practices, pharmaceutical and medical device manufacturers, and long-term care facilities. The demand for healthcare and insurance is presented using economic theories of risk and uncertainty. Economic evaluation of healthcare treatments and contemporary policies are examined. *Prerequisite: ECON 200 and ECON 201.*

ECON 331. Intermediate Microeconomic Theory

3.00

Intermediate analysis of the determination of price, resource allocation and product distribution in a free enterprise economy. *Prerequisite: "C" or better in ECON 200, ECON 201 and either MATH 205, MATH 231, MATH 235 or ISAT 151 and either ECON 284 (BA/BS majors) or COB 291 (BBA majors) or MATH 318 or quantitative finance major status.*

ECON 332. Intermediate Macroeconomic Theory

3.00

Intermediate-level analysis of the major approaches to the determination of economic aggregates, with emphasis given to structuring a common analytic framework.

Prerequisite: "C" or better in ECON 200, ECON 201 and either MATH 205, MATH 231, MATH 235 or ISAT 151 and either ECON 284 (BA/BS majors) or COB 291 (BBA majors) or MATH 318 or quantitative finance major status.

ECON 340. Economics of Natural Resources

3.00

Emphasizes availability of exhaustible resources and optimum utilization rates. Examines questions of intertemporal allocation and costs of growth. *Prerequisite: ECON 200 and ECON 201.*

ECON 345. Industrial Organization

3.00

An examination of contemporary U.S. industrial concentration both in the aggregate and within particular industries with emphasis on public policy implications. Alternative theories of the firm are considered in relation to different market structures. *Prerequisite: ECON 200 and ECON 201.*

ECON 360. Labor Economics

3.00

Study of the economics of labor markets. Attention is given to the structure and operation of labor markets, wage determination, employment, unions, and contemporary labor problems and policies. *Prerequisite: ECON 200 and ECON 201.*

ECON 365. Economic Development

3.00

A study of the characteristics of under-development, theories of economic development and the underlying causes for varying standards of living among the world's people. Considerable time will be spent on studying social and cultural factors that influence economic growth and their potential effect on the economic progress of the less-developed countries. *Prerequisite: ECON 200 and ECON 201.*

ECON 370. International Trade and Trade Policies

3.00

An examination of the classical and modern theories of international trade, the effects of such trade on the domestic economy, the effects of barriers to free trade and an appraisal of U.S. commercial policy since 1948. *Prerequisite: ECON 200 and ECON 201.*

ECON 372. International Finance and Payments

3.00

Crosslisted with FIN 372

Examines international financial markets, instruments and institutions; determination of spot and forward exchange rates, interest arbitrage, hedging and speculation; and alternative policies for achieving equilibrium in international payments. *Prerequisite: ECON 200 and ECON 201.*

ECON 382. Urban Economics

3.00

A detailed examination of the economic aspects of urbanization with emphasis on metropolitan land use and location theory. Urban problems considered include housing, poverty, labor markets and municipal finances. *Prerequisite: ECON 200 and ECON 201.*

ECON 384. Mathematical Economics

3.00

Course will provide basic mathematical tools for microeconomic and macroeconomic analysis. Topics covered include linear algebra, univariate and multivariate differentiation, economic interpretation of the derivatives, constrained and unconstrained optimization, expected utility model, and dynamic analysis of economic models. *Prerequisite: ECON 200, ECON 201, and either ISAT 151, MATH 205 or MATH 235.*

ECON 385. Econometrics

3.00

Course discusses construction of models based on economic theory including identification of variables, development and testing of hypotheses for single- and multi-equation systems. *Prerequisite: "C" or better in ECON 200, ECON 201 and COB 191 or MATH 220 and MATH 205, MATH 231, MATH 235 or ISAT 151 and either ECON 284 (BA/BS majors) or COB 291 (BBA majors) or MATH 318.*

ECON 394. Economics Internship

3.00

Academic credit for an approved internship experience. Registration for the course must be concurrent with the internship. An application showing how all requirements for the internship will be met must be approved prior to registration. May be taken on a credit/no credit basis only. *Prerequisite: ECON 200 and ECON 201.*

ECON 399. Career Preparation in Economics

0.00

Students participate in a number of activities designed to enhance career preparedness and job search outcomes in economics as approved by the economics program (including attending workshops and registering to be informed of job opportunities). *Prerequisite: ECON 331, ECON 332, ECON 385 and senior standing.*

ECON 400. Advanced Topics in Economics

3.00

Examination of special topics in theoretical or applied economics not covered in the current economics curriculum. Specific topics to be determined by the instructor. *Prerequisite: ECON 331 and ECON 332 or permission of the instructor.*

ECON 405. Political Economy

3.00

Evaluation and critique of mainstream and nontraditional economic paradigms. The interaction of economics and politics in the United States as it affects the distribution of wealth and domestic and international economic policies. *Prerequisite: ECON 200, ECON 201, and junior or senior standing.*

ECON 426. Theory of Public Choice

3.00

Examines the justification for and nature of public sector activity in a market-based mixed economy. Emphasis is placed on theories of market failure, voting models, conditions of production and provision in the public sector, and models of bureaucratic behavior. *Prerequisite: ECON 326 or ECON 331.*

ECON 430. Monetary Theory

3.00

Examines alternative theories of the relationships between money, interest rates, price levels, employment and output in order to assess the effectiveness of monetary policy for economic stabilization. *Prerequisite: ECON 332 and either MATH 205 or MATH 235.*

ECON 431. Advanced Microeconomic Theory

3.00

Examines theories of general equilibrium and the distribution of income, welfare economics, capital theory and information theory. *Prerequisite: ECON 331, ECON 332 and either MATH 205 or MATH 235.*

ECON 432. Advanced Macroeconomics

3.00

Study of macroeconomics at an advanced level. Particular attention will be given to the theory and models of economic growth as well as the potential for policies to improve growth. Topics may also include the theory of economic fluctuations within the growth paradigm and comparative analysis of the U.S. and other economies with respect to growth. *Prerequisite: ECON 332 and either MATH 205 or MATH 235.*

ECON 455. Economics of Regulated Industries

3.00

A study of the rationale, methods and impact on industry behavior of government regulations including public utility regulation and antitrust policies relating to monopoly and competition in the United States. *Prerequisite: ECON 385 or permission of instructor; and ECON 331 or ECON 345 (to use ECON 345, students must have permission of the ECON 455 instructor). ECON 331. Intermediate Microeconomic Theory*

ECON 475. Regional Economics

3.00

A study of local and subnational economics viewed as integral parts of a unified system. Emphasis will be given to the basic economic forces associated with regional growth and decline and related public policy considerations. *Prerequisite: ECON 200 and ECON 201.*

ECON 483. Applied Time Series Analysis

3.00

This is an advanced level class in Econometrics with an emphasis on time series techniques. This course covers a broad range of time series methods commonly used in research and industry for generating short-term forecasts for important economics and financial variables. Some of the topics covered are time series decomposition methods, smoothing methods, ARIMA, ARCH/GARCH and VAR. *Prerequisite: ECON 384 (or professor approval) and a minimum grade of "B-" in ECON 385.*

ECON 485. Advanced Econometrics

3.00

Theory and application of statistical techniques to study empirical relationships among economic variables. This course will cover a range of econometric techniques to estimate economic models including panel data, limited dependent variable, and simultaneous equation models. In addition, the course will cover the assembly and analysis of requisite data sets, and the preparation and presentation of empirical results. *Prerequisite: Minimum grade of "B-" in ECON 385.*

ECON 487. Economic Consulting

3.00

A research-oriented, senior-level course that provides students an opportunity to integrate theoretical knowledge, quantitative techniques and writing skills through research on a set of simulated consulting projects. *Prerequisite: ECON 331, ECON 332, ECON 385 and senior standing.*

ECON 488. Senior Capstone Seminar in Economics

3.00

This course is a writing-intensive seminar offering a student the opportunity to integrate many of his/her undergraduate studies in economics. Its substantive content will emphasize applying the methods of theoretical and empirical analyses employed by all economists. The seminar will be structured so as to contain embedded assessment measures of the learning objectives specified by the department of economics, including those related to command of basic economic theory and of quantitative methods used in quantifying empirical relationships and testing hypothesis. *Prerequisite: Senior standing and completion of each of the following courses with a grade of at least "C": ECON 331, ECON 332 and ECON 385.*

ECON 490. Special Studies in Economics

1.00 - 3.00

Designed to give capable students in economics an opportunity to complete independent study under faculty supervision. Admission by recommendation of the instructor and written permission of the director of economics prior to registration. May not be used toward fulfillment of the 400-level requirement for a major in economics.

ECON 499A. Honors

1.00 - 3.00

Year course. See catalog section "Graduation with Honors."

ECON 499B. Honors

3.00

ECON 499C. Honors

2.00

EDUC 100. The Study of the Future: An Interdisciplinary Approach

3.00

Introduces the students to an interdisciplinary study of the future within the context of education. Various topic areas, such as population, science/technology, lifestyle, economics, international relations, energy and religion will be explored in terms of future trends and how education responds to these trends and their impacts.

EDUC 165. Social Foundations of Exceptionalities

3.00

This course examines the social, cultural, and educational contexts - through the lifespan - of individuals with exceptionalities. Specific focus will be given to the study of historical perspectives, models, theories, philosophies and trends in the field of special education. In addition, the role of culture, environment, family and individual differences will be explored.

EDUC 300. Foundations of American Education

3.00

A study of the practices and issues that affect American education. Consideration is given to such topics as philosophical approaches to education, history of American education, and the organizational and cultural aspects of schools which influence educational practices.

EDUC 303. Foundations of Curriculum and Instruction

3.00

This is an introductory course that examines the historical, sociological, philosophical and psychological perspectives that influence and support the curricular and instructional structures of general education. Throughout the course the implementation of those structures through a systematic process of planning for effective classroom instruction and evaluation will be examined. Connections to how they reflect an understanding of various models of learning and cognition and their implications for educational practice will be established. As part of this course students will visit and observe a variety of special education classrooms and curriculum in order to better understand how they are similar and different to general education. *Prerequisite: EDUC 300 and EXED 200.*

EDUC 310. Teaching in a Diverse Society

3.00

This course will examine how personal and professional values, attitudes, beliefs and behaviors affect teaching and learning. The pre-service teachers will develop an understanding of similar unique characteristics of Pre-K to 12 grade students and their families, including culture, race, ethnicity, heritage language and learning abilities, gender socialization and sexual orientation. *Corequisite: MIED 311 and LED 312 for middle students.*

EDUC 370. Instructional Technology

3.00

Crosslisted with LTLE 370

This course introduces educators to the concept of content knowledge, pedagogical knowledge and technological knowledge acting together as one unit to provide successful learning opportunities with educational technology. Learners will develop competencies that will enable them to appropriately select and integrate technology into the teaching and learning process.

EDUC 401. Problems in Education

1.00 - 3.00

Workshop experiences for the development and training of teachers. *Prerequisite: EDUC 360 and permission of the program coordinator.*

EDUC 455. Perspectives in Environmental Education

3.00

This course illuminates the role of educators in presenting environmental topics in learning communities. Activities will include principles for formal classrooms and other educational settings, such as museums, parks and zoos. In a local classroom /learning environment, participants will collaborate with practicing educators to teach learners about local environmental topics.

EDUC 480. Student Teaching

6.00 - 12.00

Enables students to apply, in the public school classrooms and the comprehensive child development programs, those skills and attitudes acquired in all components of teacher education. Under the guidance of university supervisors, students are provided activities designed to familiarize them with the classroom teacher's role. *Prerequisite: PSYC 160, EDUC 300 or EDUC 360, appropriate methods courses, and permission of the coordinator of field experiences.*

EDUC 482. Professional Development, Partnership and Advocacy

1.00 - 3.00

Students examine opportunities for professional development from professional associations, universities and other organizations across Pk-16. Strategies to build partnerships with colleagues, families and communities are presented. Important social and political issues affecting education of majority and minority students and models of advocacy for students and their families are presented.

EDUC 490. Special Topics in Education

1.00 - 4.00

In-depth examination of selected topics which are of current importance in the field of education. Offered only with approval of School of Education director. May be repeated for credit when course content changes. *Prerequisite: At least junior standing and consent of the instructor.*

EDUC 499A, B, C. Honors

1.00 - 6.00

Crosslisted with EDUC 499B , EDUC 499C

Independent research topic initiated and completed by qualified upper-division students. See catalog descriptions entitled "Graduation with Distinction" and "Graduation with Honors."

ELED 208. Child Development: Birth Through Adolescence

3.00

Skills for observing, recording and interpreting the behavior of children ages three through 12 will be developed so that adult intervention and guidance is appropriate and meaningful. *Corequisite: ECED 372 and ELED 271.*

ELED 310. Diversity in Elementary Education with Service Learning

3.00

This course guides students in critically examining their own perspectives regarding diversity in our society. Through this course, students will expand their awareness and understanding of individuals and groups apparently different from themselves. Students will explore pedagogical issues and practices in the classroom that embrace the whole community of learners and their families. *Prerequisite: Admission to teacher education. Corequisite: ECED 372, ELED 208, ELED 321 and LED 366.*

ELED 321. Practicum with a Focus on Learners and Learning

1.00-3.00

This field experience, taken in the fall of junior year, provides candidates with a classroom of students and a mentor teacher with whom to practice building relationships with learners and conduct extensive observations of learners and learning, as well as practice the teaching of content related to their concurrent methods courses (either language arts, mathematics and science OR language arts, mathematics and social studies) with small groups of students. Accompanying monthly seminars will focus on reflecting on themes and experiences in the field and making content connections to methods courses. *Prerequisite: Admission to teacher education.*

ELED 322. Practicum with a Focus on Curriculum Integration and Guiding Behavior

1.00-3.00

This field experience, taken in the spring of junior year, provides candidates with a classroom of students and a mentor teacher with whom to practice the teaching of content related to their concurrent methods courses (either language arts, mathematics and science OR language arts, mathematics and social studies) with small groups of students as well as in full class contexts. The accompanying monthly seminar explores the integration and construction of meaningful curriculum in elementary education contexts and in classroom management as well as reflection along with field-based partners. *Prerequisite: Admission to teacher education.*

ELED 332. Children and Science

3.00

This course is a study of content, processes, pedagogy and materials for teaching science in the elementary classroom. Knowledge of cognitive development as applied to the selection of content and methodology for elementary learners will be examined. *Prerequisite: ELED 208, ECED 372, ELED 310, ELED 321 and LED 366. Corequisite:*

ELED 333. Children and Mathematics I

3.00

The first of two courses that provides students with knowledge, skills and understanding to design and implement effective, developmentally appropriate mathematics instruction for grades PreK-6. This course will focus on mathematical instruction connected the following mathematical strands: Number and number sense, computation and estimation, and patterns, functions and algebra.

ELED 334. Children and Social Studies

3.00

This course focuses on the content, processes, pedagogy and materials for teaching social studies in the elementary classroom. Knowledge of cognitive development as applied to the selection of content, methods, materials and strategies for organizing the learning environment for elementary learners will be examined. *Prerequisite: Admission to Teacher Education, ELED 208*
Corequisite: ELED 322, ELED 332, ELED 433 and LED 436.

ELED 343. Children and Mathematics II

3.00

This is the second course in a series providing students with knowledge, skills and understanding to design and implement effective, developmentally appropriate mathematics instruction for grades PreK-6. Emphasis is on children's mathematical learning about geometry, measurement, data analysis and probability.

ELED 433. Children and Mathematics: Number, Operations, Algebraic and Geometric Reasoning

3.00

The first of two courses that provides students with knowledge, skills and understanding of design and implementation for effective, developmentally appropriate mathematics instruction for grades PreK-6. Emphasis is on children's mathematical learning and pre-numerical stages through the acquisition of advanced numerical processes and operations and connections to geometric and algebraic reasoning. *Prerequisite: MATH 107, MATH 108, MATH 207 and LED 366. Corequisite: LED 436, ELED 322, ELED 332 and ELED 334.*

ELED 443. Children and Mathematics II

3.00

The second of two courses that provides students with knowledge, skills, and understanding to design and implement effective, developmentally appropriate mathematics instruction for grades PreK-6. Emphasis is on children's mathematical learning about geometry, measurement, data analysis and probability. *Prerequisite: MATH 108. Corequisite: ELED 332.*

ELED 450. Planning Instruction and Assessment

3.00

Elementary education teacher candidates will learn the process of planning, implementing curriculum, and using instructional strategies and assessments that promote and monitor students' understanding of content beyond memorization. Students will design units of instruction that utilize evidence-based practices for active engagement strategies, specifically for providing an inclusive environment for a diverse student population. Students will gain the knowledge and skills necessary to use assessments that allow for data-driven instructional decisions and inform subsequent teaching and learning.

ELED 455. Home, School, Communities

3.00

Study of the role of the teacher in relating to and working with families, school personnel and communities. Methods of involving stakeholders and providing effective communication among groups are emphasized. Resources for supporting parents and engaging community stakeholders are examined. *Prerequisite: ELED 322.*

ELED 480. Student Teaching in Elementary Education

8.00

This internship provides a context in which to demonstrate and integrate the skills, knowledge and dispositions that are essential for success as an elementary classroom teacher. Under the guidance of a university supervisor students are expected to reflect on the teaching role as they assume the full responsibilities of teacher in grade PreK-6. Students majoring in elementary education must complete this course twice for a total of 16 credit hours. *Prerequisite: ELED 321 and ELED 322.*

ELED 490. Special Studies in Elementary Education

1.00 - 3.00

Designed to give students opportunities to complete independent research on educational problems under faculty guidance. The plan for the study must be presented to the department head in prescribed form for approval prior to registration. *Prerequisite: Teacher Ed Program 02 Flag*

ENGR 101. Engineering Opportunities

1.00.

This is the introductory course in the engineering curriculum. In this course, students work in teams to identify problems in order to create opportunities for the betterment of society using a design process. Students are introduced to the Madison engineering values and curriculum, and they have opportunities to relate them to personal and academic goals. Techniques and tools for developing a professional identity will be shared. The activities in the course are aimed at assisting students in successfully making the transition from high school to college.

ENGR 112. Engineering Decisions

3.00

This course focuses on teaching first year engineering students the processes associated with making decisions in the field of engineering. Topics of coverage include problem solving, engineering fundamentals, ethics and society, and analytical and physical modeling.

ENGR 212. Statics and Dynamics (3,1)

4.00

This course provides the fundamental and governing principles of particles and rigid bodies for the analysis of these structures. Topics include equilibrium of particles and rigid bodies, force and moment vectors, kinematics, and dynamics of particles, work and energy. An included laboratory component provides reinforcement of course material through experiments. *Prerequisite: Grade of "C" or better in ENGR 112; grade of "C-" or better in each of PHYS 240, PHYS 240L and MATH 237.*

ENGR 221. Management of Technology I: Product Development and Entrepreneurial Engineering

3.00

This course provides the fundamental and governing principles of management of technology including general business functions of management, marketing, finance, accounting and operations; system analysis skills; and an introduction to project management. Students develop an understanding and appreciation for the importance of technology and innovation in organizations.

Prerequisite: Grade of "C" or better in ENGR 112 and ENGR 231. Corequisite: ENGR 232.

ENGR 231. Engineering Design I

2.00

This course provides students with an overview of the engineering design process with a focus on early phase design including: understanding and detailing customer requirements, exploring the engineering solution space and down-selecting conceptual design solutions. This course includes significant team and project-based components and provides an introduction to interpersonal communication skills that lead to effective problem solving, idea generation and decision making. *Prerequisite: Grade of "C" or better in ENGR 112, grade of "C-" or better in MATH 236. Corequisites: PHYS 240 and PHYS 240L.*

ENGR 232. Engineering Design II

2.00

This course provides students with an overview of the engineering design process with a focus on late phase design including: embodiment, modeling and prototyping, and testing and refinement of design solutions. This course includes significant team and project-based components and provides an introduction to interpersonal communication skills that lead to effective problem solving, design embodiment and decision making. *Prerequisite: Grade of "C" or better in ENGR 231.*

ENGR 280. Projects in Engineering

1.00 - 4.00

Research projects, design projects, or special topics in engineering which are of interest to the lower-division student. May be repeated for credit when course content changes. Projects or topics selected may dictate prerequisites. Students should consult the instructor prior to enrolling in the course. *Prerequisite: Permission of the instructor.*

ENGR 301. Engineering Bridge Course for Transfer Students

3.00

This course provides transfer students with an introduction to the JMU engineering program. The purpose is to familiarize our students with our curriculum and sustainability vision. The course will also provide design instruction while introducing transfer students to the specific software tools and machine tools they will use over the remainder of their curriculum. *Prerequisite: Permission of the instructor.*

ENGR 311. Fluid Mechanics

4.00

This course focuses on principles applicable to fluid mechanics. Coverage includes fluid statics as well as the principles of internal and external flows. Wide-ranging applications of these principles to fluid systems across engineering disciplines are emphasized. Reinforcement of course material is provided through experiential learning opportunities and in-depth problem solving. *Prerequisite: Admission to engineering major.*

ENGR 312. Thermodynamics and Heat Transfer

4.00

This course focuses on the fundamental principles of thermodynamics and heat transfer in engineering systems. It builds on mass, energy, and momentum balance concepts covered in ENGR 311 and incorporates the laws of thermodynamics in addition to the basic mechanisms of 1-dimensional heat transfer. Application to thermal-fluid systems across engineering disciplines is emphasized and reinforcement of course material is provided through experiential learning opportunities and in-depth problem solving. *Prerequisite: Grade of "C" or better in ENGR 311.*

ENGR 313. Circuits and Instrumentation

4.00

This course presents the fundamentals of circuit analysis and the measurement of physical phenomena. Circuit analysis topics include Kirchhoff's laws, 1st and 2nd order circuits, and AC systems. Instrumentation principles and common measurement devices are discussed. Laboratory investigations provide exposure to common electronic measurement equipment and experience with electronic design and prototyping. *Prerequisite: Admission to engineering major.*

ENGR 314. Materials and Mechanics

4.00

This course explores the fundamentals of materials science, materials engineering and mechanics of materials. Topics include process-structure-property relationships, crystalline structures, mechanical properties, strength of materials and an introduction to materials processing. An included laboratory component provides reinforcement of course material through experiments. *Prerequisite: Admission to engineering major.*

ENGR 322. Engineering Management II: Engineering Project Management

3.00

This course provides the fundamentals of project management. Students will identify project requirements, develop a work breakdown structure and network diagram, and apply resources to develop a project schedule. Knowledge is demonstrated

through proper application of the decision tools available to project managers, such as determining a project's current status for cost, schedule, and performance. Students will analyze why a project's current status is not according to plan, develop an action plan to resolve cost and scheduling challenges, and project final cost, completion date, and performance. A computer-based project management system is used for managing projects. Completion of this course fulfills the requirement for 23 formal education hours for the Certified Associate in Project Management (CAPM) eligibility. *Prerequisite: Admission to the engineering major. Corequisite: ENGR 331.*

ENGR 331. Engineering Design III

3.00

This course emphasizes methods and practice in problem discovery, contextualization, stakeholder analysis, requirement and constraint identification, and design codes and standards. Application of course content occurs within the context of the first semester of a four-semester project experience. *Prerequisite: Admission to engineering major. Corequisite: ENGR 322.*

ENGR 332. Engineering Design IV

3.00

This course emphasizes advanced design concept generation, concept selection and tradeoff analysis methods. Application of course content occurs within the context of the second semester of a four-semester project experience. *Prerequisite: Grade of "C" or better in ENGR 331.*

ENGR 411. Fundamentals of Sustainable Engineering and Design

3.00

This course is the first in a two-course sequence that provides a foundation in evaluating sustainable design and engineered systems. This course focuses on environmental systems and single factor analysis of common indicators of sustainability. The material presented supports an understanding of the environmental, social and economic impacts of design and technology. *Prerequisite: CHEM 132.*

ENGR 412. Sustainable Engineering and Design II

3.00

This course is the second in a two-course sequence that provides a foundation in evaluating sustainable design and engineered systems. This course focuses on industrial design and systems and multi-factor analysis of common indicators of sustainability. The material presented furthers the understanding of the environmental, social and economic impacts of design and technology. *Prerequisite: ENGR 411.*

ENGR 413. Systems Analysis

3.00

This course focuses on the concepts of systems thinking and analysis for complex engineered systems. Students will develop basic knowledge and tools to identify a system, decompose it into parts, define interactions, perform analysis and apply control measures if necessary. Application of computational tools and mathematical modeling will be emphasized. *Corequisite: ENGR 431.*

ENGR 431. Engineering Design V

3.00

Course instruction focuses on tools and techniques for design embodiment, testing and refinement. Application of course content occurs within the context of the third semester of a four-semester project experience. *Prerequisite: Grade of "C-" or better in ENGR 332.*

ENGR 432. Engineering Design VI

3.00

Course instruction focuses on reliability and final design communication and presentation. Application of course content occurs within the context of the fourth semester of a four-semester project experience. *Prerequisite: Grade of "C-" or better in ENGR 431.*

ENGR 440. Mechatronics

3.00

Mechatronics is the synergetic integration of mechanical, electrical, computer and control systems to create intelligent systems. This course explores mechatronics with an emphasis on sensors and automation. Students will learn and apply theoretical and practical knowledge of how sensors work and interface with systems to enable automation. Additional topics covered include industrial controller programming, actuators, signal conditioning and interface circuits, and industrial robotics. *Prerequisite: ENGR 313 or approval of the instructor.*

ENGR 449A. Honors Engineering Design IV

2.00

This course is fourth in the six-course 10-credit developmental design sequence and first in the three-course 6-credit Honors Capstone project. This project-based course provides instruction in 1) Holistic design principles 2) Aesthetics and human interface in design, 3) Structured and unstructured problem solving, 4) Collaborative design, 5) Writing and communications, 6) Product modeling and Analytical prototyping.

ENGR 460. Solid Mechanics

3.00

This course introduces fundamentals of solid mechanics including stress elements and Mohr's circle for stress and strain. This course also introduces related design concepts including stress concentrations and comparison of stress values to failure criteria. The course is enhanced by a laboratory component that is focused on strain gage installation and application. *Prerequisite: ENGR 314.*

ENGR 471. Water in Africa

3.00

This course has a three-part focus: cross cultural training, promoting health in developing countries and using appropriate technologies for eradicating water-related illnesses. Project teams use course content as the foundation for developing and implementing service projects. This course is a service-learning course and addresses issues of access to water in West Africa.

ENGR 472. Biological Treatment Processes and Reactor Design

3.00

For engineering and environmental science students interested in biological reactor design. Water, wastewater and air treatment are emphasized. Students must be proficient in mathematics, chemistry and thermal sciences. Quantitative relationships are derived for characterizing water quality, designing biological reactors and modeling treatment systems. Systems are described by mass and energy balances that relate pollutant removal efficiency to process input parameters. *Prerequisite: CHEM 131, CHEM 131L, and either MATH 231 or MATH 235.*

ENGR 474. Physical Chemical Treatment Processes

3.00

For engineering and environmental science students interested in physical/chemical waste treatment. Wastewater, groundwater, air and hazardous waste treatment is emphasized. Students must be proficient in mathematics, chemistry and thermal sciences. Quantitative relationships are derived for characterizing wastes, designing treatment processes, and modeling treatment systems. Systems are described by mass and energy balances that relate pollutant removal efficiency to process input parameters.

Prerequisite: CHEM 131, CHEM 131L, and either MATH 231 or MATH 235.

ENGR 476. Principles of Process Engineering

3.00

This course will introduce basic principles and techniques used in process engineering. The major emphasis is on understanding materials and energy flows in simple and complex process systems. Quantitative models and equilibrium concepts will be developed and applied to assess product quality, economics, safety and environmental issues. This course should be of interest to students looking toward a career or graduate studies in chemical, environmental, biochemical, petrochemical and manufacturing engineering.

ENGR 478. Water Resources Engineering

3.00

This course will provide an introduction to basic engineering principles used in both water supply management and water excess management. Hydrologic and hydraulic processes will be investigated using the fundamentals of fluid mechanics. Specific emphasis will be placed on water sources flows, distribution and control. *Prerequisite: ENGR 311.*

ENGR 480. Advanced Projects in Engineering

1.00 - 4.00

Research projects, design projects or special topics in engineering which are of interest to the upper-division student. May be repeated for credit when course content changes. Projects or topics selected may dictate prerequisites. Students should consult the instructor prior to enrolling in the course. *Prerequisite: Permission of the instructor.*

ENGR 498. Advanced Topics in Engineering

1.00-3.00

This course is designed to provide upper-division students with the opportunity to explore engineering topics in greater depth. The specific topic of interest may dictate prerequisites. Students should consult the instructor prior to enrolling in the course.

ENGR 498H. Advanced Topics in Engineering Honors

3.00

This course is designed to provide upper-division students with the opportunity to explore engineering topics in greater depth. The specific topic of interest may dictate prerequisites. Students should consult the instructor prior to enrolling in the course.

ENGR 499A. Engineering Honors I

1.00

First course in a three-course sequence. Student generates an idea for and writes a proposal for an independent research project that meets the requirements set forth by the Honors program and the Department of Engineering. Student must identify and analyze an engineering-based problem, identify potential solutions, recommend an approach and prepare a written proposal.

ENGR 499B. Honors Engineering Design II

1.00 - 3.00

Second course in a three-course sequence. Student completes the research for and prepares an oral and written presentation of their results for an independent research project that meets the requirements set forth by the Honors program and the Department of Engineering. Student completes and presents (in written and oral form) the project described in his or her proposal from ENGR 499A. *Prerequisite: ENGR 499A or permission of the engineering honors director/department head.*

ENGR 499C. Honors Engineering Design III

2.00

Third course in a three-course sequence. Student completes the research for and prepares an oral and written presentation of their results for an independent research project that meets the requirements set forth by the Honors program and the Department of Engineering. Student completes and presents (in written and oral form) the project described in his or her proposal from ENGR 499A. *Prerequisite: ENGR 499B.*

ENG 221. Literature/Culture/Ideas [C2L]

3.00

Crosslisted with ENG 221H

This course will take a thematic approach to literature by examining multiple literary texts that engage with a common course theme concerned with the human experience. Themes address cultural, political, social, religious or philosophical aspect ideas through literature. Specific topics will vary. May be used for general education credit.

ENG 222. Genre(s) [C2L]

3.00

Crosslisted with ENG 222H

An examination of representative works in a literary genre, in a set of related literary subgenres, or in both a literary genre and one or more closely connected genres in other humanities disciplines. May be used for general education credit.

ENG 222H. Genre(s) [C2L]

3.00

Crosslisted with ENG 222

An examination of representative works in a literary genre, in a set of related literary subgenres, or in both a literary genre and one or more closely connected genres in other humanities disciplines. May be used for general education credit.

ENG 235. Survey of English Literature: From Beowulf to the Eighteenth Century [C2L]

3.00

A general survey presented chronologically. May be used for general education credit.

ENG 236. Survey of English Literature: Eighteenth Century to Modern [C2L]

3.00

A general survey presented chronologically. May be used for general education credit.

ENG 239. Studies in World Literature [C2L]

3.00

Introduction to masterpieces of world literature with emphasis on nonWestern literature. (May be focused regionally or topically). May be used for general education credit.

ENG 239H. Studies in World Literature - Honors [C2L]

3.00

Introduction to masterpieces of world literature with emphasis on non-Western literature. (May be focused regionally or topically.) May be used for general education credit. *Prerequisite: Honors Students*

ENG 247. Survey of American Literature: From the Beginning to the Civil War [C2L]

3.00

A general survey presented chronologically. May be used for general education credit.

ENG 247H. Survey of Amer Lit: From the Beginning to the Civil War - Honors [C2L]

3.00

A general survey presented chronologically. May be used for general education credit. *Prerequisite: Honors Students*

ENG 248. Survey of American Literature: From the Civil War to the Modern Period [C2L]

3.00

A general survey presented chronologically. May be used for general education credit.

ENG 248H. Survey of Amer Lit: From the Civil War to the Modern Period - Honors [C2L]

3.00

A general survey presented chronologically. May be used for general education credit. *Prerequisite: Honors Students*

ENG 260. Survey of African-American Literature [C2L]

3.00

Survey of literature by African-American authors from the 18th century to the present. May be used for general education credit.

ENG 260H. Survey of African-American Literature - Honors [C2L]

3.00

Survey of literature by African-American authors from the 18th century to the present. May be used for general education credit.

ENG 294. Internship in English

1.00 - 3.00

Provides English majors with work experience in career fields they are interested in pursuing. A journal, internship report, research paper, bibliography and evaluation from the intern provider are required. Does not count as an English elective.

Prerequisite: Major or minor status and approval of the internship director.

ENG 299. Writing About Literature

3.00

This course will provide students with the skills and knowledge necessary for interpreting, researching and writing about literature. Students will learn basic literary terms, acquire an understanding of canon formation and transformation, and gain a knowledge of literary theories. Fulfills the College of Arts and Letters writing-intensive requirement for the major. *Prerequisite:* Declared English major.

ENG 301. Old English Language and Literature

3.00

An introduction to the Old English language through selected readings in poetry and prose.

ENG 302. Special Topics in Literature and Language

3.00

Study of a particular literary or linguistics topic. May be repeated for credit when course content changes but not more than once, except with the approval of the department head.

ENG 302F. Florence in Literature [C2L]

3.00

ENG 302L. Us Writers in London

3.00

ENG 303. History of the English Language

3.00

Introduction to the historical study of English including its Indo-European origins. May be repeated for credit when course content changes.

ENG 304. Feminist Perspectives on Literature and Religion

3.00

American authors and their fiction about God, faith and religion in the American experience. Gender and race will provide a constant thematic focus through a variety of novels and short stories.

ENG 305. Mythology

3.00.

Study of the nature and meaning of myths specific to a particular culture or comparative myths as interpreted and reinterpreted in significant works of ancient and modern literature.

ENG 306. The Bible as Literature

3.00

Study of Hebrew and Christian scripture as literary and cultural texts, which have influenced subsequent literature and culture.

ENG 307. Literature and Ideas

3.00

Literary treatment of an organizing theme or approach appropriate to the 300-level. The topic may be framed as part of the human experience or within a tradition of studies in the humanities. Course content may include pertinent readings from other disciplines. Possible topics: Disease in literature, literature and the law, literature and psychology. May be repeated as course topic changes.

ENG 308. Introduction to Linguistics

3.00

Introduction to the study of the various subfields of linguistics, including questions about the nature and use of language in general, with the English language as the primary example. Formerly ENG 418.

ENG 309. Traditional English Grammar

3.00

Introduction to traditional grammar, probing its logic, system and history, with an examination of modern applications of conventional rules.

ENG 310. Modern English Grammar

3.00

Introduction to modern English grammar with attention to the structure of the English language from a modern linguistic perspective.

ENG 311. Medieval Literature and Culture

3.00

Studies in the literature and culture of the Middle Ages through selected Old English, Norse/Icelandic, Middle English, Old Irish, French, German, Latin and Arabic texts in translation.

ENG 313. Sixteenth Century British Literature

3.00

Poetry and prose of the sixteenth century in Britain.

ENG 315. Seventeenth Century British Literature

3.00

Poetry and prose of the seventeenth century in Britain.

ENG 316. Early Modern Drama

3.00

Major works of British dramatists, excluding Shakespeare, from 1550-1660.

ENG 317. Shakespeare's Tragedies and Romances

3.00

A study of selected tragedies and romances; nondramatic work may be considered. Formerly ENG 456.

ENG 318. Shakespeare's Comedies and Histories

3.00

A study of selected comedies and histories; nondramatic work may be considered. Formerly ENG 457.

ENG 319. Teaching Shakespeare

3.00

A study of Shakespeare's plays, with emphasis on pedagogical techniques for teaching drama in the classroom.

ENG 321. Restoration and 18th-Century British Prose and Poetry

3.00

A study of the poetry and prose (other than the novel) from the Age of Satire, including works by Dryden, Swift, Pope and Johnson.

ENG 322. Restoration and Eighteenth Century British Drama

3.00

A study of British drama in the eighteenth century.

ENG 325. Romantic Literature

3.00

A study emphasizing selected works of Romantic literature. Attention given to critical theories, intellectual and cultural movements, or poetic forms.

ENG 327. Gothic Literature

3.00

Crosslisted with ENG 327H

A study of the origins, influence and transformations of Gothic fiction from the 18th century to the present.

ENG 329. Victorian Literature

3.00

Study of British literature of the Victorian period with primary emphasis on poetry and nonfiction prose.

ENG 330. Nineteenth Century British Novel

3.00

The development of the British novel in the nineteenth century and the study of representative works.

ENG 331. Studies in Poetry

3.00

A study of select poetic works. Specific time periods of genres studied may vary. Course may be repeated as topic changes.

ENG 332. Studies in Popular Genres

3.00

A study of a select popular or specialized genre, such as speculative fiction, detective fiction or the graphic novel. Course may be repeated as topic changes.

ENG 334. Contemporary Drama

3.00

Drama from 1960 to the present.

ENG 335. Studies in Children's Literature

3.00

A study of children's literature, such as a survey of children's literature, young adult literature, African-American children's literature, children's fantasy fiction or the picture book, or a study of a particular author or series. Course may be repeated as topic changes.

ENG 340. Modern British and Irish Literature

3.00

Literature from Britain and Ireland, 1900 to 1945.

ENG 341. Contemporary British and Irish Literature

3.00

Literature from Britain and Ireland, from 1945 to the present.

ENG 342. Early American Literature

3.00

Significant genres, writers and literary movements of the seventeenth and eighteenth centuries.

ENG 343. Antebellum American Literature

3.00

American Literature of the early nineteenth century.

ENG 344. Late Nineteenth Century American Literature

3.00

American literature of the late nineteenth century.

ENG 348. Studies in Linguistics and the English Language

3.00

Broad study of a particular subfield of linguistics, focusing on the English language, or an application of various linguistic theories and methodologies to the study of literature. Some possible areas of study include semantics, pragmatics and discourse,

non-literal language, lexicography, English dialects and variation, language and humor, and linguistic approaches to literature. Course may be repeated as topic changes.

ENG 352. The American Novel to 1914

3.00

A study of the development of the American novel from its beginnings to the modern period.

ENG 355. Southern Literature

3.00

Southern authors, especially those of the twentieth century.

ENG 356. Modern American Novel

3.00

The American novel from 1914 to 1945.

ENG 357. Contemporary American Literature

3.00

A study of contemporary American literature written since 1945.

ENG 358. Oral Literature

3.00

This course is a study of oral literature, which may be organized by theme, geography or genre. The course examines the social, political and artistic reasons for the creation and popularity of this literature. May be repeated for credit when course content changes.

ENG 359. Studies in African American Literature

3.00

A study of selected works of African American literature in multiple genres. May be repeated for credit when course content changes.

ENG 360. Introduction to Ethnic American Literature

3.00

An overview of the literary production of one group or a variety of ethnic and immigrant American writers, including but not limited to Native American, Asian American, Mexican American, Indian American, Caribbean American, and Latino American literatures. Examines the experience of historically marginalized groups in the United States with a particular emphasis on identity, nationality, tradition, and language.

ENG 361. African-American Fiction

3.00

Selected works of fiction by major African-American writers.

ENG 362. African-American Poetry

3.00

Selected works of poetry by major African-American writers. May be repeated for credit when course content changes.

ENG 363. Native American Literature

3.00

A study of Native American communities' and authors' literatures in North America, with emphasis on the relationship of that literature to their traditions and historical experiences.

ENG 364. Introduction to Asian-American Literature

3.00

The course is designed to introduce students to a variety of writings by Asian-American authors. It will explore the historical formation of Asian-American identities; issues of immigration, citizenship and race; and the aesthetic forms of representation explored by Asian-American writers and artists.

ENG 365. History of Literary Criticism

3.00

Survey of the nature, function and development of literary criticism from Aristotle to Eliot. Formerly ENG 425.

ENG 366. Contemporary Critical Theory

3.00

Study of the major debates in current critical discourse. Formerly ENG 426.

ENG 368. Women's Literature

3.00

Crosslisted with WGSS 368

A study of literature by women.

ENG 369. Feminist Literary Theory

3.00

Crosslisted with WGSS 369

An intensive study of a variety of feminist critical approaches and their applications to literature. Formerly ENG 467.

ENG 370. Queer Literature

3.00

An exploration of texts and issues in literature written by and about lesbian, gay, bisexual, transgender and queer writers, including critical and theoretical issues as well as questions of canon. Text studied may include fiction, poetry, drama, essays and memoirs written primarily, but not exclusively, in the 20th century.

ENG 371. Literature and the Environment

3.00

A critical examination of literature's representation of the interconnections between human beings, non-human beings and the environment.

ENG 372. Ecocriticism and Environmental Ethics

3.00

This course will examine ecocriticism, which investigates the interconnections between language, literature, ethics and the environment. A further exploration of environmental ethics will allow students to identify ideas about the purpose and appropriate use of landscape, wilderness and animals. Formerly ENG 471.

ENG 374. Contemporary Global Anglophone Literature

3.00

This course examines contemporary literature from many parts of the English-speaking world, with special attention to writers' attempts to assess the global legacies of colonialism in the contemporary moment, as well as what it means to participate in a self-consciously global literary culture today.

ENG 375. Irish and Anglo-Irish Literature

3.00

A study of the works of Irish or Anglo-Irish writers.

ENG 376. Introduction to Scottish Literature

3.00

An overview of Scottish literature, with an emphasis on fiction, from the Romantic period to the present. Emphasis on the problems of nation, identity and the politics of language and tradition in "minority literature."

ENG 377. Introduction to African Literature

3.00

An introduction to African literature, tracing its changes over time. Examination of African literary theoretical concepts, literary genres (both oral and written), as well as an examination of Africa's contribution to familiar genres of written and oral literature.

ENG 378. Studies in South Asian Literature

3.00

A study of selected works of South Asian literature. Formerly ENG 427.

ENG 379. Literature and Empire

3.00

The course is designed as an overview of writings from regions of the world that were formerly colonized by Britain. It examines the colonial, nationalist and postcolonial shaping of individual and collective identities through literature; the intersections of

race, gender and nation; the crafting of a new idiom in English in response to both political and literary histories; and the significance of choices of genre and form.

ENG 380. Introduction to Film

3.00

Crosslisted with SMAD 380

An introduction to the study of film as an aesthetic practice, including formal and industrial aspects of film analysis, theoretical approaches to film and writing and research methodologies of film and media studies.

ENG 381. History of Film to 1960

3.00

An analysis of film from its beginnings to the modernism of the 1950s and early 1960s.

ENG 382. History of Film Since 1960

3.00

An analysis of world cinema from early modernism through the present.

ENG 383. Film Genre

3.00

Study of film genre through the consideration of one or more film genres.

ENG 384. Film Authorship

3.00

Study of film authorship through the consideration of one or more directors.

ENG 385. Special Topics in Film Study

3.00

Study of a particular topic in film. May be repeated for credit when course content changes but not more than once, except with the approval of the department head.

ENG 390. The Environmental Imagination

3.00

An introductory creative writing class that provides a sampling of American environmental writing, with emphasis on the creative intelligence of the writer's imagination, process, and craft.

ENG 391. Introduction to Creative Writing – Nonfiction

3.00

A basic workshop in reading and writing works of creative nonfiction.

ENG 392. Introduction to Creative Writing – Poetry

3.00

A basic workshop in reading and writing poetry.

ENG 393. Introduction to Creative Writing – Fiction

3.00

A basic workshop in reading and writing fiction. May be repeated for credit when course content changes.

ENG 396. Advanced Composition

3.00

Extensive exercises in expository writing, with emphasis on rhetorical types of composition, designed to develop sophistication of style in the student's writing.

ENG 401. Advanced Studies in Medieval Literature

3.00

Advanced literary and philological study of non-British Medieval or British Medieval texts written in cross-cultural dialogue with those written circa 500- 1480 c.e. in Old Irish, Old Norse/Icelandic, Old French, Old and Middle High German, Old Castilian, Classical and Medieval Latin, and Arabic. Readings in the original or in translation. Topics may be determined by period or geography, culture or politics, theme or genre. Course may be repeated as topic changes.

ENG 402. Advanced Studies in British Literature Before 1700

3.00

British literatures written prior to 1700, both within and without the British isles. Topics may include Anglo-Saxon and Anglo-Norman literature, vernacular literature, neo-Latin literature, Chaucer, late-medieval literature, Tudor and early modern literature, Shakespeare, Milton, and seventeenth century literature. May be repeated as course topic changes.

ENG 403. Advanced Studies in British Literature After 1700

3.00

Advanced study of British literatures dating from 1700 to the present. Topics may focus on a particular period of literature (eighteenth century, Romantic, Victorian, Modernist, or contemporary), or topics may focus on a genre or them that engages multiple periods. Course may be repeated as topic changes.

ENG 405. Advanced Studies in Anglophone Literature

3.00

Anglophone (English-speaking) literature from around the globe (including the Caribbean, Canada, Ireland, Australasia, Africa or India), in which identification with a particular nation, colonial status or imperial power is problematic or no longer applicable. Topic may focus on a particular theme or event, genre, time frame, formal or stylistic trend, author or set of authors, issue, or problem. May be repeated as topic changes.

ENG 407. Advanced Studies in American Literature

3.00

Study of literature(s) of the United States and North America, from the Colonial Period through the 21st Century. May include writing in multiple genres: narrative prose, poetry, drama, nonfiction. Topics may be historically delimited or thematically

organized; specific sections may focus on a group of authors, a literary movement, a historical moment, or a broad theoretical question. Course may be repeated as topic changes.

ENG 408. Advanced Studies in African-American Literature

3.00

Study of literature produced by African-Americans, from the Colonial Period through the 21st century. May include writing in multiple genres: narrative prose, poetry, drama, nonfiction. Topics may be historically delimited or thematically organized; specific sections may focus on a group of authors, a literary movement, a historical moment or a broad theoretical question. Course may be repeated as topic changes.

ENG 410. Advanced Studies in Author

3.00

Study of the works of one (or two) British, American or Anglophone writers. May be repeated for credit when course content changes.

ENG 412. Special Topic Seminar

3.00

Study of a literary school, movement, genre or some other significant literary or linguistic topic. May be repeated for credit when course content changes; credit may not be earned in both ENG 412 and ENG 512 unless course content changes.

ENG 412J. Special Topic Seminar

3.00

ENG 412N. Special Topic Seminar

3.00

Prerequisite: Studies Abroad-London

ENG 412R. American Theatre History

3.00

ENG 413. Advanced Studies in Literature and Ideas

3.00

Advanced study of the literary treatment of an organizing theme, which may be framed broadly as part of the human experience or within a tradition of studies in the humanities. Course content may include pertinent readings from other disciplines. Possible themes: love, death, nature, evil, the comic spirit. May be repeated as course topic changes.

ENG 414. Advanced Studies in Genre

3.00

Advanced study of works drawn from a specific literary or film genre or subgenre or a small, related set of (sub)genres. May be repeated as course topic changes.

ENG 415. Advanced Studies in Textuality and the History of the Book

3.00

Detailed literary, bibliographical, political and cultural analysis of the material features of texts as physical objects. Topics may include the relation between a book's physical features and its intellectual contexts; the production, dissemination and receptions of texts; the history of manuscript, print and digital text technologies; the material history of reading and of literacy; and so forth. May be repeated as course topic changes.

ENG 417. Advanced Studies in Linguistics and the English Language

3.00

Advanced study of a particular topic in English linguistics or in English language studies. Course may focus on a particular subfield or linguistics, on particular linguistic theories, on an application of linguistic theory to literary studies or to other related fields, or on specific structural, historical, cultural, or other aspects of the English language. May be repeated as topic changes.
ENG 420. Advanced Studies in Theory and Cultural Studies. 3 credits. Advanced study of a topic or debate within contemporary critical theoretical or cultural studies discourses in the humanities. Course may be repeated as topic changes.

ENG 420. Advanced Studies in Theory and Cultural Studies

3.00

Advanced study of a topic or debate within contemporary critical theoretical or cultural studies discourses in the humanities. Course may be repeated as topic changes.

ENG 423. Advanced Studies in Gender and Sexuality in Literature

3.00

Crosslisted with WGSS 423

Advanced study of a topic using a gender and sexuality studies approach to literary texts. This course will explore how gender and sexuality and their representation in literature are shaped by social, cultural, historical and political contexts. Course may be repeated as topic changes.

ENG 430. Advanced Studies in Comparative Literature

3.00

Comparative study of selected world literature. May be repeated as course topic changes.

ENG 432. Advanced Studies in African Literature

3.00

A study of selected works by African writers, focused by theme, geography or genre. May be repeated for credit when content varies.

ENG 433. Advanced Studies in Arabic Literature

3.00.

A study of Arabic writers. May be repeated for credit when content varies.

ENG 434. Advanced Studies in Latin American Literature in Translation

3.00

Crosslisted with SPAN 434

This course will study Latin American literature in translation. The course will focus on the work of major Spanish-American authors. May be repeated as course content changes.

ENG 436. Studies in German Literature

3.00

Crosslisted with GER 436

A study of selected works of German literature. Instruction is in English. May be repeated for credit when course content changes.

ENG 437. Studies in Italian Literature

3.00

Crosslisted with ITAL 437

A study of selected works of Italian literature. Instruction is in English. May be repeated for credit when course content changes.

ENG 438. Studies in Russian Literature

3.00

Crosslisted with RUS 438

A study of selected works of Russian literature. Instruction is in English. May be repeated for credit when course content changes.

ENG 439. Advanced Studies in Major Authors of Literature in Spanish in Translation

3.00

Crosslisted with SPAN 439

This course will study the work of both Peninsular and Latin American authors in translation. The course will focus on major Spanish-speaking authors and their work, both in Latin America and in Spain. May be repeated as course content changes.

ENG 463L. Film Adaptations

3.00

Crosslisted with SMAD 463

The study of the process of adapting literature into feature films. Consideration is given to the original literary work, as well as to the changes undergone in its adaptation to film. (Taught in London). *Prerequisite: SMAD 301; for nonmajors: ENG 381 or admission to the cross disciplinary minor in creative writing; or permission of the instructor.*

ENG 466. Advanced Studies in Women's Literature

3.00

Crosslisted with WGSS 466

Advanced study of women's literary achievements in several cultural and historical contexts. May be focused by theme. May be repeated as course content varies. *Prerequisite: ENG 368 or ENG 369.*

ENG 483. Narrative Form

3.00

The study, development and practice of narrative craft. *Prerequisite: ENG 393 or permission of the instructor.*

ENG 484. Poetic Craft and Creativity

3.00

The study, development and practice of poetic craft. *Prerequisite: ENG 392 or permission of the instructor.*

ENG 490. Special Studies in English

3.00

Independent study for students with high academic standing. Students may select work in (1) a literary type, period or author; (2) imaginative writing; or (3) linguistics. Approval of department head required; may be repeated for credit when course content changes.

ENG 493. Advanced Creative Nonfiction

3.00

An advanced workshop in the writing of creative non-fiction narrative, with emphasis on point of view, form and style. *Prerequisite: ENG 391 or permission of the instructor.*

ENG 494. Advanced Poetry Writing

3.00

An advanced workshop with emphasis on developing sound poetic form, voice and vision. *Prerequisite: ENG 392 or permission of the instructor.*

ENG 495. Advanced Fiction Writing

3.00

An advanced workshop with emphasis on developing sound narrative prose form, style and vision. May be repeated for credit when course content changes. *Prerequisite: ENG 393 or permission of the instructor.*

ENG 496. Advanced Topics in Creative Writing

3.00

Study of a specific and concentrated aspect of creative writing. Topics will vary semester to semester. May be repeated for credit when the topic changes. *Prerequisite: ENG 391, ENG 392 or ENG 393, as appropriate to course content.*

ENG 499. Honors

1.00

See catalog section "Graduation with Honors."

ENG 499B. Honors Thesis B

3.00

ENG 499C. Honors Thesis C

2.00

ENVT 200. Environmental Systems Theory

3.00

Explores three aspects of understanding the environment. First, the kind of problem the environment is and the thinking strategies that will best yield insights and understanding. Second, how humans create and/or respond to environmental issues and crises. Third, examination of past environmental changes and how humans have been affected by and responded to those changes. Final synthesis explores what we can and cannot do practically to respond to future changes. Does not satisfy elective credit or count as credit for geology or earth science majors.

ENVT 300. Topics in Environmental Humanities

3.00

Special topics in the humanities and arts that enhance the study of environmental humanities and are not currently taught in the regular curriculum.

ENVT 301. Internship in Environmental Humanities

3.00

Provides the student with practical experience in areas pertinent to the study of environmental humanities. Any internship experience must be approved by the coordinator in advance, and details of supervision and evaluation should be spelled out in advance. The internship may also be through an academic unit, but must be approved for credit by the environmental humanities coordinator in advance of the experience.

ENVT 400. Capstone Seminar in Environmental Problem Solving

3.00

Integrates perspectives from three environment programs: environmental management, environmental science and environmental studies. The course is team taught using a case-study approach to environmental issues, emphasizing teamwork and student initiative. Topics vary. *Prerequisite: Completion of 15 hours in declared environment minor or permission of the instructor. Students wishing to complete more than one of the environmental minors (environmental studies, environmental science or environmental management) may receive dual credit for ENVT 400.*

ENVT 401. Studio or Independent Study in Environmental Humanities

3.00

Students may propose to engage in a creative, expressive or scholarly project either through their home department or using the ENVT identifier. Studio or independent study must be approved by the Environmental Humanities coordinator in advance of the experience.

ENVM 480. Selected Topics in Environmental Management

1.00 - 4.00

Topics in environmental management which are of interest to the upperdivision student but not otherwise covered in the regular course offerings. Offered only with the approval of the director. May be repeated for credit when course content changes. Students should consult the instructor prior to enrolling. *Prerequisite: Junior or senior standing in environmental management program. Topic selected may dictate additional prerequisites.*

EXED 200. Foundations of Exceptional Education

3.00

This course is designed to support study of the historical perspectives, models, theories, philosophies and trends that provide the basis for exceptional education practice. The status of persons with exceptional learning needs (ELNs), legislative and judicial mandates and current regulation related to individuals with ELNs, and the 'rights and responsibilities' of various stakeholders as they relate to exceptionality will be stressed. The role of culture, environment, family and exceptionality will be explored.

EXED 202. Field Experiences in Special Education

3.00

Provides students with supervised experiences with persons with disabilities. Placements are made in various settings including schools, institutions and recreational programs. *Prerequisite: EXED 200 and permission of the instructor.*

EXED 203. Contemporary Issues in Special Education

1.00

This course investigates current issues and controversies in the field of exceptional education. This course is designed to support the student's understanding of how sociological, familial, political and cultural issues are affecting the field of special education. It will also challenge students to apply this knowledge to their practice. *Prerequisite: EXED 200.*

EXED 300. Educational Technology for Students with Disabilities

1.00

An introduction to instructional technology for persons with disabilities. The role of assistive technology in the educational process is investigated. Students are exposed to a variety of instructional programs and equipment. Federal and state guidelines, interdisciplinary team functioning, and program, as well as equipment selection, are addressed. *Prerequisite: Teaching and non-teaching minors only.*

EXED 302. Mentoring Children and Youth with Mild Disabilities

2.00

The course will provide students with the knowledge and skills to engage in mentoring of children and youth with learning disabilities and attentional disorders. Students will focus on increasing their understanding of self-awareness related to living with a disability, effective compensatory learning strategies and self-advocacy skills. *Prerequisite: Because of the purpose of this course is to increase self-awareness and mentoring skills related to understanding disabilities, it is open only to students who are registered with the Office of Disability Services.*

EXED 303. Foundations of Classroom and Behavior Management

3.00

Crosslisted with EXED 512

This course is designed to provide students with an understanding of and skill to apply classroom and behavior management techniques and interventions, including techniques that promote emotional wellbeing and teach and maintain behavioral conduct

and skills consistent with norms, standards and rules of the educational environment. Diverse approaches for classroom and behavior management based upon behavioral, cognitive, affective, social and ecological theory and practice will be learned.

EXED 305. Characteristics of Acquired Brain Injury

3.00

EXED 305 provides an overview of acquired brain injury – its causes, complications, consequences and considerations for survivors, caregivers and families. Instruction will emphasize rehab treatment philosophies and approaches, cultural competencies, gender and sexuality issues, military populations, pediatrics and adolescents, and families. Students will learn how to apply knowledge of brain injury sequelae to future healthcare settings and educational learning environments.

Prerequisite: EXED 200.

EXED 306. Lifespan Issues for Individuals with Disabilities

3.00

This course examines how issues such as legal mandates and policies, selfadvocacy, family involvement, educational services, transition, and interagency collaboration impact individuals with disabilities and their families from birth through postsecondary life. The students will be challenged to compare and analyze needs and services available and accessed by individuals with disabilities. *Prerequisite: For special education non-teaching minors and students in the chronic illness concentration.*

EXED 309. Supporting Community Access for Adults with Disabilities

3.00

This course provides students with an understanding of and experience working with young adults with disabilities who are exiting Special Education eligibility. The goal is to support these young adults in learning to access the JMU community and gain experience with nondisabled sameage peers. *Prerequisite: EXED 200.*

EXED 310. Survey of Emotional Disturbance

3.00

A detailed study of the characteristics, diagnosis, treatment, assessment and education of individuals with emotional/behavioral disorders. Medical, psychological, behavioral and environmental causes are presented as well as therapeutic interventions, educational resources and instructional strategies. *Prerequisite: EXED 200 and non-teaching minors only.*

EXED 320. Survey of Learning Disabilities

3.00

A detailed study of the theories, characteristics, etiology and needs of individuals with learning disabilities including ADHD. Focus will be on causation and terminology as well as historical perspectives and current trends related to practices in identification and treatment of learning disabilities.. *Prerequisite: EXED 200 and non-teaching minors only.*

EXED 330. Survey of Intellectual Disabilities

3.00

A detailed study of the characteristics, diagnosis, treatment, and education of individuals with intellectual disabilities. Medical aspects and implications for support needs are addressed as well as educational settings, resources and instructional techniques designed to facilitate integration for individuals with intellectual disabilities. *Prerequisite: EXED 200 and non-teaching minors only.*

EXED 341. Characteristics of Learners with Disabilities Accessing the General Curriculum

3.00

Crosslisted with EXED 502

The course covers historical, ethical and legal aspects involving the education of children with disabilities. Definitions and foundational characteristics of teaching children with disabilities accessing the general curriculum are featured. Identification, education and evaluation of academic skills and behavior of students with disabilities are presented. How family, cultural, socioeconomic, and environment impact education are discussed. Professional behavior standards are examined. *Prerequisite: EXED 200. Corequisite: EXED 376.*

EXED 342. Characteristics of Learners with Low Incidence Disabilities Accessing the Adapted Curriculum

3.00

Current research and practices of characteristics, learning and behavioral supports for students with low-incidence disabilities accessing the adapted curriculum. Includes students with autism, moderate/severe intellectual disability, traumatic brain injury, severe/multiple disabilities and deaf-blindness. Contains issues including age span issues, emotional/behavioral adjustment, social and language development, cognitive functioning, medical aspects, and cultural/ethnic and socioeconomic factors. *Prerequisite: EXED 200.*

EXED 375. Overview Study of Autism Spectrum Disorders

3.00

This course provides an overview of the current issues involved in working with people who have been identified as having an autism spectrum disorder. Areas addressed will include learning characteristics; current research and factors involved with causation, assessment and diagnosis; positive behavioral supports; social skills development; sensory processing, motor planning and sensory integration; and communication and language development. *Prerequisite: EXED 200.*

EXED 376. Initial Practicum for Special Education PreProfessional Preparation

1.00

A practicum experience that will provide an opportunity to observe the roles of special education teachers who are working with students with disabilities who are accessing the general curriculum. Practicum students will have the opportunity to observe instruction at both elementary and secondary levels. They will be able to observe classroom management and instruction in math, reading and writing. Some introductory level instruction opportunities may be provided. *Prerequisite: EXED 200. Corequisite: EXED 341.*

EXED 401. Issues in Exceptional Education

1.00 - 3.00

Considers current problems and issues in special education as they relate to the professional education of teachers. EXED Teaching and non-teaching minors only with permission of the instructor.

EXED 402. Positive Behavior Supports and Individualized Interventions for Young Children

1.00-3.00

This course is designed for early childhood educators (ECEs) who may work with young children with challenging behaviors.

This course focuses on basic principles of behavior as means to help ECEs understand the function of behavior, or the reasons why behavior occurs. This course focuses on proactive strategies as a means to prevent challenging behavior, measuring behaviors using data collection and implementing behavior interventions that are aligned with behavior function. This course emphasizes a positive approach to behavior management aligned with best practices in teaching social emotional skills to young children. *Prerequisite: This course is open only to students with an applied associate degree in early childhood from a Virginia community college.*

EDUC 300 and PSYC 160.

EXED 407. Transitions of Learners with Disabilities

4.00

This course is designed to provide a detailed study of the transitions throughout the educational experience of persons with disabilities; including transitions between IDEA Part C and Part B services, elementary-middle-high school and high school-post-secondary environments. Focus is given to the services and skills needed to support successful integration into and functioning within the routines and activities of these settings. This course includes two-three hours each week functioning as a job coach to a local student with disabilities. *Prerequisite: EXED 200 and EXED 474.*

EXED 411. Implementing Behavior Analytic Services as a Paraprofessional

This course is designed to provide the student with the necessary instruction to apply for licensure as a Registered Behavior Technician (RBT). This course will provide the student with the skills needed to implement behavior analytic services in a variety of settings (schools, homes, clinics) with individuals across the lifespan. The course will address all items required for RBT training, including measurement, assessment, skill acquisition, behavior reduction, documentation and reporting, professional conduct, and scope of practice. *Prerequisite: EXED 200 and permission of the instructor.*

EXED 416. Overview and Assessment of Autism Disorders

3.00

This course is designed to provide an overview of the current issues involving working with children who have been identified as having an autism spectrum disorder. Areas covered in-depth will include learning characteristics, current research and factors involved with causation, assessment and diagnosis. We will discuss positive behavioral supports; social skills development; sensory processing, motor planning and sensory integration; and communication and language development as these will be covered in much greater depth in other courses. A range of institutional methodologies and techniques will be emphasized throughout the course.

EXED 417. Communication, Language and Sensory Issues of Learners with ASD and/or on the Adapted Curriculum

3.00

This course is designed to provide an in-depth study of the current issues involved in working with learners who have been identified as having an autism spectrum disorder and/or being on the adapted curriculum. The course will review learning characteristics, current research and factors involved with causation, assessment and diagnosis, and positive behavioral supports to set the stage. The course will explore social skill development; sensory processing, motor planning and sensory integration; and communication and language development. The course will consider a range of instructional methodologies and techniques for providing instruction, support and generalization of skills in these areas. *Prerequisite: EXED 342 or EXED 416.*

EXED 418. Challenging Behaviors, Positive Behavioral Supports, Functional Behavioral Assessment and Behavior Intervention Plans

3.00

This course is designed to provide an in-depth look at the behavioral challenges those with a disability in the autism spectrum

might face and display. Areas addressed will include behavioral characteristics, current research and factors related to behavioral challenges in this population, positive behavioral supports, Functional Behavioral Plan Development, implementation and monitoring. We will cover data collection in relation to assessment and monitoring behaviors. We will review social skills development; sensory processing, motor planning and sensory integration; and communication and language development as these are covered in much greater depth in other courses. A range of institutional methodologies and techniques will be emphasized throughout the course. *Prerequisite: EXED 416 and EXED 417.*

EXED 429. Teaching Learners with Complex Care Needs

3.00

Regardless of instructional setting, special education teachers will likely come in contact with students with complex medical challenges related to disability. This course focuses on students with multiple disabilities, as these students are likely to require medical and technological interventions in schools. The course focuses on typical development and application of this knowledge for students with significant disabilities. It also focuses on specific disabilities and the overlay of sensory impairments, medical needs and technological needs related to those disabilities. Finally, this course focuses on planning for instruction and collaborating with caregivers and team members of all backgrounds in order to meet the complex needs of these students.

Prerequisite: EXED 200.

EXED 431. Assistive Technology for Individuals with Sensory Impairments

3.00

Crosslisted with EXED 531

This course is designed to heighten the awareness of participants to specific technology and resources available to enhance and improve the abilities of individuals with sensory impairments to succeed in school, daily living activities and employment. This course is delivered via a distance education format. *Prerequisite: EXED 435. Corequisite: EXED 435.*

EXED 432. Braille Code

3.00

This course provides instruction in the development, use and application of the Braille literary code and its implications for educational/literacy programs for students with visual disabilities. Students will develop the skills to read and write contracted and uncontracted Braille, while acquiring instructional methodologies for teaching children who are blind to read and write. Sources of Braille materials for educational purposes are identified. This course is delivered via a distance education format.

Prerequisite: EXED 435. Corequisite: EXED 435.

EXED 434. Curriculum and Assessment for Students with Visual Impairments

3.00

This course provides students with knowledge and understanding of the educational assessment of students with visual impairments and additional disabilities including deaf-blindness. Students practice assessing and planning educational programs for students with visual impairments. Also covered in this course are assessment technology for students with visual impairments; determination of learning needs and appropriate learning media; and the relationship of assessment, IEP development, and placement. This course is delivered via a distance education format. *Prerequisite: EXED 435. Corequisite: EXED 435.*

EXED 435. Characteristics of Students with Visual Impairments

1.00

This course provides an overview of the characteristics of and services to persons with visual impairments, including the impact of visual impairments on infants' and children's growth and development, child and adolescent emotional and social development, and family interaction patterns. It considers the educational, conceptual, psycho-social and physical implications of a visual impairment. This course is delivered via a distance education format.

EXED 440. Classroom Management and Professional Collaboration

3.00

A focus on techniques used to manage the behavior of students. Emphasized are strategies used to prevent inappropriate behavior from occurring and/or worsening. Other interventions are taught such as techniques for working with others (e.g., parents, teachers, administrators) who may provide behavior management assistance to teachers and administrators.

EXED 441. Functional Applications of Low Tech Assistive Technology

2.00

This course will focus on functional applications of low-technology solutions within the areas of self-care; mobility and transfer; communication; stability and support; sports, recreation, and leisure; and academic and work environments. The course will include exploration and opportunities to design and create low-tech devices for children and adults. *Prerequisite: EXED 300.*

EXED 443. Assistive Technology Use for Individuals With Disabilities

3.00

This course is designed to enhance students' awareness and understanding of the range of assistive technologies available and their instructional implications for individuals with disabilities. Laboratory and demonstration experiences will enable students to select and utilize devices and software in settings serving individuals with disabilities. *Prerequisite: EXED 200.*

EXED 450. Principles of Specialized Reading Instruction

3.00

The course focuses on acquisition & development of reading skills for students with disabilities. Content includes characteristics of students with reading disabilities; informal assessment; relationship of oral language to reading; stages of reading development; research-based methods; principles of specialized reading instruction; and collaboration to support reading development. At least 10 hours of reading instruction to a K-12 student is required and is in addition to any assigned practicum. *Prerequisite: LED 430. Corequisite: EXED 476.*

EXED 455. Collaborative Teaching for Learners with Disabilities

3.00

Students in this course will gain knowledge and practice skills in consultation, case management, and collaboration with individuals, families, educators, related service providers and other human service professionals. An overview of collaborative processes, collaborative models for supporting the education of students with disabilities and for effective management of paraprofessionals will be studied. *Prerequisite: EXED 200 and special education non-teaching minors.*

EXED 460. Differentiation of Instruction and Academic Collaboration

3.00

This course assists preservice teachers in using their understanding of exceptional learners and learning to accommodate the diversity of students in the general education classroom. In addition, preservice teachers will explore the roles of teachers and how general and special education teachers collaborate to meet the needs of exceptional students. Teaching education students only.

EXED 465. Perspectives of Early Childhood Special Education

3.00

This course is designed to provide the student with an overview of educational programming and service delivery for children with developmental delays and/or disabilities, ages 0 to 5. Particular attention is given to federal legislation, historical perspective and current recommended practice in programming educational services for young children with delays and/or disabilities.

EXED 473. Methods of Instruction for Learners Accessing the Adapted Curriculum

3.00

Methods for remediation and adaptation of instruction in academic and functional skills for students with moderate/severe disabilities accessing the adapted curriculum. Emphasizes instructional approaches such as task analysis, systematic instruction, functional/daily living skills and general curriculum access using adapted content standards. A 10-hour practicum placement provides field experience to practice skills learned in this course. *Prerequisite: EXED 200 and EXED 342.*

EXED 474. Assessment and Evaluation in Special Education

3.00

This course is designed to provide study and application of the foundations of assessment and evaluation related to management of instruction and behavior of individuals with ELNs. The course emphasizes issues and skills in selection, administration, interpretation and use of a variety of tools and techniques in all stages of the decision making process for instruction and behavior management. Application of this new knowledge and skill will be through case-studies and direct assessment. *Prerequisite: EXED 200, EXED 341 or EXED 342.*

EXED 475. Program Planning in Special Education

3.00

This course is designed to teach legal and practical skills and strategies in development of program plans to meet the academic and behavioral needs of students with disabilities accessing the K-12 general or adapted curriculum. Skills will be applicable in a variety of placement settings and service delivery models. Included is a detailed study of purposes and procedures involved in the development of Individualized Education Plans. This will include how to use curriculum-based assessment data to develop the plan and evaluate the success of instruction in academics, social behaviors and life skills. *Prerequisite: EXED 341 or EXED 342, EXED 474.*

EXED 476. Practicum in Literacy and Assessment

2.00-3.00

This practicum is designed to provide a structured supervised experience assessing learning, planning and delivery of instruction to students with disabilities who are either accessing the general education curriculum

or an adapted curriculum. Teacher candidates will gather data to make decisions about the effectiveness of instruction.

Application of skills in planning direct instruction and creating instructional materials to improve student with disabilities literacy in all areas is required. *Prerequisite: EXED 474. Corequisite: EXED 429 or EXED 450.*

EXED 477. Remedial Methods in Special Education

3.00

This course is designed to provide students with knowledge about intensive remediation methods for students with disabilities who are significantly below grade level. The students will examine intensive instructional methods that address not only reading,

writing and math but also metacognitive processes and support skills that will improve their academic achievement across the general curriculum. *Prerequisite: EXED 474 and EXED 484.*

EXED 478. Supervised Practice in Special Education Methods

2.00

This course provides field experience opportunities to observe, reflect and participate in the special education methods related to the education of students with disabilities who are functioning below grade level and working on either the general or adapted curriculum. The focus is on practicing intensive interventions. This course is repeatable with different corequisites for up to four credits. *Prerequisite: EXED 474. Corequisite: EXED 473 or EXED 477.*

EXED 480. Student Teaching In Special Education

4.00

This student teaching experience in the area of special education enables the teacher candidate to apply the education interventions and management competencies acquired in previous courses and fieldwork. The teacher candidate will participate in varied experiences related to the licensure area(s) within special education they are seeking. The teacher candidate has the opportunity to develop their professional skills and ethical understanding of the profession of teaching and how special education fits within this profession. Over the course of the placements, the teacher candidate will assume a range of responsibilities for planning and implementing multiple individualized education plans for students with disabilities. They will experience the many roles of a special education teacher and how collaboration is a key tool in each of those roles. Due to the mentoring of a cooperating special education teacher the teacher candidate should feel free to take risks in trying new methods and developing their skills. The course is taken on a Credit or No Credit evaluation criterion. It is repeatable for up to eight credits and must be taken twice for initial special education licensure. *Prerequisite: EXED 473 or EXED 477. Corequisite: EXED 483.*

EXED 483. Teachers as Professionals

1.00-3.00

This seminar is designed to accompany the student teaching experiences. Student teachers will have the opportunity to reflect on their skills, problem-solve school and classroom experiences, increase awareness of the need to continue career-long learning, discuss linkages between program course work and student teaching experience, explore their own skill level and plan for their on-going professional development. Sections in fall and spring will have differentiated content designed to link with the curriculum content being covered in that semester, as well as to the student teacher's experience. *Corequisite: EXED 480.*

EXED 484. Inclusive Practices in Special Education

3.00-4.00

This course is a detailed study of inclusive practices for students with disabilities. The course emphasizes building skills in professional collaboration required by special education teachers in their role as consultant, co-teacher, collaborative support and case manager. Teacher candidates will learn to adjust assignments and provide scaffolding and accommodations in order to develop independent functioning in students with disabilities. Skills that allow both special education teachers and students with disabilities to function within a general education setting will be developed. Teacher candidates enrolled in this course will complete a K-12 classroom experience within a general education placement a minimum of two days a week. *Prerequisite: EXED 341 or EXED 342.*

EXED 485. Systematic Behavioral Support and Interventions

3.00

This course is designed to provide application and evaluation of individual interventions that teach and maintain emotional, behavioral and social skills. Students will study various systematic behavioral interventions to support the behavior and learning of individuals with disabilities accessing the general education or adapted curriculum including positive behavioral supports,

functional assessments of behavior, behavior intervention plans and teaching social skills. A variety of data collection procedures to inform their professional practice will be examined. Students in EXED 485 will be able to apply evidence-based practices related to Positive Behavior Supports, assessment of challenging behaviors and data collection to inform instructional practice and document student response to interventions that improve behavior such that academic learning can occur. *Prerequisite: EXED 303 and EXED 474. Corequisite: EXED 480.*

EXED 486. Supervised Clinical Practice with Planning and Methods in Sped

3.00

This practicum provides a structured supervised experience in selecting and using specialized methods for teaching academic skills, group management techniques and individual interventions that teach and maintain emotional, behavioral and social skills instruction to students with disabilities, and gathering data to make decisions about the effectiveness of intervention. Students will also have the opportunity to refine knowledge and skill application from previous program work. *Prerequisite: EXED 484, EXED 341, and EXED 474. Corequisite: EXED 484, EXED 341, and EXED 474.*

EXED 490. Special Studies in Special Education

1.00 - 3.00 each semester

Designed to allow the student to complete independent study under faculty supervision. *Prerequisite: Permission of the department head.*

FAM 133. The Contemporary Family

3.00

Concepts of variations in forms and lifestyles of families. Consideration is given to the family life cycle and the interdependency between the family and society.

FAM 300. Child Development

3.00

A study of the factors influencing the physical, cognitive, social and emotional growth of the young child. Emphasis is given to the importance of family relations and development of observational skills. *Prerequisite: PSYC 101, PSYC 160 or equivalent.*

FAM 325. Parent-Child Relationships Across the Lifespan

3.00

Crosslisted with SOWK 325

Focuses on intergenerational caregiving and interactions across the lifespan and generations. Uses a developmental framework to explore family life as the territory in which people fulfill relational responsibilities to children and parents while simultaneously attending to independent life stage challenges. *Prerequisite: FAM 133 or SOCI 374.*

FAM 375. Grant Writing for Agencies

3.00

Crosslisted with GERN 375, NPS 375, SOWK 375

Emphasizing active learning, this course teaches the basics of grant and proposal writing. Efficient research, persuasive prose and the importance of relationships are stressed. Private and corporate philanthropy and government grants are examined.

FAM 386. Youth Empowerment Strategies (YES)

3.00

Crosslisted with SOWK 386

Students learn to use group activities that include the creative arts, low ropes and self-discovery in youth empowerment. The goal is to help youth build life skills and make informed decisions. Prior to beginning work with youth, students complete 25 hours of training.

FAM 400. Theory Survey

1.00

This seminar provides students with several key theoretical frameworks that span the family ecology and gerontology concentrations of the minor and will inform and support their capstone experiences. *Prerequisite: FAM 133 or SOCI 374; For family ecology concentration: At least 9 additional credits from the family ecology track, and junior or senior standing; For gerontology concentration: PSYC 160, SOCI/GERN 280, GERN 305, and junior or senior standing. Corequisite: For family ecology concentration: FAM 401.*

FAM 401. Issues and Applications

2.00

The course emphasizes the application of knowledge through the development and implementation of a substantial, theory-based, in-depth individualized project. Students may adapt the project to fit their career objectives and/or plans for graduate study.

Prerequisite: FAM 133 or SOCI 374, and at least 9 additional credits from the family ecology track, not including FAM 400. Corequisite: FAM 400.

FAM 487. Special Topics in Family Studies

3.00

Examination of selected topics that are of current importance to family studies. Course may be repeated for credit. *Prerequisite: FAM 133 or SOCI 374.*

FAM 490. Special Studies in Family Studies

3.00

The course is designed to give capable students in family studies an opportunity to complete independent study under faculty supervision. Course may be repeated for credit. *Prerequisite: FAM 133 or SOCI 374 and two additional courses in the family studies minor or permission of the instructor.*

FIN 250. Introduction to Quantitative Finance

3.00

The purpose of this course is to provide a broad introduction to the markets and instruments of engineered finance. The focus of the course is to expose students to the properties and uses of the array of non-traditional financial instruments that are increasingly trading in both the exchange and over-the-counter markets. *Prerequisite: Minimum grade of "C" in MATH 235, MATH 236, ECON 200 and ECON 201.*

FIN 301. Principles of Finance

3.00

The purpose of this course is to provide a foundation in the principles and tools of finance, which include financial analysis, the time value of money, capital budgeting and capital structure. Open to students with a B.S. or B.A. economics major with a concentration in finance as well as students majoring in health sciences. Open to students as a repeat/forgive for COB 300B.

Prerequisite: Junior standing and COB 241

FIN 310. Principles of Real Estate

3.00

The purpose of this course is to assist students in developing a foundation in real estate principles, apply finance and economic principles to valuation and evaluation of real estate and analyze contracts and financing in residential and commercial real estate transactions. *Prerequisite: "C" or better in both FIN 360 and COB 300B.*

FIN 325. Money and Banking

3.00

Crosslisted with ECON 325

The purpose of this course is to examine the economic role of money, banking, and monetary policy within current institutional settings and under alternative theories explaining the interrelationships between money, the financial system and economic activity. *Prerequisite: ECON 200 and ECON 201.*

FIN 328. Time Series Analysis

3.00

Crosslisted with MATH 328

Regression and exponential smoothing methods for forecasting nonseasonal and seasonal time series, stochastic processes, Box-Jenkins' autoregressive and moving average models. *Prerequisite: MATH 238 or MATH 300; and MATH 318 or MATH 329.*

FIN 345. Finance Fundamentals for Non-Business Majors

3.00

Offers an introduction to the basic principles in financial decisionmaking, providing an overview of the role of the forms of business, taxation and financing of a business enterprise. This course develops the basic financial skills and tools necessary for financial analysis, capital investment project analysis and valuation. Not recommended for students seeking admission to MBA programs. Students will not receive credit for this course if they also take FIN 301 or COB 300B. *Prerequisite: ACTG 244 or COB 242, junior standing (60 hours) and a cumulative 2.0 GPA in all courses taken at JMU. Restricted to non-college of business majors.*

FIN 355. International Financial Management

3.00

The purpose of this course is to provide a comprehensive examination of the investing and financing decisions of a multinational business entity. Particular emphasis is on global financial markets and instruments, exchange-rate risk management, short-term and long-term financing for multinational firms and asset-liability management in an international environment. *Prerequisite: COB 300B. International business majors only.*

FIN 360. Analytical Methods in Finance

3.00

The purpose of this course is to introduce the finance major to quantitative methods in finance, as applied to financial instruments and capital markets. Emphasis is placed in the theoretical determination of asset prices, risk, and return, as well as the estimation and analysis of returns and asset prices. *Prerequisite: Not permitted for quantitative finance majors. COB 300; a minimum grade of "C" in both COB 291 and COB 242 (finance, international business and economics B.B.A. majors); FIN 301; a minimum grade of "C" in ECON 385 (economics B.A. and B.S. majors). Corequisite: Not permitted for quantitative finance majors. COB 300; a minimum grade of "C" in both COB 291 and COB 242 (finance, international business and economics B.B.A. majors); FIN 301; a minimum grade of "C" in ECON 385 (economics B.A. and B.S. majors).*

FIN 362. Financial Analysis

3.00

The purpose of this course is to prepare the finance major to use and interpret economic and accounting information that is essential in financial analysis and valuation. *Prerequisite: Minimum grade of "C" in COB 300B and FIN 360, and minimum grade of "B" in COB 241 and COB 242.*

FIN 365. Intermediate Financial Management

3.00

The purpose of this course is to provide an in-depth study of the theories of capital structure, long-term financing decisions, working capital management and current topics such as mergers and bankruptcy. Computer applications. *Prerequisite: Minimum grade of "C" in COB 300B and "C" in FIN 360 (finance majors); minimum grade of "C" in FIN 250 (quantitative finance majors).*

FIN 370. Real Estate Finance

3.00

The purpose of this course is to offer a comprehensive examination of the decision-making processes involved in purchasing and financing real assets. The focus is on the cost of funds and optimal financial structure of complex real estate projects. *Prerequisite: Minimum grade of "C" in COB 300B and FIN 360.*

FIN 371. Principles of Investments

3.00

The purpose of this course is to provide an investor's view of the operation of the capital markets. This course covers the theories and practice of investments, including analysis of financial instruments and real assets and their effective combination into portfolios. *Prerequisite: Minimum grade of "C" in FIN 301 and "C" in FIN 360 (economics B.A. and B.S. majors); minimum grade of "C" in COB 300B and "C" in FIN 360 (finance majors); minimum grade of "C" in FIN 250 (quantitative finance majors).*

FIN 372. International Finance and Payments

3.00

Crosslisted with ECON 372

Examines international financial markets, instruments and institutions; determination of spot and forward exchange rates, interest arbitrage, hedging and speculation; and alternative policies for achieving equilibrium in international payments. *Prerequisite: ECON 200 and ECON 201.*

FIN 375. Madison Investment Fund Management

3.00

The course is an accelerated introduction to the investment environment with a focus on fundamental analysis of stocks, overlay strategies to enhance portfolio performance and familiarization with the trading and pricing of the wide variety of instruments in the modern financial marketplace. The course is limited to members of the Madison Investment Fund. *Prerequisite: FIN 371 and department head permission with membership in the Madison Investment Fund.*

FIN 378. Fixed Income Analysis

3.00

The purpose of this course is to examine the market for and the price/yield determinants of various fixed income securities including Treasury debt, corporate bonds, agency debt, municipal bonds and mortgage and assetbacked securities. Topics include securitization, the term structure of interest rates, and portfolio management strategies such as duration, convexity and immunization. *Prerequisite: FIN 371.*

FIN 380. Elemental and Derivative Securities Analysis

3.00

The purpose of this course is to undertake an in-depth examination of the broad array of financial instruments traded in contemporary finance markets that are available for financing, investing, and managing financial price risk. *Prerequisite: Minimum grade of "C" in COB 300B and "C" in FIN 360 (finance majors); minimum grade of "C" in FIN 250 (quantitative finance majors); minimum grade of "C" in FIN 301 and "C" in FIN 360 (economics B.S. and B.A. majors).*

FIN 395. Mathematical Finance

3.00

Crosslisted with MATH 395

This course presents an overview of the role of mathematical concepts in financial applications. Topics include continuous time finance, optimization, numerical analysis and applications in asset pricing. *Prerequisite: MATH 237 and FIN 380.*

FIN 405. Securities Pricing

3.00

Crosslisted with MATH 405

A quantitative treatment of the theory and method of financial securities pricing to include an examination of closed form pricing models such as the Black-Schoals and its various derivatives as well as numerical solution techniques such as binomial methods. *Prerequisite: FIN 395 or MATH 395.*

FIN 420. Financial Planning and Wealth Management

3.00

This course introduces the student to financial planning and wealth management. The course is designed for students who may want to pursue a career in financial planning and related professional designations. In addition to the financial planning process and working with clients, this course covers the topics of insurance, cash management, debt management, investment management, taxes and estate planning. *Prerequisite: FIN 371. Corequisite: FIN 371.*

FIN 434. Fundamentals of Financial Data Science

3.00

An introduction to data analysis and programming in finance. Emphasis is placed on problem identification, the selection and application of tools and techniques to address problems, and data analysis. *Prerequisite:* "C" or better in FIN 360 or FIN 250 .

FIN 450. Financial Risk Management

3.00

The purpose of this course is to explore forward contracts, futures, swaps, and options, which are the basic building blocks for creating financial risk management programs for companies subject to financial risks such as changes in exchange rates, commodity price fluctuations and changes in interest rates. *Prerequisite:* FIN 371 and a minimum grade of "B-" in FIN 380.

FIN 451. Risk Management II

3.00

The purpose of this course is to present an intermediate treatment of the theory and applications of market, credit, liquidity and operational risk management. It builds upon concepts introduced in previous course work to present the theoretical constructs underlying risk management, as well as the quantitative skills required for risk analysis and the implementation of risk management techniques. *Prerequisite:* A minimum grade of "B-" in FIN 450.

FIN 455. Advanced International Financial Management

3.00

The purpose of this course is to focus on the analysis of major international financial management issues and risk faced by businesses operating in global markets. The emphasis is on the management of foreign exchange transactions, operating and translation exposures by multinational corporations, the functions of various currency hedging instruments, and the application of international funding and investment techniques. *Prerequisite:* Minimum grade of "C" in COB 300B and FIN 360.

FIN 460. Commercial Banking

3.00

The purpose of this course is to study the objectives, functions, policies, organizational practices and government regulation of commercial banks. An intensive study is undertaken of the asset and liability structure of commercial banks. Special emphasis is placed on how banks are adapting to the changes in their operating and regulatory environments. *Prerequisite:* Minimum grade of "C" in COB 300B and FIN 360.

FIN 471. Portfolio Management

3.00

The purpose of this course is to cover the application of investment concepts within a case format. The course focuses on investment management, bringing together economics, capital markets and valuation to form a basis for decision making in financial asset selection, risk/reward analysis, portfolio selection and formation. *Prerequisite:* FIN 371.

FIN 475. Financial Modeling and Risk Analysis

3.00

The purpose of this course is to introduce students to practical methods used to identify, quantify, predict, value, diversify, and manage risk in the financial environment. Students use sensitivity analysis, Monte Carlo and Latin Hypercube simulations, bootstrapping, time series forecasting and dynamic optimization techniques as applied to capital budgeting and structure, pro forma financial statements, multi-objective portfolio allocation, discounted cash flow analysis and real options. *Prerequisite:* FIN 365 and FIN 371.

FIN 480. Seminar in Financial Engineering

3.00

The purpose of this course is to explore financing engineering which is the process of adapting existing financial instruments and developing new ones to meet the needs of participants in domestic and international financial markets. This process is taught within a case and project format in order to simulate actual market participation as closely as possible. *Prerequisite: FIN 405 / MATH 405 .*

FIN 488. Advanced Financial Policy

3.00

The financing of a new business enterprise or expansion and the financial condition of existing firms is examined within a case format. The Objective of this examination is to elicit a policy decision which effectively addresses the issues identified in the case. *Prerequisite: FIN 360 and FIN 365 and senior Finance majors*

FIN 490. Special Studies in Finance

1.00 - 3.00

Designed to give capable students in finance an opportunity to complete independent study under faculty supervision. Admission by recommendation of the instructor and permission of the director. Forms may be obtained in the department office before registration.

FIN 498. Special Topics in Finance

3.00

The purpose of this course is to provide an opportunity for students to explore areas of current topical interest or to exploit special situations. Course content will vary. For current course content, consult with your advisor. *Prerequisite: FIN 250 or FIN 360.*

FIN 499A. Honors

6.00

See catalog section "Graduation with Honors." Credits will not count toward the finance major.

FIN 499B. Honors

3.00

FIN 499C. Honors

2.00

ARTS 100. Introduction to the Visual and Performing Arts

1.00

An exploration of the concept and practice of creativity, the commonalities that exist in all arts endeavors, the artist as citizen and the concurrent responsibilities, and the almost infinite possibilities opened in the market place by the study of the arts. The course includes guest lectures by resident and visiting artist/scholars and field experiences, such as attending exhibits and performances with pre- and post-event discussions. *Prerequisite: Must be admitted to the arts learning community and in residence in Wayland Hall during the semester in which the course is taken.*

FL 309. ** Civilization: Travel-Study

1.00 - 3.00

A directed program of travel-study designed to augment a student's knowledge of a particular civilization. Arrangements must be made with the faculty member designated by department head. Permission of the department head is required prior to enrollment in the program.

FL 446. ** Special Topics in Foreign Literature

3.00

Study of a particular topic in literature. May be taught in English or in the language but cannot be counted for major, minor or licensure unless taught in the language. Course may be repeated if content varies. *Prerequisite: Permission of the instructor.*

FL 447. Special Topics in Civilization and Culture

3.00

Students will study a particular topic in the civilization and/or culture of a specific country in the world. Course may be repeated. *Prerequisite: Permission of the instructor.*

FL 448. Special Topics in Linguistics

3.00

Students will study a particular topic in the linguistics of a specific country. Topics could include an introduction to sociolinguistics and psycholinguistics. Course may be repeated. *Prerequisite: Permission of the instructor.*

FL 490. ** Special Studies in Foreign Languages

1.00 - 4.00

Allows superior students an opportunity to complete independent studies under faculty supervision. Work may be done in all languages offered in the department but may not replace course offerings. *Prerequisite: Permission of the department head.*

FLED 370. Modern Foreign Language Assessment

3.00

This course is designed to prepare prospective foreign language teachers to create and evaluate both formal and informal learner assessments and to prepare candidates to meet future teacher evaluation criteria.

FLED 470. Methods of Modern Foreign Language Teaching

3.00

Research findings about language teaching will be used to identify the most effective instructional strategies for teaching languages to students in grades preK-12. Emphasis will be on developing plans for employing the strategies and making appropriate instructional decisions based on instructional goals, the learner, and available resources. *Prerequisite: Full admission to teacher education program; PSYC 160 and EDUC 300. Corequisite: FLED 471.*

FLED 471. Modern Foreign Language Field Experience

3.00

Provides practical classroom experience in elementary, middle and high school settings to preK-12 Foreign Language students

under the supervision of an inservice teacher and a clinical professor. Students engage in classroom activities that provide an opportunity for them to practice the strategies and concepts learned in the methods courses. *Corequisite: FLED 470.*

FLED 475. Supervised Student Teaching Experience

12.00

Participants will experience the full range of conditions and tasks expected of a teacher for students in grades preK-12. They will be expected to develop and demonstrate competencies in teaching with the supervision and support of experienced teachers. Students must register for two eight-week blocks during the same semester for a total of twelve credits. *Prerequisite: All required courses for licensure and approval for student teaching through the teacher education program. Corequisite: FLED 476.*

FLED 476. Student Teaching Seminar

3.00

A seminar designed to promote reflective decision making among teacher candidates during their student teaching experiences. Teacher candidates will engage in case analysis and complete the Teacher Work Sample as their culminating senior project. *Corequisite: FLED 475.*

FR 101. Elementary French I

3.00 - 4.00

The fundamentals of French through listening, speaking, reading and writing. Practice in pronunciation and development of comprehension. One hour's work a week in the language laboratory. If student has had two or more years of the language in high school he/she will not receive credit for the course.

FR 102. Elementary French II

3.00 - 4.00

The fundamentals of French through listening, speaking, reading and writing. Practice in pronunciation and development of comprehension. One hour's work a week in the language laboratory. If student has had two or more years of the language in high school he/she will not receive credit for the course. *Prerequisite: FR 101.*

FR 109. Accelerated Review of Elementary French (3, 1)

3.00

Reviews elementary French grammar, reading, writing, speaking and listening skills in French. One hour's work a week in the language laboratory. For students who have had no more than two or three years of French in high school and qualify through the placement exam. *Prerequisite: Permission of the department head or placement exam score.*

FR 111. Intensive French I

6.00

The fundamentals of French through intensive listening, speaking, reading and writing. The 4-week course is the equivalent of FR 101-102.

FR 212. Intensive French II

6.00

Crosslisted with FR 212P

The fundamentals of French through listening, speaking, reading and writing. This four-week course is the equivalent of FR 231-232. *Prerequisite: FR 102 or FR 109 or FR 111 or per placement exam score.*

FR 231. Intermediate French I

3.00

A thorough review of grammar, vocabulary building, conversation, composition and reading. *Prerequisite: FR 102 or FR 109 or FR 111 or placement exam score.*

FR 232. Intermediate French II

3.00

A thorough review of grammar, vocabulary building, conversation, composition and reading at the advanced intermediate level. *Prerequisite: FR 231 or permission of the instructor or per placement exam score.*

FR 300. Grammar and Communication

3.00

Intensive training in grammatical structures and their application to oral and written communication. Instruction is in French. Fulfills the College of Arts and Letters writing-intensive requirement for the major. *Prerequisite: FR 212 or FR 232 or placement exam score.*

FR 307. History of French Civilization

3.00

A study of the social, economic, political and artistic development of France from the Middle Ages to 1900. Instruction is in French. *Prerequisite: FR 300.*

FR 307P. History of French Civilization

3.00

A study of the social, economic, political and artistic development of France from the Middle Ages to the present. Instruction is in French. *Prerequisite: FR 300 is the prerequisite.*

FR 308. Contemporary French Civilization

3.00

A study of French life and culture with emphasis on France in the 20th century. Instruction is in French. *Prerequisite: FR 300.*

FR 315. French Phonetics

3.00

Intensive drill in French sounds and intonation patterns. Instruction is in French. *Prerequisite: FR 300.*

FR 320. French Oral and Written Communication

3.00

Intensive training in the use of modern, everyday French with emphasis on conversation and composition. Readings in French will provide a context for discussion and writing. *Prerequisite: FR 300 or equivalent.*

FR 330. Business French

3.00

A study of commercial and technical vocabulary and trade customs in conjunction with practice in the art of commercial communication including interviews, letter writing and simultaneous interpretation. Instruction is in French. *Prerequisite: FR 300.*

FR 335. Introduction to French Literature

3.00

A study of the main literary schools from Classicism to the Nouveau Roman. Textual analysis of sample writings representative of the most important literary movements. Instruction is in French. Required for majors. *Prerequisite: FR 320.*

FR 339. A Survey of French Literature

3.00

339A: A thorough analysis of selected passages from important authors of the Middle Ages and the Renaissance.

339B: A thorough analysis of selected passages from important authors of the 17th century.

339C: A thorough analysis of selected passages from important authors of the Age of Enlightenment. Instruction is in French.

Prerequisite: FR 320.

FR 339C. French Literature of the Enlightenment

3.00

The purpose of this course is to acquaint students with 18th century French literature and culture through the study of key influential texts. Students' analyses of these texts (i.e. essays, novels, plays, films, paintings and comics) will be grounded in key political, scientific and artistic movements. *Prerequisite: FR 320.*

FR 351. French/English Translation

3.00

An intensive course in writing and translation from French into English and from English into French. Contemporary topics taken from various fields. Comparative terminology. *Prerequisite: FR 320.*

FR 375. Business and Society in France

3.00

This course explores the development of French society in the historical, political, and economic context. In this course several aspects will be investigated: agricultural, textile, fashion, wine industry, and motion picture, music, media industries, and import and export products. In addition, this course will include the study of banking and financial institutions, health and education systems. *Prerequisite: FR 300.*

FR 399. French Short Stories

3.00

The purpose of this course is to acquaint students with different types of French short stories and the various narrative techniques writers use to address issues of plot, character, place and theme. Students will acquire familiarity with methodologies and tools that will sharpen their understanding of the genre and their ability to analyze it. Students will engage with the course material through academic and/or creative writing. Instruction and readings are in French. *Prerequisite: FR 320*

FR 400. Advanced Conversation

3.00

This course centers on various basic communicative functions such as convincing, narrating, describing, negotiating, and obtaining and giving information. Students will experiment with real-life situations, debate about current events and discuss cultural perspectives and contemporary issues. In order to produce and reproduce oral scenarios, students may use role playing and public speaking techniques as well as authentic materials (visual, audio and textual) to interact orally in conversational French. Instruction is in French. *Prerequisite: FR 320.*

FR 401. Advanced Writing

3.00

This class provides students with different types of textual, descriptive, narrative and argumentative models. Students will experiment with a wide array of material, analyzing and producing their own cultural and/or literary materials that may include advertisements, comics, news, scenarios, plays, short stories, receipts, and blogs, reinforcing their academic writing and exploring their creativity in French. Instruction and readings are in French. *Prerequisite: FR 320*

FR 420. Advanced Genre Studies

3.00

420A: A study of French theatre from the Middle Ages to the 20th century.

420B: A study of French poetry from the Middle Ages to the 20th century.

420C: A study of French narrative fiction from the Middle Ages to the 20th century. Instruction is in French.

Prerequisite: FR 320.

FR 446. Special Topics in French Literature

3.00

Study of a particular topic in French literature. It may cover one or more genre of French literature. Course may be repeated if content varies. *Prerequisite: FR 320.*

FR 447. Special Topics in French Civilization and Culture

3.00

Students will study a particular topic in the civilization and/or culture of Francophone countries. Course may be repeated if content varies. *Prerequisite: FR 320.*

FR 448. Special Topics in French Linguistics

3.00

Students will study a particular topic of French linguistics. Topics could include an introduction to French sociolinguistics and psycholinguistics. Course may be repeated if content varies. *Prerequisite: FR 320.*

FR 465. French Cinema 1930-1980

3.00

A study of French cinematography from 1930 to 1980. Emphasis given on the following directors: Renoir, Pagnol, Carné-Prévert, Cocteau, Vadim, Chabrol, Resnais, Godard, Rohmer, Lelouch, Truffaut and Malle. Instruction is in French. Counts as a culture course, not as a literature course. *Prerequisite: FR 320.*

FR 466. Contemporary French Cinema

3.00

A study of French cinema from the 1990s until the present and its place in contemporary French culture. The course will focus on films dealing with specific moments or events in French history, as well as the evolution of the French film industry. Films to be analyzed in terms of their socio-political context and judged by their cultural perspective. *Prerequisite: FR 320.*

FR 490. Special Studies in French

1.00 - 4.00

Allows students an opportunity to complete independent studies under faculty supervision. *Prerequisite: Permission of the department head.*

FR 499A. Honors

3.00

FR 499B. Honors Project

3.00

FR 499C. Senior Honors Project

2.00

GSCI 161. Science Processes [C3T2]

1.00

Observing, classifying, measuring, inferring, communicating, predicting and experimenting in all science disciplines. This course will introduce core science process skills for all science disciplines in a hands-on, integrated laboratory block. *Corequisite: GSCI 162.*

GSCI 162. Science of the Planets [C3T2]

2.00

The course will focus on the Earth and her neighbors, including the formation, evolution and dynamics of the Solar System. Students will also explore the similarities and differences of different solar system bodies (stars, planets, asteroids, comets) and the possibilities for finding life elsewhere. *Corequisite: GSCI 161.*

GSCI 163. The Matter of Matter [C3T2]

1.00

This course will focus on the topic of matter: particle theory, forms, characteristics, properties, atomic theory and models, conservation of mass and energy, nuclear reactions, heat transfer within matter, chemical bonds and chemical structures. *Corequisite: GSCI 164.*

GSCI 164. Physical Science: Learning Through Teaching [C3T2]

2.00

A hands-on conversation on how technology, science and engineering come together to describe our world. The course will cover many of the traditional concepts presented in an introductory physics course. The course will treat coordinate systems and their use in describing motion, forces and energy conservation, thermodynamics (temperature, pressure, heat), light (color, ray model, wave model), waves (sound), magnetism, and electricity. The course will indirectly reinforce skills developed in other courses in the package including scientific tools (mathematics, graphic, diagramming, experimenting, and analyzing data) and using informational resources. *Corequisite: GSCI 163.*

GSCI 165. The Way Life Works [C3T2]

1.00

Patterns, energy, information, life's machinery, feedback, community and evolution. These are major themes in how life works. This course will use these themes as a backdrop for looking at the way life works. *Corequisite: GSCI 166.*

GSCI 166. Environment in Context

2.00

This course will use environmental issues and topics as a unifying concept to introduce ecology, environmental chemistry and evolution. Topics such as resource utilization and conservation, air and water quality issues, ecological succession, community processes, biological diversity and evolution may be used to illustrate the concepts and to demonstrate the relationship between science and public policy. *Corequisite: GSCI 165 .*

CISE 469E. Visualizing Change

3.00

This interdisciplinary course will provide students with skills related to using computers to visualize environmental, political and cultural changes that have taken place and with knowledge of ways to communicate information with communities and other stakeholders effectively. As part of the course, students will complete a project and share the results with stakeholders. *Prerequisite:* Junior or senior standing.GEOG 215 , GEOG 216 or a comparable GIS or remote sensing course.

GEOG 161. Geospatial Tools and Techniques

1.00 - 6.00, variable

An introduction to the use of geospatial tools, such as geographic information systems (GIS), global positioning systems (GPS) and remote sensing, applied to a variety of areas, including cultural geography, environmental science, ecology, geology and public planning.

GEOG 200. Geography: The Global Dimension [C4GE]

3.00

This course promotes global understanding through the study of humans, their institutions and processes, and the resulting interactions between humans and the environment. The course will include the study of Western and nonWestern peoples and their social, cultural, political and economic relationships. May be used for general education credit.

GEOG 210. Physical Geography (2, 2)

4.00

This introductory course is an examination of systems and processes that influence patterns of Earth's atmosphere, biotic communities, soils and landforms at multiple spatial and temporal scales. Included are classroom and laboratory experiences that are geared toward investigating interrelationships among atmospheric conditions, Earth's natural surface characteristics and human-induced modifications of Earth's features.

GEOG 215. Introduction to Geographic Information Science and Cartography

3.00

Basic principles of geographic information systems and map design, including their use in spatial analysis and information management.

GEOG 216. Earth Observation and GPS

3.00

An introduction to remote sensing, global positioning system (GPS) and computer fundamentals in Geographic Science. Basic concepts will be illustrated with practical applications, including hands-on work collecting data with GPS units and exploring remote sensing images from a variety of different instruments. Environmental applications will be featured.

GEOG 230. Spatial Thinking and Problem Solving

3.00

Introduction to the critical thinking skills associated with problems with inherent spatial components. Identification of the spatial elements of a given problem, the data requirements for addressing that problem, collections/acquisitions and organization of data, and use of geographic information systems to explore spatial patterns relevant to the problem of interest. *Prerequisite: GEOG 215 with a "C" or better, GEOG 216 with a "C" or better and an introductory course in Statistics (ISAT 251, MATH 220 or equivalent) or permission of the instructor.*

GEOG 280. Human Geography: The Cultural Landscape

3.00

The course themes are human culture, cultural variations over the face of the Earth and how these variations are related to selected global issues. Topics covered include world demographics, world religions and languages, patterns of human migration, political systems and human conflict, agricultural systems and impact on the physical world.

GEOG 290. Human-Environment Interactions

3.00

This course evaluates human-environment interactions from a holistic point of view. It incorporates geographic perspectives of these interactions, which include political, cultural, social, economic, and ethical factors that influence how people perceive, impact, and manage the natural world. The course will emphasize geographic theories of resource use, humans as part of the landscape and human vulnerability to environmental changes. *Prerequisite: GEOG 210 with a "C" or better and GEOG 380 with a "C" or better.*

GEOG 300. Population Geography

3.00

An introduction to population measurement, sources of population data and modern population problems. Topics include distribution, the changing age structure and migration issues affecting the U.S. At the global scale, topics include distribution, global migration patterns, the refugee crisis and prospects for feeding the rapidly increasing human population.

GEOG 301. Introduction to Natural Disasters

3.00

Crosslisted with HUMN 301

This course is designed to give students an overview of the various types of natural disasters; a look at the world regions that are most vulnerable to each type of disaster; and, a preview of disaster planning, management, relief and response as related to natural disasters.

GEOG 305. History and Philosophy of Geography

3.00

Topics from the classical period to the modern period include 20th century theories and paradigm shifts involving cultural geography, physical geography, human-environment traditions, regional geographies and modeling. Diverse philosophies such as quantitative /positivist, qualitative/humanistic, social theory, and GIS are viewed for their contributions to the discipline of geography. *Prerequisite: A grade of "C" or better in GEOG 210 and GEOG 280, and junior standing or permission of the instructor.*

GEOG 308. Environment, Nature and Society

3.00

This course focuses on the interaction and integration of human and physical environments. It uses geographical approaches to examine relationships between people and the natural world, and it explores the origins and implications of the perceived separation of humans and nature. At a variety of scales, and using case studies, issues of resource use, environmental and human vulnerability, global and local environmental change, landscape modification, and human impacts on natural systems are explored. Along with the close analysis of spatial patterns and processes in the natural world, questions of politics, economics, culture, perception, justice and ethics may be considered in the examination of human-environment interactions. *Prerequisite: GEOG 210 with a "C" or better and GEOG 280 with a "C" or better.*

GEOG 310. Environmental Issues

1.00 - 4.00

Courses cover environmental issues such as air pollution, forest and wildlife management, water, resource management, soils and land use, and energy and the environment (among other topics). Courses examine the interface between humans and environmental systems while addressing the impact of social, economic and political systems and activities on the environment. May be repeated as course content changes.

GEOG 315. Field Studies in Geography

3.00

This course exposes students to the methods and techniques commonly used by geographers while conducting fieldwork. The course will cover identifying and defining a researchable project, designing and testing data collection methods, and different methods of collecting, recording and presenting data. Students will also become familiar with various types of field equipment.

GEOG 320. Human Dimensions of Global Change

3.00

This course addresses global change and human development. Conservation, sustainability and development are core themes that will be related to current changes occurring on a global scale. Global changes to be discussed in the course relate to the climate, biodiversity, natural resources and human populations. Sustainability will be introduced as a dimension of human development. *Prerequisite: GEOG 290 with a "C" or better or GEOG 308 with a "C" or better.*

GEOG 322. Agricultural Systems

3.00

This course covers four distinct areas: the foundation of agriculture, the nature and distribution of soils on a global basis; the

history of agriculture from the original selection of domestic crops to the 20th century; modern industrial agriculture and trade; and alternatives to chemical and energy intensive agriculture in the 21st century. *Prerequisite: GEOG 290 with a "C" or better, GEOG 308 with a "C" or better or permission of Instructor.*

GEOG 323. The Geography of Human Genetics, Infectious Diseases and Diet

3.00

Throughout history, infectious diseases have profoundly affected human populations. Using a case study approach, this course will give students an opportunity to investigate social and historical aspects of infectious disease as well as the microbiology, genetics, biochemistry and medical aspects of human infectious diseases and diet.

GEOG 325. Environmental Ethics

3.00

Examines the basic principles of resource use including geographic, economic, social and political processes. Explores concepts underlying such issues as resource consumption and conservation, environmental perception, resource and environmental conflict, population growth and control, carrying capacity, and the evolution of the environmental movement.

GEOG 327. Climatology

3.00

The systematic study of the atmosphere with emphasis on such phenomena as temperature, pressure, humidity, air masses and fronts; the occurrence of these phenomena on a global basis; and a detailed survey of the worldwide distribution of climate types. *Prerequisite: GEOG 210 with a "C" or better or GEOL 320*

GEOG 329. Global Climate Change

3.00

This course examines the interrelationship of the physical nature of the climate system, climate variability and change, and human activities. Case studies (El Nino, global warming, and stratospheric ozone depletion) are used to investigate how climate affects society, how human activities affect climate, and how nonclimatic issues complicate our understanding of the relationship between climate and society. We consider how projections of future weather and climate affect decision-making. *Prerequisite: GEOG 210 with a "C" or better.*

GEOG 331. Geography of Virginia

3.00

The course will examine the human and physical geography of the development of modern-day Virginia, providing an overview of its prehistory, then tracing its development from the beginning of the seventeenth century through the present. The course will include an analysis of Virginia's population, resources, and regional landscapes as they have been influenced by physical, cultural, historical, and economic factors. The relationship of Virginia to the rest of the world will also be examined.

GEOG 332. Geography of Europe

3.00

Geographic assessment of regional and national characteristics of the European nations.

GEOG 334. Geography of East and Southeast Asia

3.00

A survey of the physical and cultural environments of China, Taiwan, Japan, the Koreas, Indochina and the countries of Southeast Asia. Topics covered include weather and climate, physiography, natural resources, population characteristics, political systems, aspects of the economy and the role that each country plays on the regional and world stage.

GEOG 335. Geography of Africa

3.00

An introduction to the regional geography of Sub-Saharan Africa that examines the physical geography of the continent, the historical roots of its present political geography, the consequences of its colonial past on communities and cultures as well as its natural resources. Students will examine continental issues such as resource management, food production, hunger, disease patterns and management of wildlife.

GEOG 336. Environmental Hazards: A Focus on Southeast Asia

3.00

This course will focus on interactions between earth surface systems and social environments to demonstrate the complexity of natural hazards, and particularly those of Southeast Asia. Through regional geography, students will learn differing adaptation mechanisms of societies and cultures unique to the area and some of the natural hazards within the region.

GEOG 337. Geography of Latin America

3.00

A study of countries in Latin America which includes their physical landforms, weather and climate, biogeography, natural resource base, attitudes toward the physical environment, characteristics of the economy, the current political role in international activities, and population characteristics that include growth rate, distribution, migration and ethnicity.

GEOG 338. Geography of the Philippine Islands: Problems and Possibilities

3.00

Exploration of the Philippines focuses on poverty, environmental conservation, resource exploitation and ecosystem degradation in upland and marine environments. Topics include population dynamics, political pressure and instability, and urban challenges. The future of the country is investigated on all geographic scales with regard to its role in a globalized world economy.

GEOG 339. Geography of the Caribbean

3.00

This course is designed to give students a general geographical overview of the islands states and territories surrounded by the Caribbean Sea. Students will study physical landforms, weather and climate, environmental issues, population characteristics, history, local and regional politics, and economic aspects of political units in the region.

GEOG 340. Biogeography

3.00

This course emphasizes geographical biogeography and is as an advanced physical geography class. Included are analyses of spatial patterns of biota from local to global scales and examinations of the systems and processes that result in spatial and temporal patterns of species existence and diversity, community composition, energy pathways, adaptive traits, and human influences on biotic systems and processes. *Prerequisite: GEOG 210 with a "C" or better*

GEOG 341. Wilderness Techniques

3.00

Wilderness legislation, legal mandates and wilderness issues are examined. Human impacts due to overuse or conflicting uses are studied, as are the philosophical aspects of wilderness ethics. This course is taught entirely in the field. Camping and hiking are required. *Prerequisite: Permission of the instructor.*

GEOG 342. Management and Protection of Natural Resources

3.00

This course provides a managerial perspective for protection and management of natural resources. A systems approach for applied management strategies is provided for aquatic, terrestrial, threatened and endangered ecosystems. Topics include application of state, federal, international laws, regulations, policies and guidelines. Students develop management plans and explore jurisdictional resource protection issues.

GEOG 343. Wildlife Management

3.00

An introductory discussion of applied management strategies for wildlife species and their ecological requirements is provided relative to human influences. Management techniques that are useful for determining population or health status are demonstrated for select vertebrate species. The evolution of wildlife laws, polices and management strategies are addressed to provide relevant awareness into the appropriate concepts of wildlife management.

GEOG 344. Globalization and Development

3.00

An overview of the classification of economic activities, the factors involved in the location of various types of economic activities and the regional variation in the standard of living associated with economic development. Additional topics include regional economic growth and types of economic systems and development perspectives, the roles that politics and demographics play in the economic development of a country, and the globalization of economic activities.

GEOG 345. Geography of Poverty

3.00

This course provides a geographical perspective on poverty faced by communities and countries of the world today. The focus is on how poverty is defined, measured and mapped, the causes and impacts of poverty, theories for ending poverty and organizations that work to address poverty. It includes a geographical study of communities and countries that have successfully alleviated extreme poverty.

GEOG 348. Indigenous Geographies

3.00

This course introduces indigenous geographic representations. Topics include territorial sovereignty, traditional resource use, sustainable development and protection of sacred sites. Students will explore the central geographic practice of cartography, which has taken on new meaning as cultural identification for Indigenous peoples. The use of new technologies to represent traditional understandings of Earth is also explored. *Prerequisite: GEOG 290, GEOG 308 or permission of instructor.*

GEOG 350. Topics in Geography

1.00 - 3.00

Examination of geographic topics that are of current interest. Can be repeated as course content changes. *Prerequisite: GEOG 200 or GEOG 210 or GEOG 215 or GEOG 280, or permission of the instructor.*

GEOG 355. Global Positioning Systems

3.00

This course provides fundamental and advanced instruction in global positioning systems (GPS) technology. Topics include the history and development of GPS, system operation, the integration of satellite and ground components, applications and visualization. Active learning allows students to operate different models of receivers, minimize field error, gather and differentially correct data, and import the finished project into a GIS for further analysis. Students will form teams to design, execute and present a formal project to a client.

GEOG 360. GIS for Humanitarian Assistance

3.00

Crosslisted with HUMN 360.

In responding to humanitarian crises, governments and aid organizations must deploy aid workers, deliver essential services, set up temporary settlements, and distribute items such as water and food that are needed for survival. Spatial analysis and maps are critical to the success of these efforts. In this course, students learn the basics of Geographic Information Systems (GIS) for humanitarian assistance and learn how relief organizations use GIS in their work. *Prerequisite: GEOG 215.*

GEOG 365. Cartography and Geospatial Visualization

3.00

This course examines the fundamentals of visualizing spatial data in static and dynamic environments. Students will learn about cartographic design, thematic cartographic techniques, developing spatial data from non-spatial information and with GPS equipment, and geographic visualization. Students will also develop a portfolio of hard copy and soft copy visualizations. *Prerequisite: GEOG 215 with a "C" or better.*

GEOG 366. Intermediate Geographic Information Science

3.00

An in-depth course in geographic information science and its role in technology and society. Spatial databases and descriptive data will be created and implemented into various geographic information systems. Advanced operations will be used to explore the analysis capabilities of geographic information systems. *Prerequisite: Prerequisites: GEOG 215 with a "C" or better or GEOG 161 and permission of the instructor.*

GEOG 375. Political Geography

3.00

Geopolitical conflicts and issues are examined. Concepts such as territoriality, nationalism, religious and ethnic struggle, environmental degradation, and freedom and justice are discussed in the context of political unrest. Significant geopolitical theories and social and economic processes are explored.

GEOG 376. Urban Geography

3.00

Study of the city in its geographic setting, giving perspective of modern urban problems, origin and growth of cities and influence of location on city functions. Looks at the internal structure of cities and the influence of the internal structure on its population groups.

GEOG 380. Cultural Geography

3.00

Introduction to cultural geography with emphasis on diversity of language, religion and folklore, as well as culture traits and practices and their historical diffusion. Ties to livelihood, the rural-urban continuum and demographic change are explored, as are foci on philosophy, power, race, class and gender. Exploitation and sustainability will be introduced as dimensions of cultural and environmental interaction.

GEOG 385. Principles of Remote Sensing

3.00

This course is an introduction to remote sensing, the study of images and other types of data acquired by satellites and aircraft. Topics include the principles underlying multiple types of remote sensing, the properties of common data types, making measurements using aerial photographs, basic digital image processing, and applications. *Prerequisite: GEOG 216 with a "C" or better*

GEOG 390. Practicing Geographic Science

1.00

Professional development for students in geography. Educational opportunities and career options. Library and literature research skills. *Prerequisite: Junior standing.*

GEOG 402. Forest Ecology

4.00

Crosslisted with BIO 502, BIO 402

A study of the function, structure, and composition of forested ecosystems. The effect of physiography on the distribution of forest communities will be explored. Issues of forest management and restoration will also be considered. Field laboratory topics will include dendrology and sampling techniques within different forest successional stages. *Prerequisite: BIO 250 or permission of the instructor.*

GEOG 406. Forest Inventory: A Geospatial Approach

3.00

This course teaches forest measurement at the tree, plot, stand, and forest levels. It includes heights, stem diameters, volumes, and biomasses of individual trees; fixed and variable radius plots; basal area estimates; sampling designs, and stand and stock table construction. Students learn how geospatial technologies can be used to collect data on forests, make forest inventories more accurate and precise, and assist in performing forest-related analyses and visualizations. *Prerequisite: GEOG 215 with a "C" or better, GEOG 216 with a "C" or better and an introductory course in statistics (MATH 220 ,ISAT 251 , COB 191 or equivalent), or permission of instructor.*

GEOG 410. Geography and Film

3.00

This course is concerned with the intersection of geography and film. An always-present undercurrent focuses on films whose location and/or culture are an essential backdrop in the cinematic experience. *Prerequisite: GEOG 290, GEOG 308 or permission of instructor.*

GEOG 415. Environment, Landscape and Culture

3.00

This seminar analyzes human-environment interactions as shaped by cultural perceptions, past events and ecological processes.

Place-based and interdisciplinary, landscape studies focus on the unique circumstances of a location and shift temporal and geographic scales to achieve broader understandings of cultural and ecological adaptation and resilience. Methods of historical ecology and field research are introduced. Regional projects underscore readings and research assignments. *Prerequisite: GEOG 290, GEOG 308 or permission of instructor.*

GEOG 427. Water Resources of the World

3.00

Humans face water challenges that can be understood through the lens of geography. Students will study different physical aspects of Earth's water, including the hydrologic cycle, climate controls of precipitation, river basin hydrology, water quality and availability, and aquatic ecosystems. The course investigates human dimensions of water such as economics, disease, management and planning, conflict, and the future of water resources. *Prerequisite: GEOG 210 or permission of the instructor.*

GEOG 429. Sustainability: An Ecological Perspective

3.00

Crosslisted with ISAT 429

This course examines present global environmental impacts and efforts made to change production and consumption patterns toward those that reduce impact on ecosystems or promote increased ecosystems health. The focus lies in understanding the basic resources of productivity including soils, agricultural systems, agroforestry, forestry and aquatic environments and applying solutions on a personal and community level. *Prerequisite: GEOG 290, GEOG 308 or permission of the instructor.*

GEOG 430. Geography of Crop Plants

3.00

This course evaluates the influence of geography on crops and crop development by examining the evolution, genetic diversity and cultivation of agricultural crops. Topics include the origins of agriculture, patterns of geographic spread, and the interrelationships between domesticated plants and the societies that grow them.

GEOG 440. Global Biodiversity

3.00

This project-based course emphasizes physical and human-oriented processes that influence Earth's biodiversity. It includes how human constructs influence the number of species counted, biodiversity measurement techniques and how geographers contribute to conservation methods. It introduces human challenges that are causing a decline in biodiversity and resultant impacts on human quality of life. *Prerequisite: Either GEOG 290 or GEOG 308, and GEOG 340.*

GEOG 465. Topics in GIS

3.00

The course examines varying topical issues in geographic information science. The course may be repeated as course topics vary. *Prerequisite: GEOG 366 or permission of the instructor.*

GEOG 466. GIS and Geographic Databases

3.00

An introduction to the creation, use and management of digital spatial data used by industry and government. Integration of large spatial data sets into the geographic information system, data management and data exchange, and the geodetic transformation of data sets are emphasized. Digital elevation models, land use data, population data, digital topographic map and street network data will be used. *Prerequisite: GEOG 366 or permission of the instructor is the prerequisite.*

GEOG 467. GIS Project Management

3.00

An introduction to geographic information systems (GIS) project management. Basic project management techniques will be applied by defining, designing, implementing and documenting a geographic information system. *Prerequisite: GEOG 366 or permission of the instructor.*

GEOG 468. Internet Geographic Information Systems

3.00

Theoretical and practical exploration of methods, standards and policies related to the development and utilization of geographic information systems on the Internet. Students will create and utilize distributed geospatial data and analytical systems using the World Wide Web and the Internet to address geographical problems. *Prerequisite: GEOG 365 or GEOG 366.*

GEOG 469. Applications of Geographic Information Systems

3.00

The course advances the knowledge of GIS in theory and practice by focusing on specific application areas. Spatial databases and complex attribute data will be created, and GIS modeling techniques will be used to solve problems relevant to the specified topical area. The course may be repeated once for additional credit when the topic changes. *Prerequisite: GEOG 366 or permission of the instructor.*

GEOG 470. Senior Seminar in Environmental Conservation, Sustainability and Development

3.00

This capstone seminar integrates the student's previous class experiences to provide a holistic exploration of linkages between environmental conservation and human development status and strategies through in-depth analysis of compelling human-environment issues. Topics vary by semester and include environmental politics, global perspectives on population, sustainable communities and global biodiversity. For majors and minors only. *Prerequisite: Senior standing and either GEOG 290 or GEOG 308.*

GEOG 476. Sustainable Cities Seminar

3.00

This seminar explores ways to make cities more environmentally, socially and economically sustainable. Students will study key urban sustainability principles, examine global case studies, undertake local fieldwork and pursue projects developing interventions in real-world city settings. The course emphasizes a geographical approach in addressing urban human and environmental challenges. *Prerequisite: GEOG 290 or GEOG 308.*

GEOG 485. Processing Remotely Sensed Data

3.00

This course focuses on computer-based techniques for processing remotely sensed data and applications of these techniques. Subjects covered will include geometric and radiometric correction, image enhancement, data transformations, change detection and quantification, and classification. Both traditional techniques and techniques designed for newly available data types will be examined. *Prerequisite: GEOG 385 or permission of the instructor.*

GEOG 490. Senior Research or Field Practicum

3.00

Working with a research adviser, student completes an internship, a study abroad program, or project research. Student delivers interim progress reports and an annotated bibliography or other relevant research products. May be repeated once. *Prerequisite: GEOG 390 and permission of research adviser.*

GEOG 491. International Studies

1.00 - 3.00

Student will make arrangements for the international experience. A research project or work-study project will be designed by the student and faculty member prior to departure. The research of work will be carried out in the country of travel. May not be taken for capstone credit. Project must be approved by GS faculty. May be repeated for credit.

GEOG 495. Internship in Geography

3.00 - 6.00

Practical experience within a public agency, non-profit or private business utilizing geographic methodology. Work experience will be supervised by an official of the business or agency and a faculty member. Periodic seminars and written reports are required. *Prerequisite: Permission of the faculty sponsor and the GS Program Operations Manager. May not be taken for capstone credit.*

GEOG 497. Independent Study

3.00

Student performs an independent research project, either alone or within an investigative team, to identify and analyze a problem from a geographic perspective. May be taken for repeated credit. May not be taken for capstone credit.

GEOG 499 A, B, C. Honors in Geography

1.00 - 3.00

Prerequisite: Year course.

GEOL 102. Environment: Earth [C3NS]

3.00

A study of geological processes causing global change and their impact on human thought. The relationship between some geological processes and life on the Earth is also considered. Not available for major or minor credit in geology. Students may not receive credit for both GEOL 102 and ISCI 102.

GEOL 110. Physical Geology [C3NS]

3.00

A systematic study of earth materials and the internal and external processes that affect earth structure and landforms. Topics include the genesis/properties of rocks and minerals, plate tectonics, and the agents of change that drive surface processes and land form development. The laboratory and lecture portions of GEOL 110 must be taken concurrently. *Corequisite: GEOL 110L.*

GEOL 110L. Physical Geology Laboratory [C3NS]

1.00

This laboratory course is designed to complement and supplement the GEOL 110 course. The laboratory and lecture portions must be taken concurrently. *Prerequisite: GEOL 110 or permission of the instructor.*

GEOL 115. Earth Systems and Climate Change [C3NS]

3.00

This course explores cycles, trends and abrupt events in the Earth system. Analyses of the geologic record and global climate models provide perspective for understanding paleoclimate and future climate changes, including global warming. Current hypotheses for causes of climate change are evaluated, including plate tectonics, orbital cyclicity, variations in the sun's strength and human activities. The two reoccurring questions of this class are: What are Earth's climate stories? How do we know?

GEOL 167. History and Philosophy of the Geosciences

3.00

As an introductory experience in the Bachelor of Arts in Earth Science, students will be inculcated in the philosophy of geosciences as an interdisciplinary medium for extending classical science viewpoints to complex earth systems. Students will study the geosciences as distinct among sciences, establishing relevance and value of earth science literacy in professional and personal settings.

GEOL 210. Applied Physical Geology [C3NS]

3.00

A problem-based study of earth materials and the processes that affect earth structure and landforms. Topics include plate tectonics, the genesis/properties of rocks and minerals, and agents of change that drive surface processes and landform development. Quantitative problem-solving skills will be applied to case studies that address 3D visualization and time-based processes, such as earth materials, solid earth and surface processes, natural hazards and engineering applications. May be used for general education credit.

GEOL 211. Introduction to Oceanography [C3NS]

3.00

An introduction to the oceanography of coastal environs including barrier islands, estuaries and tidal marshes. The physical, geological and biochemical characteristics of coastal waters will be discussed in the context of the economic and social pressures brought to bear on these areas by an increasing global population. Cannot receive credit for both GEOL 211 and GEOL 401. May be used for general education credit.

GEOL 230. Evolution of Earth (3, 2)

4.00

An introduction to the evidence, methods and assumptions used by scientists to unravel the Earth's origin and history. Emphasis on rock analysis/interpretation, modern and ancient processes of mountain building, origin and evolution of life and the history of the North American continent. *Prerequisite: GEOL 110L or permission of the instructor.*

GEOL 280. Mineralogy (3, 2)

4.00

A comprehensive study of minerals, including: crystallography, mineral chemistry, x-ray diffraction, mineral optics with thin section recognition using petrographic microscope, and hand specimen identification of both silicate and non-silicate minerals. *Prerequisite: GEOL 110L.*

GEOL 291. Writing and Communicating in the Geosciences

1.00

This course prepares students for independent research by providing them the fundamental skills in literature searches, writing, critical reading and communication in the geosciences. *Prerequisite: GEOL 110 OR GEOL 102, GEOL 115; must take prior to senior year.*

GEOL 300. Introduction to Petrology (3, 3)

4.00

Igneous and metamorphic processes explained using crystallization theory, phase diagrams, thermodynamics and geochemistry; laboratory study of rocks, their chemical and mineralogical signatures, and their geologic origins. *Prerequisite: GEOL 280 & CHEM 131; or consent of instructor*

GEOL 301. Earth Science for Teachers

4.00

Earth science content is blended with a systems approach to provide pre-service teachers with an understanding of how the Earth works, as well as strategies for teaching it. Major content themes include reconstructing the geologic history of the mid-Atlantic, exploring the interaction of living things and the environment, and predicting how matter and energy circulate in the earth system.

GEOL 302. Sedimentary Petrology

1.00

This is a course about sedimentary rocks in hand sample and thin section. With the polarizing microscope, students will study thin sections of outcrop and core samples. They will identify common minerals, textures and fabrics. They will identify the four components of all sedimentary rocks (framework grains, cements, matrix, pore types) and will make qualitative and quantitative measurements at a fundamentally different scale than is possible with just a field study of sedimentary rocks. *Prerequisite: GEOL 280 or permission of the instructor.*

GEOL 307. Planetary Geology (2, 2)

3.00

A survey of currently developing ideas in planetology including origin of the planets, meteorites and planetary interiors. Also included are geologic processes and land forms on the moon and terrestrial planets, their modification under various planetary environments, and analogies to familiar earth land forms. Includes laboratory. *Prerequisite: GEOL 110L.*

GEOL 310 A - D. Environmental Impact

2.00 - 3.00, repeatable to 6 credits

Focuses on a selected environmental realm. The course will examine the interface between human activities and environmental systems. It will address the impacts of social, economic and political activities on the environment. A-Atmosphere (air pollution); B-Biosphere (vegetation/wildlife); C-Hydrosphere (water); D-Lithosphere (geologic hazards/land issues).

GEOL 320. Meteorology

3.00

A survey of the science of weather including weather forecasting, weather maps and related atmospheric processes. Emphasis is placed on the dynamic aspects of meteorology and the interrelationships of atmospheric phenomena with land masses and the world ocean.

GEOL 350. Paleobiology (3, 2)

4.00

Crosslisted with BIO 350

The evolution and ecological structure of the biosphere from the origin of life to the present, emphasizing the evolution and paleobiology of animal life as shown by the fossil record. Lectures discuss methods used to interpret the fossil record and cover topics such as phylogeny and systematics, functional morphology, biostratigraphy, paleoecology, evolution and extinction. Laboratories focus on the major groups of invertebrates that are common in the geologic record. *Prerequisite: GEOL 230, BIO 150 or permission of instructor.*

GEOL 355. Geochemistry of Natural Waters

3.00

Crosslisted with CHEM 355

Study of chemical theory and reactions important in natural water systems. The role of atmospheric, geologic and biological inputs in determining the geochemistry of streams, rivers and oceans. *Prerequisite: CHEM 131 and CHEM 132 or equivalent.*

GEOL 360. GIS for the Geoscientist

3.00

This course is designed to help students master practical geospatial skills helpful for an entry-level job or graduate school in the geosciences.

GEOL 365. Structural Geology

4.00

Major and minor structures of the Earth's crust. Mechanical principles involved in folding, faulting, jointing and penecontemporaneous structures. The causes and results of mountain building processes. Preparation and interpretation of geologic maps. *Prerequisite: GEOL 110L*

GEOL 367. Genesis of Solid Earth Materials (3, 2)

4.00

This course addresses the natural relationship between minerals and the rocks they make up. Using the concept of mineralizing environments, illustrated by classic examples, students will investigate minerals through the processes of mineral genesis and associated rock types. This approach provides insight and predictive value for natural conditions in which specific minerals and rocks occur. Not acceptable for B.S. in geology. *Prerequisite: GEOL 110L.*

GEOL 377. Earth Surface Processes (2, 2)

3.00

The interrelationships among climate, landscapes, soils and bedrock geology are examined using the mid-Atlantic region as a conceptual laboratory. Course instruction includes lecture, laboratory and field trip meetings. The processes of rock weathering and erosion and soil formation are reinvestigated. Topographic maps and aerial photography are examined for landforms and landscape evolution. *Prerequisite: GEOL 110L, GEOL 210 or permission from the instructor*

GEOL 380. Genetic Mineralogy (2, 2)

3.00

A study of mineral genesis. Emphasis is directed toward mineralogical environments, mineral associations and the geology/mineralogy of classical localities. An appreciation of mineral value and aesthetics is incorporated throughout the course. *Prerequisite: GEOL 280.*

GEOL 387. Stratigraphy, Structure, and Tectonics (3, 2)

4.00

Examination of how stratigraphic, structural, and tectonic principles control the character and distribution of rocks. Study of principles, regional patterns in sedimentary rocks, and stresses that deform rocks are explored in laboratory and field exercises. Topics and techniques are discussed within the framework of the 1.2 billion year geologic history of the VA region and its connection with tectonic processes throughout the rest of the world. *Prerequisite: GEOL 110L and GEOL 230*

GEOL 388. Advanced Structure, Stratigraphy, Tectonics (3,2)

4.00

Advanced concepts in structural geology (analyses of rheology, stress & strain, deformation fabrics, and chronologic constraints) applied to the tectonic evolution of orogens and basins. This will include exploration of the mechanisms controlling the stratigraphic record (auto- and allogenic mechanisms and sequence theory) of basins, as well as methods of dating the stratigraphic record (biofacies and biostratigraphy, geochronology and chronostratigraphy, and magneto and chemostratigraphy). *Prerequisite: Prerequisite: GEOL 387.*

GEOL 390. Laboratory Techniques in Geology (2, 2)

3.00

An elective course for science majors. A study of the basic theories and techniques of laboratory methods and instrumentation. Implementation and application of techniques to geological problems. *Prerequisite: GEOL 280 or permission of the instructor*

GEOL 398. Topics in Geology

1.00 - 4.00

Topics in geology at the advanced level. May be repeated for credit when course content changes. Topics selected may determine prerequisites. Students should consult the instructor prior to enrolling in the course. *Prerequisite: Permission of the instructor.*

GEOL 399. Field Geology

6.00

Field Geology is the capstone course for geology majors. Students learn to recognize and interpret a wide variety of rocks and structures, as well as geomorphic, hydrologic, and other geologic features. Methods of mapmaking, data recording, and report preparation are emphasized. Projects from one to five days' duration are conducted in regions where igneous, metamorphic, and sedimentary rocks, surficial deposits, and karst features are well-exposed. *Prerequisite: GEOL 300 and GEOL 387 or permission of the instructor.*

GEOL 400. Geology and Ecology of the Bahamas

3.00

Crosslisted with BIO 400

This course explores the geology and ecology of the shallow-water marine environment by examining the preeminent modern example, the Bahamas platform. The Bahamas provide an excellent model for understanding modern and ancient carbonate and reef deposits and a variety of terrestrial/aquatic habitats. Biological processes are responsible for many of the geological features

of the Bahamas, so the course considers the biology/ecology of marine organisms in addition to geological topics. *Prerequisite:* GEOL 110 or GEOL 211 or a 200-level GEOL or BIO course; at least four hours of additional lab science, at least sophomore status, and permission of the instructor.

GEOL 401. Oceanography for Teachers

3.00

A comprehensive study of the world's oceans and the interrelationships among physical, chemical, biological and geological oceanography for pre- and inservice teachers. Special emphases on Virginia coastal oceanography, the National Ocean Literacy Principles and the integration of pedagogy applicable to K-12 instruction. Includes a field trip to the Virginia coast. Credit may not be earned in both GEOL 211 and GEOL 401.

GEOL 405. Vertebrate Paleontology

3.00

Crosslisted with BIO 405

A study of the origin and evolution of the vertebrates. Emphasis will be on understanding how the processes of earth evolution and biological evolution have interacted through time to produce a coherent picture of vertebrate history. *Prerequisite:* GEOL 230, BIO 114, BIO 150 or permission of instructor.

GEOL 406. Paleoclimatology and Paleoceanography

3.00

Investigate the methodologies and data used to reconstruct Earth's climate history. Emphasis will be placed on the marine sediment records of the Cenozoic through detailed lecture, lab activities and course-based original research. Case studies include the Paleocene Eocene Thermal Maximum, the glaciation of Antarctica, Milankovitch cyclicity and Northern Hemisphere glaciation. *Prerequisite:* GEOL 211, GEOL 230 or BIO 354, or permission of instructor.

GEOL 410. Engineering Geology (2, 2)

3.00

Study of the applications of geology to engineering practice. Topics include soil mechanics, foundations, engineering classification of soils, slope stability and mineral aggregates. *Prerequisite:* GEOL 110 or 210 or GEOG 210 and MATH 231 or MATH 235 or equivalent.

GEOL 430. Environmental Soil Science (2, 2)

3.00

The origin, distribution, and chemical, biological, and physical properties of soil are introduced. Processes responsible for soil properties are emphasized. Field trips highlight the sustainability of soils, their distribution across the Shenandoah Valley and their role in biogeochemical cycles. *Prerequisite:* GEOL 110 or GEOG 210 or permission of the instructor may be granted for students with four hours of a lab course.

GEOL 440. Geophysics (3, 2)

4.00

Crosslisted with PHYS 440

A survey of geophysical methods, with joint attention on near-surface and solid earth applications. Topics include seismology, heat flow, gravity, magnetism, electrical methods, ground penetrating radar and geophysical aspects of plate tectonics. Labs focus

on practical experience with data acquisition, reduction, and interpretation and are a combination of field, classroom and computational activities. *Prerequisite: GEOL 110L or PHYS 140 - PHYS 150 or PHYS 250 or permission of the instructor.*

GEOL 442. Field Geophysics

3.00

This course focuses on collection of geophysical data in the field and interpretation, analysis and technical reporting afterwards. Case studies discussed include applications to geology, archaeology, and engineering. Students will get hands-on experience with geophysical equipment and an understanding of how and where these tools can be applied. Topics include Ground Penetrating Radar, Electrical Resistivity, Magnetism, Seismic Refraction and Total Station Data. *Prerequisite: GEOL 110 or GEOL 210 or ANTH 197 or consent of instructor.*

GEOL 460. Hydrogeology (2, 2)

3.00

Basic concepts of subsurface water as a part of the hydrologic cycle. Topics include storativity and permeability in porous media, principles of flow, computer applications, groundwater exploration, and mapping and environmental aspects of groundwater. *Prerequisite: GEOL 110L and two semesters of calculus or permission of the instructor.*

GEOL 477. Contemporary Issues in the Geosciences

4.00

As a capstone experience, this course serves as an opportunity for students to view issues of the Earth system from an Earth-based perspective. Building on previous course work in the major (physical geology, meteorology, oceanography, etc.), students will investigate such issues as global warming, population and sustainable development and environmental ethics. Particular emphasis is placed upon the Earth's perspective from a historical viewpoint. *Prerequisite: GEOL 211, GEOL 320, GEOL 367 and GEOL 377*

GEOL 489. Quantitative Methods in Geology

3.00

An introduction to the mathematical methods and statistical techniques that are employed by scientists in the disciplines of geochemistry, geophysics, hydrology and the petroleum/mineral industry. The course provides the quantitative skills necessary to manipulate geological data.

GEOL 491. Geological Literature and Research

2.00

Provides advanced instruction in literature research to meet the B.A. Earth Science and B.S. Geology research requirements. Activities include the identification of a literature-based research problem, literature research techniques, critical reading and discussion, and the preparation of individual review papers on each student's research topic. *Prerequisite: GEOL 291 or permission of the instructor.*

GEOL 494. Internship in Geology

1.00 - 3.00

Student conducts a research or applied project in geology outside of the university. Requires an approved proposal prior to registration and a final report at the culmination of the project. *Prerequisite: Minimum of eight credit hours in geology, GEOL 291 and a geology GPA of 2.5 or higher.*

GEOL 497. Problems in Geology

1.00 - 3.00

An undergraduate research course in one of the fields of geology. Open to advanced students who have adequate preparation.

Prerequisite: GEOL 291 or permission of the instructor.

GEOL 499A. Honors in Geology

1.00

Prerequisite: GEOL 291 and 3.25 GPA or higher.

GEOL 499B. Honors in Geology

2.00

Prerequisite: GEOL 291 and 3.25 GPA or higher.

GEOL 499C. Honors in Geology

3.00

Prerequisite: GEOL 291 and 3.25 GPA or higher.

GER 101. Elementary German I

3.00 - 4.00

The fundamentals of German through listening, speaking, reading and writing. Practice in pronunciation and development of comprehension. One hour's work a week in the language laboratory. If student has had two or more years of the language in high school, he/she will not receive credit for the course.

GER 102. Elementary German II

3.00 - 4.00

The fundamentals of German through listening, speaking, reading and writing. Practice in pronunciation and development of comprehension. One hour's work a week in the language laboratory. If student has had two or more years of the language in high school, he/she will not receive credit for the course. *Prerequisite: GER 101*

GER 109. Accelerated Review of Elementary German

3.00

Reviews elementary German grammar, reading, writing, speaking and listening skills in German. One hour of work a week in the language laboratory. For students who have had no more than two or three years of German in high school or qualify through the placement exam. *Prerequisite: Permission of the department head or per placement exam score.*

GER 111. Intensive German I

6.00

The fundamentals of German through intensive listening, speaking, reading and writing. This four-week course is the equivalent of GER 101-102.

GER 212. Intensive German II

6.00

The fundamentals of German through intensive listening, speaking, reading and writing at the intermediate level. This four-week course is the equivalent of GER 231-232. *Prerequisite: GER 102, GER 109 or GER 111, or per placement exam score.*

GER 231. Intermediate German I

3.00

A thorough review of grammar and vocabulary building, conversation, composition and reading. *Prerequisite: GER 102, GER 109, and GER 111, or per placement exam score*

GER 232. Intermediate German II

3.00

A thorough review of GER 231 grammar and vocabulary building. Conversation, composition and reading will be chosen to reach competency at the advanced intermediate level. *Prerequisite: GER 231 or sufficient score on the foreign language placement test.*

GER 300. Grammar and Communication

3.00

Intensive training in grammatical structures and their application to oral and written communication. Instruction is in German. Fulfills the College of Arts and Letters writing-intensive requirements for the major. *Prerequisite: GER 232 or per placement exam score.*

GER 307. History of German Civilization

3.00

A study of society, economics, politics and the arts in central Europe from IndoEuropean beginnings to the present. Emphasis is also placed on outstanding contributions of German-speaking people. Instruction is in German. *Prerequisite: GER 300 or equivalent.*

GER 308. Contemporary German Civilization

3.00

A study of life, culture, politics and economics in modern Germany. May be repeated for credit. *Prerequisite: GER 300 or equivalent.*

GER 320. Oral and Written Communication

3.00

Intensive training in the use of modern, everyday German with emphasis on conversation and composition. Readings in German will provide a context for discussion and writing. *Prerequisite: Prerequisite: GER 300 or equivalent.*

GER 330. Business German

3.00

A study of commercial and trade vocabulary and customs in conjunction with practice in commercial communication, including letter writing, interviews and interpretation. Instruction is in German. *Prerequisite: GER 300 or equivalent.*

GER 335. Introduction to German Literature

3.00

A survey of German literature from 750 to the present. Textual analysis of sample writings of the most important literary movements. Instruction is in German. *Prerequisite: GER 300 or equivalent.*

GER 341. Translation Competencies

3.00

In this course, students will develop linguistic competencies required in translation, including reading comprehension, summary writing, text analysis and use of mono- and bilingual dictionaries. Students will learn some basic electronic tools and word processing skills for translators and practice several types of translation, including direct translation, inverse translation and back translation. Fulfills the College of Arts and Letters writing-intensive requirement for the major. Instruction is in English and German. *Prerequisite: Prerequisite: GER 300 or equivalent.*

GER 375. Business and Society in Germany

3.00

Germany-"The Land of Ideas"- known for its engineering and technology, is a leader in innovation and research in every field. It is the strongest economic power in Europe. The course explores German society in its historical, political and economic contexts. Several aspects will be investigated: the EU, Globalization, immigration, environment, family policies, current affairs and the latest trends in the society. Instruction is in German. *Prerequisite: GER 300.*

GER 386. German Short Stories

3.00

A study of literary German short prose from the 18th century to the present, including a selection of fables, fairy tales, modernist parables, aphorisms, narratives and short novellas. Authors studied may include Brecht, Kafka, Hoffmann, Ebner-Eschenbach, Schnitzler, Kleist, Bachmann, Borchert and Mann, among others. Instruction is in German. *Prerequisite: GER 300.*

GER 400. Advanced Conversation

3.00

Discussions deal with topics of current interest. *Prerequisite: GER 300 or permission of the instructor.*

GER 405. The Age of German Classicism

3.00

Reading and interpretation of significant works of Lessing, Goethe and Schiller. Instruction is in German. *Prerequisite: GER 300 or permission of the instructor.*

GER 415. German Romanticism and Realism

3.00

A study of Romanticism and Realism with emphasis on Romantic poetry and the Realistic novel. Instruction is in German. *Prerequisite: GER 300 or permission of the instructor.*

GER 421. German Drama Workshop

3.00

A study of German-language theater from the Enlightenment to the present, including a selection of texts by authors such as

Gotthold Ephraim Lessing, Georg Büchner, Arthur Schnitzler, Bertholt Brecht and Elfriede Jelinek. Instruction is in German.
Prerequisite: GER 300.

GER 425. Modern German Literature

3.00

A study of the works of major German writers of the 20th century. Instruction is in German. *Prerequisite: GER 300 or equivalent.*

GER 436. Studies in German Literature

3.00

Crosslisted with ENG 436

A study of selected works of German literature. Instruction is in English. May be repeated for credit when course content changes.

GER 446. Special Topics in German Literature

3.00

Study of a particular topic in German literature. It may cover all or specific German literature genre. Course may be repeated if content varies. *Prerequisite: GER 300.*

GER 447. Special Topics in German Civilization & Culture

3.00

Students will study a particular topic in the civilization and/or culture of Germany. Course may be repeated if content varies. *Prerequisite: GER 300*

GER 465. German Cinema

3.00

An analysis of the German cinema from the 1920s through the present. Emphasis will be on the relations between the German film and certain seminal periods in German history. *Prerequisite: GER 300 or permission of the instructor*

GER 490. Special Studies in German

1.00 - 4.00

Allows students an opportunity to complete independent studies under faculty supervision. *Prerequisite: Permission of the department head.*

GER 490G. Special Studies German

3.00

GER 499C. Seniors Honors Project

2.00

GERN 280. Social Gerontology

3.00

Crosslisted with SOCI 280

An interdisciplinary introduction to the study of aging. The course provides an overview of issues surrounding aging in contemporary society: personal, familial, communal and societal. *Corequisite: 20 hours of community service-learning.*

GERN 305. Programs and Services for the Elderly

3.00

A review of the programs and services provided for the elderly in the public and private sectors of America. Observations and participation in local programs for the elderly will be required. *Prerequisite: GERN 280/SOCI 280*

GERN 375. Grant Writing for Agencies

3.00

Crosslisted with FAM 375, NPS 375, SOWK 375

Emphasizing active learning, this course teaches the basics of grant and proposal writing. Efficient research, persuasive prose and the importance of relationships are stressed. Private and corporate philanthropy and government grants are examined.

GERN 400. Skills and Techniques in Gerontological Assessment

3.00

The study of the skills and techniques used in assessing the elderly client. Assessment is made from the holistic approach: physical, psychological and social. *Prerequisite: GERN 280/SOCI 280*

GERN 450. Palliative and Hospice Care: An Interdisciplinary Approach

3.00

Crosslisted with SOWK 450

An interdisciplinary approach to assessment and care planning of older adults experiencing need for palliative and/or hospice support. Familial, cultural, legislative and social implications of programs and service delivery.

GERN 487. Special Topics in Gerontology

3.00

Examination of selected topics in gerontology that are of current importance in the field of gerontology. Course may be repeated for credit.

GERN 490. Special Studies in Gerontology

1.00 - 3.00

Independent study in gerontology under faculty supervision. Limited to gerontology minors. Can be repeated for credit. *Prerequisite: GERN 280/SOCI 280, GERN 305, and GERN 400.*

GERN 495. Field Experience/Seminar in Gerontology (1, 6)

3.00

Supervised field experience in gerontology settings that allows observation and experience with the well and frail elderly. A minimum of six hours in the assigned setting each week and one hour seminar on campus. *Prerequisite: GERN 280/SOCI 280, GERN 305 and GERN 400, major elective, and approval of the gerontology minor adviser.*

GRPH 101. Digital Media Design I (0, 9)

3.00

An introduction to graphic design using industry standard software. Students will explore fundamental concepts, terminology and media that relate to the creation and presentation of graphic design projects. *Prerequisite: ART 102 and ART 104 or permission of the instructor.*

GRPH 200. Image Making (0, 6)

3.00

An exploration of strategies for conceptualizing, analyzing and solving design problems through image making. Emphasis is placed on graphic presentation of ideas and the creative process through a variety of mediums and materials. *Prerequisite: ART 102.*

GRPH 201. Digital Media Design II

3.00

A hands-on approach to digital media and production using leading edge software for web and interactive design. Concepts and content include visual language for screens and devices, exploration of time-based media, audio/video integration, user feedback tools and digital portfolios. *Prerequisite: GRPH 101.*

GRPH 206. Typography I (0, 9)

3.00

An introduction to the study of letter forms for their aesthetic and communicative value. Typographic fundamentals of alphabet history, type classification, printing technology effects, font design, visual space, hierarchy and grid systems will be explored. *Prerequisite: Prerequisite: .*

GRPH 208. Portfolio Review

0.00

Portfolio review required to enroll in graphic design courses at upper division standing. May be repeated once for pass/fail standing. *Prerequisite: GRPH 101, GRPH 200 and GRPH 206. Corequisite: GRPH 206.*

GRPH 292. Topics in Graphic Design

3.00

Study of selected topics in graphic design at the introductory level. May be repeated when course content changes. See MyMadison for current topics.

GRPH 300. Illustration (0, 9)

3.00

Crosslisted with New Cross-listing: GRPH/ART 300.

Through demonstrations, theory and practical application, students are introduced to numerous media and illustrative techniques. Encouraged experimentation is tempered by an understanding of problem solving and conceptualization. *Prerequisite: GRPH 208.*

GRPH 301. Digital Media Design III

3.00

Through demonstrations and practical application, students are introduced to digital techniques used in design applications. Experimentation is encouraged through problem solving and conceptualization, filtered through the lens of contemporary digital production. Students will be challenged with executing effective design solutions through creative thinking and image creation as it applies to graphic design. *Prerequisite: GRPH 208.*

GRPH 304. Package Design (0, 9)

3.00

Through theory, demonstrations and practical application, students learn to design in three-dimensions. Focus will be placed on aesthetics, as well as the form and function of a product's housing. *Prerequisite: GRPH 208.*

GRPH 306. Typography II (0, 9)

3.00

An intermediate study of typography for its aesthetic and communicative value. Context effects on legibility and readability, type as image, type in sequence and typographic systems will be explored. *Prerequisite: GRPH 208.*

GRPH 312. Web Design

3.00

Intermediate level web design and front-end development through theory and practical application. Assignments will focus on the unique form, content and structures associated with designing for a device-agnostic web. Creative iteration and digital design are emphasized in tandem with changing technology. *Prerequisite: GRPH 201 and GRPH 208.*

GRPH 313. Interactive Media

3.00

Intermediate level visual interface design, motion graphics, and interaction design through theory, demonstration and practical application. Assignments will focus on digital craft, creativity, and presentation. Emphasis on digital and interactive media, and functionality, usability, and user experience. *Prerequisite: GRPH 201 and GRPH 208.*

GRPH 340. Poster Design (0, 9)

3.00

Through theory and practical application, students learn to design for the poster realm. Focus will be placed on aesthetics, as well as form and function. Encouraged experimentation is tempered by an understanding of problem solving and conceptualization. *Prerequisite: GRPH 208.*

GRPH 375. Letterpress

3.00

Crosslisted with ART 375

This studio course offers students an opportunity to engage in the process and product of letterpress printing through various techniques and conceptual approaches. Instruction focuses on text and image relationships by integrating metal and wood type, and other type-high surfaces. Emphasis will be placed on the acquisition of skills and vocabulary and the creative use of type and image. The course will address the history of letterpress and its contribution to contemporary art and design. *Prerequisite: ART 102 and ART 104; for GRPH credit: GRPH 208.*

GRPH 376. Intermediate Book Arts: Concept, Content, Form

3.00

Crosslisted with ART 376

This course challenges the student to develop a limited edition hand-made artists' book. The appropriate format for each individual's concepts are identified, adapted, customized, applied, and produced. Content development, book design, integration of various media and the functionality of various bookmaking materials are explored. We will consider the artists' book as a sculptural form and locate it within the broader context of contemporary writing and visual art. *Prerequisite: ART 276. For GRPH: ART 276 and GRPH 208.*

GRPH 380. Wayfinding, Signage, Exhibit Design

3.00

This course examines graphic design as applied to the built environment. Environmental graphic design applications include but are not limited to wayfinding and directional signage, exhibition graphics, large-format graphics and pop up displays (e.g. storefronts, showrooms, etc.), user interface design, branding, and retail design. *Prerequisite: GRPH 208.*

GRPH 390. Independent Study in Graphic Design

1.00 - 3.00

Independent activity at the intermediate level, such as research or studio practice, under faculty supervision. Projected studies in Graphic Design must be arranged with the instructors who will direct them. Offered only with the consent of the instructor. *Prerequisite: GRPH 208.*

GRPH 392. Topics in Graphic Design

3.00

Study of selected topics in graphic design at the intermediate level. May be repeated when course content changes. See MyMadison for current topics. *Prerequisite: GRPH 208.*

GRPH 406. Advanced Typography (0, 9)

3.00

An advanced study of typography for its aesthetic and communicative value. Topics of research, narrative, information design, format organization and production techniques will be explored. Solutions reflect advanced text and image integration knowledge through complex and variable structure development. *Prerequisite: GRPH 306.*

GRPH 408. Brand Identity

3.00

Exploration of visual identities utilizing a holistic, systems approach to design. Introduces business strategies and design techniques associated with brand development. Emphasis is placed on methods of thinking, research and implementation. *Prerequisite: GRPH 306.*

GRPH 410. Graphic Design Portfolio

3.00

An examination of the business of graphic design, employment strategies and freelance opportunities. Focus is placed on solidification of the portfolio for employment and/or graduate school. This course is strongly recommended for the last semester prior to graduation. *Prerequisite: GRPH 406 and GRPH 408. Corequisite: GRPH 408.*

GRPH 490. Independent Studies in Graphic Design

1.00 - 3.00

Independent activity, such as research or studio practice, under faculty supervision. Projected studies in any area of the school's offering must be arranged with the instructors who will direct them. Offered only with consent of the director. *Prerequisite: GRPH 208.*

GRPH 491. Studio Assistant

1.00 - 3.00, repeatable

Crosslisted with ARCD 491, ARED 491, ART 491, INDU 491

An on-campus program monitored on an individual basis designed to provide practical studio experience in the visual arts. Students will learn safe studio practices and management skills, including material use, inventory control, and the proper operation of equipment found within various individual classroom studios. *Prerequisite: Permission of the instructor.*

GRPH 492. Topics in Graphic Design

3.00

Study of selected topics in graphic design at the advanced level. May be repeated when course content changes. See MyMadison for current topics. *Prerequisite: GRPH 306.*

GRPH 496. Internship in Graphic Design

1.00 - 6.00

An off-campus program prepared and monitored on an individual basis. Internships are designed to provide practical experience in the arts. *Prerequisite: Permission of the instructor and GRPH 208; students can only enroll for a maximum of 3 credits per Internship.*

GRPH 497. Graphic Design Capstone

6.00

Advanced level exploration of graphic design principles, methods, applications and professional practice. Independent research projects are emphasized, and students will produce and refine a professional graphic design portfolio suitable for employment and/or application to graduate school. This course is strongly recommended for the last semester prior to graduation. *Prerequisite: GRPH 408. Corequisite: GRPH 408.*

GRPH 499. Honors (1, 3, 2)

6.00

Prerequisite: GRPH 208.

GRK 101. Elementary Greek I

3.00 - 4.00

Designed to provide a reading knowledge of Classical Greek as well as New Testament koine. Greek life, thought and culture are also discussed. Especially recommended for history, English, and philosophy and religion majors.

GRK 102. Elementary Greek II

3.00 - 4.00

Designed to provide a reading knowledge of Classical Greek as well as New Testament koine. Greek life, thought and culture are stressed. Especially recommended for science, English and philosophy majors. *Prerequisite: GRK 101 or equivalent.*

GRK 231. Intermediate Greek I

3.00

An intensive reading course. Selections from Classical Greek writers and/or the New Testament. *Prerequisite: One year of college Greek or equivalent.*

GRK 232. Intermediate Greek II

3.00

An intensive reading course. Selections from Classical Greek writers and/or the New Testament. *Prerequisite: GRK 231 or permission of the instructor.*

HHS 440. International Health and Human Services in Malta

4.00

This May session, study abroad course examines health issues in Malta and provides a team oriented, project experience. Project participation, tours, and arranged meetings with local experts are used to illustrate health related problems that apply globally and are compared and contrasted with those in the United States.

HTH 100. Personal Wellness [C5W]

3.00

Emphasizes lifestyle behaviors contributing to health promotion and disease prevention. General areas affecting health status are identified. Suggestions are made as to how health-related behaviors, self-care and individual decisions contribute to health and influence dimensions of wellness. May be used for general education credit.

HTH 150. Introduction to Health Sciences

2.00

This course orients students in the major to foundational expectations and requirements for successful completion of the Health Science major and Health Studies concentration. The course introduces conceptual ideas such as a wide array of health careers, importance of gaining early and regular field experiences, and writing and research basics.

HTH 210. Medical Terminology

3.00

Study of terms that relate to body systems, anatomical structures, medical processes and procedures, and a variety of diseases/disorders that afflict human organisms.

HTH 230. Community Health

3.00

An introduction to community health including its foundations, the tools of community health such as epidemiology, community organization, disease control and health promotion. The course focuses on the populations, settings and special issues of community health. *Prerequisite: HTH 100.*

HTH 231. Population Health Determinants

3.00

Many factors combine together to affect the health of individuals and communities. In an effort to advance public health, health professionals must be cognizant not only of behaviors which may compromise or promote health, but also the interaction of social and physical factors which impact health outcomes. *Prerequisite: HTH 150. Corequisite: HTH 150.*

HTH 245. Foundations of Infectious Disease

3.00

An overview of the incidence, prevalence, causation, and prevention of the major infectious diseases which are currently of concern in the twenty-first century. Major signs and symptoms of the diseases as well as treatment will be reviewed. The course will also cover the body's defense system and the principles of disease occurrence. *Prerequisite: HTH 150. Corequisite: HTH 150.*

HTH 255. Chronic Disease and Disabilities

3.00

An overview of the incidence, prevalence, causation and prevention of chronic diseases and disabilities across the lifespan. Major signs and symptoms of the diseases and disabilities as well as treatment will be reviewed. *Prerequisite: HTH 100 and HTH 150.*

HTH 308. Physiological Responses to Human Movement

3.00

The purpose of this course is to present an overview of established and current knowledge of physiological responses to human movement as they relate to health and wellness. *Prerequisite: BIO 290*

HTH 314. Rural Health: An Interdisciplinary Approach

3.00

Crosslisted with IPE 314, NSG 314, SOWK 314

Students study, observe and participate in interdisciplinary assessment, planning and delivery of community-based primary health care in partnership with residents and agencies of a host rural county. Learning activities will emphasize rural culture, rural health care and interdisciplinary practice.

HTH 315. Peer Leadership in Health Sciences

2.00

Undergraduate students are provided a leadership opportunity to serve as a peer leader for a selected class. Teaching and learning occur under faculty mentorship. The student and faculty member collaborate to ensure proper levels of rigor and support, identify specific goals, discuss reflections of experiences, and make connections to future professions. Serving as a peer leader allows students to see college teaching from a new perspective. Course may be repeated for a maximum of 4 credits. *Prerequisite: Application and/or interview with supervising faculty member must be complete; student must have previously completed the course earning a B or higher; Junior or Senior status; permission of instructor.*

HTH 320. Statistical Methods for Health Science Research

3.00

This course reviews statistical concepts and techniques with special reference to health science applications and issues. It also reinforces the logic of statistical decision making for health and medical research concerns. *Prerequisite: MATH 220 or COB 191.*

HTH 340. Chronic Disease and Disabilities

3.00

An overview of the incidence, prevalence, causation, and prevention of chronic diseases and disabilities across the lifespan. Major signs and symptoms of the diseases and disabilities as well as treatment will be reviewed. *Prerequisite: HTH 100, HTH 150, HTH 210 or HTH 300, HTH 231 or HTH 230, HTH 245.*

HTH 351. Health Behavior Change

3.00

This course will identify individual and group characteristics that influence health behaviors and the features of programs designed to change behavior that makes them more or less effective. Students will develop the skills necessary to formulate health-modification programs. *Prerequisite: HTH 231.*

HTH 352. Environmental Health

3.00

An investigation of environmental factors and their effects on the health of the individual, community and society.

HTH 354. U.S. and Global Health Care Systems

3.00

The course provides an overview of the U.S. health care system by examining the organization, financing, and delivery of health services. The class will include current issues in health care policy, the future of health care systems in America, and a comparative global analysis of health care systems.

HTH 355. HIV/AIDS: A Global Perspective

1.00

Discussion includes theories of origins, statistics and characteristics of the causative pathogen, incubation, illness patterns, transmission, prevention and treatment of HIV/AIDS and other STDs. HIV/AIDS and other STDs in relation to prisons, children, schools, global concerns, health care systems and legal factors will be considered.

HTH 368. Global Health

3.00

This course provides students with an opportunity to critically examine and explore a wide range of social, economic and demographic themes in global health. Focus is given to the evolution of major causes of disease, the ecology and etiology of major infections and chronic diseases, and the social and economic consequences of changes in mortality and health. Programs designed to affect health conditions are examined.

HTH 370. Child and Adolescent Health

3.00

This course will discuss the CDC priority health risk categories and the Healthy People Objectives for the Nation as they relate to child and adolescent health. In addition, the CDC model for Coordinated School Health Programs will be explored to determine specific strategies for health improvement.

HTH 372. Human Sexuality

3.00

An in-depth study of sexuality across the lifespan. Emphasis is placed on the development of sexuality with attention given to the psychological, physiological, ethical and socio-cultural implications. *Prerequisite: HTH 231.*

HTH 378. The Use & Effects of Drugs

3.00

A study of the use and pharmacological properties of popular legal and illegal drugs and their effects on the health of individuals and society. *Prerequisite: HTH 230.*

HTH 380. Health Communication

3.00

The course will provide an introduction to health communication theory, research and practice. Students will learn how to design, communicate and evaluate effective health promotion messages. *Prerequisite: HTH 351. Corequisite: HTH 351.*

HTH 389. Practicum in Health Sciences

1.00 - 3.00

Selected practicum experiences which provide students with supervised practicum experiences.

HTH 390. Special Studies in Health Science

1.00 - 2.00

An independent study for students to pursue individual projects or research related to a selected topic of current importance to the Health Science field. Students will be under the supervision of a faculty member. Course may be repeated if the topic varies for a maximum of 4 credits. *Prerequisite: Permission of the instructor.*

HTH 391. Special Topics in Health Sciences

3.00

The courses offered under this title are designed to allow exploration of current topics in health science not covered elsewhere in the curriculum. Course content will vary by term and instructor. Course may be repeated for credit when course content changes.

HTH 408. Health Research Methods

3.00

This course will present an overview of research methods within public health, emphasizing the steps involved in the research process. Methodological issues covered will include the ethics of health studies research, qualitative and quantitative research designs, operationalization of concepts, measurement of variables, and techniques of sampling, data collection, and analysis. *Prerequisite: HTH 320 and HTH 351; or, HTH 351 and public health concentrators; or HTH 351 and health assessment and promotion concentrators.*

HTH 417. Women's Global Health and Human Rights

3.00

Crosslisted with NSG 417, WGSS 417

An international and human rights approach providing an overview of health issues within the context of a woman's life cycle. Attention will be given to critical issues of women's health such as access to health care and gender based violence. Such issues as sexuality, nutrition, diseases affecting women, violence, harmful traditional practices, and sex trafficking will be discussed.

HTH 420. Global Perspectives on Alcohol and Drug Policies

3.00

This course will study drug policy from a public health perspective. Students will examine global alcohol and other drug policies assessing their impact at the regional, state, national and international levels. Emphasis will be given to the contemporary phases of alcohol and other drug policies and the war on drugs.

HTH 422. Public Health and Healthcare Policy

3.00

This course will provide a framework for understanding and analyzing a range of health policy issues such as accessibility, cost and quality of healthcare; disaster preparedness; the safety of our food, water, environment and medications; and the right to make individual decisions about our personal health. The course will explore the U.S. policy-making system, civic engagement, the essential issues in health policy and how health policies impact the work of health professionals. *Prerequisite: HTH 231 and HTH 354.*

HTH 423. Ethics and Critical Thinking in Health

3.00

This course explores ethical issues facing the public health and healthcare systems in the United States. Key ethical frameworks are used to analyze contemporary public health and healthcare issues and the overlap and distinctions between them. The course will review fundamental and emerging topics (individual rights vs. the common good, genetics, health promotion and disease prevention) and challenge students to think critically about them. Student will play an active role in presenting and evaluating ethical concepts and conflicts to facilitate class discussion. *Prerequisite: HTH 231, HTH 320, HTH 340 or HTH 255, HTH 351 and HTH 354.*

HTH 441. Biomechanics for the Healthcare Professional

3.00

Crosslisted with KIN 407

This course is designed to introduce the student to a variety of biomechanical concepts and applications as related to the health professions. Specific attention will be given to the biomechanical aspects of the musculoskeletal system. *Prerequisite: BIO 290*

HTH 442. Chronic Diseases

3.00

This course examines the pathophysiological effects of chronic diseases on health and well-being. Discussions include various strategies which improve the functional status and health of individuals at risk. *Prerequisite: HTH 308 or KIN 302 and KIN 302L.*

HTH 450. Epidemiology

3.00

A study of the causation and prevention of the major diseases that affect the quality of an individual's life. Practical skills utilized by practicing epidemiologists are emphasized. *Prerequisite: HTH 320 and HTH 351; or HTH 351 and public health education; or HTH 351 and health assessment and promotion concentration; or senior health services administration concentration.*

HTH 453. Public Health Education Methods

3.00

This course is designed for public health education students to develop competencies necessary for working in community and public health settings. Presentation skills, developing print, computer and Internet materials, facilitating groups and coalitions, and advocacy are some of the topics covered. *Prerequisite: HTH 351 and senior public health education concentration students or permission of the instructor.*

HTH 456. Grant Writing in Health Sciences

3.00

Increasingly, social service and health providers are required to have grant writing skills and/or be responsible for obtaining external funds to support their positions, fund projects or promote programs. This course will provide the overview of grantmanship skills. These skills include locating funding sources, improving collaboration skills, understanding program development and preparing grant proposals. *Prerequisite: HTH 351 or permission of the instructor. Corequisite: HTH 351.*

HTH 458. Health Program Planning and Evaluation

3.00

This lecture and laboratory course introduces students to principles and techniques employed to plan, implement and evaluate health promotion programs. Students will conduct a campus or community event and compile a formal report. *Prerequisite: Public health concentration and HTH 351; or health services administration major and HSA 358; or senior substance abuse education minor.*

HTH 471. Health Aspects of Gerontology

3.00

Promotion of health in the aged; physiological aspects of the aging process; community, state and federal health programs, and services for the aged.

HTH 480. Health Assessment Techniques

3.00

Examination of health risk appraisals and metabolic assessments used to implement strategies for behavioral change and improved overall wellness. Other topics include programming and group dynamics used to promote healthy lifestyle behaviors.

HTH 482. Advanced Health Assessment Techniques

3.00

Skill acquisition of current health assessment techniques. These assessments are used to determine risk factors which play a role in heart disease and selected chronic diseases and to evaluate current health status. *Prerequisite: HTH 480*

HTH 490. Advanced Special Studies in Health Science

3.00

An advanced opportunity to conduct research where the student will apply their knowledge of Health Science to a specific research project or area. Students will be under the supervision of a faculty member. Course may be repeated if the topic varies for a maximum of six credits. *Prerequisite: Senior status only; permission of the department head.*

HTH 495. Internships in Health Organizations

3.00

Full-time directed field experience in a health organization. Opportunity provided to work in an appropriate setting. Student furnishes off-campus living and traveling expenses. *Prerequisite: Prerequisites: Permission of the instructor and a 2.5 grade point average.*

HTH 499A. Honors

1.00

The purpose of the first semester honors capstone project is to develop a project outline, select an adviser and two readers, and submit the proposal with the completed signature page to the Honors College by the deadline. *Corequisite: HTH 320 and HTH 408.*

HTH 499B. Honors

1.00-3.00

The purpose of the second semester honors capstone project is to complete an introduction to the research topic; complete a thorough literature review and a methodology section of a research paper; complete IRB training; complete an IRB application; and begin data collection. *Prerequisite: HTH 499A. Corequisite: HTH 499A.*

HTH 499C. Honors

2.00

The third semester of the honors capstone project is designed for students to complete their projects. They should conduct data analyses if appropriate, and write summary, conclusions and recommendations (the equivalent of Chapters 5 and 6). In addition, students will prepare a research poster for the honors symposium. *Prerequisite: HTH 499B. Corequisite: HTH 499B.*

HSA 290. Gerontology for Health Services Administration

3.00

This course provides an introduction to the study of aging from a multidisciplinary perspective including the biological, psychological and sociological aspects of aging. Emphasis will be placed on theoretical and practical application of course content to careers in health services administration. *Prerequisite: Fully admitted HSA majors only.*

HSA 358. Health Administration

3.00

This course provides an introduction to management functions, tasks and roles as they are carried out in health services organizations. Discussion of emerging issues affecting the management of health services organizations is provided. This course uses the case method of analysis to develop critical thinking skills. *Prerequisite: Fully admitted HSA major and HTH 354 or permission of the instructor.*

HSA 360. Health Care Marketing

3.00

This course introduces the role, functions and tasks of health care marketing. Attention is devoted to understanding basic marketing principles; using oral, written and visual electronic communications media; and developing marketing plans for health care organizations. *Prerequisite: Fully admitted HSA majors only.*

HSA 363. Health Economics

3.00

This course explains how economic forces affect the health service sector and how economic tools can be used to assess and improve health industry performance. Efficiency and equity trade-offs are considered. *Prerequisite: Fully admitted HSA major, ECON 201 and HTH 320.*

HSA 365. Values in Health Care

3.00

This course provides an overview of health ethics and health law for students majoring in health sciences. Students will address the major principles facing a health service professional in the delivery of health services. Particular attention will be paid to development of methodologies for ethical decisionmaking. *Prerequisite: Fully admitted HSA major and HTH 354 or permission of the instructor.*

HSA 367. Comparative International Health Systems

3.00

This course concentrates on various approaches used to provide public and personal health services around the world. Strengths and weaknesses of different health care systems in terms of availability, accessibility, acceptability, cost effectiveness, continuity and quality of services will be considered. *Prerequisite: Fully admitted HSA major and HTH 354 or permission of the instructor.*

HSA 385. Health Services Administration Career Seminar

1.00

This course is a career development seminar for health services administration students. An array of health administrators from varied health care organizations helps expand students' understanding of the health administration field. This course is designed for junior-level students with an expectation of a major concentration in health services administration. *Prerequisite: Fully admitted HSA majors only.*

HSA 390. Special Topics in Health Services Administration

1.00-3.00

A course for students to examine a selected topic or critical issue of current importance to the field of health services administration. Topics will vary. Courses offered under this title are designed to allow for exploration of current topics in health services administration not covered elsewhere in the curriculum. Students will work under the supervision of a faculty member. Course may be repeated for a maximum of six credits if the topic varies.

HSA 452. Hospital Organization and Administration

3.00

This course examines the organization and operation of community hospitals in the U.S. Specific attention is devoted to management's role in internal operations and in external relationships with the community and other stakeholders. Discussion of emerging issues affecting the management of hospitals and hospital systems is provided. *Prerequisite: Fully admitted HSA major, HTH 354 and HSA 358 or permission of the instructor.*

HSA 454. Internship in Health Organizations

3.00

Full-time directed field experience in a health organization (320 hours). Opportunity provided to work in an appropriate setting. Student furnishes off-campus living and traveling expenses. *Prerequisite:* Fully admitted HSA major, HSA 462, HSA 464 and two of the following: HSA 452, HSA 455, HSA 456 or permission of the instructor. *Corequisite:* Fully admitted HSA major, HSA 462, HSA 464 and two of the following: HSA 452, HSA 455, HSA 456 or permission of the instructor.

HSA 455. Long Term Care Organization and Administration

3.00

This course provides an in-depth examination of the organization and administration of long term care programs: nursing homes, home health services, adult daycare, assisted living and hospice. This course is recommended for students planning careers in long term care. *Prerequisite:* Fully admitted HSA major, HSA 290, HTH 354 and HSA 358 or permission of the instructor.

HSA 456. Ambulatory Care Services: Organization and Administration

3.00

This course provides an in-depth examination of the staffing, organization, budgeting and administration of ambulatory services including medical group practices, community and hospital-based clinics, and ambulatory surgery centers. This course is recommended for students planning administrative careers in this area with a foundation in health services administration. *Prerequisite:* Fully admitted HSA major, HTH 354 and HSA 358 or permission of the instructor.

HSA 462. Managed Care

3.00

The growing influence of managed health care on the organization and delivery of health services in the United States is addressed in this course. Structural and operational characteristics of managed care organizations and plans, including HMOs, PPOs and other plans are explored, as are the implications of managed care plans for the management of hospitals and other health care organizations. *Prerequisite:* Fully admitted HSA major and HSA 358 or permission of the instructor.

HSA 463. Quality Management in Health Care

3.00

This course examines the quality management function required in diverse health care organizations. The student is exposed to definitions and standards of quality in health care, as well as to various tools used to measure, evaluate and improve quality. Emerging issues affecting the management of health care quality are discussed. *Prerequisite:* Fully admitted HSA major, HTH 354 and HSA 358 or permission of the instructor.

HSA 464. Funding in Health Care

3.00

General financial analysis is covered in terms of its application to health care entities. Concepts, issues and tools related to health care funding are covered. *Prerequisite:* Fully admitted HSA major, COB 204 or CIS 204, COB 241 or ACTG 244, FIN 345 and HTH 320.

HSA 466. Health Politics and Policy

3.00

This course provides an introduction to the state and federal policy-making processes with a distinct focus on health policy.

Emphasis will be on how health policy impacts health service organizations and the delivery of health care. *Prerequisite: Fully admitted HSA major, HTH 354 and HSA 365, or permission of the instructor.*

HSA 490. Independent Studies in Health Services Administration

1.00-3.00

An independent study for students to pursue independent research or experiential learning opportunity in health services administration under the guidance of a faculty adviser. Students will work under the supervision of a faculty member. Course may be repeated for a maximum of six credits if the topic varies.

HIST 101. World History to 1500 [C2HQC]

3.00

A survey of important historical developments from prehistoric times to 1500. Emphasis is given to the rise and decline of great world civilizations and their lasting contributions to humanity. May be used for general education credit.

HIST 102. World History Since 1500 [C2HQC]

3.00

A survey of important historical developments from 1500 to the present. Emphasis is given to the growth of nationalism, the development of colonialism, and to world events, problems, and conflicts of the present century. May be used for general education credit.

HIST 150. Critical Issues in Recent Global History [C1CT]

3.00

This course examines issues in recent history as a means to introduce, develop and enhance critical thinking skills and to supplement writing, oral communication, library and computing skills objectives for General Education Cluster One. A seminar format allows for careful examination of issues in both oral and written formats. The course emphasizes the development and articulation of well-reasoned arguments in organized and grammatically acceptable prose. May be used for general education credit. May not be used for major credit.

HIST 201. Europe to 1815

3.00

An examination of Europe from 1350 to 1815 with emphasis on the major themes, figures, ideas, and trends of the period, as well as the principal historical interpretations.

HIST 202. Europe Since 1815

3.00

An examination of Europe from 1815 to the present with emphasis on the major themes, figures, ideas, and trends of the period, as well as the principal historical interpretations.

HIST 225. U.S. History [C4AE]

4.00

A survey of U.S. history from the Colonial period to the present, emphasizing the development of American civic life, the involvement of the U.S. in world affairs and the cultural richness of the American people. This course stresses the analysis and interpretation of primary sources. May be used for general education credit.

HIST 225H. U.S. History - Honors [C4AE]

4.00

A survey of U.S. history from the Colonial period to the present, emphasizing the development of American civic life, the involvement of the U.S. in world affairs and the cultural richness of the American people. This course stresses the analysis and interpretation of primary sources. May be used for general education credit. *Prerequisite: Honors Students*

HIST 239. Topics in History

3.00

The study of selected topics in history at the introductory level.

HIST 263. Africa

3.00

Emphasis is placed on the social and cultural aspects, as well as the emerging role the continent plays in contemporary world history.

HIST 269. Premodern Middle East

3.00

A survey of the Middle East from Late Antiquity through the rise of the Ottoman Empire into the 16th century. Emphasis is placed on the political, social and religious developments that form the historical and cultural bases for the communities that thrived in the region in the past, and still do today.

HIST 270. Modern Middle East

3.00

This course locates the Middle East in the context of global comparative history using and questioning 'meta-narratives' organized around capitalism, colonialism, imperialism, nationalism and Orientalism. Geographically, the course focuses on the region between the Nile and Indus rivers with emphasis on Iran and the Persianate world. Chronologically, the course considers the rise of Islam and the medieval period while concentrating on the post-1500 era until 1979. Thematic foci include long-distance trade, literacy and knowledge production, visual culture, and the environment.

HIST 271. The Ancient Mediterranean

3.00

A broad theme-based history of the Ancient Mediterranean from the Late Bronze Age to the end of Antiquity (1500 BC – AD 600). It examines the political, social, economic and religious history of the states that governed the area and their cultural interactions. The course is a mixture of lectures and discussions of primary sources. The final paper is a reflection on the themes including both primary and secondary sources.

HIST 274. Modern East Asia

3.00

This course is an introduction to modern historical experiences of East Asia, particularly China, Japan and Korea. In addition to overviews of each of these countries, the course will focus on several topics illustrating both the unity and diversity of East Asia: perceptions of each other, the philosophical tradition of Confucianism, the role of imperialism and nationalism, revolution, reform and the future of the region in the twenty-first century.

HIST 291. Travel Studies

3.00

Designed to encourage the student to augment the regular academic program through independent investigation, including organized travel study.

HIST 300. U.S. Military History

3.00

A survey of the evolution of the American way of war from the Colonial era to the post-Cold War period emphasizing the development of military and naval institutions, U.S. strategic doctrine and the social legacies of the U.S. military establishment.

HIST 301*. European Military History

3.00

A survey of European military history (including Russia/Soviet Union) from the Hellenistic period through the 1982 Falklands-Malvinas War. The evolution of strategic doctrine and military institutions, their effect upon European society and their role in European imperialism will be emphasized.

HIST 302. Latin American Urban History**

3.00

There is no group of people in the world more urban-minded than Latin Americans. Historically, cities here played an all-encompassing role that included administration, the reproduction of capital and responsibility for virtually all cultural activities. This class explores that history, as well as plans for further urban development, cultural activities and architectural design.

HIST 303. Early America

3.00

This course will examine the history of early America from the colonial to the early national period. Topics will include the clash of African, European, and Native American cultures, the regionalization of the American colonies, the growth of American slavery, and the creation of an American character and politics.

HIST 304. Native Peoples of the United States

3.00

A survey of the experiences of Native Peoples, including Native Hawaiians and Native Alaskans, from the pre-contact period to the present, with emphasis on traditional lifeways, impact of Anglo Americans, cultural persistence and revivals, activism, and contemporary challenges to Native communities and identities.

HIST 305*. History of Science and Christianity

3.00

Over the last 2000 years, there have been recurring controversies over the proper relationships between science and Christianity. This class uses case studies such as Galileo, Darwin and creationism to explore the larger cultural context that gave life to the controversies. In the process, we'll examine changing ideas of what counts as science, how to interpret the Bible, and who gets to decide.

HIST 306*. A History of the Body in the West

3.00

This course views the human body as a historical artifact whose physical appearance and social, cultural, and political meanings reflect the historical contexts of specific times and places. The emphasis is on the perspectives of Europeans and their descendants, inside Europe and beyond it.

HIST 307. The Trans-Atlantic Slave Trade**

3.00

This course explores the origins, processes and outcomes of the infamous trade. By studying participants' lives in Africa, Europe, Latin America and North America, the course helps students understand people's inhumanity to each other and the ways in which slavery and the trade in slaves forever altered the development of the Atlantic world.

HIST 308*. Contemporary Italian Civilization

3.00

Crosslisted with ITAL 308

A study of Italian society, economics, politics and the arts from 1814 to the present. Instruction in English. Research papers for Italian majors/minors in the language.

HIST 309*. French History Since 1648

3.00

A survey of important historical developments in France from 1648 to the present. It explores how complex historical legacies in French society define and shape the experience of "being French" and how different groups and citizens work with and against each other in a collective effort to define the early modern and modern French experience. Points of focus include economy, society, culture and religion, state, politics, and borders.

HIST 310. American Business History

3.00

A survey of the role of business in the United States from the Colonial period to the present, with emphasis on the entrepreneurial spirit, business developments, and innovations and the relationship between the federal government and commerce.

HIST 311. China to 1600**

3.00

A survey of Chinese history from its earliest origins to the fall of the Ming Empire in the 17th century. The course incorporates translated primary materials and modern scholarship to provide a general picture of Chinese state formation, socio-economic changes, and literature and arts during the three millennia. It will also discuss the teachings and intellectual impacts of Confucianism, Daoism, and Buddhism in East Asia through the ages.

HIST 312. Japan Since 1600**

3.00

A survey of Japanese history from the end of the Warring States Period to the present. It first introduces Tokugawa society in the 17th and 18th centuries and then examines the Meiji period in detail, focusing on political and cultural changes, the rise of ultra-nationalism, the military expansion before WWII, and the course of the war. The last part of the course will discuss the American occupation, postwar developments, and the last two decades in Japan.

HIST 313. The History of Latinos in the United States

3.00

Currently the largest minority group in the U.S., Latinos have diverse sociological and historical origins, yet today in the U.S. are thought of as a monolithic racial and ethnic group. Starting with the Spanish and Portuguese colonial enterprise and continuing through current debates, this class will provide an introduction to and overview of the broad scholarship on Latino and Hispanic identity in the United States, examining issues of coercion, migration, refugees, labor, family networks, religion, war, economics, state building, politics, racialization, international disputes and globalization.

HIST 315. History of Sport

3.00

An interpretive study of the role of sports in America from the pre-contact period to the present, focusing on the development of professional, university and recreational athletic activities. Themes include gender, race, ethnicity, social class, environment and landscape, international relations, culture, and American idealism.

HIST 316. The Life and Times of James Madison, 1751-1836

3.00

An overview of the major political, philosophical, social and literary events that helped shape the world of the founders. James Madison's life will provide the framework for the course and emphasis will be given to his important role during this era.

HIST 319. Women at Work in U.S. History

3.00

This course examines the experiences of women employed in a variety of industries and workplaces in twentieth-century U.S. history. Topics include women's employment opportunities, experiences of sexism and other biases, collective action to change working conditions, innovation and entrepreneurship of women, and popular culture portrayals of gender in workplaces.

HIST 320. Women in U.S. History

3.00

A survey of the role of women in the United States from the Colonial period to the present. Attention is given to contributions of the ordinary women, the Women's Rights movements, the impact of women on reform and political movements, and the changing status of women in society.

HIST 321*. European Women's History

3.00

A survey European women's history from the Enlightenment to the Modern Era. Attention will focus on women in England, France, Germany, Italy and Spain as well as the former Soviet Union. The course traces the birth of modern feminism in the European context and explores gender expectations, paying particular attention to women's entrance into the public, political world.

HIST 322. The New South

3.00

An examination of major problems in the history of the American South after Reconstruction, beginning with debates over the nature of the "New South" itself. The course will emphasize cultural and social history; it also explores political and economic developments. *Prerequisite: Prerequisite: HIST 225.*

HIST 323. The Old South

3.00

Economic, cultural and social history of the antebellum South; 1790-1860. The region's political history will serve as a supporting part of the course.

HIST 326. The Automobile in 20th Century America

3.00

This course uses the automobile as a window into 20th century American life. It examines the influence of automobility on patterns of work and leisure; on struggles over gender, race and ethnicity; on individualism, consumerism and government regulation. It also surveys mass automobility's effects on our physical and natural environments and looks at future prospects of automobility in the information age.

HIST 327. Technology in America

3.00

A historical survey of the complex and changing relationship between technology and American society from Native American canoes to the Internet. Attention is given to technology's role in relations of power, in the home, on the farm, in the workplace and on the battlefield.

HIST 330. U.S. Diplomatic History

3.00

A survey of major themes, events and forces shaping the development of American foreign relations throughout our history. Key documents such as the Monroe Doctrine will be examined, as will significant issues including manifest destiny, the United States as a world power, origins of Cold War and Detente.

HIST 331. Historical Archaeology

3.00

Crosslisted with ANTH 331

The course introduces students to the purposes, subject matter, methodology and historical background of the discipline of historical archaeology. Building on research issues and methodologies of anthropological archaeology and history, the multidisciplinary aspects of this field are introduced through field trips, projects, guest lectures, readings and classroom presentations. *Prerequisite: Prerequisite: ANTH 197.*

HIST 332*. Hist of 20th Century Spain

3.00

This course will trace the twentieth-century political and social history of Spain including the Second Republic, the Spanish Civil War, the Franco regime, and the transition to democracy in 1975. The course will pay special attention to Franco's dictatorship, the role of women, the Catholic Church, as well as Spain's relationship to the rest of Europe.

HIST 338. U.S. Urban History

3.00

Crosslisted with SOCI 338

In this course students explore the history of urban spaces in the United States by investigating American cities using a broad chronological, geographical, and thematic framework. Drawing from an array of primary and secondary sources, students will become familiar with the central themes of urban history, and also have the opportunity to produce their own narratives.

HIST 339. Selected Themes in U.S. History

3.00

Selected themes are studied in depth. See MyMadison for current classes. Course may be repeated when content changes.

HIST 340. Internship in History

3.00

Provides students with practical experience in using historical skills in a public or private agency. Periodic student reports and seminars required. This course may be repeated with permission of department head. *Prerequisite: Junior or senior standing, HIST 395 and permission of the department head.*

HIST 341. Selected Themes in World History

3.00

Selected themes are studied in depth. Course may be repeated when content changes. Only courses with significant content outside of Europe will count toward the world history requirement. See MyMadison and the history department website for information on current classes.

HIST 342. Selected Themes in European History

3.00

Selected themes are studied in depth. See MyMadison and the history department website for information on current classes. Course may be repeated when content changes.

HIST 350. Virginia

3.00

An interpretive survey of the history of Virginia from its Colonial beginnings to the present time.

HIST 355. African-American History to 1865

3.00

A survey of the experience and changing status of African-Americans in the United States from 1619 through the Civil War, with attention to the West African background, cultural developments, social and political movements, slavery and the slave trade, dual-consciousness, and emancipation.

HIST 356. African-American History Since 1865

3.00

A survey of the experience and changing status of African-Americans in the United States from Reconstruction to the present, emphasizing the strengthening of social and cultural institutions; Afro-American leadership; the impact of segregation; the Great Migration; labor, protest and cultural movements; pan-Africanism; the Civil Rights Movement; and contemporary issues.

HIST 360. Research Apprenticeship in History

3.00

Provides students with advanced research and writing opportunities. Student learning contract must be approved before a student can enroll. Periodic student reports and seminars required. Open to history majors only. *Prerequisite: HIST 395.*

HIST 361. Class and Ethnicity in Africa**

3.00

An examination of the development of class and ethnicity in African societies. Attention is given to the pre-Colonial and Colonial periods, as well as to the effects of imperialism, development strategies and structural adjustment policies on class and ethnic relations in contemporary Africa.

HIST 362. Introduction to U.S. Religious History

3.00

Crosslisted with REL 362

The course introduces the religious history of the colonies and the United States, from native traditions through the 20th century. We examine the historical/social impact of groups ranging from Roman Catholic migrants to evangelical Protestants and Scientologists. Special attention is paid to the extraordinary and persistent levels of religious diversity and adherence throughout U.S. history.

HIST 369. Greek History, 3000 BC-AD 267

3.00

Greek history covers the political, military, social, economic and intellectual history of the Greeks from the beginning of the Bronze Age ca 3000 BC until the Roman occupation of Greece. It ends with the sack of Roman Athens by the Heruli in AD 267. The course is a mixture of lectures and discussions of primary sources. Students will read all of the major Greek historians (Herodotus, Thucydides, Xenophon, Polybius).

HIST 370. Byzantine Empire

3.00

A survey of the political, economic, military and religious history of the Byzantine Empire, 330-1453.

HIST 371. India**

3.00

A survey of the history of the Indian subcontinent from antiquity to the present. The course stresses the arrival of Islam, the impact of Western colonization, the struggle for independence, and the problems and achievements of nationhood in the post-Colonial era.

HIST 372. Afghanistan in Regional and Global Systems**

3.00

The country's Silk Road heritage, early Islamic experience, and frontier status between Safavid Iran and Mughal India introduce modern Afghanistan's origins within British Indian colonialism and global capitalism. Twentieth-century and contemporary Afghanistan are engaged through concepts of modernity, nationalism, internationalization and local social and cultural resilience and adaptation.

HIST 373. History of the Ottoman Empire, 1453-1922

3.00

This course surveys the history of the Ottoman Empire from its roots in medieval Anatolia through its demise in World War One. We will examine the persons, events, institutions, and ideas associated with imperial state formation, military expansion, cultural elaboration, political reformism, and the evolution of modern identities.

HIST 377. History of Korea**

3.00

A survey of Korean history from its earliest times to the present day. It is designed to develop an understanding in Korea, its historical tradition and the place of Korea in the larger narrative of East Asia and world history.

HIST 378. China in the Modern World**

3.00

This course is an exploration of China's encounters with the modern world and the ways in which China has, and has not, changed as consequence of those encounters. Topics include the impacts of both Western and Japanese imperialisms; participation in international systems; adaptations of Christianity, democracy and communism; and the resulting upheavals in Chinese Society.

HIST 379. Family and Gender in East Asia**

3.00

This is a survey focusing on the ways families have been defined and gender roles assigned in China, Korea, and Japan in pre-modern and modern times. Attention will be given to how the changing nature of family and gender have helped shape the historical evolution of these societies.

HIST 381*. Daily Life in Victorian England

3.00

A social history of England from 1837 to 1901 examining the way people of all classes lived and worked. Emphasis will be on drawing evidence from primary sources.

HIST 382*. Europe in the 20th Century

3.00

This course is a survey of European history covering the late-imperial era, the world wars, the Cold War and the dynamics of European integration. Emphasis will be given to political, social, economic and cultural developments. Upon completing the course, students will be able to demonstrate knowledge of major movements, figures and events in twentieth-century European history.

HIST 383*. Early England

3.00

A survey of English history from the earliest times to the late 17th century. Particular attention is given to the rise of Parliament and the growth of limited monarchy.

HIST 384*. England and the Empire-Commonwealth

3.00

A survey of English history from the late 17th century to the present. Particular attention is given to the growth of British democracy, the industrial revolution and the rise and fall of the British Empire.

HIST 385*. The Russian Empire to 1881

3.00

This course covers one thousand years of Russian history, from the foundation of Kievan Rus' in 882 to the assassination of Tsar Alexander II in 1881. By taking empire as its overriding theme and pairing it with issues of religion, civil society, law, and gender, we will examine how the creation and growth of the Russian Empire affect the modern world. The course is structured around topical sessions that show the interweaving of these themes throughout the history of Tsarist Russia.

HIST 386*. Russia and the Soviet Union from 1881 to 1991

3.00

This course surveys Russian and Soviet history from the late 19th century to the demise of the Soviet Union in 1991. Instead of providing a teleology of revolution and failure of the revolutionary experiment, this course offers an overview of Russian modern history that takes gender, generation, and family as its overriding themes and pairs them with issues of empire – in Tsarist as well as in Soviet Russia.

HIST 388*. Germany Since 1871

3.00

A survey of German history during the Second Reich, World War I, the Weimar Republic, the Third Reich and the post-World War II periods of Cold War and Detente. Emphasis is given to political, diplomatic and military affairs, although social, economic and cultural developments are included.

HIST 391. Travel Studies Seminar

3.00

Designed to encourage the student to augment the regular academic program through independent investigation including organized travel-study. Prearrangements must be made with a designated faculty member who will direct the study with preparatory instructions and final requirements. *Prerequisite: Permission of the department head.*

HIST 394. Introduction to Museum Work

3.00

Crosslisted with ARTH 394

A study of the philosophy and practice of museum work including the areas of exhibit design, conservation registration, education and administration. Subject is taught from the perspective of the museum profession and is applicable to diverse disciplines and types of collections. *Prerequisite: HIST 395, instructor's permission required to waive HIST 395 prerequisite for non-history majors.*

HIST 395. History Seminar

3.00

A seminar to introduce history as an academic discipline and acquaint the student with the work of major historians and problems of historical interpretation. Students will be required to complete assignments designed to develop basic skills in historical research and writing. Open to all students, but required of history majors. Fulfills the College of Arts and Letters writing-intensive requirement for the major.

HIST 396. Introduction to Public History

3.00

Crosslisted with ARTH 396

An introduction to the varied and interdisciplinary "field" of public history – such as community/local history, historic preservation, archives, historical archaeology, museum studies, business and policy history, documentary editing and publishing, and documentary films – through readings, class discussions, occasional guest speakers and occasional field trips.

HIST 399. Special Studies in History

3.00

Designed to give capable students in history an opportunity to complete independent study under faculty supervision. *Prerequisite: Permission of the department head.*

HIST 402. Workshop in Colonial American Life

3.00

A comparative study of life in colonial and Revolutionary America. Required field trips may include Jamestown, Colonial Williamsburg, Philadelphia, Charleston and Lancaster County, PA. Published sources, lectures, films and two multi-day field trips are used. Supplemental fee required. *Prerequisite: HIST 395 or permission of the instructor.*

HIST 403. Workshop in Civil War Virginia

3.00

This workshop examines the impact of the Civil War upon Virginia and its citizens. It explores the secession crisis, the revolution in firepower that forced changes in battlefield tactics and war aims, and the development of "hard war." A four-day battlefield tour will reinforce ideas discussed in the classroom. Supplemental fee required. *Prerequisite: HIST 395 or permission of the instructor.*

HIST 404*. Science and Society in Early Modern Europe

3.00

Examines the connections between knowledge of the natural world and other aspects of European societies between 1500 and 1700. Topics may include the scientific revolution (Copernicus, Galileo and Newton); medicine, anatomy, and ideas of disease; exploration, commerce and natural history; technology and empire; alchemy, astrology, and the boundaries of science; and comparisons between science in Europe and in other areas of the world. *Prerequisite: HIST 395 or permission of the instructor.*

HIST 405. Travel and Exploration

3.00

This class is about travel and exploration in world history, using specific episodes to examine motives, consequences and the experience of travel. In studying long-distance trade, pilgrimages, voyages of exploration and discovery, and even tourism, we will look at the logistics of travel, attempts to map the world, and the difficulties people had in interpreting what they found. *Prerequisite: HIST 395 or permission of the instructor.*

HIST 406. Monticello

3.00

Crosslisted with ARTH 406

A seminar on the architecture and material culture of Thomas Jefferson's Monticello. The course will examine the house's design, artwork, decorative arts, mechanical devices, landscape/garden design and Mulberry Row. Topics will include African-American artisans at the Monticello joinery, Jefferson's Indian Hall, and European and African-American domestic life in the Federal Period. Required field trips. *Prerequisite: Permission of the instructor.*

HIST 407. Digital History

3.00

This course will provide an introduction to digital history. It explores some of the ways in which digital technologies can change how we research, write, document, exhibit, produce, and think about history. Students should not expect to become an expert in any single technology, but will develop a familiarity with a wide range of tools and applications and will have the chance to create their own digital history project.

HIST 408. The Museum: Histories and Controversies

3.00

Crosslisted with ARTH 408

This seminar centers on art museums in the United States. Topics include the historical development of museums, related cultures of display, recent debates on institutional mission and responsibility, and contemporary artists who employ the museum as medium, subject matter or site. Required field trips. *Prerequisite: ARTH 206 or permission of the instructor.*

HIST 409. Early Modern Atlantic History**

3.00

This course focuses on the history of the North and South American Atlantic World from the "Age of Exploration" to the "Age of Democratic Revolutions." It traces European exploration of and expansion into the South and later North Atlantic beginning in the fourteenth century, and concludes with the assertion of sovereignty and independence by European colonies throughout the extended Atlantic littoral.

HIST 411. Colonial and Revolutionary North America

3.00

This seminar explores the history of North America from the 16th through the 18th centuries. Thematic emphasis will vary from semester to semester. *Prerequisite: History major: HIST 395. Non-history majors: Instructor permission to waive HIST 395.*

HIST 413. The Anglo-American Constitutional Tradition, 1603-1791

3.00

Surveys Anglo-American political and constitutional traditions. Emphasizes the evolution of 17th- and 18th-century British constitutionalism, its transferal to the British North American colonies, and the development of the first national and state constitutions in the United States. *Prerequisite: HIST 225 and HIST 395, or permission of instructor.*

HIST 420. U.S. History, 1763-1800

3.00

An interpretive study of the political, economic, social and cultural history of the United States from the French and Indian War through the Federalist period. *Prerequisite: HIST 395 or permission of the instructor.*

HIST 422. U.S. History, 1789-1848

3.00

An interpretive study of the political, economic, social, intellectual and cultural history of the United States from the ratification of the Constitution through the Mexican-American War. *Prerequisite: HIST 395 or permission of the instructor.*

HIST 425. Civil War and Reconstruction

3.00

A study of the background, development, personalities and aftermath of the Civil War. Special attention is given to the coming of the war and different explanations of its causes and to the policies and significance of Reconstruction, with varying interpretations thereof. *Prerequisite: HIST 395 or permission of the instructor.*

HIST 427. U.S. Environmental History

3.00

An interpretive study of the development of environmental thought in the United States. Emphasis is given to philosophies of nature, land and resource usage and conservation, the environmental movement and organizations, environmental activism and radicalism, landscape restoration, and environmental mitigation and protection. *Prerequisite: HIST 395 or permission of the instructor.*

HIST 428. American Workers in the Industrial Age, 1877-1948

3.00

This seminar examines what contemporaries called the Labor Problem, from the strikes of 1877 to the accord between GM and the UAW in 1948. It explores the impact of industrialization, race and gender, consumerism, the New Deal and two world wars on the lives of American workers and their unions. *Prerequisite: HIST 395 or permission of the instructor.*

HIST 430. The Gilded Age: U.S. History, 1877-1901

3.00

An interpretive study of the United States from the conclusion of the Civil War until the assassination of William McKinley with special emphasis on industrialization, urbanization, western and overseas expansion, early reform movements, and politics. *Prerequisite: HIST 395 or permission of the instructor.*

HIST 431. Reform, World War and Prosperity: U.S. History, 1901-1929

3.00

An interpretive study of U.S. history from the rise of Theodore Roosevelt through the 1920s. Emphasis is placed on the reform movements of the period and the problems and issues generated by the nation's emergence as a world power and an industrial, urban society. *Prerequisite: HIST 395 or permission of the instructor.*

HIST 432. Depression, War and Cold War: U.S. History, 1929-1961

3.00

An interpretive study of U.S. history from the onset of the Great Depression in 1929 through the inauguration of John Kennedy in 1961. Emphasis is given to the New Deal, World War II and the early years of the Cold War. *Prerequisite: HIST 395 or permission of the instructor.*

HIST 433. Reform, Upheaval and Reaction: U.S. History Since 1961- 1980

3.00

An interpretive study of U.S. history from the inauguration of John Kennedy in 1961 through the election of Ronald Reagan. Emphasis is given to the KennedyJohnson administrations, Vietnam, the counterculture and student movement, and Watergate and its aftermath. *Prerequisite: HIST 395 or permission of the instructor.*

HIST 434. Recent America

3.00

An interpretive study of U.S. History from the Watergate era through the present. Emphasis is given to cultural, social, political, environmental, economic, educational and ethical issues, as well as considerations of indigenous peoples, foreign policy, activism and American idealism. *Prerequisite: HIST 395 or permission of the instructor.*

HIST 435. History of Immigration to the United States

3.00

The United States is a land populated by migrants. Most residents of the U.S. today trace their ancestry to Latin America, Europe, Asia or Africa. The U.S. has been both the largest receiving destination of immigrants in the last two hundred years and the inventor of modern border restrictions. This course surveys patterns of migration and immigrant experience from colonial times to the present. Students will consider migration to the United States as part of the evolving global labor market and colonial expansion in the modern world. Students will learn about the relationship of immigration to nation-building, national expansion, war, and the production and reproduction of national identity. Students will also learn about the history of the legal regulation of immigration, the political debates surrounding the role of immigration in society and the experience of immigrants in settling and negotiating life in a new society. Students will explore immigration history by exploring a rich array of primary source material: fiction, memoirs, government documents, oral history interviews, films, maps and more. *Prerequisite: HIST 395 or permission of the instructor. Corequisite: None.*

HIST 436. Afro-Latin America**

3.00

Crosslisted with ANTH 436

Latin America and the Caribbean were the first and largest parts of the Western Hemisphere to be populated by Africans. Afro-Latin America examines cultural formations Africans brought to these regions. Beginning with an overview of the slave trade, it examines the histories of Africans and African-descent people throughout Latin America, as well as contemporary Afro-Latin American culture(s). *Prerequisite: One course in either Latin American or Africana studies (any discipline); upper-division status or permission of the instructor.*

HIST 437. Latin America and Latin Americans through Film: Focus on the Twentieth Century**

3.00

This course will provide students with the tools they need to be skilled visual readers as well as to link national and international representations of Latin America to their appropriate historical, social, cultural and political contexts. *Prerequisite: HIST 395 or permission of the instructor.*

HIST 438. Workshop in Public and Local History

3.00

Selected historical topics relating to the Shenandoah Valley and surrounding region are studied in depth. Students will undertake primary research and collaborate on final project. See MyMadison for current classes. *Prerequisite: HIST 225.*

HIST 439. Selected Topics in American History

3.00

Selected topics are studied in depth. See MyMadison for current topic. Course may be repeated for credit when content changes.

Prerequisite: HIST 395 or permission of the instructor.

HIST 440. The History Museum

3.00

Crosslisted with HIST 540

An exploration of the history, evolution, and function of history museums. Readings and discussions cover the history and genealogy of the modern museum; exhibits and the influence of other forms of display such as world's fairs and department stores; ethics, mission, and administration; collections management and conservation; education and interpretation; emerging technologies; historical memory and controversy in museums; the role of the community; and museums on a global stage.

Prerequisite: HIST 395. Instructor's permission required to waive HIST 395 prerequisite for non-history majors.

HIST 441. Oral History

3.00

Crosslisted with SCOM 441

This course will explore the theory and practice of oral history. Through a series of readings, students will consider the many promises and challenges of the discipline, including issues related to memory, objectivity, ethics, the law, and technology. Students will also engage in an experiential learning exercise in which they collaborate to produce an oral history project.

Prerequisite: HIST 395 or permission of the instructor.

HIST 442. Selected Topics in European History

3.00

Selected topics are studied in depth. See MyMadison for current topic. Course may be repeated for credit when content changes. *Prerequisite: HIST 395 or permission of the instructor.*

HIST 443. Modern American Technology and Culture

3.00

This seminar examines the sociotechnical history of twentieth century American. It employs several analytical frameworks to examine the complex relationship between social and technological change, casting particular attention on the mass production ethos, the social meanings of everyday household technologies, the nuclear age, the space age, countercultural technology and the high tech age. *Prerequisite: HIST 395 or permission of the instructor.*

HIST 444. Revolution and Social Change in Latin America**

3.00

This seminar will explore why revolutions were a major feature of the Latin American landscape throughout the modern era and how they contributed to changes in society. In a typical semester the course will explore the lives of leaders such as Che and Emiliano Zapata and investigate the causes and consequences of revolutionary actions in Cuba, Mexico and Nicaragua. *Prerequisite: HIST 395 or permission of the instructor.*

HIST 445. A Cultural History of Latin America, the Caribbean, and the United States**

3.00

An examination of the complex history shared between Latin America and the United States in the nineteenth and twentieth centuries. This class examines media representations, fiction, and diplomatic correspondence to understand the complex negotiations and exchanges that take place in the Americas. *Prerequisite: HIST 395. Instructor's permission required to waive HIST 395 prerequisite for non-history majors.*

HIST 447. South America**

3.00

An examination of nineteenth and twentieth-century South America by emphasizing recent historiographies of the region. The class draws from social and cultural history to explore themes such as gender, race and ethnicity, nation-building, and historical memory. *Prerequisite: HIST 395. Instructor's permission required to waive HIST 395 prerequisite for non-history majors.*

HIST 448. Gender in Latin America and the Iberian World**

3.00

This course is designed to introduce students to critical issues, theories and methods of gender history through the study of the history of Latin America and the broader Iberian world. Students will study select peoples and cultures of Latin America and the Iberian Peninsula exploring how they lived and understood gender and sexuality during the pre-colonial, colonial and/or modern eras. *Prerequisite: HIST 395 or permission of the instructor.*

HIST 449*. Women and Fascism

3.00

This course offers a comparative understanding of fascism and women with a focus on Europe, including Nazi Germany, Fascist Italy and Francoist Spain. We will also discuss fascist movements and right-wing women in other European countries and in Latin America. The course will uncover the origins of fascism and the rise of the fascist party and the women's branch. *Prerequisite: HIST 395 or permission of the instructor.*

HIST 453. Patterns of Global History**

3.00

This course introduces students to the literature, concepts, themes and methodology of global history, a subfield of history that seeks to compare experiences across regional, area, cultural and temporal boundaries, to look at cross-cultural interactions and to examine large-scale patterns that have shaped history on a global scale. *Prerequisite: HIST 101, HIST 102 and HIST 395.*

HIST 457. Comparative Empires

3.00

Crosslisted with POSC 457

Comparative empires is an examination of imperialism from 1450 to the present. Focusing on no less than four empires, the course will apply a variety of theoretical approaches in a series of case studies with at least one empire from the period of exploration and one from 1919 to the present. Students will employ approaches from history, political science, economics and geography as they search for a deeper understanding of each case study and the broader concept of empire. *Prerequisite: HIST 395 or permission of instructor. Corequisite: MSSE 470H.*

HIST 458. Modern European Intellectual History

3.00

This upper-level seminar considers important thinkers and major trends in philosophical, social, and aesthetic thought in

nineteenth- and twentieth-century Europe. Instead of merely surveying a series of ideas and thinkers, the course will trace the development of ideas across times and cultures by undertaking careful readings of key texts. *Prerequisite: History Majors must have earned credit for HIST 395 prior to enrolling in this course.*

HIST 461. Marxism

3.00

A study of the most significant ideas concerning politics, society, economics and philosophy which shaped Communism and Marxist varieties of Socialism. *Prerequisite: History Majors must have earned credit for HIST 395 prior to enrolling in this course.*

HIST 463. Tudor-Stuart England

3.00

A study of the economic, intellectual, political and religious development of the English people from 1485 to 1714, with special attention to the constitutional struggles of the 17th century. *Prerequisite: History Majors must have earned credit for HIST 395 prior to enrolling in this course.*

HIST 464. Renaissance and Reformation

3.00

A study of High Medieval civilization as an introduction to the history of Modern Europe. Attention is given to the Italian and Northern Renaissance, fragmentation of Western Christendom, intellectual impact of Luther and Calvin on Western thought, and structure of Tudor despotism in England. *Prerequisite: History Majors must have earned credit for HIST 395 prior to enrolling in this course.*

HIST 466. The Family, 1400-1800

3.00

An examination of the bibliography, methods and substance of family history in Europe and America. Emphasis will be on sources, structure, patterns of change and continuity, and stages of family life to the Industrial Revolution. *Prerequisite: History Majors must have earned credit for HIST 395 prior to enrolling in this course.*

HIST 467. The Roman Republic

3.00

History 467 covers the political, military, social, economic and intellectual history of the Roman Republic from the traditional date of its foundation to Octavian's victory over M. Antonius and the establishment of the Empire. The course is a mixture of lectures and discussions of primary sources. Students will read selections from important authors such as Livy, Sallust, Caesar and Cicero in addition to scholarly monographs. *Prerequisite: History Majors must have earned credit for HIST 395 prior to enrolling in this course.*

HIST 468. The Roman Empire

3.00

History 468 covers the political, military, social, economic and intellectual history of the Roman Empire from its establishment ca 30 BC to the final division of the Empire into eastern and western halves in AD 395 at the death of Theodosius I. The course is a mixture of lectures and discussions of primary sources. Students will read selections from important authors such as Tacitus, Pliny the Younger, Cassius Dio and Ammianus Marcellinus in addition to scholarly monographs. *Prerequisite: History Majors must have earned credit for HIST 395 prior to enrolling in this course.*

HIST 469. A History of International Development in the Twentieth Century

3.00

This seminar considers major trends in the history of international development since World War II, focusing on American development theories, institutions, and programs but also considering case studies of aid programs worldwide. The course will trace the history of international development by undertaking careful readings and discussions of primary and secondary texts from a variety of disciplines, including history, economics, sociology, anthropology, and political science. *Prerequisite: History Majors must have earned credit for HIST 395 prior to enrolling in this course.*

HIST 470. Modern Africa

3.00

A historical analysis of the major themes in modern African history since the colonial era. *Prerequisite: History Majors must have earned credit for HIST 395 prior to enrolling in this course.*

HIST 471. Commemoration and Controversy: Public Art in America

3.00

Crosslisted with ARTH 471

This course examines the socio-historical, political, cultural, and philosophical dimensions of public art in American society, from the Early Republic to the present day. Topics may include: the nature of public art, its uses and functions, as well as civic and official attitudes towards art in the public sphere. Issues of censorship, propaganda, and the "culture wars" of the 1980s and 90s will be highlighted.

HIST 473. Early Modern Islamic Empires

3.00

This seminar surveys and compares Islamic imperial formations from the 14th Century through World War I, focusing on the Ottoman, Safavid, and Mughal empires that flourished in the global age of early modernity. *Prerequisite: History Majors must have earned credit for HIST 395 prior to enrolling in this course.*

HIST 474. Stalinism in Theory, Practice, and Memory

3.00

This course provides an introduction to Stalinism in the Soviet Union and Eastern Europe. It addresses socialist modernization from many angles - the corridors of the Kremlin, the peasant collective farms of Ukraine and Romania, the shop-floors in Moscow, and the streets of Tashkent. The course consists of three units: theories, practices, and memories of Stalinism. Each unit explores various political, economic, social, and cultural issues related to the Stalinist modernization drive. *Prerequisite: History Majors must have earned credit for HIST 395 prior to enrolling in this course.*

HIST 475. Modern Russia

3.00

A study of Russia from the 1917 Revolution to the present. Readings and discussion will emphasize significant political, economic, social and cultural developments. *Prerequisite: History Majors must have earned credit for HIST 395 prior to enrolling in this course.*

HIST 476. History of Disability in Postwar Europe, 1945-1991

3.00

This course is an introduction to the history of disability in Europe from 1945 to the present. After WWII, European countries went through a phase of postwar reconstruction that required rebuilding economies, societies and entire cities as well as individual bodies and psyches. In this course, we will learn how governments with different political orientations treated their disabled citizens, conceptualized their rights and devised specific social policies to protect them. *Prerequisite: HIST 395 or permission of the instructor.*

HIST 477. Medieval Europe

3.00

Attention is focused on Europe in the Middle Ages, with a concentration on social and intellectual aspects and the development of parliamentary institutions. *Prerequisite: History Majors must have earned credit for HIST 395 prior to enrolling in this course.*

HIST 478. Eastern Europe

3.00

A study of the lands between Germany and Russia, from the Baltic to the Balkans. Emphasis is on the Hapsburg Empire and its successor states, the origins of the World Wars, the post-World War II communist governments, and the cultural and intellectual contributions of the Eastern European people. *Prerequisite: History Majors must have earned credit for HIST 395 prior to enrolling in this course.*

HIST 482. French History Seminar

3.00

Broad introduction to a particular aspect of early modern, revolutionary or modern French history that is characterized by extensive historical debate. See instructor for thematic focus. Students develop knowledge of historical content and of the historiography/methodological approaches, conduct independent research and present findings in writing and in formal research colloquia. Students may repeat seminar for credit if topics differ. *Prerequisite: History Majors must have earned credit for HIST 395 prior to enrolling in this course.*

HIST 485. Colonialism in the Middle East and South Asia

3.00

A comparative examination of colonialism focusing on the cultural and intellectual dimensions of colonial encounters. Lectures and readings will emphasize European strategies and techniques of rule in the Arab world (including North Africa), Iran, and India. Research and writing assignments will allow for the consideration of American involvement in Palestine-Israel, Iraq, and Afghanistan. *Prerequisite: History Majors must have earned credit for HIST 395 prior to enrolling in this course.*

HIST 486. Europe Since 1914

3.00

An interpretive study of European history from World War I to the post-Cold War era, with special emphasis on the revolutions of 1917-19, the rise of totalitarianism, the origins of the Second World War, the Cold War and the continuing crisis of values. *Prerequisite: History Majors must have earned credit for HIST 395 prior to enrolling in this course.*

HIST 487. World War II

3.00

An examination of the origins, conduct and immediate aftermath of World War II in Europe and Asia. Attention is given to Japan's Pacific War, Hitler's war in Europe and the ultimate victory of the allies. The major military campaigns are discussed as

are collaboration, resistance, and the War Crimes Trials. *Prerequisite: History Majors must have earned credit for HIST 395 prior to enrolling in this course.*

HIST 488. The Holocaust in Global Context

3.00

Introduces students to the most significant accomplishments and debates of recent Holocaust scholarship, emphasizing how historical memory of the Holocaust has been created and has evolved over time. Analyzes the historical causes and development of the Holocaust, as well as its cultural, political, and scholarly resonance in the post-1945 world. *Prerequisite: History Majors must have earned credit for HIST 395 prior to enrolling in this course.*

HIST 489. Selected Topics in World History

3.00

Selected topics are studied in depth. Course may be repeated when content changes. Only courses with significant content outside of Europe will count toward the world history requirement. See MyMadison and the history department website for information on current classes. *Prerequisite: History Majors must have earned credit for HIST 395 prior to enrolling in this course.*

HIST 490. Special Studies

3.00

Designed to give capable students in history an opportunity to complete independent study under faculty supervision. *Prerequisite: History Majors must have earned credit for HIST 395 prior to enrolling in this course.*

HIST 492. Material Culture

3.00

Crosslisted with ANTH 492, ARTH 492

A broad introduction to the multidisciplinary "field" of material culture studies through readings, written assignments, in-class exercises, and field trips. The course introduces ways of looking at and learning from objects and examines how scholars from several disciplines have used material culture in their work. Instructor's permission required to waive HIST 395 prerequisite for non-history majors. *Prerequisite: History Majors must have earned credit for HIST 395 prior to enrolling in this course.*

HIST 493. Historic Preservation

3.00

Crosslisted with ARTH 493

An introduction to the philosophy and techniques of historic preservation, guidelines for restoration, state and National Register forms and procedures, historic architecture, structural analysis, restoration techniques as well as the business aspects of historic preservation projects. Field trips are a major component of the course. *Prerequisite: History Majors must have earned credit for HIST 395 prior to enrolling in this course.*

HIST 495. Intro Archives and Manuscripts

3.00

An introduction to archives administration and the principles and practices of archival arrangement and description. Through targeted readings and leadership roles in discussion, as well as field trips and projects, students will explore topics in appraisal, acquisition, preservation, and intellectual and physical access, as well as contemporary ethical, legal and technological issues. *Prerequisite: History Majors must have earned credit for HIST 395 prior to enrolling in this course.*

HIST 496. Research Thesis

3.00

Crosslisted with ANTH 496

Students will gather, analyze and interpret archaeological/historical data over two semesters. Students will work on a project that demonstrates theory, research design, data gathering and analysis, culminating in a written thesis. The course meets the capstone requirement for the historical archaeology minor, but is also available to students in history and anthropology. *Prerequisite: Junior or Senior Standing Only.*

HIST 498. Marshall Scholars Seminar

3.00

A research intensive seminar based on the manuscript collections and other primary sources of the Marshall Library. Students may choose any subject involving 20th-century diplomatic and military history and political affairs from 1900 to 1960 - the approximate dates of George C. Marshall's public service. *Prerequisite: History Majors must have earned credit for HIST 395 prior to enrolling in this course.*

HIST 499. Honors

3.00

Year course. *Prerequisite: History Majors must have earned credit for HIST 395 prior to enrolling in this course.*

HON 100. Honors First Year Seminar

1.00

As an introductory experience in the Honors College, students will be oriented to Honors activities and goals, high impact university learning practices, seminar requirements and areas of emphasis sequences, and leadership, service, and research opportunities. Students will examine their personal and educational goals and participate in ethical reflection that expresses itself in scholar-citizenship and community engagement.

HON 200. Special Topics in Honors

1.00 - 3.00

Unique, interdisciplinary courses designed specifically for the Honors College. These courses explore a range of complex topics that deal with contemporary issues in society, multicultural and comparative studies, and advanced applications in business and the natural and social sciences. Seminars are designed to be flexible small classes that may reflect unique, sometimes experimental, styles of teaching. *Prerequisite: Enrollment in Track I or Track II of the Honors College.*

HON 300. Advanced Special Topics in Honors

1.00 - 3.00

Unique, interdisciplinary courses designed specifically for the Honors College. These courses explore a range of complex topics that deal with contemporary issues in society, multicultural and comparative studies, and advanced applications in business and the natural and social sciences. Seminars are designed to be flexible small classes that may reflect unique, sometimes experimental, styles of teaching. HON 300 seminars are not recommended for first year students. *Prerequisite: Enrollment in Track I or Track II of the Honors College.*

HON 321. Leadership I

3.00

This Honors Seminar is the first course within the Leadership Area of Emphasis. Students will be introduced to the meaning, study and practice of leadership through the examination and evaluation of leadership styles and behavior. Students will analyze the way in which leadership principles and practices have been and can be applied to their lives. Through this study, students will develop their own personal leadership potential.

HON 322. Leadership II

3.00

This Honors Seminar offers a variety of individualized and/or small group experiential learning opportunities in association with the Leadership Area of Emphasis. *Prerequisite: HON 321.*

HON 323. Leadership III

1.00 - 3.00

This practicum course offers an intense independent study opportunity for students to work one-on-one or in small groups with faculty mentors on a project of their design. The specifics of these offerings will be designed by faculty mentors and the Area of Emphasis Honors student(s). Objectives, goals and deliverables should be an extension and follow-up to activities associated with an experiential Areas of Emphasis course. *Prerequisite: HON 321 and HON 322.*

HON 331. Global Studies I

3.00

This Honors Seminar is the first course within the Global Studies Area of Emphasis. We will examine how people study and perceive similarities, differences and interdependencies among human societies through the exploration of social sciences, arts, humanities, health, education, environmental and developmental studies. Course components will promote global citizenship through discussion, the introduction of new concepts and critical thinking related to current issues and case studies.

HON 332. Global Studies II

3.00

This Honors Seminar offers a variety of individualized and/or small group experiential learning opportunities in association with the Global Studies Area of Emphasis. *Prerequisite: HON 331.*

HON 333. Global Studies III

1.00 - 3.00

This practicum course offers an intense independent study opportunity for students to work one-on-one or in small groups with faculty mentors on a project of their design. The specifics of these offerings will be designed by faculty mentors and the Area of Emphasis Honors student(s). Objectives, goals and deliverables should be an extension and follow-up to activities associated with an experiential Areas of Emphasis course. *Prerequisite: HON 331 and HON 332.*

HON 341. Scientific Research I

3.00

This Honors Seminar is the first in the Research Area of Emphasis series. The course is designed as an introduction to the nature of scientific inquiry and what it means to be a research scientist and effective communicator. Course objectives will be met through the collective investigation of a "big" problem and the professional communication of the resulting findings. In doing so, students will gain scientific literacy skills to support future research efforts.

HON 342. Scientific Research II

3.00

This Honors Seminar offers a variety of individualized and/or small group experiential learning opportunities in association with the Research Area of Emphasis. *Prerequisite: HON 341.*

HON 343. Scientific Research III

1.00 - 3.00

Practicum courses offer an intense independent study opportunity for students to work one-on-one, or in small groups, with faculty mentors on a project of their design. The specifics of these offerings will be designed by faculty mentors and the Area of Emphasis Honors student(s). Objectives, goals and deliverables should be an extension and follow-up to activities associated with an experiential Areas of Emphasis course. *Prerequisite: HON 341 & HON 342.*

HON 351. Service I

3.00

This Honors Seminar is the first course within the Service Area of Emphasis. Engaged citizens make differences in the quality of life in local, national and global communities. Upon studying a wide spectrum of contemporary issues, engaged citizens take action. This seminar provides opportunities for students to combine their intellectual pursuits with civic engagement and discourse, thereby empowering them to become engaged participants in tomorrow's global society.

HON 352. Service II

3.00

This Honors Seminar offers a variety of individualized and/or small group experiential learning opportunities in association with the Service Area of Emphasis. *Prerequisite: HON 351.*

HON 353. Service III

1.00 - 3.00

This practicum course offers an intense independent study opportunity for students to work one-on-one, or in small groups, with faculty mentors on a project of their design. The specifics of these offerings will be designed by faculty mentors and the Area of Emphasis Honors student(s). Objectives, goals and deliverables should be an extension and follow-up to activities associated with an experiential Areas of Emphasis course. *Prerequisite: HON 351 and HON 352.*

HON 361. Creativity I

3.00

The course explores basic concepts of creativity across the disciplines and cultures. Course content includes the study and analysis of creative expression, the application of theories and conceptual frameworks, and the various modes of creative cognition.

HON 362. Creativity II

1.00 - 3.00

This Honors Seminar offers a variety of individualized and/or small group experiential learning opportunities in association with the Creativity Area of Emphasis. *Prerequisite: HON 361.*

HON 363. Creativity III

1.00 - 3.00

This practicum course offers an intense independent study opportunity for students to work one-on-one or in small groups with faculty mentors on a project of their design. The specifics of these offerings will be designed by faculty mentors and the Area of Emphasis Honors student(s). Objectives, goals and deliverables should be an extension and follow-up to activities associated with an experiential Areas of Emphasis course. *Prerequisite: HON 361 & HON 362.*

HON 450. Honors Independent Study

0.00

This course provides an opportunity to support summer immersion experiences for Honors students. *Prerequisite: Permission of the Honors Program Dean.*

HON 499A, B, C. Honors Senior Project

1.00, 3.00 or 2.00

This is a three semester course, offered as parts A, B and C for one, three and two credits per semester, respectively. Enrollment is restricted to those honors students (Track I, II or III) whose senior projects are not discipline specific. This could include certain collaborative projects or experientially-based projects. *Prerequisite: Permission of the Honors Program Dean.*

HON 499B. Honors Senior Project

3.00

This is a three semester course, offered as parts A, B, and C for one, three and two credits per semester, respectively. Enrollment is restricted to those honors students (Track I, II or III) whose senior projects are not discipline specific. This could include certain collaborative projects or experimentally based projects. *Prerequisite: Permission of the Honors College Dean.*

HON 499C. Honors Senior Project

2.00

This is a three semester course, offered as parts A, B, and C for one, three and two credits per semester, respectively. Enrollment is restricted to those honors students (Track I, II or III) whose senior projects are not discipline specific. This could include certain collaborative projects or experimentally based projects. *Prerequisite: Permission of the Honors College Dean.*

HM 201. Foundations of Hospitality, Sport and Recreation Management

3.00

Crosslisted with SRM 201

An introduction to the basis for the professions that make up the School of Hospitality, Sport and Recreation Management. A focus on these professions in governmental, voluntary, private and commercial settings is incorporated. Both the economical significance and the professional preparation for success in the industry is both introduced and practiced *Prerequisite: HM or SRM Major or permission of the director.*

HM 202. Foundations of Leadership in Hospitality, Sport and Recreation Management

3.00

Crosslisted with SRM 202

An introduction to leadership in the Hospitality, Sport and Recreation Management (HSRM) industry. The primary focus will be leadership theory, skill application with a focus on personal awareness. *Prerequisite: HM or SRM Major or permission of the director.*

HM 203. Foundations of Ethics and Law in Hospitality, Sport and Recreation Management

3.00

Crosslisted with SRM 203

An introduction to ethics and law within the sport, hospitality and recreation industry. The ethical portion introduces students to select theories of ethics, ethical issues and an ethical decision making model; and the legal portion introduces students to basic legal terminology and concepts while concentrating on negligence and employment issues. *Prerequisite: HM or SRM Major or permission of the director.*

HM 211. Overview of Hospitality and Tourism Management

3.00

Exposes students to the areas of lodging, food and beverage, tourism and entertainment management, special events and meeting planning, and club and resort management. Emphasis is on hospitality industry scope, organization and economic impact; includes familiarization with industry terminology and individual and business contributors to the field of hospitality and tourism management. *Prerequisite: HM major or permission of director.*

HM 212. Hospitality Prowess

3.00

An applied hospitality course consisting of experiential exercises followed by class discussion along with actual work experience as an employee within the hospitality field. Role playing and cases are used as learning activities where the instructor acts as a facilitator to learning. Debriefing is used extensively as a way of creating essential theory. Students must successfully complete ServSafe Food Protection Manager Certification and Training for Intervention ProcedureS (TIPS). *Prerequisite: HM major or permission of director.*

HM 298. Special Studies in Hospitality Management

3.00

A special studies course designed to explore areas of current topical concern in the lodging, food and beverage, travel and tourism, and entertainment industries. Course content will vary. *Prerequisite: HM major or permission of director.*

HM 310. Practical Work Experience

0.00

Required 600 hours of approved hospitality and tourism work experience. Credit/no credit only. All work sites must be approved. *Prerequisite: Minimum of 45 credit hours complete, HM 201, HM 202, HM 203, HM 211 and HM 212. Corequisite: HM 312.*

HM 311. Hotel Operations and Hospitality Technology

3.00

An in-depth look at a full service hotel through the eyes of a general manager. The course will focus on operations, engineering, housekeeping, uniformed services, front office, reservations and revenue management. Different hospitality technology platforms and software programs will be used to expose students to hospitality technology. *Prerequisite: Minimum of 45 credit hours complete, HM 201, HM 202, HM 203, HM 211 and HM 212.*

HM 312. Culinary Arts & Menu Management

3.00

An application of basic food preparation and menu development. Focus is on preparing students to understand gastronomy and communicate with culinary professionals. This course includes development of effective menus, plate presentation, preparation methods, flavor development and food service trends. Lab fee applies. Uniform required. *Prerequisite: Minimum of 45 credit hours complete, HM 201, HM 202, HM 203, HM 211 and HM 212, and ServSafe certified or equivalent or permission of director. Corequisite: HM 310.*

HM 316. Country Club Management

3.00

An application of business concepts to the private equity club and full service resort industry. Industry cases are used to facilitate discussion of similarities and differences among private equity clubs, full service resorts and other hospitality business in the areas of culture, asset management and operations. *Prerequisite: Minimum of 45 credit hours complete, HM 201, HM 202, HM 203, HM 211 and HM 212.*

HM 317. Introduction to Event Management

3.00

Course designed to explore conferences, conventions, expositions, meetings and special events as they relate to the responsibilities of a planner, selection criteria for host venues, legal and ethical issues, negotiating process, program design, budgeting, contracts, marketing, logistics and evaluation. Practical hands-on experience through projects may occur. *Prerequisite: HM 310 and HM 312.*

HM 351. Cost Control and Budgeting

3.00

Introduction to cost control, budgeting and financial analysis as it relates to the hospitality industry. Students work as a team to create a detailed business plan. *Prerequisite: Minimum of 45 credit hours complete, HM 201, HM 202, HM 203, HM 211 and HM 212.*

HM 361. Italian Culture and Wine

3.00

An introduction to the fundamentals of wine making, wine tasting and glossary of terms provide a framework for visual, olfactory and gustative analysis. The historical value of wine, together with its cultural, economic and social meaning in Italy, are explored. Course taught in Florence, Italy. Lab fee applies. *Prerequisite: Student must be enrolled in JMU in Florence Program.*

HM 362. Italian Gastronomy

3.00

This course is designed to teach students the applied approach to match wine and food from different parts of the world using flavors, textures and components present in food and wine in complementing strategies. Emphasis will be placed on menu planning, cooking methods and tasting wines with food in a formal dining room. Course offered in Florence, Italy. Lab fee applies. *Prerequisite: Student must be enrolled in JMU in Florence Program.*

HM 402. Supervisory Hospitality Internship

3.00

Required 400 hours of approved hospitality supervisory experience. CR/NC only. All work sites must be pre-approved. *Prerequisite: HM 310, HM 312 and a minimum of 72 credit hours earned.*

HM 411. Hospitality Law

3.00

The course focuses on the application of the law to the hospitality industry including rights and obligations of guests and lodging, food service, club, event management and association operators. The identification of potential legal problems and formulation of preventive measures to limit/prevent liability are emphasized. *Prerequisite: HM 402 or permission of director.*

HM 414. Beverage Management and Marketing

3.00

The course is designed to enhance knowledge in the identification and evaluation of beverages typically served in hospitality establishments. Special attention is given to alcoholic and non-alcoholic beverages with regard to price/quality relationships; channels of distribution and marketing; trends and current issues faced by the industry; and service ethics. *Prerequisite: Must be 21 years of age or older and declared HM major, HM 402 or permission of director.*

HM 417. Advanced Event Management

3.00

This course examines event planning and management within a project management framework. The course is designed to provide hands-on experience in event planning. Students will work to plan and execute an event from start to finish with instructor oversight. Students will demonstrate, by executing an event, the core competencies required of a successful event manager. *Prerequisite: HM 317, HM 402 and permission of instructor or director.*

HM 419. Napa & Sonoma Wine and Culture

3.00

Napa and Sonoma are the premier wine growing regions in the United States. The wines influence wines across the US and around the world. The ability to impressively learn about the wine, food, and culture that influence the region can only be fully accomplished by visiting. Students are able to visit wineries and speak with owners, visit growers and speak with the farmers, visit nurseries and discuss varietals. *Prerequisite: HM Major, 21 years old the first day of class and permission of the director.*

HM 421. Hospitality Ethics

3.00

Ethical issues and actions that have occurred, or are currently occurring, in the hospitality industry are examined from multiple perspectives. Examining recent scandals, real-world scenarios, news stories, and common ethical dilemmas will enable a student to recognize an ethical dilemma, understand the components of the dilemma, and make an ethical decision. *Prerequisite: HM 402 or permission of director*

HM 422. Hospitality Human Resources Management

3.00

Identification and exploration of the information needs of the Hospitality manager in making policy and personnel decisions. Different philosophies and processes for locating, attracting, hiring and training a qualified staff are examined. Emphasis is placed on the work environment within the service industry. Employment law will be emphasized as a part of the course. *Prerequisite: HM 402 or permission of director*

HM 440. Hospitality Leadership

3.00

Management teams are required to produce an enjoyable evening composed of quality food and entertainment while staying within budget. Students complete a financial and operational analysis upon completion of their themed event. Senior assessment may also occur. *Prerequisite: HM 402 or permission of director.*

HM 441. Hospitality Financial Management

3.00

An examination of common financial statements used by hospitality managers to make decisions regarding budgets and investment. Corporate financial models within the hospitality industry are explored, such as franchising, ownership and REITs. Appropriate software is used in the class. *Prerequisite: HM 402 or permission of director*

HM 442. Hospitality Seminar

3.00

A senior capstone course designed to assist in transitioning from being a university student to holding a leadership role within the hospitality industry. The interactive course draws upon the umbrella curricular goals of the hospitality management program in communication, ethics, finance and leadership. Senior assessment may also occur. *Prerequisite: HM 311, HM 316, HM 317, HM 351 and HM 402.*

HM 490. Special Studies in Hospitality and Tourism Management

3.00

Designed to give capable students in hospitality and tourism management an opportunity to complete independent study under faculty supervision. *Prerequisite: Permission of director.*

HM 498. Special Topics in Hospitality and Tourism Management

3.00

This course is designed to allow explorations of areas of current topical concern, or to exploit special situations. Course content will vary. For current course content, consult the adviser. *Prerequisite: Permission of director.*

HM 499. Honors

1.00 - 6.00

Year course. See catalog section "Graduation with Honors." *Prerequisite: Permission of the instructor or director.*

HRD 100. Human Resource Development Leadership Lab

2.00

Hands-on practicum of leadership strategies and techniques designed to give each student a better appreciation for the dynamics of leadership in intimate, physically challenging and stressful environments, both indoors and out. Students operate in teams which are formed and reorganized on a continuous basis, surrounded by peers at several levels of leadership experience and training. Collaborative learning is enhanced when students apply what they learn in class by describing relevant lessons learned through experiences outside the classroom. The focus of this course is to provide students with the opportunity to lead and follow in an observed setting and receive constant feedback and mentoring on their demonstrated leadership skills. Students learn through leading as well as through a critical reflection, inquiry, dialogue and group interaction. Everyone is responsible for contributing to the learning process.

HRD 101. Introduction to Leadership

1.00

An introduction to: various leadership styles and their effect on organizations; insight into the leaders' roles and responsibilities within the context of the organization; character- and values-based leadership; basic leadership actions; the importance of self improvement in the areas of time management, health and fitness, goal setting, academic accomplishment and communications; group dynamics, and the development of interpersonal skills. *Corequisite:* HRD 100.

HRD 123. Developing Multicultural Competency for Effective Facilitation

3.00

This course will provide students with a deeper understanding of social identities, and they will gain the necessary skills to facilitate training, programs and dialogues focusing on areas of diversity, multiculturalism, inclusion and access. Students enrolled in this course will be prepared to become a diversity educator in the Diversity Education Empowerment Program sponsored by the Center for Multicultural Student Services at James Madison University.

HRD 201. Leadership Styles Theory and Application

2.00

Explores the dimensions of creative and innovative leadership strategies and styles by examining team dynamics and two historical leadership theories that form the basis of the leadership framework (trait and behavior theories). Students practice aspects of personal motivation and team building in the context of planning, executing and assessing team exercises and participating in leadership skills labs. Focus is on continued development of the knowledge of leadership values and attributes through an understanding of institutional structures, duties and responsibilities of organizational/institutional leaders, and leadership in small organizations. Case studies provide tangible context for learning leadership skills, values, actions and attributes as they apply to a contemporary setting. *Prerequisite:* HRD 100, HRD 101. *Corequisite:* HRD 202 .

HRD 240. Introduction to Human Resource Development

3.00

An introduction to the role and scope of human resource development with particular emphasis on required competencies for HRD professionals. Critical moral and ethical issues are introduced. *Prerequisite:* Declared HRD minor.

HRD 245. Leadership in Organizational Settings

3.00

An examination of the principles of leadership and their application to group settings. Emphasis will be placed on the critical appraisal of the facets of leadership through the use of cases and readings. *Prerequisite:* Declared HRD minor.

HRD 380. Performance and Task Analysis in Human Resource Development

3.00

Provides the basic skill level for students in the area of performance analysis and subsequent assessment. Particular emphasis is placed on actual analysis and assessment situations with application to program and curricular design. *Prerequisite:* Declared HRD minor, HRD 240 and HRD 245.

HRD 400. Human Resource Development Internship

3.00

A structured internship experience designed to provide students with the opportunity to contribute within an actual work setting

the role and scope of human resource development efforts. Minimum 400-hour experience approved by the program coordinator. Credit may not be earned for both HRD 400 and LTLE 401. *Prerequisite: Adviser permission required.*

HRD 470. Diversity and International Human Resource Development

3.00

The course prepares students for meeting the challenges presented by globalization and workforce diversity in HRD. Topics include the impact of increasing globalization and diversity on HRD and the workplace, cross-cultural communications, conflict resolution in diversity settings, global diversity management, ethics, and cross-culture leadership competencies. It examines and explores theories and techniques for dealing with institutional 'isms' (e.g. multiculturalism, sexism, ageism). *Prerequisite: LTLE 240 and LTLE 245, must be human resource development or educational media minor or major.*

HRD 475. Seminar in Leadership

3.00

Designed to provide senior-level students with the opportunity to face some of the dilemmas of leadership. Students will be encouraged to critically examine leaders and organizations to draw from real events the ambiguities of leadership. Course will involve extensive reading, case work and a range of guest speakers. *Prerequisite: HRD 245.*

HRD 480. Learning in Adulthood

3.00

A study of the learning processes of the adult learner with an emphasis on adaptations of the instructional process to accommodate the differences inherent in the adult learning environment. Practical applications to actual adult learning situations are included. *Prerequisite: Declared HRD minor, HRD 240, HRD 245 and LTLE 370.*

HRD 485. Development of Materials and Programs

3.00

This course is designed to provide students with the basic skills necessary to design and develop performance-based training programs and courses. Emphasis will be placed on the actual design and development of training materials. *Prerequisite: Declared HRD minor, HRD 240, HRD 245, LTLE 370 and HRD 380.*

HSC 400. Human Science Seminar

1.00

Seminar course in which current topics in human science will be examined from the multiple perspectives of anthropology, biology, and psychology. Students can expect to study, and attempt to synthesize, proximate (mechanistic), ontogenetic, and evolutionary explanations for each of the topics examined. (Open only to Human Science minors.) Prerequisites: ANTH 196, GPSYC 101, BIO 270 or BIO 370, BIO 290.

HUMN 201. Introduction to Humanitarian Affairs

3.00

A geographical overview of poverty, armed conflict, hunger, disease, and natural disasters and how they can lead to humanitarian crises. It includes a study of human rights along with a look at international efforts to address, and international organizations that deal with, humanitarian crises.

HUMN 301. Introduction to Natural Disasters Response

3.00

Crosslisted with GEOG 301

This course is designed to give students an overview of the various types of natural disasters; a look at the world regions that are most vulnerable to each type of disaster; and, a preview of disaster planning, management, relief and response as related to natural disasters.

HUMN 302. Legal Issues in Humanitarian Affairs

3.00

This course prepares students interested in humanitarian response with basic information on the legal issues of humanitarian law. It covers principles of domestic and international law relevant to the practice of humanitarian response, including international humanitarian law, the law of armed conflict, international human rights law, international criminal law and other legal topics relevant to humanitarian affairs practitioners. *Corequisite: Junior status.*

HUMN 350. Special Topics in Humanitarian Affairs

1.00 - 3.00

Focused, in-depth study of specific areas or subjects related to Humanitarian Affairs. Topics will provide background and skills important for humanitarian work. Can be repeated as course content changes. *Prerequisite: Permission of the minor coordinator.*

HUMN 360. GIS for Humanitarian Assistance

3.00

Crosslisted with GEOG 360

In responding to humanitarian crises, governments and aid organizations must deploy aid workers, deliver essential services, set up temporary settlements, and distribute items such as water and food that are needed for survival. Spatial analysis and maps are critical to the success of these efforts. In this course, students learn the basics of Geographic Information Systems (GIS) for humanitarian assistance and learn how relief organizations use GIS in their work. *Prerequisite: GEOG 215.*

HUMN 490. Humanitarian Affairs Field Experience

3.00

The HUMN 490 course offers students an opportunity to gain experience and practical skills, preferably in an "international setting," either in the U.S. or abroad, and to apply knowledge and skills acquired through the Humanitarian Affairs program. This course must be completed in a setting approved by the student's adviser and the humanitarian affairs minor committee. *Prerequisite: HUMN 201 and junior status.*

HUM 102. God, Meaning & Morality [C2HQC]

3.00

A study of the ways in which various communities perceive and understand the basis of knowledge, reality, meaning and purpose, ethics and aesthetics. Students will explore religious and nonreligious approaches to these issues. May be used for general education credit.

HUM 200. Great Works [C2L]

3.00

An intensive examination of great literary works that focus on key issues of knowledge and reality, meaning and purpose, ethics,

and aesthetics. Discussion, analysis and intensive writing are required. Texts will vary by section and instructor. May be used for general education credit.

HUM 200A. Great Works

3.00

HUM 200L. Great Works - London [C2L]

3.00

An intensive examination of great literary works that focus on key issues of knowledge and reality, meaning and purpose, ethics, and aesthetics. Discussion, analysis and intensive writing are required. Texts will vary by section and instructor. May be used for general education credit. *Prerequisite: Studies Abroad-London*

HUM 250. Foundations of Western Culture [C2HQC]

3.00

This course is a study of the roots of our Western tradition in Greek, Roman, Medieval or Renaissance culture. Students examine the interrelationships among history and literary works; the fine arts; philosophical and religious thought and intellectual contexts. Content will vary depending on section and instructor. May be used for general education credit.

HUM 251. Modern Perspectives [C2HQC]

3.00

An interdisciplinary study within the modern period of arts and humanities. Students will examine the interrelationships among history and the arts, philosophy, religion and the intellectual ideas of the time. Topics will vary by section. May be used for general education credit.

HUM 251L. British Media and Society

3.00

Crosslisted with SCOM 360L, SMAD 360L, WRTC 360L

Study the history, nature, and impact of mass media in the United Kingdom. Emphasis on the impact modern media has on society, and society has on media. Consideration of similarities and differences in mass media in the United States and Great Britain. Consideration of the relationship between mass media and the arts. Focus on 20th century mass media in London, one of the world's preeminent and most influential centers. *Prerequisite: Studies Abroad-London*

HUM 252. Global Cultures [C2HQC]

3.00

This course is an inter-disciplinary study of cultures or regions commonly referred to as non-Western. Students examine diverse responses to enduring human questions at the intersection of local and global cultures. The course offers ways to critically engage comparative views on global cultures and in so doing broaden students' understanding of those cultures and their own. Sections may address themes that span multiple cultural spaces (such as sports or the environment) or focus on regions. Section topics vary by instructor. Only approved topics may count for General Education Cluster Two credit

IECE 300. Issues and Trends in Inclusive Early Childhood Education

3.00

This course is designed to introduce students to the issues and trends in the education of all infants, toddlers and young children. It will provide the historical, philosophical, social and legal background for current practices in the field and will engage students in synthesizing and analyzing this information along with research as it pertains to professional practice. *Prerequisite: EXED 200, EDUC 300 and admission to teacher education pre-professional licensure program. Corequisite: IECE 301 and IECE 303.*

IECE 301. Initial Field Experience in Inclusive Early Childhood Education

1.00

This practicum supports IECE 300. Students will further their understanding of the issues and trends impacting young children and their families in our community and evaluate their own perspectives and skills as they pertain to working with young children and families from diverse backgrounds, with diverse abilities and in diverse settings. *Prerequisite: Admission to teacher education pre-professional licensure program. Corequisite: IECE 300 and IECE 303.*

IECE 303. Development of Young Children Birth Through Age 8

3.00

This course provides students with an understanding of the development of infants, toddlers, and young children with and without exceptionalities. Skills for observing, recording and interpreting the behavior of the young child as a basis for adult intervention and guidance are developed. *Corequisite: IECE 300 and IECE 301.*

IECE 321. Initial Field Experience in IECE

1.00-2.00

This first intermediate field experience provides candidates opportunities to use their knowledge of child development to observe and assess children and then to plan meaningful learning environments and experiences for those children. Repeatable twice for a maximum of two credit hours. *Prerequisite: EXED 200.*

IECE 322. Curriculum and Instruction in Inclusive Early Childhood Education

3.00

This course explores, analyzes, and evaluates curriculum and methodology related to the design and management of a nurturing, supportive, and challenging inclusive learning environment for children ages birth - 8 years. Emphasis is on the physical environment, design and selection of curricular components, the role of play in the curriculum, skills for professional intervention and interaction, and use of technology to facilitate young children's learning. *Corequisite: IECE 321 and IECE 324.*

IECE 324. Assessment of the Young Child

3.00

This course provides students with an understanding of the assessment of young children's development, ages birth to eight years, with and without exceptionalities. Students will be introduced to and apply informal and formal assessment to be used in decision making and educational planning and delivery.

IECE 421. Intermediate Field Experience in IECE

2.00

This field experience is designed to support all methods courses, by giving students experience in a preschool classroom. Students will observe young children, collect data, assist classroom teachers, and interact appropriately with the individuals within the learning environment. Students will analyze the preschool environments for access by all young children. Repeatable twice for a maximum of four credit hours. *Prerequisite: IECE 300, IECE 301, IECE 320 and IECE 322.*

IECE 423. Intermediate Practicum II

2.00

This second intermediate practicum provides candidates opportunities to use their knowledge of child development and assessment to create learning environments and experiences for children. Candidates will learn more about the adult's role in supporting children and managing behavior.

IECE 450. Contemporary Family Issues in Inclusive Education

3.00

This course will examine how students' own cultural values shape their interactions with children and families as well as provide concrete, practical strategies for effective and culturally competent interactions with children and families. *Prerequisite: A "C" or better in IECE 324*

IECE 460. Instructional Practices in Numeracy

3.00

This course provides students with the knowledge, skills, and understandings necessary to design and implement effective mathematics programs for young children, birth to age eight, with and without exceptionalities. Focus is on appropriate mathematical content, teaching strategies, and manipulative materials from a developmental perspective with special emphasis on adaptations designed to meet the needs of all children. *Prerequisite: IECE 420, IECE 421, IECE 422 and IECE 423. Corequisite: IECE 461, IECE 462, and IECE 464.*

IECE 461. Advanced Field Experience in IECE

2.00-3.00

The first advanced field experience provides candidates opportunities to use their knowledge of child development to plan meaningful learning experiences. Candidates will learn how the adult's role in supporting children to construct understandings about the natural and social sciences and to use mathematical thinking.

IECE 462. Instructional Practices in Natural Sciences for Young Children

3.00

This course provides students with the knowledge, skills and understandings to design and implement effective natural science programs for all young children, birth to age eight. Focus is on appropriate science content, teaching strategies and materials from a developmental perspective with a special emphasis on adaptations designed to meet the needs of children with disabilities. *Prerequisite: IECE 420, IECE 421, IECE 422 and IECE 423. Corequisite: IECE 460, IECE 461, IECE 464 and IECE 466.*

IECE 464. Instructional Practices in Social Studies for Young Children

3.00

This course provides students with the knowledge, skills and understandings to design and implement effective social studies programs for all young children, birth to age eight. Focus is on appropriate social studies content, teaching strategies, and materials from a developmental perspective designed to meet the needs of all young children. Students will use technology to support access to the learning environment and curriculum. *Prerequisite: IECE 420, IECE 421, IECE 422, and IECE 423. Corequisite: IECE 460, IECE 461, IECE 462 and IECE 466.*

IECE 466. Managing Classrooms and Guiding Behavior

3.00

This seminar examines research and professional literature on effective strategies for guiding young children's behavior and managing groups. IECE 466 uses experiences in IECE 461 as a foundation for reflection, dialogue and development of a personal philosophy of classroom management. *Prerequisite: IECE 420, IECE 421, IECE 422 and IECE 423 . Corequisite: IECE 460, IECE 461 , IECE 462 and IECE 464 .*

IECE 470. Individualized Behavior Intervention for Young Children

3.00

This course provides the student with exposure to and knowledge of various systematic, positive, individualized behavioral interventions as they apply to young children. The student will develop skills in using these behavior interventions, as appropriate, with young children exhibiting difficulties in learning, behavior and/or social skills.

IECE 480. Student Teaching in Inclusive Early Childhood Education

5.00

This student teaching experience provides students with opportunities to apply, in learning environments for young children, the knowledge, skills and dispositions acquired throughout their teacher licensure program. Under the guidance of university supervisors and professionally licensed cooperating teachers, the student teacher gradually assumes full responsibility as the responsible inclusive early childhood educator. Students majoring in inclusive early childhood education must complete this course twice for a total of 10 credit hours. *Corequisite: IECE 481.*

IECE 481. Seminar in Inclusive Early Childhood Education

3.00

This seminar accompanies IECE 480. Student Teaching and provides students with the opportunity to reflect on, evaluate and improve their experiences as pre-professional educators of young children. Students will evaluate and build their own resiliency, identify ethical dilemmas, and engage in joint problem solving and ethical decision making related to their student teaching experience. Students will enhance their abilities to collaborate with professional colleagues, families and other service providers. *Corequisite: IECE 480.*

IND 499A. Independent Scholars Senior Project

1.00

This is a three-semester course sequence involving independent research based on the student-designed curriculum, to be completed by all independent scholars majors. The course is offered as parts A, B and C for one, three, and two credits per semester, respectively.

Prerequisite: Permission of the independent scholars directors.

IND 499B. Independent Scholars Senior Project

3.00

Crosslisted with This is a three-semester course sequence involving independent research based on the student-designed curriculum, to be completed by all independent scholars majors. The course is offered as parts A, B and C for one, three, and two credits per semester, respectively.

IND 499C. Independent Scholars Senior Project

2.00

This is a three-semester course sequence involving independent research based on the student-designed curriculum, to be

completed by all independent scholars majors. The course is offered as parts A, B and C for one, three, and two credits per semester, respectively.

IS 200. Individualized Studies Major Program Development

3.00

An introductory course designed to prepare students for transition into higher education programs. Specific content includes focusing a concentration, selecting an academic advisor, creating an individualized program, technology in higher education, accessing career resources, career decision making skills, self-awareness, life planning, identifying college level experiential learning, documenting experiential learning, determining a credit request, and organizing a portfolio for assessment. Prerequisite: Individualized Studies Majors or Individualized Studies special students only

IS 203. Portfolio Development Workshop

1.00

A short course designed to support students for transition into higher education programs. Specific content includes identifying college-level experiential learning, documenting learning outcomes achieved from experience, documenting learning, determining credit request and organizing a portfolio assessment. Prerequisite: Individualized Studies Majors of Individualized Studies special students only.

IS 205. Orientation to Learning Services

1.00 - 6.00

A short orientation course designed to prepare students for transition into higher education programs. Specific content includes using the university library, accessing university support services, managing time, developing appropriate study techniques, participating in cultural and workplace diversity exercises, implementing goal-setting strategies, and participating in wellness, nutrition, and stress management programs.

IS 206. Researching, Writing and Documenting Prior Learning

3.00

This course provides an opportunity for students to analyze and articulate college-level learning they have acquired outside a classroom context. Specific content includes identifying college-level learning, writing narrative evaluations of learning, integrating multiple sources of learning and disciplinary theory, producing and arranging sufficient documentation of learning, and organizing a portfolio for assessment. At the end of the class, students who have completed all of the assignments will have the components of a portfolio ready for submission for credit evaluation. May not be repeated. *Prerequisite: Individualized studies majors only and successful completion of IS 200.*

IS 250. Service Learning

1.00 - 6.00

Leadership, citizenship, and professional competencies may be acquired through community service experiences. Documented service learning competence will be assessed by the Center for Leadership, Service, and Transition and credit awarded, as appropriate. *Prerequisite: BIS 203*

IS 270. Selected Topics

1.00 - 6.00

In-depth study of selected topics with current importance and interest to lower division students that are not otherwise covered in the regular course offerings of academic departments/schools. Course content will vary. Prerequisite: Approval of the "Course Agreement Form" by the Individualized Study department head.

IS 290. Special Studies

1.00 - 6.00

Designed to give students an opportunity to do lower-division independent study in selected interdisciplinary areas under the supervision of a faculty member in the appropriate department/school. Prerequisite: Approval of the "Course Agreement Form" by the Individualized Study department head.

IS 300. Sponsored Learning

1.00 - 6.00

A structured learning activity related to a student's area of study and sponsored by an employer, volunteer agency, or other appropriate organization.

IS 480. Cooperative Studies

1.00 - 6.00

Two or more upper-division students may elect to study cooperatively in a selected area of current importance and interest under the supervision of a faculty member in the appropriate department/school. Prerequisite: Approval of the "Course Agreement Form" by the Individualized Study department head.

IS 490. Special Studies

1.00 - 6.00

Designed to give students an opportunity to do upper-division independent study in selected interdisciplinary areas under the supervision of a faculty member in the appropriate department/school. Prerequisite: Approval of the "Course Agreement Form" by the Individualized Study department head.

IS 498. Individualized Study Project

3.00 - 6.00

An in-depth study of an interdisciplinary topic directly related to the student's area of concentration. A final oral report is required. Prerequisite: Approval of the "Course Agreement Form" by the Individualized Study department head.

IS 499. Honors

6.00

Multiple-semester course. Prerequisite: Approval of the "Course Agreement Form" by the Individualized Study department head and the Honors Program.

INDU 200. Introduction to Industrial Design

6.00

This studio course introduces students to the professional field of industrial design. Students will develop conceptual and manual skills including aesthetics, research, critical thinking, drawing, model making, digital imaging and communication. The course emphasizes real world experience through a combination of studio work, demos, workshops, lectures and field trips. Students will work both individually and collaboratively to design and prototype new products/services and present their concepts for critique. Prerequisite: Industrial design majors only; ART 102, ART 104 and ART 106, or instructor permission.

INDU 202. Industrial Design Studio

6.00

Industrial Design Studio builds on the fundamentals of INDU 200. Projects will address design thinking, research methods, user analysis, project definition and iterative process. Course work will further explore design sketching and drawing techniques, prototyping, collaboration, concept development, and aesthetics. *Prerequisite: INDU 200*

INDU 208. Portfolio Review

0.00

Portfolio review required to enroll in industrial design courses at upper division standing. May be repeated once for pass/fail standing. *Prerequisite: INDU 200 and INDU 202. Corequisite: INDU 202.*

INDU 220. CAD I: 3D Modeling

3.00

This course will introduce students to principles used in 3D Computer-Aided Design (CAD). Technologies to draw three dimensionally on the computer will be considered as a discipline within itself, and students will be instructed to use the machine for design exploration. Various software packages will be utilized during the semester. *Prerequisite: Successful completion of or concurrently enrolled in INDU 200, and/or permission from instructor; Industrial Design majors only.*

INDU 292. Topics in Industrial Design

1.00-3.00

Study of selected topics in industrial design at the introductory level. May be repeated when course content changes. See MyMadison for current topics.

INDU 300. Product Design

6.00

This course expands on foundations learned in INDU 200 and INDU 202 and emphasizes a research-driven design process as it applies to the design of objects, including commercial products, packaging design, furniture and more. Students will use quantitative and qualitative research methods and analyze market segments and/or users.

INDU 302. Transportation Studio

6.00

A study of transportation system design utilizing a multi-disciplinary effort. Students will engage with civil engineers, city planners, urban designers, community members and various stakeholders to understand transportation needs and develop creative solutions. *Prerequisite: INDU 208*

INDU 380. Materials and Processes

3.00

Combination studio and lecture course introducing students to historic, contemporary and emerging materials and manufacturing processes used in the creation of mass manufactured goods. *Prerequisite: Declared industrial design major, successful completion or concurrent enrollment in INDU 200, or permission of instructor.*

INDU 390. Independent Studies in Industrial Design

1.00 - 3.00

Independent activity at the intermediate level, such as research or studio practice, under faculty supervision. Projected studies in any area of the school's offering must be arranged with the instructors who will direct them. Offered only with the consent of the instructor.

INDU 392. Topics in Industrial Design

3.00

Study of selected topics in art, art history, graphic design, interior design, or industrial design at the intermediate level. May be repeated when course content changes. See MyMadison for current topics.

INDU 400. Systems and Services

6.00

This studio course aims to engage students in a systems based approach to problem solving. Students will design and test concepts and solutions that focus on interaction and experience. The course emphasizes problem framing, system and service prototyping, graphic design and illustration, user interaction/user experience, and end-user engagement. *Prerequisite: INDU 208.*

INDU 402. Social Innovation and Social Entrepreneurship

6.00

This advanced studio explores design problems and solutions ranging from sanitation and poverty to environmental degradation and access to basic human services. Students will work individually and on teams to target specific areas of need and develop proposals to create products, systems and services to address those needs while generating revenue. *Prerequisite: INDU 208*

INDU 404. Indu Advanced Special Topics Studio

6.00

Study of selected topics in industrial design at the advanced level. May be repeated when course content changes.

INDU 406. Senior Thesis Studio

6.00

Industrial design students with senior standing submit a proposal focused on developing a semester long studio project. *Prerequisite: INDU 208 and Senior Standing; or, Permission of the Instructor*

INDU 408. Swing Studio Option

6.00

Crosslisted with Students may take a six credit hour studio in ARCD or the equivalent in any one other SADAH studio disciplines (i.e., ART 240 and ART 340). The ID program coordinator must approve proposals for swing studio options in advance. Art and design elective courses taken for the ID advanced studio requirement may not be double-counted as swing studios.

Prerequisite: INDU 208.

INDU 490. Independent Studies in Industrial Design

1.00 - 3.00

Independent activity, such as research or studio practice, under faculty supervision. Projected studies in any area of the school's offering must be arranged with the instructors who will direct them. Offered only with the consent of the director.

INDU 491. Studio Assistant

1.00 - 3.00

Crosslisted with ARCD 491, ARED 491, ART 491, GRPH 491

An on-campus program monitored on an individual basis designed to provide practical studio experience in the visual arts. Students will learn safe studio practices and management skills, including material use, inventory control, and the proper operation of equipment found within various individual classroom studios. *Prerequisite: Permission of the instructor and director.*

INDU 492. Topics in Industrial Design

3.00 - 6.00

Study of selected topics in art, art history, graphic design, interior design, or industrial design at the advanced level. May be repeated when course content changes. See MyMadison for current topics. *Prerequisite: INDU 208*

INDU 496. Internship in Industrial Design

1.00 - 8.00

An off-campus program prepared and monitored on an individual basis. Internships are designed to provide practical experience in the arts.

IT 101. Introduction to Information Technology

3.00

Designed to prepare students for a successful career in information technology. Emphasis is on developing skills with computers, problem-solving, studying and time management. The class compares information technology to computer science, computer engineering and information systems. Topics include introduction to networking, databases, computing systems and platforms, cybersecurity, web systems, and computer programming.

IT 203. Information Security and Privacy

3.00

This course teaches computer security principles and incident prevention and management. It covers the information assurance dimensions of availability, integrity, authentication, confidentiality and non-repudiations to ensure secure transmission, storage and processing of information. *Prerequisite: Sophomore standing or permission of the instructor.*

ISAT 100. Environmental and Energy Sustainability [C3PP]

3.00

This course explores scientific and technical issues important to environmental and energy sustainability. Students study fundamental chemistry and physics and then apply this knowledge to better understand air quality, water quality, and conventional and alternative energy processes. The class also explores the societal impacts of our energy choices and the potential impact we as individuals can have through personal initiative. May be used for general education credit.

ISAT 112. Environmental Issues in Science and Technology (2,3) [C3PP]

4.00

This course integrates the study of biology, chemistry and statistics within the context of environmental issues that include ozone depletion, acid rain, global warming, waste management and biodiversity. May be used for general education credit.

ISAT 113. Biotechnology Issues in Science and Technology (2,2) [C3NS]

4.00

Crosslisted with ISAT 113H

This course introduces the concepts of differential and integral calculus and ordinary differential equations to model real-world applications in science, business, technology and economics. This course includes a computer laboratory component emphasizing modeling and numerical methods. Course assumes familiarity with algebra and trigonometry. May be used for general education credit.

ISAT 113H. Biotechnology Issues in Science and Technology [C3NS]

4.00

Crosslisted with ISAT 113

This course introduces current topics in the life science technologies through lecture and laboratory exercises. Topics include advances in genetic engineering, the hierarchy of life and the rise of infectious diseases. May be used for general education credit. *Prerequisite: Honors Students*

ISAT 131. Technology, Science, and Society

3.00

This course introduces the social aspects of technology and science. It covers social science methods and related philosophical and ethical analyses. Students learn how the practice of science relates to the human-built world and why critical evaluations of science and technology policies are important.

ISAT 150. Algebra Essentials

1.00

This course provides review and practice in algebra concepts that are needed to successfully complete GISAT 151. Various mathematical models, including trigonometric, are also reviewed. The course is designed for students who possess a basic understanding of algebra but are not proficient in its application. *Corequisite: ISAT 151*

ISAT 151. Topics in Applied Calculus in ISAT [C3QR]

4.00

This course introduces the concepts of differential and integral calculus and ordinary differential equations to model real-world applications in science, business, technology and economics. This course includes a computer laboratory component emphasizing modeling and numerical methods. Course assumes familiarity with algebra and trigonometry. May be used for general education credit.

ISAT 151L. Topics in Applied Calculus Computer Laboratory

1.00

This course is the computer laboratory portion of GISAT 151: Topics in Applied Calculus in ISAT. It is intended for students who already have AP credit or calculus lecture credit. Students will use numerical methods to solve mathematical modeling and

calculus problems with Microsoft Excel. Students will study linear, polynomial, exponential, logarithmic, S-curve, and trigonometric models in business and the physical and natural sciences. Permission of instructor or department required.

ISAT 152. Topics in Applied Physics in Isat

4.00

This course introduces topics in general physics including one- and two-dimensional motion, mechanics, energy, waves, electricity, magnetism, optics, lasers, and early quantum theory. Vectors, algebra, and differential and integral calculus, are used to model physical system behavior. Laboratory experiments and computer exercises enhance understanding of the concepts.

Prerequisite: ISAT 151 or permission of the instructor

ISAT 160. Problem Solving Approaches in Science and Technology [C1CT]

3.00

Crosslisted with ISAT 160H

This course examines issues in modern science and technology as a means to introduce, develop and enhance critical thinking and problem solving skills. Current scientific and technological research and applications will be introduced to reinforce problem solving, instruction in systems thinking and critical inquiry. The course provides opportunities for using both oral and written communication in a variety of learning activities. May be used for general education credit *Prerequisite: If you have already completed, or are currently registered for, a Cluster One Critical Thinking class, you must secure permission to receive credit for a second Cluster One Critical Thinking class.*

ISAT 160H. Problem Solving Approaches in Science and Technology [C1CT]

3.00

Crosslisted with ISAT 160

This course examines issues in modern science and technology as a means to introduce, develop and enhance critical thinking and problem solving skills. Current scientific and technological research and applications will be introduced to reinforce problem solving, instruction in systems thinking and critical inquiry. The course provides opportunities for using both oral and written communication in a variety of learning activities. May be used for general education credit.

ISAT 171. Governance of Sociotechnical Systems

3.00

Solutions to human problems are mediated by economic and political institutions, which in turn help to shape technology and science. The course covers basic political and economic concepts, institutions and processes as they relate to American and international science and technology.

ISAT 180. Topics in Integrated Science and Technology

1.00 - 4.00

Special topics in integrated science and technology which are of interest to the entry-level student. May be repeated for credit when course content changes. Students should consult the instructor prior to enrolling for the course. *Prerequisite: Permission of instructor.*

ISAT 181. Student Research Project

1.00 - 6.00

Research project on a science and technology topic of interest, as arranged with a faculty research adviser. Projects will include an assessment of the non-technical issues that surround the technical problem.

ISAT 190. Introduction to Holistic Problem Solving in the ISAT Major

1.00

This course introduces holistic problem solving through the lens of the ISAT major. Skills such as effective teaming, information literacy, systems thinking, stakeholder identification and complex problem analysis are developed.

ISAT 190. Introduction to the Bachelor of Science in Integrated Science and Technology Program

3.00

This course introduces the mission, goals, and structure of the Bachelor of Science in Integrated Science and Technology (BSISAT) degree program. Students will evaluate different approaches to science and technology problems. Skills such as effective teaming, information literacy, systems thinking, stakeholder identification, and self assessment are developed.

ISAT 203. Viral Discovery

2.00

Crosslisted with BIO 203

An exploratory laboratory experience, designed for incoming freshmen. Students will learn about the life cycle and ecology of viruses infecting bacteria. Soil samples will be collected, and techniques for isolation and purification of the viruses will be performed by the students. Isolated viruses will be visualized using electron microscopy. The genomic material will be isolated and prepared for nucleic acid sequencing.

ISAT 203H. Viral Discovery - Honors

2.00

Crosslisted with BIO 203H

An exploratory laboratory experience, designed for incoming freshmen. Students will learn about the life cycle and ecology of viruses infecting bacteria. Soil samples will be collected, and techniques for isolation and purification of the viruses will be performed by the students. Isolated viruses will be visualized using electron microscopy. The genomic material will be isolated and prepared for nucleic acid sequencing.

ISAT 204. Viral Genome and Bioinformatics

2.00

Crosslisted with BIO 204

A computer-based laboratory experience, designed for students completing the Viral Discovery course. Students will learn to identify genes in a viral genome, compare the predicted proteins with known proteins in databases, describe the contents of the genome and notate all the relevant information for publication. Students will also research the role of bacteriophages in ecology and evolution.

ISAT 204H. Viral Genome and Bioinformatics - Honors

2.00

A computer-based laboratory experience, designed for students completing the Viral Discovery course. Students will learn to identify genes in a viral genome, compare the predicted proteins with known proteins in databases, describe the contents of the genome and notate all the relevant information for publication. Students will also research the role of bacteriophages in ecology and evolution. *Prerequisite: ISAT 203 or BIO 203*

ISAT 211. Issues in Modern Production Systems

3.00

This course explores the principles of making, designing, integrating and improving production systems by asking the following questions: What is the right way to transform materials and who (or what) determines that? How do political, environmental, social, technological, legal/regulatory, ethical and economic factors impact the way individuals and organizations make, design, integrate and improve? How do production systems affect our ecosystem at different scales, ranging from artisanal craft methods to complex global supply chains and continuous production? Advanced manufacturing, continuous improvement and sustainable production systems will be explored. Includes a lab component. *Prerequisite: ISAT 251 with a grade of "C-" or better or MATH 220 and ISAT 212 with a grade of "C-" or better.*

ISAT 212. Energy Issues in Science and Technology

3.00

Introduction to scientific and economic concepts relevant to energy. Concepts are taught within the context of three or four themes, e.g. residential energy efficiency, renewable energy sources, "make-or-buy" fossil energy application and space power systems. Themes may change from year to year reflecting contemporary issues and opportunities to link with industry and government agencies. *Prerequisite: ISAT 152 or Permission of the Instructor.*

ISAT 215. Telecommunications, Networking and Security

3.00

This course introduces Telecom, Networking & Security concepts. Students learn how networked applications and services are designed, implemented and secured using wireless and wireline networks, network services and protocols. Examples of topics are Virtualization, Internet, Intrusion Detection & Prevention, Wireless Ethical Hacking, and Web Apps & Services. The course includes a lab component focusing on hands-on integration and troubleshooting of networked apps, network security methods and services. *Prerequisite: ISAT 152 with a grade of "C-" or better or permission of instructor.*

ISAT 231. Political Economy of Technology and Science

3.00

Solutions to human problems are mediated by economic and political institutions, which in turn help to shape technology and science. The course covers basic political and economic concepts, institutions, and processes as they relate to American and international science and technology.

ISAT 251. Topics in Applied Statistics in ISAT [C3QR]

3.00

This course introduces statistical thinking – the discipline and methods for collecting, analyzing, and interpreting data for making decisions, doing science, and understanding our world. Topics covered include an introduction to data analysis methods, probability and chance, statistical reasoning and inference, and experimental design. The course includes a laboratory component emphasizing hands-on analysis of data taken from a variety of applications in ISAT. May be used for general education credit. *Prerequisite: Sophomore standing or permission of the instructor.*

ISAT 252. Programming and Problem Solving

3.00

Introduction to computational thinking and formal logic. Students create software to solve problems in applied science, business, and engineering taking social context into account. Programming paradigms include procedural, object-oriented, event-driven, and declarative. Emphasis is placed on effective analysis, planning, documentation, communication, and teamwork in professional software development settings. *Prerequisite: Sophomore standing or permission of the instructor.*

ISAT 253. Instrumentation and Measurement in ISAT

3.00

Fundamental nature of measurement in the practice of science, how and why measurements are taken, and representative instrumentation. Data collection in science (measuring physical properties and biometrics), statistical tools for analyzing data and visualization of data. *Prerequisite: ISAT 152 and ISAT 251 or MATH 220.*

ISAT 271. Technology, Science and Society

3.00

This course introduces the social aspects of technology and science. It covers social science methods and related philosophical and ethical analyses. Students learn how the practice of science relates to the human-built world and why critical evaluations of science and technology policies are important. *Prerequisite: ISAT 171 .*

ISAT 280. Projects in Isat

1.00 - 4.00

Projects or special topics in integrated science and technology which are of interest to the lower-division student. May be repeated for credit when course content changes. Projects or topics selected may dictate prerequisites. Students should consult the instructor prior to enrolling for the course. *Prerequisite: Permission of instructor.*

ISAT 290. Introduction to Systems Thinking for Complex Problems

3.00

Students will develop skills to apply systems thinking methodology to investigate, define and describe complex problems. They will build a recognition and appreciation of common causal structures that influence the evolution of a problem over time. Structures include interactions between cultural, institutional, natural and technological factors. Collaboration, integration of diverse knowledge sources and project management skills will be emphasized. *Prerequisite: ISAT 190 or permission of the instructor and ISAT 212 with a grade of "C-" or better.*

ISAT 301. Instrumentation and Measurement in Energy (0, 2)

1.00

Instrumentation is used to acquire data from representative systems that include mechanical, thermal, solar, chemical and nuclear energy. Students analyze the data to enhance understanding of these forms of energy. Energy transport processes are also characterized. Computer-based data acquisition is emphasized. *Prerequisite: ISAT 212 and ISAT 253 or permission of the instructor.*

ISAT 302. Instrumentation and Measurement of the Environment (0, 2)

1.00

Traditional and contemporary analytical laboratory and field techniques used in environmental quality monitoring are surveyed. Emphasis is placed on understanding the physical, chemical and biological basis of these techniques. Hands-on laboratory and field work will be emphasized, in addition to quality control/assurance of environmental data.

ISAT 303. Production Systems Automation Lab

1.00

The role, function and implementation of sensors, actuators and controls in open and closed loop control systems are explored and implemented in constant process flexible manufacturing systems. Programmable logic controllers (PLCs) are emphasized. The synthesis of automation technologies is realized by exploring physical mechatronic systems via hands-on lab experiences using real world equipment. *Prerequisite: ISAT 331. Corequisite: ISAT 331.*

ISAT 305. Instrumentation and Measurement in Biotechnology (0, 2)

1.00

This course provides a hands-on experience of the techniques and instrumentation used in the modern biotechnology laboratory. Topics include aseptic techniques for establishing microbial cultures, detection and analysis of recombinant DNA molecules, protein purification, SDS gel electrophoresis and the use of PCR technology for genetic analysis.

ISAT 306. Instrumentation and Measurements in Data Communications and Networking

1.00

This is an introductory course on hands-on performance measurements of data, computer and telecommunications channel transmission techniques. The course includes a set of lab experiments focusing on the physical and data link layers of data communications and telecommunications networks. *Prerequisite: ISAT 360 or instructor permission*

ISAT 310. Energy Fundamentals I

3.00

This course covers the integration of fundamental concepts from physics, chemistry, mathematics and engineering within the context of energy applications. Principles governing energy transformations, transport and conversion, including laws of thermodynamics, chemical and nuclear reactions and thermal science. *Prerequisite: ISAT 212 is the prerequisite.*

ISAT 311. Role of Energy in Modern Society

3.00

This course covers the role of energy in the U.S. and world economies. Geology of energy-valued natural resources: size, quality and economics of domestic and world resource base. Models for energy use by different sectors. The role of energy in global climate change; other energy-related environmental concerns; and the implications for national and international security will be studied. *Prerequisite: ISAT 212 or consent of instructor.*

ISAT 320. Fundamentals of Environmental Science & Technology I

4.00

This course provides the student with a basic understanding of environmental processes, pollution and control technologies. Grounded in ecology and systems thinking, ISAT 320 integrates classroom learning, field-based studies and laboratory analysis of field samples to explore local aquatic and terrestrial environments and contextualize them in broader scientific knowledge. *Prerequisite: ISAT 112 or permission of the instructor.*

ISAT 321. Fundamentals of Environmental Science & Technology II

3.00

This course builds on the student's basic understanding of environmental pollution, processes and control technologies in the context of systems thinking and sustainable practices. Content includes solid and hazardous waste and its management, the

principles of environmental risk assessment, air quality analysis and management, drinking water and wastewater treatment, and life cycle analysis. *Prerequisite: ISAT 320.*

ISAT 330. Sustainable Manufacturing Systems

3.00

Introduces and applies principles of production planning and control with an emphasis on sustainable production and environmentally conscious manufacturing. Topics include scheduling, inventory control, facility layout, capacity planning, forecasting and lean manufacturing. *Prerequisite: ISAT 211 and ISAT 251 or permission of instructor.*

ISAT 331. Cyber-Physical Industry

3.00

In-depth introduction to cyber-physical systems for automated production, from maker scale to global supply chains, emphasizing quality, usability and cybersecurity. Topics include robotics and flexible manufacturing systems, industrial monitor and control systems (RTU, PLC, SCADA, HMI, SIS, DCS), Machine-to-Machine (M2M) and Industrial Internet of Things (IIoT), human factors and ergonomics in HMIs including virtual/augmented/mixed reality; autonomy, critical infrastructure, and smart cities. *Prerequisite: ISAT 211 and ISAT 251 or permission of the instructor.*

ISAT 340. Software Development

3.00

This course is an introduction to the processes, methods and techniques of efficient and effective software application development. Students will create or enhance software systems in a sophisticated development environment. *Prerequisite: ISAT 252*

ISAT 341. Machine Learning and Data Science

3.00

Explores the data science and machine learning landscapes by developing and implementing programs capable of learning from data extracted from several knowledge domains. Students will use production ready tools that facilitate model development and deployment to a variety of computing platforms. *Prerequisite: Junior standing and ISAT 340 or CS 149 .*

ISAT 344. Intelligent Systems

3.00

Crosslisted with ISAT 344

In-depth introduction to current and future intelligent systems, including expert systems, neural networks, hybrid intelligent systems, and other intelligent system technologies and their development, uses and limitations.

ISAT 348. The Multimedia Industry

3.00

Students are introduced to a variety of tools for viewing multimedia and to the issues in designing effective human-computer interactions. This includes an introduction to the many forms of media that occur in computing systems (text, graphics, images, sound, animation) and to the characteristics of well-produced media. *Prerequisite: ISAT 340 or CS 139 with sophomore standing is the prerequisite.*

ISAT 350. Biotechnology for the New Millennium I

3.00

This course covers the scientific foundations and historical development of biotechnology. Specific topics include living system nanotechnology; cell structure and function; origins of genetic engineering; and recombinant DNA technology. *Prerequisite: ISAT 113 or equivalent.*

ISAT 351. Biotechnology for the New Millennium II

3.00

This course is a continuation of ISAT 350 and describes applications of biotechnology in agriculture, industry and medical science as well as associated social, ethical and philosophical issues. Topics include study of an emerging infectious disease, energy transduction in living systems and novel applications of biotechnology. *Prerequisite: ISAT 113, or BIO 240 and BIOT 260 or permission of the instructor.*

ISAT 360. Introduction to Networking & Security

3.00

This course focuses on the underlying principles of networking and how these principles are utilized to provide efficient and secure networks in support of voice, data, video and mobility services and applications. Emphasis is also placed on understanding the network standards and protocols, network architectures, network security, network analysis/trouble shooting and network management issues and resolution/mitigation strategies. The course has a technology (hands-on) focus. *Prerequisite: ISAT 252 or CS 239 or CS 149 or instructor permission. Corequisite: For CIS majors: CIS 304.*

ISAT 361. Fundamentals of Data Communications and Networking II

3.00

The course is an introduction to data communications, telecommunications and networking. The focus is on the physical and data link layers. At the physical layer, it includes network models, data and signal rates, digital & analog transmission (modulation), bandwidth utilization (multiplexing), switching (circuit, packet). At the data link layer, it includes error detection & correction, multiple access methods, LANs (wired, wireless, connecting), WANs (SONET, ATM, cellular, satellite). *Prerequisite: ISAT 360 or instructor permission*

ISAT 390. Holistic Problem Solving Workshop I

3.00

In this course, students will practice holistic problem-solving approaches to analyze and propose solutions for complex problems that involve a mix of scientific, technological, and societal elements. The course will use a variety of case studies that represent real-world problems that significantly impact society. For each case study, students will explore the system dynamics from which the problem emerges and evaluate both short- and long-term consequences of possible solutions. *Prerequisite: ISAT 290*

ISAT 391. Holistic Problem Solving Workshop 2

3.00

This course continues the practice of holistic problem-solving initiated in ISAT 390. In this follow-up course, students will operate in a self-guided manner to analyze and propose solutions for complex problems that involve a mix of scientific, technological, and societal elements. Students will explore the system dynamics from which the problem emerges and evaluate both short- and long-term consequences of possible solutions. *Prerequisite: ISAT 390*

ISAT 401. Advanced Computer-Based Instrumentation I

3.00

This is largely a laboratory course in which students build and program their own instruments. Topics include programming

techniques for real-time instrumentation programming; buffered analog and digital input and output; timing considerations; passive analog filters and active analog filters; digital-filtering techniques; and real-time programming issues. *Prerequisite: ISAT 253 and ISAT 242.*

ISAT 410. Sustainable Energy Development

3.00

This course is concerned with science and the applications of solar and other renewable technologies, e.g., solar thermal electric, photovoltaics, wind power, biomass-derived alcohols, solar hydrogen and ocean thermal energy conversion Energy storage systems and materials, combined renewableconventional systems for peaking and load management and alternative energy sources for transportation will be studied. *Prerequisite: ISAT 310 or permission of the instructor.*

ISAT 411. Energy Economics and Policy

3.00

This course is concerned with methods for analyzing the economics, environmental and societal benefits of energy technologies. Topics include optimization techniques, utility planning and finance, cost-benefit techniques, discounting for time and risk, econometric models and input-output analysis. The role of government in determining energy costs supply and markets will be considered. *Prerequisite: ISAT 311 or permission of the instructor.*

ISAT 412. Dynamic Control of Energy Systems

3.00

This course considers methods for developing dynamic models of energy processes and technologies to achieve improved process control and increased efficiency with applications of differential equations and discrete math equations. Dynamic models are used to evaluate load management strategies and to develop computer control algorithms for building energy systems. *Prerequisite: ISAT 310 or consent of instructor.*

ISAT 413. Options for Energy Efficiency

3.00

This course makes detailed examination of new technologies to increase the efficiency of energy conversion, transportation systems and end-use technologies. Examples include MHD, combined-cycle systems, advanced nuclear reactors, intelligent transportation systems, high-efficiency lighting, energy management and utilization of low-temperature heat. Consideration is made of the socioeconomic and governmental barriers to energy efficiency. *Prerequisite: ISAT 310 and ISAT 311 or consent of the instructor.*

ISAT 414. Energy Fundamentals II

3.00

Introduction to the sciences of fluid mechanics and heat transfer and the physical laws governing the mechanical behavior of liquids and gasses. Conservation of mass, energy and momentum. Discussion of heat transfer by one-dimensional conduction, convection and radiation. Fluid statics, internal and external fluid flow, pipe networks and heat exchanger analysis. *Prerequisite: ISAT 310 or permission of the instructor.*

ISAT 416. International Energy Studies

3.00

Study-abroad course examining international energy problems and providing team-oriented project experiences. Addresses energy issues associated with economic and social development. Project participation, tours and meetings with local experts illustrate energy-related problems that are compared with those in the United States. *Prerequisite: ISAT 212 and ISAT 253.*

ISAT 420. Environmental Analysis and Modeling

3.00

This course explores applications of mathematical techniques and computer models to the environmental field. The course introduces the principles underlying environmental analysis and modeling, including limitations and pitfalls. Several environmental models and analytical systems are then discussed and applied, using a variety of computational platforms.

Prerequisite: ISAT 321 or permission of the instructor.

ISAT 421. Environmental Policy & Regulation

3.00

This course will familiarize students with basic environmental laws and regulations. The course discusses the purpose of environmental policy, the role of environmental economics in policy decisions and the policy instruments available to environmental regulators. Current federal and state statutes affecting waste disposal, air quality and water quality are discussed.

Prerequisite: ISAT 321.

ISAT 422. Industrial Environmental Management

3.00

This course addresses environmental issues faced by industry, including such topics as waste management, chemical inventories, pollution prevention and discharge permitting. Industrial ecology is introduced as an approach to the development of a sustainable industrial society, including treatment of life cycle analysis, design for environment, environmentally conscious manufacturing, and ISO14000. *Prerequisite:* ISAT 320 or permission of the instructor.

ISAT 423. Environmental Remediation

3.00

This course will examine chemical, physical, economic, and regulatory aspects of the remediation of contaminated soil and groundwater. Topics include chemical properties of major contaminants, environmental site assessments, remediation design, and current and emerging remediation technologies and their limitations in soil and groundwater restoration. *Prerequisite:* ISAT 320 and ISAT 321.

ISAT 424. Natural Resource Management

3.00

This course focuses on how resource management decisions affect the human and natural communities involved. Topics include definition and importance of natural resources, resource management styles and policies, and planning for resource conservation. Conservation biology is introduced as a tool for developing sustainable resource use policies. Mandatory weekend field trip.

Prerequisite: ISAT 320 and ISAT 321.

ISAT 425. Environmental Hydrology

3.00

This course integrates the study of surface water and ground water hydrology and examines current technologies used to assess the behavior and quality of water in the environment. Topics include monitoring and management at the watershed level, the influence of wetlands on water quality, and the impact of current regulations. *Prerequisite:* ISAT 320.

ISAT 426. Environmental Information Systems

3.00

This course provides students with practical experience applying advanced environmental information systems technologies to environmental problems. Students will employ such technologies as decision support systems, geographic information systems, expert systems, relational databases, multimedia systems, and modeling and simulation. This course is often offered in a study-abroad format.

ISAT 427. Industrial Hygiene

3.00

This course provides an introductory survey of the field of Industrial Hygiene. Chemical hazards are addressed first, focusing on respiratory and dermal exposures, followed by a treatment of physical hazards including sound, radiation, and temperature. The course includes industrial case studies illustrating administrative and engineering controls in common use. *Prerequisite: ISAT 320 or permission of the instructor.*

ISAT 428. Industrial Ecology

3.00

Industrial Ecology, the 'science of sustainability', seeks to encourage the development of a sustainable industrial society. This course introduces and examines this relatively new field of inquiry and practice. We address various practical topics which are associated with Industrial Ecology, including Life Cycle Assessment, Design for Environment, and Environmentally Conscious Manufacturing.

ISAT 429. Sustainability: An Ecological Perspective

3.00

Crosslisted with GEOG 429

This course examines present global environmental impacts and efforts made to change production and consumption patterns toward those that reduce impact or promote increased ecosystems health. The focus lies in understanding the basic resources of productivity including soils, agricultural systems, agroforestry, forestry, and aquatic environments and applying solutions on a personal and community level. *Prerequisite: ISAT 320.*

ISAT 430. Materials and Manufacturing Processes

3.00

The purpose of this class is to introduce chemical and physical properties of materials (metals, ceramics, polymers, composites, sustainable materials), manufacturing processes (casting, finishing, molding, forming, joining, and machining), and automated design and manufacturing. The topics include the following:

- Material properties and product attributes
- Engineering materials
- Solidification processes
- Processing of metals and ceramics
- Metal forming and sheet metalworking
- Metal removal processes
- Property enhancing & surface processing operations
- Joining and assembly processes

Prerequisite: ISAT 211 or permission of the instructor.

ISAT 431. Advanced Manufacturing Processes and Systems

3.00

This course provides an introduction to processes, systems and sustainability improvement in advanced manufacturing. Topics include advanced manufacturing processes and systems, such as additive manufacturing, nano/micro-manufacturing, digital manufacturing, industrial sustainability analysis and systems thinking in sustainable manufacturing. *Prerequisite: ISAT 330 and ISAT 251*

ISAT 432. Materials Selection in Product Design

3.00

This course deals with the interplay among requirements specifications, design, economics, environment, energy, materials selection, fabrication, manufacturing cost and product life cycle considerations. Students will complete a product design case study from requirements to final design concept, including translating requirements to design, selecting appropriate materials and choosing between design and production concepts using qualitative and quantitative analytical methods.

Prerequisite: ISAT 330 and junior standing or permission of the instructor.

ISAT 433. Foundations of Lean and Six Sigma

3.00

This course addresses the questions: What is lean? What is six sigma? How are they different, why do many organizations combine them and how should they be applied for continuous improvement? Lean topics include toyota production system, hoshin kanri, lean culture, reducing waste and process stability. Six Sigma topics include project selection, deployment, forming teams, performance measures and methodologies (e.g. define, measure, analyze, improve control and define, measure, analyze, design and verify). *Prerequisite: ISAT 330 or admission to the global supply chain management minor.*

ISAT 434. Industrial Informatics

3.00

Hands-on application of advanced analytical methods selected from topics in supply chain management, forecasting, measurement systems analysis (MSA), quality and process improvement, marketing research and analytics, design of experiments (DOE), and reliability modeling. Data acquisition from enterprise databases and industrial sources and analysis leveraging big data are addressed.

Prerequisite: ISAT 211 and ISAT 251 or MATH 220 or admission to the global supply chain management minor.

ISAT 435. Lean Six Sigma Applications

3.00

This course focuses on applying lean and Six Sigma in industry, with an emphasis on selection and application of tools in a production or supply chain environment. Students will learn to map and model business processes, analyze these processes, and implement and document the improved process. Lean topics include standardized work, just-in-time production, value stream mapping and jidoka. Six Sigma topics include ishikawa diagrams, hypothesis testing, quality function deployment, process sigma calculation and control plans. *Prerequisite: ISAT 433 or admission to the global supply chain management minor or permission of the instructor.*

ISAT 437. Technological Innovation and Sustainable Design

3.00

This course is a holistic approach to the nature of technological innovation as an intrinsic dynamic of human society, with an explicit focus on understanding why innovations succeed or fail and the compelling need for sustainable design. The critical relationship between technical innovation and the design process is explored through case studies that illustrate sustainability-

inspired models of technology such as biomimicry, design for environment, appropriate technology, zero waste production systems and human-centered design. *Prerequisite: ISAT 211 and junior standing or permission of the instructor.*

ISAT 440. Cultural, Ethical, Legal and Social Issues in Computing

3.00

An exploration of the cultural, ethical, legal and social issues inherent in computing. This course is designed to strengthen students' proclivity and ability to consider and communicate about the reciprocal impacts of computing technology on people and the environment, particularly as it pertains to their roles in designing, developing, procuring, implementing or maintaining computing technology within an organization. *Prerequisite: ISAT 271 or permission of instructor.*

ISAT 440. Seminar in Knowledge Management

3.00

Philosophical, ethical, social, and political issues in information and knowledge management, the information and knowledge management industries, and information and knowledge management systems. *Prerequisite: Senior Standing.*

ISAT 441. Simulation and Modeling

3.00

The purpose of this class is to introduce students to the use of models to understand, analyze and improve systems in several areas of science and technology through computer simulation modeling techniques. *Prerequisite: ISAT 211 or permission of instructor.*

ISAT 445. Software Engineering and Agile Development

3.00

Study of means for the development and maintenance of high quality software products delivered on time and within budget. Topics include requirements analysis and specification, software design, implementation, testing, maintenance, project management, ethics, and the responsibilities of software engineering professionals. Focuses primarily on agile software development. *Prerequisite: [ISAT 340](#)*

ISAT 445. Software Engineering and Agile Development

3.00

ISAT 447. Interaction Design

3.00

Crosslisted with WRTC 447

Study of and practice with processes, principles, tools, models, and techniques for designing interactions between humans and digital products and systems. Topics include physiological and psychological factors affecting interaction design, interaction design process, interaction models, styles, and paradigms, design notations and representations, prototyping, and interaction design evaluation.

ISAT 451. Biotechnology in Industry and Agriculture

3.00

This course illustrates the applications of biotechnology in agriculture and industry, linking scientific discoveries to business and

manufacturing practices. Topics include pharmaceutical product development, genetic engineering in agriculture, biotechnology in food processing and regulatory issues. *Prerequisite: ISAT 330 or ISAT 350 or BIO 240 and BIOT 260 or permission of the instructor.*

ISAT 452. Medical Biotechnology

3.00

This course will explore the way in which modern biotechnology can be used as a tool to define and solve problems related to human health. Insights will come through the review and critical analysis of molecular evidence, modeling of the human body and the drug discovery pipeline as complex systems, and an identification and appreciation for stakeholder perspectives.

Prerequisite: ISAT 351 or BIO 240 or permission of the instructor.

ISAT 453. Energy and Living Systems

3.00

The potential of living systems as alternative energy sources will be explored by describing energy production and transduction in living systems in the context of current and anticipated applications of biotechnology to energy production. *Prerequisite: ISAT 310, ISAT 351 or BIO 214 or Permission of Instructor*

ISAT 454. Computer Applications in Biotechnology

3.00

Students learn how complex biological molecules support and regulate processes in living systems, through building interactive computer models of protein and nucleic acid structure and function. The course requirements include written and oral presentations and creation of Web pages. *Prerequisite: ISAT 351 or BIO 240 and BIOT 260 or permission of the instructor.*

ISAT 455. Regulatory Issues Biotechnology

3.00

This course examines the policies and guidelines of federal government agencies that regulate the use of recombinant DNA technology, genetically engineered organisms and the manufacturing of biotechnology products. Issues of product safety, product labeling, physical and biological containment, environmental release, and mammalian cloning are presented. *Prerequisite: ISAT 350 or BIO 240 and BIOT 260 or permission of the instructor.*

ISAT 456. Ethical, Legal, & Social Implications of Biotechnology

3.00

The ethical, legal, and social implications of the field of biotechnology and its applications are explored in this course. Students will analyze at an in-depth level the social impacts and ethical implications of human subjects and biological materials research, cloning, human genetic engineering, and transgenic agricultural crops. *Prerequisite: ISAT 131 & ISAT 231 or BIOT 260 or Permission of Instructor*

ISAT 459. Awareness and Understanding of Chemical, Biological, and Radiological Weapons of Mass Destruction

3.00

Crosslisted with IA 459

This course introduces awareness, science, and societal impact of Weapons of Mass Destruction (WMD) agents. Students study the development of vaccines, therapeutic and diagnostic drugs used in the detection and treatment of these agents. The course

consists of lectures and safety training sessions that introduce tactical and logistical techniques used against chemical, biological and radiological WMD.

ISAT 460. Tcp/Ip Networks

3.00

Crosslisted with CS 460

An overview of Local Area Network hardware, LAN topology and design, and LAN protocols. Includes installation and management of network operating systems and TCP/IP services (address management, name management, file and print sharing, account management). *Prerequisite: CS 350 or CIS 320.*

ISAT 461. Internetworking

3.00

Crosslisted with CS 461

Wide Area Network (WAN) and Metropolitan Area Network (MAN) design. Audio, voice, data and TV transmission over ATM/B-ISDN networks. The SONET signal hierarchy and Q3 standard interface model. Network security. Performance analysis of a given network. *Prerequisite: CS 361 or ISAT 460*

ISAT 462. Network Applications Development

3.00

Design and implementation of network-based applications using languages and architectures such as sockets, JAVA, TL1 and CORBA. Concepts in distributed processing, including synchronization of interprocess communication and management of replicated data. Analysis of performance issues related to distributed applications. *Prerequisite: ISAT 360.*

ISAT 465. Wireless Networking, Security and Forensics

3.00

An introduction to wireless networking and wireless LAN security and forensics. Radio frequency fundamentals are introduced with emphasis on applications and services. Hands-on network configurations and analysis tools for wireless LAN are introduced and exercised with emphasis on network performance, security and forensic applications. *Prerequisite: ISAT 360 or CIS 320/CS 320 or equivalent.*

ISAT 471. Transportation: Energy, Environment & Society

3.00

This course provides an overview of transportation's role in energy demand, environmental change, and economic development. Domestic and global transportation trends are compared and their impacts on fossil fuel consumption, air pollution, climate, ecosystems, and social structure are analyzed. Contemporary technological, policy, and behavioral solutions are critically examined with an emphasis on alternative fuels, advanced vehicle architectures, and regulatory measures. *Prerequisite: Junior or Senior Standing Only*

ISAT 473. Local Agriculture and Farm Internships

4.00

The objectives for this course include understanding local ecology and its impacts on farming, as well as how farming impacts local ecology; practicing diversified farming techniques; understanding how small-scale farms operate as businesses; examining

localization and slow-food movements and recognizing the impacts of globalized or industrial food and fiber production; identifying the strengths and limitations of small-scale farming.

ISAT 474. Political Ecology

3.00

This seminar focuses on political ecology as a framework and body of work that examines environmental change, particularly notions of degradation, through analyses of complex social, economic, political and ecological interrelationships. Course materials raise and address questions of how people study and have perceived ways in which human societies and various 'environments' shape one another over time, as well as the contexts in which 'development' efforts are constructed, implemented and, sometimes, abandoned.

ISAT 477. Complex Systems and How They Fail

3.00

Interdisciplinary study of complex system operation, interdependencies, and failure focusing on real-world critical infrastructure systems (e.g., electric power, telecommunications, and health). system response to natural and human-induced hazards, including cascading effects. Examination of risk management strategies including technical and policy solutions.

ISAT 480. Topics in Integrated Science & Technology

1.00 - 4.00

Topics in integrated science and technology which are of interest to the upper-division student but not otherwise covered in the regular course offerings. Offered only with the approval of the program coordinator. May be repeated for credit when course content changes. Students should consult the instructor prior to enrolling for the course. Topic selected may dictate prerequisite. *Prerequisite: Junior or senior standing only.*

ISAT 485. Gender Issues in Science

3.00

Crosslisted with WGSS 485

An interdisciplinary course that looks at the scientific process, science practitioners, and science students through the lens of gender analysis. Students read literature, lead discussions, perform experiments, and analyze both data and processes to address the effects of educational systems on the preparation and careers of scientists, the influence of politics and culture on scientific inquiry, and the effects of critiques grounded in gender analyses on understanding the scientific process.

ISAT 490. Capstone Experience I

1.00

This is the first of a four-course sequence. Students perform an independent research project, either alone or within an investigative team, to identify and analyze a science- or technology-based problem (broadly defined), culminating in a public presentation at the ISAT Senior Symposium. In this course, students will identify an appropriate problem to investigate for their Capstone experience and assemble a Team to develop their Capstone Proposal.

ISAT 491. Senior Capstone Project I

1.00

First course in a three-course sequence. Student generates an idea for and writes a proposal for an independent or team-based research project. Student must identify and analyze a science- or technology-based problem (broadly defined), identify potential solutions, recommend an approach, and prepare a written proposal.

ISAT 492. Senior Capstone Project II

2.00

Second course in a three-course sequence. Student performs the bulk of the research needed for an independent research project, either alone or within an investigative team, to address a technologically based problem.

ISAT 493. Senior Capstone Project III

2.00

Third course in a three-course sequence. Student finishes the research and prepares an oral and a written report on the work (either alone or within an investigative team), addressing a technologically based problem and developing alternative solutions.

ISAT 495. Technology in Our World: Better By Design

3.00

Students explore the importance of design in technology and engineering and contrast the design process with the scientific method. This includes evaluating functional requirements, ergonomics, usability, cost, risk and environmental impact. Students complete a design project integrating these factors to address a real-world problem.

ISAT 499A. Honors Thesis

1.00

ISAT 499B. Honors Thesis

1.00

ISAT 499C. Honors Thesis

2.00

ISAT 499D. Honors Thesis

2.00

IA 150. Introduction to Intelligence Analysis

3.00

This course presents a holistic understanding of intelligence analysis: its core definition, domains where it is practiced, how it is done by both individuals and teams, relevant reasoning and technological methods, the significance of communication skills, the broader context that shapes the process, and relevant principles of professional ethics and legal compliance. This course is required for students majoring in intelligence analysis and is recommended for those considering the major. *Prerequisite:* First year students and sophomores only; others by permission of the program.

IA 200. Introduction to National Security Intelligence

3.00

Intelligence analysis is a complex, dynamic process that includes determining the intelligence needs, data collection, pre-processing, analysis and production of the customer's product. This is an introduction to the history, structure and practices of the

national security intelligence community (IC). The course is team-oriented, project-based and grounded in the relevant legal and ethical context. *Prerequisite:* Either a minimum grade of "C" in IA 150 or current enrollment in IA 150.

IA 210. Introduction to Global Competitive Intelligence

3.00

This course will focus on global competitive intelligence (CI): the tools and methods that enhance strategic and tactical decision making in the analysis and interpretation of business data related to current and emerging competitors. This course is team oriented, project based and grounded in the relevant legal and ethical context. *Prerequisite:* A minimum grade of "C" in IA 150.

IA 240. Technology Applications in a Networked World

3.00

Students develop broad technical competencies of current and future technology applications, such as databases, spreadsheets and Internet-of-things. They explore technical-socio-ethical aspects of the cyber world. This hands-on and team-based course supports development of working technical knowledge for accessing, evaluating, modeling and analyzing information and data for problem solving. Students develop a systematic appreciation of computing, network and cyber security. *Prerequisite:* Either a minimum grade of "C" in IA 150 or current enrollment in IA 150.

IA 241. Introduction to Programming and Data Science

3.00

The course introduces students to data analysis through computer programming. The course will focus on key elements from data science that are critical to the intelligence analyst such as manipulating, processing, cleaning and crunching data. The course will serve as a practical, modern introduction to scientific computing in Python, tailored for data-intensive applications. This course will introduce the Python language and libraries students need to effectively solve a broad set of data analysis problems. The course is hands-on and places emphasis on practical case studies with a broad scope of techniques useful for the data analyst. *Prerequisite:* IA 240

IA 250. Research Design and Writing for Intelligence Analysis

3.00

In this course, students will learn how intelligence analysts can produce assessments using a research design framework and communicate those assessments effectively in writing. This includes how intelligence analysts develop research (intelligence) questions, conduct research, evaluate sources, choose methodologies, develop assessments and present those assessments in the form of an argument with an emphasis on precision, clarity and brevity in the written format. *Prerequisite:* IA 150 and IA 200.

IA 261. Hypothesis Testing

3.00

Examines hypothesis testing in national, military, counter, and competitive intelligence. By comparing alternate theories in terms of their explanatory power and predictive success, students will learn the most relevant methods for integrating facts into unified theories, assessing theories, and properly qualifying and reevaluating theories to compensate for risk and uncertainty. *Prerequisite:* Either a minimum grade of "C" in IA 150 or current enrollment in IA 150.

IA 280. Selected Project in Intelligence Analysis

3.00

This course will examine projects of interest to lower-division students in intelligence analysis not otherwise offered in regular course offerings. They are offered only with the approval of the program director and they may be repeated when course content changes. Students should consult with the instructor prior to enrolling in the course. *Prerequisite:* Junior standing.

IA 300. Seminar on Issues in Intelligence Analysis

3.00

This course will focus on important issues in the theory and practice of intelligence analysis. Students will learn about intelligence analysis by examining its purpose, history, methods, processes, context of existing challenges, and recommendations for improvement. *Prerequisite: IA 200 and IA 210.*

IA 312. Causal Analysis

3.00

Examines causal analysis in national, military, counter- and competitive intelligence. By assessing a factor's amount and kind of efficacy, students will learn the most reliable methods for distinguishing between relevant/irrelevant events and factors, identifying and excluding "pseudo-causes," and anticipating higher order effects of a causal process. *Prerequisite: IA 261.*

IA 313. Counterfactual Reasoning

3.00

Examines counterfactual reasoning in national, military, counter and competitive intelligence. By analyzing alternate scenarios and their consequences, students will learn the most relevant methods for employing creative thinking in generating, developing, and assessing possibilities; substantiating "after-action" reports, and structuring futures analysis. *Prerequisite: IA 312.*

IA 314. Strategy Assessment (Rational Decision Theory)

3.00

Crosslisted with PHIL 314

Examines strategy assessment in national, military, counter, and competitive intelligence. By applying probabilities and goals to potential threats and opportunities (short and long-term), students will learn the most relevant methods for formulating and evaluating possible courses of action, and projecting and explaining actions by assessing an agents' strategic interests and circumstances. *Prerequisite: IA 313.*

IA 340. Data Mining, Modeling and Knowledge Discovery

3.00

Data mining is the nontrivial extraction of previously unknown and potential useful information from (large) data sets to help explain current behaviors and anticipate future outcomes. Students will apply data mining and knowledge discovery methods to data sets from business, industry and government. The course is team oriented, project based and grounded in the relevant legal and ethical context. *Prerequisite: IA 241.*

IA 341. System Dynamics Modeling, Simulation and Analysis

3.00

System dynamics analysis is a perspective and a set of conceptual and computing tools to help us understand the structure and dynamics of complex systems. This course will apply system dynamics analysis to complex systems (problems) that involve the interplay of physical and social-political factors. The course is team-oriented, project-based and grounded in the relevant legal and ethical context. *Prerequisite: IA 312*

IA 342. Visualization Methods, Technologies and Tools for Intelligence Analysis

3.00

Data visualization presents laboratory or simulation data or the results from sensors out in the field in a way that aids reasoning about and hypothesis building in complex data sets. This course will apply data visualization technologies and tools to timely data sets from business, industry and government. The course is team oriented, project based and grounded in the relevant legal and ethical context. *Prerequisite: IA 340 or ISAT 252. Programming and Problem Solving.*

IA 360. Terrorism and Counterterrorism

3.00

This course will address key concepts in the study of terrorism, to include definitions, history, justifications, explanations and strategies. It will also address the effectiveness of different kinds of counterterrorism strategies and policies and the role that intelligence analysis plays in the process. *Prerequisite: IA 200.*

IA 363. Apocalypticism, Religious Terrorism and Peace

3.00

Crosslisted with REL 363

This course traces apocalypticism from its ancient Jewish and Christian roots to its contemporary manifestations in religious groups around the world. Since apocalypticism is a worldview that cuts across religious traditions, the course covers a variety of religious groups. The last half of the course focuses on the complex relationships between apocalyptic thinking and religious terrorism and entails an independent research project.

IA 365. Cyber Intelligence

3.00

Cyber intelligence is the acquisition of information to identify and analyze cyber adversaries' capabilities, intentions and activities that can be used to support proactive decision-making. Students will explore common cyber security terminology (lexicon), frameworks and methodologies used to analyze cyber security threats in organizations. Using case studies, they will collect and analyze open source information to identify and monitor evolving threats and understand how adversaries operate.

IA 370. Advanced Competitive Intelligence

3.00

Competitive intelligence is developing actionable foresight regarding competitive dynamics that can be used to enhance the speed and quality of decision-making. The main objectives of this course are to teach students to think and act strategically as a CI professional and to develop students' capacity to think strategically about a company, its business position, how it can gain sustainable competitive advantage and how its strategy can be implemented and executed successfully with the support of CI. *Prerequisite: IA 210.*

IA 400. Cognitive Science and Intelligence Analysis

3.00

Cognitive science examines a wide range of mind/brain processes, including thinking, learning, language acquisition, pattern recognition, memory, creativity, volition, etc. This course will take an information processing systems approach to study cognitive processes that comprise intelligence analysis. The course is team-oriented, project-based and grounded in the relevant legal and ethical context. *Prerequisite: IA 314*

IA 405. Ethics, Law and Intelligence Analysis

3.00

This course will examine ethical and legal issues raised in the practice of intelligence analysis. It will draw on philosophical ethical theories and reasoning to explicate the issues addressed, and will explore the relevant constitutional and other legal constraints on the practice of intelligence analysis, particularly issues of information privacy, civil liberties and limitations on government action. *Prerequisite: IA 314*

IA 440. Intelligence Analysis Capstone Project Preparation

3.00

This course will focus on preparing students for developing team projects in the IA Capstone Seminar. Students will individually identify, analyze, plan and report on a feasible capstone seminar project. Students will then organize teams and develop plans to complete a subset of the most promising projects in the Capstone Seminar. *Prerequisite: Senior standing in the IA program and IA 314.*

IA 450. Capstone Project in Intelligence Analysis

3.00

Building on the Seminar on Issues in Intelligence Analysis students will complete and present solutions for team-based intelligence community or competitive intelligence IA projects. Students will produce written and oral technical reports/briefs of their results. *Prerequisite: IA 440.*

IA 459. Awareness and Understanding of Chemical, Biological and Radiological Weapons of Mass Destruction

3.00

Crosslisted with ISAT 459

This course introduces awareness, science and societal impact of weapons of mass destruction (WMD) agents. Students study the development of vaccines and therapeutic and diagnostic drugs used in the detection and treatment of these agents. The course consists of lectures and safety training sessions that introduce tactical and logistical techniques used against chemical, biological and radiological WMD. *Prerequisite: Basic chemistry and/or biology.*

IA 460. All Hazards Response And Management Systems

3.00

Incident Command Systems enables incident management by integration of facilities, equipment, personnel, procedures, and communications operating in a common organizational structure. ICS is used to organize near and long-term operations for a spectrum of emergencies, small to complex incidents, natural and man-made. ICS is used by government, many private and nongovernmental organizations in 5 major functional areas: command, operations, planning, logistics, and finance and administration.

IA 480. Selected Topics in Intelligence Analysis

3.00

This course will examine topics of interest to upper-division students in intelligence analysis not otherwise offered in regular course offerings. They are offered only with the approval of the program director and they may be repeated when course content changes. Students should consult with the instructor prior to enrolling in the course. *Prerequisite: Junior standing.*

IA 499A. Honor Thesis I

1.00

This is an honors thesis proposal course. It is the first of the three-course sequence intended to satisfy the requirements for the honors program as well as the Intelligence Analysis program. Students will develop a thesis proposal, including objectives, audience, literature review, timeline and deliverables. The goal of the course is for the student to develop a compelling and complete senior thesis proposal. *Prerequisite: Junior standing; must be in the honors program.*

IA 499B. Honor Thesis II

3.00

This is an honors thesis development course. It is the second of the three-course sequence intended to satisfy the requirements for the honors program as well as the Intelligence Analysis program. Most of the course will be jointly administered/taught with IA 440: Senior Seminar in Intelligence Analysis. In addition, students may be required to meet with the instructor to discuss progress on his or her project. *Prerequisite: Senior Standing and Honor Student.*

IA 499C. Honors

3.00

This is an honors thesis completion course. It is the third of the three-course sequence intended to satisfy the requirements for the honors program as well as the Intelligence Analysis program. Most of the course will be jointly administered/taught with IA 450, Capstone Project in Intelligence Analysis. In addition, students may be required to meet with the instructor to discuss progress on his or her project. *Prerequisite: Senior standing; enrollment in the honors program.*

IDLS 350. Literacy and Society

3.00

An exploration and analysis of societal literacy practices as viewed through cognitive, cultural, class, workplace, and technological lenses. *Prerequisite: WRTC 103.*

IDLS 391. Study Abroad

1.00 - 6.00

Credit for academically-grounded, interdisciplinary study abroad. Students seeking credit must secure the approval of the department head and a faculty supervisor who will provide the academic structure, assignments, and student evaluation.

IDLS 395. Topics in IDLS

1.00 - 6.00

Examination of selected interdisciplinary topics of importance to Teacher Education content areas. May be taken for a maximum of six credit hours toward the major.

IDLS 400. Seminar in Liberal Studies

3.00

Capstone seminar for IDLS studies in the Humanities/Social Sciences content area. Studies will apply different disciplinary perspectives to a single topic. Course requirements will emphasize superior written and oral communication skills, and the integration and application of content area knowledge to the teaching environment. Students must have completed their lower division Core requirements and be within one course of completing the concentration area. Education minors should be in their third semester of their teacher education program.

IDLS 486. Internship & Field Experience

1.00 - 6.00

IDLS credit for academically-grounded internships and field experiences. Students seeking credit must secure the approval of the department head for the use of academic structures, assignments, and evaluation plans provided by qualified internship or field experience supervisors.

IDLS 490. Independent Study in Liberal Studies

3.00

Individualized projects in interdisciplinary liberal studies.

IDLS 499A. Honors

1.00 - 6.00

IDLS 499B. Honors

1.00 - 6.00

IDLS 499C. Honors

1.00 - 6.00

ISS 300. Experiential/Service Applications

3.00

Provides students with practical work experience through an internship, service learning program, etc. This experience culminates in the application of knowledge and skills emerging from previous courses. *Prerequisite: Junior or Senior Standing Only*

ISS 330. Maps, Money and World Trade

3.00

This is an interdisciplinary class designed to help students, especially future teachers, integrate perspectives from various disciplines, especially history, geography, and economics, into a coherent account of an increasingly globalized world. We will pay particular attention to map construction and use (both historical and contemporary) and the relationship between economic ideas and world events focusing on a variety of case studies over the last millennium.

ISS 400. Senior Seminar in Social Sciences

3.00

The course builds upon all previous course listings and serves as the final integrating experience providing closure to the interdisciplinary social sciences. Students are expected to integrate theories, research and or methods from several social science disciplines to present a senior level research paper. *Prerequisite: ISS Majors only.*

INTA 295. CrossNational Research Skills

4.00

Students learn how to conduct research from theory formulation through data collection and hypothesis testing in the field of international affairs. Special emphasis on research and computer literacy. *Prerequisite: MATH 220 , POSC 230 and POSC 240.*

INTA 301W. The Washington Semester Experience: Global Affairs

3.00

Part of the "Global Affairs" Washington Semester program, the course entails intensive study of a global theme. The theme's dynamics will be explored in varied settings: localities, nation-states, global geographic regions, and international organizations (both governmental and non-governmental). The course provides outlets for engagement with policy actors and institutions based in Washington, D.C., as well as for individual and group experiential learning activities.

INTA 489. Senior Seminar in International Affairs

3.00-4.00

This is the capstone course in the international affairs major. It provides an interdisciplinary overview of the fields within international affairs and an opportunity for students to complete individual research projects on international problems. Fulfills the College of Arts and Letters writing-intensive requirement for the major. *Prerequisite: Senior INTA majors.*

IB 200. Introduction to International Business

3.00

A survey course to introduce students to the theory and practice of international business. The focus is on providing the skills and knowledge to successfully manage operations within the global environment. Credit for IB 200 must be earned prior to taking upper-level major courses.

IB 294. Internship Abroad

3.00

A course providing students an opportunity to work in an organization abroad in order to gain insight into the practical side of modern business operations.

IB 298. Special Topics in International Business

3.00

The course is designed to allow exploration of current topics in international business. Course content will vary. See program director for current content.

IB 480. International Business Theory and Policy

3.00

The course is designed to serve as an application of theory for business students to allow them to put the total picture of international business together. *Prerequisite: IB major, senior standing.*

IB 490. Special Studies in International Business

1.00 - 3.00

Designed to give capable students in international business an opportunity to complete an independent study under faculty supervision. *Prerequisite: 2.8 GPA, recommendation of the instructor and approval of the director prior to registration.*

IB 494. International Business Internship

3.00

A course providing students an opportunity to work in and with an organization in order to gain insight into the practical side of modern international business operations. *Prerequisite: IB major, completion of 85 credit hours and COB 300, minimum cumulative GPA of 3.0, and approval of the director of International Business program prior to registration.*

IB 498. Special Topics in International Business

3.00

An advanced course designed to allow exploration of current topics in international business. Course content will vary. See the program director for current content. *Prerequisite: COB 300 and permission of the instructor.*

IB 499A. Honors

1.00

IB 499B. Honors

3.00

IB 499C. Honors

1.00 - 3.00

IPE 201. Health Professionals in Diverse Communities

1.00

An introduction to skills in professionalism & interprofessional collaboration in addressing local and global health challenges. First year pre-professional health students examine social determinants of health and diverse communities, and learn skills in reflection as they interact with health professionals and faculty.

IPE 202. Health Care Service in Diverse Communities

2.00

This is the second course in a two-course sequence for first year, pre-professional health students in the Huber Learning Community. Students examine interprofessional perspectives on complex global health issues and apply skills in professionalism, integration, collaboration, and reflection to community-based, experiential service learning. *Prerequisite: IPE 201*

IPE 314. Rural Health: an Interprofessional Approach

3.00

Crosslisted with HTH 314, NSG 314, SOWK 314

Students study, observe and participate in interprofessional assessment, planning and delivery of community-based primary health care in partnership with residents and agencies of a host rural county. Learning activities will emphasize rural culture, rural health care and interprofessional practice.

IPE 391. Introduction to Informatics for Health Care Professionals

1.00

Electronic health records and health apps exemplify how health information technology (IT) is changing health care today. Students will learn how health IT tools and big data can improve communication between health providers, support better patient outcomes, and reduce spending on health care. Designed with an emphasis on interprofessional collaborative practice, students will learn about their own and others' professional roles and responsibilities in achieving health goals using health IT.

IPE 401. Workshops in Interprofessional Education and Practice (IPE)

0.00

HHS workshops offer a time-limited and concentrated focus on issues that are specific to interprofessional education and/or practice.

IPE 415. Ethical Decision-Making in Healthcare: an Interprofessional Approach

1.00

Crosslisted with NSG 415

Health care ethics is a shared, relevant concern among health and human service disciplines and is an ideal vehicle for students from different fields to learn about one another's disciplines and to participate in inter-professional team analysis, discussion, and problem-solving. We have designed an integrated cross-disciplinary learning experience for students interested in the complex, real-world dilemmas encountered in practice. The readings and activities will emphasize ethical, legal, moral and spiritual issues and principles for practice within the context of communicating in inter-professional teams.

IPE 490. Special Topics in Health and Human Services

0.00 - 4.00

This course involves topics of special interest in the area of health and human services but is open to all students. The focus of specific courses is identified for specific offerings. Courses are offered based on faculty and student interest.

ISCI 101. Physics, Chemistry & the Human Experience [C3PP]

3.00

A survey of the fundamental concepts, principles and ideas of chemistry and physics. Particular emphasis is placed on understanding the development of the principles and their application in understanding the world around us. May be used for general education credit. *Prerequisite: One of the following: MATH 103, MATH 107, MATH 205, MATH 220, MATH 231 or MATH 235. Corequisite: One of the following: MATH 103, MATH 107, MATH 205, MATH 220, MATH 231 or MATH 235.*

ISCI 101H. Physics, Chemistry and the Human Experience - Honors [C3PP]

3.00

A survey of fundamental scientific ideas and principles, and ideas of chemistry and physics. Particular emphasis is placed on understanding the development of these principles and their application in understanding the world around us. May be used for general education credit. Honors course. *Prerequisite: Honors Students*

ISCI 104. Scientific Perspectives [C3L]

1.00

A study of topics selected to allow students to participate in mathematical and scientific problem solving approaches to knowledge. May be used for general education credit. *Prerequisite: As indicated on MyMadison. Corequisite: As indicated on MyMadison.*

ISCI 104H. Scientific Perspectives - Honors [C3T1L]

1.00

A study of topics selected to allow students to participate in scientific problem-solving approaches to knowledge. Prerequisite or corequisite as indicated in the schedule of classes. Honors course.

ISCI 171. Earth and Planetary Science for Teachers [C3NS]

3.00

This course provides university-level foundations of earth and planetary science for future pk-8 teachers. Content aligns with various teacher competencies, and includes such topics as the formation and evolution of the earth and the earth's solar system, the characteristics of stars, planets, asteroids, and comets, and how earth and planetary science knowledge and technologies function with social context. Hands-on, experiential inquiry will be integrated into the course, as will an exploration of such methods as observation, classification, comparison, measurement, data interpretation, mathematical analysis, inference, prediction and hypothesis testing. Normally open to IDLS majors only, but other students may request admission by special permission. May be used for general education credit.

ISCI 172. Physical Science for Teachers [C3PP]

3.00

This course provides university-level foundations of physical science for future pk-8 teachers. Content aligns with various teacher competencies, and includes such topics as matter, conservation of mass and energy, chemical structures and bonds, coordinate systems and their use in describing motion and force, thermodynamics, light, sound, magnetism and electricity, and how physical science knowledge and technologies function with social context. Hands-on, experiential inquiry will be integrated into the course, as will an exploration of such methods as observation, classification, comparison, measurement, data interpretation, mathematical analysis, inference, prediction and hypothesis testing. Normally open to IDLS majors only, but other students may request admission by special permission. May be used for general education credit.

ISCI 173. Life and Environmental Science for Teachers [C3L]

3.00

This course provides university-level foundations of life science for future preK-8 teachers. Content aligns with various teacher competencies, and will prepare students to be scientifically literate. Topics will focus on biological structure and function; information flow, storage and exchange; transformations of energy and matter; evolution; and the interconnection and interactions of living systems. The course will engage students in the learning of foundational concepts as well as the process of science and the relevance of biology to society. Normally open to IDLS majors only, but other students may request admission by special permission. May be used for general education credit.

ISCI 450A,B,C. Interscience Research

1.00 - 4.00, repeatable to 6 credits

An investigative experience spanning more than one field of science which may require supervision by multiple faculty members from different disciplines. Students must get prior approval for this course from each of the supervising faculty members and the department head of their program. *Prerequisite: Junior status and permission of the instructors.*

ISCI 499H. Honors

1.00 - 4.00

An independent research topic initiated and completed by qualified senior majors who want to graduate with distinction.

ITAL 101. Elementary Italian I

3.00 - 4.00

The fundamentals of Italian through listening, speaking, reading and writing. Practice in pronunciation and development of comprehension. One hour's work a week in the language laboratory. If student has had two or more years of the language in high school he/she will not receive credit for the course.

ITAL 101F. Elementary Italian-Florence

3.00

Prerequisite: Studies Abroad-Florence

ITAL 102. Elementary Italian II

3.00 - 4.00

The fundamentals of Italian through listening, speaking, reading and writing. Practice in pronunciation and development of comprehension. One hour's work a week in the language laboratory. If student has had two or more years of the language in high school he/she will not receive credit for the course. *Prerequisite: ITAL 101.*

ITAL 102F. Elementary Italian II

3.00

The fundamentals of Italian through listening, speaking, reading and writing. Practice in pronunciation and development of comprehension. If student has had two or more years of the language in high school he/she will not get credit for the course.

Prerequisite: ITAL 101 Studies Abroad in Florence.

ITAL 103. Italian Survival Kit I

4.00

This course provides students with basic communication skills for survival while traveling/studying in Italy. Emphasis on cultural competence and interaction skills. Does not fulfill the B.A. language requirement. Students who have previously studied Italian are required to take the placement test. *Prerequisite: Senior standing or permission of the instructor.*

ITAL 109. Accelerated Review of Elementary Italian

3.00

Reviews elementary Italian grammar, reading, writing, speaking and listening skills in Italian. One hour of work a week in the language laboratory. For students who have had no more than two or three years of Italian in high school or qualify through the placement exam.

ITAL 111. Intensive Italian

6.00-8.00

The fundamentals of Italian through listening, speaking, reading and writing. The course is the equivalent of ITAL 101-102.

ITAL 212. Intensive Italian

6.00

The fundamentals of Italian through listening, speaking, reading, and writing. The course is the equivalent of ITAL 231-232.

ITAL 231. Intermediate Italian I

3.00

A thorough review of grammar, vocabulary building, conversation, composition and reading. *Prerequisite: ITAL 102, ITAL 109, ITAL 111 or Departmental Permission*

ITAL 231F. Intermediate Italian-Florence I

3.00

A thorough review of grammar, vocabulary building, conversation, composition and reading. *Prerequisite: ITAL 102, 109, 111 or per placement exam score.*

ITAL 232. Intermediate Italian II

3.00

A thorough review of grammar, vocabulary building, conversation, composition and reading. *Prerequisite: ITAL 231*

ITAL 232F. Intermediate Italian-Florence II

3.00

A thorough review of grammar, vocabulary building, conversation, composition and reading. *Prerequisite: Studies Abroad-Florence*

ITAL 300. Italian Grammar and Communication

3.00

Intensive training in grammatical structures and their application to oral and written communication. Instruction is in Italian. Fulfills the College of Arts and Letters writing-intensive requirement for the major. *Prerequisite: ITAL 232 or ITAL 212 or Per Placement Exam Score*

ITAL 300F. Grammar and Communication

3.00

Prerequisite: Studies Abroad-Florence

ITAL 307. Italian Civilization

3.00

A study of the history and the arts of Italy from the Etruscans to 1814. Instruction is in Italian. *Prerequisite: ITAL 300 or permission of instructor*

ITAL 308. Contemporary Italian Civilization

3.00

*Crosslisted with HIST 308**

A study of Italian society, economics, politics and the arts from 1814 to the present. Instruction in English. (Research papers for Italian majors/minors in the language).

ITAL 315. Italian Phonetics

3.00

Intensive drill in Italian sounds and intonation patterns. Instruction is in Italian. *Prerequisite: ITAL 300.*

ITAL 317. Strategies for Italian Oral Communication

3.00

In this course students will develop linguistic competencies and learn basic tools to improve their oral communication skills. *Prerequisite: ITAL 232*

ITAL 320. Oral and Written Communication

3.00

Intensive training in the use of modern, everyday Italian with emphasis on conversation and composition. Readings in Italian will provide a context for discussion and writing. *Prerequisite: ITAL 300 or permission of instructor*

ITAL 320F. Oral and Written Communication

3.00

Intensive training in the use and comprehension of everyday Italian with emphasis on conversation and composition to give students confidence to express themselves in idiomatic Italian. Taught in Italian. *Prerequisite: Studies Abroad-Florence*

ITAL 330. Business Italian

3.00

A study of commercial and technical vocabulary and trade customs in conjunction with practice in the art of commercial communication, including interviews, letter writing and simultaneous interpretation. Instruction is in Italian. *Prerequisite: ITAL 300 or permission of instructor*

ITAL 335. Introduction to Italian Literature

3.00

A survey of Italian literature from its beginning to the late 18th century. Textual analysis of sample writings representative of the most important literary movements. Instruction is in Italian. *Prerequisite: ITAL 300 or permission of instructor*

ITAL 375. Business and Society in Italy

3.00

This course studies Italian Business, Economy, Politics, and the influence the Italian society has on them. *Prerequisite: ITAL 300 or permission of instructor*

ITAL 380. Italian Language and Culture Through Regional Cuisine

3.00

This course is designed to introduce the student to the rich Italian culinary tradition. Through readings and presentations, students will familiarize themselves with the diversity present in Italian cuisine and prepare the dishes that best represent various regions of Italy. Taught in Italian. *Prerequisite: ITAL 300 or permission of instructor*

ITAL 386. Italian Short Stories

3.00

A study of literary Italian short stories from the Middle Ages to the 21st century, including a selection of texts by prominent authors such as Giovanni Boccaccio, Giambattista Basile, Giovanni Verga, Grazia Deledda, Gabriele D'Annunzio, Luigi Pirandello, Natalia Ginzburg, Italo Calvino, and Ada Negri. *Prerequisite: ITAL 300 or the permission of the instructor*

ITAL 397. Creative Writing in Italian

3.00

This course will develop strategies both for writing well and for writing creatively. Another opportunity to practice speaking skills. *Prerequisite: ITAL 300 or permission of instructor*

ITAL 400. Advanced Conversation

3.00

Discussions deal with topics of current interest. Instruction is in Italian. *Prerequisite: ITAL 300.*

ITAL 410. Italy Through Broadcast and Print Media

3.00

This course is an analysis of modern Italy through television, radio, newspapers, the internet, and commercial advertisement. Instruction is in Italian. *Prerequisite: ITAL 300 or permission of instructor.*

ITAL 421. A Study of Italian Theatre

3.00

A study of Italian theatre from the Renaissance to the 21st century, including a selection of texts by prominent authors such as Niccolò Machiavelli, Torquato Tasso, Carlo Goldoni, Alessandro Manzoni, Luigi Pirandello and Dario Fo. *Prerequisite: ITAL 300 or the permission of the instructor.*

ITAL 422. A Study of Italian Poetry

3.00

A study of Italian poetry from the Middle Ages to the 21st century, including a selection of texts by prominent authors such as Dante Alighieri, Francesco Petrarca, Ludovico Ariosto, Gaspara Stampa, Torquato Tasso, Ugo Foscolo, Giacomo Leopardi, Giovanni Pascoli, Giuseppe Ungaretti, Eugenio Montale, Mario Luzi, and Alda Merini. *Prerequisite: ITAL 300 or the permission of the instructor*

ITAL 423. A Study of Italian Prose Fiction

3.00

A study of Italian prose fiction from the Middle Ages to the 21st century, including a selection of texts by prominent authors such as Giovanni Boccaccio, Alessandro Manzoni, Primo Levi, Giuseppe Tomasi di Lampedusa, Elsa Morante, Italo Calvino Umberto Eco, and Elena Ferrante. *Prerequisite: ITAL 300 or the permission of the instructor*

ITAL 425. Modern Italian Literature

3.00

A study of the works of major Italian writers from the 19th century to the present. Instruction is in Italian. *Prerequisite: ITAL 300 or permission of instructor.*

ITAL 435. Translation Strategies

3.00

This course discusses aspects of translation theory such as skopos, translation loss, translation gain, and language bias. Students learn several translation strategies at the phrase and sentence levels and practice these strategies thoroughly before investigating terminology, terminology mining and terminology management. Instruction is in English and Italian. *Prerequisite: ITAL 300 or permission of instructor.*

ITAL 437. Studies in Italian Literature

3.00

Crosslisted with ENG 437

A study of selected works of Italian literature. Instruction is in English. May be repeated for credit when content varies.

ITAL 446. Special Topics in Italian Literature

3.00

Study of a particular topic in Italian literature. It may cover all or specific Italian literature genre. Course may be repeated if content varies. *Prerequisite: ITAL 300 or permission of instructor.*

ITAL 447. Special Topics in Italian Civilization and Culture

3.00

Students will study a particular topic in the civilization and/or culture of Italy. Course may be repeated if content varies. *Prerequisite: ITAL 300.*

ITAL 448. Special Topics in Italian Linguistics

3.00

Students will study a particular topic in Italian linguistics. Topics could include an introduction to Italian sociolinguistics and psycholinguistics. Course may be repeated if content varies. *Prerequisite: ITAL 300.*

ITAL 465. Italian Cinema

3.00

A study of Italian cinema from the early days to the present, with a focus on its relation to key features of Italian history, society, and cultures. Instruction is in Italian. *Prerequisite: ITAL 300 or permission of instructor.*

ITAL 480. Advanced Italian Language Lab

1.00-2.00

This language lab is aimed at complementing 300- and 400-level Italian content courses. In addition to enrolling into each upper-level content course, students may be required to enroll in the correspondent advanced language lab. The language lab may be taught by the same instructor of the content course or by a different instructor. In the language lab, the students will work on the linguistic component of the course by practicing reading advanced literary/specialized texts in the target language and speaking

and/or writing about the contents of the course. The lab will focus on technical/literary lexicon, advanced grammar, and pragmatic and stylistic features. *Prerequisite: ITAL 300 or permission of the instructor.*

ITAL 484. Advanced Studies in Spanish and Italian Literature

3.00

From the Renaissance to the Siglo de Oro, this course will explore the influences between Spanish and Italian literature, from the Early modern period to the Baroque. It will mainly investigate three main genres: Poetry, narrative and drama. It will include a selection of texts by prominent Italian and Spanish authors such as Petrarch, Boccaccio, Garcilaso de la Vega, Machiavelli, Cervantes, Lope de Vega. Instruction is in English. *Prerequisite: Permission of the instructor.*

ITAL 490. Special Studies in Italian

1.00 - 4.00

ITAL 490F. Special Studies in Italian

3.00

Prerequisite: Studies Abroad-Florence

ITAL 499A. Senior Honors Project

1.00

ITAL 499B. Senior Honors Project

3.00

ITAL 499C. Senior Honors Project

2.00

JAPN 101. Elementary Japanese I

4.00

The fundamentals of Japanese through listening, speaking, reading, and writing. Practice in pronunciation and development of comprehension. One hour of work each week in the language laboratory.

JAPN 102. Elementary Japanese II

4.00

The fundamentals of Japanese through listening, speaking, reading, and writing. Practice in pronunciation and development of comprehension. One hour of work each week in the language laboratory. If student has had two or more years of the language in high school he/she will not receive credit for the course. *Prerequisite: JAPN 101.*

JAPN 111. Intensive Japanese I

6.00

The fundamentals of Japanese through listening, speaking, reading and writing. The course is the equivalent of JAPN 101-102.

JAPN 212. Intensive Japanese II

6.00

The fundamentals of Japanese through listening, speaking, reading and writing. The course is the equivalent of JAPN 231-232.

Prerequisite: JAPN 102 or permission of instructor.

JAPN 231. Intermediate Japanese I

3.00

A thorough review of grammar, vocabulary building, conversation, composition, and reading. A student cannot earn credit for

JAPN 231 after completing JAPN 232. *Prerequisite: JAPN 102, JAPN 111, or permission of the instructor.*

JAPN 232. Intermediate Japanese II

3.00

A thorough review of grammar, vocabulary building, conversation, composition, and reading. *Prerequisite: JAPN 231 or*

permission of instructor.

JAPN 300. Japanese Grammar and Communication

3.00

Intensive training in grammatical structures and their application to oral and written communication. Instruction is in Japanese.

Fulfills the College of Arts and Letters writing-intensive requirement for possible International Affairs majors and/or IBUS majors. *Prerequisite: JAPN 232 or JAPN 212 .*

JAPN 320. Japanese Oral and Written Communications

3.00

Intensive training in the use of modern, everyday Japanese with emphasis on conversation and composition. Readings in

Japanese will provide a context for discussion and writing. Instruction is in Japanese. *Prerequisite: JAPN 231 or permission of the instructor.*

JAPN 446. Special Topics in Japanese Literature

3.00

Study of a particular topic in Japanese literature. It may cover all or a specific Japanese literature genre. Course may be

repeated if content varies. *Prerequisite: JAPN 300.*

JAPN 447. Special Topics in Japanese Civilization

3.00

Students will study a particular topic in the civilization and/or culture of Japan. Course may be repeated if content varies.

Prerequisite: JAPN 300.

JAPN 448. Special Topics in Japanese Linguistics

3.00

Students will study a particular topic in Japanese linguistics. Topics could include an introduction to Japanese sociolinguistics or

psycholinguistics. Course may be repeated if content varies. *Prerequisite: JAPN 300*

JAPN 490. Special Studies in Japanese

1.00 - 4.00

Special topics or independent studies in Japanese.

JUST 100. Justice Studies Proseminar

1.00

This course is designed to help justice studies majors explore opportunities for internships, careers, graduate and professional education, and civic and community engagement. The course focuses on developing skills in resume writing, interviewing and networking techniques, job and internship search skills, and investigating graduate and law school opportunities.

Prerequisite: JUST 200 and junior or senior status, or by permission.

JUST 200. Introduction to Justice Studies

3.00

This course introduces students to the interdisciplinary field of justice studies, including the development of justice concepts, principles, and theories and their application to public issues. This course also provides an overview of the three tracks in the justice studies major: crime and criminology, global justice, and social justice. *Prerequisite: Justice Studies Majors only*

JUST 210. Crime and Criminal Justice

3.00

This course provides an introduction to the nature of the crime problem in the United States, including patterns of victimization and offending, and the ways in which the criminal justice system responds to these behaviors. *Prerequisite: JUST 200 and admission to the major.*

JUST 212. Theories of Crime and Criminal Justice

3.00

This course provides an in-depth exploration of theoretical perspectives pertaining to the two central realms of criminological inquiry: crime and the response to crime (criminal justice). Both classic and contemporary perspectives are examined. The course will examine why people commit crime, why crime occurs, why it differs across groups, and the objectives underlying crime control policy. *Prerequisite: JUST 200.*

JUST 221. Social Justice Theories

3.00

This course serves as a theoretical introduction to the social justice track of the Justice Studies major. It includes an examination of the major concepts regarding inequality. How do we define and create inequality? Can we rid ourselves of inequality or should we accept it as a necessary element in society? *Prerequisite: JUST 200.*

JUST 223. Social Justice Interventions and Policies

3.00

This class provides a review of the general structures of American social justice interventions and policies including governmental, corporate, and not-for-profit organizations. Emphasis will be placed on macro-structures such as entitlement programs and micro-structures such as neighborhood and grassroots organization. *Prerequisite: JUST 200.*

JUST 225. Justice and American Society [C4AE]

4.00

This course introduces the student to the concept and reality of justice in America. It is a broad-based, interdisciplinary consideration of justice: What it is, what it means, and how it intersects with society and social institutions in American. Philosophical and theoretical underpinnings of the notion of justice and the historical context of justice in American society will be considered. May be used for general education credit. May not be used for major credit.

JUST 235. Justice in the Global Community

3.00

Crosslisted with JUST 235H

A survey of different definitions of justice relating to the operation and development of a global community in international affairs. *Prerequisite: JUST 200.*

JUST 235H. Justice in the Global Community

3.00

Crosslisted with JUST 235

A survey of different definitions of justice relating to the operation and development of a global community in international affairs. *Prerequisite: Honors Students*

JUST 237. Dilemmas in Global Justice

3.00

This course applies the concepts and frameworks of global justice to examine a selection of the world's greatest challenges, placing global affairs in historical, geographical and political contexts. *Prerequisite: JUST 200.*

JUST 300. Perspectives On Comparative Justice

3.00

This course provides an overview of the various systems of justice existent in different cultures throughout the globe. The emphasis here is on legal systems and the ways in which they are used to promote--or not promote--justice. The course also includes a discussion of such topics as war, peace, terrorism, political and social oppression and the ways in which these phenomena are either created by or ameliorated by justice systems. *Prerequisite: JUST 200 and one other 200 level JUST course, excluding JUST 225.*

JUST 301. Advanced Level Special Topics in Justice Studies

3.00

This course provides an examination of topics which are of current interest in the field of justice studies. The class may be repeated for credit when course content changes. *Prerequisite: JUST 200 and one other 200 level JUST course, excluding JUST 225.*

JUST 307. Justice and Crime

3.00

The purpose of this course is to provide a critical and interdisciplinary examination of the relationship between justice and criminal behavior. Drawing from social psychology and criminology, this course will examine various conceptions of justice, the implications that (in)justice has for the perpetration of crime and how principles of justice operate in the criminal justice system.

In addition, this course will briefly investigate miscarriages of justice and the implications they have for offending behavior.
Prerequisite: JUST 200 and one other 200-level JUST course, excluding JUST 225.

JUST 309. Global Crime

3.00

This course explores crimes of the powerful from a global criminological perspective by examining historical and current cases of governmental, corporate and political crime. The complex relationships that will be investigated include how the interests of states, corporations and international financial institutions intersect in the commission of different types of global crimes. *Prerequisite: JUST 200 and one other 200-level JUST course, excluding JUST 225.*

JUST 311. Women, Crime and Criminal Justice

3.00

This class provides an overview of the ways in which women are involved in the phenomenon of crime--as victims, as offenders and as employees in the criminal justice system. *Prerequisite: JUST 200 and one other 200-level JUST course, excluding JUST 225.*

JUST 316. Human Development and Crime

3.00

Crosslisted with PSYC 316

This course examines how psychological research and theory shed light on the development of criminal careers, the factors that protect children and adolescents from becoming criminals, how being a victim of crime influences well-being, and the efficacy of rehabilitation. Special attention will be paid to the knowledge base on delinquency and childhood/adolescent victimization. *Prerequisite: PSYC 101; For justice studies majors, JUST 200 and one additional 200 level JUST course, excluding JUST 225.*

JUST 317. Victimization of Children

3.00

This course provides an overview of patterns, causes, and remedies for the various victimization's of children in the United States and throughout the world (abductions, child abuse, sexual exploitation, etc.). *Prerequisite: JUST 200 and one other 200 level JUST course, excluding JUST 225.*

JUST 318. Sex Offenders

3.00

This course is designed to introduce students to the issue of sex offenders in society. Students will consider sexual values in American society and how they relate to the development, thought patterns, and behavior of individuals who sexually violate others. Students will learn about theories of sex offending, the effects of sex offending on victims and society, and strategies for treating and managing sex offenders. *Prerequisite: JUST 200 and one other 200 level JUST course, excluding JUST 225.*

JUST 320. Organized Crime

3.00

This course is designed to give an overview of issues associated with Organized Crime. Organized Crime is an increasingly global phenomenon, and as such the class focuses not only on the situation in the United States, but the rest of the world as well. Attention is also given to the 'businesses' of organized crime (e.g., drug trafficking, counterfeiting), the law enforcement responses to Organized Crime, and the role/depiction of Organized Crime in popular culture. *Prerequisite: JUST 200 and one other 200 level JUST course, excluding JUST 225.*

JUST 322. Understanding Violence and Nonviolence

3.00

This course is organized around better understanding the complex dimensions of both violence and nonviolence. Is violence (sometimes) necessary? Is nonviolence naïve? Is one approach more effective than another? When? Where? Why? How are these related to justice? This course will critically examine these different approaches to dealing with social conflict and social change, with special emphasis on comparing the motivations, dynamics and outcomes of these two approaches. We will examine both theoretical and applied approaches from a wide assortment of writers and social interactions that deal with interpersonal, institutional and structural pathways to violence and/or nonviolence. The underlying assumption is that one cannot understand violence or nonviolence separately, because they are intimately connected. *Prerequisite: JUST 200 and one other 200-level JUST course, excluding JUST 225.*

JUST 323. Comparative Criminal Justice

3.00

A comparative study of criminal justice systems derived from the major world legal systems. The relevant background factors, government, laws, law enforcement, courts, corrections, youthful offenders are examined in each representative country studied. Multinational criminal justice organizations and special issues are addressed. *Prerequisite: JUST 200 and one other 200 level JUST course, excluding JUST 225.*

JUST 324. Death Penalty

3.00

This course provides students with a broad survey of the death penalty as penal sanction and the controversies and issues which surround it. Key topical areas covered are history and foundations, legal landscape, execution and death penalty processes, contemporary issues including innocence, cost, discrimination and deterrence, and perspectives and voices surrounding the death penalty. *Prerequisite: JUST 200 and one other 200 level JUST course, excluding JUST 225.*

JUST 326. Victimology

3.00

Crosslisted with SOCI 326

This course provides an overview of various perspectives (social, psychological, legal, etc.) on the experience of victimization. Explanations of the phenomenon are discussed in the context of responses to various types of victimization *Prerequisite: Justice studies majors: JUST 200 and one additional 200 level JUST course, excluding JUST 225 .*

JUST 327. Criminal Law

3.00

Study of substantive criminal law including common law sources and elements of various criminal offenses, justification and defenses. *Prerequisite: JUST 200 and one other 200 level JUST course, excluding JUST 225.*

JUST 328. Race, Class and Justice

3.00

This course provides students with an overview of contemporary justice issues in a comparative perspective. It includes an introduction to case-studies, comparative research methods and cross-national comparisons of justice issues concerning race and class. *Prerequisite: JUST 200 and one other 200 level JUST course, excluding JUST 225.*

JUST 329. Perspectives On Law

3.00

In this course, a broad array of perspectives on law and legal processes in the United States are examined. Students will examine perspectives from the realms of jurisprudence, philosophy, sociology, psychology, economics, anthropology, and literature among others and will consider the intersection of these realms with law, legal processes, legal evolution and development, and the legal professions. *Prerequisite: JUST 200 and one other 200 level JUST course, excluding JUST 225.*

JUST 330. Corrections

3.00

Crosslisted with SOWK 330

The history, philosophy, policies and problems of the treatment of violators by the police, courts and correctional institutions. *Prerequisite: JUST 200 and one other 200 level JUST course, excluding JUST 225.*

JUST 331. Human Rights in Theory and Practice

3.00

Crosslisted with POSC 331

This course will explore the nature and value of human rights by investigating some major debates over their status and meaning, and by examining some of the ways people have tried to secure human rights in practice. *Prerequisite: Open to justice studies, political science and international affairs majors only. Prerequisites for justice studies majors: JUST 200 and one other 200 level JUST course, excluding JUST 225*

JUST 334. Media and Justice

3.00

Crosslisted with SMAD 334

This course will examine media constructions of justice. Students will be required to critically analyze the portrayal of justice issues in various media forms including television, internet, and film. Attention will be given to the accuracy of such portrayals and whether they have any broader social implications in regards to how we view complex justice issues. *Prerequisite: JUST 200 and one other 200 level JUST course, excluding JUST 225 .*

JUST 339. Mapping Justice

3.00

This course examines maps and practices of mapping to analyze distributions of justice and injustice across space. Using case studies, multimedia content and hands-on exercises spanning the fields of criminal, global and social justice, students learn the fundamentals of geospatial analysis while designing their own digital maps and interactive web sites. *Prerequisite: JUST 200 and one other 200-level JUST course, excluding JUST 225.*

JUST 341. Gender and Justice

3.00

Crosslisted with WGSS 341

This course is an interdisciplinary examination of the causes, structure and consequences of gender oppression. Consistent with

the social justice track of the major, notions of fairness, justice, and equality with respect to gendered social, political and economic relations will be examined. *Prerequisite: JUST 200 and one other 200 level JUST course, excluding JUST 225.*

JUST 343. Justice and Society

3.00

This course focuses on the various intra- and interpersonal processes that underlie situations related to (in)justice at the individual and group levels. Theories, empirical research and real-world examples of social perception (e.g., prejudice and discrimination), social influence (e.g., attitudes, conformity) and social relations (e.g., altruism, aggression) related to (in)justice will be examined. *Prerequisite: JUST 200 and one other 200 level JUST course, excluding JUST 225.*

JUST 345. Restorative Justice

3.00

In this course, the restorative justice paradigm will be examined at multiple levels including consideration in the international, local community, and criminal justice contexts. Both the underlying principles and practical applications of restorative justice will be explored. The related concept of community justice will also be addressed. *Prerequisite: JUST 200 and one other 200 level JUST course, excluding JUST 225.*

JUST 350. Justice and Globalization

3.00

Globalization is the phenomenon of interconnectedness of economic, political and cultural activities across different parts of the globe. The class will survey several aspects of globalization through the lens of justice and injustice. Class time will be devoted to discussion and student presentations. *Prerequisite: JUST 200 and one other 200 level JUST course, excluding JUST 225.*

JUST 351. Building Democracy

3.00

This course will review historic and modern transitions to democracy, explore democracy as a 'just' form of government, examine correlates with its strengths and weaknesses, and provide an overview on how to build a quality democracy. *Prerequisite: JUST 200 and one track foundation course.*

JUST 352. Global Migration

3.00

This course surveys human migration across the Earth, throughout history, and in relation to justice. Students analyze interdisciplinary academic literature on migration, settlement and diasporas while studying flows of people across various historical, geographical and political contexts, from prehistoric to contemporary and from global to local. *Prerequisite: JUST 200 and one other 200-level JUST course, excluding JUST 225.*

JUST 353. Justice and Development

3.00

This course examines introduces the concept of justice as a standard for evaluating strategies for political, economic and social development in the contemporary international system. *Prerequisite: JUST 200 and one other 200 level JUST course, excluding JUST 225.*

JUST 354. Native Justice and Resistance

3.00

This course covers a wide array of topics relevant to the world's indigenous peoples including shared injustices and grievances, methods indigenous groups have taken to overcome justice inequalities, complexities of dual justice systems and the decolonization of legal and social systems. *Prerequisite: JUST 200 and one other 200-level JUST course.*

JUST 355. Solutions to Global Poverty

3.00

This course will analyze the root causes of global poverty and critically examine a range of approaches designed to improve conditions for the world's poor. Topics include nutrition and agriculture, healthcare, education, gender equality, water and sanitation, environmental management, and microfinance. Throughout the course, students will read policy documents, work with poverty-related data and analyze a variety of real-world case studies to illustrate key ideas. *Prerequisite: JUST 200 and one other 200-level JUST class excluding JUST 225.*

JUST 356. Refugees and Humanitarian Response

3.00

This course will examine the practical and ethical challenges facing refugees and humanitarian actors in the contemporary world. We will survey the causes of forced migration, explore global trends in displacement and humanitarian aid and analyze the laws and institutions that facilitate (or inhibit) refugee protection. We will consider the challenges that refugees face throughout their journey, from border crossings, to refugee camps, to resettlement communities, as well as the practical and ethical tradeoffs that humanitarian actors must weigh in providing assistance and protection. The course will include a community engagement component related to refugee resettlement in Harrisonburg. *Prerequisite: JUST 200 and one other 200-level JUST course, excluding JUST 225.*

JUST 357. Environmental Justice

3.00

This course provides students with an interdisciplinary introduction to environmental justice. Emphasizing how contemporary environmental issues are profoundly rooted in social, political, and economic conditions, students will apply principles and conceptions of justice to ecological challenges and sustainability efforts in local, national, and global contexts. *Prerequisite: JUST 200 and one other 200 level JUST course, excluding JUST 225.*

JUST 361. Terrorism

3.00

This course is a survey of the evolution of the phenomenon of terrorism and an analysis of its causes, strategies and forms. This course also discusses the consequences of terrorism in terms of government responses to terrorist threats (homeland security and counter-terrorism) and the economic and political costs of such responses. An interdisciplinary approach linking history, sociology, criminology and political science is used to make sense of this multifaceted phenomenon. *Prerequisite: JUST 200 and one other 200 level JUST course, excluding JUST 225.*

JUST 365. Justice in Literature, Film and Art

3.00

This class provides an opportunity for students to consider the ways in which issues related to the Justice fields are expressed in literature, film, and/or art and the ways in which such media may influence or create our conceptions of justice. *Prerequisite: JUST 200 and one other 200 level JUST course, excluding JUST 225.*

JUST 372. Ethics and International Politics

3.00

Crosslisted with POSC 372

This course investigates the significance of ethical questions in the theory and practice of contemporary international politics, introducing a variety of normative approaches that shape the issues of peace and conflict, morality and justice in global affairs. Practical case studies will also be used to address issues of policy relevance, with particular attention paid to the American experience. *Prerequisite: JUST, INTA and POSC majors only; JUST majors must have completed JUST 235 .*

JUST 373. Rebuilding Post Conflict Societies

3.00

This course examines the social, economic, security and political problems faced in rebuilding societies that are emerging from a period of intense and prolonged conflict. This course presents an overview of the scope of this multidimensional challenge as well as strategies that have been used to address them. In the course of doing so, evaluation standards are discussed that can be used to measure the success, failure and justness of the newly emerging political system. *Prerequisite: JUST 200 and one other 200-level JUST course, excluding JUST 225.*

JUST 374. War and Justice

3.00

Crosslisted with POSC 374

This course is an empirical and normative investigation of the relationship between war and justice. Empirically, it examines the causes of war and the ways in which wars end. From a normative perspective it raises the questions of when are wars just; how should a just war be fought; and what is a just peace. *Prerequisite: JUST 200 and one other 200 level JUST course, excluding JUST 225.*

JUST 375. Genocide in the 20th Century

3.00

This course is an interdisciplinary examination of the various definitions, causes, structure and consequences of genocide. We will study some of the major 20th century genocides (Indigenous peoples, Armenia, USSR, Jewish Holocaust, Cambodia, Bosnia/Kosovo, Rwanda, and Darfur) using the following conceptual schemes: social death, structural violence, oppression, and mass murder. *Prerequisite: JUST 200 and one other 200 level JUST course, excluding JUST 225.*

JUST 376. Global Social Movements

3.00

This course introduces justice studies students to the origins, development and outcomes of global social movements. It involves a comprehensive approach, which entails an in-depth examination of the main theories explaining the rise of social movements, as well as an empirical focus on global dynamics of popular mobilization. Special attention will be devoted to the examination of the global justice movement. *Prerequisite: JUST 200 and one other 200-level JUST course, excluding JUST 225.*

JUST 377. Global Futures

3.00

Explores possible future directions that the global system may take in selected issue areas such as energy, democratization, food supplies, and infectious diseases. Emphasis is on active learning strategies, introducing the analytical tools used for analysis of international trends and addressing questions of how to respond in a manner that promotes global justice. *Prerequisite: JUST 200 and one other 200 level JUST course, excluding JUST 225.*

JUST 385. Disability and Justice

3.00

An interdisciplinary exploration of justice & disability which examines issues such as the historical and theoretical contexts of disability, the social and rhetorical construction of disability, disability legislation and public policy, disability and the criminal justice system, and disability rights movements and inclusion as they relate to larger civil and human rights movements in the US & globally. The course highlights the importance of disability in broader conversations about justice. *Prerequisite: JUST 200 and one other 200 level JUST course, excluding JUST 225.*

JUST 386. Sexual Orientation and Social Policy

3.00

The concept of sexual orientation is a relatively recent development in academic, legal, medical and other social policy contexts in the U.S. and globally. This course surveys key social policies pertaining to sexual orientation and examines relevant research from multiple disciplines and appeals to classical and contemporary conceptions of justice that shape public debates and policy decisions. *Prerequisite: JUST 200 and one other 200-level JUST course, not including JUST 225.*

JUST 392. Peace Studies

3.00

Crosslisted with POSC 392

A study of the evolution, theory and practice of peace studies. The course focuses on how we wage and resolve conflict, how we effect social change and how we provide for security through nonviolent means. *Prerequisite: JUST 200 and one other 200-level JUST course.*

JUST 399. Justice Research Methods

4.00

This course provides students with the tools necessary for conducting independent research in the area of Justice Studies. Both quantitative and qualitative methods are covered. A term project, in which the skills covered in the course are applied, is a significant part of the class. *Prerequisite: JUST 200, one other 200 level JUST course, excluding JUST 225 and MATH 220 .*

JUST 400. Senior Seminar in Justice Studies

3.00

This is the capstone course of the Justice Studies major. Students are expected to enter JUST 400 with a proposed area of study, and will spend the semester in developing a thesis. Class discussion and review of individual projects, along with oral presentation of work, are integral parts of the course. Students are expected to produce a piece of original scholarship related to their study in the major. *Prerequisite: JUST 200, JUST 399 and senior JUST major.*

JUST 401. Internship in Justice Studies

4.00

This course allows students to receive academic credit for work experience in an agency or organization related to the Justice Studies major. Students should consult the Justice Studies director for assistance in arranging approved internships. *Prerequisite: JUST 200, JUST 399 or permission of instructor.*

JUST 402. Advanced Research in Justice Studies

3.00

This course is designed to give students a context in which to pursue advanced research in a Justice Studies context. It is especially appropriate for students interested in graduate study in the field. *Prerequisite: JUST 200, JUST 399 or permission of instructor.*

JUST 403. Nelson Institute Seminar

3.00

Students enrolled in this course will be assigned to consider a contemporary problem Justice Studies. Working individually and in teams, students will first study the problem, and then propose workable solutions. *Prerequisite: Junior or Senior Standing Only*

JUST 404. Practicum in Community-Based Research

3.00

This course provides students with an intensive, collaborative community-based research experience working in partnership with a community organization or group. Students will integrate and apply principles and conceptions of justice and methods of scholarly inquiry to a community-identified problem. This course may be taken only once for credit. *Prerequisite: JUST 200, JUST 399 or permission of instructor.*

JUST 405. Research Assistantship in Justice Studies

1.00-3.00

A student registered for JUST 405 will work as a research assistant under faculty supervision. This course does not count toward meeting any core or elective requirements in the justice studies major. Students may take this course only by invitation from a faculty member in justice studies and may register for this course only through departmental approval. No student may take more than three credits of JUST 405.

Prerequisite: JUST 200 and two other 200-level JUST courses, excluding JUST 225; one 300-level JUST course; invitation of the instructor; and permission of the department head.

JUST 499. Honors

1.00 - 3.00

Year course. An independent research topic initiated and completed by qualified majors wishing to graduate with distinction.

KIN 100. Lifetime Fitness & Wellness (2,2) [C5W]

3.00

This course is designed to help students adopt and maintain the behaviors associated with an active and healthy lifestyle. Through this course students will learn the importance of maintaining wellness through a physically active lifestyle. Through lectures and labs, students study and develop the behavioral patterns consistent with the current knowledge base in fitness and wellness. May be used for general education credit.

KIN 121. Flying Disc Sports

1.00

This class will focus on various flying disc sports and activities. Participants will learn the skills and techniques, such as basic frisbee, freestyle frisbee, ultimate frisbee and disc golf, as well as the etiquette and rules of each activity.

KIN 122. Road Cycling

1.00

The following courses provide basic instruction in the activities listed: 122, road cycling; 124, experiential adventure education; 125, tennis; 126, golf; 128, fencing; 129, badminton; 131, skiing; 133, bowling; 138, racquetball; 139, river canoeing; 140, swimming; 145, conditioning; 148, jogging; and 149, aerobic dance.

KIN 123. Mountain Cycling

1.00

KIN 124. Basic Rock Climbing and Experiential Activities

1.00

KIN 125. Basic Tennis

1.00

KIN 126. Basic Golf

1.00

KIN 138. Racquetball

1.00

Elementary level in specific individual sports: 122, cycling; 125, tennis; 126, golf; 127, archery; 128, fencing; 129, badminton; 131, skiing; 133, bowling; 138, racquetball.

KIN 149. Group Fitness

1.00

Development and maintenance of cardiovascular and physical fitness through selected dance routines.

KIN 151. Swim Conditioning

1.00

The following courses provide intermediate instruction in the activities listed: 151, swim conditioning; 152, lifesaving/lifeguarding; 156, scuba and skin diving; 161, intermediate skiing; 162, intermediate swimming; 163, intermediate tennis.

KIN 152. Lifesaving/Lifeguarding

1.00

KIN 156. Scuba and Skin Diving

1.00

KIN 157. Self-Defense for Women

1.00

This course is designed to teach the basic principles and techniques of self-defense. Class time will be divided into both skill acquisition and discussions concerning safety and ways to avoid potentially dangerous situations.

KIN 159. Basic Aerobic Kickboxing

1.00

KIN 162. Intermediate Swimming

1.00

KIN 170. Fitness Instructor Training

1.00

The Fitness Instructor Training course gives the student the opportunity to obtain the basic skills and knowledge necessary to facilitate fitness related activities and programming. Lecture topics include the components of physical fitness, fitness assessment, muscular anatomy, exercise programming and nutrition. Each class will contain a lecture and practical component.

KIN 171. Basic Group Fitness Instructor Training

1.00

Basic Group Fitness Instructor Training is designed to help the student lead a full group exercise class. Students will be given exercise/health/fitness information via lectures, handouts, assignments, and practical experience.

KIN 172. Group Fitness Instructor Training Mind Body

1.00

Group Fitness Instructor Training is designed to help the student experience the basics of Yoga and Pilates and develop basic instructional skills for these two areas. Standards taught in the course correspond to national standards and certifications. Students will be given exercise/health/fitness information via lectures, handouts, assignments, and practical experience.

KIN 173. Intro to Adventure Trip Leading

1.00

To explore basic aspects of adventure trip leading which include planning and logistics, risk management, leadership styles, teaching techniques and basic adventure activity skills.

KIN 175. Wilderness First Aid

1.00

The course Wilderness First Aid course focuses on the basic skills of: Response and Assessment, Musculoskeletal Injuries, Environmental Emergencies, Survival Skills, Soft Tissue Injuries, and Medical Emergencies.

KIN 179. Volleyball

1.00

KIN 190. Basic Sports Officiating

1.00

This course will teach the fundamentals and skills necessary for officiating sports (football, basketball, softball or soccer) at any level. It will also focus on developing an officiating philosophy, understanding the psychology of officiating, being physically prepared to officiate, understanding the responsibilities of officiating and knowing how and where to work as an official.

KIN 199. New Directions in Kinesiology and Recreation

1.00 - 3.00

In-depth exploration of topics significant in Kinesiology and Recreation. The topic for each semester will be announced on MyMadison.

KIN 201. Intro to Kinesiology & Recreation

2.00

Students are introduced to the discipline of kinesiology and recreation. They will study the effects of physical activity on human beings; survey the subdisciplines, including exercise physiology, biomechanics, motor behavior and sociological, historical and philosophical perspectives; and discuss how the discipline can be applied professionally.

KIN 202. Biological Foundations of Kinesiology & Recreation

3.00

Introduction to the biological scientific foundations within the disciplines of kinesiology and recreation. Includes applied anatomy and physiology, biomechanics and exercise physiology.

KIN 211-218. Coaching Techniques

2.00

The following courses provide motor skills, strategy, rules and officiating techniques in the activities listed: 211, team; 212, track and field; 213, soccer; 214, football; 215, basketball; 216, individual; 217, volleyball; 218, softball.

KIN 217. Coaching Techniques of Volleyball

2.00

This course provides motor skills, strategy, rules and officiating techniques in volleyball.

KIN 221. Skill Laboratory: Rhythmic and Dance Activities

2.00

The skill laboratories are designed for participants who will be in the role of educating others in a particular area of movement. The skill laboratory, Rhythmic & Dance Activities, provides a) basic movement skills, b) analysis of movement, c) developmentally appropriate progressions & teaching ideas, d) curriculum development and e) micro-teaching opportunities.

KIN 222. Skill Laboratory: Teaching Fitness & Wellness in Schools

2.00 - 10.00

The skill laboratories are designed for participants who will be in a role of educating others in a particular area of movement. The skill laboratory, Teaching Fitness & Wellness in the Schools, provides a) basic movement skills, b) analysis of movement, c) developmentally appropriate progressions & teaching ideas, d) curriculum development, and e) micro-teaching opportunities.

KIN 223. "Skill Laboratory: Individual & Lifetime Activities

2.00 - 10.00

The skill laboratories are designed for participants who will be in a role of educating others in a particular area of movement. The skill laboratory, Individual & Lifetime Activities, provides: a) basic movement skills, b) analysis of movement, c) developmentally appropriate progressions & teaching ideas, d) curriculum development, and e) micro-teaching opportunities.

KIN 224. Skill Laboratory: Court & Field Games

2.00

The skills laboratories are designed for participants who will be in a role of educating others in a particular area of movement. The skill laboratory, Court & Field Games, provides: a) basic movement skills, b) analysis of movement, c) developmentally appropriate progressions & teaching ideas, d) curriculum development, and e) micro-teaching opportunities.

KIN 225. Skill Laboratory: Wilderness & Adventure Education

2.00 - 10.00

The skill laboratories are designed for participants who will be in a role of educating others in a particular area of movement. The skill laboratory, Wilderness & Adventure Education, provides: a) basic movement skills, b) analysis of movement, c) developmentally appropriate progressions & teaching ideas, d) curriculum development, and e) micro-teaching opportunities.

KIN 241. Introduction to Sport and Recreation Management

3.00

Crosslisted with SRM 241

Introduces the sport and recreation management professions in governmental, voluntary, private, public, and commercial settings. Outlines development of sport and recreation and the evolution of the mega-leisure industry. Overviews professional preparation in sport and recreation management. *Prerequisite: Prerequisite: SRM 201 or permission of director.*

KIN 242. Introduction to Sport Communication

3.00

This class provides a foundation for students who are pursuing a minor in Sport Communication. The course provides an overview about information management and how it applies to the professional sporting industry. Students will learn about careers in sport information, how an organization communicates with the media and its constituents, and how communication in sport has evolved and continues to evolve.

KIN 243. Sport Communication Techniques: Broadcasting

3.00

Crosslisted with SMAD 243

Study and practice of broadcast and A/V techniques applied in a variety of sport settings. *Prerequisite: KIN 242 .*

KIN 244. Sport Communication Techniques: Writing and Reporting

3.00

Crosslisted with SMAD 244

Basic skills of sport writing and reporting are studied and applied. Students gain experience in a variety of sports and learn and apply skills in researching, interviewing, reporting, writing columns and features involving the world of sports.

Prerequisite: KIN 242 .

KIN 302. Exercise Physiology

3.00

This course is designed to help the student explore and understand the physiological changes that occur during an acute bout of exercise and as a result of chronic physical training. Students will study the role various (e.g. cardiovascular, respiratory, nervous, neuro-endocrine, and renal etc.) systems play in maintaining homeostasis during physical activity. In addition, the physiology of physical performance under a range of environmental conditions will also be examined. *Prerequisite:* KIN 202 and BIO 270 or BIO 370. *Corequisite:* KIN 302L.

KIN 302L. Exercise Physiology Laboratory

1.00

Laboratory experiences in exercise physiology. This course must be taken concurrently with KIN 302. *Corequisite:* KIN 302.

KIN 303. Motor Development & Learning

3.00

This course provides understanding of motor development from early childhood through adulthood. The focus is on the constraints to development and the interaction between the environment, task and learner. The course provides an understanding of the learning processes underlying performance. Emphasis is given to the application in both teaching and coaching settings.

KIN 304. History and Philosophy of Physical Education and Sport

2.00

Introductory analysis of various theoretical approaches to the discipline of physical education fitness and sport; brief historical study of the development of school programs and sport; and debates on current professional issues.

KIN 305. Social/Psychological Foundations in Kinesiology

3.00

The focus of this course is on exploring psychological concepts related to participation and performance in sport and exercise contexts. Additionally, knowledge from the related discipline of motor learning will be integrated to explore psychological aspects of the learning process that take place in these domains. *Prerequisite:* KIN 302 & KIN 302L .

KIN 306. Human Biomechanics

3.00

Studies of anatomical, physical and mechanical factors, as these factors affect human movement. This course must be taken concurrently with KIN 306L. *Prerequisite:* BIO 290 and KIN 202. *Corequisite:* KIN 306L.

KIN 306L. Human Biomechanics Laboratory

1.00

This laboratory course is designed to complement and supplement the lecture course KIN 306. The course will focus on enhancing the student's laboratory experiences in biomechanics. This course must be taken concurrently with KIN 306.

Corequisite: KIN 306.

KIN 309. School Health Content

3.00

An overview of select topics in health education content necessary to implement a comprehensive health education program, geared toward child and adolescent populations.

KIN 310. Instructional Methods in Physical Education

3.00

Students will apply the affective, cognitive and psychomotor principles in class management, unit and lesson planning, and instructional techniques. This course introduces students to effective teaching strategies and allows application through peer microteaching and teaching students in a school setting. Principles of self-evaluation and reflective teaching are reinforced. Prerequisite: Acceptance to the PETE program. *Prerequisite: Acceptance to the PHETE program. Corequisite: KIN 311.*

KIN 311. Elementary Curriculum in Physical Education

2.00

Theory and application of games, dance and gymnastic activities compatible with the developmental characteristics of elementary children and the educational objectives of the elementary school. *Prerequisite: Acceptance to the PHETE program. Corequisite: KIN 310.*

KIN 312. The Profession of Teaching Health & Physical Education

2.00

Introductory study of the roles of the teacher and the learner and the pedagogical content knowledge of health and physical education. An in-depth examination of the unique position and qualifications of the specialist in physical education and health. Systematic observations will occur.

KIN 313. Adapted Physical Education

3.00

Principles and procedures for adapting elementary physical education programs for students with physical, emotional and mental limitations. Laboratory experience included. *Prerequisite: Acceptance to teacher education. Corequisite: KIN 310.*

KIN 314. Assessment in Elementary Physical Education

3.00

Introductory study of developmentally appropriate authentic and formal assessment techniques unique to elementary physical education. *Prerequisite: Admission to student teaching.*

KIN 321. Principles of Health Fitness Assessment

3.00

Emphasizes the skills in conducting various health and fitness tests for assessing the five areas of health-related physical fitness (body composition, cardiorespiratory fitness, muscular strength, muscular endurance and flexibility). Interpretation of the test results will also be reviewed. This course must be taken concurrently with *KIN 321L*.

Prerequisite: KIN 202. Corequisite: KIN 321L.

KIN 322. Fundamentals of Exercise Prescription

3.00

Emphasizes the knowledge and skills necessary to effectively develop and implement an appropriate exercise prescription for improving health-related physical fitness for apparently healthy adults. *Prerequisite: KIN 321 and KIN 321L*

KIN 325. Kinesiology Honors Research Prep

3.00

This course is designed to provide Honors Students (Tracks 1, 2 & 3) with insight into the research carried out by current Kinesiology faculty members prior to enrolling in KIN 499A. Students will identify a research topic suitable for their Honors Thesis, gain insight into the application of the scientific method in Kinesiology research, and interact with Kinesiology faculty members and students actively involved in the research process. The course is by permission only.

KIN 329. Social Aspects of Sport

3.00

This class is designed to familiarize students with the concepts of sport as they relate to individuals and the larger society in which they live and the ways in which this relationship is reciprocal, with both people impacting the world of sport and sport impacting individual, social, cultural, economic and political developments. Students learn the tools needed to think in a critical way about sports in society and make informed choices about sports and participation.

KIN 353. Maximizing Sports Performance

3.00

This course explores current sport psychology theories, models and concepts as they relate to sport behavior and performance. Students examine the theoretical basis of cognitive sport skills and apply the information to the sport environment. No prerequisites.

KIN 407. Biomechanics for the Healthcare Professional

3.00

Crosslisted with HTH 441

This course is designed to introduce the student to a variety of biomechanical concepts and applications as related to the health professions. Specific attention will be given to the biomechanical aspects of the musculoskeletal system. *Prerequisite: BIO 290.*

KIN 410. School Health Content for PHETE

3.00

An overview of selected topics in health content required for teacher candidates preparing to teach health education in public schools. Special emphasis will be on issues relevant to teaching those topics in schools. *Prerequisite: KIN 309*

KIN 411. Measurement and Evaluation in Kinesiology

3.00

The administration and interpretation of measurement and evaluation procedures in kinesiology and recreation.

KIN 422. Advanced Principles of Group Exercise Leadership

3.00

Theories, principles and procedures involved with leading group fitness classes. Students will gain knowledge and experience in

class design and choreography development. Programming for children, older adults, pregnancy and aquatic exercise will be included. Practical and written assessments will occur throughout the semester. Participation in group exercise classes is a requirement. Students will have the opportunity to enroll in the AFAA Primary Group Exercise Certification. *Prerequisite: KIN 100, KIN 202, or permission of the instructor.*

KIN 424. Exercise and Nutrition in Chronic Disease

3.00

Crosslisted with NUTR 455

This interdisciplinary course examines the evidencebased relationship between exercise and diet patterns and behaviors, and major chronic diseases. Students will understand the epidemiology and pathogenesis of prevailing chronic diseases. Emphasis will be placed on developing exercise and dietary strategies to reduce the burden of chronic disease. *Prerequisite: KIN 302, KIN 321, KIN 322*

KIN 425. Concepts of Strength and Conditioning

3.00

Theory and application of coaching concepts in strength/conditioning training including program design, testing and specific techniques for the physical development of athletes. Designed for students interested in working with athletic populations, this course also prepares students for NSCA certification. *Prerequisite: KIN 100 or HTH 100 and KIN 202.*

KIN 426. Physical Activity Behaviors

3.00

This course will focus on the theoretical and practical applications of behavior change related to healthy lifestyles with an emphasis on physical activity. In addition, course content will include a detailed investigation into the psychological and environmental factors associated with adoption and maintenance of healthy behaviors including a regular physical activity program. *Prerequisite: Senior Standing*

KIN 428. Advanced Topics in Exercise Science and Leadership

3.00

This course is designed to allow students to study specific topics in exercise science and leadership. Topics will be chosen each semester and reflect current research in exercise science related to clinical exercise physiology, human performance and methodologies or trends in exercise science/leadership. May be repeated once (maximum 6 credits) for credit when course content changes. *Prerequisite: KIN 302 and KIN 302L .*

KIN 429. Special Topics in Adapted Physical Education

3.00

This course provides an in depth look into specific areas within the field of adapted physical education and adapted physical activity. This application-based course provides hands-on experiences that will allow students to work with individuals with disabilities in a variety of settings. Graduate students will also be asked to analyze and provide feedback on the instructional behaviors of the undergraduate student instructors.

KIN 430. Exercise Across the Lifespan

3.00

An advanced course in exercise science that examines aspects of physical activity and exercise as they relate to specific phases of

the human lifespan. This course will address the importance of physical activity for children, pregnant women, and older adults and will include an in-depth study of aspects of exercise physiology that are unique to these populations.

KIN 431. Environmental Exercise Physiology

3.00

An advanced course in exercise physiology that examines how human physiological systems respond and adapt to exercise performed in challenging environmental conditions (i.e. high altitude, diving, hot, cold). *Prerequisite: KIN 302 & KIN 302L.*

KIN 432. Physiology of Endurance Performance

3.00

This course aims to provide students with an understanding of how to utilize endurance training to maximize athletic performance. Various factors that limit endurance performance and examine methods to overcome these factors will be explored. Emphasis will be placed on the role of seasonal periodization and program planning to maximize the long-term development of athletes. Supplemental factors that may also aid performance, such as equipment, nutrition, and ergogenic aids will be discussed. *Prerequisite: KIN 302 & KIN 302L*

KIN 433. Exercise, Cardiovascular Disease and ECG Assessment

3.00

This course is designed to provide students with a foundational information related to electrocardiography, diagnostic exercise testing and the effects of exercise on specific cardiovascular diseases. *Prerequisite: KIN 302 & KIN 321L*

KIN 450. Principles of Coaching

3.00

Concepts, competencies and principles of coaching as they relate to sports in general. Includes the personal and professional responsibilities of a coach.

KIN 471. Practicum in Exercise Science and Leadership

3.00

A sequence of selected practicum experiences in Exercise Science and Leadership, which provide the student with supervised practicum experience. May be repeated in different settings. *Prerequisite: KIN 302. Corequisite: KIN 302.*

KIN 473. Practicum in Coaching

3.00

A sequence of selected practicum experiences in coaching, which provides the student with supervised practicum experience.

KIN 474. Practicum in Sport Communications

3.00

A sequence of selected practicum experiences which provides the student with supervised practicum experience in Sport Communications.

KIN 480. Student Teaching in Physical Education

8.00

A supervised teaching experience at the elementary school setting that provides teacher candidates with opportunities to experience the classroom environment, grow professionally, and develop their pedagogical skills. *Prerequisite: Acceptance into student teaching.*

KIN 481. Internship in Exercise Science and Leadership

4.00 - 12.00

A full-time professional experience in Exercise & Leadership, which affords the opportunity to apply theory and methodology under qualified supervision from the cooperating agency and the university. *Prerequisite: Successful completion of all professional courses. Prerequisite: Successful Completion of All Professional Courses (KIN 100, KIN 202, BIO 270, BIO 290, and CHEM 131).*

KIN 490. Special Studies in Kinesiology and Recreation

1.00 - 3.00

Designed to give superior students in physical education an opportunity to complete independent study and/or research under faculty supervision. *Prerequisite: Permission of the department head.*

KIN 499A. Honors

1.00

KIN 499B. Honors

3.00

KIN 499C. Honors

2.00

KOR 101. Elementary Korean I

3.00 - 4.00

The fundamentals of Korean through listening, speaking, reading, and writing. Practice in pronunciation and development of comprehension. One hour's work a week in the language lab. If student has had two or more years of the language in high school he/she will not receive credit for the course.

KOR 102. Elementary Korean II

3.00 - 4.00

The fundamentals of Korean through listening, speaking, reading, and writing. Practice in pronunciation and development of comprehension. One hour's work a week in the language lab. If student has had two or more years of the language in high school he/she will receive credit for the course. *Prerequisite: KOR 101 or permission of the instructor.*

KOR 231. Intermediate Korean I

3.00

A thorough review of grammar, vocabulary building, conversation, composition, and reading. A student cannot earn credit for KOR 231 after completing KOR 232. *Prerequisite: KOR 102 or permission of the instructor.*

KOR 232. Intermediate Korean II

3.00

A thorough review of grammar, vocabulary building, conversation, composition, and reading. *Prerequisite: KOR 231 or permission of instructor.*

KOR 300. Korean Grammar and Communication

3.00

Intensive training in grammatical structures and their application to oral and written communication. Instruction is in Korean. Fulfills the College of Arts and Letters writing-intensive requirement for possible International Affairs majors and/or IBUS majors. *Prerequisite: KOR 232.*

KOR 320. Korean Oral and Written Communication

3.00

Intensive training in the use of modern, everyday Korean with emphasis on conversation and composition. Readings in Korean will provide a context for discussion and writing. Instruction is in Korean. *Prerequisite: KOR 300.*

KOR 446. Special Topics in Korean Literature

3.00

Study of a particular topic in Korean literature. It may cover all or a specific Korean literature genre. Course may be repeated if content varies. *Prerequisite: KOR 300 or permission of the instructor.*

KOR 447. Special Topics in Korean Civilization

3.00

Students will study a particular topic in the civilization and/or culture of Korea. Course may be repeated if content varies. *Prerequisite: KOR 300 or permission of the instructor.*

KOR 448. Special Topics in Korean Linguistics

3.00

Students will study a particular topic in Korean linguistics. Topics could include an introduction to Korean sociolinguistics or psycholinguistics. Course may be repeated if content varies. *Prerequisite: KOR 300.*

KOR 490. Special Studies in Korean

1.00 - 4.00

Special topics or independent studies in Korean.

LAT 101. Elementary Latin I

3.00 - 4.00

An introductory course for students who intend to acquire only a reading knowledge of classical and medieval Latin. Systematic study of the fundamentals of grammar. If student has had two or more years of the language in high school he/she will not receive credit for the course.

LAT 102. Elementary Latin II

3.00 - 4.00

An introductory course for students who intend to acquire only a reading knowledge of classical and medieval Latin. Systematic study of the fundamentals of grammar. If student has had two or more years of the language in high school he/she will not receive credit for the course. *Prerequisite: LAT 101.*

LAT 231. Intermediate Latin I

3.00

An introduction to Latin literature. The further study of Latin grammar and the elements of Latin prosody are also presented. A student cannot earn credit for LAT 231 after completing LAT 232. *Prerequisite: LAT 102 or permission of the instructor.*

LAT 232. Intermediate Latin II

3.00

An introduction to Latin literature. The further study of Latin grammar and the elements of Latin prosody are also presented. *Prerequisite: LAT 231 or permission of instructor.*

LAT 490. Special Studies in Latin

1.00 - 4.00

LACS 299. Internship in Latin American, Latinx and Caribbean Studies

1.00-3.00

Provides Latin American, Latinx and Caribbean Studies minors with work experience in career fields they are interested in pursuing. A journal, internship report, research paper, bibliography and evaluation from the intern provider are required. May count as an elective for the LACS minor. *Prerequisite: Approval of the LACS minor coordinator.*

LACS 490. Independent Study in Latin American, Latinx and Caribbean Studies

3.00

Designed to give capable students in Latin American, Latinx and Caribbean Studies an opportunity to complete independent study under faculty supervision. *Prerequisite: Admission by recommendation of the instructor and permission of the program coordinator.*

LACS 495. Special Topics in Latin American, Latinx and Caribbean Studies

3.00

In-depth examination of selected topics of current importance to the field of Latin American, Latinx and Caribbean Studies. May be repeated for credit when course content changes. *Prerequisite: Permission of the program coordinator required.*

LTLE 150. Information in Contemporary Society

3.00

Concerns the individual's need for information, especially that which will assist in solving problems related to everyday needs and interests and with the agencies and resources which can help to meet those needs. Will not count as social science course for teacher licensure.

LTLE 332. Video Production

1.00

A basic understanding of the principles of video equipment along with skills in the use, set up and operation of editing applications.

LTLE 370. Instructional Technology

3.00

Principles and procedures of a teaching/learning process designed to provide reliable, effective instruction to learners through systematic application of instructional technology. Includes selecting, producing, evaluating and utilizing nonprint media and equipment for application to instructional process.

LTLE 372. Visual Literacy

3.00

This foundational course will cultivate the ability to evaluate and create conceptual visual representations. Students will practice the necessary critical attitude, principles, tools and feedback to develop their own high-quality graphics for learning and performance. Topics also include the impact of visual literacy on the learning process related to instructional design, instructional technology, and information presentation.

LTLE 374. Photography for Learning

1.00

Students will develop a basic understanding of the principles of photography, including the use of related digital equipment and the 35mm SLR camera. Note: All needed equipment will be supplied.

LTLE 376. Video for Learning

1.00

Students will develop an intermediate understanding of the principles of instructional video design, production, and post-production editing including the use of related hardware and software. Note: All needed equipment will be supplied.

LTLE 377. Augmented/Virtual Reality and 360 Media: Innovation in Immersive Technology for Education

3.00

This course is an applied exploration of immersive technology, focused on applications to training and education. Virtual, augmented, mixed reality, 360° media, 3D scanners and other emerging related technology will be covered. The course is intended for novices to the field of AR/VR and immersive media production. Students will develop unique applications, media and more through interdisciplinary team-based projects for real clients, focused on areas of immersive technology in education.

LTLE 378. Web Design for Learning

1.00

Students will develop an intermediate understanding of the principles of Web site design including the use of html and design templates. Note: Server space will be provided for one semester. Students may move their Web sites to another server space afterward.

LTLE 385. Foundations of Instructional Design

3.00

The purpose of this course is to apply instructional theory to the creation of instructionally sound education programs and materials.

LTLE 490. Special Study in Ltle

1.00 - 3.00

Designed to provide in-depth and up-to-date exposure to the topics/issues pertinent to human resource development and allow students to explore topics of special interest in human resource development. *Prerequisite: Permission of the instructor.*

LED 240. Children's Literature

3.00

The study of a variety of children's literature and the practices, principles and procedures for selecting and evaluating works for children, giving consideration to their motivational and developmental effects. *Prerequisite: Completion of Cluster One.*

LED 254. Literature for Adolescents

3.00

A study of literature which has been written for or appeals to young adults and adolescents, including practices, principles and procedures for evaluating and making literary materials appealing to adolescents. *Prerequisite: Completion of Cluster One.*

LED 300. Reading Instruction and Assessment for Diverse Learners PK-6

3.00

This course will provide PK-6 preservice teachers with the foundations of reading development, assessment techniques, and instructional strategies. This course in combination with LED 350 and LED 462 comprise the literacy instruction for prospective elementary education teachers. *Prerequisite: Accepted to teacher education.*

LED 312. Foundations of Literacy for Middle School Teachers

3.00

This course serves as a starting point for learning about teaching middle school students. It assists future teachers in developing knowledge of literacy and how to form relationships with middle school adolescents, serving as an introduction for preservice teachers to the foundations of reading and writing development and the elements of balanced literacy instruction in the middle grades. Through reading, writing and field applications across content areas, preservice teachers explore literacy engagement and diversity. *Corequisite: MIED 311 for middle education majors.*

LED 350. Writing Instruction, Assessment and Technology for Diverse Learners PK-6

3.00

This course involves instruction and discussion of the writing process, development and assessment. This course, in combination

with LED 300 and LED 462, comprise the literacy instruction for prospective elementary education teachers. *Prerequisite:* Accepted to teacher education.

LED 355. Inclusive Early Literacy Development and Acquisition

3.00

This is the first course in a two-course sequence designed to provide pre-service inclusive early childhood teachers with the foundation of literacy development for children, as well as instruction to support and enhance the emergence and continued development of literacy learning. *Prerequisite:* IECE 303.

LED 366. Early Literacy Development and Acquisition

3.00

This course will provide preservice teachers with an understanding of the foundations of early literacy development, and instructional strategies and assessment techniques which support the acquisition of literacy. *Prerequisite:* Teacher Ed Program 02 Flag

LED 401. Problems in Literacy Education

3.00

Considers current problems and issues in reading education as these problems and issues relate to the professional education of preservice teachers. *Prerequisite:* Permission from the coordinator of the program where the student is enrolled. *Prerequisite:* Teacher Ed Program 02 Flag

LED 420. Content Area Literacy, K-12

2.00

This course is designed for preservice teachers and will provide an introduction to the foundations of reading and balanced literacy instruction for students in kindergarten through grade 12. Through reading and writing across content areas, preservice teachers will explore literacy engagement, diversity and special needs. *Prerequisite:* Teacher Educ 01

LED 430. Development, Assessment and Instruction of Literacy: K-12

3.00

This course is designed to provide preservice teachers with a foundation of literacy development, instructional strategies and assessment techniques which support the acquisition and development of literacy in diverse classrooms across the curriculum in grades K-12.

LED 435. Literacy Development and Instruction for English Language Learners

3.00

Prepares for literacy instruction of English Language Learners beyond the emergent stage. Content includes assessment and instruction, particularly comprehension instruction for individuals, small groups, and whole class instruction. Students examine heterogeneous classroom structure and plan instruction for the diversity of abilities, personalities, cultures, languages, and all individual learners in every educational setting. A practicum accompanies this course. *Corequisite:* TESL 383.

LED 436. Literacy Learning in the Elementary Grades

3.00

This course will provide preservice teachers with an understanding of developmentally appropriate instructional strategies and

assessment techniques to help all students in elementary grades become literate using reading, writing, listening and speaking in strategic and authentic ways. *Prerequisite: Grade of "C" or better in LED 366*

LED 440. Disciplinary Literacy in Secondary Education

3.00

This course will provide preservice teachers in secondary education with an understanding of how to create productive contexts for literacy-based learning. Particular areas of emphasis include selecting reading materials, understanding literacy development and facilitating individual student engagement.

LED 456. Inclusive Literacy Learning in the Primary Grades

3.00

This course is the second of a two-course sequence covering the development of the reading process and methods for teaching reading in elementary classrooms, as well as assessment and intervention for students at risk for or with identified disabilities. Participants will develop an understanding of the reading process and reading disabilities. Emphasis will be on the use of effective practices for primary, secondary and tertiary instruction for children across the lifespan. *Prerequisite: LED 355.*

LED 462. Disciplinary Literacy for Diverse Classrooms PK-6

3.00

This capstone literacy course for pre-service PK-6 teachers will build on the foundation of literacy developed in LED 300 and LED 350 to enable students to integrate reading and writing instruction across the content areas and learn how to differentiate literacy to meet the needs of all learners in a classroom.

Prerequisite: LED 300 and LED 350.

LED 462. Literacy Across the Curriculum

3.00

Accurate decoding is a necessary but not sufficient condition for the true goal of reading: comprehension. Skills for comprehension may predate decoding, may develop simultaneously with decoding skill and may be fine-tuned long after students are experienced decoders. This is a course that explores how students comprehend and learn with text and how teachers assist them in these processes. Pre-service teachers will expand their repertoire of instructional strategies for supporting student literacy development beyond decoding, understanding that fluency is a necessary but not sufficient skill for comprehension to occur. Participants will explore the nature and meaning of comprehension through purposeful, student-centered teaching and learning. This class is built on the understanding that students are given material on their instructional reading level in order for comprehension to take place and that students are engaged and interactive with the text. Current research will frame the exploration, modeling and practice of effective instruction, with an emphasis on the social constructivist perspective of literacy development. *Prerequisite: LED 366 and LED 436.*

LED 472. Literacy Assessment & Instruction in the Content Areas for the Middle Grades

3.00

This course will introduce preservice teachers to the relationship between literacy assessment practices and instructional design for teaching reading and writing in content area classrooms. Using case study methodology, preservice teachers will explore individual students' literacy strengths, areas that need development, and specific instructional strategies. *Prerequisite: LED 312. Corequisite: MSSE 370, MSSE 371 and practicum.*

LED 490. Special Studies in Literacy

1.00 - 3.00

Designed to give capable students, under faculty guidance, an opportunity to engage in the independent study of educational problems. *Prerequisite: Plan for the study must be approved by the faculty adviser and the coordinator of the program in which the student is enrolled.*

MGT 305. Management and Organizational Behavior

3.00

A study of management functions, decision processes and human behavior in business organizations. Ethical and political considerations are addressed, as are behavioral science research and its applicability to understanding organizational behavior. *Prerequisite: Non-COB major and sophomore standing.*

MGT 310. Business Fundamentals for Entrepreneurs

3.00

This course requires students to develop basic literacy in the language of business and will include foundational concepts related to forms of business ownership, management, marketing, operations and financial resources. It is designed for students from non-business majors who enroll in the entrepreneurship minor. *Prerequisite: Open only to non-business majors who have been accepted into the entrepreneurship minor.*

MGT 320. Management of Innovation and Technology

3.00

This course focuses on technological innovation as a primary source of achieving and sustaining competitive advantage for established firms as well as start-ups. Students explore the current challenges facing business leaders in their attempts to build firms that can consistently and successfully bring technological innovations to market. The course provides students with opportunities to integrate creativity, innovation, and problem-solving processes. Innovation management includes topics such as technology strategy, fit between product strategy and business unit strategy, the psychology of discovery and invention, the entrepreneurial mindset, managing innovation processes and teams, and protecting innovation. *Prerequisite: For management majors: COB 300; for entrepreneurship minors: MGT 310; or departmental permission.*

MGT 325. Project Management

3.00

This course focuses on the knowledge and skills needed to select, plan, schedule, evaluate, control, and complete a variety of complex projects that help achieve organizational goals. Students learn foundational concepts and current project management frameworks. Applying project management tools and techniques to workplace situations using project management software is emphasized. *Prerequisite: COB 300 and Management majors; or departmental permission.*

MGT 340. International Management

3.00

A comparative analysis of management styles and organizational effectiveness across cultural boundaries and within other political, legal and economic environments. *Prerequisite: COB 300 and management or international business major.*

MGT 357. Evidence-Based Decision Making

3.00

This course provides students with the opportunity to use research and data analysis to explore managerial and organizational situations, and to develop and practice empirically based decision making skills. Students will learn about evidence based management, an approach to decision making based on the best obtainable evidence and unbiased organizational facts. The

course will help students to develop the knowledge and skills needed to identify, access, interpret, and use factual information and empirical evidence to be more effective decision makers and managers. *Prerequisite: COB 300 and Management majors; or departmental permission.*

MGT 365. Fundamentals of Human Resource Management

3.00

A study of employer-employee relationships in business and industry including personnel policies and methods; selection, placement, training and promotion of employees; and recent trends in employment practices. *Prerequisite: COB 300 for management majors, or PPA 265 for PPA majors; or departmental permission. Corequisite: COB 300 for management majors, or PPA 265 for PPA majors.*

MGT 370. Quality Management

3.00

The application of statistics to the control of quality in planning, organizing, motivating and controlling quality. Application of models and distributions in statistical quality control, process capability, control charts, acceptance sampling and reliability. Emphasis is on the design, implementation and management of quality throughout the firm. *Prerequisite: COB 300 and junior standing.*

MGT 375. Business Ethics and Social Responsibility

3.00

This course explores the nature of moral values, moral judgments, and ethical decision and behaviors in modern business organizations. Alternative perspectives of right and wrong will be considered. A highly interactive course, students will analyze and discuss ethics-related current events, case studies, real-world scenarios, and common ethical dilemmas in order to improve skills in recognition, understanding, and decision-making related to business ethics and social responsibility at various organizational levels. This course is open to students in any COB major provided they meet the course prerequisites. *Prerequisite: COB 300 and management major, or departmental permission.*

MGT 390. Organizational Leadership

3.00

This course provides a foundation for understanding and applying leadership knowledge and skills at the individual, dyadic, team, and organizational levels. It enables students to better understand themselves and others, and utilize that knowledge to more effectively lead and manage in organizational settings. The course incorporates theory, cases, assessment tools, empirical evidence, and application-based exercises. Contemporary leadership theories and related frameworks involving values, attitudes, motivation, ethics, and group processes are used to foster leadership development. *Prerequisite: COB 300 and Management majors; or departmental permission*

MGT 405. Topics in Management for Non-majors

3.00

This course is designed to allow exploration of areas of current topical or unique interest or to leverage special situations. Course content will vary. Consult your adviser for specific topics each semester when the course is offered. Course may be repeated for credit when topics vary. *Prerequisite: Cumulative 2.0 GPA in all courses taken at JMU, open only to non-business majors.*

MGT 457. Business Analysis and Consulting Fundamentals

3.00

This course provides an overview of business analysis, the consulting industry and the analytical practices used in the consulting

process. Students explore the business analysis process, learning to identify and communicate the need for organizational change, and define solutions that maximize organizational value. Also, students examine the nature and purpose of consulting, explore careers related to consulting, learn consulting frameworks and methods, and develop an understanding of the consultant-client relationship. *Prerequisite: MGT 357.*

MGT 460. Employment Law

3.00

This course provides students with an in-depth understanding of federal regulations, court decisions, and public labor policies that influence employment decisions, employee and labor relations, and employee safety and health. Includes historical evolution of federal legislation relating to employment, the labor movement, and the emergence of public sector bargaining. Explores the impact of regulations, court cases, and union contracts on general business operations. *Prerequisite: COB 300 and MGT 365.*

MGT 461. Introduction to Supply Chain Management

3.00

Introduction to Supply Chain Management provides the student with a foundational knowledge of the content and processes of supply chains, with an emphasis on the strategic nature of supply chain management decisions. This course offers a survey of critical supply chain topics such as design, sourcing, networks, risk management, transportation, revenue generation, and sustainability. Selected topic areas will be evaluated through the lens of geographic information systems (GIS) using ArcGIS. *Prerequisite: COB 300 (for Management majors), or COB 300 and admission to the Global Supply Chain Management minor (for all other COB Majors), or ISAT 211 and admission to the Global Supply Chain Management minor (for CISE majors).*

MGT 467. Management Consulting

3.00

This is an applied course where students will work in teams on consulting projects for businesses or organizations. Students apply knowledge and skills developed in MGT 357 and MGT 457. Students engage in a comprehensive consulting experience designed to build competence and confidence in analysis, problem-solving, and managing client relations. Grades will be determined largely by the quality of client deliverables. *Prerequisite: MGT 457.*

MGT 470. Acquiring and Developing Human Capital

3.00

This course provides an in-depth study and application of staffing concepts and practices, including how to identify, place, and develop the best candidates for a given position. Topics include workforce planning, recruitment, selection, training and development of employees, and succession planning. *Prerequisite: MGT 365.*

MGT 471. Entrepreneurship and Small Business Management

3.00

This course provides an in-depth examination of entrepreneurship and its impact and significance in the global economy, including a focus on small business. Students will learn theory and then apply it through experiential exercises and a number of different engagements. This course explores topics such as the entrepreneurial process, idea generation methodology, sources of funding, growth, succession planning, and exit strategies. Students engage in activities such as feasibility analysis, selection of appropriate entry and growth strategies, and firm valuation techniques. *Prerequisite: For management majors: COB 300; for entrepreneurship minors: MGT 310 or COB 300; for all others: Departmental permission.*

MGT 472. New Venture Creation

3.00

This experiential course explores the context and entrepreneurial process involved in creating new ventures. Students work in multidisciplinary teams to recognize and evaluate opportunities, develop feasible business models, and demonstrate high-performance team practices. Working with experienced entrepreneurs, teams develop and apply financing strategies for the prelaunch and launch of new ventures. *Prerequisite: For management majors: MGT 320 and MGT 471; for entrepreneurship minors: MGT 310 or COB 300; for all others: Departmental permission.*

MGT 475. Managing and Retaining Human Capital

3.00

This course provides an in-depth study of two major aspects of HR policy and practice: performance management and compensation systems. Students participate in applied exercises and projects that focus on best practices in performance management and performance appraisal systems. The design of compensation and benefits systems is studied as a means to effectively retain workers. *Prerequisite: MGT 365 and Management major.*

MGT 480. Organizational Structure and Change

3.00

Examines the theory and research underlying the design of complex organizations. Takes a macro approach to the study of organizations, placing particular emphasis upon the interaction between an organization and its environment and the impact that the environment has on organizational design, structure and processes. *Prerequisite: COB 300 and management major.*

MGT 481. Negotiation and Dispute Resolution

3.00

The purpose of this course is to develop an understanding and effective improvement of participants' skills in the areas of both business and interpersonal negotiations. Through case-based exercises, attention will be given to various strategies for negotiation including distributive, integrative, intra-organizational, and multi-lateral bargaining. Additional applications include how negotiation skills can serve as tools for conflict resolution in the workplace and broader life experiences. *Prerequisite: COB 300 and senior standing.*

MGT 490. Special Studies in Management

1.00 - 3.00

Designed to give capable students in management an opportunity to complete independent study under faculty supervision. *Prerequisite: Management major and senior standing; recommendation of the instructor and written permission of the director prior to registration. Prerequisite: Management major and senior standing (90 hours); recommendation of the instructor and written permission of the director prior to enrollment.*

MGT 494. Management Internship

3.00

A course providing an opportunity to work in and with local industry to gain insight into the real side of modern management. *Prerequisite: Management major and permission of the internship coordinator prior to enrollment.*

MGT 498. Special Topics in Management

3.00

This course is designed to allow explorations of areas of current topical concern or to exploit special situations. Course content will vary. For current course content consult your adviser. *Prerequisite: COB 300 and management major and senior standing (90 hours).*

MGT 499A. Honors

1.00

Year course. See catalog description entitled "Graduation with Distinction" and "Graduation with Honors."

MGT 499B. Senior Honors Project

3.00

Year course. See catalog description entitled "Graduation with Distinction" and "Graduation with Honors."

MGT 499C. Honors Thesis

2.00

Year course. See catalog description entitled "Graduation with Distinction" and "Graduation with Honors."

MKTG 380. Principles of Marketing

3.00

Deals with fundamentals involved in the marketing process; concerned with the functions, institutions and channels used to distribute goods and services from producer to consumer. *Prerequisite: Junior standing and a cumulative 2.0 grade point average in all courses taken at JMU.*

MKTG 384. Integrated Marketing Communications

3.00

Integrated marketing communications includes advertising, sales promotions, packaging, public relations, publicity, personal selling, direct marketing and event sponsorship. Students will be involved in creating, planning, implementing and evaluating client-oriented projects by developing an integrated marketing communication campaign. *Prerequisite: COB 300 or permission of the academic unit head.*

MKTG 385. Consumer Behavior

3.00

Deals with the behavioral science concepts of individual and group behavior of consumers. Stresses the application of buyer behavior research to marketing management. *Prerequisite: COB 300 or permission of the academic unit head.*

MKTG 386. Services Marketing

3.00

Application of marketing principles to the services sector. The course focuses on review of customer demand for and assessment of services; the employee/customer interface; services operation management; review of the services marketing mix; and development of marketing plans for service organizations. *Prerequisite: COB 300 or permission of the academic unit head.*

MKTG 388. Omnichannel Retailing

3.00

This course examines retailing from an omnichannel approach that includes both online and offline strategies and tools. Strategies to create an integrated, cohesive approach that allows consumers to move between channels seamlessly will be evaluated. *Prerequisite: COB 300 or permission of the academic unit head.*

MKTG 405. Survey Research

3.00

This course covers techniques and principles, skills and activities that are required to conduct an effective survey project. The course will cover survey planning, survey methods, sampling, survey instrument design, data collection and analysis, and survey reporting. Survey findings are linked to future marketing decision making. *Prerequisite: COB 300 or permission of the academic unit head.*

MKTG 410. Social Media Marketing

3.00

The class covers the foundations of social media including the predominantly used social media platforms, when and how to use each effectively, and a glimpse into the social psychology behind interactions within and across social media platforms. *Prerequisite: MKTG 384.*

MKTG 430. Professional Selling

3.00

Provides an understanding of many aspects of personal selling including preparing for selling, selling techniques and the role of selling in our society. *Prerequisite: COB 300 or permission of the academic unit head.*

MKTG 450. Business Marketing

3.00

An analysis of the policies and procedures in marketing to business buyers. The course provides emphasis on special problems connected with the segmentation and target marketing, purchase, distribution, promotion, and development of business-to-business goods and services. *Prerequisite: COB 300 or permission of the academic unit head.*

MKTG 455. Sales Leadership

3.00

Sales leadership guides students through the various leadership styles and the adoption of the appropriate leadership style for various contexts. The use of sales management skills, coaching and mentoring in a professional sales environment are covered. The course includes experiential use of these skills by providing the opportunity to lead a team of students enrolled in MKTG 430. *Prerequisite: COB 300 and MKTG 430, or permission of the instructor.*

MKTG 460. Global Marketing

3.00

Examines marketing in international environments, including foreign entry, local marketing in individual countries and global or standardized marketing across many countries. Emphasis is placed on cultural, economic and strategic variables in deciding how to enter and compete in various markets. *Prerequisite: COB 300 or permission of the academic unit head.*

MKTG 462. International Logistics

3.00

The goal of the course is to tie the international logistics concepts and tools to real world situations, preparing students for dynamic decision-making and problem solving. For marketing majors, this elective would complement such courses as global marketing, business-to-business marketing, retail management and marketing analytics and provide students with an understanding of one of the key elements of marketing: place/physical distribution, from an international perspective.

Prerequisite: COB 300 (for Marketing majors), or COB 300 and admission to the Global Supply Chain Management minor (for all other COB majors), or ISAT 211 and admission to the Global Supply Chain Management minor (for CISE majors).

MKTG 465. CRM Technology for Sales Professionals

3.00

The objective of this course is to introduce students to customer relationship management (CRM) technologies used in professional selling. Students will investigate sources of customer data, data management technology, and the use of customer information for professional selling. The course develops technology skills applicable in carrying out sales strategies.

Prerequisite: MKTG 430.

MKTG 466. Advanced Professional Selling

3.00

The purpose of this class is to build on the selling skills first learned in MKTG 430. It will focus on enhancing existing skills and learning new ones in order to even better prepare students for a successful career in sales. In addition, students may be selected to compete in regional or national sales competitions during the semester. *Prerequisite: MKTG 430.*

MKTG 470. Strategic Internet Marketing

3.00

Studies the culture and demographics of the Internet and examines online business strategies. Students will learn the hardware and software tools necessary for Internet commerce, identify appropriate target segments, develop product opportunities, price structures and distribution channels over the Internet and execute marketing strategy in computer-mediated environments.

Prerequisite: COB 300 and MKTG 384 or permission of the academic unit head.

MKTG 477. Digital Marketing Practicum

3.00

With an applied focus, this course introduces students to some of the most important and fastest growing sectors in digital marketing. Students apply marketing theories in a uniquely applied manner as they become active learners involved in online marketing campaigns, facing real pressures similar to those in the professional workplace (i.e., account management, client relationships, financial constraints, market competition, time limitations, technology, etc.). Student teams will plan and execute paid search, display advertising, paid social or other campaign types for actual clients. Throughout their campaigns, students continually make decisions based on real world data and market conditions. *Prerequisite: MKTG 384 and permission of the instructor.*

MKTG 480. Product Development and Management

3.00

The process of developing new products will be developed and explored. The marketing tasks which are unique to this operation will be investigated. An understanding of the marketing management of products throughout their life cycles will complete the course. *Prerequisite: COB 300 or permission of the academic unit head.*

MKTG 482. Marketing Analytics

3.00

This course focuses on the use of information technology and marketing metrics to increase marketing productivity. Students learn how to evaluate marketing strategies and performance using database queries and statistical analysis. Information technologies are applied in market segmentation and target marketing, lifetime value analysis and RFM (recency, frequency and monetary value) analysis. *Prerequisite: COB 300 or permission of the academic unit head.*

MKTG 485. Marketing Management

3.00

Case studies are used to develop analytical and decision-making skills. Knowledge gained from previous course work is applied to actual circumstances faced by marketing managers in private, public, profit and not-for-profit organizations. Extensive preparation of case materials outside of class provides the basis for case presentations and discussion of case situations in class.

Prerequisite: COB 300, MKTG 384, MKTG 385 and senior standing required.

MKTG 490. Special Studies in Marketing

1.00 - 3.00

Designed to give capable students in marketing an opportunity to complete independent study under faculty supervision.

Prerequisite: GPA of 2.8, instructor recommendation and department head approval prior to registration.

MKTG 494. Marketing Internship

3.00 - 6.00

A course providing an opportunity to work in and deal with local industry to gain insight into the realities of modern business.

Prerequisite: COB 300, minimum cumulative GPA of 2.80, senior standing, recommendation of the internship coordinator and approval of the academic unit head prior to registration.

MKTG 498. Special Topics in Marketing

1.00-3.00

This course is designed to allow explorations of areas of current topical concern or to exploit special situations. Course content will vary. For current course content consult your adviser. *Prerequisite: Permission of the instructor.*

MKTG 498A. Special Topics in Marketing

3.00

This course is designed to allow explorations of areas of current topical concern or to exploit special situations. Course content will vary. For current course content consult your adviser.

MKTG 498B. Special Topics in Marketing

3.00

This course is designed to allow explorations of areas of current topical concern or to exploit special situations. Course content will vary. For current course content consult your adviser.

MKTG 499A. Honors

1.00

MKTG 499B. Senior Honors Project

2.00

MKTG 499C. Senior Honors Project

3.00

MATS 375. An Introduction to Materials Science

3.00

Crosslisted with CHEM 375, PHYS 375

An introduction to materials science with emphasis on general properties of materials. Topics will include crystal structure, extended and point defects, and mechanical, electrical, thermal and magnetic properties of metals, ceramics, electronic materials, composites and organic materials. *Prerequisite: CHEM 131 and PHYS 150, PHYS 250, ISAT 212 or permission of the instructor.*

MATS 498R. Undergraduate Materials Science Research

1.00 - 3.00

Research in a selected area of materials science arranged with and approved by a faculty research advisor. *Prerequisite: Study proposal must be approved by research advisor and director of Center for Materials Science prior to registration.*

MATH 103. The Nature of Mathematics [C3QR]

3.00

Topics such as geometry, computing, algebra, number theory, history of mathematics, logic, probability, statistics, modeling and problem solving intended to give students insight into what mathematics is, what it attempts to accomplish and how mathematicians think. May be used for general education credit.

MATH 105. Quantitative Literacy and Reasoning [C3QR]

3.00

Applications and interpretation of numerical information in context. Selection and use of appropriate tools: scientific notation, percentages, descriptive summaries, absolute and relative changes, graphs, normal and exponential population models, and interpretations of bivariate models. Making informed decisions and effectively communicating them. Identifying limitations of information sources, assessing reasonableness of results, and basic concepts of confidence amid uncertainty. Not open to majors in mathematics or statistics. May be used for general education credit. Not open to students who have previously earned credit in courses requiring MATH 105 competency except with consent of the Mathematics and Statistics department head.

MATH 107. Fundamentals of Mathematics I [C3QR]

3.00

MATH 107 and MATH 108, along with MATH 207, form a sequence that covers the topics of sets, logic, numeration systems, development of real numbers, number operations, number theory, geometry, measurement, algebra, functions, probability and data analysis. Sequence is required for early childhood, elementary, or middle school teacher licensure. May be used for general education credit.

MATH 108. Fundamentals of Mathematics II

3.00

MATH 107 and MATH 108, along with MATH 207, form a sequence that covers the topics of sets, logic, numeration systems, development of real numbers, number operations, number theory, geometry, measurement, algebra, functions, probability and data analysis. Sequence is required for early childhood, elementary, or middle school teacher licensure. *Prerequisite: MATH 107 with a grade of "C-" or better and a passing score on Basic Skills Test.*

MATH 135. Elementary Functions

4.00

Algebraic, exponential, logarithmic and trigonometric functions; matrices and matrix solutions to systems of linear equations; vectors. Not open to students who have previously earned credit in MATH 155, 156, 205 or 235, except with the consent of the department head.

MATH 155. College Algebra

3.00

Polynomial, rational, exponential and logarithmic functions and applications, systems of equations and inequalities, sequences. *Prerequisite: Demonstration of proficiency in algebra at an intermediate level. A test is required to determine placement in MATH 155 or MATH 156. Not open to students who have previously earned credit in MATH 135, MATH 156, MATH 205, MATH 232 or MATH 235.*

MATH 156. College Algebra

3.00

Covers same topics as MATH 155. MATH 156 will meet five times a week for students requiring more instructional time. *Prerequisite: Demonstration of proficiency in algebra at an intermediate level. A test is required to determine placement in MATH 155 or MATH 156. Not open to students who have previously earned credit in MATH 135, MATH 155, MATH 205, MATH 231, MATH 232, or MATH 235.*

MATH 167. Topics in Mathematics

1.00 - 3.00

Topics or projects in mathematics which are of interest to the lower-division student. May be repeated for credit when course content changes. Topics or projects selected may dictate prerequisites. Students should consult the instructor prior to enrolling for this course.

MATH 199. Algebra/Precalculus Gateway

1.00

Review of fundamental mathematics required to be successful in MATH 205 or MATH 231, including graphs of functions, factoring, simplifying, solving equations and inequalities, and exponential/logarithmic/trigonometric functions. Self-paced study with required proctored tests. Students needing more instruction should register for MATH 155 instead. *Corequisite: MATH 231 or MATH 205 with appropriate calculus placement score.*

MATH 205. Introductory Calculus I [C3QR]

3.00

Topics from differential and integral calculus with applications to the social, behavioral or life sciences and business or management. *Prerequisite: MATH 135 or MATH 155 or MATH 156 or sufficient score on the mathematics placement exam. Not open to mathematics or physics majors or to students who have already earned credit in MATH 232 or MATH 235.*

MATH 207. Fundamentals of Mathematics III

3.00

A continuation of topics listed in the MATH 107-108 description will be covered. The MATH 107-108-207 sequence fulfills the

requirements for licensure of prospective early childhood, elementary, or middle school teachers. *Prerequisite: MATH 107 and MATH 108 with a grade of "C-" or better.*

MATH 220. Elementary Statistics [C3QR]

3.00

Descriptive statistics, frequency distributions, sampling, estimation and testing of hypotheses, regression, correlation and an introduction to statistical analysis using computers. May be used for general education credit. *Prerequisite: MATH 105 with a grade of "C-" or better or sufficient score on the Mathematics Placement Exam.*

MATH 220H. Elementary Statistics - Honors [C3QR]

3.00

Descriptive statistics, frequency distributions, sampling, estimation and testing of hypotheses, regression, correlation and an introduction to statistical analysis using computers. May be used for general education credit. *Prerequisite: Honors Students*

MATH 227. Discrete Structures I

3.00

Crosslisted with CS 227

An introduction to discrete mathematical structures including functions, relations, sets, logic, matrices, elementary number theory, proof techniques, basics of counting, graphic theory, discrete probability, digital logic, finite state machines, integer and floating point representations. *Prerequisite: CS 159. Corequisite: CS 159.*

MATH 229. Introduction to Applied Statistics Using R [C3QR]

3.00

An introduction to applied statistics that is more in-depth than MATH 220 and is encouraged for students majoring or minoring in STEM fields. Descriptive statistics, data collection, frequency distributions, sampling distributions and the Central Limit Theorem, estimation, confidence intervals, testing of hypotheses, simple linear regression, correlation, and chi-square test of independence are covered. Emphasis is on the analysis and interpretation of real data in context. Uses the R programming language.

Prerequisite: Sufficient statistics and calculus placement scores. The calculus placement score requirement may be waived for students with "C-" or better in MATH 231.

Not open to students with credit in MATH 220, MATH 220H, MATH 318, MATH 329 or equivalent.

MATH 231. Calculus with Functions I [C3QR]

3.00

MATH 231 and MATH 232 form a sequence that combines first-semester calculus with algebra and trigonometry. The sequence is designed for students whose pre-calculus skills are not strong enough for MATH 235. Calculus material in MATH 231 includes limits and derivatives of algebraic functions and their applications. May be used for general education credit. *Not open to students who have already earned credit in MATH 234 or MATH 235. Prerequisite: MATH 155, MATH 156 or sufficient score on the Mathematics Placement Exam. MATH 231-MATH 232 together are equivalent to MATH 235 for all prerequisites.*

MATH 232. Calculus with Functions II

3.00

A continuation of MATH 231. Calculus topics include limits and derivatives of transcendental functions, the theory of integration

and basic integration techniques. NOTE: MATH 231-232 together are equivalent to MATH 235 for all prerequisites. Not open to students who have already earned credit in MATH 234 or MATH 235. *Prerequisite: MATH 231 with a grade of "C-" or better.*

MATH 233. Calculus with Modeling I [C3QR]

3.00

MATH 233 and MATH 234 form a sequence that combines first-semester calculus with pre-calculus for students with skills not strong enough for MATH 235. Calculus is motivated by static and dynamic models in the context of scientific applications. MATH 233 includes limits, continuity, summation, and the definite integral as accumulation of change and as the limit of Riemann sums. May be used for general education credit. *Prerequisite: MATH 155, MATH 156 or sufficient score on the Mathematics Placement Exam. MATH 233-234 together are equivalent to MATH 235 for all prerequisites. Not open to students who have already earned credit for MATH 232 or MATH 235.*

MATH 234. Calculus with Modeling II

3.00

MATH 233 and MATH 234 form a sequence that combines first-semester calculus with pre-calculus for students with skills not strong enough for MATH 235. Calculus is motivated by static and dynamic models in the context of scientific applications. MATH 234 includes differentiation and antidifferentiation, including trigonometric functions, as well as the fundamental theorem of calculus. *Prerequisite: MATH 233 with a grade of "C-" or better. Not open to students who have already earned credit for MATH 235. MATH 233-234 together are equivalent to MATH 235 for all prerequisites. Not open to students who have already earned credit for MATH 235.*

MATH 235. Calculus I [C3QR]

4.00

Differential and integral calculus of functions of one variable. Sequences and infinite series. MATH 235 may be used for general education credit. MATH 235 is not open to students who have already earned credit in MATH 232 or MATH 234. *Prerequisite: Sufficient score on the Mathematics Placement Exam.*

MATH 236. Calculus II

4.00

Differential and integral calculus of functions of one variable. Sequences and infinite series. *Prerequisite: MATH 232 or MATH 234 or MATH 235 with a grade of "C-" or better.*

MATH 237. Calculus III

4.00

Vectors. Multivariate calculus. *Prerequisite: MATH 236 with a grade of C- or better.*

MATH 238. Linear Algebra with Differential Equations

4.00

Matrices; determinants; vector spaces; linear transformations; eigenvalues and eigenvectors; separable, exact and linear differential equations; and systems of linear differential equations. *Prerequisite: MATH 236. Not open to students with credit in MATH 300 or MATH 336 without departmental permission.*

MATH 245. Discrete Mathematics

3.00

Logic, set theory, relations and functions, mathematical induction and equivalent forms, recurrence relations, counting techniques. *Prerequisite: MATH 236. Corequisite: MATH 236.*

MATH 248. Computers & Numerical Algorithms

4.00

Programming in a high-level computer language. Applications of numerical algorithms to problems basic to areas such as mathematics, the sciences, and economics and finance. This course is not open to students who have previously earned credit in MATH/CS 448. *Prerequisite: MATH 236. Corequisite: MATH 236 and permission of instructor.*

MATH 268. Data Analysis and Visualization

3.00

This course is intended to give students hands-on experience on the basics of the data analysis techniques using R. It will focus on data management, data visualization, data exploration using descriptive data summaries, the basics of model building and the basics of inference. Topics include data management (creating data frames, splitting data, efficient data search); exploratory data analysis; data visualization; major distributions (univariate and multivariate); numerical summaries and outlier detections; and the basics of dimension reduction using principle component analysis and exploratory factor analysis. *Prerequisite: MATH 220, or MATH 318 and permission of instructor.*

MATH 285. Data Analysis

4.00

Topics include experimental and survey design, distributions, variation, chance, sampling variation, computer simulation, bootstrapping, estimation and hypothesis testing using real data generated from classroom experiments and large databases. *Not open to students who have already earned credit in MATH 220, MATH 229, MATH 318 or MATH 329. Prerequisite: MATH 206, MATH 236 or permission of the instructor.*

MATH 297. Undergraduate Research

1.00 - 4.00

Students pursue research in a selected area of mathematics and/or statistics. Student must make arrangements with a supervising instructor prior to registration. Course may be repeated.

MATH 300. Linear Algebra

3.00

Vector spaces, linear transformations, matrices, determinants, systems of linear equations, and eigenvalues and eigenvectors. *Prerequisite: MATH 236; Not open for credit to students with credit in MATH 238 .*

MATH 304. Principles of Algebra

3.00

Algebraic structures, number systems, matrices, groups, rings, factors and solutions to equations, graph theory. *Prerequisite: C- or better in MATH 107, MATH 108, and MATH 207*

MATH 305. Principles of Geometry

3.00

Finite geometries, geometric transformations, constructions, geometry of inversion, projective geometry, non-Euclidean geometry. *Prerequisite: C- or better in MATH 107, MATH 108, and MATH 207 .*

MATH 306. Principles of Analysis

3.00

Sequences, discrete calculus and difference equations, derivatives and integrals, concepts of differential equations and applications. *Prerequisite: C- or better in MATH 107, MATH 108, and MATH 207 .*

MATH 307. Principles of Probability and Statistics

3.00

Descriptive statistics, measures of central tendency and dispersion, correlation, probability, probability distributions and statistical inference. *Prerequisite: C- or better in MATH 107, MATH 108, and MATH 207 .*

MATH 309. SAS Programming and Data Management

3.00

Use of statistical software to manage, process and analyze data. Writing of statistical programs to perform simulation experiments. *Prerequisite: Prerequisite: MATH 220, MATH 229, MATH 318 or equivalent.*

MATH 310. Elem Number Theory

3.00

Properties of integers and prime numbers, divisibility, congruence, residues and selected topics. *Prerequisite: MATH 245 or consent of the instructor.*

MATH 315. Real Number System

3.00

A development of the real number system through a systematic approach to the natural numbers, integers, rationals and irrationals. *Prerequisite: MATH 245 or consent of the instructor.*

MATH 318. Introduction to Probability and Statistics

4.00

This class covers descriptive statistics, counting, probability axioms, discrete and continuous univariate random variables, expected values of random variables and sums of independent random variables, and sampling distributions. It also covers the Central Limit Theorem, single and two sample inference for proportions and means, chi-square test of independence, simple linear regression and correlation. Not open to students with credit in MATH 229 or MATH 329. *Prerequisite: MATH 236 .*

MATH 321. Analysis of Variance and Experimental Design

3.00

Introduction to basic concepts in statistics with applications of statistical techniques including estimation, test of hypothesis, analysis of variance and topics in experimental design. *Prerequisite: MATH 220, MATH 229, MATH 318 or equivalent.*

MATH 322. Applied Linear Regression

3.00

Introduction to basic concepts and methods in regression analysis and the application of these models to real-life situations. *Prerequisite: MATH 220, MATH 229, MATH 318 or equivalent.*

MATH 324. Applied Nonparametric Statistics

3.00

Methods of analyzing data from non-normal populations including binomial tests, contingency tables, use of ranks, Kolmogorov-Smirnov type statistics and selected topics. *Prerequisite: MATH 220, MATH 229, MATH 318 or equivalent.*

MATH 325. Survey Sampling Methods

3.00

Theory and practice of sampling including stratified random samples, discussion of simple random samples, cluster sampling, estimating sample size, ratio estimates, subsampling, two-state sampling and analysis of sampling error. *Prerequisite: MATH 220, MATH 229, MATH 318 or equivalent.*

MATH 326. Statistical Quality Control

3.00

Uses and concepts of probability and sampling procedures. Acceptance sampling by attributes and variables, Shewhart concepts of process control, control chart process capability studies, reliability and life testing. Design of sampling plans. *Prerequisite: MATH 318.*

MATH 327. Categorical Data Analysis

3.00

Exact inference for population proportions, comparison of population proportions for independent and dependent samples, two- and three-way contingency tables, Chi-square tests of independence and homogeneity, Chi-square goodness-of-fit tests, and Poisson and logistic regression. *Prerequisite: MATH 220, MATH 229, MATH 318 or equivalent.*

MATH 328. Time Series Analysis

3.00

Crosslisted with FIN 328

Regression and exponential smoothing methods for forecasting nonseasonal and seasonal time series, stochastic processes, Box-Jenkins' autoregressive and moving average models. *Prerequisite: MATH 238 or MATH 300; and MATH 318 or MATH 329.*

MATH 329. Introduction to Probability and Theoretical Statistics

3.00

This course covers counting, probability axioms, discrete and continuous univariate random variables, expected values of random variables and sums of independent random variables. It also discusses theoretical underpinnings of sampling distributions and the

Central Limit Theorem, computer simulation, two-sample estimation and inference for proportions and means, and estimation and inference including verification of assumptions in simple linear regression. Uses the R programming language. *Prerequisite:* MATH 236 and "C-" or better in MATH 229. MATH 220 with a grade of "B-" or better may be substituted for MATH 229 by permission if student has suitable experience with R. Not open to students with credit in MATH 318.

MATH 336. Elementary Differential Equations

3.00

Development of techniques for obtaining, analyzing and graphing solutions to differential equations, with emphasis on first and second order equations. *Prerequisite:* MATH 236; Not open for credit to students with credit in MATH 238

MATH 337. Methods of Applied Calculus

3.00

Laplace transforms, power series and their application to differential equations. Vector differential and integral calculus; parametric curves; coordinate systems; line, surface and volume integrals; and gradient, divergence, and curl including the theorems of Green, Stokes and Gauss. *Prerequisite:* MATH 237; and MATH 238 or MATH 336 .

MATH 340. Mathematical Modeling I - Optimization

3.00

Linear and nonlinear optimization with an emphasis on applications in the sciences, economics and social sciences. Techniques studied include the simplex, Newton, and Lagrange methods and Kuhn-Tucker theory. Software packages will be used to implement these methods. *Prerequisite:* MATH 237; and MATH 238 or MATH 300 or consent of instructor.

MATH 341. Non-Linear Dynamics and Chaos

3.00

Crosslisted with PHYS 341

Introductory study of nonlinear dynamics and chaos intended primarily for upper-level undergraduates in science or mathematics. Topics include stability, bifurcations, phase portraits, strange attractors, fractals, and selected applications of nonlinear dynamics in pure and applied science. Computers may be utilized for simulations and graphics. *Prerequisite:* MATH 238 or (MATH 300 and MATH 336); and MATH 248

MATH 342. Mathematical Models in Biology

3.00

Crosslisted with BIO 342

Introduction to dynamical models (discrete and continuous time) applied to biology. Tools of mathematical analysis from linear and nonlinear dynamics will be taught, including stability analysis of equilibrium, as well as appropriate use of software packages. Emphasis will be on model development and interpretation in the context of applications, including effective written and oral presentation. *Prerequisite:* MATH 232 or MATH 235 or equivalent.

MATH 353. Graph Theory

3.00

Graphs and their applications. Possible topics include trees, Euler paths and Hamiltonian circuits, planar graphs, digraphs, adjacency matrices, connectivity and coloring problems. *Prerequisite:* MATH 245 or instructor consent.

MATH 354. Introduction to Biometrics

4.00

Crosslisted with BIO 454

This course discusses the role of statistics in biological research and interpretation of biological phenomena. The course will cover topics of sampling, correlation, regression analysis, tests of hypotheses, commonly observed distributions in natural populations, nonparametric tests, goodness-of-fit tests and ANOVA. In order to fully comprehend the statistical analysis of those publications, students will review approximately half a dozen publications from different fields of biology. *Prerequisite: MATH 220, MATH 229, MATH 318 or equivalent.*

MATH 358. Introduction to Machine Learning

3.00

This is an introductory course on machine learning with focus on regression and classification methods. The objective is to familiarize students with some basic models and algorithms for machine learning and prepare them for research or industry application of machine learning techniques. Several software libraries and publicly available datasets will be used to illustrate the application of these techniques. The emphasis will be on machine learning algorithms and application, with some broad explanation of the underlying principles. *Prerequisite: MATH 229, or MATH 220 with permission of the instructor.*

MATH 360. Complex Variables

3.00

Introduction to algebraic properties of complex numbers, analytic functions, harmonic functions, mappings of elementary functions, contour integration, series, residues, and poles and conformal mappings. Emphasis on computations and applications to fluid and heat flow. *Prerequisite: MATH 237.*

MATH 364. Introduction to Fluid Mechanics

4.00

Crosslisted with PHYS 364

Introduces the student to the application of vector calculus to the description of fluids. The Euler equation, viscosity and the Navier-Stokes equation will be covered. *Prerequisite: MATH 237 and PHYS 260, or permission of the instructor.*

MATH 367. Introduction to Acoustics

3.00

Crosslisted with PHYS 367

This course represents an introduction to sound, hearing, and vibration. Architectural, biological and environmental acoustics will also be discussed. Students will develop an ability to use mathematical models and experimental techniques to study problems in acoustics and to transfer this knowledge to analogous situations. They will also develop an ability to conduct a semester-long research or expository project and present it in written and oral form to an audience of peers. *Prerequisite: MATH 236*

MATH 368. Statistical Computing

3.00

This course is an intensive introduction to statistical computing with R. It intends to develop core computing skill to complement traditional course work in statistics and lay the groundwork for further study for data analytics and data mining. The class will cover the basics of programming in R; visualization of multivariate data; generating random variables; bootstrap, jackknife, and

permutation methods; Monte Carlo methods in inference; and Monte Carlo integration and variable reduction. *Prerequisite: MATH 229.*

MATH 395. Mathematical Finance

3.00

Crosslisted with FIN 395

This course presents an overview of the role of mathematical concepts in financial applications. Topics include continuous time finance, optimization, numerical analysis and applications in asset pricing. *Prerequisite: MATH 237 and FIN 380.*

MATH 405. Securities Pricing

3.00

Crosslisted with FIN 405

A quantitative treatment of the theory and method of financial securities pricing to include an examination of closed form pricing models such as the Black-Schoals and its various derivatives as well as numerical solution techniques such as binomial methods. *Prerequisite: FIN 395 or MATH 395.*

MATH 410. Advanced Calculus I

3.00

Limits, continuity, differentiation, sequences, series, integration and selected topics. *Prerequisite: MATH 238 or MATH 300; and MATH 245 or consent of the instructor.*

MATH 411. Advanced Calculus II

3.00

Limits, continuity, differentiation, sequences, series, integration and selected topics. *Prerequisite: MATH 410.*

MATH 415. History of Mathematics

3.00

Topics in the history of mathematics spanning ancient times to the present. *Prerequisite: MATH 245 or instructor consent.*

MATH 421. Applied Multivariate Statistical Analysis

3.00

Multivariate statistical methods with applications. Topics include canonical correlation, clustering, discriminant analysis, factor analysis, multivariate analysis of variance, multiple regression, multidimensional scaling and principal component analysis. *Prerequisite: MATH 300 or MATH 238 and MATH 321 or MATH 322.*

MATH 423. Stochastic Process

3.00

Sequences and classes of random variables. Applications to physical, biological, social and management sciences. Topics include Markov chains, branching processes, the Poisson process, queuing systems and renewal processes. *Prerequisite: MATH 238 or MATH 300; and MATH 318 or MATH 329.*

MATH 424. Statistical Decision Theory

3.00

Development and use of probability and statistics for strategic decision making with applications. Topics include decision flow diagrams, analysis of risk and risk aversion, utility theory, Bayesian statistical methods, the economics of sampling, sensitivity analysis and collective decision making. *Prerequisite: MATH 318 or MATH 329.*

MATH 425E. Statistical Genomics

3.00

This course will cover key statistical concepts and methods necessary for extracting biological insights from high throughput genomic experiments. The topics include: discrete probability distributions (binomial, Poisson, negative binomial, and multinomial), joint probability distributions, conditional probabilities, prior and posterior probabilities, and Bayesian inference. Students will learn how to access high throughput genomic data from public websites, relevant preprocessing and analyses methods. This course will also study gene network, groups and patterns using cluster and principal component analysis.

MATH 426. Probability and Mathematical Statistics I

3.00

Derivations and proofs of probability theorems, discrete and continuous univariate and multivariate random variables, conditional distributions, mathematical expectations, functions of random variables, moment generating functions, properties and derivation of estimators including the method of moments and maximum likelihood estimation. *Prerequisite: MATH 318 or MATH 329.*

MATH 427. Probability and Mathematical Statistics II

3.00

Limiting distributions, sampling theory and distributions, theory and applications of estimation and hypothesis testing. *Prerequisite: MATH 426.*

MATH 428. Statistical Consulting

3.00

Training and experience in statistical consulting emphasizing oral and written communication, interview, report writing and presentation skills. Participate in significant interdisciplinary consulting project that will require meeting with the client, creating reports summarizing the client's problem and an analysis performed by the students, and explanation of results using language that can be understood by the client. Students are required to meet with clients outside of class meeting times. *Prerequisite: MATH 318 or MATH 329; MATH 321, at least junior standing and MATH 322. Corequisite: MATH 322.*

MATH 429. Research Project in Statistics

1.00 - 3.00

Experience in the design, data collection, and analysis for a survey or experiment. *Prerequisite: Consent of the instructor.*

MATH 430. Abstract Algebra I

3.00

An introduction to groups, rings and fields. *Prerequisite: MATH 238 or MATH 300; and MATH 245 or consent of the instructor*

MATH 431. Abstract Algebra II

3.00

An introduction to groups, rings and fields. *Prerequisite: MATH 430.*

MATH 434. Advanced Linear Algebra

3.00

A proof-based linear algebra course covering such topics as vector spaces, linear transformations and matrices, eigenvalues and eigenvectors, inner product spaces, and canonical forms. *Prerequisite: MATH 245 and either MATH 238 or MATH 300 .*

MATH 435. Introduction to Topology

3.00

Metric spaces, limits, continuous maps and homeomorphisms, connectedness, compact topological spaces and applications. *Prerequisite: MATH 238 or MATH 300 and MATH 245.*

MATH 440. Fourier Analysis and Partial Differential Equation

3.00

Elementary applied partial differential equations, the heat equation, Laplace's equation, the wave equation; Fourier series and boundary value problems. Both theory and problem-solving will be included. *Prerequisite: MATH 238 or MATH 336 .*

MATH 441. Analysis and Dynamics of Differential Equations

3.00

Analysis of qualitative properties and dynamics of linear and non-linear ordinary differential equations, including topics such as existence, uniqueness, phase portraits, stability and chaos, with applications in the sciences. *Prerequisite: MATH 238 OR MATH 300 and MATH 336; AND MATH 245 or MATH 440 OR Instructor Permission.*

MATH 448. Numerical Analysis

3.00

Crosslisted with CS 448

Study and analysis of algorithms used to solve nonlinear equations and systems of linear and nonlinear equations. Iterative methods for matrices and Newton-type methods. Numerical differential and integral calculus. Programming using a high-level language and/or software packages. *Prerequisite: MATH 237; MATH 238 or MATH 300; and MATH 248.*

MATH 449. Numerical Analysis for Differential Equations

3.00

Study and analysis of numerical techniques to solve ordinary and partial differential equations, including Euler, Runge-Kutta, Picard, finite-difference and finite-element methods. Programming using a high-level language and/or software packages. *Prerequisite: MATH 237; MATH 238 or MATH 336; and MATH 248 .*

MATH 452. Design and Analysis of Algorithms

3.00

Crosslisted with CS 452

An introduction to the analysis, design and theory of algorithms. Algorithms studied will be selected from searching, sorting and

graph theory. Included are elements of counting, recurrence relations, direct and indirect proofs, recursion, complexity classes, language theory, decidability and undecidability. *Prerequisite: MATH 228 /CS 228 and CS 240.*

MATH 470. Connections in Mathematics

3.00

This course is a mathematics capstone course primarily for math majors with secondary education minors. It covers a variety of topics, each designed to develop the interconnectedness of advanced mathematics to the secondary curriculum. *Prerequisite: MATH 318 or MATH 329; MATH 410, MATH 430 and MATH 475. Corequisite: MATH 318 or MATH 329; MATH 410, MATH 430 and MATH 475.*

MATH 475. Fund Concepts of Geometry

3.00

Origin and development of Euclidean and other geometries including axiomatic systems, mathematical proof and special topics from incidence geometry. *Prerequisite: MATH 245 or consent of the instructor.*

MATH 485. Selected Topics

1.00 - 4.00

Topics in advanced mathematics or statistics which are not covered in the regularly offered courses. Offered only with approval of the department head; may be repeated for credit when course content changes. *Prerequisite: Permission of the instructor.*

MATH 486. Independent Study

1.00 - 3.00

Independent study in mathematics under faculty supervision. Only offered with the consent of the department head.

MATH 497. Undergraduate Research

1.00 - 4.00

Students pursue advanced research in a selected area of mathematics and/or statistics. Student must make arrangements with a supervising instructor prior to registration. Offered only with consent of the department head. Repeatable up to 6 credits.

MATH 499A. Honors

1.00-4.00

Prerequisite: Consent of the SHP supervisor.

MATH 499B. Honors Thesis

3.00

MATH 499C. Honors Thesis

2.00

MAED 430. Teaching Mathematics in Grades K-12

3.00

This course provides students with knowledge, skills, and understanding to design and implement effective mathematics instruction (K-12). Focus is on the content, methods, and materials developmentally appropriate for mathematics instruction for a range of students, including diverse and special needs children. The course is based on the Principles and Standards for School Mathematics from NCTM. *Prerequisite: EXED 200*

SMAD 101. Introduction to Media Arts and Design

3.00

Study of the historical evolution of today's media industries and career paths. Emphasis on contemporary issues affecting those industries and careers. Consideration given to emerging media, their required skills and social impacts. *Prerequisite: Formal declaration for admission to the SMAD major*

SMAD 150. Mediated Communication: Issues and Skills [C1CT]

3.00

Study of how mediated communication shapes the content, meaning and impact of spoken, written and pictorial messages. Emphasis on the skills required to integrate speech, text and imagery into mediated presentations. Consideration of issues involving the critical evaluation of mass-mediated communication, their effectiveness and influence. May be used for general education credit. May not be used for major credit. *Prerequisite: If you have already completed, or are currently registered for, a Cluster One Critical Thinking class, you must secure permission to receive credit for a second Cluster One Critical Thinking class.*

SMAD 201. Foundations of Visual Communication Design

3.00

Study of the basic computer operating systems and the principles and practices of graphic production for digital and interactive media. Focus on tools and techniques used to create graphic content for diverse media delivery systems. *Prerequisite: Admission to the SMAD major.*

SMAD 202. Foundations of Audio-Visual Storytelling

3.00

Audiovisual storytelling is an experiential learning course designed to give students a foundation in creating and producing engaging stories/content utilizing a varied range of audiovisual communication/media tools and formats for distribution on multiple delivery platforms including, but not limited to, television, interactive, film, documentaries, news, commercials, radio, podcasts and web. *Prerequisite: SMAD 201. Corequisite: SMAD 201.*

SMAD 203. Foundations of User Experience Design

3.00

Study of the aesthetic principles and practices of web and interactive narrative design. Emphasis on visual communication in an interactive media context. *Prerequisite: SMAD 201. Corequisite: SMAD 201.*

SMAD 210. News Reporting and Writing

3.00

The study and practice of the fundamentals of news writing, including news gathering techniques and news style. Emphasis on coverage of meetings, events and breaking stories. Consideration of writing across platforms including print, broadcast and online. Fulfills the College of Arts and Letters writing-intensive requirement for the major. *Prerequisite: Admission to the SMAD major or permission of the instructor*

SMAD 220. Copy Editing

3.00

The study and practice of editing stories and visuals for publication. Focus on style, factuality, writing problems, headlines and page design. Other editing roles considered. *Prerequisite: Journalism concentrators: SMAD 210 Creative Advertising concentrators: SMAD 210 or SMAD 252; or permission of instructor. Corequisite: Journalism concentrators: SMAD 210 Creative Advertising concentrators: SMAD 210 or SMAD 252; or permission of instructor.*

SMAD 225. Photojournalism

3.00

The study of visual information gathering for print media including photojournalism. Emphasis on photographic techniques and print media layout. Consideration of new visual technologies including the use of computers for electronic photo editing and design. Students must provide their own camera. *Prerequisite: Admission to the SMAD major and SMAD 201 or Permission of the Instructor*

SMAD 231. Writing for New Media

3.00

Study of the principles and practices of writing for multimedia applications. Emphasis on the nature of interactivity and the relationship between text and image, sound and video. Attention to the development of multimedia presentations designed to inform, persuade and entertain. Fulfills the College of Arts and Letters writing-intensive requirement for the major. *Prerequisite: Admission to the SMAD major or permission of the instructor*

SMAD 242. Introduction to Advertising and New Media

3.00

Introduce fundamentals of advertising in the new media environment. Examine how organizations use new media to engage with consumers to achieve advertising objectives. Focus on hands-on practice in the basic skills and processes needed to prepare multi-platform narratives. Students develop a clear understanding of what makes advertising effective across traditional and new media and develop professional research skills. *Prerequisite: Admission to the Media Arts and Design major and Integrated Advertising and Corporate Communication concentration, or permission of instructor.*

SMAD 243. Sport Communication Techniques: Broadcasting

3.00

Crosslisted with KIN 243

Study and practice of broadcast and A/V techniques applied in a variety of sport settings. *Prerequisite: KIN 242*

SMAD 244. Sport Communication Techniques: Writing and Reporting

3.00

Crosslisted with KIN 244

Basic skills of sport writing and reporting are studied and applied. Students gain experience in a variety of sports and learn and apply skills in researching, interviewing, reporting, writing columns and features involving the world of sports. *Prerequisite: KIN 242*

SMAD 250. Scriptwriting

3.00

The study of the principles and practices of writing scripts for commercial, noncommercial and corporate media applications. Emphasis on preparing dramatic and information forms for broadcast or recording. Fulfills the College of Arts and Letters writing-intensive requirement for the major. *Prerequisite: Admission to the SMAD major; for non-majors, admission to the cross disciplinary minor in Creative Writing; or permission of instructor.*

SMAD 251. Screenplay Writing

3.00

Introductory study of the principles and practices of screenwriting. Emphasis is placed on the basic narrative structures underlying cinematic story-telling and the development of a short film script. Fulfills the College of Arts and Letters writing-intensive requirement for the major. *Prerequisite: Admission to the SMAD major; for non-majors, admission to the cross disciplinary minor in creative writing; or permission of the instructor*

SMAD 252. Copywriting for Advertising

3.00

Study the principles and practices of developing creative copy for advertising. Examine how to solve client problems by writing persuasive stories. Focus on writing scripts for TV and radio commercials, print ads, headlines, taglines, jingles, web copy, out of home ads, new media, and social media. Emphasis on editing, researching, and writing creative briefs and strategic plans. *Prerequisite: Admission to the SMAD major and creative advertising concentration and SMAD 242. Corequisite: SMAD 242*

SMAD 253. The Shooting Script: The Process of Script to Screen

3.00

In this course, students will polish screenplays and develop them into a shooting script for video production. The work in this class involves creating a screenplay that the students will actually shoot and produce. This is a different process than simply writing a script. For example, if the script contains a scene at a swimming pool, but they do not have access to a pool as a location, students must rework the scene to make it work with available locations. The course will only be offered as part of the JMU/SVA summer study abroad program in New York. The class will satisfy the digital video and cinema concentration writing requirement and satisfy the prerequisite for SMAD 340. Advanced Screenplay Writing. *Prerequisite: Admission to the SMAD major and admission to the JMU/SVA summer study abroad program in New York.*

SMAD 295. Practicum in Media Arts and Design

1.00

Freshmen and sophomores participating in cocurricular media activities may receive one hour of credit for field work at The Breeze, WMRA-FM, the Madison Video Productions or other university-related media outlets. Students are limited to one practicum per semester. Application procedures will be available from the school prior to registration. *Prerequisite: Permission of the instructor.*

SMAD 301. The Media Arts: Culture By Design

3.00

Study of how mediated communication molds perception and influences cultural change. Emphasis on how language and imagery, sound and music are combined in current media to create meaning. Consideration of emerging media and their implications for cultural design. *Prerequisite: SMAD 201; SMAD 202, SMAD 203 or permission of the instructor. Corequisite: SMAD 202, SMAD 203, or permission of the instructor.*

SMAD 301L. The Media Arts: Culture By Design

3.00

Study of how mediated communication molds perception and influences cultural change. Emphasis on how language and imagery, sound and music are combined in current media to create meaning. Consideration of emerging media and their implications for cultural design. Focus on British media and culture.

SMAD 302. Video Production

3.00

Principles and practices of video production and editing. Focus on production planning, visual composition, lighting, recording sound and sequencing of shots. Emphasis on single camera videography and editing for broadcast, non broadcast, and multimedia applications. *Prerequisite: SMAD 202 and SMAD 202; SMAD 203 or permission of the instructor. Corequisite: SMAD 203 or permission of the instructor.*

SMAD 303. Post Production

3.00

Principles and practices of video editing. Focus on the techniques, aesthetics, and strategies of editing video. Emphasis on technical standards of ingest, storage, non-linear editing, multi-layer compositing, and transcoding required for effective program output and multi-format distribution. *Prerequisite: SMAD 302 or Permission of the Instructor*

SMAD 304. Audio Production

3.00

Study of digital sound production, and digital sound-for-picture production. Emphasis on advanced theories and applications. *Prerequisite: SMAD 302; SMAD 203 or permission of instructor. Corequisite: SMAD 303 or permission of instructor.*

SMAD 305. Special Topics in Media Production

3.00

The study of current topics and issues in media arts and design. Emphasis on contemporary themes of immediate concern. *Prerequisite: Admission to the SMAD major or permission of the instructor*

SMAD 306. Studio Production

3.00

The study of principles and practices of multi-camera studio production. Focus on visual composition, audio, lighting and communication in a studio environment. Emphasis on technical and aesthetic demands of multi-camera studio production. *Prerequisite: SMAD 302 or SMAD 309 or permission of the instructor*

SMAD 307. Interactive Design Web I

3.00

Study of the principles of creating effective communication for the World Wide Web. Emphasis on the techniques used to design and integrate diverse media elements. Focus on the creation and manipulation of text, graphics, audio and video for the web. Consideration of interface design and web delivery issues. *Prerequisite: SMAD 201, SMAD 202 and SMAD 203 or permission of the instructor. Corequisite: SMAD 202.*

SMAD 308. Interactive Design II

3.00

Study of the principles and practices for creating effective interactive media. Emphasis on usercentered design of the interactive experience. Includes animation and scripting for online and fixed media.

Prerequisite: SMAD 307 or Permission of the Instructor.

SMAD 309. Video Journalism

3.00

Study of principles and practices in electronic journalism including information gathering, news writing, camera operations and editing techniques. Emphasis on the use of sound and video to produce hard news, feature news and long-form perspective-based stories for broadcast and online. Examination of the Internet's impact and the differences between traditional and online media outlets in constructing stories with video and sound. *Prerequisite: SMAD 201 and SMAD 202; SMAD 203 and SMAD 210; or permission of the instructor. Corequisite: SMAD 203 and SMAD 210; or permission of the instructor.*

SMAD 310. Advanced Reporting and Writing

3.00

Study and practice of in-depth or specialized reporting roles and techniques, story genres, advanced writing methods and pursuing publication. Reading exemplary writers. Group and instructor critiques. *Prerequisite: SMAD 210 or permission of the instructor.*

SMAD 311. Feature Writing

3.00

The study and practice of conceiving, reporting and writing humaninterest stories. Use of advanced storytelling methods and pursuing publication. Reading exemplary writers. Group and instructor critiques.

Prerequisite: SMAD 210; For nonmajors: admission to the cross disciplinary minor in creative writing and SMAD 210; or permission of instructor.

SMAD 317. User Interaction Design

3.00

Study of web and mobile interaction design principles including goaldriven design, usability, interactive design strategy, wireframing, and web and mobile app prototype development. *Prerequisite: SMAD 201, SMAD 202 and SMAD 203. Corequisite: SMAD 202*

SMAD 330. New Media Law

3.00

An indepth investigation of business and legal aspects of new media production, publication and distribution, Examination of legal issues affecting the new media industry including: intellectual property laws, torts contracts and licensing. Discussion of current policies and practices affecting new media development and review of pertinent legal reference materials. *Prerequisite: SMAD 201, SMAD 202 and SMAD 203, plus SMAD 301 or SMAD 301L, and junior or senior standing or permission of instructor.*

SMAD 332. Visual Communication Design

3.00

An introduction to the theories and methods of design for visual communication. Students will learn various techniques needed to produce the design materials that go into print and electronic publications.

Prerequisite: SMAD 201 or permission of the instructor.

SMAD 334. Media and Justice

3.00

Crosslisted with JUST 334

This course will examine media constructions of justice. Students will be required to critically analyze the portrayal of justice issues in various media forms including television, internet, and film. Attention will be given to the accuracy of such portrayals and whether they have any broader social implications in regards to how we view complex justice issues. *Prerequisite: Admission to the SMAD major.*

SMAD 340. Advanced Screenplay Writing

3.00

Advanced study of the principles of screenplay writing for feature films and television movies. Emphasis is placed on the structure of narrative film. *Prerequisite: SMAD 251 or SMAD 253; For non-majors: Admission to the cross disciplinary creative writing minor and SMAD 251 or SMAD 253; or permission of instructor.*

SMAD 342. Elements of Creative Advertising

3.00

Introduces fundamentals of advertising message design and content production for traditional and new media. Examines common questions associated with producing content (i.e., functions and basics of design for print, broadcast and online venues). Focuses on characteristics of effective messages across media and developing professional production skills to produce diverse creative pieces. Emphasizes ethical and legal issues.

Prerequisite: SMAD 201, SMAD 202, SMAD 242 and SMAD 252; SMAD 203 or permission of instructor. Corequisite: SMAD 203 or permission of instructor.

SMAD 357. Youth, Communication and Culture

3.00

Crosslisted with SCOM 357

Grounded in the cultural communication perspective, the course examines the relationship among communication, youth and popular culture. Defining youth as children, tweens, teens and college-aged young people, this course focuses on communication issues such as how youth are represented in various forms of popular culture; how they are defined by corporate discourse; how young people make sense of popular culture artifacts; and how they become cultural communicators as well as consumers.

Prerequisite: Admission to the SMAD major.

SMAD 360L. British Media and Society

3.00

Crosslisted with HUM 251L, SCOM 360L, WRTC 360L

Study the history, nature, and impact of mass media in the United Kingdom. Emphasis on the impact modern media has on society, and society has on media. Consideration of similarities and differences in mass media in the United States and Great Britain. Consideration of the relationship between mass media and the arts. Focus on 20th century mass media in London, one of the world's preeminent and most influential centers.

SMAD 370. Mass Communication Law

3.00

Principles and case studies in communication law, constitutional guarantees, libel, privacy, contempt, copyright and governmental regulatory agencies. Emphasis on recent cases and their effects on mass communication.

Prerequisite: SMAD 201, SMAD 202 and SMAD 203, and SMAD 301 or SMAD 301L, and junior or senior standing or permission of instructor.

SMAD 371. Narrative Media Studies

3.00

Study of narrative theories that focus on the forms and effects of storytelling in cinema and television. Emphasis on how such theories explain the cultural impact and personal utility of narrative contents in everyday life. Consideration of "the hero's journey" in a variety of film genres and TV formats. *Prerequisite: SMAD 201, SMAD 202 and SMAD 203, plus SMAD 301 or SMAD 301L, and junior or senior standing; For nonmajors: Junior or senior standing and admission to the cross disciplinary minor in film studies; or permission of instructor.*

SMAD 372. Media History

3.00

The study of the history of the media in relation to American politics and society. Emphasis on key periods in the development of journalism and the mass media, and the role of the journalist in society. *Prerequisite: Admission to the SMAD major and junior or senior standing; or permission of the instructor.*

SMAD 373. Media Analysis and Criticism

3.00

The study and practice of journalistic and scholarly criticism of the mass media. Emphasis on interpretive writing about television, film and popular music. Consideration of contemporary analytical methods for researching massmediated culture. *Prerequisite: SMAD 201, SMAD 202 and SMAD 203, plus SMAD 301 or SMAD 301L or ENG 380/SMAD 380, and junior or senior standing; For nonmajors: junior or senior standing and admission to the cross disciplinary minor in creative writing; or permission of instructor.*

SMAD 380. Introduction to Film

3.00

Crosslisted with ENG 380

An introduction to the study of film as an aesthetic practice, including formal and industrial aspects of film analysis, theoretical approaches to film, and writing and research methodologies of film and media studies. *Prerequisite: Admission to the SMAD major or permission of the instructor*

SMAD 390. Directed Projects

2.00

Supervised projects related to the study of any of the communication media. Credit given for original individual or group programs beyond the school's usual cocurricular activities. A suitable completed project or report is required before credit can be awarded. *Prerequisite: Admission to the SMAD major or permission of the instructor*

SMAD 395. Advanced Practicum in Media Arts and Design

1.00

Juniors and seniors participating in cocurricular media activities may receive one hour of credit for field work at The Breeze,

Curio, WMRA-FM, the Madison Video Productions or other university-related media outlets. Students are limited to one practicum per semester. Application procedures will be available from the school prior to registration. *Prerequisite: Permission of the instructor.*

SMAD 398. Critical Studies in Media Arts and Design

3.00

Special studies of contemporary media and their contents. Emphasis on the analysis of emerging issues in content production, reception and media effects. Focus on the critical methods used to examine such issues. Consideration of how particular methods may be applied in international as well as American media contexts. *Prerequisite: SMAD 201, SMAD 202 and SMAD 203, plus SMAD 301 or SMAD 301L, and junior or senior standing, and permission of instructor.*

SMAD 400. Senior Assessment in Media Arts and Design

0.00

Students participate in testing, interviews, project reviews and other assessment activities as approved by the School of Media Arts and Design. Grades will be assigned on a credit/no-credit basis. *Prerequisite: SMAD 301 or SMAD 301L and senior standing or permission of the school director.*

SMAD 402. Motion Graphic Design and Production

3.00

Study of the principles of motion design. Focuses on integrating media (video, greenscreen, photos, vector art, type) within compositing software to tell a story, convey a complex concept or artistically present an idea. Emphasis on graphic design and motion theory, typography for video, logo animation, and show package design. *Prerequisite: SMAD 303 or Permission of Instructor*

SMAD 403. Documentary Production

3.00

This course explores the key components of documentary filmmaking and production. The course will introduce students to a professional level of documentary filmmaking, and will focus on enhancing nonfiction storytelling skills. The course will explore funding, festival and outreach strategies. *Prerequisite: SMAD 302 or SMAD 309.*

SMAD 404. Advanced Interactive Design

3.00

Study of advanced techniques in interactive media for online and fixed media delivery. Emphasis on emerging technologies and professional development strategies. Includes the creation of an interactive portfolio. *Prerequisite: SMAD 308 and SMAD 317 or permission of instructor.*

SMAD 405. Producing and Directing

3.00

Study of the principles and practices of producing and directing programs for video and cinema. Emphasis on the producer's and director's contribution to creative development and production. Focus on the director's responsibilities, including directing talent, visualization, production, and project management. Additional focus on the producer's responsibilities, including creative development, production management, financial management, promotion, and distribution. *Prerequisite: SMAD 302 and Senior Standing or permission of instructor*

SMAD 407. Business and Management of Digital Media

3.00

Study of the principles and practices of managing digital media production. Emphasis on financial and personnel management, client relationships, and the structures and practices of digital media industries. Consideration of new trends in production and distribution. Attention to career preparation and development. *Prerequisite: SMAD fully admitted majors, senior standing, SMAD 302 or SMAD 307, or permission of the instructor*

SMAD 408. Converged Media Lab

3.00

Advanced study in converged media production. A senior production studio class focusing on creative solutions for complex communication problems in print, video, and web media. The clientbased projects will require creative brainstorming, teamwork, project management, and analysis and criticism in addition to production and distribution. *Prerequisite: SMAD 307 and SMAD 317, and either SMAD 305 or SMAD 308 or SMAD 332. Requires senior standing or permission of instructor.*

SMAD 409. Electronic News Producing and Editing

3.00

Study of the processes and responsibilities of producing news for electronic distribution. Students will research, write and produce stories for distribution over-the-air, on cable and over the Internet. Emphasis on legal and ethical issues in news coverage. *Prerequisite: Fully admitted majors who have taken SMAD 309 or permission of the instructor.*

SMAD 410. The Creative Producer

3.00

Study of the principles and practices of producing for television. Emphasis on programming (entertainment news to late-night talk, sketch comedy, reality TV, drama, and sitcom), and the producing process (moving a project from idea to completion). Focus on budget management, and all phases of production management. Consideration of industry practices to help prepare students to enter the entertainment industry. *Prerequisite: Acceptance into the JMU in LA program.*

SMAD 421. Feature Magazine Product

3.00

A practical course in which students produce a feature magazine published regularly by the journalism area. Each student is assigned a specific staff position. Students learn to use the latest computer pagination technology in the design and production of the magazine.

Prerequisite: SMAD 309 and either SMAD 310 or SMAD 311, or permission of the instructor.

SMAD 422. Multimedia Journalism

3.00

Advanced study and practice of multimedia journalism. Focus on storytelling with platforms including text, video, audio, photo and social media aggregation. This is a hands on course producing multimedia packages involving idea generation, content production, website design and management.

Prerequisite: Journalism concentrators: SMAD 210 and SMAD 309; creative advertising concentrators: SMAD 225 and SMAD 342; or permission of the instructor.

SMAD 442. Functions of Corporate Communication

3.00

Examines how corporate communication functions (internal communication; investor, government, and media relations; corporate responsibilities; and crisis communication) are integrated in organizational objectives. Emphasizes strategic planning, message design and production, implementation/evaluation of new media technologies, research and current trends. Reviews responsibilities, duties, and legal/ethical standards in corporate communication issues. *Prerequisite: SMAD 341 or SMAD 342*

SMAD 443. Creative Advertising Campaigns

3.00

Study how to develop a creative advertising campaign across a range of traditional and new media. Examine the creative process including conceptualizing, brainstorming, idea generation, copywriting, and design layout. Emphasis on using creativity as a foundation to develop and sell the big idea. Focus on the stages of creative inspiration, concepts of the creative process and roles/functions of creative professionals in advertising, culminating in a creative advertising campaign. *Prerequisite: SMAD 203 and SMAD 342, or permission of instructor.*

SMAD 460. Film and Society

3.00

The study of the cultural impact of the film industry as an institution of mass communication. Emphasis on the interrelationship among social, economic and technological factors influencing the creation and consumption of motion pictures. Consideration of particular films as indicators of cultural change. *Prerequisite: SMAD 201 and SMAD 202 and SMAD 203, plus SMAD 301 or SMAD 301L or ENG 380/SMAD 380, and junior or senior standing; for non-majors: junior and senior standing and admission to the cross disciplinary minor in film studies; or permission of instructor.*

SMAD 461. Film as Art

3.00

Advanced study of how movies tell stories in visual terms. Emphasis on the historical evolution and design of the moving image. Consideration of the latest imaging technologies affecting film narrative. *Prerequisite: SMAD 201 and SMAD 202 and SMAD 203, plus SMAD 301 or SMAD 301L or ENG 380/SMAD 380, and junior or senior standing; for non-majors: junior and senior standing and admission to the cross disciplinary minor in film studies; or permission of instructor.*

SMAD 462. Documentary in Film & Television

3.00

The study of content, style, technique and effect of representative samples of the documentary form. Consideration given to informational and persuasive elements. *Prerequisite: SMAD 201 and SMAD 202 and SMAD 203, plus SMAD 301 or SMAD 301L or ENG 380/SMAD 380, and junior or senior standing; for non-majors: junior and senior standing and admission to the cross disciplinary minor in film studies; or permission of instructor.*

SMAD 463. Film Adaptations

3.00

The study of the process of adapting literature into feature films. Consideration is given to the original literary work, as well as to the changes undergone in its adaptation to film. *Prerequisite: SMAD 201 and SMAD 202 and SMAD 203, plus SMAD 301 or SMAD 301L or ENG 380/SMAD 380, and junior or senior standing; for non-majors: junior and senior standing and admission to the cross disciplinary minor in creative writing or the cross disciplinary minor in film studies; or permission of instructor.*

SMAD 463L. Film Adaptations

3.00

The study of the process of adapting British Literature into feature films. Consideration is given to the original literary work, as well as to the changes undergone in its adaptation to film. *Prerequisite: Studies Abroad-London*

SMAD 464. Contemporary American Film

3.00

Study and analysis of modern American films of the past twenty years. Focus on storytelling technique, cinematic elements and thematic content. Films will be examined against the backdrop of their specific historical, political, and sociocultural context. *Prerequisite: SMAD 201 and SMAD 202 and SMAD 203, plus SMAD 301 or SMAD 301L or ENG 380/SMAD 380, and junior or senior standing; for non-majors: junior and senior standing and admission to the cross disciplinary minor in film studies; or permission of instructor.*

SMAD 465. The Entertainment Industry

3.00

The American entertainment industry is a \$900 billion a year business. This course examines the most prominent modes of entertainment — Television and feature film. Emphasis is on the struggle between art and commerce in programming. Industry professionals will address the critical aspects of the business, from Idea through Exhibition. The method of instruction will be lecture, discussion and guest speakers. *Prerequisite: SMAD 201 and SMAD 202 and SMAD 203, plus SMAD 301 or SMAD 301L, plus junior or senior standing, or permission of instructor.*

SMAD 470. New Media and Society

3.00

Study of the key issues arising from the role of information and information technology in organizations and society. Emphasis on the spheres of social life in which new media technologies play a role: politics, community, economics, culture, personal and global contexts. Focus on a wide range of perspectives and on both theoretical and empirical research to examine new media's role in social capital and community. *Prerequisite: SMAD majors: SMAD 201 and SMAD 202 and SMAD 203, plus SMAD 301 or SMAD 301L and junior or senior standing; WRTC major: requires junior or senior standing or permission of instructor.*

SMAD 471. Media Ethics

3.00

Study and discussion of ethical principles and professional codes as applied to mass media production, covering journalism, advertising, public relations and entertainment, in all media forms. Emphasis on case studies. *Prerequisite: SMAD 301 or SMAD 301L and SMAD 201, SMAD 202 and SMAD 203 and Junior or Senior standing or permission of instructor*

SMAD 472. Media and Politics

3.00

Crosslisted with POSC 472, POSC 472L, POSC 472W, SCOM 472, SCOM 472L, SMAD 472L

A study of the media's role in political campaigns, concentrating on past/present election, the media's role in covering political parties and coverage of the governing process. Discussion of electronic and print will occur. Topics to be examined include campaign videos, CSPAN, political ads, editorial cartoons, TV debates, convention coverage and radio talk show commentary.

SMAD 472L. Media and Politics

3.00

Crosslisted with POSC 472, POSC 472L, POSC 472W , SCOM 472, SCOM 472L, SMAD 472

A study of the media's role in political campaigns, concentrating on past/present election, the media's role in covering political parties and coverage of the governing process. Discussion of electronic and print will occur. Topics to be examined include campaign videos, CSPAN, political ads, editorial cartoons, TV debates, convention coverage and radio talk show commentary.
Prerequisite: Studies Abroad-London

SMAD 490. Special Studies

3.00

An independent study for students to pursue individual research under the guidance of a faculty adviser. *Prerequisite: Senior SMAD majors in good standing and permission of the school director.*

SMAD 495. Internship in Media Arts and Design

1.00 - 2.00

An off-campus program prepared and monitored on an individual student basis. Internships are designed to provide practical experience in converged and interactive media, corporate communication, digital video and cinema, and journalism. *Prerequisite: Permission of the school director and the media facility involved. Student must meet criteria and application procedures established in each concentration. May be repeated up to four credits.*

SMAD 497. Advanced Projects in Media Arts and Design

3.00

This advanced course will enable students to collaborate to create diverse media projects. Projects may be designed to focus on one or many concentrations, and are intended to provide a culminating media creation experience. *Prerequisite: Junior or Senior SMAD Fully Admitted Majors or Permission of the Instructor.*

SMAD 498. Senior Seminar in Media Arts and Design

3.00

The study and research in the history and philosophy of the function of mass communication in society. Consideration of topics relating to problems of communication systems, technological freedoms, and press freedom and responsibilities. *Prerequisite: SMAD 201 and SMAD 202 and SMAD 203 , plus SMAD 301 or SMAD 301L SMAD 301L , plus junior or senior standing, or permission of instructor.*

SMAD 499A. Honors

1.00

SMAD 499B. Honors

3.00

SMAD 499C. Honors

2.00

MSSE 101. Orientation to the Profession

1.00

Provides information about preparation programs and careers for teachers of the middle and high school levels. Student participate in reflective activities for making personal and professional decisions about teaching and also engage in a service learning project. *Prerequisite: Students are responsible for transportation to field placements at local schools.*

MSSE 201. Introduction to Social Studies Education Seminar

3.00

The course will introduce students to social studies education through exploration of questions including: What is social studies education? Why teach social studies? What is the role of social studies content in the world of a teacher? What makes a social studies educator? Students will learn through class discussions, field based classroom observations and guest speakers. Students should come to class prepared to challenge their preconceived notions surrounding social studies education.

MSSE 240. Foundations of General Education 6-12

3.00

This course is designed to provide an overview of the structure and curriculum of the secondary (6-12) general education classroom. Students will learn assessment requirements of general secondary classrooms and the parameters under which teachers in general secondary classrooms must function.

MSSE 370. General Instructional Methods for Grades 6-12

3.00

This general teaching methods course provides a solid foundation for planning curriculum and instruction for middle and high school students. Topics include engaging adolescent learners, lesson design, instructional strategies, and assessment models. *Prerequisite: Admission to teacher education and PSYC 160 for secondary education students; Admission to teacher education, EDUC 310, MIED 311 and LED 312 for middle education students. Corequisite: For secondary education: MSSE 371 and EDUC 310. For middle education: MSSE 371.*

MSSE 371. Clinical Experience in Adolescent Education

1.00

MSSE 371 includes an opportunity to work with adolescent learners through a 15-hour service-learning component. In addition, we will explore the needs and challenges of adolescent learners, visit a local middle or high school, explore the art of teaching, and have multiple peer teaching opportunities. Throughout the semester, you will be prompted to reflect on your observations and teaching experiences in order to better understand the complexities inherent in teaching as well as your own personal beliefs, strengths and areas for growth. *Prerequisite: PSYC 160 for secondary education students; EDUC 310, MIED 311 and LED 312 for middle education students. Corequisite: For secondary education: MSSE 370 and EDUC 310. For middle education: MSSE 370.*

MSSE 403. Behavior and Classroom Management in a Diverse Society

3.00

This course is designed to provide students with an understanding of and skill to apply classroom and behavior management techniques and interventions, including techniques that promote emotional well-being and teach and maintain behavioral conduct and skills consistent with norms, standards and rules of the educational environment. Diverse approaches for classroom and behavior management based upon behavioral, cognitive, affective, social and ecological theory and practice will be learned.

MSSE 425. Assessment in Middle and Secondary Education

3.00

This course is designed to prepare prospective teachers to create and evaluate both formal and informal assessment strategies. Candidates will construct instruments ranging from formative learning checks to summative tests and projects/rubrics. Candidates will also learn to analyze assessment results in order to gauge student progress and adjust instruction appropriately.

MSSE 430. Leadership Through Mentorship – Valley Scholars Mentoring

3.00

This course is designed to prepare and support JMU students as they begin a mentoring relationship with students in the area schools. JMU students will experience guest speakers and activities to assist them in their role helping area adolescents set and maintain the trajectory of their lives toward a college experience. By establishing positive relationships and modeling desirable characteristics of a college student, JMU students will provide support and guidance for the adolescent learners with which they engage.

MSSE 435. Valley Scholars Mentoring Continued

1.00-2.00

This course is designed to support JMU students as they continue to mentor adolescent learners in area schools. Through readings, activities and experiences, JMU students will continue to build the skills first introduced in MSSE 430. By fostering healthy relationships and modeling desirable characteristics of a college learner, JMU students will provide support and guidance for adolescent students transitioning from 8th to 9th grade. *Prerequisite: MSSE 430.*

MSSE 450. Internship Seminar

2.00

The internship seminar is designed to promote reflective decision-making by students engaged in their student teaching experience. The seminar setting offers students an opportunity to discuss their internship experiences in detail and reflect on the implications of that experience for their future practice. Teacher candidates will have the opportunity to demonstrate and articulate their growth as professionals as well as the effects of their teaching on student learning. *Corequisite: MSSE 475.*

MSSE 460. Differentiation for Adolescents

3.00

This course is designed to assist teacher candidates in meeting the diverse needs of adolescent learners. Participants will gain an increased understanding of how adolescents differ in their approaches to learning and how a responsive classroom can address these needs. Specific topics addressed include developing a positive classroom environment, using ongoing assessment to identify student needs, utilizing a variety of grouping strategies, designing instruction and assessment at an appropriate level of challenge, and engaging students in equally respectful tasks.

MSSE 470E. English/Language Arts Teaching Methods, Grades 6-8

3.00

Specific instructional and assessment techniques and methods targeted for the middle school learner for middle and secondary teachers in their respective discipline areas. Competencies to be developed will include discipline-specific planning strategies, instructional models, assessment of student learning, etc. *Prerequisite: MSSE 240 or MSSE 370. Corequisite: MSSE 471E.*

MSSE 470H. Social Studies Teaching Methods, Grades 6-8

3.00

Specific instructional and assessment techniques and methods targeted for the middle school learner for middle and secondary

teachers in their respective discipline areas. Competencies to be developed will include discipline-specific planning strategies, instructional models, assessment of student learning, etc. *Prerequisite: MSSE 240 or MSSE 370. Corequisite: MSSE 471H.*

MSSE 470M. Mathematics Teaching Methods, Grades 6-8

3.00

Specific instructional and assessment techniques and methods targeted for the middle school learner for middle and secondary teachers in their respective discipline areas. Competencies to be developed will include discipline-specific planning strategies, instructional models, assessment of student learning, etc. *Prerequisite: MSSE 240 or MSSE 370. Corequisite: MSSE 471M.*

MSSE 470S. Natural Sciences Teaching Methods, Grades 6-8

3.00

Specific instructional and assessment techniques and methods targeted for the middle school learner for middle and secondary teachers in their respective discipline areas. Competencies to be developed will include discipline-specific planning strategies, instructional models, assessment of student learning, etc. *Prerequisite: MSSE 240 or MSSE 370. Corequisite: MSSE 471S.*

MSSE 471E. Field Experience in Middle Grades Education English

1.00-3.00

Provides practical classroom experience for teacher education candidates in the middle and secondary education programs under the supervision of an in-service teacher and a clinical professor. Students engage in classroom activities that provide an opportunity for them to practice the strategies and concepts learned in the methods course. Students are responsible for transportation to field placements at local schools. *Corequisite: MSSE 470E.*

MSSE 471H. Field Experience in Middle Grades Education Social Studies

1.00-3.00

Provides practical classroom experience for teacher education candidates in the middle and secondary education programs under the supervision of an in-service teacher and a clinical professor. Students engage in classroom activities that provide an opportunity for them to practice the strategies and concepts learned in the methods course. Students are responsible for transportation to field placements at local schools. *Corequisite: MSSE 470H.*

MSSE 471M. Field Experience in Middle Grades Education Mathematics

1.00-3.00

Provides practical classroom experience for teacher education candidates in the middle and secondary education programs under the supervision of an in-service teacher and a clinical professor. Students engage in classroom activities that provide an opportunity for them to practice the strategies and concepts learned in the methods course. Students are responsible for transportation to field placements at local schools. *Corequisite: MSSE 470M.*

MSSE 471S. Field Experience in Middle Grades Education Science

1.00-3.00

Provides practical classroom experience for teacher education candidates in the middle and secondary education programs under the supervision of an in-service teacher and a clinical professor. Students engage in classroom activities that provide an opportunity for them to practice the strategies and concepts learned in the methods course. Students are responsible for transportation to field placements at local schools. *Corequisite: MSSE 470S.*

MSSE 475. Internship in Middle and Secondary Education

8.00

During this internship, JMU teacher candidates will experience the full range of conditions and tasks expected of a teacher for students in grades 6-12 (or 6-8). Candidates will be expected to develop and demonstrate competencies in teaching with the supervision and support of experienced teachers. Furthermore, they will demonstrate mastery of the university's eleven conceptual framework competencies. *Corequisite:* MSSE 450.

MSSE 480E. English/Language Arts Content Methods, Grades 9-12

3.00

Research findings regarding the multiple dimensions of teaching in English/language arts will be used to identify the most effective writing, creative arts and cognitive teaching methods for teaching students 9th-12th grade. The first half of the course will focus on the writing process (i.e., narrative and persuasive) and cognitive models of instruction and the second half of the course will focus on literature, research and writing (multi-genre project) as well as supporting the three-day English/language arts unit planned in methods and taught in MSSE 481E. *Corequisite:* MSSE 481E.

MSSE 480H. Social Studies Content Methods, Grades 9-12

3.00

The aim of this course is to build, expand and draw from the social studies methods explored in MSSE 470H. This course gives students the opportunity to continue to consider, analyze and critically examine the details of their teaching career and the purpose of social studies education. Examples of some of the questions examined are: What is "good" teaching? What is the purpose of social studies education? What should students learn? What knowledge is most valuable? How will I meet the needs of diverse students? What are diverse methods of delivering instruction? How does one's belief about the purpose of education shape their pedagogy? *Prerequisite:* MSSE 470H. *Corequisite:* MSSE 481H.

MSSE 480M. Mathematics Content Methods, Grades 9-12

3.00

This course is designed to address mathematics-specific methods of instruction for prospective high school mathematics teachers (grades 9-12). Students will develop techniques for planning and assessing student-centered mathematics instruction. Through this course, students will become mathematics teachers who can (1) Support their practice and sustain their own learning over time; (2) reflect upon their practice, evaluate it and make changes when necessary; (3) collaborate with their colleagues to improve instruction; and (4) stay informed of current innovations and trends in the field. *Prerequisite:* MSSE 470M. *Corequisite:* MSSE 481M.

MSSE 480S. Science Content Methods, Grades 9-12

2.00

This course is designed to help the student evaluate and consume research findings about science teaching that identify the most effective instructional strategies for teaching science to students in grades 6-12. Emphasis will be on developing plans for employing the strategies and making appropriate instructional decisions based on instructional goals, the learner and available resources. *Corequisite:* MSSE 481S

MSSE 481E. English Field Placement, Grades 9-12 (Lab)

1.00

Consistent with the JMU conceptual framework, this practicum is designed to provide the necessary experience in order for students to be successful in their student teaching placement and support major components of their course work. *Corequisite:* MSSE 480E.

MSSE 481H. Social Studies Field Placement, Grades 9-12 (Lab)

1.00

Consistent with the JMU conceptual framework, this practicum is designed to provide the necessary experience in order for students to be successful in their student teaching placement and support major components of their course work. *Corequisite: MSSE 480H.*

MSSE 481M. Mathematics Field Placement, Grades 9-12 (Lab)

1.00

Consistent with the JMU conceptual framework, this practicum is designed to provide the necessary experience in order for students to be successful their student teaching placement and support major components of your their work. *Corequisite: MSSE 480M.*

MSSE 481S. Science Field Placement, Grades 9-12 (Lab)

1.00

Consistent with the JMU conceptual framework, this practicum is designed to provide the necessary experience in order for students to be successful in their student teaching placement and support major components of their course work. *Corequisite: MSSE 480S.*

MSSE 489E. Special Topics in English Pedagogical Content Knowledge

3.00

This course will examine connections between theory and practice, and the relationship between knowing English language arts content and considering to whom that content is delivered. Pedagogy, the art and science of teaching, is enacted in varied ways and is specific to English. In this course, learners will collaborate in order to learn research-based practices that support student learning and the development of dispositional frameworks.

MSSE 489H. Special Topics in Social Studies Pedagogical Content Knowledge

3.00

This course will examine connections between theory and practice, and the relationship between knowing social studies content and considering to whom that content is delivered. Pedagogy, the art and science of teaching, is enacted in varied ways and is specific to social studies. In this course, learners will collaborate in order to explore research-based practices that support student learning and the development of dispositional frameworks.

MSSE 489M. Special Topics in Math Pedagogical Content Knowledge

3.00

This course will examine connections between theory and practice, and the tensions that are created when pre-service teachers of mathematics examine the relationship between knowing content and considering to whom that content is delivered. Pedagogy, the art and science of teaching, is enacted in varied ways and is specific to math. In this course, learners will collaborate in order to learn research-based practices that support student learning and the development of dispositional frameworks.

MSSE 490. Special Studies in Education

1.00 - 3.00

A supervised, individualized study of one or more issues and/or problems in middle and/or secondary education. *Prerequisite: The faculty adviser and the program coordinator must approve the plan for the study.*

MIED 311. Field Experience in Middle Education

1.00

Students devote 60 clock hours to classroom activities that emphasize diversity and literacy in middle schools under university and public school supervision. Satisfactory performance in this course is required for continuing in teacher education. *Corequisite: EDUC 310 for middle education students.*

MIED 489. Effective Practices in Middle Education

3.00

This course is designed to provide students with research, theories and practices regarding teacher leadership and collaboration in school contexts and methods for addressing school-based improvement efforts and processes. Specific attention is given to collaboration and leadership toward community involvement and communication in middle schools.

MSCI 100. Leadership Laboratory

2.00

A laboratory in the development of leadership, stressing the practical application of leadership principles, techniques, styles and responsibilities. Participation as a member of a team or as a leader of the team given responsibility for accomplishment of given tasks. *Corequisite: MSCI 101 or MSCI 102.*

MSCI 101. Introduction to Leadership and the Army

2.00

Introduction to various leadership styles and their effect on organizations; an introduction to the organization of the U.S. Army, its roles and missions, customs and traditions; effective writing and oral presentation techniques; orienteering and the use of lensatic compass; principles of physical conditioning. *Corequisite: MSCI 100.*

MSCI 102. Leadership Development Fundamentals

2.00

Introduction to the basic principles of leadership; developing a personal leadership style; effective writing and speaking skills; introduction to leadership in small tactical units; fundamentals of first aid, land navigation and marksmanship; principles of personal conditioning. *Corequisite: MSCI 100.*

MSCI 150. American Military History

3.00

An extensive look into the major engagements of the United States military from the Colonial period through the present. Particular attention will be paid to developing an understanding of the factors that have helped shape the unique way America wages war. This course considers the role and use of armed forces in relation to the social, cultural, political, economic, and technological development of the United States. It will not only address such themes as wartime strategy, operational tactics, and combat technology, but also the impact of warfare on society and on the remembrances of ordinary men and women in uniform. Significant attention will be given to the evolution of civil-military relations, the advent of professionalism in the military, the non-military uses of the military, and the military's role as a tool for global power.

MSCI 200. Intermediate Leadership Laboratory

2.00

An intermediate leadership laboratory in the sequential process of leadership development, this course stresses the practical application of leadership principles and responsibilities and the exploratory development of personal leadership techniques and styles. The intermediate leadership laboratory focuses on leadership planning and execution and performance and evaluation as both a team member and a leader of a 10 to 30 person team. Cadets are given responsibility for accomplishing collective tasks

and for the evaluation, counseling, leading and mentoring of 10 to 12 subordinates and team members. *Prerequisite: Contracting into the ROTC Basic Course (MSCI 101, MSCI 102 and MSCI 100). Department head approval required. To enroll in this lab section, students must obtain a sports physical or similar medical clearance. Contact the Military Science office for additional information.*

MSCI 201. Leadership Styles - Theory and Application

2.00

A study of individual leadership styles and techniques, using historical case studies, to introduce the branches and specialties of the Army. The focus of this course is communication and goal setting in small organizations, effective writing and public speaking, and performance and evaluation as the leader of a five-member team required to accomplish tasks in a practical setting. Students also serve a member of a 10-person team responsible for accomplishing practical military and team-building tasks in a field setting. *Corequisite: MSCI 100, MSCI 200 for contracted Cadets in JMU ROTC.*

MSCI 202. Developing Leader Skills

2.00

This course focuses on analyzing missions to determine specified and implied tasks; organizing and conducting a briefing, preparing a concise written directive (operations order), and detailing how a team will accomplish its tasks. Performance and evaluation of Cadets as the leader of a five person team during a 44-hour, off-campus leadership practicum and evaluation of physical fitness preparedness for attendance at Cadet Profession Development Training are also components of this course. *Corequisite: MSCI 100, MSCI 200 for contracted Cadets in JMU ROTC .*

MSCI 280. Internship in Military Leadership

6.00

MSCI students may elect to participate in a 4-week leadership internship. The internship develops leadership skills through exposure to interactive personal and group exercises. Students will learn how and when to lead others and the importance of teamwork in accomplishing a goal.

MSCI 300. Advanced Leadership Laboratory

3.00

An advanced laboratory in the development of leadership, stressing the practical application of leadership principles, techniques, styles and responsibilities. For juniors, the advanced leadership laboratory focuses on preparation, execution, recovery and reflection. For seniors, the advanced leadership laboratory focuses on planning, resourcing, supervision and evaluation. Performance and evaluation as a leader of a 10 to 30 person team given responsibility for accomplishment of given tasks. Responsible for the evaluation, counseling and mentoring of 10 to 30 subordinates and team members. *Prerequisite: MSCI 100, MSCI 101, MSCI 102, MSCI 201, and MSCI 202. Department head approval required.*

MSCI 310. Leading Small Organizations

3.00

Ethical dilemmas in leadership – when organizational goals conflict with member welfare; the role of policy and standard procedures in organizations; continued practice in effective writing and oral presentations; performance as a leader of a 10 person team in practical exercises; evaluation as an instructor of a period of instruction for 30 subordinates; evaluation as a leader of a 10 to 30 person team in a 44 hour, off-campus leadership practicum. *Prerequisite: MSCI 101, MSCI 102, MSCI 201 and MSCI 202 or placement credit as determined by the professor of military science. Corequisite: MSCI 300.*

MSCI 320. Developing Advanced Leader Skills

3.00

Planning for the unexpected in organizations under stress; developing alternate courses of action which are viable with the given constraints; how to delegate tasks and supervise subordinate leaders; avoiding micro-management – the when and how of providing guidance and direction; time management – the "backward planning process"; evaluation of a 10 to 30 person team within tactical and nontactical settings; analysis of assigned tasks, preparation of a written directive to accomplish these tasks and oral presentation to others in a concise briefing. *Corequisite: MSCI 300.*

MSCI 355. American Women At War

3.00

Crosslisted with WGSS 355

This course invites students to engage a series of issues about the role of women in the US military. This course will examine the contributions & experiences of women who served during the American Revolution, the U.S. Civil War, WW I & II, Korea, Vietnam and the Persian Gulf War(s). Also included in this course is an examination of how women in military service both past and present are an instrument for societal change in America specifically in promoting the cause of women's rights.

MSCI 360. Gender & Leadership

3.00

Explore gender in leadership by focusing on social scientific research in sociology, psychology, political science, economics, management, organizational behavior, women's studies and leadership that illuminates the difficulties women experience in attaining and being seen as effective in top leadership positions.

MSCI 390. The Combat Experience

3.00

The course will explore direct participation in military combat. It relies primarily on oral history gained from filmed and in-person interviews conducted by the instructor with combat veterans. Participants range from WWII to the current Middle East conflict.

MSCI 400. Advanced Leadership Laboratory II

3.00

An advanced laboratory in the development of leadership, stressing the practical application of leadership principles, techniques, styles and responsibilities. For seniors, the advanced leadership laboratory focuses on planning, resourcing, supervision and evaluation. Performance and evaluation as a leader of a 10 to 30 person team given responsibility for accomplishment of given tasks. Responsible for the evaluation, counseling and mentoring of 10 to 30 subordinates and team members.

MSCI 410. Seminar Command Management

3.00

Studies in advanced leadership and management; how to assess organizational cohesion and develop strategies to improve it; examine and utilize components of the army's training cycle; methods of instruction, planning and conducting of classes to be taught at leadership lab; conduct of oral After-Action Reviews and preparation of written After-Action Reports; the counseling process for improving individual and group performance of subordinates. *Corequisite: MSCI 300.*

MSCI 420. Seminar on Officership Transition

3.00

Introduction to Army management systems – personnel and logistics; the military's legal system and its application at the

company level; the officerNCO relationship; The Officer Efficiency Report and its support form; establishment of project time lines with milestones, goals and In-Progress Reviews; book review on a required leadership book from chief of staff Army required reading list. *Corequisite: MSCI 300.*

MSCI 480. Internship in Advanced Military Leadership

6.00

Upper-level MSCI students are required to participate in a 5-week leadership internship. The internship provides practical application of leadership principles, techniques, styles and responsibilities. Each student receives a performance evaluation as a leader of a 10-30 person group for every accomplished task.

MSCI 490. Special Studies in Military Science

1.00 - 3.00

Designed to give students an opportunity to do upper-division independent study in selected areas under the supervision of a faculty member in the Military Science department. *Prerequisite: Department consent required.*

MUS 100. Keyboard Skills

1.00

A beginning level keyboard skills class for music majors. Includes basic techniques, sight reading, elementary repertoire and functional theory-related keyboard skills. *Prerequisite: Music Majors*

MUS 101. Keyboard Skills II

1.00

An elementary, but not beginning, level keyboard skills class for music majors. Includes basic techniques, sight reading, elementary repertoire and functional theory-related keyboard skills. *Prerequisite: Music majors only. MUS 100 or placement by audition/interview.*

MUS 120. Diction for Singers

1.00

The study of English and Italian pronunciation using the phonetic alphabet with emphasis on the performance of song literature in each language. Open to music majors and minors or by permission of instructor. *Prerequisite: Music Majors*

MUS 121. Diction for Singers II

1.00

The study of French and German pronunciation using the phonetic alphabet with emphasis on the performance of song literature in each language. *Prerequisite: Music Majors or Minors only.*

MUS 131. Fundamentals of Music

3.00

Covers basic information in music theory, basic ear-training and sight-singing skills, and basic keyboard skills designed for the non-music major.

MUS 140. Introduction to Music Theory and Aural Skills

4.00

Designed for non-music majors, music minors, musical theater majors, and students wishing to take songwriting, this course introduces students to the fundamental materials of music, both in written and aural form. Topics covered include: notation, rhythm and meter, key signatures, scales, intervals, triads, seventh chords, lead-sheet symbols, cadence, basic harmonic progressions, and form in popular music. This course may not be taken as a substitute for MUS 141 or MUS 143/144.

MUS 141. Foundations of Music Theory

3.00

In this course students will master elements of musical literacy, including such concepts as rhythm and meter, clef reading, scales, key signatures, intervals, triads, and seventh chords. Placement in this course is determined by diagnostic exam and recommendation from the music theory and composition area in the School of Music.

MUS 143. Aural Skills I

1.00

Study of ear training and sight singing involving diatonic materials. Includes melodic, harmonic and rhythmic dictation, and singing with solmization of melodic exercises.

MUS 144. Aural Skills II

1.00

Continuation of MUS 143. Study of ear training and sight singing involving diatonic materials. Includes melodic, harmonic and rhythmic dictation, and singing with solmization of melodic exercises. *Prerequisite: MUS 143*

MUS 146. Jazz Theory and Ear Training

2.00

This course introduces students to the basic elements of jazz melodic, rhythmic, and harmonic structure and style. Written analytical techniques and aural skills development will be emphasized. *Prerequisite: MUS 141, MUS 143 or permission from the instructor.*

MUS 150. Introduction to Technological Applications in Music

1.00

This course is designed to provide students with an overview of multiple applications of technology in music teaching. Topics to be covered include, but are not limited to: notation software, instructional software (including creative, practice, and performance), MIDI, productivity applications, and digital audio/recording.

MUS 195. Recital Attendance

0.00

Required of all music majors for the first six semesters of their enrollment as a major. Successful completion of the course requires attendance at a specified number of approved recitals/concerts each semester. For complete course guidelines, please refer to the Undergraduate Music Student Handbook.

MUS 200. Music in General Culture [C2VPA]

3.00

Designed to increase the student's perceptual ability in listening to music and to encourage an interest in both familiar and

unfamiliar music. Primary study will be on music from the classic, Western heritage. Folk, jazz, popular and non-Western music may also be considered. May be used for general education credit. May not be used for major credit.

MUS 200H. Music in General Culture - Honors [C2VPA]

3.00

Designed to increase the student's perceptual ability in listening to music and to encourage an interest in both familiar and unfamiliar music. Primary study will be on music from the classic, Western heritage. Folk, jazz, popular and non-Western music may also be considered. May be used for general education credit. May not be used for major credit. *Prerequisite: Honors Students*

MUS 200M. Music in General Culture - Montreal [C2VPA]

3.00

Designed to increase the student's perceptual ability in listening to music and to encourage an interest in both familiar and unfamiliar music. Primary study will be on music from the classic, Western heritage. Folk, jazz, popular and non-Western music may also be considered. May be used for general education credit. May not be used for major credit.

MUS 202. Keyboard Skills III

1.00

An intermediate level course in functional keyboard skills for music majors. Includes sight reading, transposition, harmonization, improvisation, playing by ear and accompanying techniques. Music majors only. *Prerequisite: MUS 101 or placement by audition/interview.*

MUS 203. Music in America [C2VPA]

3.00

Knowledge and skills to increase the student's perceptual ability in music listening with a survey of American music; examining relationships between popular and classical music styles. May be used for general education credit. May not be used for major credit.

MUS 204. History of Rock

3.00

History of rock is a music appreciation course designed to develop an understanding of both musical and cultural roots of rock music and the ability to hear a direct relationship between those roots and current popular music. A major component of the course is a survey of the history of 20th century American popular music.

MUS 206. Introduction to Global Music [C2VPA]

3.00

A survey of various world music traditions, including those of Asia, the Pacific, Europe, Africa and the Americas. The course will focus on aesthetics, musical forms and styles, and the relationship between music and other arts. Emphasis will be placed on historical, religious, and cultural events and their influence on the creation and development of music. May be used for general education credit.

MUS 206H. Introduction to Global Music - Honors [C2VPA]

3.00

A survey of various world music traditions, including those of Asia, the Pacific, Europe, Africa and the Americas. The course will focus on aesthetics, musical forms and styles, and the relationship between music and other arts. Emphasis will be placed on historical, religious, and cultural events and their influence on the creation and development of music. May be used for general education credit. *Prerequisite: Honors Students*

MUS 220. Assessment Tests – School of Music

0.00

Required, non-credit School of Music Assessment Test course which is to be taken before the Bachelor of Music degree is received, normally in the final spring semester of senior year. *Prerequisite: Music majors with Senior standing*

MUS 240. Jazz Improvisation Laboratory I

2.00

Presents the fundamentals of improvisation in both jazz and popular musical styles. The class emphasis will be on creative work although some theory and chord nomenclature will be taught. Both vocal and instrumental musicians will be permitted to enroll, including both the general student and the music major *Prerequisite: Music major or jazz minor or permission of the instructor.*

MUS 241. Diatonic and Chromatic Harmony

3.00

This course investigates harmony and phrase structure in common-practice works. Students will develop an awareness for common harmonic progressions and syntax and an understanding of such chromatic harmonic practices as tonicization and modulation. *Prerequisite: Successful completion of diagnostic exam or grade of "C-" or higher in MUS 141.*

MUS 243. Aural Skills III

1.00

Continuation of MUS 144. Continued study of sight singing and ear training with diatonic and chromatic materials through exercises in melodic, harmonic and rhythmic dictation, and singing of melodic exercises with solmization. *Prerequisite: MUS 144*

MUS 244. Aural Skills IV

1.00

Continuation of MUS 243. Continued study of sight singing and ear training with diatonic and chromatic materials through melodic, harmonic and rhythmic dictation exercises and singing of melodic exercises with solmization. Introduction to modal and 20th-century materials. *Prerequisite: MUS 243*

MUS 250. Form and Analysis: Baroque and Classical

3.00

This course has two main goals: To familiarize students with Baroque-era imitative forms and Classical-era forms, including binary, ternary, sonata and concerto, among others; and to continue students' study of chromatic harmony. *Prerequisite: A grade of "C-" or higher in MUS 241.*

MUS 251. Form and Analysis: Romantic

3.00

This course has two main goals: To familiarize students with Romantic-era developments in forms such as binary, ternary, sonata and concerto, among others; and to continue students' study of chromatic harmony. *Prerequisite: A grade of "C-" or higher in MUS 241.*

MUS 252. Analysis of Music 1900-1950

3.00

An investigation of music from the first half of the twentieth century. Students will gain an understanding of compositional techniques and formal processes in atonal and centric music and an awareness of compositional trends during the time period. *Prerequisite: Completion of diagnostic exam or a grade of "C-" or higher in MUS 141.*

MUS 253. Analysis of Music 1950-Present

3.00

An investigation of music from the second half of the twentieth century and the beginning of the twenty-first century. Students will gain an understanding of compositional techniques and formal processes and an awareness of compositional trends during the time period. *Prerequisite: Successful completion of the diagnostic exam or a grade of "C-" or higher in MUS 141.*

MUS 254. Form and Analysis: Popular Music

3.00

An investigation of popular music in the twentieth and twenty-first centuries. Students will develop an understanding of formal, harmonic, metric, rhythmic and timbral aspects of popular music in a variety of eras as well as an awareness of its historical trends. *Prerequisite: Successful completion of the diagnostic exam or a grade of "C-" or higher in MUS 141.*

MUS 256. Contrapuntal Techniques

3.00

Study of counterpoint through analysis and composition. Although the course emphasizes eighteenth-century counterpoint, other kinds of counterpoint (such as sixteenth- or twentieth-century) may also be covered. *Prerequisite: Grade of "C-" or higher in MUS 241.*

MUS 303. Keyboard Skills IV

1.00

A moderately advanced course in functional keyboard skills for music majors. Includes sight reading, transposition, harmonization, improvisation, playing by ear and accompanying techniques. Designed to prepare music major students for required Keyboard Proficiency Examination. Music majors only. *Prerequisite: MUS 202 or placement by audition/interview.*

MUS 303A. Keyboard Skills IV

1.00

A moderately advanced course in functional keyboard skills for music majors. Includes sight reading, transposition, harmonization, improvisation, playing by ear and accompanying techniques. Designed to prepare music major students for required Keyboard Proficiency Examination. *Prerequisite: Music majors only. MUS 202 or placement by audition/interview.*

MUS 304. Advanced Keyboard Skills

1.00

Designed for music majors who are required to minor in piano and/or organ. The emphasis is on sight reading and other keyboard skills beyond those covered in the class piano MUS 303 course. This is a group class which can be repeated. *Prerequisite: MUS 303.*

MUS 305. Jazz Keyboard Skills

1.00

This course introduces and develops the keyboard skills necessary to construct piano accompaniments in the jazz idiom using a progression of chord symbols or a lead sheet. Successful completion of this course is required in order to enroll in upper level courses in the Jazz Studies major. *Prerequisite: MUS 101 or instructor permission*

MUS 317. Basic Conducting

2.00

Designed to acquaint the student with the fundamental elements of conducting technique, such as beat patterns, cueing, expression, transposition and score reading, with an emphasis on applying these techniques in practical conducting experiences involving vocal and instrumental forces. *Prerequisite: MUS 241 and MUS 144 or junior standing.*

MUS 318. Intermediate Choral Conducting

2.00

Consists of the further application of basic conducting skills learned in MUS 317 to the choral situation with emphasis on baton techniques, score reading, and preparation and introduction to choral literature. *Prerequisite: MUS 317.*

MUS 319. Intermediate Instrumental Conducting

2.00

A continuation of basic conducting to develop skills in baton technique with emphasis on advanced literature for public school use. Included are score sight-reading skills and literature selection. *Prerequisite: MUS 317.*

MUS 341. Advanced Analysis

2.00

An exploration of further elements of chromatic harmony and tonal relationships found in late- and post-Romantic music and in other styles, as appropriate, primarily through analysis of relevant literature, composition exercises, reading and discussion. *Prerequisite: MUS 241.*

MUS 343. Basic Movement and Acting Skills for the Opera Stage

2.00

A studio environment dedicated to the study of gesture, basic dance, movement, and acting skills for classical singers. Emphasis will be given to score interpretation, movement phrasing, and physical expression of musical ideas. Final assessment will be based on duet or small scene performance. May be repeated for credit with the approval of the instructor.

MUS 345. Small Ensemble Jazz Arranging

3.00

This course introduces students to the techniques of arranging for two-horn, three-horn, and four-horn jazz ensembles. Students

will study the classic repertoire of small jazz groups between 1930 and the present day, and create and record small ensemble arrangements in various styles. *Prerequisite: MUS 146, MUS 305 or permission of the instructor.*

MUS 346. Large Ensemble Jazz Arranging

3.00

This course introduces students to the techniques of arranging for large jazz ensemble ("big band"). Students will study representative works of seminal big band composers active between 1930 and the present day, and create and record a full big band arrangement. *Prerequisite: MUS 146, MUS 305, MUS 345, or permission of the instructor.*

MUS 352. Music Composition

2.00 - 3.00

Individual/seminar instruction in composition. Compositions are performed publicly. May be repeated. *Prerequisite: MUS 241 and permission of instructor.*

MUS 356. History of Jazz in America

3.00

A study of American jazz with particular emphasis on its practices with reference to principal performers and composers of jazz-style periods.

MUS 356M. History of Jazz - Montreal

3.00

MUS 371. Private Piano Pedagogy

3.00

Procedures and materials for the teaching of private piano students, especially elementary and intermediate. Piano solo and ensemble literature for children are emphasized. The problems of the adult beginner are studied.

MUS 372. Supervised Private Piano Teaching

1.00

Supervised practice teaching in private lesson settings involving beginning and intermediate piano students of various ages and abilities. *Prerequisite: MUS 371.*

MUS 373. Music History

3.00

An introduction to the discipline of music history, incorporating the study of western music from antiquity through the early Baroque Era.

MUS 374. Music History

2.00

A history of Western music from 1600 through 1827.

MUS 375. Music History

3.00

A history of western music from the late Romantic era through the 20th century.

MUS 395. Junior or Senior Half Recital

0.00

Presentation of a half recital, representative in quality of passing performance level 6 or 7 as set by the pertinent performance area faculty. Memorization is required in those areas that traditionally expect it. Course to be graded on credit/no credit basis.

Prerequisite: Prerequisites: Junior standing and approval of the performance faculty of the performer's area.

MUS 420. Piano Technology

1.00 - 2.00

The acoustical and mechanical design and history of the piano. This course includes the theory of tuning and temperaments; procedures and techniques of regulating and voicing pianos; and an additional hour for tuning lab.

MUS 429. Introduction to Intentional Music

1.00

This course explores intentional uses of music to achieve outcomes with atypical populations. Students will observe intentional music activities in varied settings, study research-based applications of intentional music, and develop intentional music activities for case study populations. They will also reflect on their own musical identities, and those of potential clients, to develop skills in communication and planning.

MUS 430. Music and Human Services: Experiences and Practicum

2.00

This course integrates psychological and cultural functions of music with activities and goals of human service organizations. Representatives of human services organizations are invited to explain their interventions with diverse populations. Students will be offered practicum experiences in these agencies. Through relating these experiences to the class, in seminar fashion, interdisciplinary practices will be illustrated.

MUS 435. Instrumentation

3.00

In-depth practicum on idiomatic writing for orchestral instruments both individually and in an ensemble setting. Students are introduced to the characteristics and limitations of each instrument with written exercises, listening and score study examples from significant orchestral works, demonstrations by representative instrumentalists, and small-scale scoring projects.

Prerequisite: MUS 241 and MUS 352 (at least one semester) or permission of the instructor.

MUS 440. Jazz Improvisation Laboratory II

2.00

Presents intermediate to advanced improvisation skills in the jazz idiom alone. There is an emphasis on the theoretical analysis of chord progressions as well as on creative musical application. The course concludes by introducing some advanced musical improvisation concepts. May be repeated. *Prerequisite:* MUS 240 or permission of the instructor.

MUS 440M. Jazz Improv Lab II - Montreal

2.00

Prerequisite: MUS 240 is the prerequisite.

MUS 441. Vocal Arranging

3.00

Arranging for vocal ensembles. Included will be fundamental concepts of orchestration. *Prerequisite: MUS 241 and MUS 244.*

MUS 442. Instrumental Arranging

3.00

Arranging for various instrumental ensembles, including fundamental concepts for orchestration. *Prerequisite: MUS 244.*

MUS 444. Counterpoint

2.00

Compositional and analytical study of 18th century Bach-style polyphony with detailed study of invention, fugue and chorale prelude. *Prerequisite: MUS 244.*

MUS 445. Orchestration

3.00

Survey of modern orchestration techniques building on the foundations established in MUS 435. Students will gain familiarity with current practice and nuances of scoring for large instrumental ensembles through examples from traditional and contemporary literature and small-scale scoring assignments. Students will focus on the preparation and production of a professional-quality score and orchestral parts leading to a reading session with the JMU Symphony Orchestra at the end of the term. *Prerequisite: MUS 435 or permission of the instructor.*

MUS 446. Jazz Composition

2.00

An introduction to techniques of jazz composition. Students will study classic jazz compositions and create original compositions utilizing various harmonic techniques. *Prerequisite: MUS 146, MUS 244, MUS 305*

MUS 450. Topics in Music Analysis

3.00

Analytical investigation of musical examples in a variety of styles. Topics vary. See department to request information about the topic for a given semester. Course may be repeated for different topics. *Prerequisite: MUS 244 and grade of "C-" or higher in any four of the following: MUS 141, MUS 241, MUS 250, MUS 251, MUS 252, MUS 253, MUS 254 or MUS 256.*

MUS 460. Piano Literature I

2.00

A survey of baroque and classical literature for the piano encompassing solo and concerto repertoire. An examination of literature for the clavichord, harpsichord and pianoforte.

MUS 465. Opera History and Literature

3.00

A survey study of the history of opera. Consideration will be given to the chronological development of all forms of music theatre with an emphasis on style characteristics through aural identification. *Prerequisite: Any four of the following music theory courses: MUS 141, MUS 241, MUS 250, MUS 251, MUS 252, MUS 253, MUS 254 or MUS 256 or permission of the instructor. Students are strongly encouraged to take MUS 250 or MUS 251 prior to registering for this class.*

MUS 467. Song Literature

3.00

A survey of vocal art-song literature in Western culture. *Prerequisite: Any four of the following music theory courses: MUS 141, MUS 241, MUS 250, MUS 251, MUS 252, MUS 253, MUS 254 or MUS 256 or permission of the instructor.*

MUS 470. Piano Literature II

2.00

A survey of romantic, impressionistic and 20th-century literature for the piano, including solo and concerto repertoire, with an emphasis on stylistic trends of the 20th century.

MUS 472. Instrumental Pedagogy

1.00

Presentations of instrumental methods, solo and ensemble literature related to the instrumental performer's own major area. Private instruction approaches and techniques are also considered with particular reference to the beginning player.

MUS 477. Vocal Pedagogy

2.00

Designed to acquaint the prospective teacher with techniques of vocal pedagogy, both scientific and empirical. The course involves study, practice and observation.

MUS 480. Advanced Seminar in Musicological Topics

3.00

An intensive study of a single topic in musicology or ethnomusicology. Topics change each semester, and may include studies of a specific musical issue (performance practice, etc.), a single composer's music, a single musical genre (the string quartet, etc.), or music at a specific time and/or place (music in fin de siècle Paris, music in modern South Africa, the second Viennese school, etc.). Fulfills the college of Visual Performing Arts writing-intensive requirement for the major. May be repeated for credit. *Prerequisite: MUS 480, MUS 373, MUS 374, and MUS 375 or permission of the instructor.*

MUS 485. Advanced Jazz Topics Seminar

3.00

An intensive study of a single topic in jazz studies. Topics change each semester, and may include studies of a specific musical issue (performance practice, etc.), a single composer's or performer's music (Duke Ellington, Miles Davis, etc.), a single musical genre (the development of big band style, etc), or a sociological study (jazz in Europe, jazz and American culture, etc.). May be repeated for credit. *Prerequisite: MUS 374 and MUS 356 or permission of the instructor.*

MUS 490. Special Studies in Music

1.00 - 3.00

Designed to give superior music students an opportunity to complete independent study under faculty supervision. *Prerequisite:* *Permission of the instructor and school director.*

MUS 495. Senior Graduation Recital

1.00

Presentation of a full recital, with the quality of performance to meet standards for admission to graduate school master's of music programs. Memorized recital presentations will be required in those areas which traditionally demand them. *Prerequisite:* *Senior Standing*

MUS 497. Senior Project in Theory

1.00

Analytical paper or other topic approved by the theory-composition area. Enrollment is for students who want to do graduate work in music theory.

MUS 498. Selected Topics in Music

1.00 - 3.00

Courses in music or music education which are of a topical nature. This may be repeated.

MUS 498P. Percussion Lit

2.00

MUS 499. Honors

6.00

This is a year long course.

MUS 499A. Honors

3.00

MUED 200. Small Ensemble for Instrumental Music Education Majors

0.00

This course will fulfill the NASM requirement for instrumental music education majors to gain experiences in small ensembles. Students enrolled in this course may complete the requirement through a variety of experiences approved by their academic advisor, including participation in String Ensembles, Camerata Strings, Collegium Musicum, Woodwind Ensembles, Guitar Ensemble, Percussion Ensembles, Jazz Chamber Ensembles, Collaborative Piano, Brass Chamber Ensembles.

MUED 201. Small Ensemble for Vocal Music Education Majors

0.00

This course will fulfill the NASM program requirement for vocal music education majors to gain experiences in small ensembles. Students enrolled in this course may complete the requirement through a variety of experiences approved by their academic

advisor, including participation in Treble Chamber Choir, Men's and Women's Chamber Choirs, Bach Aria Group, Madison Singers, Collegium Musicum, or Opera Theatre.

MUED 206. Instrumental Music Methods for Vocal MUED Majors

1.00

Provides vocal track music education majors with experiences, methods, and techniques for instrumental music instruction and a fundamental knowledge of and proficiency on woodwind, brass, percussion, and string instruments.

MUED 271. Music Education: A Professional Choice

1.00

Students engage with ethical, philosophical and pragmatic issues surrounding their choice to pursue professional licensure in PK-12 music education. This course includes observation of learning and teaching in elementary, middle, and high school music classrooms, as well as an introduction to the application of National Core Music Standards, Virginia Standards of Music for Learning, JMU's Conceptual Framework and JMU's Eight Key Questions. Course assignments and projects contribute to continued development of a digital portfolio.

MUED 273. Music Education: Professional Practice

1.00

Second course in the sophomore music education sequence. Builds on the foundation of philosophy, history and psychology of music teaching established in the first semester of the sequence (MUED 271) with an emphasis on the application of foundational knowledge to planning and leading instruction. Continued observation in PreK-12 and other settings with opportunities to teach. *Prerequisite: MUED 271.*

MUED 301. Woodwind Techniques

1.00

Instruction in the basic skills of playing and teaching standard woodwind instruments in a heterogeneous class situation. Various methods for woodwind teaching will be studied, and materials used in public school teaching will be examined and performed. MUED 301 each fall; MUED 302 each spring. *Prerequisite: Sophomore Standing; MUED 301 is prerequisite to MUED 302.*

MUED 302. Woodwind Techniques

1.00

Instruction in the basic skills of playing and teaching standard woodwind instruments in a heterogeneous class situation. Various methods for woodwind teaching will be studied, and materials used in public school teaching will be examined and performed. MUED 301 each fall; MUED 302 each spring. *Prerequisite: MUED 301 and Sophomore Standing.*

MUED 303. Brass Techniques

1.00

Instruction in the basic skills of playing and teaching standard brass instruments in a heterogeneous class situation. Various methods for brass teaching will be studied, and materials used in public school teaching will be examined and performed. MUED 303 each fall; MUED 304 each spring. *Prerequisite: Sophomore Standing; MUED 303 is a prerequisite to MUED 304.*

MUED 304. Brass Techniques

1.00

Instruction in the basic skills of playing and teaching standard brass instruments in a heterogeneous class situation. Various methods for brass teaching will be studied, and materials used in public school teaching will be examined and performed. MUED 303 each fall; MUED 304 each spring. *Prerequisite: MUED 303 and Sophomore Standing.*

MUED 305. Percussion Techniques

1.00

Instruction in the basic skills of playing and teaching standard percussion instruments in a heterogeneous class situation. Various methods of percussion teaching will be studied, and materials used in public school teaching will be examined and performed. MUED 305 each fall; MUED 306 each spring. *Prerequisite: Sophomore Standing; MUED 305 is a prerequisite to MUED 306.*

MUED 306. Percussion Techniques

1.00

Instruction in the basic skills of playing and teaching standard percussion instruments in a heterogeneous class situation. Various methods of percussion teaching will be studied, and materials used in public school teaching will be examined and performed. MUED 305 each fall; MUED 306 each spring. *Prerequisite: MUED 305 and sophomore standing.*

MUED 307. String Techniques

1.00

Instruction in the basic skills of playing and teaching string instruments. Instruction will be on violin, viola, cello, and bass in a heterogeneous class situation. Various methods for string teaching will be studied, and materials used in public school teaching will be examined and performed. MUED 307, each fall; MUED 308, each spring. *Prerequisite: Sophomore Standing; MUED 307 is a prerequisite to MUED 308.*

MUED 308. String Techniques

1.00

Instruction in the basic skills of playing and teaching string instruments. Instruction will be on violin, viola, cello, and bass in a heterogeneous class situation. Various methods for string teaching will be studied, and materials used in public school teaching will be examined and performed. MUED 307, each fall; MUED 308, each spring. *Prerequisite: MUED 307 and sophomore standing.*

MUED 310. Vocal Techniques

1.00

Class instruction designed to acquaint the instrumental (nonvoice) major with fundamentals of vocal and choral techniques including posture, breath support, basic vocal production, physiological functions of the vocal mechanism, singer's diction, vocal exercises, and individual as well as ensemble performances. *Prerequisite: Music Majors*

MUED 371. Beginning Methods and Materials for Instrumental Music

2.00

Methods and materials for beginning through intermediate instrumental music students. Administrative concerns are included. *Prerequisite: MUED 273, full admission to teacher education and level 3 in major applied area.*

MUED 372. General Music Practices

2.00

Focuses on broad preparation for teaching the general music courses now found at both middle and high school levels. *Prerequisite: MUED 273 , full admission to teacher education and level 3 in major applied area.*

MUED 373. Advanced Methods and Materials for Instrumental Music

2.00

Learning experiences related to the career needs of school instrumental music teachers are analyzed, discussed and practiced. Planning and teaching skills are presented for beginning, intermediate and advanced level students. *Prerequisite: MUS 317 and MUED 271 are the prerequisites.*

MUED 376. Choral Music Mat & Tech

2.00

This course is an in-depth summary of the pedagogy, principles, methodology and resources in choral music education, with special emphases on high school choral teaching and community outreach. This course is designed to aid students in synthesizing their cumulative music education learning into a defined and refined skill set in advance of student teaching and in preparation for a music teaching career. An embedded practicum experience at an area retirement center is an integral component of this course. The level of this intergenerational choir parallels that of a 9th-grade choral ensemble; as such it provides an ideal, hands-on opportunity to teach choral music, leading to a culminating concert. *Prerequisite: MUS 317 and MUED 273 , full admission to teacher education and Level 4 in major applied area.*

MUED 380. Music in the Elem School

2.00

The general music program in the elementary school presented for future music specialists, K-6. Focus is on the synthesis of current philosophy, learning theories and educational practices for teaching elementary school music. Preparation for organizing music curricula and daily lesson plans is included. *Prerequisite: MUED 273 , full admission to teacher education and Level 3 in major applied area.*

MUED 431. Psychology of Music

3.00

This course examines the topic of music psychology, and explores current findings and related subtopics, including those from brain sciences. Students will observe the practical application of research findings via practicum placements. Students will reflect on, and synthesize their content knowledge of the topic with their personal field experience knowledge for the purpose of making connections to their own career goals for future employment (e.g. music classroom and music therapy settings).

MUED 470. Marching Band Procedures

2.00

Skills and knowledge needed to organize, administer, plan and teach marching band shows including shows for various competitions, parades, football, basketball and festival events; and techniques for developing both marching and playing style through a functional method of fundamental drills. *Prerequisite: MUED 273 or permission of the instructor.*

MUED 471. School Musical, Jazz and Show Choir Procedures

2.00

Covers skills and concepts needed to organize, administer, plan, teach and perform in musicals, jazz choirs and show choirs. Highlights techniques of commercial and theatrical vocal style, fundamentals of producing a musical and choreography for the show choir. *Prerequisite: MUS 317 and MUED 271 are the prerequisites.*

MUED 472. Survey String Orch Rep

2.00

An examination of concert repertoire for string and full orchestra appropriate for performance by students in grades seven through 12. The course will include a study of evaluation and selection of music appropriate for a specific ensemble.

Prerequisite: MUED 271 is the prerequisite.

MUED 473. Jazz Ensemble Procedures and Techniques

2.00

This course addresses all aspects of instrumental jazz instruction (big band and small group) in the public schools. Teaching philosophies, rehearsal techniques, and resource materials will be examined; the syllabus includes opportunities to observe and rehearse jazz groups. Enrollment is not limited to traditional jazz instrumentation. *Prerequisite: MUED 271 is the prerequisite.*

MUED 474. Guitar Pedagogy and Classroom Methods

2.00

Preparation to teach guitar in beginning, intermediate and advanced school music settings. Content includes information specific to guitar pedagogy (e.g. fretboard knowledge, chord shapes), and traditional guitar method approaches to various skills (e.g. reading standard notation, positions, fingerboard harmony). Guitar repertoire, relevant literature, available resources, and the role of the guitar ensemble in public schools will be examined from teaching and administrative perspectives.

MUED 480. Student Teaching

6.00-12.00

Enables students to apply, in the public school classrooms and the comprehensive child development programs, those skills and attitudes acquired in all components of teacher education. Under the guidance of university supervisors, students are provided activities designed to familiarize them with the classroom teacher's role. *Prerequisite: PSYC 160 and EDUC 300/EDUC 360, appropriate methods courses, and permission of the coordinator of field experiences.*

MUED 482. Orff & Kodaly: Literature, Principles & Practices

1.00

Students will study the repertoire employed in the Orff and Kodaly approaches to music education. They will develop skills and understanding of the principles related to these approaches. Work with peers and school children will provide the opportunity to develop teaching skill. May be repeated for credit.

MUED 485. Teaching Music to Students with Special Needs

3.00

Crosslisted with MUED 585

Students will become familiar with trends affecting students with special needs, and introduced to diverse variations in language ability, assessment, inclusion, and music education. Students will collaborate online through discussion forums regarding case study and video presentations. Students will become knowledgeable in language, motor, visual, and social development, connecting current research and theory to classroom practice. Students will also critically assess inclusive school settings.

MUI 221. Survey of Music Industry

3.00

An overview of the recording, entertainment and performing arts industries including an examination of the historical, aesthetic and commercial developments of the music industry in the United States.

MUI 230. Music Industry Gateway

0.00

Music industry gateway is required to enroll in 300- and 400-level music industry courses. May be repeated once.

MUI 231. Legal Aspects of Music Industry

3.00

An examination of the legal issues affecting the performing arts, recording and music publishing fields. Topics include music rights and licensing, Performing arts unions and guilds, artist representation and contractual relationships. *Prerequisite: MUI 221 and Music major or Instructor Permission.*

MUI 315. Songwriting

3.00

An introduction to form, lyric development and melodic structure of contemporary songwriting for commercial entertainment applications. The course will include examination of leadsheet writing, demo production, copyright protection and publishing of commercial songs. *Prerequisite: MUI 250, and permission of the instructor.*

MUI 324. Introduction to Audio Devices

3.00

Introduction to electronic devices utilized in the sound recording industry. *Prerequisite: PHYS 121 and MUI 230 or permission of the instructor.*

MUI 330. Music Publishing

3.00

This course will offer a comprehensive overview of the music publication industry. The focus will be upon, but not limited to, mainstream popular music. It will also consider songwriter/publisher relations, self-publication, as well as an examination of art, religious, and educational music publishing. *Prerequisite: MUI 230 or Instructor Permission.*

MUI 400. Multitrack Rec Tech I

3.00

An introduction to contemporary multi-track recording studio techniques. Students will be introduced to recording studio design, psycho-acoustics, miking techniques, Musical Instrument Digital Interface and the mixing console. *Prerequisite: MUI 230 and MUI 324 or permission of the instructor.*

MUI 405. Logic Pro

3.00

An introduction to analog synthesis, digital synthesis, an overview of conditions and events that led to the development of MIDI, a study of the MIDI protocol itself, as well as Apple Certified instruction in music production utilizing Logic Pro. *Prerequisite: MUI 324 or permission of the instructor.*

MUI 411. Audio Postproduction

3.00

An examination of music and sound used in the broadcast and entertainment media from an intensive, hands-on engineering perspective. The course will feature multiple post-production assignments to be completed in our on-campus Studio B, as well as field trips to off-campus post-production studios. *Prerequisite: MUI 230, MUI 324, and MUI 400 or instructor permission.*

MUI 415. Songwriting II

3.00

This course is a continuation in the study of form, lyric development and melodic structure of contemporary songwriting for commercial entertainment applications. This course will also take into account some basic music business aspects important in the music industry directly related to song writers. *Prerequisite: MUI 230 or Instructor Permission.*

MUI 422. Concert Production & Promotion

3.00

Study of the presentation of cultural and commercial entertainment in the form of concert events from artistic, technical and business viewpoints. The roles of the cultural impresario and concert promoter in contemporary society are examined. *Prerequisite: MUI 230 or Instructor Permission.*

MUI 423. Sound Reinforcement

3.00

An introduction to the history, equipment, skills, and business of sound reinforcement. The technique of contemporary sound engineers are examined and experienced by the use of audio amplification systems to design and use for public address and musical performance. *Prerequisite: MUI 324*

MUI 430. Artist Management

3.00

This course will evaluate the function of musician/recording artist representatives in the music industry. Focus of discussions will include artist development from early career stages, to concert tours, unions, recording companies, personal appearances, contractual agreements, etc. *Prerequisite: MUI 230 or Instructor Permission.*

MUI 435. Marketing of Recorded Music

3.00

Examination of the process of studio production, manufacturing, promotion and distribution of contemporary recordings. Record release programs for independent and major label-controlled products are analyzed. *Prerequisite: MUI 230 or Instructor Permission.*

MUI 440. Entrepreneurship in Music Industry

3.00

The study of business aspects of the music industry managing, marketing, finance and sales. Students develop a comprehensive Music Business plan. Fulfills the College of Arts and Letters writing-intensive requirement for the major. *Prerequisite: MUI 230 or Instructor Permission.*

MUI 492. Internship in Mus Ind

3.00 - 6.00

A supervised off-campus cocurricular learning activity designed to provide practical experience in the music industry.
Prerequisite: MUI 221 and MUI 230 and MUI 231 or permission of the instructor.

MUAP 113. Small Group Lessons

1.00

Two hours per week. May be repeated. Permission to register must be obtained from the coordinator of the respective applied area.

MUAP 114. Group Voice for Musical Theatre Concentrators

1.00

First level voice class for Musical Theatre concentrations in the School of Theatre and Dance. Permission to register must be obtained from the coordinator of the respective applied area. *Prerequisite: Audition and admission to the Musical Theatre concentration in the School of Theatre and Dance.*

MUAP 115. Group Voice for Theatre/Dance Majors

1.00

May be repeated for up to four credits. Permission to register must be obtained from the coordinator of the respective applied area.

MUAP 200. Applied Music Lesson (Undergraduate)

1.00 - 3.00

Applied weekly lessons for non-majors and secondary instruments. See MyMadison for details. May be repeated for credit. Permission to register must be obtained from the coordinator of the respective applied area.

MUAP 205. Small Group Voice for Keyboard Majors

2.00

A practical introduction to singing technique and musicianship designed for future choral music teachers and accompanists. Concludes with Vocal Proficiency Examination. Limited to maximum of eight students. May be repeated for credit. Permission to register must be obtained from the coordinator of the respective applied area. *Prerequisite: Sophomore standing in music or permission of the instructor.*

MUAP 210. Applied Piano Accompanying

1.00

MUAP 211. Voice Applied

1.00

Prerequisite: Music Majors

MUAP 212. Piano Applied

1.00

Prerequisite: Music Majors

MUAP 214. Private Voice for Musical Theatre Concentrators

1.00

Private voice lessons for musical theatre concentrators in the School of Theatre and Dance. Permission to register must be obtained from the coordinator of the respective applied area. *Prerequisite: Permission of the instructor.*

MUAP 215. Violin Applied

1.00

Prerequisite: Music Majors

MUAP 216. Viola Applied

1.00

Prerequisite: Music Majors

MUAP 217. Violoncello Applied

1.00

Prerequisite: Music Majors

MUAP 218. String Bass

1.00

Prerequisite: Music Majors

MUAP 219. Guitar Applied

1.00

Prerequisite: Music Majors

MUAP 220. Flute Applied

1.00

Prerequisite: Music Majors

MUAP 221. Oboe Applied

1.00

Prerequisite: Music Majors

MUAP 222. Clarinet Applied

1.00

Prerequisite: Music Majors

MUAP 223. Bassoon Applied

1.00

Prerequisite: Music Majors

MUAP 224. Saxophone Applied

1.00

Prerequisite: Music Majors

MUAP 225. Trumpet Applied

1.00

Prerequisite: Music Majors

MUAP 226. Horn Applied

1.00

Prerequisite: Music Majors

MUAP 227. Trombone Applied

1.00

Prerequisite: Music Majors

MUAP 228. Euphonium Applied

1.00

Prerequisite: Music Majors

MUAP 229. Tuba Applied

1.00

Prerequisite: Music Majors

MUAP 230. Percussion Applied

1.00

Prerequisite: Music Majors

MUAP 231. Applied Harp Lessons

1.00

Applied harp lessons for music majors.

MUAP 234. Men's Chorus

1.00

Performs music of various styles, but with primary focus on the lighter genres. It is open to the entire male student body without

audition. The director reserves the right to limit membership because of balance or space considerations. Permission to register must be obtained from the coordinator of the respective applied area.

MUAP 235. Treble Chamber Choir

1.00

This is an advanced level chamber chorus for women and male countertenors interested in a small choral ensemble experience. Open to all majors, and auditioned at the beginning of every semester, this choir frequently performs off campus as well. Contact the director of choral activities for more information. Permission to register must be obtained from the coordinator of the respective applied area.

MUAP 236. Women's Chorus

1.00

Performs music of various styles, but with primary focus on the lighter genres. It is open to the entire female student body without audition. The director reserves the right to limit membership because of balance or space considerations. Permission to register must be obtained from the coordinator of the respective applied area.

MUAP 237. Marching Band (Fall Semester)

2.00

The Marching Band will perform music and drill which is artistically structured. The repertoire will be representative of all styles of music. The Marching Band is required for two years of wind and percussion majors in the music education degree program. Permission to register must be obtained from the coordinator of the respective applied area.

MUAP 238. Concert Band

1.00

Open to all interested participants. A wide variety of music is utilized to acquaint the student with different types of band literature. Permission to register must be obtained from the coordinator of the respective applied area.

MUAP 239. Symphonic Band

1.00

The JMU Symphonic Band is a select group of brass, woodwind and percussion students who are dedicated to the performance of both traditional and contemporary band literature. The ensemble performs music of all periods and is open to any university student by audition. Permission to register must be obtained from the coordinator of the respective applied area.

MUAP 300. Applied Music Lesson (Undergraduate)

1.00 - 3.00

Applied weekly lessons for music majors. See MyMadison for details. May be repeated. Permission to register must be obtained from the coordinator of the respective applied area. *Prerequisite: Music Majors*

MUAP 310. Appl Piano Accompanying

1.00 - 2.00

One-hour lesson a week; 10 hours minimum practice per week for two credits, 14 hours for three credits and 18 hours for four credits. This course may be repeated. *Prerequisite: Music Majors*

MUAP 311. Voice Applied

2.00 - 3.00

Prerequisite: Music Majors

MUAP 312. Piano Applied

2.00 - 3.00

Prerequisite: Music Majors

MUAP 315. Violin Applied

2.00 - 3.00

Prerequisite: Music Majors

MUAP 316. Viola Applied

2.00 - 3.00

Prerequisite: Music Majors

MUAP 317. Violoncello Applied

2.00 - 3.00

Prerequisite: Music Majors

MUAP 318. String Bass Applied

2.00 - 3.00

Prerequisite: Music Majors

MUAP 319. Guitar Applied

2.00 - 3.00

Prerequisite: Music Majors

MUAP 320. Flute Applied

2.00 - 3.00

Prerequisite: Music Majors

MUAP 321. Oboe Applied

2.00 - 3.00

Prerequisite: Music Majors

MUAP 322. Clarinet Applied

2.00 - 3.00

Prerequisite: Music Majors

MUAP 323. Bassoon Applied

2.00 - 3.00

Prerequisite: Music Majors

MUAP 324. Saxophone Applied

2.00 - 3.00

Prerequisite: Music Majors

MUAP 325. Trumpet Applied

2.00 - 3.00

Prerequisite: Music Majors

MUAP 326. Horn Applied

2.00 - 3.00

Prerequisite: Music Majors

MUAP 327. Trombone Applied

2.00 - 3.00

Prerequisite: Music Majors

MUAP 328. Euphonium Applied

2.00 - 3.00

Prerequisite: Music Majors

MUAP 329. Tuba Applied

2.00 - 3.00

Prerequisite: Music Majors

MUAP 330. Percussion Applied

2.00 - 3.00

Prerequisite: Music Majors

MUAP 331. Applied Harp Lessons

2.00 - 3.00

Applied harp lessons for music majors.

MUAP 332. Applied Jazz Study

2.00 - 3.00

Applied study of jazz performance techniques on a student's major instrument. The student may be assigned to a professor whose

major instrument differs from the student's major instrument. One hour lesson per week. Students who have not yet been accepted into the Jazz Studies major may elect to take Applied Jazz Study for 2 credit hours per semester in order to prepare for the audition. Students accepted into the Jazz Studies Track will register for 3 credit hours of Applied Jazz Study each semester. *Corequisite: MUS 440.*

MUAP 340. Chorale

1.00

A highly selected, 60-voice mixed choir that performs repertoire from the Renaissance to the contemporary era, both sacred and secular. There are opportunities to perform on and off campus. Membership is by audition. Permission to register must be obtained from the coordinator of the respective applied area.

MUAP 341. Madison Singers

2.00

Madison Singers is a highly select choral chamber ensemble that performs the best of representative choral music from the Renaissance to the present. The ensemble is open to any university student by audition in the fall of each academic year. Permission to register must be obtained from the coordinator of the respective applied area.

MUAP 343. Opera Theatre

1.00 - 2.00

The preparation and public performance of grand opera, light opera and musicals. Work will include coaching of both music and acting. Credit may vary with permission of instructor depending on the amount of time commitment. Admission is by audition only. Permission to register must be obtained from the coordinator of the respective applied area.

MUAP 344. Chamber Orchestra

1.00

Open to all university students. Membership is determined by audition. Music written for chamber orchestra from all periods is studied and performed.

MUAP 345. Symphony Orchestra

2.00

The JMU Symphony Orchestra is a participating member of the American Symphony Orchestra League. Membership is determined by audition and is open to all university students. Literature performed is from the standard symphonic repertoire.

MUAP 346. Wind Symphony

2.00

The JMU Wind Symphony is a highly select group of brass, woodwind and percussion students who are dedicated to the performance of wind orchestra music and chamber music for winds. The ensemble performs music from all periods and is open to any university student by audition in the fall of each academic year. Permission to register must be obtained from the coordinator of the respective applied area.

MUAP 347. Jazz Ensemble

2.00

Instrumental music performance ensemble of the standard "big band" instrumentation whose repertoire reflects jazz styles from

the swing era to contemporary jazz. Admission is by audition. Permission to register must be obtained from the coordinator of the respective applied area.

MUAP 348. Jazz Band

1.00

Instrumental ensemble, performing the standard and contemporary repertoire of American music with emphasis on the jazz idiom. Jazz band is open to all JMU students by audition. Permission to register must be obtained from the coordinator of the respective applied area.

MUAP 349. Monticello Strings Faculty and Students Ensemble

1.00

A joint string ensemble of string faculty and students, with a mission to provide mentoring, hands-on and shared experiences in learning, rehearsing, and performing string chamber orchestra repertoire from the Baroque to Contemporary periods. In addition, the ensemble focuses on creative and scholarly endeavors, collaboration between faculty and students, and university outreach with performances on and off campus. Permission to register must be obtained from the coordinator of the respective applied area.

MUAP 350. String Ensemble

1.00

A rehearsal and performance ensemble where students of similar technical and musical ability are grouped in traditional string or piano trios, quartets and quintets, and present public performances of important compositions from the chamber music literature of all historical periods. Permission to register must be obtained from the coordinator of the respective applied area.

MUAP 351. Woodwind Ensemble

1.00

Woodwind ensembles consisting of quintets or other smaller and larger combinations, limited to specially selected personnel through auditions. Concerts and other performances are prepared from a variety of literature from the classical period to the present. Permission to register must be obtained from the coordinator of the respective applied area.

MUAP 352. Brass Band

1.00

Open to all university students by audition. A select brass and percussion ensemble limited to the standard instrumentation of the "British-style" brass band. The ensemble performs literature of all styles from the extensive brass band tradition. The band typically participates in the annual NABBA championships. Permission to register must be obtained from the coordinator of the respective applied area.

MUAP 353. Guitar Ensemble

1.00

The performance of guitar music from Renaissance to 20th century for duos, trios and quartets. Permission to register must be obtained from the coordinator of the respective applied area.

MUAP 354. Percussion Ensemble

1.00

The study and preparation for public performance of percussion ensemble literature. The ensemble is open to all university students by audition. Permission to register must be obtained from the coordinator of the respective applied area.

MUAP 355. Jazz Chamber Ensemble

1.00

Open by audition to students demonstrating a high degree of skill in jazz improvisation. Concerts and other performances are prepared from a variety of literature from early jazz to the present day. Permission to register must be obtained from the coordinator of the respective applied area.

MUAP 357. Piano Accompanying and Piano Ensemble

1.00

A course in basic accompanying skills and style characteristics required for two semesters (one fall, one spring) of all piano majors. Students will be assigned to vocal or instrumental studios and have the opportunity to perform in master class and private coaching sessions. Permission to register must be obtained from the coordinator of the respective applied area.

MUAP 360. Opera/Music Theatre Orchestra

1.00

This ensemble will serve as the accompanying ensemble for staged productions within the School of Music and the School of Theatre and Dance. Enrollment in this course will be open to all students at the university by audition. Permission to register must be obtained from the coordinator of the respective applied area.

MUAP 362. Brass Chambers Ensembles

1.00

Brass chamber ensembles consisting of quartets, quintets or larger combinations, limited to specially selected personnel through auditions. Concerts and other performances are prepared and presented from literature spanning the Renaissance to the present day. Permission to register must be obtained from the coordinator of the respective applied area. *Prerequisite: Permission of the instructor.*

MUAP 364. Camerata Strings

1.00

Camerata Strings is a select instrumental string ensemble that performs a broad range of string ensemble literature from the 1600s to the present. The ensemble is open to any student of the university through competitive auditions held at the start of each spring semester. Permission to register must be obtained from the coordinator of the respective applied area. *Prerequisite: Participants must complete competitive auditions at the start of the spring semester and, based on audition outcomes, be offered membership by the Music Director of the ensemble.*

MUAP 380. Collegium Musicum

1.00

The Collegium Musicum is a select vocal/instrumental ensemble dedicated to the historically-informed performance of early music (music composed before ca. 1700) Repertoire includes major works primarily of the Renaissance and early Baroque era. Membership is by audition or invitation. May be repeated for credit. Permission to register must be obtained from the coordinator of the respective applied area.

MUAP 381. Bach Aria Group

1.00

The Bach Aria Group is a select vocal/instrumental ensemble dedicated to the historically-informed performance of arias and small ensembles from the Cantatas, Oratorios and Passions of J.S.Bach. Repertoire is specifically limited to this material. Membership is voluntary, and by audition or invitation. May be repeated for credit. This ensemble will not fulfill the music major requirement for a minimum of one ensemble per semester. Permission to register must be obtained from the coordinator of the respective applied area.

NPS 300. Introduction to Nonprofits

3.00

An introduction to the development of the nonprofit sector in the American context exploring history, theories, legal issues, governance and ethical considerations. Global nonprofits are also explored. Provides a foundation for subsequent work in the nonprofit studies minor. *Prerequisite: Sophomore standing with a declared major.*

NPS 320. Nonprofit Management

3.00

A study of organizational and management functions in the nonprofit sector. Examination of the unique role of volunteers, boards and public relations in the nonprofit environment. *Prerequisite: NPS 300 and junior standing.*

NPS 375. Grant Writing for Agencies

3.00

Crosslisted with FAM 375, GERN 375, SOWK 375

Emphasizing active learning, this course teaches the basics of grant and proposal writing. Efficient research, persuasive prose and the importance of relationships are stressed. Private and corporate philanthropy and government grants are examined.

NPS 400. Internship/Practicum in Nonprofit Studies

4.00 - 6.00

Supervised internship/practicum in experience in a nonprofit organization setting that allows experiential learning and practice experiences. A research or applied paper, learning journal and presentation based on the experience are required. *4 credits (160 hours in agency), 6 credits (240 hours in agency). Prerequisite: NPS 300 and the discipline specific elective.*

NPS 450. Nonprofit Studies Capstone Seminar

3.00

The capstone seminar is designed to integrate and apply knowledge from the student's major and the Nonprofit Studies minor. A substantial, individualized project will strengthen the student's capabilities in research and/or applied knowledge, information access, and self-directed learning. *Prerequisite: NPS 300, NPS 320, NPS 400, and discipline elective. Related elective may be taken concurrently.*

NPS 490. Special Studies in Nonprofit Studies

1.00 - 3.00

This course is designed to provide capable nonprofit studies minors an opportunity to complete independent study under faculty

supervision. Course may be repeated for credit. *Prerequisite: NPS 300, NPS 320 and one additional course in the minor or permission of the instructor.*

NSG 300. Strategies for Success in Nursing

1.00

This course introduces freshman and transfer nursing majors to the nursing curriculum and electives in other disciplines that relate to the goals and objectives of the program. This course will include instruction on campus student resources, time management and study skills, development of a clear academic plan, and nursing career options.

NSG 301. History Taking/History Telling: Narratives of Chronic Illness and Disability

2.00

This course introduces students to first-person narratives of patients, family care providers, and health care workers as a way to more fully understand the complexities of living with and managing chronic illness. Students will explore the narrative as an increasingly relevant component of understanding and responding to experiences of chronic illness and disability.

NSG 302. Behavioral and Mental Health in Children and Adolescents

2.00

This course will explore the state of mental and behavioral health of children and adolescents. It will examine the neuropathophysiological nature of mental and behavioral illnesses, health promotion, and care of children and adolescents.

NSG 303. The Art of School Nursing

1.00

This particular course provides a comprehensive focus on the multiple facets within the specialty practice of school nursing. The course will discuss the history of school nursing, the roles of the school nurse, laws and standards of practice. We will discuss collaborative teaming, cultural diversity, and marketing/educational strategies for promoting school nursing.

NSG 305. Healthy Environment/Healthy Pregnancy

1.00

This course introduces students to the relationship between environmental factors and reproductive health outcomes. Students will explore the effects of environmental exposures, commonly found in a woman's home or at work, on a woman's reproductive health and that of a developing fetus.

NSG 306. Combating Childhood Obesity

1.00

This course will examine the current evidence and issues related to obesity in children and adolescents in the United States. Emphasis is placed on the health-related outcomes of childhood obesity for individuals, families and communities. Analysis of individual and public health approaches to reduce the prevalence of childhood obesity will be discussed.

NSG 307. Transcultural Concepts in Nursing

2.00

This course examines concepts of cultural awareness and culturally competent care with individuals, families and communities. The influence of cultural beliefs and practices on health care that are specific to identified cultures is emphasized.

NSG 308. Empowerment and Resilience

1.00

This elective course explores traumatic events and the ongoing psychological and social stress responses that result. Empowerment and resilience conceptual premises will be examined as elements to overcoming trauma and/or traumatic events. Historical traumatic community events will be used to highlight strategies of recognition and resilience and provide a micro to macro level perspective.

NSG 309. Trauma and the Continuum of Care

1.00

This course explores adult health alterations that develop as a result of a trauma. Students will apply the nursing process to analyze psychological, physical, social and secondary stress as a result of trauma care situations. Students will analyze a plan of care that engages an interdisciplinary team approach to the care process. Students will develop an understanding of the rehabilitation process and long term outcomes of the traumatically injured.

NSG 310. Helping Persons in Pain

2.00

This course open to all students from all majors, is an examination of pain, its impact on people, causes, treatments and the role of health professionals. Emphasis is placed on understanding how people experience pain and its effect on quality of life.

NSG 311. Preventing Chronic Illness in the Community

1.00

This course explores the development of health promotion programs for preventing chronic illness in select communities. Students will build upon previous knowledge to develop a prevention proposal and design a program for use with multicultural and diverse members and segments of a population. Students will work in interdisciplinary teams with resources in the local community to implement a pilot of the program and to collect and articulate outcome data.

NSG 314. Rural Health: an Interprofessional Approach

3.00

Crosslisted with HTH 314, IPE 314, SOWK 314

Students study, observe and participate in interprofessional assessment, planning and delivery of community-based primary health care in partnership with residents and agencies of a host rural county. Learning activities will emphasize rural culture, rural health care and interprofessional practice.

NSG 317. History of Nursing

1.00

An elective nursing course that explores fundamental aspects of nursing history including pertinent nursing founders and leaders as well as examination of the many influences that have shaped the nursing profession. Review of nursing within its historical context provides an opportunity to consider changes for the future.

NSG 318. Nursing, Chronic Illness and Health in a Global Context

2.00

Non-communicable diseases (NCDs/ a.k.a. chronic illnesses) are universal. The course provides students with an introduction to

global health care systems models, and concepts and their influence on health disparities and delivery of healthcare, focusing on NCDs. Additionally, students will examine ways that nurses and nursing can meet the challenges of addressing NCDs at a global level.

NSG 319. Understanding Sexuality across the Health-Illness Continuum

2.00

This course examines how illness affects sexuality (physiologically, psychologically and culturally) across the lifespan. Sources of interventions and support for issues of sexuality and chronic illness will be addressed.

NSG 320. Innovative Diabetes Health Education

1.00

Based on the chronic illness model component of patient self-management, this course focuses on the use of an innovative teaching strategy for diabetic education. Working in teams students will utilize conversation maps to learn about Diabetes Mellitus Type II, gestational diabetes and patient education.

NSG 321. Faith Community Nursing

1.00

This course is based on the accepted philosophy and practice of Faith Community Nursing and examines the roots of health and healing found in many religious traditions. Critical thinking strategies, such as Socratic questioning, are used to analyze the spiritual dimension of health and healing for the practitioner as well as clients they serve. Students explore the practice of nursing in faith communities.

NSG 322. Integrative Health Care

2.00

This course examines the principles, practices, and outcomes of complementary therapies and alternative healing that are widely used in the general population. The integration of alternative and conventional health practices will be examined. Ethical, legal and professional issues will be explored.

NSG 324. R.N./B.S.N. Strategies for Success

1.00

This course is designed to provide strategies for academic success in an online learning environment for students in the R.N. to B.S.N. program. Students apply concepts of scholarly writing and identify research. An emphasis is placed on competence with technology and working collaboratively within an online environment.

NSG 325. Concepts in Aging

3.00

This online course examines evidence-based knowledge needed to provide holistic care for an aging population. Issues related to legal and ethical aspects of care, health promotion, chronic health conditions and special issues related to gerontological nursing care are examined. *Prerequisite: R.N.-B.S.N. students only.*

NSG 326. Care and Consideration for Children with Special Needs

1.00

Open to students from any major. Students will gain insight into the lives of children with special needs and discuss how having

children with special needs affects the entire family. A variety of topics such as autism, brain injury, and other disabilities will be investigated. Learning activities include guest speakers, discussion, and hands-on service learning. Students must provide their own transportation to service learning sites off campus.

NSG 328. Life, Death, and the In-Between

1.00

This course focuses on preparing the student to give patient-centered end-of-life care. Using a variety of learning methods, the student will examine theories and care models, and will discuss current topics surrounding death and dying, including social, cultural, ethical, spiritual and legal issues.

NSG 329. Best Practices in Diabetes Care

2.00

The student will develop a basic understanding of the current practices related to diabetes care and the impact of a diabetes diagnosis on the individual, family and community. The content is centered around the American Association of Diabetes Educators (AADE) 7 Self-Care Behaviors: healthy eating, being active, monitoring, taking medications, problem solving, healthy coping and reducing risks.

NSG 330. Medical Innovations

3.00

Crosslisted with Course Numbers

BIO 426

ENGR 498

LTLE 490

In this course, pre-professional health, pre-nursing and engineering students will work in interprofessional teams to develop and communicate solutions to a community health challenge. Students will use innovative MakerSpace technologies to produce a tangible product aimed at improving the challenge while also exploring technology's potential to cause harm. In addition to instruction of the technologies, students will be taught problem solving, collaboration, and leadership skills.

NSG 331. Nursing Leadership

1.00

This elective nursing course focuses on leadership and professional development in nursing students. Students will develop individual learning contracts with an aim to increase communication, leadership skills and critical thinking ability. The course will provide students the opportunity to participate in the local, state and national levels of the National Student Nurses Association, Sigma Theta Tau and other organizations.

NSG 333. Health Assessment

3.00

This course examines the principles and techniques of nursing assessments focusing on health history taking, review of systems and physical examination techniques for individuals across the lifespan. Clinical decision making is emphasized using a holistic approach that takes into account physical, genetic, cultural, psychological, social, spiritual and environmental variables that impact health. *Prerequisite: Admission to the R.N.-B.S.N. program*

NSG 350. Foundations of Nursing

2.00

This course provides an overview of foundational principles of professional nursing practice. Students will be introduced to the evolution of nursing, basic nursing theory and knowledge, and beginning concepts. This course promotes self-analysis and socialization into the role of the professional nurse.

NSG 350H. Foundations of Nursing

2.00

This course provides an overview of foundational principles of professional nursing practice. Students will be introduced to the evolution of nursing, basic nursing theory and knowledge, and beginning concepts. This course promotes self-analysis and socialization into the role of the professional nurse. Students will explore the healthcare literature to identify and develop an honors thesis focus. *Prerequisite:* Admission to the honors program.

NSG 351. Health Assessment

3.00

This course develops knowledge and skills necessary to gather, organize, and present relevant health data that includes wellness and illness considerations across the life cycle. Emphasis is placed on systematic strategies, frameworks, and skills used to conduct both comprehensive and need-specific health assessments for individuals in the context of their family and community. *Prerequisite:* for mal acceptance into the Nursing Program.

NSG 352. Clinical Applications & Reasoning in Nursing Care I

4.00

Through didactic learning, students learn theories, rationale, and principles underlying the application of acute care skills in nursing practice. In the laboratory, students will practice and demonstrate mastery of selected skills. In the clinical setting, students will apply knowledge through clinical reasoning in planning and facilitating nursing care for patients and their families. *Prerequisite:* Formal acceptance to the nursing program is the prerequisite. *Corequisite:* NSG 352L.

NSG 352L. Clinical Applications & Reasoning in Nursing Care I Clinical

2.00

Through didactic learning, students learn theories, rationale, and principles underlying the application of acute care skills in nursing practice. In the laboratory, students will practice and demonstrate mastery of selected skills. In the clinical setting, students will apply knowledge through clinical reasoning in planning and facilitating nursing care for patients and their families. *Prerequisite:* Formal acceptance to the nursing program is the prerequisite. *Corequisite:* NSG 352.

NSG 353. Pathophysiology & Pharmacology

4.00

This course is a comprehensive examination of the principles of pathophysiology and pharmacology for nurses. Emphasis will be placed on concepts and rationales necessary for clinical decision making and nursing care of patients with select disease processes.

NSG 354. The Art and Science of Nursing

2.00

This course is designed to provide an overview of current issues relevant to the art and science of the practicing nurse. This course will provide the student with a concentrated focus on the role of the professional nurse and the nursing profession. The course explores nursing theory, health care models of practice, diversity issues, as well as legal and ethical realities within the healthcare delivery system.

NSG 354H. The Art and Science of Nursing

2.00

This course is designed to provide an overview of current issues relevant to the art and science of the practicing nurse. This course will provide the student with a concentrated focus on the role of the professional nurse and the nursing profession. The course explores nursing theory, health care models of practice and diversity issues, as well as legal and ethical realities within the healthcare delivery system. Students will also demonstrate an understanding of the ethical component of developing and conducting research. *Prerequisite:* Admission to the honors program.

NSG 355. Women's Health

3.00

This course promotes synthesis of concepts and principles utilized in health promotion, risk reduction and critical reasoning in the management of women's health care. Areas of focus include women's health issues, perinatal care of mothers and infants, and gynecological health. Clinical experiences provide students with opportunities to apply evidence based practice for women/newborn/family units of diverse cultural backgrounds. *Prerequisite:* NSG 350, NSG 351, NSG 352, NSG 352L, NSG 353. *Corequisite:* NSG 355L.

NSG 355L. Women's Health Clinical

1.00

This course promotes synthesis of concepts and principles utilized in health promotion, risk reduction and critical reasoning in the management of women's health care. Areas of focus include women's health issues, perinatal care of mothers and infants, and gynecological health. Clinical experiences provide students with opportunities to apply evidence based practice for women/newborn/family units of diverse cultural backgrounds. *Prerequisite:* NSG 350, NSG 351, NSG 352, NSG 352L, NSG 353. *Corequisite:* NSG 355.

NSG 356. Clinical Applications & Reasoning in Nursing Care II

4.00

This course focuses on pathophysiologic and pharmacologic concepts and principles of nursing process, health promotion, risk reduction, clinical decision making, and collaborative management of care for adults experiencing moderate to severe health alterations. Students will apply concepts, theories and skills in the nursing care of adults. *Prerequisite:* NSG 350, NSG 351, NSG 352, NSG 352L, NSG 353. *Corequisite:* NSG 356L.

NSG 356L. Clinical Applications & Reasoning in Nursing Care II Clinical

2.00

This course focuses on pathophysiologic and pharmacologic concepts and principles of nursing process, health promotion, risk reduction, clinical decision making, and collaborative management of care for adults experiencing moderate to severe health alterations. Students will apply concepts, theories and skills in the nursing care of adults. *Prerequisite:* NSG 350, NSG 351, NSG 352, NSG 352L, NSG 353. *Corequisite:* NSG 356.

NSG 357. Psychiatric Mental Health Nursing

3.00

This course examines the pathophysiology, psychosocial manifestations, psychopharmacological and psychiatric mental health nursing treatment of selected mental illnesses. Analysis of the role and practice of psychiatric mental health nursing both as a nursing specialty and as an integral facet of general nursing are emphasized. *Prerequisite:* NSG 350, NSG 351, NSG 352, NSG 352L, NSG 353. *Corequisite:* NSG 357L.

NSG 357L. Psychiatric Mental Health Nursing Clinical

1.00

This course examines the pathophysiology, psychosocial manifestations, psychopharmacological and psychiatric mental health nursing treatment of selected mental illnesses. Analysis of the role and practice of psychiatric mental health nursing both as a nursing specialty and as an integral facet of general nursing are emphasized. *Prerequisite:* NSG 350, NSG 351, NSG 352, NSG 352L and NSG 353. *Corequisite:* NSG 356

NSG 360. HHS in Costa Rica: Interprofessional Perspective

2.00-4.00

In this course students from nursing and other health-related majors will explore the health needs and the health and human services delivery system in Costa Rica, as well as the history and culture of this Central American country. Students will examine issues that impact health in the United States and Costa Rica and the roles of health care professionals in the delivery of healthcare. This immersion experience includes home stay with a host family and Spanish language study. *Prerequisite:* Nursing (B.S.N. and R.N. to B.S.N.) and other health-related majors only. *Corequisite:* R.N. to B.S.N. students only: NSG 367 and NSG 469.

NSG 361. International Health Perspectives: Malta

4.00

In this course, students will be immersed in the history and culture of communities within Malta to enhance knowledge and understanding of healthcare challenges unique to this population. Students will examine how culture, lifestyle and other social determinants of health impact the health and well-being of the Maltese people. An emphasis will be placed on understanding health care challenges unique to the Maltese. *Prerequisite:* Declared nursing or health-related major.

NSG 363. Health Care in Spain: A Cross Cultural Exploration of Illness and Wellness

4.00

In this course students will explore the health care system of Tarragona, Spain, through a partnership with the faculty of nursing at Universitat Rovira I Virgili. Through an international lens, students will learn about the Spanish nursing profession and related health fields, as well as the unique history, language and culture of this Catalonian region of Spain. Students will explore the ways that Spanish health professionals address health needs in both acute and community care settings in the context of the national health system, and they will compare and contrast this with their knowledge of the U.S. health system approach. This immersion experience includes home stay with a Spanish nursing student and Spanish language study. Minimal competence in Spanish preferred. *Prerequisite:* Nursing or health-related major.

NSG 367. R.N. to B.S.N. Community Clinical Costa Rica

1.00

This practicum for R.N.-B.S.N. students transitions practice into the B.S.N. role through mentored clinical experiences at selected community sites. Emphasis is on collaborative nursing care with individuals, families and groups within the community. Experiences include concepts of health promotion and disease prevention and management of acute or chronic illness.

Prerequisite: Admission to the R.N. to B.S.N. program.

Corequisite: NSG 360 and NSG 469.

NSG 368. Chronic Illness: Treatment Strategies for Substance Use Disorders

2.00

Nurses interact with individuals dealing with an array of chronic health issues including the use and abuse of psychoactive substances. Nurses are often first to recognize problems related to substance use disorders in hospitals and their communities.

Nationally, there is a current healthcare crisis related to substance abuse, and deaths attributed to opioids continue to increase. This course examines the urgent need for all nurses to have a better understanding of substance use disorders and available treatment strategies to help address this problem. *Prerequisite: NSG 357 and NSG 357L.*

NSG 390. Impact of Chronic Illness

3.00

This course will explore core concepts of chronic illness across the lifespan from an interdisciplinary perspective. Epidemiology, economics, ethics, culture, family and policy will be emphasized. These topics and concepts will be related to model(s) of chronic care.

NSG 391. Living Successfully with Chronic Illness

3.00

This course will examine models and strategies that aid individuals to live successfully with chronic illness. An interdisciplinary evidence-based approach will be used to investigate how outcomes may be improved through the individual's integration of lifestyle changes within the context of culture and family.

NSG 392. Hello Nurse: Images of the Nurse in American Culture

2.00

The image of the nurse in American culture has been varied, complex, and provocative. This course will introduce students to textual images of nurses in fiction, film, television, and visual arts within the context of American and nursing history.

NSG 393. Power-based Personal Violence

1.00

This course introduces students to the roots of violence, including the political, cultural, social and economic structures that perpetuate violence, and explores approaches to changing those structures in order to reduce or end violence. Students will think critically about the local and global impact of violence and how it intersects with other forms of oppression, and they will achieve an understanding of these issues that will be useful intellectually and personally.

NSG 415. Ethical Decision-Making in Healthcare: an Interprofessional Approach

1.00

Crosslisted with IPE 415

Health care ethics is a shared, relevant concern among health and human service disciplines and is an ideal vehicle for students from different fields to learn about one another's disciplines and to participate in inter-professional team analysis, discussion, and problem-solving. We have designed an integrated cross-disciplinary learning experience for students interested in the complex, real-world dilemmas encountered in practice. The readings and activities will emphasize ethical, legal, moral and spiritual issues and principles for practice within the context of communicating in inter-professional teams.

NSG 417. Women's Global Health and Human Rights

3.00

Crosslisted with HTH 417, WGSS 417

An international and human rights approach providing an overview of health issues within the context of a woman's life cycle. Attention will be given to critical issues of women's health such as access to health care and gender based violence. Such issues as sexuality, nutrition, diseases affecting women, violence, harmful traditional practices, and sex trafficking will be discussed.

NSG 450. Nursing Inquiry and Research Methods

3.00

This course will enhance students' ability to locate and critically appraise evidence-based guidelines and nursing research to determine their applicability to nursing practice. Students critically examine the links among nursing research, theory and practice. Students will develop an understanding of the underlying paradigms and activities within quantitative and qualitative research. *Prerequisite: Formal acceptance into the nursing major.*

NSG 450H. Nursing Inquiry and Research Methods

3.00

This course will enhance the students' ability to locate and critically appraise evidence-based guidelines and nursing research to determine their applicability to nursing practice. Students critically examine the links among nursing research theory, and practice. Students will develop an understanding of the underlying paradigms and activities within quantitative and qualitative research. Students will synthesize literature from individual review of research and prepare for public presentation. *Prerequisite: Formal acceptance into the nursing major and the honors program.*

NSG 451. Child Health

3.00

This course promotes the development of knowledge, skills and the ability to care for children including those with acute and chronic illnesses/conditions. Learning will focus on the unique healthcare needs of children with emphasis on family centered care. Students will apply knowledge through clinical reasoning in planning and facilitating nursing care for children and families. *Prerequisite: NSG 355, NSG 355L, NSG 356, NSG 356L, NSG 357 and NSG 357L. Corequisite: NSG 451L.*

NSG 451L. Child Health Clinical

1.00

This course promotes the development of knowledge, skills and the ability to care for children including those with acute and chronic illnesses/conditions. Learning will focus on the unique healthcare needs of children with emphasis on family centered care. Students will apply knowledge through clinical reasoning in planning and facilitating nursing care for children and families. *Prerequisite: NSG 355, NSG 355L, NSG 356, NSG 356L, NSG 357, NSG 357L. Corequisite: NSG 451.*

NSG 452. Clinical Applications and Reasoning in Nursing Care III

4.00

This course focuses on the integration of complex pathophysiologic and pharmacologic concepts and principles for adults experiencing moderate to severe health alterations. Students will apply the nursing process to promote health and safety, to augment clinical reasoning and clinical decision making, and to integrate interprofessional collaboration in the care of patients. *Prerequisite: NSG 352, NSG 352L, NSG 356 and NSG 356L.*

NSG 452L. Clinical Applications & Reasoning III Clinical

2.00

This course focuses on the integration of complex pathophysiologic and pharmacologic concepts and principles for adults experiencing moderate to severe health alterations. Students will apply the nursing process to promote health and safety, to augment clinical reasoning and clinical decision making, and to integrate interprofessional collaboration in the care of patients. *Prerequisite: NSG 352, NSG 352L, NSG 356 and NSG 356L. Corequisite: NSG 452.*

NSG 453. Population-Centered Care in the Community

3.00

Students will engage in the systematic assessment of individuals and vulnerable populations in community settings and work collaboratively to lead the development and implementation of evidence-based, population-focused community health nursing interventions. The impact of increasing societal and cultural changes across the life span will be analyzed. Students will incorporate theoretical concepts of community-based health promotion and disease prevention of vulnerable populations into their nursing practice. *Prerequisite: NSG 355, NSG 355L, NSG 356, NSG 356L, NSG 357 and NSG 357L. Corequisite: NSG 453L.*

NSG 453L. Population-Centered Care in the Community Clinical

2.00

Students will engage in the systematic assessment of individuals and vulnerable populations in community settings and work collaboratively to lead the development and implementation of evidence-based, population-focused community health nursing interventions. The impact of increasing societal and cultural changes across the life span will be analyzed. Students will incorporate theoretical concepts of community-based health promotion and disease prevention of vulnerable populations into their nursing practice. *Prerequisite: NSG 355, NSG 355L, NSG 356, NSG 356L, NSG 357 and NSG 357L. Corequisite: NSG 453.*

NSG 454. Transition to Practice

3.00

This course enhances clinical reasoning in the context of communication and teamwork, patient-centered care, evidence-based practice, and quality improvement. Students will explore pathways for licensure and prepare for a career in nursing. Current issues in leadership, risk management, health policy, health economics and political action will be explored. An emphasis will be placed on the role of the nurse in advocating for quality and safety in healthcare teams. *Prerequisite: NSG 355. Women's Health NSG 355, NSG 355L, NSG 356, NSG 356L, NSG 357, NSG 357L, NSG 450, NSG 451, NSG 451L, NSG 452, NSG 452L. Corequisite: NSG 453 and NSG 453L.*

NSG 455. Nursing Informatics

2.00

This course explores nursing informatics and technology applications in health care. Emphasis is on preparing entry-level nurses with core nursing informatics competencies. A major theme is the use of information systems and technologies to improve the quality and safety of patient care in a changing health care environment. Students will develop their nursing informatics knowledge and skills through reading, discussions, exploration and utilization of electronic modalities. *Prerequisite: Formal acceptance into the nursing program; completion of NSG 350, NSG 354 and NSG 450.*

NSG 455H. Nursing Informatics

2.00

This course explores nursing informatics and technology applications in health care. Emphasis is on preparing entry level nurses with core nursing informatics competencies. A major theme is the use of information systems and technologies to improve the quality and safety of patient care in a changing health care environment. Students will develop their nursing informatics knowledge and skills through reading, discussions, exploration and utilization of electronic modalities. Students will analyze, assess and present individually an IHI Quality Assessment of a healthcare site. *Prerequisite: Admission to the nursing major and honors program.*

NSG 456. Capstone

5.00

The capstone experience emphasizes continued synthesis of and competence in the nursing process, critical thinking, prioritization of care and clinical skills in order to provide safe, high quality nursing care under the direct supervision of faculty and clinical nurse preceptors.

Prerequisite: NSG 355, Women's Health NSG 355, NSG 355L, NSG 356, NSG 356L, NSG 357, NSG 357L, NSG 450, NSG 451, NSG 451L, NSG 452 and NSG 452L. *Corequisite:* NSG 453 and NSG 453L.

NSG 460. Healthcare Informatics

3.00

This course focuses on the nature and functions of present and future applications of health care informatics. Emphasis is on preparing current and future health care professionals to plan, design, collaborate with other health care disciplines, and utilize healthcare informatics for effective health care delivery, health organizational management, and improved client outcomes.

Prerequisite: Admitted R.N.-B.S.N. majors only.

NSG 461. Pathophysiology and Pharmacology

3.00

This course, offered to RN-BSN program students, provides an examination of complex physiologic responses and clinical sequel in major body systems in relation to pathologic processes. Emphasis is placed upon physiologic compensation and defense responses. Pharmacologic management of pathology is investigated. *Prerequisite:* Admission to RN-BSN program.

NSG 462. Issues in Contemporary Nursing Practice

3.00

This course examines contemporary issues related to the profession of nursing. Historical and modern day influences that impact the profession of nursing are explored. Students are introduced to resources that support the individual nurse and the profession of nursing to navigate current issues and create resolutions. Multiple asynchronous course activities are utilized to engage the adult learner. *Prerequisite:* Admission to R.N.-B.S.N. program.

NSG 463. Professional Role Transition

3.00

This online course expands the students' current knowledge of concepts related to nursing theory, nursing image and professional role development at the B.S.N. level. Emphasis will be placed upon leadership and management skill development at the personal level. *Prerequisite:* Admission to R.N.-B.S.N. program.

NSG 464. Introduction to Nursing Research

3.00

This online course will focus on the study of research methods that generate quantitative and qualitative data. Students will examine the research process with an emphasis on critique of research methodologies and application of research findings to nursing practice. *Prerequisite:* Admission to R.N.-B.S.N. program.

NSG 466. Community Health Practicum

1.00

This practicum, for R.N.-B.S.N. students, transitions practice into the B.S.N. role through mentored clinical experiences at selected community sites. Emphasis is on collaborative nursing care with individuals, families and groups within the community. Experiences include concepts of health promotion and disease prevention and management of acute or chronic illness.

Prerequisite: Admission to R.N.-B.S.N. program.

NSG 469. Caring for the Public's Health: Community Health Nursing

4.00

This course provides RN-BSN students a perspective of professional nursing at the community level of practice. Course content will provide an overview of specific issues and societal concerns that affect community health nursing practice including historical impact of public health, epidemiology, health promotion and disease prevention, vulnerable populations; communicable disease risk and prevention; and the diversity of the role of the community health nurse. *Prerequisite: Admission to R.N.-B.S.N. program.*

NSG 471. Leadership and Management in Health Care

3.00

This online course explores the role of the nurse as a leader in professional health care delivery through an examination of healthcare organizations, leadership theories and management styles, organizational change, conflict resolution, fiscal and economic issues, and professional political responsibility. *Prerequisite: Admission to R.N.-B.S.N. program.*

NSG 482. Practicum: Home Health Case Management

1.00

During this practicum experience students provide nursing care in the home and gain knowledge for persons and their families experiencing acute and chronic illness and/or hospice care. Students are precepted by agency nurse case managers in the delivery and coordination of care in the home

NSG 490. Special Studies

1.00 - 6.00

Study of selected topics in nursing. No prerequisites.

NSG 497. Independent Study

1.00 - 3.00

Independent study in nursing under faculty supervision. *Prerequisite: Permission of the department head.*

NSG 499A. Honors Thesis I

1.00

NSG 499B. Honors Thesis II

2.00 - 3.00

NSG 499C. Honors Thesis III

2.00

NUTR 240. Basic Food Preparation Skills

2.00

Students will become proficient in a conventional kitchen setting by learning and practicing basic culinary skills, cooking techniques and food safety. This course serves as a foundation for highly technical foods-related courses in the dietetics major.

Prerequisite:

Dietetics major.

NUTR 280. Nutrition for Wellness

3.00

Students will study the impact of nutrition on wellness by learning nutrients, their functions in the human body, food sources and appropriate intake levels. Controversies surrounding use of various nutrients for improvement of health and well-being will be discussed.

NUTR 295. Foundations of Nutrition Practice

2.00

An introduction to the profession of dietetics, credentialing processes in nutrition/dietetics, careers available in the field, and some basic skills needed for the profession.

NUTR 340. Science of Food Preparation

3.00

This course explores the chemical composition of food, physical and chemical changes in food associated with household and industrial preparation techniques, definition of standard products, and appropriate assessment techniques for judging food quality. Laboratory component provides opportunity to judge foods prepared by different techniques. *Prerequisite: CHEM 131 or equivalent, admission to the dietetics program.*

NUTR 360. Management in Dietetics

3.00

Application of management concepts, theories and principles to dietetics with a focus on the work environments (clinical and foodservice) in which registered dietitians must effectively practice. *Prerequisite: Admission to the Dietetics major*

NUTR 362. Food Services Systems

3.00

An integration of menu planning, food procurement, equipment selection and layout to provide quality food service in a variety of food systems. *Prerequisite: Admission to the Dietetics major*

NUTR 363. Quantity Food Production

4.00

The principles of quantity food production and service are studied. *Prerequisite: Admission to the dietetics major and NUTR 340.*

NUTR 380. Global Nutrition

3.00

A study of food habits from around the world and their contributions to nutritional adequacy. Factors affecting global food-consumption behaviors including sociocultural practices, religion, health beliefs, agricultural practices, economics, politics and education will be explored.

NUTR 382. Sports Nutrition

3.00

A study of the relationship of nutrition and athletic performance. Identification of the effects of age, sex, body build, environment, and state of health on energy needs and energy sources during physical activity. *Prerequisite: NUTR 280.*

NUTR 384. Clinical Nutrition I

3.00

This course introduces nutrition as a disease therapy and the role of the clinical dietitian as a member of the health care team. Topics covered include nutrition screening and assessment, medical records documentation, basic dietary modifications, and patient/family counseling. *Prerequisite: Admission to the Dietetics Major and NUTR 340*

NUTR 385. Nutrition Throughout the Life Cycle

3.00

A study of the nutritional needs throughout the life cycle and the development of food habits. Nutrition assessment and nutrition education from prenatal health through infancy, childhood, adolescence, adulthood and old age are emphasized. *Prerequisite: Admission to the Dietetics major*

NUTR 395. Introduction to Patient Care in Dietetics

2.00

A study of the concepts of patient care in dietetics, skills needed for Medical Nutrition Therapy, and the dietitian's role on the health care team. *Prerequisite: Dietetics Majors and NUTR 280.*

NUTR 446. Experimental Foods

3.00

An introduction to research in foods. Different techniques of food preparation are studied and evaluated for most acceptable methods to obtain standard food products. *Prerequisite: Admission to the dietetics major, NUTR 340, organic chemistry and statistics.*

NUTR 455. Exercise and Nutrition in Chronic Disease

3.00

Crosslisted with KIN 424

This interdisciplinary course examines the evidence-based relationship between exercise and diet patterns and behaviors, and major chronic diseases. Students will understand the epidemiology and pathogenesis of prevailing chronic diseases. Emphasis will be placed on developing exercise and dietary strategies to reduce the burden of chronic disease. *Prerequisite: BIO 270 and NUTR 280.*

NUTR 482. Nutrition and Metabolism

3.00

A study of the nutrients, their roles in intermediary metabolism, the effects of genetic errors in metabolism, nutritional deficiencies and means of assessing nutritional status. Agencies and programs concerned with nutrition and health and current trends in nutrition research are emphasized. *Prerequisite: Admission to the dietetics major, BIO 290 CHEM 260, MATH 220. Corequisite: BIO 290.*

NUTR 484. Clinical Nutrition II

3.00

A study of the use of diet in preventing illness and as a means of treating disease. Emphasis is given to patient education.

Prerequisite: Admission to the dietetics major, NUTR 384 and NUTR 482

NUTR 485. Community Nutrition

3.00

A study of human nutrition and health problems from a community perspective, programs and policies related to nutrition at local, state, and federal levels including preventive nutrition or wellness, and approaches and techniques for effective application and dissemination of nutrition knowledge in the community. *Prerequisite: Admission to dietetics major.*

NUTR 486. Counseling Skills for Dietetics

3.00

This course will cover principles, theories and techniques of nutrition counseling for dietetics practice. *Prerequisite: Full admission to the Dietetics major, NUTR 384 and NUTR 385.*

NUTR 490. Field Experience in Dietetics

3.00

Students participate in field experience relating to their major area of dietetics and their career goals under the coordination of a dietetics faculty member. On-the-job supervision will be provided by the participating hospital dietitians. *Prerequisite: Admission to the dietetics major, NUTR 384 and NUTR 395. Application for enrollment must be completed through the course instructor in the fall semester prior to the summer in which it will be taken.*

NUTR 495. Senior Seminar in Dietetics

3.00

Dietetics students will conduct a senior research project. In addition, the Code of Ethics and Standards of Practice of the American Dietetics Association will be investigated, and students will prepare for their postgraduate dietetics internship.

Prerequisite: Admission to the Dietetics major

NUTR 496. Special Studies in Nutrition/Dietetics

1.00 - 3.00

This course is designed to give the student in dietetics an opportunity to complete independent study, professional conference participation, and/or research under faculty supervision. *Prerequisite: Permission of the coordinator of the dietetics program.*

Prerequisite: Permission of the coordinator of the dietetics program.

NUTR 499A. Honors

1.00

In this course students will propose their honors thesis research project.

NUTR 499B. Honors

3.00

In this course students will complete a comprehensive review of literature and a formal plan for their honors thesis research project. They may also collect data if appropriate during this semester.

NUTR 499C. Honors

2.00

In this course students will complete research for their honors thesis project, write results, discussion and conclusions sections of the paper, and submit the final paper to the research committee and the Honors Program.

PERS 101. Elementary Persian I

3.00 - 4.00

The fundamentals of Persian through listening, speaking, reading and writing. Practice in pronunciation and development of comprehension. One hour's work a week in the language laboratory. Students will receive no credit for the course if he/she has had two or more years of the language in high school.

PERS 102. Elementary Persian II

3.00 - 4.00

The fundamentals of Persian through a higher level of listening, speaking, reading and writing. Practice in pronunciation and development of comprehension. One hour's work a week in the language laboratory. If student has had two or more years of the language in high school he/she will not receive credit for the course. *Prerequisite: PERS 101.*

PERS 111. Intensive Persian I

6.00

The fundamentals of Persian through listening, speaking, reading and writing. The 14-week course is the equivalent of PERS 101-102.

PERS 231. Intermediate Persian I

3.00

A thorough review of first year grammar and vocabulary building. Conversation, composition and reading will be chosen to reach competency at the lower intermediate level. *Prerequisite: PERS 102*

PERS 232. Intermediate Persian II

3.00

A thorough review of PERS 231 grammar and vocabulary building. Conversation, composition and reading will be chosen to reach competency at the advanced intermediate level. *Prerequisite: PERS 231 or permission of instructor.*

PERS 490. Special Studies in Persian

1.00 - 4.00

Special topics or independent studies in Persian.

PHIL 101. Introduction to Philosophy [C2HQ]

3.00

An introduction to the basic problems and concepts of philosophy – the nature of man and the self, ethics, theories of knowledge, philosophy of religion, etc., as revealed in the writings of the major philosophers. May be used for general education credit.

PHIL 101H. Introduction to Philosophy - Honors [C2HQC]

3.00

An introduction to the basic problems and concepts of philosophy: the nature of man and the self, ethics, theories of knowledge, philosophy of religion, etc., as revealed in the writings of the major philosophers. May be used for general education credit.

Prerequisite: Honors Students

PHIL 103. Introductory Topics in Philosophy

1.00-6.00

Course on various topics in philosophy and/or ethics. May be taken multiple times for credit.

PHIL 120. Critical Thinking [C1CT]

3.00

An introduction to the techniques for analyzing and evaluating information in everyday experience. The functions of language will be discussed. Techniques for judging the strengths of arguments and the probable truth of the arguments' premises will be examined. This course does not meet the philosophy requirement for the B.A. degree. May be used for general education credit. May not be used for major credit.

PHIL 120H. Critical Thinking - Honors [C1CT]

3.00

An introduction to the techniques for analyzing and evaluating information in everyday experience. The functions of language will be discussed. Techniques for judging the strengths of arguments and the probable truth of the arguments' premises will be examined. This course does not meet the philosophy requirement for the B.A. degree. May be used for general education credit. May not be used for major credit. *Prerequisite: Honors Only & A: C1CT*

PHIL 150. Ethical Reasoning [C1CT]

3.00

Crosslisted with PHIL 150H

An introduction to the principles and techniques of rational decision making in ethics, including analysis of arguments and fallacies, ethical theories, and applications of moral principles to moral issues. This course cannot be used to fulfill the B.A. Philosophy requirement. May be used for general education credit. May not be used for major credit.

PHIL 150H. Ethical Reasoning

3.00

Crosslisted with PHIL 150

An introduction to the principles and techniques of critical thinking in ethics, including analysis of arguments and fallacies,

ethical theories, and applications of moral principles to moral issues. This course does not meet the philosophy requirement for the B.A. degree. May be used for general education credit. May not be used for major credit.

PHIL 200. Character and Virtue

3.00

An examination of philosophical perspectives on the nature and importance of character and virtue.

PHIL 210. Philosophy Through Film

3.00

This course combines feature length films and classic philosophical writings as points of departure for considering perennial philosophical questions such as: What is real? (Metaphysics) How can I know? (Epistemology) What is of value? (Morality).

PHIL 218. Philosophy of Religion

3.00

Crosslisted with REL 218

An intensive examination of religion from the standpoint of philosophical thinking with particular emphasis on the way philosophers view such problems as the existence of God, evil, immortality, religious language, etc.

PHIL 220. Philosophy and Science Fiction

3.00

This course will explore the philosophical aspects of science fiction. Topics may include the nature of time, time travel, free will, consciousness, personal identity, possible worlds, artificial intelligence, quantum theory or philosophical skepticism.

PHIL 240. Greek Philosophy in Context

3.00

This course will involve exploration of the intellectual world of the Ancient Greeks, with particular emphasis on the philosophical, historical, and literary works produced during the period. The course will include lectures and site visits throughout Greece.

PHIL 250. Introduction to Symbolic Logic

3.00

An introduction to the languages and techniques of propositional logic and first-order quantification theory.

PHIL 262. Problems in Applied Ethics

3.00

Ethical theories are used to analyze contemporary moral issues in areas such as business and health care. Course content varies.

PHIL 285. Philosophy, Art, and Literature

3.00

This course will study artistic works (literary or otherwise) for their philosophical content. Related issues in the philosophy of art for example, the nature of tragedy, theories of interpretation may also be considered.

PHIL 300. Knowledge & Belief

3.00

An extensive examination of theories of knowledge and philosophical problems concerning knowledge and belief. *Prerequisite: PHIL 101 or permission of the instructor.*

PHIL 305. Seminar in Aesthetics

3.00

Crosslisted with ART 305

Readings and discussions in the persistent philosophical problems of the arts, centering on consideration of the work of art, the artist and the audience. *Prerequisite: ART 200, ARTH 205, ARTH 206 or PHIL 101.*

PHIL 310. Symbolic Logic

3.00

The study and application of the principles and techniques of modern deductive logic to natural language. Also, examination of the properties of formal systems and of the logical implications and paradoxes of language. *Prerequisite: PHIL 250 or instructor consent.*

PHIL 311. Metaphysics

3.00

Examination of central questions regarding the fundamental nature of reality. Possible topics: universals and particulars, possibility and necessity, identity of objects over time and puzzles of material constitution, the problem of free will and determinism, and the nature of time. *Prerequisite: At least one other philosophy course or approval of the instructor*

PHIL 315. Logic and Legal Reasoning

3.00

Application of symbolic logic (first-order logic with identity) to legal language and deductive legal argument. Will include close logical analysis of at least one of the following: Supreme Court brief, Supreme Court decision, Supreme Court oral argument. *Prerequisite: PHIL 250 or instructor consent.*

PHIL 325. Philosophy of Mathematics

3.00

This course is a general survey of topics in the philosophy of mathematics. Topics may include the realism/antirealism debate, structuralism in mathematics, mathematical explanation, mathematical conceptions of infinity, the limits of mathematics or philosophical implications of set theory.

PHIL 326. Introduction to Non-Standard Logics

3.00

This course will examine some nonstandard logics and some of the philosophical issues they raise. Topics may include modal logic, intuitionistic logic, temporal logic or many valued logics.

PHIL 330. Moral Theory

3.00

An examination, at the intermediate level, of both classical and contemporary moral theories. Critical analysis of the normative and meta-ethical issues these theories raise. *Prerequisite: PHIL 101 or PHIL 270 , or permission of instructor.*

PHIL 335. The Individual, the State, and Justice

3.00

Mid-level class in political philosophy. Will read classic and/or contemporary texts in philosophy influential on political thought. Focus may be on views of the justification for, and role of, the state. Consideration may also be given to the proper relationship of individuals and the state, political freedom, and autonomy. *Prerequisite: PHIL 101 or permission of the instructor.*

PHIL 340. Ancient Greek Philosophy

3.00

This course traces philosophical problems raised by the pre-Socratics, Parmenides, Heraclitus, Pythagoras and the Sophists, through their treatment by Plato and Aristotle. Emphasis is placed on selected writings of Plato and Aristotle. *Prerequisite: PHIL 101 and Junior Standing or permission of the instructor.*

PHIL 341. Modern Philosophy

3.00

A selective survey of major issues and thinkers in Western philosophy from Descartes to Kant.

PHIL 342. Medieval Philosophy

3.00

A survey of the major issues and thinkers of the medieval philosophical world with emphasis on the philosophical writings of those within the Western tradition, such as (e.g.) Augustine, Anselm, Aquinas, and Scotus. *Prerequisite: One other philosophy course, or approval of the instructor.*

PHIL 343. Stoics, Sceptics and Epicureans

3.00

This course will focus on philosophy from the Hellenistic and Roman periods (4th C. BCE through 5th C. CE), with a special emphasis on Epicureanism, Stoicism and Skepticism.

Prerequisite: One other PHIL course or permission of the instructor.

PHIL 344. Existentialism

3.00

An examination of existentialism and its major spokesmen including such authors as Kierkegaard, Nietzsche, Sartre, Camus, Marcel and Heidegger. *Prerequisite: PHIL 101 or permission of the instructor.*

PHIL 350. The Philosophy of Feminism

3.00

Crosslisted with WGSS 350

An intermediate-level examination of philosophical problems in feminist theory and feminist contributions to philosophy.

PHIL 367. Topics of Philosophy of Law

3.00

Examination of the philosophical issues raised by the law, including the nature, foundation, and limits of the law, theories of its interpretation, and the fundamental interests it aims to protect. *Prerequisite: PHIL 262 or PHIL 330 or PHIL 335.*

PHIL 370. American Philosophy

3.00

A study of the main philosophical ideas in America, especially pragmatism, with particular emphasis being given to Pierce, James, Royce, Dewey and Whitehead. *Prerequisite: PHIL 101 or permission of the instructor.*

PHIL 375. Nineteenth Century Philosophy and Theology

3.00

Crosslisted with REL 375

A selected study of 19th-century thought, with emphasis on controversies concerning the nature and limits of reason, the ultimate meaning of history, and the inner meaning and social significance of religion. Pertinent thinkers include Hegel, Marx, Schleiermacher, Kierkegaard, Nietzsche and others.

PHIL 376. Nietzsche

3.00

An examination of Nietzsche's philosophy based on close study of one or more of his major works. The course may also more briefly examine one or more thinkers who especially influenced Nietzsche (for example Schopenhauer) or who were strongly influenced by him (for example Foucault). *Prerequisite: PHIL 101 or permission of the instructor.*

PHIL 377. Hermeneutics

3.00

Crosslisted with REL 377

This course will examine the main features of hermeneutics with particular emphasis on its contemporary perspectives. Discussion will focus on such themes as human understanding and human finitude, the nature of history and tradition, linguisticity and textuality of experience. Readings may address Gadamer, Ricoeur, Schleiermacher, and Dilthey. *Prerequisite: PHIL 101 or permission of the instructor.*

PHIL 380. Philosophy of Language

3.00

An examination of the central issues in contemporary (mainly 20th century) philosophy of language. Potential topics to be

covered include meaning, reference, the nature of language and the nature of truth. Potential philosophers to be examined include Mill, Frege, Russell, Kripke, Lewis and Grice. *Prerequisite: One other course in philosophy or permission of the instructor.*

PHIL 390. Special Topics in Philosophy

3.00

Topics for this intermediate-level course may be drawn from any area or period of philosophy chosen by the instructor. The course is designed primarily for philosophy majors and minors, but any suitably prepared student may take the course with permission of the instructor. *Prerequisite: One other PHIL course or permission of the instructor.*

PHIL 391. Advanced Special Topics in Philosophy

3.00

Topics for this advanced course may be drawn from any area or period of philosophy chosen by the instructor. The course is designed primarily for philosophy majors and minors, but any suitably prepared student may take the course with the permission of the instructor. May be repeated for credit. *Prerequisite: Six hours of philosophy or consent of the instructor.*

PHIL 392. Philosophy of Mind

3.00

An examination of competing theories of the intrinsic nature of mental states and mental processes, including careful consideration of questions concerning the relation between the mind and the physical world. *Prerequisite: PHIL 101 or approval of the instructor*

PHIL 394. Self and Identity

3.00

This course will explore the philosophical aspects of personal identity, with particular emphasis on the metaphysics of the self. Other issues considered may include the nature of the soul, the status of self-knowledge and the ethical aspects of personhood. *Prerequisite: One other PHIL course or permission of the instructor.*

PHIL 396. Philosophy of Physics

3.00

This course examines the philosophical foundations of physics. Some of the philosophical issues explored in the course may include how various theories in physics impact metaphysics, ontology and/or epistemology. Topics may include the nature of space and time, special relativity, general relativity, quantum theory, classical mechanics, thermodynamics, and/or cosmology.

PHIL 397. Philosophy of Space and Time

3.00

This course will survey debates about the nature of space and time. Topics may include Zeno's paradoxes, time travel, relationism vs. substantivalism, classical accounts of space and time, and relativistic space time.

PHIL 398. Philosophy of Quantum Theory

3.00

Quantum theory describes atoms and particles and is one of the most empirically successful physical theories. However, quantum theory seems to have revolutionary conceptual implications for metaphysics and epistemology. This course offers an introduction

to philosophical problems raised by quantum theory. Topics may include the measurement problem, quantum entanglement, different interpretations of quantum mechanics, the Einstein-Podolsky-Rosen (EPR) paradox, and Bell's theorem.

PHIL 410. Philosophy of Science

3.00

This course surveys a number of topics about the nature of science. The topics may include the problem of distinguishing science from pseudoscience, the nature of scientific explanation, the notion of progress in science, and the realism and anti-realism debate.

PHIL 420. Philosophy of Language

3.00

An examination of the central issues in contemporary (mainly 20th Century) philosophy of language. Potential topics to be covered include meaning, reference, the nature of language, and the nature of truth. Potential philosophers to be examined include Mill, Frege, Russell, Kripke, Lewis and Grice. *Prerequisite: PHIL 250 and one other course in philosophy course or permission of the instructor.*

PHIL 430. Analytic Philosophy

3.00

An examination of the origins and development of contemporary philosophical analysis, with special attention given to the nature and uses of language as well as logical structures of confirmation and explanation. *Prerequisite: PHIL 101, PHIL 250 or permission of the instructor.*

PHIL 440. Advanced Moral Philosophy

3.00

A critical examination, at the advanced level, of recent or historical work on normative and/or metaethical issues in moral philosophy. *Prerequisite: PHIL 101, PHIL 330 or permission of the instructor.*

PHIL 460. Topics in Classical Philosophy

3.00

An advanced study of major issues in or the writings of one, or more thinkers in ancient Greece through the western medieval period. *Prerequisite: PHIL 340 and Junior Standing or permission of instructor. May be repeated for credit with change of topics.*

PHIL 466. Kant

3.00

An examination of the theory of knowledge and the critique of traditional metaphysics set forth in Kant's Critique of Pure Reason, and of the ethical theory and the moral metaphysics defended in his Groundwork to the Metaphysics of Morals and Critique of Practical Reason. The course may also more briefly explore some related topics, such as Kant's views on aesthetics and teleology, or the key ideas of important post-Kantian philosophers like Fichte, Schelling or Hegel. *Prerequisite: PHIL 101 or permission of the instructor.*

PHIL 468. Phenomenology

3.00

A study of phenomenological investigation into the fundamental structures and conditions of conscious experience -- meaning-laden, first person experience of objects, of events, of one's self, of other persons, of one's world, and so forth. The course will devote special attention to the work of Husserl and of Heidegger. Additional authors may be studied, such as Sartre, Merleau-Ponty or Levinas. *Prerequisite: PHIL 101 or permission of the instructor.*

PHIL 490. Special Topics in Philosophy

3.00

Designed to give capable students an opportunity to complete independent study in philosophy under faculty supervision. May be repeated for credit.

PHIL 495. Philosophy Course Assistantship

1.00 - 6.00

Students participate as course assistants in philosophy. Assistantships provide students with a sense of what it is like to teach a philosophy course by allowing them to work closely with faculty members through different phases of course preparation, presentation and evaluation. Assistantships may also provide opportunities for student assistants to lead discussion and to help their peers review the material outside of the classroom. *Prerequisite: May be repeated once if assisting a different course, with six maximum total credit hours for both courses combined. Only three credit hours can apply to major or minor.*

PHIL 499A. Honors Thesis

1.00

PHIL 499B. Honors Thesis

3.00

PHIL 499C. Honors Thesis Prep

2.00

PHYS 105. Foundations of Physics

1.00

An introduction to the study of physics and the Physics Department. Presentations are given by faculty and students to acquaint the students with current research opportunities in the Department and the application of physics to a broad spectrum of topics.

PHYS 121. The Physical Nature of Light and Sound (3, 1) [C3PP]

4.00

A study of the physical properties of light and sound waves. Topics include production, propagation and spectral analysis of waves. Applications to be covered include musical instruments, sound reproduction, room acoustics, optical instruments (cameras, projectors, lasers), and color in art and nature. The course will include outside-of-class experiential activities. May be used for general education credit.

PHYS 140. College Physics I [C3PP]

3.00

The first semester of a non-calculus sequence in general physics. Topics include principles of mechanics, thermal properties of matter, wave motion and sound. A working knowledge of algebra and trigonometry is required. May be used for general education credit.

PHYS 140L. General Physics Laboratory [C3PP]

1.00

These laboratory courses are designed to complement and supplement the PHYS 140-150 and PHYS 240-250 lecture courses. PHYS 140L may be used for general education credit. *Prerequisite: PHYS 140 or PHYS 240. Corequisite: For PHYS 140L: PHYS 140 or PHYS 240.*

PHYS 150. College Physics II

3.00

The second semester of a non-calculus sequence in general physics. Topics include electric charges, circuits, magnetism, optics, atomic and nuclear physics. *Prerequisite: PHYS 140 (Must attain a grade of C- or higher).*

PHYS 150H. College Physics II - Honors

3.00

The second semester of a non-calculus sequence in general physics. Topics include electric charges, circuits, magnetism, optics, atomic and nuclear physics. *Prerequisite: PHYS 140 (Must attain a grade of C- or higher).*

PHYS 150L. General Physics Laboratory

1.00

These laboratory courses are designed to complement and supplement the PHYS 140-150 lecture courses. *Prerequisite: PHYS 140L and either PHYS 140 or PHYS 150. Corequisite: PHYS 150.*

PHYS 215. Energy and the Environment [C3PP]

3.00

Crosslisted with PHYS 215H

Energy use, sources and trends; fossil fuels, heat-work conversions, thermodynamic restrictions and electric power production; nuclear fission reactors and fusion energy; solar energy and technologies; alternative energy sources; energy storage; energy conservation; issues of waste and safety. Environmental, social and economic aspects will be discussed. Not open to ISAT majors scheduled to take ISAT 211 as part of their degree requirements. May be used for general education credit. *Prerequisite: One college course in science and one in mathematics.*

PHYS 215H. Energy and the Environment [C3PP]

3.00

Crosslisted with PHYS 215

Energy use, sources and trends; fossil fuels, heat-work conversions, thermodynamic restrictions and electric power production; nuclear fission reactors and fusion energy; solar energy and technologies; alternative energy sources; energy storage; energy conservation; issues of waste and safety. Environmental, social and economic aspects will be discussed. Not open to ISAT majors scheduled to take ISAT 212 as part of their degree requirements. May be used for general education credit.

PHYS 240. University Physics I [C3PP]

3.00

Kinematics, dynamics, energy and momentum conservation, oscillatory motion, fluid mechanics and waves. May be used for general education credit. *Corequisite: MATH 232 or MATH 235.*

PHYS 240L. University Physics Laboratory I [C3PP]

1.00

This laboratory course is designed to complement and supplement the PHYS 240 lecture courses. PHYS 240L may be used for general education credit. *Prerequisite: PHYS 240. Corequisite: PHYS 240.*

PHYS 247. Data Acquisition and Analysis Techniques II

1.00

This laboratory completes the Introductory Physics Lab sequence and is designed to supplement the PHYS 240/250 lecture courses. Topics include conception, design and performance of sophisticated experiments in physics; computer simulation of physical processes; analysis of experimental data; including uncertainty estimation; and error propagation. *Prerequisite: PHYS 250 and PHYS 240L.*

PHYS 250. University Physics II

3.00

Electric forces, fields and potentials; capacitance, dielectrics, resistance and DC circuits; magnetic fields, induced electric fields, inductance and AC circuits; geometrical optics, interference, diffraction and polarization. *Prerequisite: PHYS 240 with a grade of "C-" or higher is the prerequisite. Corequisite: MATH 236.*

PHYS 250L. University Physics Laboratory II

1.00

This laboratory course is designed to complement and supplement the PHYS 250. University Physics II lecture courses. *Prerequisite: PHYS 240L, PHYS 240, PHYS 250. Corequisite: PHYS 250.*

PHYS 260. University Physics III

3.00

The course will cover oscillations and wave dynamics, special relativity, and rotational kinematics and dynamics. *Prerequisite: "C" or better in PHYS 150 or PHYS 250. Corequisite: MATH 237.*

PHYS 270. Modern Physics

4.00

A course in modern physics, consisting of a discussion of the experimental basis for and fundamental principles of quantum physics, with applications to atomic structure and nuclear physics. *Prerequisite: "C" or better in PHYS 150 or PHYS 250, or consent of the instructor. Corequisite: MATH 237.*

PHYS 295. Laboratory Apparatus Design and Construction

1.00

An introduction to the design and fabrication of laboratory apparatus using machine tools. *Prerequisite: PHYS 250 or permission of the instructor*

PHYS 297. Topics in Physics

1.00 - 4.00

Topics in physics at the second-year level. May be repeated for credit when course content changes. Topics selected may dictate prerequisites. Students should consult instructor prior to enrolling for course. *Prerequisite: Permission of the instructor.*

PHYS 326. Biophysics

3.00

Physical models are used to explain biological systems. Topics from biology include cell division, replication, transcription, and translation of DNA, protein folding, and molecular motors. Physics topics include entropy and free energy, diffusion, statistical mechanics of two state systems. Experimental tools for biophysics are also discussed. *Prerequisite: PHYS 150 or PHYS 250.*

PHYS 330. Relativity

4.00

Crosslisted with ASTR 330

The basic mathematical descriptions of both Einstein's special and general theories of relativity are introduced through specific physical cases and calculus-based lectures. Special relativity is explored through its physical consequences on a variety of phenomena. General relativity is studied by considering the effects of gravity on space-time curvature on astrophysical objects. Simple numerical experiments in both special and general relativity will be conducted as class projects. *Prerequisite: PHYS 260 and MATH 237, or permission of instructor.*

PHYS 333. Introduction to Particle Physics

3.00

This is an introduction to current themes and ideas which confront the fundamental nature of matter and interactions. The most widely accepted theory, the Standard Model, will be explored. Possible extension, beyond the Standard Model physics, will be discussed. Basic properties such as charge, mass, and lepton number will be examined within these frameworks. Experiments that illuminate the basic nature of matter and ideas such as symmetry and quantum physics will be reviewed and assessed. *Prerequisite: PHYS 270.*

PHYS 337. Solid State Physics

3.00

A study of the forces between atoms, crystal structure, lattice vibrations and thermal properties of solids, free electron theory of metals, band theory of solids, semiconductors and dielectrics. *Prerequisite: PHYS 270*

PHYS 338. Nuclear Physics

3.00

An introduction to the study of the atomic nucleus. Topics covered include static nuclear properties and movements, the force between nucleons, the deuteron, nucleon scattering, isospin, nuclear structure, radioactivity, decay kinematics and selection rules, fission, and fusion. *Prerequisite: PHYS 270.*

PHYS 339. Introductory Nuclear Science

4.00

An introduction to nuclear science that will provide a solid foundation for experimental work in applied nuclear physics. Detection of ionizing radiation, as it applies to nuclear physics, will be additionally covered in the laboratory-component of the course. Topics include concepts of radioactive decays, radiation transport and interaction with matter, basics of radiation detection devices, dosimetry, radiation therapy, X-ray production, and fission nuclear reactors. *Prerequisite: PHYS 270 or consent of instructor.*

PHYS 340. Mechanics

3.00

Application of the fundamental laws of mechanics to particles and rigid bodies. Topics include statics, dynamics, central forces, oscillatory motion and generalized coordinates. *Prerequisite: PHYS 260 and MATH 238.*

PHYS 341. Non-Linear Dynamics and Chaos

3.00

Crosslisted with MATH 341

Introductory study of nonlinear dynamics and chaos intended primarily for upper-level undergraduates in science or mathematics. Topics include stability, bifurcations, phase portraits, strange attractors, fractals, and selected applications of nonlinear dynamics in pure and applied science. Computers may be utilized for simulations and graphics. *Prerequisite: MATH 238 or (MATH 300 and MATH 336); and MATH 248*

PHYS 342. Mechanics II

3.00

A continuation of PHYS 340 including Lagrangian dynamics, rigid body motion and the theory of small oscillations. *Prerequisite: PHYS 340*

PHYS 344. Advanced Physics Laboratory I

1.00

The first course in a three-course laboratory sequence. A set of advanced laboratory experiences in which students are introduced to experimentation in several areas of physics while gaining experience in experiment design, data analysis, formal report writing and presentations *Prerequisite: PHYS 247. Corequisite: PHYS 345.*

PHYS 345. Advanced Physics Laboratory II

1.00

This is the second course in a three-course laboratory sequence. A set of advanced laboratory experiences in which students are introduced to experimentation in several areas of physics while gaining experience in experiment design, data analysis, formal report writing and presentations. *Prerequisite: PHYS 344. Corequisite: PHYS 344.*

PHYS 346. Advanced Physics Laboratory III

1.00

This is the third course in a three-course laboratory sequence. A set of advanced laboratory experiences in which students are

introduced to experimentation in several areas of physics while gaining experience in experiment design, data analysis, formal report writing and presentations. *Prerequisite: PHYS 344 and PHYS 345.*

PHYS 350. Electricity & Magnetism

3.00

A study of the electrostatic field, the magnetic field, direct and alternating currents, and electromagnetic waves. *Prerequisite: PHYS 260 and MATH 238.*

PHYS 360. Analog Electronics

4.00

DC and AC circuits, spectral and pulse circuit response, semiconductor physics, and simple amplifier and oscillator circuits. *Prerequisite: PHYS 250 or permission of the instructor.*

PHYS 364. Introduction to Fluid Mechanics

4.00

Crosslisted with MATH 364

Introduces the student to the application of vector calculus to the description of fluids. The Euler equation, viscosity and the Navier-Stokes equation will be covered. *Prerequisite: MATH 237 and PHYS 260. Corequisite: PHYS 260 and MATH 237, or permission of the instructor.*

PHYS 367. Introduction to Acoustics

3.00

Crosslisted with MATH 367

This course represents an introduction to sound, hearing, and vibration. Architectural, biological and environmental acoustics will also be discussed. Students will develop an ability to use mathematical models and experimental techniques to study problems in acoustics and to transfer this knowledge to analogous situations. They will also develop an ability to conduct a semester-long research or expository project and present it in written and oral form to an audience of peers. *Prerequisite: MATH 236.*

PHYS 371. Digital Electronics

2.00

Transistors, integrated circuits, logic families, gates, latches, decoders, multiplexers, multivibrators, counters and displays. *Prerequisite: PHYS 150 or PHYS 250 with a grade of "C" or better or permission of the instructor.*

PHYS 372. Microcontrollers and Their Applications (2, 4)

2.00

Microcontrollers, their instructions, architecture and applications. *Prerequisite: PHYS 371 or permission of the instructor*

PHYS 375. An Introduction to Materials Science

3.00

Crosslisted with CHEM 375, MATS 375

An introduction to materials science with emphasis on general properties of materials. Topics will include crystal structure, extended and point defects, and mechanical, electrical, thermal and magnetic properties of metals, ceramics, electronic materials, composites and organic materials. *Prerequisite: CHEM 131, PHYS 150 or PHYS 250, ISAT 212 or permission of the instructor.*

PHYS 380. Thermodynamics and Statistical Mechanics

3.00

A treatment of the thermal properties of matter from both macroscopic and microscopic viewpoints. Topics include the laws of thermodynamics, heat, work, internal energy, entropy, elementary statistical concepts, ensembles, classical and quantum statistics and kinetic theory. Approximately equal attention will be given to thermodynamics and statistical mechanics. *Prerequisite: PHYS 270*

PHYS 381. Materials Characterization (Lecture/Lab)

3.00

Crosslisted with MATS 381

A review of the common analytical techniques used in materials science related industries today, including the evaluation of electrical, optical, structural and mechanical properties. Typical techniques may include Hall Effect, scanning probe microscopy, scanning electron microscopy, ellipsometry and x-ray diffraction. *Prerequisite: PHYS 375 /MATS 375 , ISAT 431/MATS 431 or GEOL 395 /MATS 395 .*

PHYS 386. Robots: Structure and Theory

3.00

An introduction to the study of autonomous robotic platforms. Topics include robot structure, propulsion systems, robot kinematics, sensors used in robotics, and sensor integration. The course combines lectures with laboratory activities in which students will get hands-on experience in designing, building, programming, and testing autonomous robotic platforms. *Prerequisite: Completion of the basic preparation courses required for the robotics minor or permission of the instructor.*

PHYS 387. Theory and Basic Principles of Mobile Robot Construction and Control

3.00

The course is designed to familiarize the student with the basic elements of mobile robots. The course will provide students the opportunity to work with engineers and experts in the field of robotics to build a mobile robot while addressing the issues of control and principles of operation. The course will take advantage of the 4VA telepresence system to bring together experts and students from outside locations to supplement local instruction. *Prerequisite: Completion of the basic preparation courses required for the robotics minor or permission of the instructor.*

PHYS 388. Robots for Humanity

3.00

Interdisciplinary team based course in which real world problems will be analyzed and tackled using robotics. May be repeated for credit when course content changes. *Prerequisite: PHYS 387 or completion of the basic preparation courses required for the robotics minor or permission of the instructor.*

PHYS 390. Computer Applications in Physics

3.00

Applications of automatic computation in the study of various physical systems. Problems are taken from mechanics of particles and continua, electromagnetism, optics, quantum physics, thermodynamics and transport physics. *Prerequisite: MATH 248/CS*

248, PHYS 240, PHYS 250 and six additional credit hours in major courses in physics, excluding PHYS 360, PHYS 371 and PHYS 372.

PHYS 391. Seminar

0.00

Participation in the department seminar program. *Prerequisite: Junior or Senior Standing and permission of the instructor.*

PHYS 392. Seminar

1.00

Participation in the department seminar program. *Prerequisite: Junior or Senior Standing and permission of the instructor.*

PHYS 397. Topics in Physics

1.00 - 4.00

Topics in physics at intermediate level. May be repeated for credit when course content changes. Topics selected may dictate prerequisites. Students should consult instructor prior to enrolling for course. *Prerequisite: Permission of the instructor.*

PHYS 398. Independent Study in Physics or Astronomy

1.00 - 3.00

Crosslisted with ASTR 398

An individual project related to some aspect of physics or astronomy. Must be under the guidance of a faculty adviser. A student may not earn more than a total of 4 credits for PHYS/ATSR 398

PHYS 398A. Problems in Physics

1.00

An individual project related to some aspect of physics. Must be under the guidance of a faculty adviser.

PHYS 398B. Problems in Physics

2.00

An individual project related to some aspect of physics. Must be under the guidance of a faculty adviser.

PHYS 420. Modern Optics

3.00

A study of the kinematic properties and physical nature of light including reflection, refraction, interference, diffraction, polarization, coherence and holography. *Prerequisite: PHYS 260, PHYS 270, and MATH 237.*

PHYS 440. Geophysics (3, 2)

4.00

Crosslisted with GEOL 440

A survey of geophysical methods, with joint attention on near-surface and solid earth applications. Topics include seismology,

heat flow, gravity, magnetism, electrical methods, ground penetrating radar and geophysical aspects of plate tectonics. Labs focus on practical experience with data acquisition, reduction, and interpretation and are a combination of field, classroom and computational activities. *Prerequisite: GEOL 110L or PHYS 140 - PHYS 150 or PHYS 250 or permission of the instructor.*

PHYS 455. Lasers and Their Applications to Physical Sciences

3.00

Crosslisted with CHEM 455

An introduction to both the theoretical and practical aspects of lasers and their applications in the physical sciences. *Prerequisite: PHYS 270, CHEM 331, or permission of the instructor.*

PHYS 460. Quantum Mechanics

3.00

Principles and applications of quantum mechanics. Topics include wave packets and the uncertainty principle, the Schrodinger equation, one-dimensional potentials, operators and eigenvectors, three-dimensional motion and angular momentum, and the hydrogen atom. *Prerequisite: PHYS 340.*

PHYS 482. Advanced Theoretical Physics

3.00

This course is a continuation of topics from mechanics, thermodynamics and statistical Mechanics, electricity and magnetism, and quantum mechanics. The course may include topics from mechanics (Lagrangian dynamics, rigid body motion), electricity and magnetism (solution of Maxwell's equations in the presence of matter), thermodynamics and statistical mechanics (dynamical statistical mechanics) and quantum mechanics (beyond the hydrogen atom).

PHYS 485. Science of the Small

4.00

Crosslisted with CHEM 485

The chemistry and physics of materials of the nanometer scale will be explored. Lectures and laboratories will cover contemporary issues in surfaces, self-assembly and low dimensional materials. The intersection of biology, chemistry, engineering and physics will be explored through nanoscience. *Prerequisite: CHEM 132 and MATH 236. Prerequisite or corequisite: PHYS 150 or PHYS 250.*

PHYS 491-492. Physics Assessment and Seminar

0.00 - 1.00

Principal course activities are participation in the departmental assessment program and attendance at departmental seminars. *Prerequisite: PHYS 392*

PHYS 497. Topics in Physics

1.00 - 4.00

Topics in physics at the advanced level. May be repeated for credit when course content changes. Topics selected may determine prerequisites. Students should consult instructor prior to enrolling for course. *Prerequisite: Permission of the instructor.*

PHYS 498. Undergrad Phys Research

1.00 - 4.00

Research in a selected area of physics as arranged with a faculty research adviser. A student may not earn more than a total of six credits for PHYS/ATSR 498R. Repeatable up to six credits. *Prerequisite: Proposal for study must be approved prior to registration.*

PHYS 498A. Undergrad Phys Research

2.00

Research in a selected area of physics as arranged with a faculty research adviser. *Prerequisite: Proposal for study must be approved prior to registration.*

PHYS 498R. Undergraduate Research in Physics or Astronomy

1.00 - 4.00

Crosslisted with ASTR 498R

Research in a selected area of physics or astronomy as arranged with a faculty research adviser. As student may not earn more than 6 credits for PHYS 498R and ASTR 498R. *Prerequisite: Proposal for study must be approved prior to registration.*

PHYS 499. Honors

1.00 - 3.00, repeatable

Participation in this course must be approved during the second semester of the junior year. For details, see catalog section entitled "Graduation with Distinction."

POSC 200. Global Politics [C4GE]

3.00

An exploration of political, social and economic issues and structures existing within and between states in the contemporary global community. Students are introduced to alternative approaches to analyzing these issues in diverse cultures and political settings. May be used for general education credit.

POSC 201. Introduction to Western Political Theory

3.00

A general survey of Western political theory from Plato to Marx, including the foundations of political inquiry and the search for order and freedom.

POSC 225. U.S. Government [C4AE]

4.00

An examination of institutions, processes and intellectual concepts which structure American political activity. The interaction of the political system with the changing American society and America's changing role in world affairs are also treated. The course provides an introduction to quantitative methodology. May be used for general education credit.

POSC 230. International Relations

3.00

A survey of the field of international relations including consideration of the elements of national power, foreign policy, diplomacy, propaganda, foreign aid, war, international law and international organization.

POSC 240. Comparative Politics

3.00

A comparative study of selected political systems. Emphasis is on the structure of government, the political process and the conditions which either promote or constrain political change and stability.

POSC 295. Research Methods

4.00

Students learn how to conduct original research from theory formulation through data collection and hypothesis testing. Special emphasis on research and computer literacy.

Prerequisite: MATH 220 , POSC 225 , and one of the following: POSC 230 , POSC 240 , PPA 200 or PPA 265 .

POSC 300. Politics and Film

3.00

This course examines the relationship between politics and film, broadly construed. The ability of film to inform and promote agendas on key political issues, and the way in which films reflect the world of ideas and political culture in which they are created will be explored in substantive areas that may include: social and political change, human rights and justice, the portrayal of political processes and institutions, and foreign policy.

POSC 301W. The Washington Semester Experience

3.00

A study of the manner in which the policy making process is conducted on the federal level. The function of political and governmental institutions in establishing public policy is examined through readings and observation. Prerequisite: Enrollment in Washington Semester program. *Prerequisite: Enrollment in the Washington Semester program.*

POSC 302. State & Local Gov

3.00

A study of state and local government in the United States with particular focus on Virginia. Emphasis is placed on an understanding of the framework, functions, and problems of state and local governments.

POSC 310. Political Theory: Ancient to Early Modern

3.00

A study of political theory from Plato and Aristotle through Machiavelli with analysis of such political concepts as the nature of the state, political obligation, natural law and Utopian societies.

POSC 315. Political Theory: Early Modern to the 19th Century

3.00

A study of political theory from Hobbes and Locke to Hegel, Green and other 19th century thinkers. The course will examine such ideas as freedom, political obligation, justice, progress, ethics and politics, and the relationship between the individual and the human polity.

POSC 316. Contemporary Political Theory

3.00

An examination of political thinkers and their ideas from the end of the 19th century to the present. Special emphasis will be placed on the writings of Hannah Arendt, Jurgen Habermas, John Rawls and other contemporary thinkers who continue to engage in the pursuit of political inquiry.

POSC 321. Political Theory and Ideology

3.00

A study of the relationship between normative political theory and ideology, emphasizing the philosophic foundations of modern political thought and its relationship to the emergence of various ideological positions in the 19th and 20th centuries. Includes a study of liberalism, conservatism, socialism, anarchism, nationalism, fascism, feminism, environmentalism and others.

POSC 325. Constitutional Law

3.00

A study of the legal aspects of the American democratic system. The development of the Constitution will be explored and case studies used to portray important events and changes.

POSC 326. Civil Rights

3.00

An examination of the judicial interpretation of civil rights in America with emphasis on freedom of speech, due process of law and equal protection under the 14th Amendment.

POSC 330. American Political Thought

3.00

A study of the development and significance of political ideas that have influenced American society and government.

Prerequisite: POSC 201

POSC 331. Human Rights in Theory and Practice

3.00

Crosslisted with JUST 331

This course will explore the nature and value of human rights by investigating some major debates over their status and meaning, and by examining some of the ways people have tried to secure human rights in practice. *Prerequisite: JUST, POSC and INTA majors only. For JUST majors: JUST 200.*

POSC 333. American Political Thought II: Civil War to the Present

3.00

This course explores American political thought from Reconstruction (ca. 1866) to the present day, drawing largely on primary sources, including writings by political leaders and activists, political theorists, philosophers, public intellectuals and religious thinkers. *Prerequisite: POSC 201 .*

POSC 334. Political Thought of James Madison

3.00

This course examines the political thought of James Madison (1751-1836). Madison was a profound political thinker who read

voraciously, thought deeply, and wrote eloquently and carefully about many of the leading political questions of his day—and ours. In this class, we will read, understand and critically assess what Madison contributed to these political dialogues and more generally to the American political tradition. *Prerequisite: POSC 201.*

POSC 335. Comparative Politics for Teachers

3.00

This course examines the core themes, concepts and debates in the subfield of Comparative Politics and how they apply to politics in selected countries around the world. The course emphasizes those themes and cases of greatest use to students pursuing careers in education and explores approaches to teaching this content in a variety of classroom settings.

POSC 340. Politics of Development

3.00

A comparative study of the processes of political development in the developing nations of the Middle East, Africa, Asia and Latin America. Attention is given to the special problems confronting these nations and their implications for the global systems.

POSC 341. Social Movements in the U.S. and Abroad

3.00

In recent decades, social movements have mobilized people concerned about issues ranging from the rights of ethno-racial minorities, women, sexual minorities and immigrants to the environment, human rights and world peace. This course will examine the origins, modes of action and impact of such movements. We will apply the comparative method to analyze social movements in the United States and abroad, investigating how different socioeconomic and political contexts shape social movements based on common issues. The course will emphasize how social movements emerge and function within and alongside existing structures of formal politics.

POSC 344. Politics of the European Union

3.00

The course offers an in-depth consideration of the political development of the European Union, the EU policy-making process, and contemporary issues that confront European leaders and citizens.

POSC 345. Politics of Western Europe

3.00

This course involves comparative analysis of the development and dynamics of political regimes in western Europe. Attention is given to political institutions, political participation, public policy, and political and economic trends since 1945.

POSC 346. Politics of Central and Eastern Europe

3.00

This course involves comparative analysis of the development and dynamics of political regimes in central and eastern Europe. Attention is given to pre-communist, communist, and post-communist politics and to explaining political and economic trends since 1989.

POSC 347. Comparative Public Policy

3.00

A study of public policy formation and implementation in selected advanced industrial and Third World nations.

POSC 348. The Politics of Cultural Pluralism

3.00

This course examines the various manifestations of cultural pluralism, a situation that occurs when multiple ethnic, religious, and/or linguistic groups coexist within a single state. This course considers different institutional and policy approaches to coping with cultural pluralism.

POSC 350. Latin American Politics

3.00

A comparative study of the political institutions, processes and current issues in the Latin American states, and an analysis of their importance in regional and global relations.

POSC 351. Topics in American Politics

3.00

In-depth exploration of specialized topics in the area of American politics. The topic for each semester will be announced on MyMadison.

POSC 353. African Politics

3.00

A comparative study of the institutions and social, economic, and global processes that affect contemporary African states. Political developments explored include the construction and transformation of postcolonial states, ethnic conflict, economic crisis and reform, and regime change.

POSC 354. Politics of the Middle East

3.00

This course involves comparative analysis of political institutions, social dynamics and economic processes in the contemporary Middle East. The course also focuses on the ways that global developments affect and are affected by Middle Eastern states and peoples.

POSC 355. East Asian Politics

3.00

A study of the political systems of the major countries of East Asia, including Japan, China and Korea. Issues discussed include political development and democratization movements in the People's Republic of China, the Republic of China and the Republic of Korea.

POSC 356. Politics of China

3.00

This undergraduate course provides an introduction to key institutions, transformations, and issues in contemporary Chinese politics.

POSC 361. Topics in International Relations

3.00

In-depth exploration of specialized topics in the field of international affairs. The topic for each semester will be announced on MyMadison.

POSC 362. Political Behavior

3.00

A study of how citizens acquire politically relevant attitudes and how these attitudes influence their political behavior. The effects of the mass media on voting behavior are also considered. Emphasis is placed on U.S. voting behavior but behavior in other nations is also covered. *Prerequisite: POSC 225.*

POSC 363. Hacking for Diplomacy

3.00

Hacking for Diplomacy is a project-orientated course that takes real problems from the Department of State, the intelligence community and other federal departments and agencies and has students use the Lean Launch Pad Methodology to test problem understanding and potential solutions. The course provides students the opportunity to serve as resource to help address critical problems facing the U.S. government today. Participation in this course promotes engagement between students and stakeholders from a range of government agencies and provides hands-on opportunity to solve real national security and foreign policy problems. A network of such courses across the U.S. is providing a system that can develop solutions that match government end users' in weeks. *Prerequisite: POSC 230 and POSC 240.*

POSC 364. Political Parties in America

3.00

This course will focus solely on the central role of political parties in the United States. Even though parties are not mentioned in the U.S. Constitution and the framers despised them, they quickly formed and have come to dominate our political environment. Fully understanding political parties is essential for the political science student. *Prerequisite: POSC 225 or permission of the instructor.*

POSC 365. American Political Campaigning

3.00

Study of modern day political campaigning with emphasis on campaign structure, strategy, and the relationship between candidates and political consultants. The course assesses the consequences of the changing nature of political campaigns for democracy in the United States. *Prerequisite: POSC 225.*

POSC 367. U.S. Immigration Politics and Policy

3.00

An examination of how conceptions of national identity, nativism and assimilation influence public opinion toward immigrants and shape immigration policy in the United States. The perspectives of native-born residents, immigrants and policymakers are considered. The course discusses immigration as a social and political issue; reviews the historical evolution of U.S. immigration policy and public opinion trends; and explores how contemporary immigrants adapt to life in the United States.

POSC 368. Interest Groups, Lobbying and Public Policy

3.00

An analysis of the mobilization and lobbying activities of interest groups in the American public policy system, with an emphasis on the origin and maintenance of interest organizations; diversity and bias in the interest group system; lobbying influence and

policy advocacy strategies, tactics, and targets; and the regulation of lobbying and related campaign finance activities. *Prerequisite: POSC 225 or permission of the instructor.*

POSC 369. Elections and Voting Behavior

3.00

The electoral process is one of the primary means by which Americans can hope to influence public officials, and thus public policy, in the United States. Elections provide voters an opportunity to hold political officials and political parties responsible for their actions in office; ideally, elections as a means of accountability should serve to keep office holders responsive to the public's needs. In reality, however, there are many impediments that may preclude the democratic system from functioning as effectively as it should, such as low levels of voter knowledge and voter turnout, changes in primary election scheduling, and even mathematical complications posed by the Electoral College system. Only by studying elections can we understand the complexity of our political environment, and how factors beyond voter preferences and candidate agendas can shape election outcomes in the United States. *Prerequisite: POSC 225.*

POSC 370. U.S. Foreign Policy

3.00

An investigation of the processes for making foreign policy, underlying premises influencing specific policies and substance of American foreign policy. *Prerequisite: POSC 230*

POSC 371. Topics in Comparative Politics

3.00

In-depth exploration of specialized topics in the area of comparative politics. The topic for each semester will be announced on MyMadison.

POSC 371S. Special Studies Salamanca

3.00

A comparative study of political systems in Spain and the United States. Emphasis on historical and contemporary issues. *Prerequisite: Studies Abroad-Salamanca*

POSC 372. Ethics and International Politics

3.00

Crosslisted with JUST 372

This course investigates the significance of ethical questions in the theory and practice of contemporary international politics, introducing a variety of normative approaches that shape the issues of peace and conflict, morality and justice in global affairs. Practical case studies will also be used to address issues of policy relevance, with particular attention paid to the American experience. *Prerequisite: JUST, POSC, and INTA majors only. For JUST majors: JUST 235.*

POSC 380. The U.S. Presidency

3.00

A study of the institution of the American presidency focusing on the sources, bases and character of the power required by the president for effective executive action. Relationships of the presidency to foreign affairs, Congress, the public, party structure and the administrative establishment will also be considered. *Prerequisite: Prerequisite: POSC 225.*

POSC 381. Topics in Political Theory

3.00

In-depth exploration of specialized topics in the area of political theory. The topic for each semester will be announced on MyMadison.

POSC 382. The Role of Religion in American Politics

3.00

An examination of the role religion has played and continues to play in American politics. Besides providing an overview of how religion has influenced electoral, legislative, and judicial outcomes, the course will provide an in-depth examination of particular aspects of religion's role in political life. *Prerequisite: POSC 225 or Permission of the Instructor.*

POSC 383. Women and Politics in Comparative Perspective

3.00

Crosslisted with WGSS 383

A study of the causes and consequences of women's political marginalization in the United States and abroad. The course examines socioeconomic and political dimensions of gender inequality, exploring how women have worked through social movements, electoral politics, and public policy initiatives to overcome obstacles to their political empowerment.

POSC 384. Minority Group Politics

3.00

This course examines the role of minority groups in American Politics. Attention is given to five groups (African Americans, Asian Americans, Native Americans, Latinos and women) that for reason of race or gender have faced institutional discrimination and political domination in the United States.

POSC 385. The U.S. Congress

3.00

Study of the legislative process will concentrate on the operation of Congress with regard to such matters as its rules and procedure; relationships to the presidency, the bureaucracy, pressure groups and the courts; and a discussion of its current problems. *Prerequisite: POSC 225.*

POSC 386. The U.S. Judiciary

3.00

An investigation of the American court system. The course focuses on the role of the judiciary in American politics, the difference between judicial and other political and bureaucratic decision-making processes, the selection of judges, the decisions made by judges and other actors interacting with the courts, and the impact of court decisions on American society.

POSC 387. The Appellate Process and Practice

3.00

An examination of the Supreme Court appellate process in the United States from its beginnings with the lower court opinion through oral argument. Class is conducted as a seminar in which students are expected to engage actively. Students study substantive areas of constitutional law and the common law system of precedent.

POSC 391. Topics in Public Policy

3.00

In-depth exploration of specialized topics in the area of public policy. The topic for each semester will be announced on MyMadison.

POSC 392. Peace Studies

3.00

Crosslisted with JUST 392

A study of the evolution, theory and practice of peace studies. The course focuses on how we wage and resolve conflict, how we effect social change, and how we provide for security through nonviolent means.

POSC 393. Human Security

3.00

This course examines the concept of security in a globalized world, paying particular attention to threats to individuals and groups in the post-Cold War international system. Topics include the transition from state security to individual security, human development, human rights, military intervention, responsibility to protect, and global governance. *Prerequisite: POSC 230*

POSC 394. International Conflict

3.00

A study of the causes and consequences of violent political conflict between and within states. The course emphasizes the theoretical explanations of conflict initiation, escalation, and termination, with applications to both individual cases and broader patterns of conflictual behavior. *Prerequisite: POSC 230*

POSC 395. International Law

3.00

Examination of the role of international law in world politics. Particular attention will be given to the effects of international law on patterns of international exchange and interaction. Case study and other forms of political analysis will be used.

POSC 396. International Organizations

3.00

Study of the evolution and role of contemporary international organizations in the larger context of world politics. Emphasis on the ways in which the changing patterns of political power influence the processes and effectiveness of such organizations.

POSC 397. The Politics of International Economic Relations

3.00

A study of the political dynamics and implications of international economic relations.

POSC 398. Simulations

3.00

Application of concepts and insights learned in the classroom to contemporary policy problems and practical activities. The topic of this course will vary from offering to offering. The exact courses required will vary with the subject matter of the simulation.

POSC 430. International Security and Conflict Management

3.00

This course examines major threats to international security in the post-Cold War world. Topics include the changing global security environment, proliferation of weapons of mass destruction, terrorism and ethnic conflict. The effectiveness of economic sanctions, deterrence, international organizations, preventative war and other tools in dealing with these threats in critically examined.

POSC 435. International Terrorism

3.00

Systematic study of political terrorism with emphasis upon the destabilizing effect that it has upon the international community.

POSC 440. Post-Conflict Societies

3.00

An examination of the political dynamics of social, economic, security and governance problems faced in rebuilding societies that are emerging from a period of intense conflict. Emphasis on institutional and behavioral challenges brought about by conflict; strategies employed by domestic and international actors to promote democratic, just and secure societies after conflict; and standards that can be used to assess the success, failure and durability of a newly emerging political system.

POSC 457. Comparative Empires

3.00

Crosslisted with HIST 457

Comparative empires is an examination of imperialism from 1450 to the present. Focusing on no less than four empires, the course will apply a variety of theoretical approaches in a series of case studies with at least one empire from the period of exploration and one from 1919 to the present. Students will employ approaches from history, political science, economics and geography as they search for a deeper understanding of each case study and the broader concept of empire. *Corequisite: MSSE 470H.*

POSC 458. International Political Analysis

3.00

An examination of techniques and principles for the analysis of future political conditions and future government decisions.

POSC 472. Media and Politics

3.00

Crosslisted with POSC 472, SCOM 472, SMAD 472

A study of the media's role in political campaigns, concentrating on past/present election, the media's role in covering political parties and coverage of the governing process. Discussion of electronic and print will occur. Topics to be examined include campaign videos, CSPAN, political ads, editorial cartoons, TV debates, convention coverage and radio talk show commentary.

POSC 472L. Media and Politics

3.00

Crosslisted with POSC 472, POSC 472W , SCOM 472, SCOM 472L, SMAD 472, SMAD 472L

A study of the media's role in political campaigns, concentrating on past/present election, the media's role in covering political parties and coverage of the governing process. Discussion of electronic and print will occur. Topics to be examined include campaign videos, CSPAN, political ads, editorial cartoons, TV debates, convention coverage and radio talk show commentary. *Prerequisite: Studies Abroad-London*

POSC 492. Senior Seminar in Political Science

3.00-4.00

This research-oriented senior seminar provides an overview of the discipline of political science and the different approaches to research in the field. A major research project will strengthen the research, information access and lifelong learning capacities of the student. Fulfills the College of Arts and Letters writing-intensive requirement for the major. *Prerequisite: Senior standing and POSC 295.*

POSC 493. Political Communication Internship

4.00

This course will provide students with experiential learning opportunities in policymaking, campaigning, media, legislative politics, and lobbying. A research paper relating the internship to the student's academic work will enhance the learning experience. *Prerequisite: Junior or senior standing; POSC 225, SCOM 240, SCOM 241, and one other core PCOM required course.*

POSC 493W. Political Communication Internship in Washington

6.00

This course will provide students with experiential learning opportunities in policymaking, campaigning, media, legislative politics, and lobbying. A research paper relating the internship to the student's academic work will enhance the learning experience. *Prerequisite: Junior or senior standing; POSC 225, SCOM 240, SCOM 241 and one other core PCOM required course .*

POSC 495. Internship in Political Science

4.00

Provides students with opportunities for experiential learning in a legislative, policy making, campaign, constituency, interest group or criminal justice organization. A research paper related to the internship and a presentation based on the experience are required.

*No more than four credit hours can be counted toward the political science major

Prerequisite: Junior or senior standing, 15 credits of political science, public administration or political communication and permission of the instructor.

POSC 495W. Washington Semester Internship in Political Science

6.00

Provide Washington Semester participant with opportunities for experiential learning in a Washington, D.C.-based legislative, policy making, campaign, constituency, interest group or criminal justice organization. Requirements include 360 work hours, a research paper related to the internship, a career report, a daily log, and regular meetings with faculty-in-residence.

*No more than four credit hours can be counted toward the political science major.

Prerequisite: Junior or senior standing, 15 credits of political science, public administration or political communication, and successful application to Washington Semester program.

POSC 498. Research in Political Science

1.00

Research in a selected area of political science as arranged with a faculty sponsor. Research outline must be approved by faculty sponsor and department head the semester before registration. Course may be repeated. *Prerequisite: A Political Science, International Affairs, or Public Policy and Administration GPA of 2.5 or greater.*

PORT 101. Elementary Portuguese I

3.00 - 4.00

The fundamentals of Portuguese through listening, speaking, reading and writing. Practice in pronunciation and development of comprehension. One hour's work a week in the language laboratory. Students will receive no credit for the course if he/she has had two or more years of the language in high school.

PORT 102. Elementary Portuguese II

3.00 - 4.00

The fundamentals of Portuguese through a higher level of listening, speaking, reading and writing. Practice in pronunciation and development of comprehension. One hour's work a week in the language laboratory. Students will receive no credit for the course if he/she has had two or more years of the language in high school. *Prerequisite: PORT 101*

PORT 231. Intermediate Portuguese I

3.00

A thorough review of first year grammar and vocabulary building. Conversation, composition and readings will be chosen to reach competency at the lower intermediate level Portuguese. *Prerequisite: PORT 102 or permission of the instructor.*

PORT 232. Intermediate Portuguese II

3.00

A thorough review of PORT 231 grammar and vocabulary building. Conversation, composition and readings will be chosen to reach competency at the advance intermediate level. *Prerequisite: PORT 231 or permission of instructor.*

PORT 300. Portuguese Grammar and Communication

3.00

Intensive training in grammatical structures and their application to oral and written communication. Instruction is in Portuguese. Fulfills the College of Arts and Letters writing-intensive requirement for possible International Affairs majors and/or IBUS majors. *Prerequisite: PORT 232 or permission of the instructor*

PORT 320. Portuguese Oral and Written Communication

3.00

Intensive training in the use of modern, everyday Portuguese with emphasis on conversation and composition. Readings in Portuguese will provide a context for discussion and writing. *Prerequisite: PORT 300.*

PORT 490. Special Topics in Portuguese

1.00 - 4.00

Special topics or independent studies in Portuguese.

PSYC 100. Interpersonal Skills for Resident Advisers

1.00

Designed to give resident adviser trainees understanding of interpersonal relations. Cannot be used as a psychology major elective. May be used for general education credit. *Prerequisite: Limited to students selected as resident advisers.*

PSYC 101. General Psychology [C5SD]

3.00

A study of the nervous system, sensation, perception, consciousness, learning, memory, language, intelligence, motivation, emotion, life span development, personality, psychopathology, psychotherapy, social psychology and the scientific method. May be used for general education credit.

PSYC 101H. General Psychology - Honors [C5SD]

3.00

A study of the nervous system, sensation, perception, consciousness, learning, memory, language, intelligence, motivation, emotion, life span development, personality, psychopathology, psychotherapy, social psychology and the scientific method. May be used for general education credit. *Prerequisite: Honors Students*

PSYC 105. Orientation to the Major

1.00

This course will provide psychology majors with knowledge and tools to get the most out of the major. Topics include an introduction to the psychology major at JMU, strategies for discerning between credible and non-credible information, professional (e.g., student/professor) communication and campus learning support resources. This course is only available for students who have not yet completed the two-semester methodology sequence. *Prerequisite: Declared psychology major and PSYC 101.*

PSYC 106. Preparing for Graduate School with a Psychology Major

1.00

This course will guide students through graduate school selection and application processes. Coverage includes graduate training opportunities across sub-disciplines in psychology and appropriate preparation to pursue such opportunities. Topics include participating in research and fieldwork experiences, preparing for and taking the GREs, selecting appropriate programs, and applying to graduate schools (including letters of recommendation, interviews, and writing curriculum vitae and personal statements). *Prerequisite: PSYC majors only; PSYC 101.*

PSYC 107. Preparing for a Job with a Psychology Major

1.00

Students will focus on the skills psychology majors can develop to prepare for a variety of careers. Students will discuss what types of jobs will be available to them upon graduation with an undergraduate degree in psychology. Topics will include resume-building, cover letter writing, interviewing and leveraging undergraduate experiences when applying for a job. *Prerequisite: PSYC majors only; PSYC 101.*

PSYC 122. The Science of Vision and Audition [C3NS]

3.00

A study of human interaction with light and sound waves. Topics include physiological and perceptual mechanisms for

processing light and sound, along with connections to real-world applications (e.g., human factors and careers within vision science and audition). Includes activities designed to provide students with in-depth, hands-on experience with course topics. May be used for general education credit.

PSYC 160. Life Span Human Development [C5SD]

3.00

An introduction to human development. Emphasis is on life span processes within physical, emotional, cognitive, psychosexual, social, personality and moral development. May be used for general education credit.

PSYC 180. Introduction to Behavior Analysis

3.00

Students will learn the fundamental principles, procedures, and concepts of behavior analysis, how they can be used to explain behavior, and how interventions based on these principles can be used to improve their own lives and the lives of others.

PSYC 200. Topics in Psychology

1.00 - 3.00

Exploration of an important psychological topic. The topics for each semester will be announced on MyMadison and the departmental website. *Prerequisite: PSYC 101.*

PSYC 202. Directed Studies in Psychology

1.00 - 3.00

Designed to give capable students an opportunity to complete directed study in an area of psychology under faculty guidance. Experiences may include practica, serving as a teaching assistant, directed readings or similar experience. *Prerequisite: PSYC 101 and a written plan for the directed study must be submitted to the department head for approval one week prior to registration.*

PSYC 203. Directed Research in Psychology

1.00 - 3.00

An introductory opportunity to assist a faculty member with a research project. Students may participate in any or all phases of research, including completion of background research, study design, collection of data, data analysis, and interpretation. Specific requirements of project are determined by the instructor. *Prerequisite: PSYC 101 and a written plan for the directed study must be submitted to the department head for approval one week prior to registration.*

PSYC 210. Psychological Measurement and Statistics

4.00

This course provides an introduction to statistical techniques used by psychologists in measuring behavior. Fundamental measures and theory of descriptive and inferential statistics will be discussed. The use of computers for data analysis will be introduced. *Prerequisite: PSYC 101 and MATH 205, MATH 220, MATH 231, or MATH 235 with a grade of C- or better*

PSYC 211. Psychological Research Methods

4.00

This course provides an introduction to the application of scientific methodology to investigate psychological phenomenon. Through lecture and laboratory, attention is given to choosing research questions, developing hypotheses, designing and

conducting research, describing, analyzing and evaluating data, and effectively communicating research findings. *Prerequisite: PSYC 101 and PSYC 210 with a "C-" or better.*

PSYC 212. Psychological Research Design and Data Analysis I

4.00

The Psyc 212-213 course sequence introduces the logic of pursuing a scientific approach in psychology and covers descriptive, correlational, experimental, and quasi-experimental approaches. It also covers the statistical tools associated with these methods (namely, descriptive statistics, correlation, regression, t-tests, and ANOVA), and it introduces the basics of inferential statistics and hypothesis testing. *Prerequisite: PSYC 101 and MATH 205, MATH 220, MATH 231, or MATH 235 with a grade of C- or better*

PSYC 213. Psychological Research Design and Data Analysis II

4.00

The PSYC 212-213 course sequence introduces the logic of pursuing a scientific approach in psychology and covers descriptive, correlational, experimental, and quasi-experimental approaches. It also covers the statistical tools associated with these methods (namely, descriptive statistics, correlation, regression, t-tests, and ANOVA), and it introduces the basics of inferential statistics and hypothesis testing. *Prerequisite: PSYC 212 with a grade of C- or better*

PSYC 220. Psychology and Culture

3.00

The study of human psychology is incomplete without taking into account the cultural, historical, and social factors involved in human functioning. This course considers the ethnic and cultural variations that exist in human behavior, thought, and action. Course meets sociocultural course requirement for the Psychology major. *Prerequisite: PSYC 101.*

PSYC 235. Psychology of Adjustment

3.00

A study of the process and dynamics of the well-integrated personality and the practical application of adjustment theories and behavior change techniques to enhance personal awareness and self-development.

PSYC 250. Introduction to Abnormal Psychology

3.00

An introduction to the field of Abnormal Psychology, for the non-psychology major. This course will examine methods of defining psychological normality and abnormality and the classification, causes and treatment of abnormal behavior. This course cannot be used for Psychology major or minor credit. *Prerequisite: A student cannot earn credit for PSYC 250 after completing PSYC 335. PSYC 101 or PSYC 160.*

PSYC 261. Study Abroad in Psychology

1.00-4.00

This course involves a study abroad experience including content and application of psychology skills and knowledge in a particular cultural context. Specific content varies based on study abroad location and content focus of the course. Some sections of the course fulfill the sociocultural awareness requirement for the psychology major. *Prerequisite: Three credit hours in psychology; permission of the instructor.*

PSYC 270. Foundations of Learning and Cognition for Education

3.00

This course introduces fundamental principles of cognition and learning as applied to educational practice. It provides a foundation for understanding multiple perspectives and levels of analysis applied to individual learning in educational settings. *Prerequisite: PSYC 101 or PSYC 160.*

PSYC 275. Psyc of Human Intimacy

3.00

Theoretical and applied study of human relationships through case analysis and role play.

PSYC 285. Drugs and Behavior

3.00

An introduction to the pharmacological effects of psychoactive drugs. This course will examine the neural mechanisms and behavioral effects of common substances such as caffeine and nicotine, drugs of abuse and pharmaceuticals that are used to treat mental disorders. *Prerequisite: PSYC 101.*

PSYC 301. Psychology Peer Advising Training I

2.00

Introductory training in academic advising, career development, and basic counseling techniques. Not to be used for psychology major credit. Application guidelines available on the psychology website and in the Psychology Peer Advising office. *Prerequisite: PSYC 101, junior standing and permission of the instructor.*

PSYC 302. Psychology Peer Advising Training II

2.00

Continued training and supervised experiences in academic advising, career development, and basic counseling techniques. Not to be used for psychology major credit. *Prerequisite: PSYC 301, PSYC 211 or PSYC 213 and permission of the course coordinator.*

PSYC 304. Death & Dying: Thanatology

3.00

Psychological theories about death including ways in which individuals and society deal with death. *Prerequisite: PSYC 101.*

PSYC 308. Health Psychology

3.00

This course deals with personality and its relation to health and illness behaviors. Topics include psychological factors involved in control and helplessness, conflict management, cardiovascular disorders, cancer, pain, substance abuse and other psychophysiological related factors. Course meets sociocultural requirement for the psychology major. *Prerequisite: PSYC 101.*

PSYC 310. The Psychology of Women and Gender

3.00

An examination of research and theory regarding the abilities and behaviors of women and the changing roles of women. Consideration is given to biological, developmental and societal determinants of sex and gender. Course meets sociocultural requirement for the psychology major. *Prerequisite: PSYC 101.*

PSYC 316. Human Development and Crime

3.00

Crosslisted with JUST 316

This course examines how psychological research and theory shed light on the development of criminal careers, the factors that protect children and adolescents from becoming criminals, how being a victim of crime influences well-being, and the efficacy of rehabilitation. Special attention will be paid to the knowledge base on delinquency and childhood/adolescent victimization.

Prerequisite: PSYC 101; and for Justice Studies Majors, JUST 200 & one additional 200 level JUST course.

PSYC 320. Diversity Issues in Psychology

3.00

This course addresses issues of diversity and neglected populations in psychology with attention to gender, sexual orientation, race, ethnicity, disability, chronic illness, SES, age, and level of indigenous influence. Particular cultural stressors associated with each group or demographic are discussed and attention is given to the issue of privilege. Course meets sociocultural requirement for the psychology major. *Prerequisite: PSYC 101.*

PSYC 325. Counseling Psychology

3.00

A basic counseling theories and skills course designed for students interested in human service and mental health fields. Course meets sociocultural requirement for the psychology major. *Prerequisite: PSYC 101.*

PSYC 326. Leadership and Personal Growth

3.00

The purpose of this course is to foster the understanding and practical application of leadership, through the use of affective and cognitive approaches. There is a strong emphasis on personal growth as it relates to leadership concepts. Aspects of developmental, cognitive, humanistic, and personality psychological theories are included. The course also builds on concepts and issues from Industrial/Organizational psychology. *Prerequisite: PSYC 101 or PSYC 160 and permission of the instructor is the prerequisite.*

PSYC 328. The Psychology of Leadership

3.00

This course focuses on psychological components of leadership behavior and its importance to various situations in culture and society. Students will explore the potential impact of leaders and their influence on individuals and society. Various existential, behavior and motivational topics related to leadership studies will be explored. Service learning will also be a core component of the course. *Prerequisite: PSYC 101.*

PSYC 330. Psychology of Personality

3.00

Essential elements of leading theories of personality with an emphasis on implications of these theories for human behavior.

Prerequisite: C- or better in PSYC 211 or PSYC 213.

PSYC 335. Abnormal Psychology

3.00

This course for the psychology major or minor critically examines psychological normality and abnormality and the classification, causes and treatment of abnormal behavior. Students learn classification and diagnosis, explore social and multicultural issues relating to diagnosis and discuss research in the field. *Prerequisite: "C-" or better in PSYC 211 or PSYC 213. A student cannot earn credit for PSYC 335 after completing PSYC 250.*

PSYC 345. Social Psychology

3.00

The study of how an individual's behavior, feelings and thoughts are influenced by other people. Topics include attitude formation and change, social perception, attraction, altruistic and antisocial behavior, conformity, leadership and group dynamics, and applications of social psychology to other fields. *Prerequisite: C-" or better in PSYC 211 or PSYC 213.*

PSYC 365. Developmental Psychology

3.00

Psychological aspects of growth, development and behavior from birth through adolescence. *Prerequisite: C-" or better in PSYC 211 or PSYC 213.*

PSYC 375. Sensation & Perception

3.00

Crosslisted with BIO 375

Explores the nature and development of human sensory capabilities and processing, and how these affect perception of the environment. A potential list of the variety of systems reviewed includes hearing, vision, smell, taste, touch/pain as well as phenomena such as the perception of balance. *Prerequisite: "C-" or better in PSYC 211 or PSYC 213.*

PSYC 380. Cognitive Psychology

3.00

This course explores the nature and development of human attention, memory, language and thinking processes. An information processing approach to the study of human cognition is emphasized. *Prerequisite: C-" or better in PSYC 211 or PSYC 213.*

PSYC 385. Biopsychology

3.00

Crosslisted with BIO 385

A survey of the neurological and chemical mechanisms which control behavior. This course examines the brain and how it processes sensation, perception, cognition, movement, motivation, learning, memory and other behavioral processes of interest to psychologists. Credit may not be earned in both BIO/PSYC 385 and BIO 301. *Prerequisite: "C-" or better in PSYC 211 or PSYC 213.*

PSYC 390. Psychology of Learning

3.00

Basic principles of learning and conditioning with a consideration of extinction, reinforcement, generalization, discrimination, transfer, concept formation and verbal learning. *Prerequisite: C-" or better in PSYC 211 or PSYC 213.*

PSYC 395. Comparative Animal Behavior

3.00

Crosslisted with BIO 395

This course covers aspects of the development, function, and evolution of the behavior of nonhuman animals. Topics covered include intraspecies communication, feeding, aggression, territoriality, reproductive behavior, and social behavior. *Prerequisite: Psychology majors: A "C-" or better in PSYC 211 or PSYC 213. Biology and biotechnology majors: BIO 124 or BIO 250, and one of the following (with a "C-" or better): MATH 205, MATH 220, MATH 231, MATH 235, MATH 285, MATH 318.*

PSYC 400. Advanced Topics in Psychology

1.00 - 3.00

Exploration of a significant psychological topic in depth. The topics for each semester will be announced in the Schedule of Classes. *Prerequisite: One SS content course and one NS content course.*

PSYC 401. Peer Advising

2.00

Supervised practicum in academic and career development and peer advising. May be taken twice for up to four credit hours toward the psychology major (400-level elective). *Prerequisite: PSYC 302 and one course each from Area A and Area B*

PSYC 402. Independent Study in Psychology

1.00 - 4.00

An opportunity to apply classroom learning to practical problems and to expand the scope of knowledge in psychology to areas not emphasized in the coursework we offer. May include service learning, internship, directed readings, serving as a teaching assistant, or a combination of these activities. *Prerequisite: PSYC 211 or PSYC 213 and a written plan for the directed study must be submitted to the department head for approval one week prior to registration.*

PSYC 403. Independent Research in Psychology

1.00 - 4.00

An advanced opportunity to conduct research with a faculty member where students apply their knowledge of Psychology to a specific research project or area. Students may work individually with the instructor or as part of a team that includes several students. Student projects include the development of an evaluated product (e.g., poster presentation, presentation). Specific requirements of project are determined by the instructor. *Prerequisite: PSYC 211 or PSYC 213 and a written plan for the directed study must be submitted to the department head for approval one week prior to registration.*

PSYC 410. Psychology of the Workplace

3.00

This course is a survey of the applications of psychological principles in the workplace. Emphasis is on topics such as research and methods, personnel decisions, training, attitudes, motivation, leadership, teams, and sociocultural issues in the workplace. Other topics of current interest will also be covered. Course will fulfill sociocultural awareness requirement. *Prerequisite: One SS content course and one NS content course.*

PSYC 415. Forensic Psychology

3.00

The application of psychological principles and techniques to the law, the criminal justice system, law enforcement and criminal behavior. *Prerequisite: PSYC 335*

PSYC 420. Advanced Psychological Statistics

3.00

This course presents advanced univariate and multivariate statistical techniques that psychology students need for reading research articles and conducting psychological research. *Prerequisite: One SS content course and one NS content course.*

PSYC 425. School Psychology

3.00

Applications of psychological principles in school settings, including roles and activities of school psychologists, standards, trends, and issues of treatment and evaluation. *Prerequisite: One SS content course and one NS content course.*

PSYC 427. Tests and Measurements

3.00

Standardized psychological tests of mental ability, achievement, aptitude and personality with a review of statistical procedures necessary for interpretation of test results. *Prerequisite: One SS content course and one NS content course.*

PSYC 428. Educational Psychology

3.00

The application of the basic psychological principles of development, learning, cognition, measurement, and social interactions to educational settings. This course examines how psychological theory and research impacts the teaching of reading, writing, science, and mathematics. Students may not count both PSYC 270 and 428 for psychology major credit. *Prerequisite: One SS content course and one NS content course.*

PSYC 430. Clinical Psychology

3.00

An introduction to the field of clinical psychology including a review of the major theoretical models, psychometrics, psychiatric diagnosis and treatment strategies. *Prerequisite: PSYC 335 and one NS content course.*

PSYC 435. Community Psychology

3.00

Focus on emerging trends and models in the application of psychology to community, stress prevention programs, human resources and change. *Prerequisite: One SS content course and one NS content course are the prerequisites.*

PSYC 450. Psychology of Child Abuse and Neglect

3.00

Review of current psychological literature on child abuse and neglect including identification, etiology, treatment, prevention and legal aspects. Family violence issues are also discussed. *Prerequisite: One SS content course and one NS content course.*

PSYC 452. Child Psychopathology

3.00

The causes, symptoms and classification of childhood psychological disorders. *Prerequisite: PSYC 335 or PSYC 365.*

PSYC 460. Community Psychology Within Developing Societies

3.00

This course will apply psychology to a critical examination of developing societies around the world. Topics include sociocultural and international contexts, privilege, power, oppressing, terrorism, population growth, and diversity. Consideration is given to developmental and societal determinants of prejudice, discrimination, and inequity. Course meets sociocultural requirement for the psychology major. *Prerequisite: One SS content course and one NS content course.*

PSYC 461. Advanced Study Abroad in Psychology

1.00-4.00

This course involves a study abroad experience including advanced content and application of psychology skills and knowledge in a particular cultural context. Specific content varies based on study abroad location and content focus of the course. Some sections of the course fulfill the Sociocultural Awareness requirement for the psychology major. *Prerequisite: One Natural Science core course and one Social Science core course in Psychology; permission of the instructor.*

PSYC 475. Psychology of Adulthood

3.00

The physical, social and psychological factors faced by adults and their progression through the life span. *Prerequisite: One SS content course and one NS content course.*

PSYC 480. Applied Behavior Analysis

3.00

This course focuses on how environmental events influence behavior, and behavior analytic strategies by which behavior may be changed. The emphasis of the course is on the knowledge and skills necessary to plan, develop, and implement interventions for behavior problems in a variety of setting including, but not limited to, business and industry, education, and health and human services. *Prerequisite: PSYC 180 and PSYC 390.*

PSYC 492. History of Psychology

3.00

The history of psychology as reflected through the individuals, theories and experimental investigation of the discipline. Special emphasis is placed upon relating the current state of psychology to its historical development. *Prerequisite: Must complete at least two courses each from social science and natural science core.*

PSYC 493. Laboratory in Psychology

3.00

A research course designed by a faculty member that studies a particular topic. Topics will change from semester to semester. Students will be guided in a group through a research experience that would include library research of the topic, design of an experiment, gathering and analyzing the data and writing the results. The course meets the requirement as a capstone course or as a psychology elective. Only 3 credit hours of the course can be used for the psychology major. *Prerequisite: Must complete at least two courses each from social science and natural science core.*

PSYC 495. Field Placement in Psychology

4.00

Supervised practicum in a counseling, industrial or human service agency. Orientation to agency's service, policies, personnel and professional ethics is provided. The course meets the requirement as a capstone course or as a psychology elective. Prerequisite: At least two Social Science content courses and two Natural Science content courses. Approval from adviser, course coordinator and department head required one month prior to registration. (Guidelines available in the department office). *Prerequisite: PSYC 211 and Junior or Senior standing*

PSYC 497. Senior Seminar

3.00

A seminar course that will require students to integrate theories, research and/or methods from several areas of psychology and/or related disciplines. Topics will vary from semester to semester. May be taken as a capstone course or psychology elective. Up to six credit hours can be used in the psychology major. *Prerequisite: Must complete at least two courses each from social science and natural science core.*

PSYC 499A. Honors

2.00

PSYC 499B. Honors

2.00

PSYC 499C. Honors

2.00

PPA 200. Introduction to Public Policy

3.00

The course introduces students to the nature, dynamics and substance of public policy. Selected policy issues in the United States will be examined through the use of case studies. Foreign and global influences on U. S. policy-making will also be analyzed. Issues will vary across course sections over time. *Prerequisite: POSC 225.*

PPA 265. Public Administration

3.00

An introductory survey of the principles, functions and processes of public administration with specific emphasis on the political aspects and environment of bureaucracies, and the how and why of policy-making within an administrative system. Organizational structure, personnel, budgeting, public relations and government values, traditions, and objectives are analyzed. *Prerequisite: POSC 225.*

PPA 359. Policy Analysis

3.00

Study of public policy analysis. Delivers to students rational and alternative techniques for analyzing public policy while providing them opportunities to develop analytical skills. *Prerequisite: PPA 200.*

PPA 381. Budgetary Process

3.00

An examination of the political planning and strategies of Congress and federal agencies in the budgetary process; politics of budgetary reform; state and local budgetary politics; and intergovernmental impacts on budgeting. *Prerequisite: Junior standing, PPA 265*

PPA 412. Seminar in Intergovernmental Relations

3.00

Study of the relations between the several levels of government in the United States. Political, fiscal, legal, regulatory and administrative relations as they have evolved within federal and state constitutional frameworks will be examined. *Prerequisite: Junior standing and PPA 265*

PPA 415. Legal Environment of Public Administration

3.00

Examination of the basic constitutional framework of American public administration. Examines legal constraints imposed on public administrators by law and judicial oversight. Emphasis placed on legal issues affecting public employees. Also examines the basics of public procurement law. *Prerequisite: PPA 265*

PPA 420. Public Management

3.00

Study of the management of public agencies from the executive viewpoint. Management control of public agencies will be explored including establishment of goals, policies, organizational structure and output of services. Case studies illustrate administrative behavior and managerial operations in local, regional, state and federal agencies. Does not count as part of the political science major or minor. Fulfills the College of Arts and Letters writing-intensive requirement for the major. *Prerequisite: Junior standing and PPA 265.*

PPA 460. Regionalism and Urban Management

3.00

Crosslisted with PUAD 560

A study of the problems and management of urbanization and inter-jurisdictional externalities from a regional perspective. Regionalism will be examined as an approach to solve these problems. *Prerequisite: PPA 200*

PPA 461. Education and Social Policy

3.00

A study of the development and implementation of education policy in the United States at the national, state, and local levels. Students will be introduced to major issues in contemporary education policy and the evaluation of alternative policies advanced by subgroups of the population. Educational equity and its links to social and economic goals will be examined. *Prerequisite: PPA 200.*

PPA 462. Social Welfare and Local Government Policy

3.00

A study of the interaction of social welfare policy and local governance in theory and in practice. Students examine state and local government and community-based responses to urban problems from a policy and management perspective. Particular attention is paid to interagency and community collaboration as a way to enhance social service delivery. *Prerequisite: PPA 200.*

PPA 469. PHILANTHROPY AND VOLUNTEERISM

3.00

An examination of the role of philanthropy and volunteerism in the nonprofit sector in the United States and globally. Topics discussed include: strategic giving; components of fundraising management and planning; volunteerism as a resource for organizations; board and staff responsibilities in resource acquisition; and monitoring and performance assessment. *Prerequisite: PPA 265*

PPA 470. Nonprofit Management and Leadership

3.00

This course is designed to introduce students to the fundamentals of governance, accountability, trusteeship, and executive leadership in nonprofit sector organizations. The course will examine critically the principal models, processes, and practices used in managing nonprofit organizations and the relationships between the governing boards and executive leaders of such organizations. *Prerequisite: PPA 265*

PPA 471. Financial Management for Nonprofit Organizations

3.00

An examination of the tools needed for an executive to understand and to supervise the financial functions in a nonprofit organization. Analyzes strategies used to manage resources in a nonprofit. Explores the finances of nonprofit groups through several case studies and discusses cost accounting techniques and managerial approaches useful to nonprofit organizations. *Prerequisite: PPA 265. Prerequisite: PPA 265*

PPA 472. Contract Management

3.00

The purpose of this course is to provide a broad overview of the theory behind and practical application of contract management. As agencies across government (federal, state, and local) expand the use of contracting billions of taxpayer dollars are transferred into the private sector to conduct public business. This trend is not going away; therefore it is essential that public administrators be effective at managing and overseeing contracts. *Prerequisite: PPA 265.*

PPA 475. Grant Writing and Project Management

3.00

An examination of the practical skills needed for writing successful grant proposals as well as for carrying out grant-funded projects. Proposal development features include needs assessments, work plans, and evaluation programs. The foundations of project management examined include staffing, workflow and expense monitoring, stakeholder relationships and demonstrating results. *Prerequisite: PPA 265 Prerequisite: PPA 265*

PPA 482. Special Topics in Public Policy

3.00

The course will examine a special topic in public policy. The course may be repeated for credit with a change in the subject matter offered. *Prerequisite: PPA 265.*

PPA 483. Special Topics in Public Management

3.00

The course will examine a special topic in public and/or nonprofit management. The course may be repeated for credit with a change in the subject matter offered. *Prerequisite: PPA 265*

PPA 484. Environmental Regulatory Policy and Politics

3.00

A study of environmental politics and the policies that environmental advocacy has produced. Topics include the dynamics of policy construction, various substantive policy issues and the prospects for environmental justice and sustainability. *Prerequisite: PPA 200.*

PPA 492. Senior Seminar in Public Policy

4.00

This research-oriented seminar provides an overview of public policy studies and the different approaches to research in this field. A major research project will strengthen the research, information access and lifelong learning capacities of the student. Fulfills the College of Arts and Letters writing-intensive requirement for the major. *Prerequisite: Senior standing, POSC 295, and PPA 359.*

PPA 494. Internship in Public Policy

4.00

Provides students with opportunities for experiential learning in organizations engaged with public policy formulation and analysis. A research paper related to the internship is required. *Prerequisite: Junior or senior standing; 15 hours of Public Policy and Administration courses and permission of the instructor.*

PPA 496. Internship in Public Management

4.00

Provides students with opportunities for experiential learning in a governmental or nonprofit organization. A research paper and a presentation based on the experience are required. *Prerequisite: Junior or Senior standing, 15 hours of PPA courses and permission of the instructor.*

PPA 496W. Public Management Internship in Washington

6.00

This course provides opportunities for experiential learning in Washington, D.C. in public and nonprofit organizations. Requirements include 360 internship hours, a research paper related to the internship, a career report, and regular meetings with the supervising professor. *Prerequisite: Junior or Senior standing, 15 credits of relevant coursework and successful application to the Washington Semester Program. *No more than four semester hours in any combination of internships can be counted towards the major.*

ENVT 366. Religion, Animals and the Environment

3.00

Crosslisted with REL 366

This course analyzes the ways in which various religions, especially Judaism and Christianity, understand the relationship of human beings to the environment and non-human animals. We will explore how religious worldviews translate into human impact on the non-human biosphere. Given the global reach of American environmental policies and lifestyles, and the prominent

role that biblical interpretation has played in shaping American attitudes and policy, special emphasis will be placed on historical interpretations of the Bible, ranging from human dominionism to human responsibility in caring for the earth, its creatures and its ecosystems. The course explores the complexities involved in using religious positions, interpretations of biblical texts and apocalyptic arguments to inform both environmentalism and policy debates related to the environment. Students will gain a basic introduction to methods of biblical scholarship and familiarity with the general state of scientific consensus on environmental challenges.

REL 101. Religions of the World [C2HQC]

3.00

An investigation of the world's major religions which will give attention to their origin, history, mythology and doctrines. May be used for general education credit.

REL 101H. Religions of the World - Honors [C2HQC]

3.00

An investigation of the world's major religions which will give attention to their origin, history, mythology and doctrines. May be used for general education credit. *Prerequisite: Honors Students*

REL 102. God, Meaning & Morality [C2HQC]

3.00

A study of the ways in which various communities perceive and understand the basis of knowledge, reality, meaning and purpose, ethics, and aesthetics. Students will explore religious and nonreligious approaches to these issues. May be used for general education credit.

REL 103. Introductory Topics in Religion and Theology

1.00-6.00

Course on various topics in religious studies and/or theological studies. May be taken multiple times for credit.

REL 200. Exploring Religion

3.00

We live in an increasingly complex and globalized world, such that understanding religions is now part of cultural literacy. But how should we go about studying religion? This course will provide an introduction to some of the most influential thinkers, common methodologies, important debates and key concepts in the academic study of religion. The course will also consider recent challenges to this field of study. Emphasis will be on applying insights to real-world examples.

REL 201. Introduction to Hebrew Bible/Old Testament

3.00

A study of selected texts in the Hebrew Bible or Old Testament using the methods of biblical studies, which examines texts in their original historical settings. No prior familiarity with the Bible is needed. Includes introductions to religious texts and cultures in ancient Egypt, Mesopotamia, and the Levant. We will also consider how contemporary readers use the Bible to

support a range of policy issues and social platforms as we reflect on how a biblical studies approach might inform these positions.

REL 202. Introduction to the New Testament

3.00

This course discusses the literature of the New Testament in light of historical, social and religious conditions from which it emerged. Particular attention is given to historical issues related to Jesus and the origins of Christianity.

REL 210. Religion in America

3.00

The purpose of this course is to offer students the opportunity to explore the broad contours of the intersection of religion with other important facets of American society, such as politics and law, civic space and social activism, social identities, intellectual life, and the arts and media. It will consider the relationship of religion to the constructing of an American identity rooted in ideas of pluralism, tolerance, equality, freedom of conscience, democracy and secularism.

REL 218. Philosophy of Religion

3.00

Crosslisted with PHIL 218

An intensive examination of religion from the standpoint of philosophical thinking with particular emphasis on the way philosophers view such problems as the existence of God, evil, immortality, religious language, etc. *Prerequisite: PHIL 101 or permission of the instructor.*

REL 240. Jesus and the Moral Life

3.00

This is an introductory course that focuses on the ways in which the moral teachings of Jesus of Nazareth, explored both from historical and multi-cultural perspectives, informed and continues to inform, personal ideas and moral visions of society.

REL 250. Islamic Religious Traditions

3.00

What constitutes Islam and how has it been defined throughout history? Who represents and speaks for Islam? How have we come to our Islamic studies archive and how does it impact how we view Islam? We will discover the different ways Muslims and non-Muslims have answered these questions, in different places, times and social contexts. Based on the most recent research and original source material, we will cover major themes of Islamic religious thought including the Qur'ān and its interpretation, the intellectual history of Islam, Sufism, Islamic law, and Muslim reform and revivalism. We will explore how these components have manifested in diverse cultures throughout Islam's history. In addition to gaining a solid understanding of the problems associated with the study of Islam, successful completion of this course should also equip students with the tools required to analyze broader theoretical issues pertinent to the study of religion. A further goal of this course is to provide a strong theoretical foundation in religious studies so that students are able to think and speak about religion in an informed and insightful manner. The scope of this course is not limited to Islam, as the example of Islam will be used as a case study to wrestle with broader intellectual issues relating to the intersection among religion, history and politics.

REL 280. Religion and Science

3.00

This course will provide an historical survey of the relationship between religion and the sciences; offer overviews of scientific

and theological theory; examine the development of theory formation; focus on issues in astronomy, physics, and biology; explore the ethical implications of scientific and religious theories; and trace developments.

REL 288. Introduction to Buddhism

3.00.

This course explores the historical origins of Buddhism, the central tenets of Buddhist thought, the major meditative practices Buddhists employ, and the relationship between meditation and social action in contemporary Buddhist communities.

REL 300. Selected Topics in Religion

3.00

Selected topics in religion are studied in depth. See MyMadison for current topic. Course may be repeated for credit when content changes.

REL 305. Islamic Religious Tradition

3.00

This course introduces the Islamic religious tradition from its inception to the present. Topics covered include the message and style of the Qu'ran, the life and experience of Muhammad, the major beliefs and practices of Islam, and the theological, philosophical and mystical movements in the Islamic empire. Attention is also given to modern Islamic movements and their relation to the modern world inside and outside the Middle East.

REL 306. Women and Gender in Islam

3.00

This course investigates how particular gender roles, identities, and relationships become signified as Islamic, and the ways in which Muslim women continually re-negotiate the boundaries of gender in living an authentic religious life. Topics will include Qur'anic revelations, the formation of Islamic jurisprudence, sexual ethics, representations of Muslim women in colonial discourse, as well as the role of women in ritual practice and feminist movements.

REL 309. Jihad in Islamic Traditions

3.00

This course examines jihad as it is debated and sanctioned throughout Islamic history. Jihad means 'struggle' and various Muslim interpreters have defined this struggle in two ways: some have claimed it encompasses violent, militaristic conflict, while others have emphasized the inner, spiritual struggle of an individual to follow God. This course traces how Muslims have interpreted this dual sense of jihad in diverse historical and cultural contexts, thereby laying the foundation to analyze the expression of jihad in the contemporary world.

REL 310. (Re)thinking Order and Chaos: An Introduction to Hinduism

3.00

This course introduces Hinduism through the concepts of order (dharma), chaos or disorder (non-dharma), and ethic of responsibility (karma), and their relationships to the pursuits of pleasure and material well being and the quest for liberation. It makes sense of chaos and discovers the lurking irrationality of order, and thereby suggests a creative role of chaos in order. This course also challenges the category of religion and the universalism associated with Western religious mythologies.

REL 313. Classical Chinese Thought

3.00

This course is an introduction to early Chinese thought. The word "thought" is used instead of "philosophy" or "religion" because the Chinese intellectual tradition did not distinguish between philosophy and religion. We will examine how philosophical, religious, and literary elements are all uniquely deployed in texts such as the Analects of Confucius, the Dao De Jing, and other classics. Our approach will involve analysis of language, arguments, cultural context, and authorial intent.

REL 314. Gandhi and the Other 9/11

3.00

Mahatma Gandhi is unique as a social theorist, a moral and spiritual philosopher, and a social and political activist. He serves as a bridge from post-modern to modern and pre-modern thought. His experience transcends boundaries of culture, geography, religion and politics. In this course students explore the ideas and the story of Gandhi to reflect upon the issues facing the modern world, with an emphasis on the modern nonviolent movement that he launched on 9/11.

REL 315. Women and Religion

3.00

Students will explore the diverse relationships between women and the world's major religions (Hinduism, Buddhism, Judaism, Christianity and Islam), both in the past and today. Topics will include women's roles, rights, practices, bodies, sexualities, clothing, representations and more. Feminist approaches for critiquing religious histories, texts and traditions will also be considered.

REL 317. Introduction to Daoism

3.00

Beginning with the earliest classics and continuing to the present, the course examines Daoism from historical, literary, philosophical and religious perspectives. It explores the difficulties categorizing Daoism as a "philosophy" or "religion," and how it still informs political, philosophical and religious thought in China. First-person exercises in and out of class will yield a holistic and lived understanding of the Daoist tradition.

REL 320. Judaism

3.00

An examination of the beliefs, practices and historical development of the various forms of Judaism represented in America today: Orthodox, Reform, Conservative and Reconstructionist.

REL 322. Sociology of Religion

3.00

Crosslisted with SOCI 322

This course is a sociological analysis of the nature, function, and structure of religion. Survey of the relationship between religion and society: the social nature of religious phenomena, the interaction between religious beliefs and practices and other arenas of secular societies, the social functions of religion, and the way religion changes and is changed by secular society.

REL 323. Comparative Ethics East and West

3.00

Would Jesus have opposed war? What about Buddha? If both opposed war would they have made the same argument against it? In this course we will think about ethical questions from a crosscultural perspective. Analysis of ethical arguments made in

Eastern and Western traditions will bring to light similarities as well as fundamental differences. Case studies will connect the course material to contemporary ethical debates.

REL 324. Latinx and Latin American Christianity

3.00

The election of Pope Francis to the papacy reflects the growing influence of Latin America upon world Christianity. This course will provide a historical and thematic overview of the changes in the history of Latin American Christianity. It moves chronologically and geographically, from colonial Latin America to Hispanic immigrant communities. Topics covered include race and colonialism, the Cuban Revolution, the Second Vatican Council, social justice and Christianity, the rise of Pentecostalism, labor movements and inequality, and U.S. Hispanic political influence.

REL 325. Catholicism in the Modern World

3.00

Study of the variety of responses by contemporary Catholic theologians and philosophers to key elements in Christian doctrine and practice. Topics include Vatican II; scripture, tradition and modern scholarship; Jesus and Christology; contemporary Catholic spirituality; moral issues in the church; and ecumenism.

REL 330. Religions of Africa and the African Diaspora

3.00

An examination of the character of religious traditions, beliefs and liturgical practices of African and African-Diaspora communities. Both primary (historical and anthropological) and secondary sources examined.

REL 332. Born Again Religion

3.00

Evangelical Protestantism has played a vital role in shaping American religious history. The religious and social allegiances of evangelicalism are quite diverse, however. Evangelicals also maintain a paradoxical relationship with American society, functioning both as powerful insiders and vocal outsiders. This course is designed to introduce students to the history of evangelicalism, its religious patterns and its negotiations with contemporary American culture.

REL 333. Angels, Demons and Dreams in Ancient Judaism and Christianity

3.00

This course will familiarize students with a broad range of early Jewish and Christian writings, found outside of the Jewish and Protestant Christian canon, that were held to be Scripture at the time of their production and reception ca. 300 B.C.E. - 200 C.E. Using a broad range of interdisciplinary methodologies drawn from biblical studies, students will study these Scriptures in the context of late Persian, Hellenistic and Roman cultures, as well as in light of archaeological findings.

REL 334. New Religious Movements

3.00

America has proven to be fertile soil for the development of new religious traditions. It has encouraged religious pluralism, and has allowed hundreds of new communities to establish themselves as important elements of society. This course will consider some of the representative new religions in America by examining their histories, beliefs, and practices.

REL 336. African-American Religion

3.00

The purpose of this course is to familiarize the student with the broad contours of the African American religious experience, and its history, practices, and communities by examining the intersection of race and religion in America. Through the close reading of primary texts and increased familiarity with significant scholarly literature, students will gain a basic understanding of the fundamental categories in African American religion.

REL 340. Introduction to Christianity

3.00

This course is designed to provide a broad survey of the Christian tradition, from its origins to its contemporary expressions. In addition to its historical development, the course will consider Christian belief, ritual, moral practice, and societal engagement. Major intellectual and theological traditions will be addressed through the study of foundational texts. Students will gain a working knowledge of major church communions as well as minor and marginalized movements.

REL 341. Early Christian Gospels: Origins, History, and Conflict

3.00

Matthew, Mark, Luke, and John are the familiar "canonical" gospels. In the early centuries of Christianity other gospels circulated: the Gospel of Peter, "Q", Infancy Gospels and the so-called Gnostic gospels. This course examines the origins of the canonical and non-canonical gospels, the historical and theological factors at work in the emergence of the canonical gospels to a position of primacy, and the struggles within early Christianity to define its authoritative tradition.

REL 342. The Historical Jesus Quest

3.00

A study of the attempts of scholarship since the Enlightenment to discover the so-called historical Jesus. Includes discussion of historiographical problems raised in past and present scholarly "quests" for the historical Jesus, analysis of the relationship between memory and the Jesus traditions, and practice in situating the Gospel materials in the social and political context of ancient Roman Palestine.

REL 343. Paul and the Origins of Christianity

3.00

Some scholars argue that the Apostle Paul was the "real" founder of Christianity, others that he was the faithful interpreter of the Jesus traditions to the Greco-Roman world. After reconstructing the historical course of Paul's life and journeys from the available sources, the course will analyze selected Pauline epistles, sent to early Christian communities, in order to reconstruct his teaching and ethics and to assess his significance for the origins of Christianity.

REL 348. Christianity in Global Context

3.00

Christianity plays a vital role in many societies around the world. Though often treated as a mostly western or European religion, it was in fact a global religion first and foremost. This course examines Christianity from that global perspective. What does Christianity look like around the world? How have indigenous cultures fashioned their own versions of Christianity in the modern world? Is there unity in the diversity of these global Christianities?

REL 360. History of Christian Thought

3.00

A survey of the development of Christian Thought with primary emphasis on the peoples, ideas, and historical events around

which the developments took place. Thus material from Christian origins through to the present will be examined in their historical contexts.

REL 362. Introduction to U.S. Religious History

3.00

Crosslisted with HIST 362

The course introduces the religious history of the colonies and the United States, from native traditions through the 20th century. We examine the historical/social impact of groups ranging from Roman Catholic migrants to evangelical Protestants and Scientologists. Special attention is paid to the extraordinary and persistent levels of religious diversity and adherence throughout U.S. history.

REL 363. Apocalypticism, Religious Terrorism and Peace

3.00

Crosslisted with IA 363

This course traces apocalypticism from its ancient Jewish and Christian roots to its contemporary manifestations in religious groups around the world. Since apocalypticism is a worldview that cuts across religious traditions, the course covers a variety of religious groups. The last half of the course focuses on the complex relationships between apocalyptic thinking and religious terrorism and entails an independent research project.

REL 365. Religion and Film

3.00

In this course, students will explore the appearance of the major world religions (Christianity, Judaism, Islam, Buddhism and Hinduism) as well as religious themes (such as redemption or the afterlife) in the medium of film. Students will learn to critique cinematic representations and misrepresentations of religion and to analyze their impact on viewers, as well as to consider how films may provide rituals and other experiences that serve a religious function.

REL 366. Religion, Animals and the Environment

3.00

Crosslisted with ENVT 366

This course analyzes the ways in which various religions, especially Judaism and Christianity, understand the relationship of human beings to the environment and non-human animals. We will explore how religious worldviews translate into human impact on the non-human biosphere. Given the global reach of American environmental policies and lifestyles, and the prominent role that biblical interpretation has played in shaping American attitudes and policy, special emphasis will be placed on historical interpretations of the Bible, ranging from human dominionism to human responsibility in caring for the earth, its creatures and its ecosystems. The course explores the complexities involved in using religious positions, interpretations of biblical texts and apocalyptic arguments to inform both environmentalism and policy debates related to the environment. Students will gain a basic introduction to methods of biblical scholarship and familiarity with the general state of scientific consensus on environmental challenges.

REL 371. Religion and Disability

3.00

What is disability and how is it constructed? What have the major world religions, on their own and in conversation, decided is 'normal' and what they have decided is 'other'? How do they view and treat those individuals/groups they have deemed disabled? How do people with disabilities create their own meaning within and beyond their own religion? This course will investigate the nature of disability in five of the world's religions (Hinduism, Buddhism, Judaism, Christianity and Islam). While we will become familiar with how disability intersects with and across each of these religions, the heart of this course will be deep explorations of specific case studies as well as personal reflections on the students' and others' intersectional identities in the context of various communities.

REL 372. Religion and Medicine, East and West

3.00

What is the relationship between religion and medicine? How has the idea of healing been influenced by religious faith, historically and philosophically? This course explores a broad range of issues at the intersection of religion and science, from the question of what counts as "proof" to the existential crises that sickness can provoke. Historical perspective is balanced with case studies and current events to show how theoretical concerns affect real-world scenarios. Fulfills the College of Arts and Letters writing-intensive requirement for the major.

REL 375. Nineteenth Century Philosophy and Theology

3.00

Crosslisted with PHIL 375

A selected study of 19th-century philosophers and theologians with special attention to rationalism, romanticism and idealism. Views of Hegel, Schleiermacher, Ritschl, Marx and others are considered.

REL 377. Hermeneutics

3.00

Crosslisted with PHIL 377

This course will examine the main features of hermeneutics with particular emphasis on its contemporary perspectives. Discussion will focus on such themes as human understanding and human finitude, the nature of history and tradition, linguisticity and textuality of experience. Readings may address Gadamer, Ricoeur, Schleiermacher, and Dilthey.

REL 380. Contemporary Theologies

3.00

A survey of one or more of the following contemporary theological movements: continental, North American, African and South American, including Roman Catholic, Orthodox and Protestant approaches, and covering themes such as the conflict between history and faith, Christology, fundamentalism and liberalism, and the emergence of liberation, feminist, black, neo-conservative, secular, pluralist and ecological theologies.

REL 383. The Global Refugee Crisis and Religion

3.00

Focused on the contemporary refugee crisis, this course investigates the intersection of religion with human experiences of displacement, migration, resettlement, and welcome. We also analyze the place of religion in refugee policy debates as well as the role of faith-based organizations in refugee relief and resettlement. *Prerequisite:* none *Corequisite:* none

REL 386. Topics in Buddhist Studies

3.00

Study of major issues and thinkers in the Buddhist tradition from ancient times to the present. May be repeated for credit when course content changes.

REL 387. Buddhist Literature and Liberation

3.00

Focused on the interpretation of Buddhist texts, this course explores how Buddhists have envisioned literary activity as part of a path to spiritual liberation. Students read and analyze a variety of literary genres, from hagiography to haiku; investigate the ritual dimensions of scribing and printing Buddhist scriptures; and apply contemplative disciplines to creative writing assignments.

REL 388. Tibetan Buddhism

3.00

This course explores the teachings of Tibetan Buddhism as they are practiced and experienced in communities on the Tibetan Plateau. Student research projects investigate the globalization of Tibetan Buddhism, especially through the public life of the Dalai Lama, as well as Tibetan Buddhism's relationship to topics like nonviolence, compassion, mindfulness, interfaith dialogue, psychology and politics.

REL 410. Dharma/Adharma: Hindu Ethical Reasoning

3.00

What values are advanced in Hindu religious and ethical teachings? How do Hindu texts and traditions define and teach the good life and virtuous living? Is moral responsibility conditioned by caste, class, gender or other socioeconomic factors? These are some of the questions that will be considered in this study on Hindu modes of moral reasoning. This course will also make sense of the structure of chaos (adharma) and the chaos of structure (dharma) and thereby suggest that adharma might somewhat make more sense than dharma.

REL 440. Topics in Religion in America

3.00

This course serves as a senior seminar (capstone) for majors in Religion, centered around the subject of Religion in America. As a capstone course, students will pursue their own advanced research projects after an initial, intensive introduction to the subject. Rotating topics include "Mormonism and American Culture" and "American Evangelicalism," as well as others.

REL 450. Religion and Society

3.00

An advanced exploration of diverse ways in which one or more of the world's religions have engaged questions of significant social impact. Specific course themes vary by year and instructor. Original student research, writing and oral presentation are the centerpieces of this religion capstone course. Fulfills the College of Arts and Letters writing-intensive requirement for the major.

REL 460. Topics in Ancient Jewish and Early Christian Literature

3.00

An in-depth examination, using critical academic methods, of the historical, literary, and cultural dimensions of selected texts from the literatures of Ancient Judaism and Early Christianity. Fulfills the College of Arts and Letters writing-intensive requirement for the major. *Prerequisite: REL 201 or REL 202 or permission of the instructor.*

REL 488. Buddhism in the Modern World

3.00

This capstone course in the study of religion applies knowledge of Buddhist thought and practice to contemporary global expressions of Buddhism. A key theme of the course is the tension between tradition and modernity in Buddhist communities, especially in light of post-colonialism and globalization. Specific course themes and content rotate by year. Original student research, writing and oral presentation are the centerpieces of this capstone experience. Fulfills the College of Arts and Letters writing-intensive requirement for the major.

REL 490. Special Studies Religion

3.00

Designed to give capable students an opportunity to complete independent study in religion under faculty supervision.

Prerequisite: Permission of the department head. May be repeated for credit.

REL 490B. Internship

3.00

REL 493. Religion Course Assistantship

3.00

Students participate as course assistants in religion. Assistantships provide students with a sense of what it is like to teach a religion course by allowing them to work closely with faculty members through different phases of course preparation, presentation and evaluation. Assistantships may also provide opportunities for student assistants to lead discussion and to help their peers review the material outside the classroom. *Prerequisite: Senior status or permission of the department head.*

REL 495. Religion Internship

3.00

Gives the structured opportunity to gain practical knowledge and experience while serving the community. *Prerequisite: Philosophy and Religion Major or Minor (Religion Concentration), junior or senior standing.*

REL 499A. Honors

1.00

REL 499B. Honors

3.00

REL 499C. Honors Thesis

2.00

RUS 101. Elementary Russian

3.00 - 4.00

The fundamentals of Russian through listening, speaking, reading and writing. Practice in pronunciation and development of comprehension. One hour's work a week in the language laboratory.

RUS 102. Elementary Russian II

3.00 - 4.00

The fundamentals of Russian through listening, speaking, reading and writing. Practice in pronunciation and development of comprehension. One hour's work a week in the language laboratory. *Prerequisite: RUS 101*

RUS 111. Intensive Russian I

6.00

The fundamentals of Russian through listening, speaking, reading and writing. The course is the equivalent of RUS 101-102.

RUS 212. Intensive Russian II

6.00

The fundamentals of Russian through listening, speaking, reading and writing. The course is the equivalent of RUS 231-232. *Prerequisite: RUS 102 or RUS 111 or sufficient score on the Foreign Language Placement Exam.*

RUS 231. Intermediate Russian I

3.00

A thorough review of grammar, vocabulary building, conversation, composition and reading. *Prerequisite: RUS 102/RUS 111 or <250 on FLPE*

RUS 232. Intermediate Russian

3.00

A thorough review of grammar, vocabulary building, conversation, composition and reading. *Prerequisite: RUS 231 or sufficient score on Foreign Language Placement Exam*

RUS 300. Grammar and Communication

3.00

Intensive training in grammatical structures and their application to oral and written communication. Instruction is in Russian. Fulfills the College of Arts and Letters writing-intensive requirement for the major. *Prerequisite: RUS 232 or RUS 212 or sufficient score on the Foreign Language Placement Exam.*

RUS 308. Introduction to Russian Civilization

3.00

A study of Russian life and culture and the outstanding contributions of Russian-speaking peoples. Instruction is in English. *Prerequisite: RUS 300.*

RUS 315. Russian Phonetics

3.00

Intensive drill in Russian sounds and intonation patterns. Continued emphasis on conversation. Instruction is in Russian. *Prerequisite: RUS 232 or equivalent.*

RUS 320. Russian Oral and Written Communication

3.00

Intensive training in the use of modern, everyday Russian with emphasis on conversation and composition. Readings in Russian will provide a context for discussion and writing. *Prerequisite: RUS 300*

RUS 400. Advanced Conversation

3.00

Discussions deal with topics of current interest. Instruction is in Russian. *Prerequisite: RUS 300 or equivalent.*

RUS 438. Studies in Russian Literature

3.00

Crosslisted with ENG 438

A study of selected works of Russian Literature. Instruction is in English. May be repeated for credit when content varies.

RUS 446. Special Topics in Russian Literature

3.00

Study of a particular topic in Russian literature. It may cover all or a specific Russian literature genre. Course may be repeated if content varies. *Prerequisite: RUS 300 or permission of the instructor.*

RUS 447. Special Topics in Russian Civilization

3.00

Study of a particular topic in the civilization and/or culture of Russia. Course may be repeated if content varies. *Prerequisite: RUS 300 or permission of the instructor*

RUS 448. Special Topics in Russian Linguistics

3.00

Students will study a particular topic in Russian linguistics. Topics could include an introduction to Russian sociolinguistics or psycholinguistics. Course may be repeated if content varies. *Prerequisite: RUS 300 or permission of the instructor.*

RUS 499A. Honors Project

1.00

This is a three semester course, offered as parts A, B, and C for 1, 3, 2 credits per semester.

RUS 499B. Honors Project

3.00

This is a three semester course, offered as parts A, B, and C for 1, 3, 2 credits per semester.

RUS 499C. Honors Project

2.00

This is a three semester course, offered as parts A, B, and C for 1, 3, 2 credits per semester.

SOWK 287. Intro to Social Work

3.00

Overview of social work as a profession with emphasis on various settings and diverse populations as distinguished by age, class, race, ethnicity, culture, spirituality, family structure, marital status, gender, gender identity, sex, sexual orientation, physical or mental ability, socio-economic status, and national origin and the implications to social work practice. Focuses on practical experiences designed to enable students to gain familiarity with the dynamics of the profession. *Corequisite: 20 hours community service-learning.*

SOWK 288. Human Rights, Social, Economic and Environmental Justice

3.00

The foundational realities of vulnerable people are introduced in this course through concepts of human rights; social, economic and environmental justice; and diversity/inclusion. Processes that seek to reduce, ameliorate and/or alleviate injustices including advocacy action are explored.

SOWK 301. Workshops in Social Work

0.00 - 3.00

Detailed study of a topic of interest in social work. May be repeated for credit.

SOWK 302. Workshops in Social Work

1.00 - 3.00

Detailed study of a topic of interest in social work. May be repeated for credit.

SOWK 305. Social Work Research Methods

3.00

Study of qualitative and quantitative methods in social work research. Demonstrating scientific and ethical research processes including formulation of research questions, selecting a design, collecting data, analysis and interpretation of data, and exposure to evaluation of practice. Diversity and inclusion are highlighted in the research process. *Prerequisite: MATH 220 or SOCI 231; SOWK 287; SOWK 288.*

SOWK 314. Rural Health: an Interprofessional Approach

3.00

Crosslisted with HTH 314, IPE 314, NSG 314

Students study, observe and participate in interprofessional assessment, planning and delivery of community-based primary health care in partnership with residents and agencies of a host rural county. Learning activities will emphasize rural culture, rural health care and interprofessional practice.

SOWK 317. Skills for Generalist Social Work

3.00

Developing self-awareness of students' own value and culture systems, differentiating between their own systems and those of clients, and how these differences impact on communication. Understanding of empathy, engagement, and other interpersonal skills. Developing skills in communication and interviewing within a strengths-based generalist framework with individuals,

families, groups, and communities. *Prerequisite: SOWK 287, SOWK 288 or departmental permission. Corequisite: SOWK 320 and junior standing.*

SOWK 320. Human Behavior in the Social Environment

3.00

Integrates and expands prerequisite knowledge in biological, psychological, and socio-cultural sciences to assessment of individuals, groups, families, organizations, and communities in a pluralistic society. Application and critique of theoretical frameworks related to impact of race, age, gender, sexual orientation, family form and region. *Prerequisite: SOCI 101 or SOCI 110; ANTH 195, SOCI 336 or SOCI 354; PSYC 101; PSYC 160; SOWK 287 ; SOWK 288.*

SOWK 325. Parent-Child Relationships Across the Lifespan

3.00

Crosslisted with SOWK 325.

Focuses on intergenerational caregiving and interactions across the lifespan and generations. Uses a developmental framework to explore family life as the territory in which people fulfill relational responsibilities to children and parents while simultaneously attending to independent life stage challenges.

SOWK 327. Substance Use Interventions

3.00

Explore types, effects and prevalence of substance use in the U.S. Impacts of use on individuals, families, communities and society is considered through biopsychosocial, economic and legal/political lenses. Dual foci include developmental risks and outcomes for individuals and families throughout the life course, and social policy debate and legislation. Includes a survey of intervention approaches and treatment modalities across the span of self-help, medical treatment, programs in behavioral health and court-mandated models.

SOWK 330. Corrections

3.00

Crosslisted with JUST 330

The history, philosophy, policies and problems of the treatment of violators by the police, courts and correctional institutions. *Prerequisite: JUST 200 and one other 200 level JUST course*

SOWK 332. Community Mental Health Practice

3.00

Provides a basis for understanding mental health policy and services. Focus is on the needs of the deinstitutionalized mentally ill patient including psychosocial treatment and case management services. Outpatient services for the general public are also covered. Course contains a service component.

SOWK 335. Social Policy

3.00

Study of the formulation and consequences of social policy in the context of contemporary social, political and economic conditions. Skill development in creation of a proposal, policy evaluation and change advocacy in U.S. society with emphasis on agency, local, state and national levels. *Prerequisite: POSC 302 or POSC 225; SOWK 287; SOWK 288.*

SOWK 338. Issues and Policies in Family Services

3.00

Examination of historical and philosophical approaches to family policy. Evolution of family-related social policies in the United States is contrasted with those of selected foreign countries with the view toward a national family policy.

SOWK 340. Violence in Families

3.00

Examination of violence in the family, including spouse, sibling, elder and child abuse. Studies the social and cultural patterns and etiology of family violence. Examines programs and services for the abused and the abuser including shelters, support systems and counseling.

SOWK 342. Child Welfare Services

3.00

Study of the basic child welfare services along the continuum of prevention and support; assessment and identification of child abuse and neglect; evidence-based interventions; and family reunification and support. Analysis of legal framework and court services as well as ethical standards that guide practice. Utilizes a resilience and trauma-informed framework to assess practices in the child welfare system as well as collaboration with other systems involved with vulnerable children and families.

SOWK 348. Introduction to Developing Societies

3.00

Crosslisted with SOCI 348

This course examines economic development and social and political change in developing countries. The historical experiences of developing societies will be analyzed within the context of the global system and from the perspective of competing and complementary theoretical perspectives.

SOWK 352. Culture and Human Services in Dominica

3.00

Study of the culture and formulation of social policy and methods of social work/human service practices in Dominica within the context of contemporary social, political, cultural and economic conditions. Comparisons and linkages will be made with current U.S. social policies and social work practices and theory. Students will work with both U.S. and Dominican professionals. Faculty approval required.

SOWK 372. Social Work Practice with the Aged

3.00

An examination of America's response to aged Americans from a historical and current perspective. Social problems and social work skills will be examined in light of individual, group and community needs and those affected by social policies.

SOWK 375. Grant Writing for Agencies

3.00

Crosslisted with FAM 375, GERN 375, NPS 375

Emphasizing active learning, this course teaches the basics of grant and proposal writing. Efficient research, persuasive prose and the importance of relationships are stressed. Private and corporate philanthropy and government grants are examined.

SOWK 386. Youth Empowerment Strategies (Yes)

3.00

Crosslisted with FAM 386

Students learn to use group activities that include the creative arts, low ropes, and self-discovery in youth empowerment. The goal is to help youth build life skills and make informed decisions. Prior to beginning work with youth, students complete 25 hours of training.

SOWK 387. Working with Teens

3.00

Survey of physical, psychological and social theories of adolescent development. Examination of service delivery issues in working with teen-agers. Investigation of topical areas of particular relevance to work with adolescents including sexuality, abuse and neglect, runaways, depression and suicide, and substance abuse.

SOWK 450. Palliative and Hospice Care: An Interdisciplinary Approach

3.00

Crosslisted with

An interdisciplinary approach to assessment and care planning of older adults experiencing need for palliative and/or hospice support. Familial, cultural, legislative and social implications of programs and service delivery.

SOWK 465. Social Work Practice in Mezzo Systems

3.00

Application of social work values, knowledge and methods with small groups is emphasized. Assessment, planning intervention strategies, resource utilization and evaluation are examined. Role play and group processing are utilized. *Prerequisite: SOWK 305, SOWK 317, SOWK 320, SOWK 335 and admission to the social work program; Senior standing. Corequisite: SOWK 466 and SOWK 467.*

SOWK 466. Social Work Practice in Micro Systems

3.00

Application of social work values, knowledge and methods with individuals and family systems is emphasized. Case assessment, planning intervention strategies, resource utilization and evaluation are examined. Role play and videotaping are utilized. *Prerequisite: SOWK 305, SOWK 317, SOWK 320, SOWK 335, and admission to the social work program. Senior standing. Corequisite: SOWK 465 and SOWK 467.*

SOWK 467. Social Work Practice in Macro Systems

3.00

Application of knowledge, skills, and methods to the macro systems of professional practice, including neighborhoods, communities and organizations. Attention is given to the impact of racial, ethnic, cultural conditions and geographic factors. *Prerequisite: SOWK 305, SOWK 317, SOWK 320, and SOWK 335 and admission to the social work program. Senior standing. Corequisite: SOWK 465 and SOWK 466.*

SOWK 481. Social Work Field Practicum I

6.00

Offers students an opportunity to gain a broad knowledge of the basic functions, services and roles of the agency as related to actual social work practice, as well as a specific knowledge of practical intervention skills necessary to carry on effective social work practice. The field experience is the application of knowledge and skill components drawn from previous courses.

Prerequisite: Admission to the field practicum. Social work majors only. Senior standing.

SOWK 482. Social Work Field Practicum II

6.00

Offers the student an opportunity to build upon previous field experience by having more responsibility and tasks designed to expand their practice skills in social work. *Prerequisite: SOWK 481. Social work majors only.*

SOWK 487. Special Topics

3.00

Examination of selected topics of social work practice which are of current importance in the social work profession. Course may be repeated for credit.

SOWK 490. Special Studies in Social Work

3.00

This course is restricted to majors in social work. The course provides capable students an opportunity to complete independent studies under faculty supervision. Course may be repeated for credit. *Prerequisite: Recommendation of the instructor and permission of the department head.*

SOWK 493. Professional Forum I: Preparation for Field

1.00

This course provides an orientation to the pedagogy and process of the field practicum. Students become acclimated to the placement process as well as the expectations and requirements of professional social work practice in field sites and includes a series of trainings on topics and issues needed prior to entering their field placement. *Prerequisite: SOWK 305, SOWK 317, SOWK 320 and SOWK 335; admission to the social work program; completion of 50 pre-field service hours; senior standing. Corequisite: SOWK 465, SOWK 466 and SOWK 467.*

SOWK 494. Professional Forum II: Transition to Professional Practice

3.00

Synthesis of field practicum and coursework throughout the curriculum to promote students' identity as beginning-level social workers, and to facilitate their transition to professional practice. Critical thinking and reflection will be emphasized as students identify and evaluate the empirical and theoretical foundations or practice specific to the field practicum.

Senior outcome assessment is integral to this course. *Prerequisite: Social work majors only. Corequisite: SOWK 481 and SOWK 482 field practicum.*

SOWK 499. Honors

3.00

Independent research topic initiated and completed by qualified second semester junior social work majors.

SOWK 499A. Honors

1.00

Prerequisite: Social Work Majors only

SOWK 499B. Honors

3.00

Prerequisite: Social Work Majors only

SOWK 499C. Honors

2.00

Prerequisite: Social Work Majors only

SOCI 101. Introductory Sociology

3.00

Provides students with an understanding of the structure and processes of modern societies and their historical antecedents. Explores the universality of the social experience by addressing such topics as culture, socialization, social interaction, bureaucracy, norms and diversity, social inequality, social institutions, modernization, technology and social change, world views, values and behavior.

SOCI 110. Social Issues in a Global Context [C4GE]

3.00

This course introduces the discipline of sociology from a macrosociological perspective, emphasizing large-scale changes in social organization and institutions. We examine the global forces that shape societies, and the historical, political, social, cultural and economic origins of contemporary social problems. We consider competing theoretical models used in the study of social change as well as the conceptual and methodological challenges in analyzing societies different from one's own. May be used for general education credit.

SOCI 140. Microsociology: The Individual in Society [C5SD]

3.00

This course introduces the discipline of sociology and the subfield of microsociology. We examine the mutually constitutive relationship between the individual and society. Questions addressed include: How does society influence how we think, feel, believe, act, and interact with others? What influences the self, social identity, shared social meanings, social roles, and one's position in society? How do we, as individuals and as members of social groups, recreate, contest, and change society? May be used for general education credit.

SOCI 200. Development of Sociological Thought and Method

3.00

This course is a foundation course for sociology majors. Topics will include the historical development of the discipline with an emphasis on the social and philosophical forces that influenced the development of sociology. Main sociological traditions will be introduced including the critical, naturalistic, and interpretive paradigms and sociological analysis from these perspectives.

Prerequisite: SOCI 101 or SOCI 110 or SOCI 140 or permission of instructor.

SOCI 231. Introduction to Social Statistics

3.00

Introduction to the techniques for collecting, describing, analyzing and presenting sociological data.

SOCI 280. Social Gerontology

3.00

Crosslisted with GERN 280

An interdisciplinary introduction to the study of aging. The course provides an overview of issues surrounding aging in contemporary society: personal, familial, communal and societal. *Corequisite: 20 hours of community service-learning.*

SOCI 300. Sociological Inquiry

3.00

A systematic introduction to various modes of sociological investigation, including positivism, interpretivism, and critical analysis. Students learn to evaluate, critique, and design original sociological inquiries with special attention to how sociological inquiry is guided by different philosophical and theoretical commitments. *Prerequisite: SOCI Major and; SOCI 200 and SOCI 231 or equivalent.*

SOCI 303. Sociology of Death & Dying

3.00

Investigation of current American orientations toward death and dying with emphasis also given to the social organization of death and dying.

SOCI 304. Social Deviance

3.00

Course offers students a wide range of explanations of deviance. Topics considered are the functions, social definitions, societal reactions and political aspects of deviance as characteristic of all societies. Deviant attributes as well as acts are considered.

SOCI 306. Japanese Society and Culture

3.00

Crosslisted with ANTH 306

This introductory course takes a critical and interdisciplinary approach to exploring Japan. We will apply Sociological, Anthropological, and Demographic perspectives to comparatively understand, analyze, and discuss Japanese society and culture. Students will read and discuss issues related to history, sociodemographic change, gender, work, social class, race/ethnicity, family, health care, and aging in Japanese society.

SOCI 309. Capitalism and Alternative Economies

3.00

This course examines the structure and dynamics of capitalism as a social system and considers the affordances and limitations of this mode of organizing production, consumption and the satisfaction of human needs. Building on this analysis, the course then critically examines a wide array of alternative or non-capitalist organizations and enterprises emerging from the "new," "solidarity" or "social" economy movements, with particular attention paid to the role of commerce and markets in these arrangements.

SOCI 311. Sociology of the Environment

3.00

This course will introduce students to the central debates that currently preoccupy environmental sociology and political ecology. Emphasis is placed on the importance of sociological, historical and cultural modes of inquiry for understanding: socio-ecological change/crisis, environmental justice/injustice, eco-technological change and the politics of "nature".

SOCI 315. Technology and Society

3.00

Through an analysis of various issues, problems and case studies, this course will explore the interactions between science, technology and society. The course will examine connections of specific technologies to science, cultural values, social and economic interests, and questions regarding progress.

SOCI 318. Sociology of Immigration

3.00

This course explores the patterns and processes defining immigration around the world: the reasons for migration, the types of migration, and the way it affects the sending and receiving societies. The course investigates the social forces that affect immigrants and the traits that impact their relocation experience; and how immigration creates new identities for those successful in their quest, contributing to greater cultural diversity of receiving societies.

SOCI 321. Politics in Society

3.00

The relationship between society and politics, the nature and distribution of social power, political participation, political thought and politics as a vehicle of social change are explored.

SOCI 322. Sociology of Religion

3.00

Crosslisted with REL 322

This course is a sociological analysis of the nature, function, and structure of religion. Survey of the relationship between religion and society: the social nature of religious phenomena, the interaction between religious beliefs and practices and other arenas of secular societies, the social functions of religion, and the way religion changes and is changed by secular society.

SOCI 328. Digital Inequality

3.00

This course examines how social inequality shapes and is reproduced and challenged through digital information and communication technologies. Students will explore how the use of these technologies by consumers, corporations and governments plays an increasingly prominent role in how inequality is structured and experienced in contemporary society.

SOCI 329. Sociology of Sport

3.00

This course examines sport as a social institution. It explores the origins and evolution of modern sporting practices and their connections to other social institutions and dimensions of social change. In surveying multiple issues connected to sport and

society, particular emphasis will be placed on the production and reproduction of social inequalities through sporting practice and consumption.

SOCI 334. Self & Society

3.00

This course examines the dialectical relationship between self and society. Two primary questions guide the course: How am I, as a social being, created by society? And, in turn, how is society created and sustained by me? In contrast to biological or psychological explanations, this course provides a distinctly sociological analysis of the self. Drawing from multiple perspectives in sociology, the course focuses on the social character of the self, the process of its acquisition and the social influences that continually shape it. Related topics include the social construction of reality, identity construction, emotions, power and inequality, symbolic interaction, ethnomethodology, and impression management.

SOCI 335. Disability and Society

3.00

This class focuses on the social and cultural aspects of disability in the US and around the world. It explores the meaning of the concept 'disability'; its relation to other social markers such as race, gender, and sexual orientation; how it is experienced by those occupying the category; and major policy approaches to dealing with disability.

SOCI 336. Race and Ethnicity

3.00

This course examines the social construction of race and ethnicity around the world and how they influence social processes, institutions, change and ideology. The course will include discussions concerning the intersection of race and ethnicity with other aspects of social inequality such as class, gender, sexuality and nationality in contemporary society.

SOCI 337. Sociology of Gender

3.00

Crosslisted with WGSS 337

Examination of theories of sex role development, the roles of men and women in society and gender as a social construction.

SOCI 338. U.S. Urban History

3.00

Crosslisted with HIST 338

In this course students explore the history of urban spaces in the United States by investigating American cities using a broad chronological, geographical, and thematic framework. Drawing from an array of primary and secondary sources, students will become familiar with the central themes of urban history, and also have the opportunity to produce their own narratives.

SOCI 341. Sociology of Education

3.00

Examination of sociological theories and research on education, emphasizing stratification, socialization, organization, and relationship between schooling, family, community, and work. Focus on cross-cultural approaches to education.

SOCI 342. Social Movements in the Middle East

3.00

This course is designed to provide a basic knowledge of current Islamic movements in the Middle East. The primary emphasis is on social movements in Iran, Iraq, Egypt, Algeria, Lebanon, Palestine and Afghanistan.

SOCI 344. Work and Society

3.00

This course examines the nature and meaning of work under various social and historical conditions. This includes such things as the relationship of work organization to life chances and personal experience, the place of work in social theory, the organization of occupations, occupational socialization and commitment, and how the nature of work changes in relation to local and global contexts.

SOCI 347. Queer Theories of Gender and Inequality

3.00

Crosslisted with WGSS 347

Contemporary approaches to the culture and social structure of gender and gender binaries, as they intersect with power, knowledge, science/biology and inequality. Method involves examining and challenging the cultural classification systems that inform knowledge, human action and social institutions. Requires college-level reading, writing and intellectual engagement.

SOCI 348. Introduction to Developing Societies

3.00

Crosslisted with SOWK 348

This course examines economic development and social and political change in developing countries. The historical experiences of developing societies will be analyzed within the context of the global system and from the perspective of competing and complementary theoretical perspectives.

SOCI 352. Birth, Death, Sex: Exploring Demography

3.00

Crosslisted with ANTH 352

Fertility (birth) and mortality (death) and their biological and social determinants in cross-cultural and evolutionary/historical frameworks. Exploration of the dynamic between the material constraints on and symbolic significance of reproduction, sexuality and death within a cultural context. Critical examination of population growth as a global "problem". Basic demographic methods. *Prerequisite: Prerequisite: Any lower level course in anthropology or sociology or permission of the instructor.*

SOCI 354. Social Inequality

3.00

Course covers the systems of stratification and inequality in the United States including race, class, gender, religion, sexuality, ethnicity, and nationality. Discussion will center on their role in providing rationales for oppression and discrimination in society and their relationship to the distribution of power and ideological control.

SOCI 357. Sociology of Disasters

3.00

This course aims to familiarize students with the sociological study of the causes and consequences of disasters. The course takes

a broad view of the social science literature on disasters, but largely employs a case study approach. In keeping with sociology's focus on the causes and consequences of social stratification, the relationship between disasters and patterns of inequality will be a central theme throughout the course.

SOCI 358. Sociology of Consumption

3.00

Consumption encompasses themes that range from identity construction to the macro processes of cultural globalization. As consumption becomes more integral to society, it is becoming more central to various disciplines. This course situates scholarly work from this nascent interdisciplinary field of consumption studies within the context of contemporary social, cultural, and economic issues.

SOCI 360. Social Movements

3.00

Introduction to the study and analysis of social movements in the United States as agents of social and ideological change. Emphasis is given to movements which have goals of extending and/or protecting rights of individuals and groups in the face of increasing industrialization, urbanization and centralization of power.

SOCI 361. Sociology of Organizations

3.00

Study of formal organizations primarily in contemporary society. Emphasis is given to the social-historical context that has given rise to and perpetuates the bureaucracy as a form of social organization, and to the study of the structure and dynamics of contemporary formal organizations such as businesses, universities, governments, etc.

SOCI 363. Sociology of Culture

3.00

This course examines sociological perspectives about values, norms, symbols, rituals and expressions. Course content includes classic perspectives on the relation between culture and institutions as well as the work of contemporary analysts who have developed, revised and/or challenged these classic positions. Students will learn to apply these perspectives to their own analyses of culture.

SOCI 367. Sociology of Sexuality

3.00

Crosslisted with WGSS 367

This course examines sociological theory and research on sexual behaviors, identities, cultures, and social movements, investigating how sexuality is shaped by society and its social institutions. In addition, the course examines how sociological research on sexuality is conducted, how society shapes the sociological study of sexuality, the unique ethical concerns and methodological challenges in researching sexuality, and the place of sociology in shaping discourse and social policy on relevant social issues.

SOCI 368. Contemporary American Culture

3.00

Crosslisted with ANTH 368

This course analyzes contemporary American society in relation to popular cultural formations and representations. Cultural

expressions found in music, literature, film, television, cyberspace and sports will be examined with respect to the values, sentiments, identity constructions, and lived experiences of differentially situated social actors.

SOCI 372. Sociology of the Community

3.00

This course examines the community as a social form. Considered are its function, social definitions, formative processes, development and systems of change. This survey may include, but not be limited to, examination of community studies research and community advocacy for social justice.

SOCI 374. Sociology of Families

3.00

Covers the basic concepts and theories in marriage and the family; looks at basic issues in modern family life; examines changes in family functions and in the various stages of the family life cycle and discusses the future of the family in contemporary society.

SOCI 375. Medical Sociology

3.00

An introduction to the field of medical sociology that examines the salient issues in the field and related theoretical perspectives. These two focuses are important in understanding the ability of humans to live to capacity. Attention is given to health-care programs in developing countries as well as modern industrial societies.

SOCI 382. Qualitative Sociology

3.00

This course introduces students to qualitative research methods, including participant observation, interviewing, and content analysis. Students will read examples of qualitative sociology and learn how to design and conduct a qualitative research study. In addition to reviewing methodological, theoretical, and ethical issues, students will produce an independent qualitative research project. *Prerequisite: SOCI 200*

SOCI 385. Madness and Society: the Sociology of Mental Health and Illness

3.00

This course will explore the role that social and cultural factors play in the occurrence, diagnosis, experience, and treatment of mental illness. It will compare sociological perspectives to those of biology and psychology. The course will examine the intersection of mental health systems with other systems, such as the broader health care and the criminal justice systems. Finally, it will critically analyze psychiatry, policy, and popular culture depictions of the mentally ill.

SOCI 386. Sociology of Nonprofit Organizations

3.00

Focusing primarily on the United States, this course examines the historical and theoretical frameworks that have shaped today's nonprofit organizations. Students will gain a practical understanding of the various types of nonprofit organizations (NPOs) in order to fully grasp their significance as drivers of social change. Special focus will be given to the meaning of civil society, philanthropy as a social construct, stakeholders, professionalization, and the opportunities and challenges facing NPOs in an increasingly interconnected world.

SOCI 388. Prisons, Punishment and the State

3.00

The course investigates the nature of punishment and the particular forms of punishment meted out by the state. Questions include: What is the purpose of punishment? Why does the state choose incarceration as its standard punishment? What forms of punishment exist in other cultures? We focus on the contexts in which prisons emerged in the US and what they say about our society. Discussions center on power, race, class, gender, age and the political economics of the criminal justice system.

Prerequisite: ANTH 195 or permission of the instructor.

SOCI 390. Topics in Cultural Studies

3.00

Crosslisted with ANTH 390

This course explores contemporary culture through a "cultural studies" lens, an interdisciplinary perspective interested in using empirical knowledge to encourage more just human relations. Specific topics of investigation will vary by semester, but each course will cover cultural studies' intellectual history and its application to cultural expressions found in everyday life, film, music, and text.

SOCI 391. Study Abroad

1.00 - 6.00

Designed to encourage students to enhance their academic programs through studying abroad. Arrangements must be made with a faculty member who will direct the study with preparatory instructions and final requirements. May be repeated up to 12 credits.

SOCI 395. Special Topics in Sociology

3.00

Examination of selected topics which are of current importance in sociology. May be repeated for credit when course content changes.

SOCI 480. Senior Seminar in Sociology

3.00

The integration of previous class experience the student has had during the undergraduate years. Fulfills the College of Arts and Letters writing-intensive requirement for the major. Can be repeated as course content changes. *Prerequisite: SOCI 300.*

SOCI 485. Sociology Course Assistantship

1.00 - 3.00

Assistantships provide students with a sense of what it is like to teach a sociology course by allowing them to work closely with faculty members through different phases of course preparation, presentation and evaluation. Assistantships also allow for a deeper understanding of course material by providing opportunities for student assistants to lead discussion and to help their peers review the material outside of the classroom. *Prerequisite: Student must have junior/senior standing, must have earned a grade of B or better in the course for which they will serve as assistant, and may register by faculty invitation only. May be repeated up to six credits; only three credits can count towards the major. A student may serve as a course assistant to the same course twice.*

SOCI 490. Independent Study in Sociology

1.00 - 3.00

Designed to give capable students in sociology an opportunity to complete independent study under supervision. *Prerequisite: Recommendation of the instructor. More than one repeat requires department head approval.*

SOCI 492. Internship in Sociology

1.00 - 3.00

Provides the student with practical experience in employing and refining sociological skills in a public or private agency under faculty supervision. May be repeated up to six credits.

SOCI 499A. Honors

1.00

An independent research topic initiated and completed by qualified senior majors who want to graduate with distinction. *Prerequisite: Declared sociology major.*

SOCI 499B. Honors

3.00

An independent research topic initiated and completed by qualified senior majors who want to graduate with distinction. *Prerequisite: Declared sociology major.*

SOCI 499C. Honors

1.00 - 2.00

An independent research topic initiated and completed by qualified senior majors who want to graduate with distinction. *Prerequisite: Declared sociology major.*

SPAN 101. Elementary Spanish I

3.00 - 4.00

The fundamentals of Spanish through listening, speaking, reading and writing. Practice in pronunciation and development of comprehension. One hour's work a week in the language laboratory. If student has had two or more years of the language in high school he/she will not receive credit for the course.

SPAN 102. Elementary Spanish II

3.00 - 4.00

The fundamentals of Spanish through listening, speaking, reading and writing. Practice in pronunciation and development of comprehension. One hour's work a week in the language laboratory. If student has had two or more years of the language in high school he/she will not receive credit for the course. *Prerequisite: SPAN 101 is the prerequisite*

SPAN 109. Accelerated Review of Elementary Spanish

3.00

Reviews elementary Spanish grammar, reading, writing, speaking and listening skills in Spanish. One hour of work a week in the language laboratory. For students who have had no more than two or three years of Spanish in high school or qualify through the placement exam. *Prerequisite: Permission of the department head or sufficient score on Foreign Language Placement Exam.*

SPAN 111. Intensive Span I

6.00

The fundamentals of Spanish through listening, speaking, reading and writing. The course is the equivalent of SPAN 101 - SPAN 102.

SPAN 212. Intensive Spanish II

6.00

The fundamentals of Spanish through listening, speaking, reading and writing. The course is the equivalent of SPAN 231 - SPAN 232. *Prerequisite: SPAN 102, SPAN 109 or SPAN 111 or sufficient score on the Foreign Language Placement Exam.*

SPAN 231. Intermediate Spanish I

3.00

A thorough review of grammar, vocabulary building, conversation, composition and reading. *Prerequisite: SPAN 102 / SPAN 109 / SPAN 111 or sufficient score on FL Spanish Placement Exam. A student cannot earn credit for SPAN 231 after completing SPAN 232.*

SPAN 232. Intermediate Spanish II

3.00

A thorough review of grammar, vocabulary building, conversation, composition and reading. *Prerequisite: Prerequisite: SPAN 231 or sufficient score on FL Spanish Placement Exam*

SPAN 300. Grammar and Communication

3.00

Intensive training in grammatical structures and their application to oral and written communication. Instruction is in Spanish. Fulfills the College of Arts and Letters writing-intensive requirement for the major. *Prerequisite: SPAN 232 or SPAN 212 or per placement exam score (Spanish).*

SPAN 300S. Spanish Grammar and Communication

3.00

Intensive training in the use and comprehension of modern, everyday Spanish with emphasis on conversation and composition to give students confidence in expressing themselves in simple idiomatic Spanish. Instruction is in Spanish. Fulfills the College of Arts and Letters writing-intensive requirement for the major. *Prerequisite: SPAN 232 or equivalent. Studies Abroad-Salamanca*

SPAN 307. Spanish Civilization

3.00

A study of Spanish life and culture and the outstanding contributions of Spain to world civilization. Review of historical and contemporary figures. *Prerequisite: SPAN 300.*

SPAN 307S. Spanish Civilization

3.00

Study of Spanish life and culture from ancient times to the present. *Prerequisite: SPAN 300 or equivalent. Studies Abroad-Salamanca*

SPAN 308. Latin American Civilization

3.00

A study of the geographical, historical and cultural development of Latin America from pre-Columbian times to the present. Instruction is in Spanish. *Prerequisite: SPAN 300.*

SPAN 308S. Latin American Civilization - Salamanca

3.00

A study of the geographical, historical and cultural development of Latin America from pre-Columbian times to the present. Instruction is in Spanish. May be used for general education credit. *Prerequisite: SPAN 300 or equivalent. Studies Abroad-Salamanca*

SPAN 310. Introduction to Spanish Linguistics

3.00

This course will introduce students to the fundamental components of linguistics (phonology, morphology, syntax, pragmatics, and semantics) using data from the Spanish language. The topics and approach of this course consider the social and dialectal varieties of Spanish and the change of Spanish over time, including the present use of Spanish in the United States. The course requires no previous knowledge of linguistics, but presupposes familiarity with Spanish at the 300 credit level or higher.

SPAN 311. Contrastive Linguistics

3.00

In this course students analyze the main grammatical differences between Spanish and English with the focus on producing accurate and idiomatic translations into both languages. *Prerequisite: SPAN 300 is the prerequisite*

SPAN 312. Translation Competencies

3.00

In this course, students will develop linguistic competencies required in translation, including reading comprehension, summary writing, text analysis, and use of mono- and bilingual dictionaries. Students will learn some basic electronic tools and word processing skills for translators, and practice several types of translation, including direct translation, inverse translation and back translation. *Prerequisite: SPAN 300 is the prerequisite*

SPAN 315. Spanish Phonetics

3.00

Intensive drills in Spanish sounds and intonation patterns. Continued emphasis on conversation. *Prerequisite: SPAN 300 is the prerequisite*

SPAN 320. Oral and Written Communication

3.00

Intensive training in the use of modern, everyday Spanish with emphasis on conversation and composition. Readings in Spanish will provide a context for discussion and writing. *Prerequisite: SPAN 300 is the prerequisite for this course.*

SPAN 320S. Spanish Oral and Written Communication

3.00

Intensive training in the use of modern, everyday Spanish with emphasis on conversation and composition. Readings in Spanish will provide a context for discussion and writing. Instruction is in Spanish. *Prerequisite: SPAN 300. Studies Abroad-Salamanca*

SPAN 321. Oral and Written Communication (for Heritage Speakers)

3.00

This course takes the place of SPAN 320 for the heritage speaker of Spanish (someone who has learned Spanish from family members and/or at home), with mostly oral (and not written) experience. It provides an opportunity for the student to expand their existing proficiency and to develop more formal language skills. Emphasis will be placed on reading, writing and presenting. Topics of current Latino issues will keep students interested and engaged. *Prerequisite: Student must be a heritage speaker, have an appropriate placement score (+451) and have taken or be currently taking SPAN 300, or permission of the instructor.*

SPAN 330. Business Spanish

3.00

This course presents basic business and commercial Spanish vocabulary and terminology. It focuses on trade customs and commercial communication, including interviews, letter writing and simultaneous interpretation. Instruction is in Spanish. *Prerequisite: SPAN 300 is the prerequisite*

SPAN 330S. Business Spanish-Salamanca

3.00

Study of commercial and technical vocabulary and trade customs in conjunction with practice in the art of commercial communication including interviews, letter writing and simultaneous interpretation. *Prerequisite: SPAN 300 or equivalent. Studies Abroad-Salamanca*

SPAN 335. Introduction to Spanish Literature

3.00

This course is designed to prepare students in literary analysis of the novel as well as short stories, poetry and drama. All necessary terminology will be studied. Mandatory for all Spanish majors before taking any other literature class. Instruction is in Spanish. *Prerequisite: SPAN 300 is the prerequisite for this course.*

SPAN 335S. Introduction to Spanish Literature

3.00

This course is designed to prepare students in literary analysis of the novel as well as short stories, poetry and drama. All necessary terminology will be studied. Mandatory for all Spanish majors before taking any other literature class. Instruction is in Spanish. *Prerequisite: SPAN 300. Studies Abroad-Salamanca*

SPAN 360. Spanish for Public Safety

3.00

This course presents basic Spanish legal vocabulary and terminology. It emphasizes the practical application of the Spanish language in routine and high-risk law enforcement situations and explores cultural issues that are important for law enforcement personnel. *Prerequisite: SPAN 232 is the prerequisite for this course*

SPAN 365. Medical Spanish

3.00

Crosslisted with SPAN 365S

This course focuses on the basic Spanish language and vocabulary required in the field of Medicine and Health Sciences. Students practice their oral Spanish skills in various simulated medical situations in preparation for future professional application in the medical environment. *Prerequisite: SPAN 300 is the prerequisite for this course.*

SPAN 365S. Medical Spanish

3.00

Crosslisted with SPAN 365

This course focuses on the basic Spanish language and vocabulary required in the field of Medicine and Health Sciences. Students practice their oral Spanish skills in various simulated medical situations in preparation for future professional application in the medical environment. *Prerequisite: SPAN 232 is the prerequisite.*

SPAN 370. Legal Spanish

3.00

This course presents basic Spanish legal vocabulary and terminology in various contexts and develops basic skills in reading and writing legal documents in Spanish. It focuses on Latin American and Spanish legal systems and discusses related cultural contexts. *Prerequisite: SPAN 300 is the prerequisite*

SPAN 385. Latin American Drama and Short Stories

3.00

Reading and analysis of representative plays and short stories from Latin America. Student reports on selected authors. Instruction is in Spanish. *Prerequisite: SPAN 335.*

SPAN 385S. Latin American Drama and Short Stories-Salamanca

3.00

Reading and analysis of representative plays and short stories from Latin America. Student reports on selected authors. Instruction is in Spanish. May be used for general education credit. *Prerequisite: SPAN 335. Studies Abroad-Salamanca*

SPAN 386. Spanish Short Stories

3.00

A study of literary Spanish short stories from the Middle Ages to the present, including a selection of texts by prominent authors such as Don Juan Manuel, Cervantes, Alarcón, Bécquer, Zorrilla and Clarín. *Prerequisite: SPAN 335.*

SPAN 395. Latin American Poetry of the 20th Century

3.00

This course will study poets such as Jose Juan Tablada, Ramon Lopez Velarde, Gabriela Mistral, Pablo Neruda, Cesar Vallejo. Life, works, chronology, historical situation, social context and influences, tendencies and valuations. Instruction in Spanish. *Prerequisite: SPAN 335 is the prerequisite of this course*

SPAN 400. Advanced Conversation

3.00

Discussions deal with topics of current interest. Instruction is in Spanish. *Prerequisite: SPAN 320 or SPAN 321.*

SPAN 400S. Advanced Conversation and Composition-Salamanca

3.00

Discussions deal with topics of current interest. Instruction is in Spanish. *Prerequisite: SPAN 300 or equivalent. Studies Abroad-Salamanca*

SPAN 401. Hispanic/Latinx Cinema for Spanish Conversation

3.00

This is an advanced conversation course that is designed to develop spoken and written fluency and accuracy in film and cultural analysis. Students explore several aspects of life and culture in the Spanish-speaking world and the U.S. including identity, history, politics, social class, gender roles and regional language and arts. *Prerequisite: SPAN 320 or SPAN 321.*

SPAN 404. Spanish in the United States

3.00

This course will study the present situation of Spanish in the United States, how Spanish has been shaped by social forces in the US and how Spanish, in turn, shapes these forces. *Prerequisite: SPAN 320 or SPAN 321 or permission of the instructor.*

SPAN 405. Spanish Novels of the 19th and 20th Centuries

3.00

The development of the Spanish novel from the "costumbristas" through the realism of Galdos, and from the writers of the Generation of 1898 to the present. Instruction is in Spanish. *Prerequisite: SPAN 335*

SPAN 406. Spanish Drama of the 19th and 20th Centuries

3.00

Readings and discussions of representative works of Spanish drama from the Romantic period to the present. Instruction is in Spanish. *Prerequisite: SPAN 335*

SPAN 407. Aspects of Spanish Civilization

3.00

This course will study the history, culture and society of Spain during the 20th and 21st centuries. Emphasis will be placed on the changes in Spain after Franco. Instruction in Spanish. *Prerequisite: SPAN 300*

SPAN 415. The Spanish-American Novel

3.00

Reading and analysis of representative works of Spanish-American novelists of the 19th and 20th centuries. Instruction is in Spanish. *Prerequisite: SPAN 335*

SPAN 424. Spanish Picaresque Novel

3.00

A study of the Spanish Picaresque Novel, including Lazarillo de Tormes, Quevedo's El Buscon and Alonso de Castillo Solorzano's Las harpias en Madrid, culminating in the connections of Cervantes work with the picaresque. *Prerequisite: SPAN 335 or permission of the instructor*

SPAN 425. Prose of the Golden Age

3.00

A study of the chivalric, sentimental, pastoral and picaresque genres of prose literature and of their development through the Golden Age, Culminating in Cervantes. Instruction is in Spanish. *Prerequisite: SPAN 335*

SPAN 426. Drama of the Golden Age

3.00

A study of the "comedia" of the Golden Age including works of Lope de Vega, Calderon de la Barca, Tirso de Molina and Ruiz de Alarcon. Instruction is in Spanish. *Prerequisite: SPAN 335*

SPAN 427. Poetry of the Golden Age

3.00

Lecture and analysis of Spanish poetry beginning with the Renaissance through the end of the 17th Century. The course will cover poets such as Garcilaso de la Vega, Fray Luis de Leon, and San Juan de la Cruz. Instruction in Spanish. *Prerequisite: SPAN 335*

SPAN 428. Don Quixote

3.00

Examination of Cervantes's two-part novel, which some have named the first modern novel or the greatest novel of all time. Includes study of the book's literary and social context, analysis of narrative techniques and levels of fiction, and major critical approaches to the work across the centuries. Instruction is in Spanish. *Prerequisite: SPAN 335 or permission of the instructor*

SPAN 430. Advanced Business Spanish

3.00

This course presents advanced business and commercial Spanish vocabulary and terminology. By focusing on topics such as the origin of business and companies, company constitution and organization, human resources, labor law and commercial law, marketing, products, services, and the sale of consumer goods, students compare the business environment of Latin America with that of the United States. *Prerequisite: SPAN 330*

SPAN 434. Advanced Studies in Latin American Literature in Translation

3.00

Crosslisted with ENG 434

This course will study Latin American literature in translation. The course will focus on the work of major Spanish-American authors.

SPAN 435. Translation Strategies

3.00

This course discusses aspects of translation theory such as skopos, translation loss, translation gain, and language bias. Students learn several translation strategies at the phrase and sentence levels and practice these strategies thoroughly before investigating terminology, terminology mining and terminology management. Instruction is in English and Spanish. *Prerequisite: SPAN 300*

SPAN 436. Introduction to Interpretation

3.00

This course presents an overview of the interpreting profession. It introduces students to the main techniques they need to become competent interpreters in the various sectors of interpreting. Instruction is given in English and Spanish. *Prerequisite:* SPAN 300

SPAN 439. Major Authors of Literature in Spanish in Translation

3.00

Crosslisted with ENG 439

This course will study the work of both Peninsular and Latin American authors in translation. The course will focus on major Spanish speaking authors and their work, both in Latin America and in Spain. May be repeated as course content changes.

SPAN 446. Special Topics in Spanish Literature

3.00

Study of a particular topic in Spanish literature. It may cover all or specific Spanish literature genre. Course may be repeated if content varies. *Prerequisite:* SPAN 335.

SPAN 446S. Special Topics in Spanish Literature - Salamanca

3.00

Study of a particular topic in Spanish literature. It may cover all or specific Spanish literature genre. *Prerequisite:* SPAN 335.

SPAN 447. Special Topics in Spanish Civilization and Culture

3.00

Students will study a particular topic in the civilization and/or culture of Hispanic countries. Course may be repeated if content varies. *Prerequisite:* SPAN 320 or SPAN 321 or permission of the instructor.

SPAN 448. Special Topics in Spanish Linguistics

3.00

Students will study a particular topic in Spanish linguistics. Topics could include an introduction to Spanish sociolinguistics and psycholinguistics. Course may be repeated if content varies. *Prerequisite:* SPAN 320 or SPAN 321 or permission of the instructor.

SPAN 455. Women in Hispanic Literatures

3.00

Study of women in literature in the Hispanic world. Focus on women authors, female characters in literature or both. The course may include works from Spain or Latin America from any time period. Examination of feminist literary criticism, canon formation and other critical topics. Emphasis may vary according to the instructor. Instruction is in Spanish. *Prerequisite:* SPAN 335

SPAN 461. Post War Literature in Spain

3.00

Reading and analysis of representative works of Spanish novelists and their development after the Civil War in Spain. Emphasis on Spanish history and society under the influence of Franco's Regime. Instruction is in Spanish. *Prerequisite:* SPAN 335

SPAN 462. Spanish Comic Theater of the 20th Century

3.00

The course will study the work of the main playwrights of the comic theater of 20th century Spain and their type of humor: Carlos Arniches, the brothers Alvarez Quintero, Pedro Munoz Seca, Enrique Jardiel Poncela and Miguel Mihura. Instruction is in Spanish. *Prerequisite: SPAN 335*

SPAN 465. Cinema and Literature

3.00

Studies of the structure of the cinema and its relation to literature. Comparison between different literary works and their interpretation in cinema. The course will cover topics in Spain and Latin America. Instruction in Spanish. *Prerequisite: SPAN 335.*

SPAN 465S. Cinema and Literature

3.00

Comparative studies between cinema and literature. May be used for general education credit. *Prerequisite: SPAN 335. Corequisite: SPAN 335.*

SPAN 470. Advanced Legal Spanish

3.00

This course will study the difference between national and international law and legal systems, as well as law and its origins and moral and justice concepts in society and among legislators. Intergovernmental organizations such as United Nations, International Labor Organization and International Court of Justice will be examined. Human rights and related violations and government actions in conflict resolutions will be discussed. Instruction in Spanish. *Prerequisite: SPAN 300*

SPAN 475. Advanced Medical Spanish

3.00

This course provides future medical professionals with further practice in Spanish in the medical context. Students learn advanced medical vocabulary and anatomical terminology, develop their reading comprehension skills, and acquire greater fluency through student presentations and classroom discussions on the latest medical techniques and advances. *Prerequisite: SPAN 365.*

SPAN 476. Culture and Medicine in Latin America

3.00

This course enables students to acquire greater linguistic proficiency and cultural competence in the medical context through classroom discussions and reading comprehension. Students analyze historical and contemporary medical discoveries, discuss holistic and indigenous medicine, and examine popular and religious beliefs applied to medicine in Latin America. *Prerequisite: SPAN 300.*

SPAN 477. Culture and Medicine in Spain

3.00

This course enables students to acquire greater linguistic proficiency and cultural competence in the medical context through classroom discussions and reading comprehension. Students analyze historical and contemporary medical discoveries and discuss alternative and popular medicine applied to medicine in Spain. *Prerequisite: SPAN 300.*

SPAN 484. Advanced Studies in Spanish and Italian Literature

3.00

From the Renaissance to the Siglo de Oro, this course will explore the influences between Spanish and Italian literature, from the Early modern period to the Baroque. It will mainly investigate three main genres: Poetry, narrative and drama. It will include a selection of texts by prominent Italian and Spanish authors such as Petrarch, Boccaccio, Garcilaso de la Vega, Machiavelli, Cervantes, Lope de Vega. Instruction is in English. *Prerequisite: Permission of the instructor.*

SPAN 485. Business and Society in Latin America

3.00

Crosslisted with SPAN 485S

This course explores the development of Latin American society in the business and economic contexts and investigates areas such as importation and exportation, the health and education systems, banking and financial institutions, agriculture, and the textile, fashion, wine, motion picture, music, and media industries. *Prerequisite: SPAN 300.*

SPAN 486. Business and Society in Spain

3.00

This course investigates several sectors of the Spanish economy, including the food industry, industrial port activity, importation and exportation, the petrochemical industry, the leisure industry, and the wine making industry. Students tour several important multinational companies in Salamanca, Spain, and attend presentations given in Spanish by staff of those companies. This course is taught in Salamanca, Spain. *Prerequisite: SPAN 300.*

SPAN 490. Special Studies in Spanish

1.00 - 3.00

Allows students an opportunity to complete independent studies under faculty supervision. *Prerequisite: Permission of the department head.*

SPAN 490S. Special Studies in Spanish -Salamanca

3.00

This course gives students the opportunity to integrate in the Spanish society through a JMU sponsored internship/field experience. Students will have the chance to work in local schools and businesses. The experience will allow students to interact with the community through conversation and their assigned responsibilities. *Prerequisite: Studies Abroad-Salamanca*

SPAN 490T. Sp St Spanish Art - Salamanca

3.00

A study of the art and architecture of Spain from medieval times through the present. Concentration on specific artists, SPAN 490as well as general movements in the history of Spanish art. ARTH 414 meets liberal studies requirement. *Prerequisite: Studies Abroad-Salamanca*

SPAN 492. Latinx Community Practicum

3.00

This course gives students the opportunity to collaborate with the local Spanish-speaking community through semester

placements in schools or service agencies. Students will develop a better understanding of the Hispanic culture as well as immigration issues affecting the community. *Prerequisite: SPAN 320 or SPAN 321.*

SPAN 494. Practical Medical Spanish

3.00

This course allows JMU students who have completed SPAN 365 to practice the linguistic and cultural skills from basic medical Spanish in real-life medical situations. Students have the option to find their own internship or volunteer to work locally or abroad with the permission of the coordinator of the minor in medical Spanish. Alternately, students can complete the course NSG 490 in Costa Rica or Tarragona, Spain. *Prerequisite: SPAN 365.*

SPAN 495. Practical Spanish for Public Safety/Legal Spanish

3.00

This course focuses on Spanish for public safety, law enforcement, and the judicial/legal system in collaboration with local and state agencies and the Spanish-speaking community. Students consolidate their theoretical knowledge, gain confidence in the language, and observe both the direct impact of their learning and the critical role of language proficiency in today's increasingly diverse society. *Prerequisite: SPAN 300.*

SPAN 496. Translation/Interpreting Internship

3.00

Practical experience in translation or interpretation within a public agency, nonprofit organization or private business. Periodical reports and a final paper are required for the course. The student will be supervised by a faculty member. *Prerequisite: SPAN 435 or SPAN 436 or permission of the instructor.*

SPAN 498. The Generation of 1898

3.00

This course examines major Spanish writers who engaged with their nation's defeat in the 1898 Spanish-American War. Students will read, analyze and discuss works from Azorín, Pío Baroja, Valle-Inclán, Antonio Machado, Maeztu and Unamuno. This group of intellectuals varied in their writing styles but shared a broad commitment to the cultural and aesthetic renewal of Spain. *Prerequisite: SPAN 335*

SPAN 499A. Honors

1.00

SPAN 499B. Senior Honors Project

3.00

SPAN 499C. Senior Honors Project

2.00

SRM 201. Foundations of Hospitality, Sport and Recreation Management

3.00

Crosslisted with HM 201

An introduction to the basis for the professions that make up the School of Hospitality, Sport and Recreation Management. A focus on these professions in governmental, voluntary, private, and commercial settings is incorporated. Both the economical significance and the professional preparation for success in the industry is both introduced and practiced. *Prerequisite: HM or SRM major or permission of the director.*

SRM 202. Foundations of Leadership in Hospitality, Sport and Recreation Management

3.00

Crosslisted with HM 202

An introduction to the basis for the professions that make up the School of Hospitality, Sport and Recreation Management. A focus on these professions in governmental, voluntary, private and commercial settings is incorporated. Finally both the economical significance and the professional preparation for success in the industry is both introduced and practiced. *Prerequisite: HM or SRM Major or permission of the director*

SRM 203. Foundations of Ethics and Law in Hospitality, Sport and Recreation Management

3.00

Crosslisted with HM 203

An introduction to ethics and law within the sport, hospitality and recreation industry. The ethical portion introduces students to select theories of ethics, ethical issues and an ethical decision making model; and the legal portion introduces students to basic legal terminology and concepts while concentrating on negligence and employment issues. *Prerequisite: HM or SRM major or permission of the director*

SRM 241. Introduction to Sport and Recreation Management

3.00

Introduces the sport and recreation management professions in governmental, voluntary, private, public and commercial settings. Outlines development of sport and recreation and the evolution of the mega-leisure industry. Overviews professional preparation in sport and recreation management. *Prerequisite: SRM 201 and declared SRM major.*

SRM 242. Sociology and Psychology of Sport and Recreation

3.00

The primary purpose of this course is to investigate sport and recreation related activities and services from a sociological and psychological perspective. The focus will be on activity through the lifespan and using theory and current issues from both disciplines to aid the practitioner in their interactions with participants and constituents and with the development and management of sport and recreation related activities and services. *Prerequisite: SRM 201 and declared SRM major or disabilities studies minor.*

SRM 282. Practicum in Sport and Recreation

3.00

A sequence of selected practicum experiences which provides the student with supervised practicum experience in Sport and Recreation Management. *Prerequisite: SRM 241*

SRM 330. History of Sport and Recreation

3.00

This course covers the development of sports and recreational activities and their significance in American life from colonial times to the present. It is designed both to supplement students' understanding of American history and to examine the role that sports and recreational activities have played in shaping contemporary society.

SRM 333. Management in Sport and Recreation

3.00

This course will provide students with the knowledge to apply the management principles and theories to specific professional organizations in the sport and recreation industry. Sport and recreation management applications covered include administration principles for specific organizations, human resource management, fiscal management, marketing, and risk management.

Prerequisite: SRM 241

SRM 334. Introduction to Sport Media

3.00

Examination of the knowledge and skills required for the business of sports communications, including strategic and personal communications, leadership, publishing, advertising, public relation and crisis management. The course also examines sport communications from a sociological and legal perspective and the emergence of online sport communication and the new sport media. *Prerequisite: SRM 241.*

SRM 337. Programming and Assessment in Sport and Recreation Management

3.00

This course will examine the basics of sport and recreation programming and assessment. Students will be presented with tools and strategies for developing and assessing programs and evaluating their outcomes. Students will learn how to program for agencies of various sizes with an understanding of the importance of recognizing service population needs. *Prerequisite: SRM 241*

SRM 434. Ethical and Legal Issues in Sport and Recreation Management

3.00

This course is designed to introduce students to current ethical and legal issues of concern to professionals in sport, recreation and leisure studies. Students will examine the impact of these issues on organizational and managerial policies and decision-making. *Prerequisite: SRM 333.*

SRM 435. Sport Marketing and Sales

3.00

This course will examine how promotional activities and sales efforts are closely intertwined and impact the success or failure of the sport and leisure industry. Particular emphasis will be placed on ticket sales and sport sponsorship. *Prerequisite: SRM 333.*

SRM 436. Facilities and Event Management

3.00

This course is designed to explore the principles of planning, design, and management of selected sport, recreation, and exercise facilities. The course will also cover the planning and management of special events. This will include budgeting, design, staffing, evaluation/assessment, crowd management and relative human resource management. *Prerequisite: SRM 333.*

SRM 438. Human Resources in Sport and Recreation Management

3.00

An overview of human resource management and development in sport and recreation environments. This course will provide an introduction to administrative practices involving employer and employee relationships and an application of these concepts to day to day management duties. Course focus will be policies, legal issues, recruiting, hiring, job analysis, creating position descriptions, evaluation, training, development and supervision of staff members and volunteers. *Prerequisite: SRM 333.*

SRM 440. Sport and Recreation Management Seminar

3.00

This course is for students to learn the business skills required for success in the sport and recreation management industry. Students will evaluate and analyze multiple critical thinking approaches and conflict management and negotiation skills, as well as customer service models, entrepreneurial theories and practices, and concepts within the industries of sport and recreation. *Prerequisite: Completion of all 300-level SRM courses required for the major.*

SRM 482. Internship in Sport and Recreation Management

6.00 - 12.00

A full-time professional experience which affords the opportunity to apply theory and methodology under qualified supervision from the cooperating agency and the university. Students may take only one additional course (three or four credits) while enrolled in this course. The additional course must be approved in advance by the site supervisor and the director of SRM. *Prerequisite: SRM 282, SRM 333 and 72 credit hour complete.*

SRM 490. Special Studies in Sport and Recreation Management

3.00

Designed to give capable students in Sport and Recreation Management an opportunity to complete independent study under faculty supervision. *Prerequisite: SRM major and permission of the director.*

SRM 498. Special Topics in Sport and Recreation Management

3.00

This course is designed to allow explorations of areas of current topical concern, or to exploit special situations. Course content will vary. For current course content consult your adviser or the SHSRM Director. *Prerequisite: SRM major and permission of the director.*

SRM 499A. Honors

1.00

See catalog description entitled "Graduation with Distinction" and "Graduation with Honors." *Prerequisite: Permission of the director.*

SRM 499B. Honors

3.00

See catalog description entitled "Graduation with Distinction" and "Graduation with Honors." *Prerequisite: Permission of the director.*

SRM 499C. Honors

2.00

See catalog description entitled "Graduation with Distinction" and "Graduation with Honors." *Prerequisite: Permission of the director.*

SWA 101. Elementary Swahili I

3.00 - 4.00

The fundamentals of Swahili through listening, speaking, reading and writing. Practice in pronunciation and development of comprehension. One hour's work a week in language laboratory. Student will receive no credit for course if he/she has had two or more years of the language in high school.

SWA 102. Elementary Swahili II

3.00 - 4.00

The fundamentals of Swahili through listening, speaking, reading and writing. Practice in pronunciation and development of comprehension. One hour's work a week in the language laboratory. If student has had two or more years of the language in high school he/she will not receive credit for the course.

SWA 111. Intensive Swahili

6.00

The fundamentals of Swahili through listening, speaking, reading and writing. The course is the equivalent of SWA 101-SWA 102.

SWA 212. Intensive Swahili II

6.00

The fundamentals of Swahili through listening, speaking, reading and writing. The course is the equivalent of SWA 231 - SWA 232 . *Prerequisite: SWA 102 or SWA 111 or permission of the instructor.*

SWA 231. Intermediate Swahili I

3.00

A thorough review of first year grammar and vocabulary building. Conversation, composition and readings will be chosen to reach competency at the lower intermediate level Swahili. *Prerequisite: SWA 102, SWA 111 or permission of the instructor*

SWA 232. Intermediate Swahili II

3.00

A thorough review of Swahili grammar and vocabulary building. Conversation, composition and readings will be chosen to reach competency at the advance intermediate level. *Prerequisite: SWA 231 or permission of the instructor*

SWA 300. Grammar and Communication

3.00

Intensive training in grammatical structures and their application to oral and written communication. Instruction is in Swahili. Fulfills the College of Arts and Letters writing-intensive requirement for the major. *Prerequisite: SWA 232 or SWA 212 or permission of instructor*

SWA 320. Swahili Oral and Written Communication

3.00

Intensive training in the use of modern, everyday Swahili with emphasis on conversation and composition. Readings in Swahili will provide a context for discussion and writing. *Prerequisite: SWA 300*

SWA 490. Special Studies in Swahili

3.00

Special topics or independent studies in Swahili.

TESL 310. Pedagogical Grammar

3.00

This course develops skills in teaching grammar and syntax in the context of writing. Special focus will be on working with English language learners and the ability to model and teach editing skills and organization of writing using predominant text structures in the content areas.

TESL 381. Practicum in TESOL Instructional Strategies

3.00

The course provides supervised field experiences in working with English as a Second Language students, NK-12. Preservice teachers will demonstrate competencies developed in the English as a Second Language endorsement program and in consultation with a field supervisor. *Prerequisite: Completion of ESL minor requirements.*

TESL 382. Practicum in TESOL First/2nd Language Acquisition

1.00

This one credit practicum provides an opportunity for students to work directly with English language learners under the supervision of a mentor teacher and a University Supervisor to identify and recognize principles of first and second language acquisition as evident in classroom contexts. Content of the practicum will directly correlate with topics covered in TESL 426. *Corequisite: TESL 426.*

TESL 383. Practicum in TESOL Literacy Development

1.00

This one credit practicum provides an opportunity for students to work directly with English language learners to plan and implement oral language, reading, and writing strategies in language arts and content instruction that are directly related to topics covered in the LED 435 course. *Prerequisite: LED 366. Corequisite: LED 435*

TESL 384. Practicum in Literacy Development

1.00

This one credit practicum provides for pre-service teachers to work directly with students in grades PreK-12 (as determined by the LED 366 instructor) on literacy development under the supervision of a mentor teacher and a University Supervisor. They plan and implement literacy strategies in language arts and content instruction directly related to LED 366 course material. Most pre-service teachers will assist Prek-5 students. *Corequisite: LED 366*

TESL 385. Practicum in TESOL

1.00-3.00

This practicum provides an opportunity for students to work directly with English learners under the supervision of a mentor

teacher and a university supervisor. Course content and site locations will vary depending upon the specific focus of the practicum.

TESL 421. Foundations of ESL PK-12 Collaboration

3.00

This course is a detailed study of ESL co-teaching and other collaborative practices. The course explores the rationale for teacher collaboration to support ESL instruction; presents current, classroom-based, practitioner-oriented research studies related to co-teaching, co-planning, curriculum alignment, teacher professional development and additional collaborative practices; and offers authentic teacher reflections and recommendations on collaboration and co-teaching. *Prerequisite: TESOL majors only.*

TESL 425. Cross-Cultural Education

3.00

The course provides students with knowledge of the effects of socio-cultural variables in an instructional setting.

TESL 426. Concepts in First and Second Language Acquisition

3.00

This course is designed to help students gain familiarity with first and second language acquisition. In understanding the process of language acquisition, students will be better equipped to design instructional strategies that facilitate English Language Learners language acquisition, and to create supportive environments.

TESL 428. Assessment for Curriculum Development in English as a Second Language

3.00

The course provides students with a variety of assessment practices for assessing English language learners` abilities. Students will examine ways to use assessment results in the development of appropriate curriculum. *Prerequisite: TESL 426; TESOL minors only*

TESL 470. Instructional Strategies for Teaching English as a Second Language

3.00

This course is designed to provide preservice ESL teachers with experiences in designing and implementing instructional strategies to meet the linguistic needs of English Language Learners and utilizing assessment instruments to evaluate student progress.

TESL 480. Student Teaching/Internship

5.00

Enables students to apply skills and attitudes acquired in all components of their professional education preparation. Students design and implement instructional activities under the guidance of teaching professionals *Prerequisite: PSYC 160, EDUC 310, EDUC 300, pre-professional studies and TESOL core courses. Corequisite: TESL 481.*

TESL 481. Student Teaching Seminar in TESOL

1.00

This seminar is designed to accompany the student teaching experiences. Its purpose is to provide opportunities for student teachers to process and reflect on their experiences that occur in the classroom and school and to strengthen their professional growth. Broad topic areas include understanding of different instructional practices and implementation of a variety of lesson

plans with appropriate behavior management and assessment strategies to meet the needs of English learners. Emphasis is placed on guiding student teachers from theory to the world of the professional educator by exploring their own skill levels and plans for their ongoing professional development. *Prerequisite: TESOL majors only. Corequisite: TESL 480.*

TESL 482. Field Work in Professional Development, Partnership and Advocacy Seminar

1.00

Students examine opportunities for professional development from professional associations, universities and other organizations across Pk-16. Strategies to build partnerships with colleagues, families and communities are presented. Important social and political issues affecting education of majority and minority students and models of advocacy for students and their families are presented. *Prerequisite: TESL 426*

TESL 490. Special Studies in TESOL

1.00-3.00

The course is designed to allow the student to complete an independent study in a TESOL-related area under faculty supervision. *Prerequisite: Permission of the instructor.*

DANC 322. Equity, Inclusion and Access in Education and Performance

3.00

Crosslisted with THEA 322

An exploration of practices in theatre and dance education and performance that support equity, inclusion and access. This course looks at the intersections of arts education, art-making and performance, applied theatre, and community engaged practice. *Prerequisite: School of Theatre and Dance majors only and sophomore standing.*

ENG 347. Playwriting

3.00

Study of the process of writing plays. Consideration of plot, character, thematic material, conflict and dramatic structure. Emphasis on individual writing assignments. *Prerequisite: Sophomore standing or permission of the instructor.*

ENG 447. Advanced Playwriting

3.00

Crosslisted with THEA 447

An advanced workshop with emphasis on developing full-length dramatic material. *Prerequisite: THEA 347 or ENG 347 and junior standing.*

MUS 357. Music Theatre History and Analysis

3.00

Crosslisted with THEA 357

Survey of musical theatre genres, composers, lyricists, performers, directors and choreographers in America from 1750 to present. Includes practical study of the format of the libretto and musical score in relationship to the major musical theatre genres. Consideration of how music theatre developed from and reflected the cultural, social, and political landscape of its time. *Prerequisite: Music majors with an emphasis in music theatre only or permission of the instructor.*

STAD 100. Theatre and Dance Colloquium

0.00

Weekly department colloquium; work in progress presented, viewed and discussed by student body, faculty and guests. Professionals in the field frequently hold master classes. All majors in the School of Theatre and Dance are required to enroll in and pass two semesters in the freshman/first transfer year and two additional semesters during the students' progression in their major. *Prerequisite: School of Theatre and Dance majors only.*

STAD 171. Performance Production

3.00

An introduction to the methods of the production of scenery, properties, costumes, lighting, sound and performance management for theater and dance performance. Instruction in the skills required for the operation of lighting and sound equipment will be taught. Students are required to complete a main stage running crew assignment as a component of this course. *Prerequisite: School of Theatre and Dance majors and minors only.*

THEA 204. Theatre Practicum: Scenery

1.00

Students will complete practical theatre assignments on main stage productions in the area of scenery. Repeatable. Prior approval required. Majors may apply a maximum of one THEA 204 or THEA 304 credit toward the major requirements and a maximum of four credit hours of THEA 204-THEA 208 or THEA 304-THEA 308 toward meeting major requirements.

THEA 205. Theatre Practicum: Lights

1.00

Students will complete practical theatre assignments on main stage productions in the area of lighting. Repeatable. Prior approval required. Majors may apply a maximum of one THEA 205 or THEA 305 credit toward the major requirements and a maximum of four credit hours of THEA 204 -THEA 208 or THEA 304-THEA 308 toward meeting major requirements.

THEA 206. Theatre Practicum: Costumes

1.00

Students will complete practical theatre assignments on main stage productions in the area of costumes. Repeatable. Prior approval required. Majors may apply a maximum of one THEA 206 or THEA 306 credit toward the major requirements and a maximum of four credit hours of THEA 204-THEA 208 or THEA 304-THEA 308 toward meeting major requirements.

THEA 207. Theatre Practicum: Management

1.00

Students will complete practical theatre assignments in the area of management. Repeatable. Prior approval required. Majors may apply a maximum of one THEA 207 or THEA 307 credit toward the major requirements and a maximum of four credit hours of THEA 204-THEA 208 or THEA 304-THEA 308 toward meeting major requirements.

THEA 208. Theatre Practicum: Performance

1.00

Students will complete practical theatre assignments on main stage productions in the area of performance. Repeatable. Prior

approval required. Majors may apply a maximum of one THEA 208 or THEA 308 credit toward the major requirements and a maximum of four credit hours of THEA 204-THEA 208 or THEA 304-THEA 308 toward meeting major requirements.

THEA 210. Introduction to Theatre [C2VPA]

3.00

Study of the theatre as an art form. Emphasis on introducing students to a broad spectrum of theatrical activity and opinion. Consideration of the components that comprise a theatre event including acting, directing, design, costuming, lighting and playwriting. May be used for general education credit. May not be used for major credit.

THEA 211. Performance Analysis

3.00

Plays are examined as texts for performance. Theories of performance and methods for the analysis of performances in and out of the theater are studied. *Prerequisite: Theatre and musical theatre majors and theatre minors, American studies minors and creative writing minors only.*

THEA 250. The Collaborative Artist: Sophomore Studio

3.00

Crosslisted with DANC 250

The course explores the creative and collaborative processes within the development of performance events. Emphasis is placed upon the role of the artist as a social and artistic force in society. Studio-based creative explorations along with the viewing and discussion of live and recorded performances are integral to the course in order for students to investigate, experience, and devise collaboratively within the context of various performance forms across multiple disciplines and cultures. *Prerequisite: School of Theatre and Dance majors only and sophomore standing.*

THEA 251. Acting I: Basic Acting

3.00

A study of basic acting as a performance experience. Emphasis on fundamentals of performance including concentration, transitions, interaction and the structuring of action.

THEA 253. Musical Theatre Laboratory

1.00

Introduction to issues related to Musical Theatre through music and text analysis, vocal technique, and practice of the repertoire. Topics relating to vocal and physical health, professional practice, and musical theatre resources will also be covered. May be repeated once for credit. *Prerequisite: Musical theatre majors only.*

THEA 261. Voice for the Stage

3.00

Theories and exercises designed to equip the student with proper speech for the stage through a fundamental understanding of phonetics and articulation. *Prerequisite: THEA 251.*

THEA 271. Technical Theatre

3.00

Study of the technical aspects of stage production. Emphasis upon practical experience in the use of stage and shop facilities. Consideration of the physical theater and stage, construction, painting and rigging of scenery as applied to theatrical production.

Prerequisite: STAD 171.

THEA 273. Design Aspects of Performance

3.00

Study of the interrelationship between the playwright, director and actor with the scenic, lighting and costume designers; introduction of the basic documents of the design process; survey of current and historical trends in theatrical design; no artistic or technical skills necessary.

THEA 281. Movement for the Actor

3.00

Students in this course develop and refine movement skills for stage performance. Through a study of approaches, such as Viewpoints, Animal Work, and Laban Techniques, students develop methods of artistic expression using their body. Through movement, students discover new connections to speech and text and improve the condition, flexibility, and responsiveness of their physical instrument. Students also develop the means for making effective physical choices in the creation of a performance.

Prerequisite: THEA 251 .

THEA 303. Topics in Theater

1.00 - 3.00

Study of current topics and issues in theater. Emphasis on contemporary themes of immediate concern.

THEA 304. Theatre Practicum: Scenery

1.00

Students will complete practical theatre assignments on main stage productions in the area of scenery. Repeatable. Prior approval required. Majors may apply a maximum of one THEA 204 or THEA 304 credit toward the major requirements and a maximum of four credit hours of THEA 204-THEA 208 or THEA 304-THEA 308 toward meeting major requirements.

THEA 305. Theatre Practicum: Lights

1.00

Students will complete practical theatre assignments on main stage productions in the area of lighting. Repeatable. Prior approval required. Majors may apply a maximum of one THEA 205 or THEA 305 credit toward the major requirements and a maximum of four credit hours of THEA 204-THEA 208 or THEA 304-THEA 308 toward meeting major requirements.

THEA 306. Theatre Practicum: Costumes

1.00

Students will complete practical theatre assignments on main stage productions in the area of costumes. Repeatable. Prior approval required. Majors may apply a maximum of one THEA 206 or THEA 306 credit toward the major requirements and a maximum of four credit hours of THEA 204-THEA 208 or THEA 304-THEA 308 toward meeting major requirements.

THEA 307. Theatre Practicum: Management

1.00

Students will complete practical theatre assignments in the area of management. Repeatable. Prior approval required. Majors may apply a maximum of one THEA 207 or THEA 307 credit toward the major requirements and a maximum of four credit hours of THEA 204-THEA 208 or THEA 304-THEA 308 toward meeting major requirements.

THEA 308. Theatre Practicum: Performance

1.00

Students will complete practical theatre assignments on main stage productions in the area of performance. Repeatable. Prior approval required. Majors may apply a maximum of one THEA 208 or THEA 308 credit toward the major requirements and a maximum of four credit hours of THEA 204-THEA 208 or THEA 304-THEA 308 toward meeting major requirements.

THEA 315. World Theatre Histories, Texts and Performances I

3.00

Study of world theatre from its Origins to the Seventeenth Century. The class explores how theatre has been created and consumed in diverse settings around the globe, with particular emphasis given to dramatic texts and performance traditions, as well as critical, literary, and performance theories. Includes study of theatre architecture and production design; political, social, intellectual, and aesthetic contexts of performances, and the theory and history of acting across time and place. *Prerequisite: THEA 211*

THEA 316. World Theatre Histories, Texts and Performances II

3.00

Study of world theatre from the seventeenth to late-nineteenth century. The class explores how theatre has been created and consumed in diverse settings around the globe, with particular emphasis given to dramatic texts and performance traditions, as well as critical, literary and performance theories. Includes study of theatre architecture and production design; the political, social, intellectual and aesthetic contexts of performance; and the theory and history of acting across time and place. *Prerequisite: THEA 211.*

THEA 317. World Theatre Histories, Texts and Performances III

3.00

Study of world theatre from the late nineteenth century to the present. The class explores how theatre has been created and consumed in diverse settings around the globe, with particular emphasis given to dramatic texts and performance traditions, as well as critical, literary and performance theories. Includes study of theatre architecture and production design; the political, social, intellectual and aesthetic contexts of performances; and the theory and history of acting across time and place. *Prerequisite: THEA 211, THEA 315 and THEA 316.*

THEA 320. Theatre Teaching Methods - Primary Level

3.00

An exploration of teaching drama in primary and elementary school. Topics include creative drama, process drama, story drama, drama-based pedagogy and arts integration. This course considers lesson planning, classroom management and assessment in the primary and elementary school. *Prerequisite: Theatre or IDLS majors only.*

THEA 321. Theatre Teaching Methods - Secondary Level

3.00

An exploration of teaching drama and theatre in secondary school. Topics include discipline-based theatre education, drama-

based pedagogy, theatre workstations, brain-based learning and arts integration. This course considers lesson planning, classroom management and assessment in the middle and high school. *Prerequisite: Theatre or IDLS majors only and THEA 320.*

THEA 322. Equity, Inclusion and Access in Education and Performance

3.00

Crosslisted with DANC 322

An exploration of practices in theatre and dance education and performance that support equity, inclusion and access. This course looks at the intersections of arts education, art-making and performance, applied theatre, and community engaged practice.

Prerequisite: School of Theatre and Dance majors only and sophomore standing.

THEA 323. Youth Theatre

3.00

An exploration of teaching artistry, devised theatre and applied drama/theatre with youth, directing the young performer and building educational programs in schools. With an emphasis on teaching, directing and arts administration, this course examines opportunities for learning through theatre-making and theatre performance. *Prerequisite: School of Theatre and Dance majors and theatre minors only and sophomore standing, or permission of the instructor.*

THEA 324. Theatre for Young Audiences

3.00

An exploration of professional theatre practices in Theatre for Young Audiences (TYA), including Theatre for the Very Young (TVY) and Theatre for Teens. With an emphasis on theatre-making, this course examines historical contexts of TYA, investigates theatre companies and practitioners and identifies applications for education, outreach and engagement. *Prerequisite: School of Theatre and Dance majors only and sophomore standing, or permission of the instructor.*

THEA 325. Theatre Teaching Practicum

3.00

An advanced study of drama/theatre education focusing on professional practices, contemporary issues in education and pedagogy in practice. In addition to course work, students work closely with a cooperating teacher in a local school to observe and reflect, support instruction, and develop and facilitate lessons. *Prerequisite: THEA 320 , THEA 321 and permission of the instructor.*

THEA 331. Technical Costuming

3.00

Introduction to the technical aspects involved in building complete costume ensembles for the stage, screen and dance. Emphasis placed on experiencing unique problems in production situations, including specialized costume and accessory construction, ornamentation, fabric treatment, difficulties and alternatives in presenting historical clothing, and renovating and exploiting available materials. *Prerequisite: STAD 171 and THEA 206 or THEA 306, or permission of the instructor*

THEA 332. Costume and Fashion History

3.00

A survey of Western world costume from 4000 B.C. to the present as it reflects the sociocultural and socioeconomic aspects of

the times. Emphasis on the evaluation of historic costume and fashion in relation to architecture, sculpture, painting and other art forms.

THEA 333. Costume Design

3.00

The study of basic costume design techniques for performance. Emphasis on costuming in terms of the total production concept including directorial approach, setting and lighting design. Consideration of the process of costuming a production from first production meetings to opening.

THEA 336. History, Theory and Practice of Stage Makeup

3.00

Study of the history and practice of makeup for ceremonial and theatrical presentations of selected major cultures, from ancient Egypt to the present. Consideration given to makeup as a reflection of the social organization of each culture. Emphasis on makeup as an important element in the history of design aesthetics as well as a vital part of the performing arts.

THEA 347. Playwriting

3.00

Crosslisted with ENG 347

Study of the process of writing plays. Consideration of plot, character, thematic material, conflict and dramatic structure. Emphasis on individual writing assignments. *Prerequisite: Sophomore standing or permission of the instructor.*

THEA 351. Acting II: Intermediate Acting

3.00

Study of the fundamental theories and methods of acting. Emphasis on laboratory experience in the preparation of scenes. Consideration of various acting techniques through performance with maximum individual on-stage instruction. *Prerequisite: THEA 251 and sophomore standing.*

THEA 352. Music Theatre Performance for Theatre and Music Majors

3.00

Introductory course exploring the fundamentals of song analysis technique. Emphasis on solo song preparation. Basic music skills and singing ability are highly recommended. This course is designed for actors and singers who are just beginning to develop their musical theatre repertoire and their capacity to integrate singing and acting techniques. *Prerequisite: THEA 251 and a theatre (School of Theatre and Dance) major or music theatre (School of Music) concentration, or permission of the instructor.*

THEA 353. Music Theatre Performance

2.00

Introductory course exploring the fundamentals of song analysis technique in the preparation of music theatre repertory for performance. Emphasis on solo song preparation. Basic music skills and singing ability are highly recommended *Prerequisite: THEA 251 and THEA 253.*

THEA 354. Music Theatre Workshop

1.00

The preparation of musical theatre repertory for public performance. Emphasis on the application of the tools acquired in THEA 251, THEA 353, and other theatre, music, and dance skills classes. Students may participate as a performer, or as a member of the production/ artistic team. *Prerequisite: Admission is by audition/interview only*

THEA 355. Directing for the Theatre

3.00

Study of the principles, problems and techniques of play direction. Emphasis on historical and modern theories. Techniques of direction considered as applied to the stage and cinematography. *Prerequisite: THEA 211 THEA 251, Acting I: Basic Acting* THEA 211 and THEA 251.

THEA 357. Music Theatre History and Analysis

3.00

Crosslisted with MUS 357

Survey of musical theatre genres, composers, lyricists, performers, directors and choreographers in America from 1750 to present. Includes practical study of the format of the libretto and musical score in relationship to the major musical theatre genres. Consideration of how music theatre developed from and reflected the cultural, social, and political landscape of its time. *Prerequisite: Musical Theatre majors only or permission of the instructor.*

THEA 365. Dramaturgy

3.00

Study of the skills and techniques of the dramaturg, including strategies for production dramaturgy and new work dramaturgy of both theatre and dance. Emphasis on communication, adaptation, research and analysis. Consideration of best practices for the dramaturg's collaborations with directors, choreographers, playwrights, performers, designers and audience members. *Prerequisite: THEA 211 or permission of the instructor.*

THEA 371. Advanced Technical Theatre

3.00

Advanced study of the technical aspects of stage production. Emphasis upon contemporary scenographic techniques. Consideration of construction, decoration, rigging and touring problems in theatre production. *Prerequisite: THEA 271.*

THEA 372. Scene Painting

3.00

An introduction to the foundational techniques of scene painting, presented through a series of practical projects designed to provide students with the skills to achieve the core processes of scene painting.

THEA 373. Drafting for the Stage

3.00

An introduction to the foundational techniques of drafting for the stage, presented through a series of 8 practical drafting projects designed to provide students the skills to produce ground plans, elevations and sections in both pencil and CAD drafting environments.

THEA 374. Stage Lighting

3.00

Study and analysis of stage lighting. Consideration given to basic elements of electricity, electrical control and circuitry, reflection, refraction, and color. Emphasis on the lighting design and aesthetics of a theatrical production.

THEA 375. Sound Design

3.00

Study and analysis of the aural environment for theatre. Emphasis placed on sound design process and the methods and tools available to sound designers. Consideration given to the various mediums of sound design through in class projects.

THEA 376. Scene Design

3.00

Study and analysis of the visual elements of theatrical production. Emphasis on the principles and elements of design, drafting and rendering. Consideration of the aesthetics of stage design through specific applied projects.

THEA 382. Contemporary Theatre

3.00

Study of post-1968 world theatre with particular attention to English and American drama. Emphasis is placed on significant drama of the last twenty-five years with discussion of trends in theatrical production and dramatic writing in recent decades.

Prerequisite: THEA 211 or permission of the instructor.

THEA 390. Directed Projects

1.00 - 3.00

Supervised projects related to the study of theater. Credit given for original, individual or group programs beyond the usual course offerings in theater. A suitable completed project or report is required before credit can be awarded. *Prerequisite:*

Permission of the director.

THEA 441. Senior Seminar in Theatre

3.00

A capstone course during which students spend a semester researching and developing a project related to an area of study in the major. The course may also include portfolio development, career preparation, practices in the professional theatre and other theatre-related topics of interest. *Prerequisite: Theatre and musical theatre majors only and senior standing.*

THEA 442. Senior Seminar

1.00

A single semester seminar for students in the honors program to be taken concurrently with THEA 499C. Students spend the semester completing their honors thesis project. The course may also include portfolio development, career preparation, practices in the professional theatre and other theatre-related topics of interest. *Prerequisite: Theatre and musical theatre majors only and senior standing. Corequisite: THEA 499.*

THEA 447. Advanced Playwriting

3.00

Crosslisted with ENG 447

An advanced workshop with emphasis on developing full-length dramatic material. *Prerequisite: THEA 347 or ENG 347, and junior standing.*

THEA 449. London Theatre

3.00

Study of London theater. Consideration given to current productions of classic and contemporary works. Emphasis on production elements including acting, directing, design, writing and economic considerations. *Prerequisite: Semester-in-London students only.*

THEA 451. Meisner Technique Intensive

3.00

Intensive study and practice of the Meisner Technique. Emphasis on the foundational steps of the technique to develop advanced listening, imaginative, and interactive skills as a means for fostering effective habits for creative freedom and improvisational spontaneity. Practice in fully doing, truthful personal investment, and honest availability to oneself and a partner within heightened circumstances. *Prerequisite: THEA 351 .*

THEA 452. Acting III: Contemporary Scene Study

3.00

Study of advanced acting technique through the analysis, discussion, and presentation of contemporary scenes. Emphasis on developing tools to improve the pursuit of an intention, partnering, and moment-to-moment work. *Prerequisite: THEA 351 and junior standing.*

THEA 453. Acting IV: Approach to Heightened Language

3.00

Advanced study of script analysis and performance technique in multiple genres exploring heightened dramatic text. Exploration will be through individual and group assignments. Emphasis on practical tools including scansion, imagery work, and the translation of text into active physical choices. *Prerequisite: THEA 452.*

THEA 454. Advanced Music Theatre Performance

2.00

Continuation of the THEA 353 emphasizing more complex problems in music theatre performance including duets, trios, musical scenes. *Prerequisite: THEA 353.*

THEA 455. Auditioning for Musical Theatre

2.00

Advanced study of auditioning technique for professional musical theatre. Emphasis on developing appropriate musical theatre audition repertory. Unions, audition formats, performance opportunities, routes to a professional career, and agents and managers will also be covered. *Prerequisite: Musical theatre major, THEA 353 and THEA 454.*

THEA 460. Auditioning and Professional Issues

3.00

Study of advanced audition techniques for the stage. Emphasis on the selection, scoring, and performance of monologues.

Consideration of professional issues in regard to graduate-level study or professional work in performance. *Prerequisite: Theatre major performance concentrators and THEA 453.*

THEA 466. Media Performance

3.00

Study of the principles and techniques of dramatic performance for the camera and microphone. Emphasis on the adaptation of each student's performance and production skills to the recording and filming of narrative works. Consideration of the differing problems and potentials of stage, video and film presentations. *Prerequisite: THEA 452.*

THEA 471. Stage Management

3.00

Crosslisted with DANC 471

Study and analysis of stage management. Consideration given to the methods and strategies for successful stage management for theater, dance and other performances. Emphasis on developing management and organizational skills. *Prerequisite: STAD 171*

THEA 473. Advanced Design and Rendering

3.00

Advanced study in design for performance through theoretical production planning. Instruction in illustration and presentation methods necessary to communicate scenery, costume and lighting designs for performance. Emphasis is placed on the collaborative interaction between the production designers and the director or choreographer towards the creation of unified design. *Prerequisite: THEA 273 and one of the following: THEA 333, THEA 374, THEA 375 or THEA 376, or permission of the instructor.*

THEA 480. Student Teaching

3.00 - 12.00

Enables students to apply, in the public school classrooms and the comprehensive child development programs, those skills and attitudes acquired in all components of teacher education. Under the guidance of university supervisors, students are provided activities designed to familiarize them with the classroom teacher's role. *Prerequisite: PSYC 160 and EDUC 300 or EDUC 360, appropriate methods courses and permission of the coordinator of field experiences.*

THEA 481. Theory and Performance Studies

3.00

Twentieth and twenty-first century theories of theater and performance are studied and performance traditions outside of Europe are examined. *Prerequisite: THEA 211.*

THEA 485. American Theatre

3.00

Study and analysis of the American theatre experience as presented in the dramatic literature of the country. Emphasis on basic American themes. Consideration of plays, playwrights and performers significant to the development of American theatre. *Prerequisite: THEA 211 or permission of the instructor.*

THEA 488. Alternative Performance

3.00

Focus on key figures of the avant-garde and experimental theatre from the late 20th and early 21st centuries. Explores the motivations, concepts and creative techniques behind innovations in post-dramatic and devised theatre. As part of developing theoretical and historical understanding, students practice different methods of devising, collaborating and conceptualizing theatrical performance, culminating in an original presentation of student work.

THEA 490. Special Studies in Theatre

1.00 - 3.00

An independent study for students to pursue individual research under the guidance of a faculty adviser. Department consent required to enroll.

THEA 495. Internship Theatre

3.00 - 6.00

A faculty-arranged, prepared and monitored off-campus internship program designed to provide practical experience in theatre for students preparing for careers in those areas. Department consent required to enroll.

THEA 499. Honors in Theatre

1.00 - 3.00

Repeatable to a maximum of six credits. Offered fall and spring. Students enrolled for three credits are required to attend class meetings of THEA 441. Department consent required to enroll.

UNST 102. Career and Academic Planning

1.00

Crosslisted with UNST 102H

A course designed to prepare students for career and academic planning. Specific content includes accessing career and academic resources, career decision-making skills, and self awareness.

UNST 102H. Career and Academic Planning

1.00

Crosslisted with UNST 102

A course designed to prepare students for career and academic planning. Specific content includes accessing career and academic resources, career decision-making skills, and self awareness. *Prerequisite: Honors Students*

UNST 150. Global Learning and Living: Madison International

1.00

This course provides an opportunity for a diverse cohort of international and U.S. students to learn from and about each other through stimulating discussions, intercultural residence hall programs and the opportunity to participate in service learning. *Prerequisite: Participation in the Madison International Learning Community or permission of the instructor.*

UNST 151. Making Sense of Beliefs and Values: A Guided Tour for Global Citizens

3.00

This course explores the origin and nature of beliefs and values and how they are linked to actions, policies and practices around the world. These processes are examined through a range of big picture issues (e.g., religious, political, environmental, gender-based, cultural) that are relevant to all global citizens. Through dynamic speakers, discussions, readings, activities and lectures, this course helps students develop a deeper understanding of self, others and the larger world. *Prerequisite: Participation in the Madison International Learning Community*

UNST 190. Special Topics in University Studies

1.00 - 3.00

Special topics course with topics approached from a variety of academic perspectives. Designed for lower-level elective credit. *Prerequisite: Permission of the instructor.*

UNST 250. Alternative Break Leadership Training

2.00

A leadership training curriculum that covers a broad range of topics essential to leading an alternative break trip. This course incorporates service learning pedagogy. This will be accomplished through the use of affective and cognitive approaches. Personal growth as it relates to core concepts of leadership will be prominent. Emphasis is also placed on peer interaction, active participation, extensive reading, case work and a range of guest speakers. Attendance is required. *Prerequisite: Permission of the instructor.*

UNST 251. Alternative Break Leadership Practicum

1.00

Hands-on practicum of leadership strategies and techniques. Collaborative learning is enhanced when students apply what they learn in class by describing relevant lessons learned through experiences outside the classroom. The focus of this course is to provide students with the opportunity to lead in an observed setting and receive constant feedback and mentoring on their demonstrated leadership skills, critical reflection, inquiry, dialogue, and group interaction. *Prerequisite: UNST 250.*

UNST 307. Peer Education and Facilitation Studies

2.00

UNST 307 is a two-credit course designed to provide students with skills and knowledge to be effective peer educators. Students will receive health and identity content knowledge while increasing their group facilitation, presentation and processing skills.

UNST 389. Campus Health Communication

2.00

This course provides students an opportunity to learn about, create and communicate messages about health and wellness topics. Students develop the content produced in the campus publication Potty Mouth. Students develop skills in media literacy, self-directed learning and systems thinking, and they create media products. Through group discussion and interviews, students learn how to effectively communicate health behaviors to their peers.

UNST 390. Special Studies in University Studies

1.00 - 3.00

Designed to give students an opportunity to complete independent study and/or research under faculty supervision in university studies. *Prerequisite: Permission of the instructor*

UNST 398. Practicum in University Studies

1.00-3.00

Selected practicum experiences, which provide students with supervised practicum experiences. *Prerequisite: Permission of the instructor.*

UNST 475. Dollars and Sense

3.00

This practical course will review the affect a personal philosophy on money, and management of personal finances, has on all aspects of life when it comes to securing the American Dream. Students will learn real life skills in the areas of eliminating debt, creating a budget, understanding investments and insurance, saving money, planning for retirement, shopping for a house and other topics dealing with financial issues faced in daily life.

UNST 480. Internship Preparation, Participation and Professionalism

1.00-3.00

This course provides preparation, support during and reflection after internship experiences in a variety of disciplines. It will cover the internship experience, professionalism, networking and reflection. Open to all majors for elective credit. *Prerequisite: Permission of the instructor.*

UNST 490. Advanced Special Studies in University Studies

1.00 - 3.00

Exploration of a significant topic in depth. *Prerequisite: Permission of the instructor*

UNST 498. Internship in University Studies

1.00 - 6.00

The course allows students to receive academic credit for work experienced in an agency or organization related to university studies. *Prerequisite: Permission of the instructor.*

VOED 383. Curriculum & Instructional Procedures in Vocational Education

3.00

The study and development of techniques and methods to provide vocational education instruction to secondary school students. Competencies to be developed will include planning for instruction, applying different methodologies, and assessing student performance and progress. The relationship of vocational education to other curricular areas will also be addressed.

WGSS 200. Introduction to Women's, Gender and Sexuality Studies [C5SD]

3.00

Interdisciplinary introduction to theories and scholarship in Women's, Gender and Sexuality Studies. Examines the social construction of gender, how gender affects access to opportunity, and the experiences and contributions of women throughout history. Provides a foundation for subsequent work in the women's, gender, and sexuality studies minor.

WGSS 300. Special Topics in Women's, Gender and Sexuality Studies

3.00

Examination of selected topics of importance to the field of women's, gender and sexuality studies.

WGSS 301. Feminist Blogging: Writing for Shout Out! JMU

3.00

Crosslisted with SCOM 301

The goal of this course is to work in a feminist collective to write daily blog posts for the Shout Out! JMU blog. Students will organize the blog, research and write blog posts, publicize the blog, and create dialogue by commenting on one another's blog posts as a means of consciousness raising.

WGSS 302. Third Wave Ecofeminism

3.00

Crosslisted with SCOM 302

This course explores the historically strong association between women and nature, in which the image of Mother Earth is central, and critiques the power-as-domination assumption of our culture shown in the exploitation of women and of the earth itself. Religious, psychological, social, historical and scientific manifestations of this assumption will be examined, along with alternative models of power and responsibility. Students will explore the considerable research on ecofeminism.

WGSS 305. Theories and Methods in Women's, Gender and Sexuality Studies

3.00

This course introduces students to interdisciplinary theories and methods informing scholarship in women's, gender and sexuality studies.

WGSS 315. Transnational Feminisms

3.00

This multidisciplinary course explores the complex issues that women and LGBTQ communities encounter in non-Western regions of the world. May be focused regionally or topically drawing on multiple disciplinary perspectives.

WGSS 325. Gender and Violence

3.00

This course explores the public nature of private violence, specifically violence committed against women in U.S. culture. Students will investigate the social, political and personal meaning of violence within a gendered context. Throughout the course students will analyze the ways in which demographic, social, cultural, economic and political factors teach us to think about women in violent terms as well as help perpetuate violence against women. Students will consider violence not only in its physical dimension, but also in its symbolic and structural manifestations. Students will also examine the ways in which ideas about race, ethnicity, class and sexuality affect the degree and types of violence committed against women.

WGSS 337. Sociology of Gender

3.00

Crosslisted with SOCI 337

Examination of theories of sex role development, the roles of men and women in society and gender as a social construction.

WGSS 341. Gender and Justice

3.00

Crosslisted with JUST 341

This course is an interdisciplinary examination of the causes, structure and consequences of gender oppression. Consistent with the social justice track of the major, notions of fairness, justice, and equality with respect to gendered social, political and economic relations will be examined.

WGSS 347. Queer Theories of Gender and Inequality

3.00

Crosslisted with SOCI 347

Contemporary approaches to the culture and social structure of gender and gender binaries, as they intersect with power, knowledge, science/biology and inequality. Method involves examining and challenging the cultural classification systems that inform knowledge, human action and social institutions. Requires collegelevel reading, writing and intellectual engagement.

WGSS 348. Communication & Gender

3.00

Crosslisted with SCOM 348

Studies of theories and research regarding the influence of gender in various human communication contexts, both public and private. Emphasis on the critical analysis of existing theory and empirical research and the potential competent uses of communication for social change. *Prerequisite: SCOM 121, SCOM 122, or SCOM 123*

WGSS 350. The Philosophy of Feminism

3.00

Crosslisted with PHIL 350

An intermediate-level examination of philosophical problems in feminist theory and feminist contributions to philosophy.

WGSS 355. American Women At War

3.00

Crosslisted with MSCI 355

This course invites students to engage a series of issues about the role of women in the US military. This course will examine the contributions & experiences of women who served during the American Revolution, the U.S. Civil War, WW I & II, Korea, Vietnam and the Persian Gulf War(s). Also included in this course is an examination of how women in military service both past and present are an instrument for societal change in America specifically in promoting the cause of women's rights.

WGSS 367. Sociology of Sexuality

3.00

Crosslisted with SOCI 367

This course examines sociological theory and research on sexual behaviors, identities, cultures and social movements, investigating how sexuality is shaped by society and its social institutions. In addition, the course examines how sociological research on sexuality is conducted, how society shapes the sociological study of sexuality, the unique ethical concerns and

methodological challenges in researching sexuality and the place of sociology in shaping discourse and social policy on relevant social issues.

WGSS 368. Women's Literature

3.00

Crosslisted with ENG 368

A study of literature by women.

WGSS 369. Feminist Literary Theory

3.00

Crosslisted with ENG 369

An intensive study of a variety of feminist critical approaches and their applications to literature.

WGSS 370. Queer Literature

3.00

Crosslisted with ENG 370

An exploration of texts and issues in literature written by and about lesbian, gay, bisexual, transgender and queer writers, including critical and theoretical issues as well as questions of canon. Text studied may include fiction, poetry, drama, essays and memoirs written primarily, but not exclusively, in the 20th century.

WGSS 376. Anthropology of Reproduction

3.00

Crosslisted with ANTH 376

This course provides students with a critical and cross-cultural perspective on human reproduction. Examining how individuals draw on social and symbolic resources to sort out complicated private decisions, we will discuss how reproductive experiences are embedded in local, national and transnational politics. Topics covered may include: cross-cultural perspectives on childbearing and childlessness, kinship, and the globalization of new reproductive technologies such as in vitro fertilization. *Prerequisite: ANTH 195 or permission of the instructor.*

WGSS 383. Women and Politics in Comparative Perspective

3.00

Crosslisted with POSC 383

A study of the causes and consequences of women's political marginalization in the United States and abroad. The course examines socioeconomic and political dimensions of gender inequality, exploring how women have worked through social movements, electoral politics, and public policy initiatives to overcome obstacles to their political empowerment.

WGSS 400. Issues and Research in Women's, Gender and Sexuality Studies

3.00

The capstone seminar for the Women's, Gender and Sexuality Studies minor. Focuses on readings in feminist philosophy, history

and literature. Students will engage in research in critical issues affecting women's lives. *Prerequisite: WGSS 200 and nine additional credits approved by the Women's, Gender and Sexuality Studies Coordinator.*

WGSS 417. Women's Global Health and Human Rights

3.00

Crosslisted with HTH 417, NSG 417

An international and human rights approach providing an overview of health issues within the context of a woman's life cycle. Attention will be given to critical issues of women's health such as access to health care and gender based violence. Such issues as sexuality, nutrition, diseases affecting women, violence, harmful traditional practices, and sex trafficking will be discussed.

WGSS 420. Feminist Rhetorics

3.00

Crosslisted with SCOM 420, WRTC 420

Surveys key women figures in classical and contemporary rhetorical traditions and challenges the strategies used to historicize this tradition from feminist perspectives. Explores diverse feminist rhetorical discourses informed by race, sexual orientation, ethnicity and social class. *Prerequisite: WRTC 103 or equivalent and junior or senior standing, or permission of instructor.*

WGSS 423. Advanced Studies in Gender and Sexuality in Literature

3.00

Crosslisted with ENG 423

Advanced study of a topic using a gender and sexuality studies approach to literary texts. This course will explore how gender and sexuality and their representation in literature are shaped by social, cultural, historical, and political contexts. Course may be repeated as topic changes.

WGSS 466. Advanced Studies in Women's Literature

3.00

Crosslisted with ENG 466

Advanced study of women's literary achievements in several cultural and historical contexts. May be focused by theme. *Prerequisite: ENG 368/WGSS 368 or ENG 369/WGSS 369.*

WGSS 485. Gender Issues in Science

3.00

Crosslisted with ISAT 485

An interdisciplinary course that looks at the scientific process, science practitioners, and science students through the lens of gender analysis. Students read literature, lead discussions, perform experiments, and analyze both data and processes to address the effects of educational systems on the preparation and careers of scientists, the influence of politics and culture on scientific inquiry, and the effects of critiques grounded in gender analyses on understanding the scientific process.

WGSS 490. Special Studies in Women's, Gender and Sexuality Studies

3.00

Designed to give capable students in women's, gender and sexuality studies an opportunity to complete independent study under faculty supervision. *Prerequisite: Admission by recommendation of the instructor and permission of the program coordinator.*

WGSS 492. Internship in Women's, Gender and Sexuality Studies

1.00 - 3.00

Provides the student with practical experience in employing and refining women's, gender and sexuality studies concepts in a public or private agency, under faculty supervision.

WGSS 495. Special Topics in Women's, Gender and Sexuality Studies

3.00

In-depth examination of selected topics of current importance to the field of women's, gender and sexuality studies. Offered only with approval of the program coordinator and dean of the College of Arts and Letters. May be repeated for credit when course content changes. *Prerequisite: WGSS 200 or consent of instructor.*

WRTC 103. Rhetorical Reading and Writing [C1W]

3.00

Rhetorical Reading and Writing teaches students how to write effectively in situations they have not yet encountered. By practicing reading and writing as rhetorical activities, students learn how to explore and research topics; design writing for diverse audiences, purposes and occasions; and use feedback to improve their writing. WRTC 103 fulfills the General Education Cluster One writing requirement and is a prerequisite for all WRTC courses numbered 200 or above. May be used for general education credit. May not be used for major credit.

WRTC 200. Introduction to Studies in Writing, Rhetoric and Technical Communication

3.00

Initial core course and portal of entry into the School of Writing, Rhetoric and Technical Communication. Students will read and discuss foundational articles, undertake course projects and explore the roles that writers, rhetoricians and technical communicators are called upon to fill in their internships and jobs. *Prerequisite: WRTC 103 or equivalent.*

WRTC 201. Theory and Methods in Writing, Rhetoric and Technical Communication

3.00

Introduction to the theories and methodologies employed by practitioners in writing, rhetoric and technical communication. Emphasis is placed on methods of inquiry in the discipline. Primary topics include major theoretical perspectives and theorists; the relationship of research to disciplinary knowledge; and the dynamic nature of language and communication. *Prerequisite: WRTC 200 or permission of the instructor. Corequisite: WRTC 200.*

WRTC 300. Professional Editing

3.00

Introduction to the conceptual and technical editing of a wide range of documents for diverse audiences and different purposes. Consideration of genre, tone, style and syntax. Students will learn to interact with authors and clients and will practice both hard copy and electronic editing. Course topics allow students to encounter a wide range of editorial experiences to prepare them for the workplace. *Corequisite: WRTC 200 and WRTC 201 or permission of instructor*

WRTC 301. Language, Law and Ethics

3.00

Broad examination of the nexus of law, ethics and language. Exploration of a variety of genres in legal writing, providing a background in the role of law and ethics in society and helping students understand how language operates in the construction of legal and moral codes. Primary topics include intellectual property, privacy, legal issues in communication, the history of legal language and the ownership and ethical use of information. *Prerequisite: WRTC 200 and WRTC 201 or permission of instructor*

WRTC 310. Semiotics

3.00

Systematic approach to the production of meaning and interpretation with analytical examination of semiotic signs as aggregates of information management and communication. Complexity of meaning in communication conduits, speech, texts, images, symbols, codes, icons, media designs, gestures, music and objects are investigated. Also explored is the relationship between semiotic sign systems and ecosocial systems as they impact information management and production in society. *Prerequisite: WRTC 103 or equivalent.*

WRTC 312. Studies in Literacy

3.00

Advanced research and writing course designed to explore the important roles that literacy plays in society. Students will examine the concept of literacy through historical, political, sociological, educational and cross-cultural lenses. *Prerequisite: WRTC 103 or equivalent.*

WRTC 314. Writing in the Public Sphere

3.00

Introduction to the concept of the public sphere and an examination of a variety of texts and media that illustrate the function of the public sphere. Students apply theoretical knowledge to the analysis of public discourse and present their analyses in oral and written formats. Students gain important insights into their own roles and responsibilities as citizens within the public sphere and learn to use language effectively in multiple rhetorical situations. *Prerequisite: WRTC 103 or equivalent.*

WRTC 316. Research Methodologies in WRTC

3.00

Introduction to the process of conducting research grounded in inquiry. Students use a variety of research methodologies to gather information from secondary and primary sources. Students evaluate information for accuracy and usability and interpret information for the audience and rhetorical context they have defined. Students in this course design a research study, carry it out and write a subject appropriate report. *Prerequisite: WRTC 103 or equivalent.*

WRTC 318. Intercultural Professional Communication

3.00

Focus on the importance of culture to professional communication, both in print and online, by using an intercultural perspective to examine audience, purpose, persona, context, language, page and screen design, graphics and color. Includes a consideration of basic models of culture developed in professional environments, incorporating management, teamwork and translation issues, as well as how American culture differs from other cultures worldwide. *Prerequisite: WRTC 103 or equivalent.*

WRTC 326. Environmental Communication and Advocacy

3.00

Crosslisted with SCOM 354

An exploration of the multifaceted aspects of environmental controversies including the rhetoric, advocacy campaigns and decision-making processes that produce and attempt to manage environmental conflict. Emphasis on persuasive efforts by, interest groups, corporations, resource managers, government agencies, scientific experts, politicians and citizens to influence public understanding of environmental issues, adoption of sustainable behavior and lifestyles, and public policy outcomes.
Prerequisite: WRTC 103 or equivalent.

WRTC 328. Practicum

1.00 - 3.00, repeatable up to 6 credits

Allows students to engage in practical experience opportunities in the field of Writing, Rhetoric, and Technical Communication. Students may apply no more than 3 practicum credit hours toward completion of WRTC major or minor requirements.
Prerequisite: WRTC 103 or equivalent is the prerequisite.

WRTC 330. Rhetorical Analysis and Criticism

3.00

Survey and application of a range of rhetorical approaches to analyze print, oral, visual, and multimodal forms of everyday communicative practices. Primary topics include the origins of rhetoric, the manifestations of contemporary forms of communication, the rhetorical theories used to explain those forms, and the criticisms developed to respond to them.
Prerequisite: WRTC 200 and WRTC 201 or permission of instructor

WRTC 332. Creative Approaches to Digital Storytelling

3.00

This course introduces students to the history and methods of digital storytelling and provides them with the opportunity to critically evaluate a range of digital stories and to develop their own digital storytelling projects. Digital stories are narratives that are composed in digital environments using sound, audio, still images, video, and interactive elements like maps, charts and timelines. By the end of the course, students will be able to adapt digital storytelling techniques to suit a variety of genres and audiences. Throughout the course, students learn to assess digital storytelling artifacts, such as short video documentaries and mixed media narratives, and their usefulness for particular audiences and contexts. In addition to these digital composing techniques, students learn to assess and use a variety of online platforms where digital stories can be published, critique and improve their own and others' work, collaborate with others and create digital storytelling artifacts for clients.
Prerequisite: WRTC 200 and WRTC 201 or permission of instructor

WRTC 334. Introduction to Popular Writing

3.00

A theoretical and practical overview of the growing field of popular writing. Students will analyze a broad range of genres -- including reviews, commentaries, profiles, blogs, and ads -- from a broad range of publications, including newspapers, magazines, and the Web, with the goal of acquiring a critical understanding of the rhetorical aims and practices of popular writing.
Prerequisite: WRTC 200 and WRTC 201 or permission of instructor

WRTC 336. Writing Consultation

3.00

Integrates the theory and practice of writing consultation in academic and professional settings and is suited for developing tutors, teachers, consultants and editors. The course includes mentorship and practice in the University Writing Center, and it provides students opportunities to develop as writers, scholars and professionals. Upon completion of the course, students will be eligible for, but not guaranteed, employment in the University Writing Center.
Prerequisite: WRTC 103 and permission of the instructor.

WRTC 338. Genre Theory

3.00

Introduction to key concepts and principles of genre theory, specifically as taken up by scholars and practitioners of writing, rhetoric, and technical communication. Students will investigate both academic and nonacademic genres and explore different purposes for writing in a range of appropriate genres. *Prerequisite: WRTC 200 and WRTC 201 or permission of instructor*

WRTC 340. Writing as Leading

3.00

Investigation of contemporary leadership theories as they apply to writing; students will apply these principles and techniques to their own writing. The course will explore how writers lead readers and how leaders employ writing and use writers to influence their audiences. Students will gain experience writing in typical leadership genres, such as the position paper and the op-ed piece. *Prerequisite: WRTC 200 and WRTC 201 or permission of instructor*

WRTC 342. Writing Place

3.00

Examines the relationship between language and location by analyzing print and virtual rhetorics of the social and natural environment. Students will learn about the rhetorical tradition of place-centered expression and the importance of place in society. *Prerequisite: WRTC 200 and WRTC 201 or permission of instructor*

WRTC 344E. The Origins of Rhetoric

3.00

Survey of the origin and development of rhetorical theory as a product of the classical Mediterranean world, tracing its development through the Enlightenment in Europe. Major periods and thinkers will be studied with the goal of contextualizing theories that still heavily influence writing and technical communication practices today. Includes an emphasis on critical thought as a precursor to rhetorical praxis and how the classical past can inform modern authorship.

WRTC 350. Foundations of Technical Communication

3.00

Introduction to the major theories, issues, and contributors in the field of technical and scientific communication. Students explore global, print and electronic communication, ethical and legal issues, and the project cycle. They start with rhetorical analyses of audiences and progress through deliverables. Students learn to problem solve through a variety of technical communication projects and develop their career interests in chosen technical communication fields. *Prerequisite: WRTC 200 and WRTC 201 or permission of instructor.*

WRTC 351. Visual Rhetoric

3.00

Crosslisted with SCOM 351, WRTC 351L

A study of the rhetorical foundations of visual and verbal arguments in academic disciplines and popular culture. Students will analyze and produce visual and verbal arguments in a variety of rhetorical contexts. *Prerequisite: WRTC 103 & 100 Level SCOM*

WRTC 351L. Visual Rhetoric

3.00

Crosslisted with SCOM 351, WRTC 351

A study of the rhetorical foundations of visual and verbal arguments in academic disciplines and popular culture. Students will analyze and produce visual and verbal arguments in a variety of rhetorical contexts. *Prerequisite: WRTC 103 and 100 Level SCOM.*

WRTC 352. Online Design I

3.00

Introduction to the most recent versions of HTML/CSS coding and industry-standard programs for creating web-friendly images, both vector and pixel based. Students will become familiar with elementary JavaScript coding and responsive web design, and explore app-based possibilities. Assignments are project-based and lead to the creation of online deliverables for various purposes. Emphasis on electronic tools and portfolio projects to prepare students for careers in digital communication.

Prerequisite: WRTC 200 and WRTC 201 or permission of instructor

WRTC 354. Document Design

3.00

Examination of the principles of design and the importance of the project cycle in designing documents. Students use layout and graphics programs to create professional brochures, flyers, posters, newsletters, and manuals. Students work individually and collaboratively on their projects, producing excellent portfolio pieces. This course gives students flexibility for a wide variety of career opportunities in business and industry, the non-profit sector, and government. *Prerequisite: WRTC 300 or permission of instructor*

WRTC 356. Web Theory and Design

3.00

Introduction to Web design, emphasizing audience, purpose, structure, accessibility, content, and usability. Students analyze, create, and redesign effective websites and graphic pieces. They also learn how to create Web teams, negotiate contracts, and manage large-scale Web projects, adhering to copyright issues. They use industry accepted applications for Web and graphic design. Students in this course have the opportunity to develop several professional portfolio pieces. *Prerequisite: WRTC 200 and WRTC 201 or permission of instructor*

WRTC 358. Writing About Science and Technology

3.00

Focus on the development and application of rhetorical strategies and tools used in writing about science and technology for a contemporary, general audience. As citizen-interpreters, students analyze and produce writing designed to make even 'hard' science and technology accessible, with particular attention to narrative, to the framing of policy issues, and to establishing relevance. *Prerequisite: WRTC 200 and WRTC 201 or permission of instructor*

WRTC 360L. British Media and Society

3.00

Crosslisted with HUM 251L, SCOM 360L, SMAD 360L

Study the history, nature, and impact of mass media in the United Kingdom. Emphasis on the impact modern media has on society, and society has on media. Consideration of similarities and differences in mass media in the United States and Great Britain. Consideration of the relationship between mass media and the arts. Focus on 20th century mass media in London, one of the world's preeminent and most influential centers.

WRTC 400. Advanced Editing

3.00

Advanced Editing initiates students into the profession of editing. Content focuses on work with longer texts and real clients to introduce advanced editing skills and considerations such as document design, universal design, project management, production and freelancing. Students will learn how to initiate professional communication with clients, edit for users with diverse needs and work as part of an editing team. *Prerequisite: WRTC 300.*

WRTC 412. Content Strategy

3.00

Focused study of the theory and practice of building a content strategy applicable for a variety of organizations (business, nonprofit, government). Students will learn content strategy theories, perform case study analyses and apply their findings to the design of content strategies with specific organizations in mind. *Prerequisite: WRTC 200 and WRTC 201, or permission of instructor.*

WRTC 416. Rhetoric of Environmental Science and Technology

3.00

Crosslisted with SCOM 465

An advanced study of the way the public receives, makes sense of, and influences scientific and technical information about environmental issues. Implications of these processes on environmental policy will be analyzed. Readings and assignments will concentrate on the interactions between technical and public spheres of communication, with an in-depth examination of the way the media facilitates the transfer of information between scientific communities and public audiences. *Prerequisite: WRTC 103 or equivalent and junior or senior standing, or permission of instructor.*

WRTC 420. Feminist Rhetorics

3.00

Crosslisted with SCOM 420, WGSS 420

Surveys key women figures in classical and contemporary rhetorical traditions and challenges the strategies used to historicize this tradition from feminist perspectives. Explores diverse feminist rhetorical discourses informed by race, sexual orientation, ethnicity and social class. *Prerequisite: WRTC 103 or equivalent and junior or senior standing, or permission of instructor.*

WRTC 426. Special Topics in Writing, Rhetoric and Technical Communication

3.00

Focused, in-depth study of specific areas or subjects in writing, rhetoric, and technical communication. Topics may pertain to issues relevant to the discipline, to the study of particular theories and practices, or to the study of significant figures in the field. Seminars may be repeated for credit when course content changes. *Prerequisite: WRTC 103 or equivalent and junior/senior status, or permission of instructor*

WRTC 430. Contemporary Rhetorical Theory and Practice

3.00

Crosslisted with SCOM 343

Examines contemporary rhetorical theory and practice in relation to specific social, economic and technological changes in the 20th century, with particular emphasis on theoretical frameworks. Students learn about the changing needs of postmodern

communicators and how new rhetorical theories have developed to anticipate, respond to, and shape those changes. Also explored is the value of contemporary rhetorical theories for communicative and performative events. *Prerequisite: WRTC 200 and WRTC 201 or permission of instructor*

WRTC 432. Rhetoric of the Personal Narrative

3.00

Examination of the rhetorical elements of personal narrative. Students will read examples of personal narratives ranging from essays to longer memoirs and autobiographies, in order to examine questions related to purpose, audience, voice, and style. Discussion will include what makes a piece of writing personal, what makes it a narrative, and what makes it effective.

Prerequisite: WRTC 200 and WRTC 201 or permission of instructor

WRTC 434. Advanced Popular Writing

3.00

Advanced focus on a particular genre in popular writing, such as reviews, commentaries, opinion pieces, profiles, blogs, or ads. Students will engage with a specific genre to acquire both a critical understanding of its rhetorical aims and practices as well as the skills to practice writing within that genre. Students in this course have the opportunity to develop several professional portfolio pieces. *Prerequisite: WRTC 200 and WRTC 201 or permission of instructor*

WRTC 436. Teaching Writing

3.00

Introduces students to the major philosophies, theories, and pedagogies of teaching writing. Special attention is devoted to such practical matters as understanding and developing effective writing assignments, methods of responding to student texts-in-progress, and evaluating writing. *Prerequisite: WRTC 300 or permission of instructor.*

WRTC 447. Interaction Design

3.00

Crosslisted with ISAT 447

Study of and practice with processes, principles, tools, models, and techniques for designing interactions between humans and digital products and systems. Topics include physiological and psychological factors affecting interaction design, interaction design process, interaction models, styles, and paradigms, design notations and representations, prototyping, and interaction design evaluation. *Prerequisite: For WRTC majors: Junior standing only.*

WRTC 450. Digital Rhetoric

3.00

Introduces the rhetoric of digital design in a variety of contexts. Students learn what makes for effective static and interactive digital designs and practice analyzing and creating digital designs. Student will compose technical documents within diverse traditions, which include digital rhetoric, mixed media, and visual rhetoric. *Prerequisite: WRTC 200 and WRTC 201 or permission of instructor*

WRTC 452. Online Design II

3.00

Introduction to data basing and adding animation to a website. Students create interactive, professional websites that can include forms, animated buttons, searchable catalogs and splash pages. Students also have the opportunity to work with additional tools for developing creative portfolio pieces. *Prerequisite: WRTC 352 or permission of instructor.*

WRTC 454. Publication Management

3.00

Exploration of the publication production process that addresses the theory and practice of project management for professional print and electronic documents. Students work collaboratively to examine managerial and editorial responsibilities. Topics include defining editorial policy, defining management roles, working with project teams, creating document publication schedules, reviewing and editing submissions for publication and collaborating with authors. *Prerequisite: WRTC 300 or permission of instructor*

WRTC 456. Usability Testing

3.00

Theoretical and practical study of the product testing of documents and interfaces in a variety of media environments. Students design, plan, and conduct tests; code data from the tests; interpret the results, and write reports. Students also research and analyze various tests as they learn about the rhetorical aims of document and interface assessment. *Prerequisite: WRTC 200 and WRTC 201 or permission of instructor*

WRTC 458. Scientific and Medical Communication

3.00

Introduction to the context and use of language in scientific and medical disciplines. Emphasis is placed on understanding the rhetorical nature of scientific discourse. Primary topics include examining different forms of scientific and medical writing in traditional and digital contexts; the nature of communication within professional communities; and, composing texts for general readers. *Prerequisite: WRTC 200 and WRTC 201 or permission of instructor*

WRTC 460. Legal Writing

3.00

Study of the central components of legal writing and the language of law with an emphasis on the genres of the legal professions. Primary focus is on legal analysis, intellectual property and fair use, and the creation of genre-relevant documents, including memoranda, briefs and legal summaries.

Prerequisite: WRTC 300 and WRTC 301, or permission of the instructor.

WRTC 462. Government Writing

3.00

This course provides intensive practice in government genres or genres that occur at the intersection between governmental and political writing at the local and national levels. Democratic institutions create writing exigencies that require rhetorical intervention and technical knowledge, and this course offers writing practice in relevant genres, including news releases, consultant reports (i.e., feasibility studies), lobbyist communication and staff reports (i.e. monthly updates and annual reports). The authors of such genres include elected officials, appointed officials, citizen groups and individual citizens. Relevant issues include taxation, zoning, recycling, water treatment, sewer and wastewater treatment, environmental issues, transportation, and any other timely infrastructure or policy question. *Prerequisite: WRTC 300 and WRTC 301, or permission of instructor.*

WRTC 480. Writing for Business and Industry

3.00

Introduction to the communication and discourse practices of the business community through a community-based learning model. Emphasis is placed on working directly with a business organization. Primary topics include language and ethics in

business; the understanding of audience for business communication; and the creation of business documents, including proposals and business plans. *Prerequisite: WRTC 300 and WRTC 301 and WRTC 330 or WRTC 350, or permission of instructor.*

WRTC 484. Writing for Nonprofits

3.00

Introduction to the nonprofit sector through a community-based learning model. Emphasis is placed on working directly with a nonprofit agency in the local community. Primary topics include the role of the nonprofit in society, especially as an organization for change; creation of internal and public documents, including proposals, grants, and publicity materials; and the legal requirements for nonprofit status. *Prerequisite: WRTC 300 and WRTC 301 and either WRTC 330 or WRTC 350 or permission of instructor*

WRTC 486. Writing in the Community

3.00

Introduction to political and social engagement at the community level using multiple texts and a community-based learning model. Emphasis is placed on writing, reflection, and hands-on service projects with community agencies. Primary topics include an examination of the central role of rhetoric in citizenship, leadership, social justice and social change. *Prerequisite: WRTC 300 and WRTC 301 and either WRTC 330 or WRTC 350, or permission of instructor.*

WRTC 488. Writing in the Health Sciences

3.00

Introduction to the medical field through a community-based learning model. Emphasis is placed on communication within the medical field and the translation of medical language for lay audiences. Primary topics include the roles of the practitioner and audience in medical communication; power relationships among clinicians and patients; and the creation of medical documents, including reports, proposals and technical articles. *Prerequisite: WRTC 300 and WRTC 301 and either WRTC 330 or WRTC 350 or permission of instructor*

WRTC 490. Independent Study in Writing, Rhetoric and Technical Communication

3.00

Individualized projects in Writing, Rhetoric and Technical Communication. Available only to junior or senior majors, though exceptions may be made at the director's discretion. May be repeated with the director's approval when course content changes. *Prerequisite: WRTC 103 or equivalent and junior/senior status and permission of instructor*

WRTC 495. Internship in Writing, Rhetoric and Technical Communication

3.00

Allows students to incorporate field experience with WRTC course work through internships in government, business, industry, or education where they can observe communication processes and apply effective written, interpersonal and public communication skills. Students must complete an application process and be approved before receiving a permission number to enroll in the course (see Internship page on WRTC website for requirements and forms). *Prerequisite: WRTC 300, WRTC 301, Junior or Senior Standing, and permission of instructor.*

WRTC 496. Capstone in Writing, Rhetoric and Technical Communication

3.00

Capstone experience in which students reflect on their course work in the major with the aim of articulating how the major has broadened and deepened their understanding of the theories and practices of written communication and rhetoric as they apply to

academic and professional contexts; demonstrating how WRTC student learning objectives tie together to inform their academic and professional work; and articulating short-term and long-term career goals. Students participate in seminar-style discussions, compose a personal philosophy of writing/editing/design through analysis of the work they have created in the major, and create a professional digital portfolio containing their strongest work from WRTC courses, internships and professional positions that are most representative of their career goals.

Prerequisite: WRTC 495. Internship in Writing, Rhetoric and Technical Communication WRTC 200, WRTC 201, WRTC 300, WRTC 301 and senior standing, or permission of the instructor.

WRTC 499. Honors

1.00 - 6.00

Offered Fall and Spring. Year Course.

IND 200. Interdisciplinary Scholarship: Introduction to the Independent Scholars Major At Jmu

3.00

IND 200 is designed to introduce students to the Independent Scholars major, and to the concepts of interdisciplinary study. Students will explore interdisciplinary research in a range of contemporary areas of study, including scientific, environmental, political, social, and cultural perspectives. Students will also gain familiarity with the possibilities for individualized study at JMU. Successful completion of the course will involve the development of proposals for individualized curricula.

IND 300. Independent Scholars Workshop

1.00

IND 300 is a one-credit workshop course designed to provide students in the Independent Scholars major (ISM) with methodological competencies linked to major learning objectives across their curriculum, including independent research methods, preparing presentations, data visualization, research methods, working with teams, and enhancing intellectual creativity.

Prerequisite: IND 200

University Faculty

University Faculty

Jonathan R. Alger, President, Professor.

B.A., Swarthmore College; J.D., Harvard Law School.

Linwood H. Rose, President Emeritus, University Professor.

B.A., Virginia Polytechnic Institute and State University; M.S., University of Tennessee; Ed.D., University of Virginia.

Ana R. Abad-Jorge, Assistant Professor of Health Professions.

B.A., Rollins College; M.S., University of Florida; Ed.D., Walden University.

Emad Abdurasul, Visiting Assistant Professor of Mathematics and Statistics.

B.S., Al-Fatah University (Libya); M.S., Graduate Institute of Planning (Taiwan); M.S., Ph.D., Missouri University of Science and Technology.

Mohamed S. Aboutabl, Associate Professor of Computer Science.

B.S., M.S., University of Alexandria (Egypt); M.S. Ph.D., University of Maryland, College Park.

- Thomas R. Adajian**, Associate Professor of Philosophy.
B.S., University of Wisconsin, Madison; Ph.D., University of North Carolina at Chapel Hill.
- Andrea H. Adams**, Interim Associate Dean of Libraries, Assistant Professor, Libraries.
B.S., Virginia Polytechnic Institute and State University; M.Ed., James Madison University.
- Melinda J. Adams**, Associate Dean, College of Arts and Letters; Professor of Political Science.
B.A., Emory University; M.A., Ph.D., University of Wisconsin, Madison.
- Aderonke A. Adesanya**, Professor of Art History.
B.A., Obafemi Awolowo University (Nigeria); M.A., Ph.D., University of Ibadan (Nigeria).
- Yonathan Admassu**, Associate Professor of Geology and Environmental Science.
B.S., Addis Ababa University (Ethiopia); M.S., University of Akron; Ph.D., Kent State University.
- Jessica R. Adolino**, Professor of Political Science.
B.A., Fairfield University; Ph.D., The Ohio State University.
- Robert D. Aguirre**, Dean of the College of Arts and Letters; Professor of English.
B.A., University of California, Santa Barbara; Ph.D., Harvard University.
- Ehsan Ahmed**, Professor of Economics.
B.A., Punjab University, Lahore (Pakistan); M.A., Government College, Lahore (Pakistan); M.A., Roosevelt University; Ph.D., Michigan State University.
- Jeremy D. Akers**, Associate Professor of Health Professions.
B.S., Radford University; M.S., James Madison University; Ph.D., Virginia Polytechnic Institute and State University.
- Mohammad Ala-Uddin**, Lecturer of Communication Studies.
B.A., M.A., University of Dhaka (Bangladesh); M.A., Ohio University.
- Geary E. Albright**, Director of the John C. Wells Planetarium; Associate Professor of Physics and Astronomy.
B.A., Bates College; M.Ed., M.A., Ph.D., University of Virginia.
- Carlos Galvan Alemán**, Associate Professor of Communication Studies.
B.A., M.A., California State University, Fresno; Ph.D., The University of Iowa.
- Melissa Wood Alemán**, Professor of Communication Studies.
B.S., New York University; M.A., Ph.D., The University of Iowa.
- Ryan T. Alessi**, Assistant Professor of Media Arts and Design.
B.A., University of Ohio; M.F.A., Murray State University.
- Robert W. Alexander**, Associate Professor of Political Science.
B.S., Duke University; M.S., M.P.A., Indiana University; Ph.D., Syracuse University.
- Shelley Aley**, Associate Professor of Writing, Rhetoric and Technical Communication.
B.S.Ed., M.A., Southwest Missouri State University; Ph.D., Texas Christian University.
- Cynthia J. Allen**, Instructor of Writing, Rhetoric and Technical Communication.
B.A., University of North Carolina at Pembroke; M.A., James Madison University.
- Dannette Allen Bronaugh**, Interim Academic Unit Head, Department of Educational Foundations and Exceptionalities; Associate Professor of Educational Foundations and Exceptionalities.
B.A., University of Vermont; M.S., Massachusetts General Institute of Health Professions. Ph.D., George Mason University; CCC-SLP.
- John M. Allemeier**, Director of the School of Music; Professor of Music.
B.M., Augustana College; M.M., Northwestern University; Ph.D., University of Iowa.
- Lauren K. Alleyne**, Assistant Director, Furious Flower Poetry Center; Associate Professor of English.
B.A., St. Francis College (New York); M.A., Iowa State University; M.F.A., Cornell University.
- John T. Almarode**, Associate Professor of Early, Elementary and Reading Education.
B.S., Bridgewater College; M.A.T., Mary Baldwin College; Ph.D., University of Virginia.
- Jennifer M. Almjeld**, Associate Professor of Writing, Rhetoric and Technical Communication.
B.A., M.A., Eastern Kentucky University; Ph.D., Bowling Green State University.
- Karim Altaii**, Professor of Integrated Science and Technology.
B.S., University of Baghdad; M.E., M.Phil., Ph.D., The City College of the City University of New York.
- Melissa A. Altman**, Visiting Assistant Professor of Mathematics and Statistics.
B.A., M.A., Bowling Green State University; Ph.D., James Madison University.
- Herbert K. Amato**, Associate Vice Provost, University Programs; Professor of Health Professions.
B.S., West Virginia University; M.S.Ed., James Madison University; D.A., Middle Tennessee State University.

- Donna S. Amenta**, Professor of Chemistry and Biochemistry.
B.S., Wheaton College (Massachusetts); M.A., Ph.D., Bryn Mawr College.
- Neel N. Amin**, Assistant Professor of History.
Ph.D., University of California, Davis.
- Emeka A. Anaza**, Associate Professor of Sport and Recreation Management.
B.S., Southern Illinois University Carbondale; M.S., Southern Illinois University Carbondale; Ph.D., University of Illinois at Urbana-Champaign.
- Robin D. Anderson**, Head, Department of Graduate Psychology; Professor of Psychology.
B.A., The College of William & Mary; M.A., Psy.D., James Madison University.
- Steven D. Anderson**, Ruth D. Bridgeforth Professor of Telecommunications; Professor of Media Arts and Design.
B.A., St. Cloud State University; M.A., Ph.D., University of Denver.
- Jeffrey T. Andre**, Professor of Psychology.
B.A., Muhlenberg College; M.S., Ph.D., Pennsylvania State University.
- Sandra Annan**, Associate Professor of Nursing.
B.A., B.S.N., West Virginia University; M.S.N., Ph.D., University of Virginia.
- Pia A. Antolic-Piper**, Assistant Professor of Philosophy.
M.A., Ph.D., Goethe University (Frankfurt, Germany).
- Pedro R. Aponte**, Associate Professor of Music.
B.M., Instituto Universitario de Estudios Musicales (Caracas, Venezuela); M.M., James Madison University; M.A., Ph.D., University of Pittsburgh.
- Kevin J. Apple**, Associate Dean, College of Health and Behavioral Studies; Professor of Psychology.
B.A., M.S., Ph.D., Ohio University.
- Kate M. Arcchi**, Interim Director, School of Theatre and Dance; Associate Professor of Musical Theatre.
B.F.A., Syracuse University; M.F.A., Pennsylvania State University.
- Christine A. Argenbright**, Associate Professor of Nursing.
B.S.N., Ph.D., University of Arizona.
- Elizabeth M. Armstrong**, Lecturer of Communication Studies.
B.S., M.A., Ph.D., Andrews University.
- Kirk J. Armstrong**, Head, Department of Health Professions; Professor of Health Professions.
B.S., University of Indianapolis; M.S., Middle Tennessee State University; Ed.D., Ball State University.
- J. Chris Arndt**, Associate Dean, College of Arts and Letters; Professor of History.
B.A., Gettysburg College; M.A., Auburn University; Ph.D., Florida State University.
- Elizabeth A. Arnold**, Associate Professor of Mathematics and Statistics.
B.A., Georgetown University; M.Ed., George Mason University; Ph.D., University of Maryland, College Park.
- Gizem Atav**, Assistant Professor of Marketing.
B.S., Joint Bogazici (Bosphorus) University and State University of New York at Binghamton; M.B.A., Ph.D., State University of New York at Binghamton.
- Yekta Atef Yekta**, Assistant Professor of Computer Information Systems.
B.S., Tehran Polytechnic University (Tehran, Iran); M.S., (Sharif University of Technology (Tehran, Iran); Ph.D., University of Connecticut.
- Laura C. Atkins**, Instructor of Computer Information Systems and Business Analytics.
B.B.A., M.B.A., James Madison University.
- Cynthia F. Atkinson**, Instructor of Nursing
B.S.N., Eastern Mennonite University; M.S.N., D.N.P., James Madison University.
- Kelly C. Atwood**, Assistant Professor of Graduate Psychology.
Psy.D., James Madison University.
- Pye Physo Aung**, Visiting Assistant Professor of Mathematics and Statistics.
B.A., Concordia College at Moorhead; M.Sc., Johns Hopkins University; Ph.D., North Dakota State University.
- David J. Babcock**, Associate Professor of English.
B.A., University of Illinois at Urbana-Champaign; M.A., Ph.D., Brown University.
- Sharon K. Babcock**, Director, Pre-professional Health Advising; Associate Professor of Biology.
B.S., University of Oklahoma; Ph.D., Duke University.
- Ashleigh E. Baber Gardner**, Associate Professor of Chemistry and Biochemistry.
B.S., Randolph-Macon Woman's College; Ph.D., Tufts University.

- Dmytro Babik**, Assistant Professor of Computer Information Systems and Business Analytics.
M.A., Charles University, M.B.A., Tulane University, Ph.D., University of North Carolina at Greensboro.
- Christopher G. Bachmann**, Professor of Integrated Science and Technology.
B.S., Rutgers the State University of New Jersey; M.S., Pennsylvania State University; Ph.D., University of Virginia.
- Josh Bacon**, Dean of Students.
B.A., M.Ed., Salisbury University; Ph.D. Clemson University
- Steven J. Baedke**, Professor of Geology and Environmental Science.
B.S., University of Northern Iowa; M.S., Ph.D., Indiana University.
- Chelsey Bahlmann Bollinger**, Assistant Professor of Early, Elementary and Reading Education.
B.S., M.S., PhD. University of Georgia.
- Charles D. Bailey**, Jackson E. Ramsey Centennial Chair in Business; Professor of Accounting.
B.B.A., MBA, M.P.A., Ph.D., Georgia State University.
- Sonya G. Baker**, Professor of Music.
B.A., Yale University; M.M., Indiana University; Ph.D., Florida State University.
- Suzanne C. Baker**, Assistant Head, Department of Psychology; Professor of Psychology.
A.B., Davidson College; M.S., Ph.D., University of Georgia.
- Tim C. Ball**, Associate Professor of Communication Studies.
B.A., Iowa State University; M.S., Eastern Washington University; Ph.D., Washington State University.
- Stephanie L. Baller**, Associate Professor of Health Sciences.
B.A., Northwest University; M.S., Seattle Pacific University; Ph.D., University of Alabama.
- Miguel B. Baltazar**, Lecturer of Hospitality Management.
B.S., Universidade Internacional; M.B.A., Cornell University School of Hotel Administration.
- Deborah L. Bandalos**, Professor of Graduate Psychology.
B.A., American University; M.A., Ph.D., University of Maryland.
- Dabney Bankert**, Head, Department of English; Professor of English.
B.A., Michigan State; M.A., Western Washington University; Ph.D., University of Illinois at Urbana-Champaign.
- L. Adriana Banu**, Associate Professor of Physics and Astronomy.
B.S., University of Bucharest (Romania); Ph.D., University of Mainz (Germany).
- Yu Bao**, Assistant Professor of Graduate Psychology.
B.S., M.S., Beijing Normal University (China); Ph.D., The University of Georgia.
- Susan N. Barber**, Professor of Music.
B.M. Crane School of Music, State University of New York, Potsdam; M.M., The Juilliard School; D.M.A., Louisiana State University.
- Andrew D. Barnes**, Lecturer of Communication Studies.
B.A., Clarion University of Pennsylvania; M.A., Wake Forest University; Ph.D., Georgia State University.
- Audrey L. Barnes**, Associate Professor of Industrial Design.
B.I.D., North Carolina State University; M.I.D., Rhode Island School of Design.
- José Ignacio Barrio Olano**, Professor of Foreign Languages, Literatures and Cultures.
B.A., University of Deusto (Spain); M.A., M.Phil., Ph.D., Columbia University.
- Kenneth E. Barron**, Professor of Psychology.
B.A., Bucknell University; Ph.D., University of Wisconsin, Madison.
- Ichha Basnyat**, Assistant Professor of Communication Studies.
B.A., University of Utah; MPH, University of Massachusetts at Amherst; Ph.D., Purdue University.
- Cynthia Bauerle**, Interim Vice Provost for Faculty and Curriculum; Professor of Biology.
B.A., University of Virginia; Ph.D., University of Wisconsin, Madison.
- Emily Erin Becher-McKeever**, Associate Professor of Theatre.
B.A., University of Memphis; M.F.A., The University of Arizona, Tucson.
- Dennis C. Beck**, Cluster Two Coordinator; Professor of Theatre.
B.A., University of Colorado; M.A., University of Colorado Boulder; Ph.D., University of Texas at Austin.
- Scott E. Beckler**, Clinical Lecturer of Nursing.
B.S., M.S.N., Eastern Mennonite University.
- Daniel J. Beers**, Assistant Professor of Justice Studies.
B.S., Northwestern University; Ph.D., Indiana University.

- Terry D. Beitzel**, Professor of Justice Studies.
B.S., Frostburg State University; M.A., Harvard University; Ph.D., George Mason University.
- Mace L. Bentley**, Professor of Integrated Science and Technology.
B.A., B.S., Northern Kentucky University; M.A., University of Nebraska-Lincoln; Ph.D., University of Georgia.
- Morgan C. Benton**, Associate Professor of Integrated Science and Technology.
B.A., University of Richmond; M.S., Ph.D., New Jersey Institute of Technology.
- Thomas R. Benzing**, Professor of Integrated Science and Technology.
B.A., Franklin and Marshall College; M.S., University of Pittsburgh; Ph.D., Michigan State University.
- Christopher E. Berndsen**, Associate Professor of Chemistry and Biochemistry.
B.S., Roanoke College; Ph.D., University of Wisconsin-Madison School of Medicine.
- David H. Bernstein**, Professor of Computer Science.
B.A., State University of New York at Binghamton; M.P.A., Princeton University; Ph.D., University of Pennsylvania.
- Luis Betancourt**, BDO Faculty Scholar; Professor of Accounting.
B.S., Salisbury State University; M.B.A., University of Maryland, College Park; Ph.D., University of Central Florida.
- Cheryl L. Beverly**, Professor of Learning, Technology and Leadership Education.
B.A., University of South Florida; M.Ed., University of Georgia; Ph.D., University of Florida.
- Foster J. Beyers**, Assistant Professor of Music.
B.M.E., University of Wisconsin-Eau Claire; M.M., Northwestern University; D.M. (ABD), University of Minnesota.
- Vipul Bhatt**, Associate Professor of Economics.
B.A., University of Delhi; M.A., Delhi School of Economics; M.A., Ph.D., The Ohio State University.
- Amanda Glenn Biesecker**, Assistant Head, School of Integrated Sciences; Professor of Integrated Science and Technology.
B.A., Dartmouth College; Ph.D., Emory University.
- Amy E. Birdsong**, Assistant Director of Bands, Director of Pep Band.
B.M., James Madison University; M.M., Virginia Commonwealth University.
- James M. Bishop**, Assistant Professor of Health Sciences.
B.E.S.S., M.Ed., Texas State University; Ph.D., University of Cincinnati.
- Sarah R. Blackstone**, Assistant Professor of Health Sciences.
B.Phil., University of Pittsburgh; M.P.H., Northern Illinois University; Ph.D., University of Illinois Urbana-Champaign.
- Charles H. Blake II**, Professor of Political Science.
A.B., Davidson College; M.A., Ph.D., Duke University.
- Benjamin T. Blankenship**, Assistant Professor of Psychology.
B.S., Arizona State University; M.S., Ph.D., The University of Michigan.
- Dennis B. Blanton**, Associate Professor of Anthropology.
B.A., University of Georgia; M.A., Brown University; Ph.D., University of Virginia.
- Sharon L. Blatz**, Associate Professor of Educational Foundations and Exceptionalities.
B.A., M.Ed., Florida Atlantic University; Ph.D., University of Florida.
- Timothy A. Bloss**, Associate Professor of Biology.
B.A., Carleton College; Ph.D., University of Wisconsin, Madison.
- Laura D. Blosser**, Instructor of Health Sciences; Academic Adviser, University Advising.
B.S., M.S., James Madison University.
- Daniel E. Blumling**, Lecturer of Chemistry and Biochemistry.
B.S., University of Mary Washington; Ph.D., The Pennsylvania State University.
- Brycelyn M. Boardman**, Interim Assistant Dean, College of Science and Mathematics; Associate Professor of Chemistry and Biochemistry.
B.S., James Madison University; Ph.D., University of California, Santa Barbara.
- Alison Bodkin**, Associate Professor of Communication Studies.
B.A., Bradley University; M.A., Miami University of Ohio; Ph.D., Southern Illinois University, Carbondale.
- Aaron T. Bodle**, Associate Professor of Early, Elementary and Reading Education.
B.S., M.S., Indiana University; Ph.D., Michigan State University.
- Steven P. Bolstad**, Professor of Music.
B.S., Clarion University; M.M., Ithaca College; D.M.A., University of Texas.
- Charles Bolyard**, Head, Department of Philosophy and Religion; Professor of Philosophy.
B.A., University of North Carolina at Chapel Hill; M.A., Ph.D., Indiana University.

- Dudley B. Bonsal**, Assistant Professor of Integrated Science and Technology.
B.A., Tufts University; M.A., The Ohio University; Ph.D., University of Minnesota.
- Kevin L. Borg**, Professor of History.
B.A., University of California, Riverside; M.A., Ph.D., University of Delaware.
- Zachary J. Bortolot**, Professor of Integrated Science and Technology.
Sc.B., Brown University; M. Sc., University of British Columbia; Ph.D., Virginia Polytechnic Institute and State University.
- Carmen Ruth Bosch**, Associate Professor of Educational Foundations and Exceptionalities.
B.A., University of Detroit; M.A., University of Detroit – Mercy; Ph.D., Wayne State University.
- Alyssa T. Bosley**, Lecturer of Sport and Recreation Management.
B.A., University of Connecticut; M.S., James Madison University.
- John C. Bowers**, Assistant Professor of Computer Science.
B.S., Florida State University; M.S., Ph.D., University of Massachusetts Amherst.
- Rebecca N. Brannon**, Associate Professor of History.
B.A., Amherst College; M.A., Ph.D., University of Michigan.
- Edward J. Brantmeier**, Professor of Learning, Technology and Leadership Education.
B.A., University of Wisconsin; M. S., Ph.D., Indiana University Bloomington.
- Noorjehan K. Brantmeier**, Associate Professor of Learning, Technology and Leadership Education.
B.S.W., Indiana University; M.S.W., Washington University in St. Louis; Ph.D., Colorado State University.
- Daisy L. Breneman**, Academic Adviser and Lecturer of Justice Studies, University Advising.
B.A., Mary Washington College; M.A., James Madison University.
- Jacob Brent**, Assistant Professor of Theatre and Dance, Musical Theatre.
B.A., M.F.A., San Diego State University
- Robert N. Brent**, Professor of Integrated Science and Technology.
M. S., Ph.D., University of Illinois.
- Benjamin D. Brewer**, Professor of Sociology.
B.A., University of California, Santa Cruz; M.A., Ph.D., Johns Hopkins University.
- JoAnne A. Brewster**, Professor of Graduate Psychology.
B.A., State University of New York at Buffalo; Ph.D., McMaster University.
- John W. Briggs**, RSM Faculty Scholar; Associate Professor of Accounting.
B.S., The College of William & Mary; M.Acc., Ph.D., Virginia Polytechnic Institute and State University.
- Matthew P. Brigham**, Associate Professor of Communication Studies.
B.A., M.A., Baylor University; Ph.D., University of Pittsburgh.
- Nicholas G. Brinen**, Assistant Professor of Architectural Design.
BDes, University of Florida; M. Arch., University of Texas at Austin.
- Lori L. Britt**, Associate Professor of Communication Studies.
B.A., Bloomsburg University of Pennsylvania; M.A., University of North Carolina, Greensboro; Ph.D., University of Colorado.
- Michael L. Broderick**, Assistant Professor of Communication Studies.
B.S.S., M.A., Ph.D., Ohio University.
- Sarah T. Brooks**, Cluster One Coordinator; Professor of Art History.
B.A., Dartmouth College; M.A., Ph.D., Institute of Fine Arts, New York University.
- Andreas Broscheid**, Professor of Political Science.
M.A., Ph.D., State University of New York at Stony Brook.
- Catherine A. Brown**, Instructor of Nursing.
B.S.N., Eastern Mennonite University; M.S.N., Jefferson College of Health Sciences.
- Elizabeth T. Brown**, Cluster 3 Coordinator; Associate Professor of Mathematics and Statistics.
B.A., University of California, Santa Cruz; M.A., (Philosophy), M.A. (Mathematics), Ph.D., Boston University.
- Gregory H. Brown**, Head, Web & Application Services, Assistant Professor, Libraries.
B.S., M.P.A., James Madison University.
- Justin W. Brown**, Associate Professor of Biology.
B.S., Eastern Mennonite University; Ph.D., East Carolina University.
- Molly G. Brown**, Associate Dean for Undergraduate Programs, College of Business; Lecturer of Accounting.
B.S., M.S.A., James Madison University.
- Robert Brown**, Professor of Religion.
B.S., Northern Illinois University; M.Div., Trinity Divinity School; M.A., Indiana University; Ph.D., The University of Iowa.

- Tiara S. Brown**, Assistant Professor of Educational Foundations and Exceptionalities.
B.S., Virginia Polytechnic Institute and State University; M.S., Florida State University; M.A.T., Mary Baldwin College; Ph.D., University of Virginia.
- Espey "Ted" Browning, Jr.**, Lecturer of Accounting.
B.S., M.S., University of Maryland.
- B.J. Bryson**, Professor of Social Work.
B.S.W., University of North Carolina at Greensboro; M.S.W., University of Georgia; Ph.D., University of Washington – Seattle.
- Bethany P. Bryson**, Professor of Sociology.
B.S., James Madison University; Ph.D., Princeton University.
- Peter K. Bsumek**, Professor of Communication Studies.
B.S., University of Utah; M.A., Ph.D., University of Pittsburgh.
- Holly A. Buchanan**, Assistant Professor of Nursing.
B.S., M.S., Virginia Commonwealth University; D.N.P., University of Virginia.
- Florian P. Buchholz**, Associate Professor of Computer Science.
Diplom Informatik, Technische Universität Braunschweig (Germany); M.S., Ph.D., Purdue University.
- Liam M. Buckley**, Head, Department of Sociology and Anthropology; Professor of Anthropology.
B.A., University of Essex; M.A., University of New Mexico; M.A., Ph.D., University of Virginia.
- John G. Burgess**, Interim Dean of the Graduate School.
B.S., James Madison University; M.F.A., The University of Arizona, Tucson.
- Audrey J. Burnett**, Associate Professor of Health Sciences.
B.S., Worcester State College; M.S., Ph.D., Virginia Polytechnic Institute and State University.
- Larry W. Burton**, Professor of Writing, Rhetoric and Technical Communication.
B.A., M.A., M.Ed., Ph.D., University of Virginia.
- Richard P. Busi**, Assistant Professor of Mathematics and Statistics.
B.S., M.Ed., Slippery Rock University of Pennsylvania; Ph.D., University of Florida.
- Michael E. Busing**, Dean, College of Business; Betty Coe ('64) & Paul J. Cinquegrana Endowed Chair in Business Ethics & Leadership;
Professor of Computer Information Systems and Business Analytics.
B.S., Purdue University; M.S., Ball State University; Ph.D., Clemson University.
- Harold M. Butner**, Associate Professor of Physics and Astronomy.
B.S., Rensselaer Polytechnic Institute; Ph.D., University of Texas at Austin.
- John J. Butt**, Professor of History.
A.B., Ph.D., Rutgers the State University of New Jersey; B.Phil., University of St. Andrews (Scotland).
- Jennifer E. Byrne**, Professor of Political Science.
B.A., University of Georgia; M.A., Ph.D., The University of Arizona, Tucson.
- James Bywater**, Assistant Professor of Learning, Technology and Leadership Education.
B.A., MPhys, University of Oxford; M.A., Canterbury Christ Church University College; Ph.D., University of Virginia.
- Bryan A. Cage**, Assistant Professor of Biology.
B.S., M.S., University of Louisiana at Monroe; Ph.D., University of Mississippi.
- Jamie M. Calcagno-Roach**, Head, Programming and Planning; Senior Instructional Designer; Associate Professor, Libraries.
B.S., M.S.Ed, James Madison University.
- David Campora**, Instructor of Foreign Languages, Literatures and Cultures.
B.A., University of Roma "Tor Vergata" (Italy); M.A. University of Roma "La Sapienza" (Italy).
- Mary Beth Cancienne Acgthlu**, Professor of Middle, Secondary, and Mathematics Education.
B.A., M.Ed., Louisiana State University; Ph.D., University of Virginia.
- Casey R. Cangelosi**, Assistant Professor of Music.
B.M., Utah State University; M.M., The Boston Conservatory, M.M., Rice University.
- Laura Cangiano**, Lecturer of Foreign Languages, Literatures and Cultures.
B.A., Ca' Foscari University of Venice (Italy); M.A., University of Padova (Italy).
- Luke W. Capizzo**, Assistant Professor of Communication Studies.
B.A., Michigan State University; M.A., Ph. D., University of Maryland.
- Kevin L. Caran**, Professor of Chemistry and Biochemistry.
B.A., Colgate University; Ph.D., Emory University.

- Eric M. Carbaugh**, Professor of Middle, Secondary, and Mathematics Education.
B.A., Ph.D., University of Virginia; M.Ed., Mary Washington College.
- Giulia Cardillo**, Assistant Professor of Foreign Languages, Literatures, and Cultures.
M.A., University of Notre Dame; Ph.D., Yale University.
- Lisa J. Carmines**, Instructor of Nursing.
B.S.N., College of Mount Saint Vincent; M.S.N., Old Dominion University;
- David C. Carothers**, Professor, Department of Mathematics and Statistics.
B.S., Westminster College; M.S., Ph.D., Purdue University.
- Benjamin H. Carr**, Associate Professor of Sport and Recreation Management.
B.S., James Madison University; J.D., George Mason University.
- Julia Wallace Carr**, Senior Associate Director, University Recreation; Professor of Sport and Recreation Management.
B.S.P.E., West Virginia University; M.S.P.E., James Madison University; Ed.D., George Washington University.
- Howard S. Carrier**, Assistant Professor, Social Sciences & Copyright Librarian, Libraries.
M.L.S., University of North Carolina, Chapel Hill.
- Christopher J. Carrillo**, Professor of Music.
B.M., University of Memphis; M.M., D.M.A., University of Texas at Austin.
- Arlene R. Casiple**, Instructor of Mathematics and Statistics.
B.S., University of the Philippines (Philippines); M.S. University of Florida; M.P.H., University of Miami.
- Amanda N. Cass**, Visiting Assistant Professor of Biology.
B.S., Mount Holyoke College; Ph.D., Cornell University.
- Daniel I. Castaneda**, Assistant Professor of Engineering.
B.S., University of California, Berkeley; M.S.C.E., Ph.D., University of Illinois at Urbana-Champaign.
- Katey M. Castellano**, Professor of English.
B.A., Lebanon Valley College; M.A., Bucknell University; Ph.D., Duke University.
- Taimi L. Castle**, Professor of Justice Studies.
B.A., M.A., Morehead State University; Ph.D., Indiana University of Pennsylvania.
- Elisabeth K. Castro**, Lecturer of Foreign Languages, Literatures and Cultures.
B.A., Old Dominion University; M.A., Bowling Green State University.
- Erica K. Bleeg Cavanagh**, Associate Professor of English.
B.A., James Madison University; M.A., University of Chicago; Ph.D., The University of Iowa.
- David E. Cavazos**, Associate Professor of Management.
B.A., M.P.A., Ph.D., Texas Tech University.
- Nevin Cavusoglu**, Associate Professor of Economics; Associate Professor of International Business.
B.S., M.S., Middle East Technical University (Turkey); M.A., Ph.D., University of New Hampshire.
- Sandra J. Cereola**, Johnson, Lambert & Company Faculty Scholar; Associate Professor of Accounting.
B.S., Southern New Hampshire; M.B.A., James Madison University; Ph.D., Virginia Commonwealth University.
- Yamilette D. Chacon**, Lecturer of Sociology.
A.A., El Camino College (Torrance, CA); B.A., Winthrop University (Rock Hill, SC); M.A.,
Ph.D., University of South Carolina.
- Matthew A. Chamberlin**, Director, Independent Scholars.
B.A., Mary Washington College; M.A., Binghamton University; Ph.D., Arizona State University.
- Beth E. Chandler**, Professor of Music.
B.M., Baylor University; Fulbright Scholar, United Kingdom; M.M., New England Conservatory of Music; D.M.A., University
of Cincinnati College – Conservatory of Music.
- Stephen Chappell**, Associate Professor of History.
B.A., Ph.D., University of California, Los Angeles; M.A., University of California, Santa Barbara.
- Brian J. Charette**, Special Assistant to the President for Strategic Planning & Engagement.
B.A., M.A., Eastern Mennonite University; Ed.D., Nova Southeastern University.
- Jie Chen**, Professor of Political Science.
B.A., Institute of International Politics (China); M.A., Monterey Institute of International Studies; Ph.D., Washington State
University.
- Lihua Chen**, Associate Professor of Mathematics and Statistics.
B.S., M.S., Beijing University; M.S., Ph.D., Iowa State University.

- D. Tony Chen**, Professor of Integrated Science and Technology.
B.S., Chung Yuan Christian University; M.S., The University of Iowa; Ph.D., Old Dominion University.
- Elizabeth T. Chenevey**, Assistant Professor, Psychology Librarian, Libraries.
B.A., James Madison University; M.S., University of Kentucky.
- Lauren E. Childers**, Instructor of Nursing.
B.S.N., Franciscan University of Steubenville; M.S.N., Old Dominion University.
- Sukjin Choi**, Professor of Art.
B.F.A., M.F.A., Ewha Womans University (Korea); M.F.A., Cranbrook Academy of Art.
- Modjadji M. Choshi**, Assistant Professor of Nursing.
B.S.N., University of Phoenix; Ph.D., University of Arizona.
- Jaideep Chowdhury**, Associate Professor of Finance and Business Law.
M.S., Indian Statistical Institute; M.S., Ph.D., (Economics), Ph.D. (Finance), Virginia Polytechnic Institute and State University.
- Irvine Clarke III**, Wampler-Longacre Professorship of Marketing; Professor of Marketing; Professor of International Business.
B.S., B.A., University of Richmond; M.B.A., Ph.D., Old Dominion University.
- Katherine E. Clarke**, Professor, First Year Librarian, Libraries.
B.S., University of North Texas; M.L.S., University of Maryland, College Park.
- Theresa B. Clarke**, Department Head, Marketing; Professor of Marketing.
B.S., University of Louisville; M.S., California University of Pennsylvania; Ph.D., University of Kentucky.
- Corey L. Cleland**, Associate Professor of Biology.
B.A., Amherst College; Ph.D., Northwestern University.
- Christopher G. Clinard**, Associate Professor of Communication Sciences and Disorders.
B.B.A., Belmont University; M.A., The University of Tennessee, Knoxville; Ph.D., University of Washington; CCC-A.
- Erin S. Clinard**, Assistant Professor of Communication Sciences and Disorders.
B.S., James Madison University; M.A., University of Tennessee, Knoxville.
- Tabitha K. Coates**, Assistant Professor of Adult Education and Human Resource Development.
B.S., Virginia Polytechnic Institute & State University; M.S., City University of New York; Ph.D., Colorado State University.
- Beth S. Cochran**, Assistant Professor of Mathematics and Statistics.
B.S., Oklahoma State University; M.S., University of Central Oklahoma; Ph.D., University of Nebraska-Lincoln.
- Brian A. Cockburn**, Director, Music Library, Professor, Libraries.
B.M., Texas A&M University; M.L.S., M.M., The University of Arizona, Tucson.
- Jennifer E. Coffman**, Associate Executive Director, Center for Global Engagement; Professor of Integrated Science and Technology and Geographic Science.
B.A., Duke University; M.A., Ph.D., University of North Carolina at Chapel Hill.
- Martin G. Cohen**, Professor of Political Science.
B.A., The Pennsylvania State University; Ph.D., University of California, Los Angeles.
- Carey B. Cole Jr.**, Lecturer of Computer Information Systems and Business Analytics.
B.B.A., James Madison University; M.S., Johns Hopkins University.
- Trudy L. Cole**, Professor of Graphic Design. Associate Director, School of Art, Design and Art History
B.F.A., Tyler School of Art; M.F.A., Pennsylvania State University.
- A. Santo Coleman**, Assistant Professor of Health Sciences.
B.A., Georgia State University; M.P.H., University of Arizona; Ph.D., University of Connecticut.
- William Brack Collier**, Lecturer of Business Law.
B.A., Culver-Stockton College; J.D., Rutgers School of Law.
- Canessa N. Collins**, Lecturer of Marketing.
B.B.A., James Madison University; M.S., West Virginia University.
- Roger D. Collins**, Clinical Associate Instructor of Learning, Technology and Leadership Education.
B.S. James Madison University, M.Ed, University of Virginia, Ed.D., George Washington University.
- Chris R. Colocousis**, Associate Professor of Sociology.
B.A., Stonehill College; M.A., Ph.D., University of New Hampshire.
- Heather J. Coltman**, Provost and Senior Vice President for Academic Affairs, Professor of Music.
B.M., University of Cincinnati; M.M., Mannes College of Music; D.M., University of Texas at Austin.
- Heather Comfort**, Assistant Professor of Writing, Rhetoric and Technical Communication.
B.A., James Madison University; M.F.A., Arizona State University.

- Sarah Stowell Condra**, Instructor of Nursing.
B.S., University of New Hampshire; M.S.N., Simmons College.
- Shannon N. Conley-Phillips**, Associate Professor of Integrated Science and Technology.
B.S., M.A., Ph.D., Arizona State University.
- Andrew M. Connell**, Professor of Music.
B.M., San José State University; M.A., M.M., University of Michigan; Ph.D., University of California, Los Angeles.
- Amy J. Connolly**, Assistant Professor of Computer Information Systems.
A.A., Hillsborough Community College; B.S., M.S., Ph.D., University of South Florida.
- Anca Constantin**, Associate Professor of Physics and Astronomy.
B.S., University of Politehnica of Bucharest (Romania); Ph.D., Ohio University.
- Costel Constantin**, Associate Professor of Physics and Astronomy.
B.S., University Politehnica of Bucharest (Romania); M.S., Ph.D., Ohio University.
- Idelle A. Cooper**, Associate Professor of Biology.
B.A., Grinnell College; Ph.D., Indiana University-Bloomington, Indiana.
- Paul A. Copley**, KPMG Endowed Professorship in Accounting; Professor of Accounting.
B.B.A., The College of William & Mary; M.A., Ph.D., University of Alabama.
- Ryan P. Corriston**, Associate Professor of Dance.
B.A., M.F.A., University of Washington.
- Sharon A. Cote**, Associate Professor of English.
B.A., State University of New York at Binghamton; M.A., New York University; Ph.D., University of Pennsylvania.
- David H. Cottrell**, Professor of Music.
B.A., Concordia Teachers College; M.M., University of Washington; D.M.A., University of Oklahoma.
- Kerry F. Crawford**, Associate Professor of Political Science.
A.B., St. Mary's College of Maryland; Ph.D., George Washington University.
- Steven G. Cresawn**, Associate Professor of Biology.
B.S., James Madison University; Ph.D., University of Florida.
- Kenneth L. Critchfield II**, Associate Professor of Graduate Psychology.
B.S., M.S., Ph.D., University of Utah.
- Angela Crow**, Associate Professor of Writing, Rhetoric and Technical Communication.
B.A., Point loma College; M.A., Ph.D., University of Kansas.
- Catherine M. Crummett**, Assistant Vice Provost, University Programs.
B.S., Virginia Polytechnic Institute and State University; B.S., University of Maryland, College Park; M.S., Troy State University.
- Michelle D. Cude**, Professor of Middle, Secondary and Mathematics Education.
B.A., University of California, Berkeley; M.A., The College of William & Mary; Ph.D., University of Virginia.
- William M. Dabback**, Professor of Music.
B.S., West Chester University; M.M., Ph.D., Eastman School of Music.
- Paula S. Daly**, Professor of Management.
B.A., Montana State University; M.B.A., Oregon State University; Ph.D., University of Texas at Arlington.
- David B. Daniel**, Cluster Five Coordinator; Professor of Psychology.
B.A., San Diego State University; M.A., Ph.D., West Virginia University.
- Janet C. Daniel**, Associate Professor of Biology.
B.S., Cornell University; Ph.D., University of Chicago.
- Giacomo Danielli**, Instructor of Foreign Languages, Literatures and Cultures.
B.A., M.A., University of Parma (Italy).
- Maegan R. Daniels**, Assistant Professor of Health Professions.
B.S., Grand Valley State University; M.S., James Madison University.
- Orlandrew Danzell**, Associate Professor of Integrated Science and Technology.
B.A., Cameron University; M.A., Ph.D., Kansas State University.
- M. Graham Davidson**, Head, Military Science, Lieutenant Colonel and Professor of Military Science.
B.S., East Tennessee State University; M.S., University of Kansas; M.Ed., University of Virginia.
- Jessica B. Davidson**, Associate Professor of History.
B.A., Trinity College; Ph.D., Brandeis University.

Christian S. Davis, Associate Professor of History.

B.A., Swarthmore College; M.A., University of Georgia; Ph.D., Rutgers the State University of New Jersey.

Marcus C. Davis, Associate Dean, College of Science and Mathematics; Professor of Biology.

B.S., Georgia Institute of Technology; Ph.D., The University of Chicago.

Michael K. Davis, Executive Adviser to the President.

B.A., M.A., Syracuse University; Ph.D., University of Georgia.

Gianluca De Fazio, Associate Professor of Justice Studies.

B.A., M.A., University of Trento (Italy); M.Sc., University of Reading (England); Ph.D., Emory University.

Melody Defibaugh, Lecturer of Nursing.

B.S.N., M.S.N., Western Governors University.

Lori Beth De Hertogh, Assistant Professor of Writing, Rhetoric and Technical Communication.

B.A., The University of Southern Mississippi; M.A., Appalachian State University; Ph.D., Washington State University.

Arthur T. Dean II, Executive Director for Campus and Community Programs for Access and Inclusion.

B.A., M.Ed., James Madison University.

Jessica S. Del Vecchio, Assistant Professor of Theatre.

Ph.D., The Graduate Center at the City University of New York; M.A., University of Texas at Austin; A.B., Princeton University.

A. Laura Dengo Flores, Assistant Professor of Health Professions.

B.S., University of Costa Rica; M.S., Ph.D., Virginia Polytechnic Institute and State University.

Christine E. DeMars, Professor of Graduate Psychology; Senior Assessment Specialist, Center for Assessment and Research Studies.

B.A., Wichita State University; M.Ed., Arizona State University; Ph.D., Michigan State University.

Rory A. DePaolis, Professor of Communication Sciences and Disorders.

B.S., Northeastern University; M.S., Ph.D., The Pennsylvania State University.

Joseph M. Derby, Assistant Professor of Marketing.

B.S. University of Oklahoma; M.B.A., Oklahoma City University; Ph.D., Texas Tech University.

Ingrid E. DeSanctis, Associate Professor of Theatre.

B.S., Eastern Mennonite University; M.F.A., University of North Carolina, Greensboro.

Laura Desportes, Professor of Educational Foundations and Exceptionalities.

B.A., Mary Baldwin College; M.Ed., James Madison University; Ph.D., University of Virginia.

Maria Gilson deValpine, Professor of Nursing.

B.S.N., Oregon Health & Sciences University; M.S.N., University of Virginia, Ph.D., Portland State University.

Thomas C. DeVore, Professor of Chemistry and Biochemistry.

B.S., The University of Iowa; Ph.D., Iowa State University.

Dymphna G. De Wild, Assistant Professor of Art.

B.F.A., Corcoran College; M.F.A., James Madison University.

Kara N. Dillard, Assistant Professor of Communication Studies.

B.S., Southern Utah University; M.A., Eastern New Mexico University; Ph.D., Kansas State University.

Philip D. Dillard, Professor of History.

B.A., M.A., University of Georgia; Ph.D., Rice University.

Thomas W. Dillon, Professor of Computer Information Systems and Business Analytics.

B.S.Ed., M.Ed., Shippensburg University; M.S., Ph.D., University of Maryland, Baltimore County.

Nefin Dinc, Assistant Professor of Media Arts and Design.

B.A., Ankara University (Turkey); M.A., University of Strathclyde, Glasgow (Scotland); M.F.A., University of North Texas.

Corinne J. Diop, Professor of Art.

B.S., James Madison University; M.F.A., University of Washington.

Sergiy Dmytriyev, Assistant Professor of Management.

B.A., Vinnytsia National Technical University (Ukraine); M.A., Michigan State University; M.B.A., University of Navarra (Spain); Ph.D., University of Virginia.

Gabriel T. Dobner, Professor of Music.

B.M., Chicago Musical College of Roosevelt University; M.M., D.M., Indiana University.

Kerry M. Dobransky, Associate Professor of Sociology.

B.A., Kent State University; M.A., Ph.D., Northwestern University.

- Carl P. Donakowski**, Professor of Music.
B.M., Indiana University; A.D., Musikhochschule (Germany); D.M.A., State University of New York at Stony Brook.
- Rachel Dorne**, Associate Professor of Health Professions.
B.S., University of Wisconsin, Madison; M.Ed., University of Washington; Ed.D., Tennessee State University.
- Zachary A. Dorsey**, Assistant Professor of Theatre.
B.A., University of Washington; M.A., Ph.D., University of Texas at Austin.
- Charles J. Dotas**, Professor of Music.
B.A., University of Wisconsin, Green Bay; M.M., Eastman School of Music; D.A., University of Northern Colorado.
- Kristina J. Doubet**, Professor of Middle, Secondary, and Mathematics Education.
B.A., Eastern Illinois University; M.Ed., Ph.D., University of Virginia.
- Daniel M. Downey**, Professor of Chemistry and Biochemistry.
B.S., Madison College; Ph.D., Louisiana State University.
- Elizabeth A. Doyle**, Lecturer of Biology.
B.A., Macalester College; Ph.D., University of California Davis.
- Joanne M. Doyle**, Professor of Economics.
B.A., University of Maine; Ph.D., Boston College.
- Pamela Peterson Drake**, J. Grey Ferguson Professorship in Finance; Professor of Finance.
B.S., Miami University of Ohio; Ph.D., University of North Carolina at Chapel Hill; C.F.A.
- M. Kathleen Dredger**, Head, Department of Middle, Secondary and Mathematics Education.
B.A., McDaniel College; M.Ed., Loyola College of Maryland; Ph.D., Virginia Polytechnic Institute and State University.
- Zhuojun Duan**, Assistant Professor of Computer Science.
B.S., Xi'an University of Posts and Telecommunications (China); M.S., Shaanxi Normal University (China); Ph.D., Georgia State University.
- Joshua E. Ducey**, Associate Professor of Mathematics and Statistics.
B.A., University of Richmond; M.S., Ph.D., University of Florida.
- Carol C. Dudding**, Professor of Communication Sciences and Disorders.
B.S., University of Virginia; M.S., University of Massachusetts; Ph.D., University of Virginia; CCC-SLP.
- Chelsea K. Duncan**, Instructor of Kinesiology.
B.S., M.S., Eastern Illinois University.
- Cheri J. Duncan**, Professor, Director, Scholarly Resources & Discovery, Libraries.
B.S., James Madison University; M.L.S., Texas Woman's University.
- David L. Duncan**, Assistant Professor of Mathematics and Statistics.
B.S., University of Washington; Ph.D., Rutgers University.
- Annick H. Dupal**, Lecturer of Communication Studies.
B.A., American University; M.A., Brigham Young University; M.S., James Madison University.
- Kimberly D. R. DuVall**, Lecturer of Psychology; Academic Adviser, University Advising.
B.S., M.A., James Madison University.
- Andrew P. Duxbury**, Assistant Professor of Accounting.
M.S., University of Rhode Island; M.S. Taxation, Bryant University; Ph.D., University of Connecticut.
- Jeffrey S. Dyche**, Professor of Psychology.
B.A., Drake University; Diploma, U.S. Air Force School of Health Sciences; M.A., Appalachian State University; Ph.D., St. Louis University.
- Christian E. Early**, Assistant Chair, Ethical Reasoning in Action, Associate Professor of Philosophy.
M.A., Fuller Seminary and Graduate Schools; Ph.D., University of Wales.
- L. Scott Eaton**, Professor of Geology and Environmental Science.
B.S., James Madison University; M.S., Southern Illinois University; Ph.D., University of Virginia.
- Melody K. Eaton**, Director, School of Nursing, Professor of Nursing.
B.S.N., James Madison University; M.B.A., The George Washington University; Ph.D., George Mason University.
- Lennis G. Echterling**, Professor of Graduate Psychology.
B.A., Rockhurst College; M.S., Ph.D., Purdue University.
- Beth A. Eck**, Professor of Sociology.
B.A., Westminster College; M.A., Ph.D., University of Virginia.
- Elizabeth S. Edwards**, Associate Professor of Kinesiology.
B.S., M.S., Ph.D., University of Miami.

- David H. Ehrenpreis**, Director, Institute for Creative Inquiry, Professor of Art History.
B.A., Hamilton College; M.A., Ph.D., Boston University.
- Robert G. Eliason**, Lecturer of Management.
B.A., High Point University; M.S.M., Wilmington College; C.A.S.E., Johns Hopkins University.
- Deborah L. Elkins**, Assistant Professor of Nursing.
B.A., B.S.N., Radford University; M.S.N., Florida Atlantic University; M.B.A., Virginia Polytechnic Institute and State University; D.N.P., Chatham University.
- Chiara Elmi**, Assistant Professor of Geology and Environmental Science.
B.S., M.S., Ph.D., University of Modena and Reggio Emilia (Italy).
- Samy S. El-Tawab**, Associate Professor of Integrated Science and Technology.
B.Sc., M.Sc., Alexandria University (Egypt); Ph.D., Old Dominion University.
- S. Kirk Elwood**, Professor of Economics, Professor of International Business.
B.A., University of Washington; M.A., Ph.D., University of California Davis.
- Raymond A. Enke**, Associate Professor of Biology.
B.S., Salisbury University; Ph.D., Johns Hopkins Bloomberg School of Public Health.
- Theresa M. Enyeart Smith**, Professor of Health Sciences.
B.S., California State University, Chico; M.S., James Madison University; Ph.D., Virginia Polytechnic Institute and State University.
- Jori A. Erdman**, Associate Professor of Architectural Design.
B.S., University of Virginia; M. Arch., Columbia University.
- E.K. Esawi**, Lecturer of Computer Information Systems.
B.S., University of Tripoli (Libya); M.S., University of North Carolina; Ph.D., University of Kentucky.
- Felicia C. Esteban**, Lecturer of Biology.
B.S., Virginia Polytechnic Institute and State University; M.D., Medical University of South Carolina.
- Michele D. Estes**, Professor of Learning, Technology and Leadership Education.
B.F.A., M.Ed. Valdosta State University; Ph.D., University of Georgia.
- Peter J. Eubanks**, Associate Professor of Foreign Languages, Literatures and Cultures.
B.A., University of Virginia; M.A., Ph.D., Princeton University.
- Amanda M. Evans**, Associate Professor of Graduate Psychology.
B.A., St. Vincent College; M.S.Ed., Youngstown State University; Ph.D., Auburn University.
- William F. Evans**, Professor of Psychology.
B.A., Wofford College; M.Div., Duke University; Ed.S., Ph.D., University of South Carolina – Columbia.
- Jeremy D. Ezell**, Assistant Professor of Computer Information Systems and Business Analytics.
B.S., University of Tennessee; M.S., Middle Tennessee State University; Ph.D., Auburn University.
- Matthew B. Ezzell**, Associate Professor of Sociology.
B.A., M.A., Ph.D., University of North Carolina at Chapel Hill.
- Allison E. Fagan**, Associate Professor of English.
B.A., Saint Xavier University; M.A., Ph.D., Loyola University Chicago.
- Jody C. Fagan**, Professor, Strategic Research & Assessment Librarian, Libraries.
B.S., Missouri State University; M.A., Southern Illinois University, Carbondale; M.L.S., University of Maryland, College Park; Ph.D., James Madison University.
- William T. Faranda**, Associate Professor of Marketing.
B.S., M.B.A., Miami University of Ohio; Ph.D., Arizona State University.
- Christine Fasching Maphis**, Instructor of Nursing.
B.S.N., M.S.N., F.N.P., James Madison University.
- Giuliana Fazzion**, Head, Department of Foreign Languages, Literatures, and Cultures; Professor of Foreign Languages, Literatures and Cultures.
B.A., M.A., Old Dominion University; Ph.D., The Catholic University of America.
- Jared J. Featherstone**, Associate Professor of Writing, Rhetoric and Technical Communication.
B.A., M.F.A., University of Maryland.
- Annette R. Federico**, Professor of English.
B.A., Honors Tutorial College, Ohio University; M.A., Ph.D., Case Western Reserve University.
- Klebert B. Feitosa**, Associate Professor of Physics and Astronomy.
B.S., University of São Paulo (Brazil); M.S., Ph.D., University of Massachusetts at Amherst.

- Susan Q. Ferguson**, Lecturer of Accounting.
B.B.A., The College of William & Mary; M.S., University of Virginia.
- Kathleen M. Ferraiolo**, Professor of Political Science.
B.A., College of Holy Cross; M.A., Ph.D., University of Virginia.
- Lynn S. Fichter**, Professor of Geology and Environmental Science.
B.S., Juniata College; M.S., Ph.D., University of Michigan.
- Rebecca E. Field**, Associate Professor of Mathematics and Statistics.
B.A., Bowdoin College; M.S., Ph.D., The University of Chicago.
- Eric M. Fife**, Director, School of Communications Studies, Professor of Communication Studies.
B.S., James Madison University; M.A., University of Maryland, College Park; Ph.D., Purdue University.
- Tehani K. Finch**, Assistant Professor of Physics and Astronomy.
B.S., Harvard University; M.A., Massachusetts Institute of Technology; Ph.D., Howard University.
- Jason D. Fink**, Professor of Finance.
B.S., M.S., Florida State University; M.A., Ph.D., University of Virginia.
- Kristin E. Fink**, Professor of Finance.
B.S., The Ohio State University; M.A., University of Cincinnati; M.A., Ph.D., University of Virginia.
- Richard S. Finkelstein**, Associate Professor of Theatre.
B.A., Wilkes College; M.F.A., Carnegie Mellon University.
- Sara J. Finney**, Senior Assessment Specialist, Center for Assessment and Research Studies; Professor of Graduate Psychology.
B.A., University of Wisconsin, Eau Claire; M.A., Ph.D., University of Nebraska-Lincoln.
- Mariagrazia Fiorello**, Instructor of Foreign Languages, Literatures and Cultures.
B.A., James Madison University; M.A., Ca' Foscari (Venice, Italy).
- Timothy J. Fitzgerald**, Associate Professor of History.
B.A., The College of William & Mary; Ph.D., Harvard University.
- Dolores Flamiano**, Ruth D. Bridgeforth Professor of Telecommunications, Professor of Media Arts and Design.
B.A., Occidental College; M.A., Ph.D., University of North Carolina – Chapel Hill.
- Frances L. Flannery**, Professor of Religion.
B.S., The College of William & Mary; M.A., Ph.D., The University of Iowa.
- Patrick J. Fleming**, Associate Professor of Philosophy.
B.A., Indiana University; Ph.D., University of Connecticut.
- Brian C. Flota**, Associate Professor, Humanities Librarian, Libraries.
B.A., University of California, Riverside; M. S., University of Illinois at Urbana-Champaign, Ph.D., George Washington University.
- Kethera A. J. Fogler Moore**, Associate Professor of Psychology.
B.A., M.A., University of Colorado – Colorado Springs; Ph.D., Saint Louis University.
- George Font**, Associate Professor of Early, Elementary and Reading Education.
B.S., M.Ed., University of Central Florida; Ph.D., University of Georgia.
- Kimberley A. Foreman**, Associate Dean for Human Resources and Administration, College of Business; Lecturer of Accounting.
B.B.A., M.S.A., James Madison University.
- Jason B. Forsyth**, Assistant Professor of Engineering.
B.S., M.S., Ph.D., Virginia Polytechnic Institute and State University.
- Diane L. Foucar-Szocki**, Professor of Learning, Technology and Leadership Education.
B.A., San Diego State University; M.S., State University of New York at Buffalo; Ed.D., Syracuse University.
- Reginald F. Foucar-Szocki**, Professor of Hospitality Management.
B.S., Michigan State University; M.Ed., Buffalo State College; Ed.D., Syracuse University.
- Richard D. Foust, Jr.**, Professor of Chemistry and Biochemistry.
B.S., The Pennsylvania State University; Ph.D., University of California, Santa Barbara.
- Christopher J. Fox**, Professor of Computer Science.
B.A., M.A., Michigan State University; M.S., Ph.D., Syracuse University.
- Corbin A. Fox**, Assistant Professor of Finance.
B.S., M.S., Virginia Commonwealth University; Ph.D., University of Tennessee- Knoxville.
- Philip L. Frana**, Associate Professor of Interdisciplinary Liberal Studies.
B.A., Wartburg College; M.A., Ph.D., Iowa State University.

- Linda M. Freeman**, Instructor of Communication Sciences and Disorders.
B.S., M.S., James Madison University; CCC-SLP.
- Rebecca B. French**, Assistant Professor, Metadata Analyst Librarian, Libraries.
B.A., The College of William and Mary; M.L.S., Indiana University Bloomington.
- Evan J. Friss**, Associate Professor of History.
B.A., University of Maryland; M.A., New York University; Ph.D., City University of New York.
- Jamie L. Frye**, Professor of Health Professions.
B.A., Coe College; M.S., Indiana State University; Ph.D., University of Virginia
- Steven P. Frysinger**, Professor of Integrated Science and Technology.
B.A., William Paterson College; M.S., Stevens Institute of Technology; Ph.D., Rutgers the State University of New Jersey.
- Keigo Fukumura**, Associate Professor of Physics and Astronomy.
B.S., Kyoto Sangyo University (Japan); M.S., Western Illinois University; Ph.D., Montana State University.
- Keston H. Fulcher**, Executive Director, Center for Assessment and Research Studies; Professor of Graduate Psychology.
B.A., University of Virginia; Ed.S., University of Kansas; Ph.D., James Madison University.
- Kristen E. Funck**, Lecturer of Chemistry and Biochemistry.
B.S., Mississippi State University; Ph.D., Texas A & M University.
- Alexander L. Gabbin**, Head, School of Accounting; KPMG LLP Professor; Professor of Accounting.
B.A., Howard University; M.B.A., University of Chicago; Ph.D., Temple University Graduate School of Business.
- Joanne V. Gabbin**, Director, Furious Flower Poetry Center; Director Emeritus, Honors Program; Professor of English.
B.A., Morgan State College; M.A., Ph.D., University of Chicago.
- Mark L. Gabriele**, Professor of Biology.
B.S., James Madison University; Ph.D., Wake Forest University School of Medicine.
- Diana Galarreta-Aima**, Assistant Professor of Foreign Languages, Literatures and Cultures.
B.A., Pontificia Universidad Católica (Perú); M.A., Ph.D., University of Virginia.
- Danielle A. Gallagher**, Academic Adviser and Instructor, Computer Information Systems.
B.S., M.Ed., James Madison University.
- Scott R. Gallagher**, Associate Dean for Academic Affairs, College of Business; Professor of International Business; Professor of Management.
B.B.A., University of Texas at Austin; M.P.P., Harvard University; Ph.D., Rutgers the State University of New Jersey.
- Heena Thakorlal Gandhi**, Visiting Assistant Professor of Mathematics & Statistics.
Ph.D., Maharaja Sayajirao University of Baroda (India).
- Janice G. Gandy**, Assistant Professor of Nursing.
B.S.N., Eastern Mennonite University; M.S.N., George Mason University; D.N.P., James Madison University.
- Lori A. Gano-Overway**, Assistant Professor of Kinesiology.
B.A., Hope College; M.S., Purdue University; Ph.D., Michigan State University.
- Jeannie S. Garber**, Professor of Nursing.
D.N.P., Case Western Reserve University; M.S.N., University of Virginia; A.D.N., Virginia Western Community College.
- Angel A. Garcia**, Assistant Professor of Geology and Environmental Science.
B.S., Universidad Ana G. Méndez (Puerto Rico); M.S., University of Vermont; Ph.D., Arizona State University.
- Steven F. Garren**, Assistant Department Head, Mathematics and Statistics; Professor of Mathematics and Statistics.
B.S., Roanoke College; M.S., Ph.D., University of North Carolina at Chapel Hill.
- Richard E. Gaughran**, Associate Professor of English.
B.A., Robert Wesleyan College; M.A., Ph.D., Lehigh University.
- Mary K. Gayne**, Associate Professor of History.
B.A., American University; B.A., Portland State University; M.A., Ph.D., Cornell University.
- H. M. Gelfand**, Associate Professor of History, Associate Professor of Interdisciplinary Liberal Studies.
A.B., M.A., University of Georgia; M.A., University of Kentucky; Ph.D., University of Arizona.
- Amanda J. Gerber**, Assistant Professor of English.
B.A., University of California, Irvine; Ph.D., Ohio State University.
- Tobias Gerken**, Assistant Professor of Integrated Science and Technology.
B.Sc., Ph.D., University of Bayreuth (Germany).
- Elizabeth C. Gheen**, Instructor and Academic Adviser, Health Sciences.
B.S., M.A.T., James Madison University.

- Susan R. Ghiaciuc**, Associate Professor of Writing, Rhetoric and Technical Communication.
B.A., The University of Iowa; M.F.A., University of Texas at El Paso; Ph.D., University of Louisville.
- Jennifer S. Gibson**, Instructor of Mathematics and Statistics.
B.A., M.A.T., University of Richmond.
- Jonathan B. Gibson**, Professor of Music.
B.M., University of Richmond; A.M., Ph.D., Duke University.
- Pamela R. Gibson**, Professor of Psychology.
B.A., M.A., Cleveland State University; Ph.D., University of Rhode Island.
- Kelly D. Giles**, Associate Professor; Applied Sciences Librarian, Libraries.
B.A., Randolph-Macon Woman's College; M.A.L.S., University of Wisconsin-Madison.
- John W. Gilje**, Professor of Chemistry and Biochemistry.
B.CHEM., University of Minnesota; Ph.D., University of Michigan.
- Tammy D. Gilligan**, Professor of Graduate Psychology.
B.A., Clemson University; Ph.D., University of South Carolina.
- Kevin L. Giovanetti**, Professor of Physics and Astronomy.
B.S., Lowell Technological Institute; M.S., Ph.D., The College of William & Mary.
- John F. Ginnity, Jr.**, Instructor of Health Professions.
B.Sc., Clarkson University; M.Sc., SUNY Institute of Technology at Utica-Rome.
- Kyle G. Gipson**, Associate Professor of Engineering.
B.S., Wofford College; M.S., Institute of Textile Technology; Ph.D., Clemson University.
- Katrina E. Gobetz**, Associate Professor of Biology.
B.A., Cognate University; M.S., Indiana University; Ph.D., University of Kansas.
- Julie Gochenour**, Instructor of Communication Studies.
B.A., Eastern Mennonite University; M.A., Eastern Mennonite Seminary; Ph.D., Union Institute and University.
- Zachary J. Gochenour**, Lecturer of Economics.
B.S., B.A., M.A., Ph.D., George Mason University.
- Mollie A. Godfrey**, Associate Professor of English.
B.A., Reed College; Ph.D., University of Chicago.
- John W. Goetschius**, Assistant Professor of Health Professions.
B.S., University of Vermont; M.Ed., Ph.D., University of Virginia.
- Abraham Goldberg**, Executive Director, James Madison Center for Civic Engagement; Associate Professor of Political Science.
B.A., Ohio University; M.A., Ph.D. West Virginia University.
- Amy L. Goodall**, Associate Professor of Integrated Science and Technology.
B.A., California University of Pennsylvania; M.S., Shippensburg University; Ph.D., University of Nebraska.
- Dawn M. Goode**, Associate Professor of English.
B.A., Trinity University – San Antonio; M.A., Ph.D., University of Connecticut.
- Jeffrey Goodman**, Professor of Philosophy.
B.A., University of California Davis; M.A., Ph.D., University of Rochester.
- Jack A. Gowan, Jr.**, Head, Department of Computer Information Systems and Business Analytics; Professor of Computer Information Systems and Business Analytics.
B.S., M.B.A., Samford University; Ph.D., Clemson University.
- Rubén G. Graciani**, Acting Dean, College of Visual and Performing Arts; Professor of Dance.
B.F.A., SUNY Purchase; M.F.A., University of Maryland.
- Amy C. Graham**, Associate Professor of Nursing.
B.S.N., University of Colorado; M.S.N., James Madison University; Ph.D., George Mason University.
- Mark A. Graham**, Lecturer of Finance and Business Law.
B.S., M.B.A., Virginia Polytechnic Institute and State University; C.P.A.
- Steven E. Grande**, Director, Community Service-Learning.
B.S., University of Minnesota; M.A., Ph.D., University of Maryland.
- Keith A. Grant**, Associate Professor of Political Science.
B.A., Bucknell University; M.A., Ph.D., University of Arizona.
- William C. Grant**, Associate Professor of Economics.
B.A., Davidson College; Ph.D., University of North Carolina at Chapel Hill.

- Emily O. Gravett**, Assistant Professor of Religion.
B.A., Colgate University; M.A., Ph.D., University of Virginia.
- Lincoln C. Gray**, Professor of Communication Sciences and Disorders.
B.A., Carleton College; Ph.D., Michigan State University.
- Rustin P. Greene**, Professor of Media Arts and Design.
B.A., San Diego State University; M.F.A., University of Minnesota.
- Oris T. Griffin**, Professor of Learning, Technology and Leadership Education.
B.A., Winston-Salem State University; M.A., Ed.D., Western Michigan University.
- Heather P. Griscom**, Professor of Biology.
B.A., Smith College; M.S., Ph.D., Yale University.
- Suzanne Grossman**, Assistant Professor of Health Sciences.
B.A., Smith College; M.Sc., University of Edinburgh; DrPH, Drexel University.
- Michael J. Grundmann**, Associate Professor of Media Arts and Design.
B.A., San Francisco State University; M.F.A., Temple University.
- Michael D. Gubser**, Professor of History.
B.A., The College of William & Mary; M.A., University of South Carolina; Ph.D., University of California, Berkeley.
- Steven W. Guerrier**, Professor of History.
B.A., Wayne State University; M.A., Ph.D., University of Michigan.
- Eric R. Guinivan**, Associate Professor of Music.
B.M., Indiana University; M.M., D.M., University of Southern California.
- Elisabeth C. Gumnior**, Associate Professor of Writing, Rhetoric and Technical Communication.
M.A., Ph.D., Indiana University.
- Chen Guo**, Assistant Professor of Media Arts and Design.
B.A., Nanjing University of Aeronautics and Astronautics; M.A., Harbin University of Technology; Ph.D., Purdue University.
- Chenqgi Guo**, Associate Professor of Computer Information Systems and Business Analytics.
B.S., Guangdong University of Foreign Studies (China); M.S., Northern Illinois University; Ph.D., Mississippi State University.
- Elena Guolo**, Instructor of Foreign Languages, Literatures and Cultures.
B.A., M.A., Ca' Foscari University of Venice (Italy).
- Kyle A. Hackett**, Assistant Professor of Painting and Drawing.
B.F.A., University of Delaware; M.F.A., Maryland Institute College of Art.
- Debra R. Hall**, Instructor of Mathematics and Statistics.
B.S., Lambuth College; M.S., Tennessee Technological University.
- Michael D. Hall**, Professor of Psychology.
B.S., University of New Mexico; M.A., Ph.D., State University of New York at Binghamton.
- Robert F. Hallahan**, Associate Professor of Music.
B.M., East Carolina University.
- Linda Cabe Halpern**, Vice Provost for University Programs; Professor of Art History.
B.A., University of North Carolina at Chapel Hill; M.A., Ph.D., Yale University.
- Susan R. Halsell**, Associate Professor of Biology.
B.A., M.A., University of Texas at Austin; Ph.D., California Institute of Technology.
- Hasan Hamdan**, Professor of Mathematics and Statistics.
B.S., Birzeit University; M.S., Ph.D., American University.
- Maura E. Hametz**, Head, Department of History. Professor of History.
B.A., Colgate University; Ph.D., Brandeis University.
- Arthur J. Hamilton**, Professor of Finance and Business Law.
B.A., University of Virginia; M.B.A., James Madison University; J.D., University of South Carolina.
- Benjamin N. Hamilton**, Assistant Professor of Economics.
B.A., The College of William and Mary; Ph.D., University of Virginia.
- Carol W. Hamilton**, Lecturer of Management.
B.S., Clemson University; M.B.A., James Madison University.
- Scott J. Hammond**, Professor of Political Science.
B.A., University of Colorado Boulder; M.A., Ph.D., Claremont Graduate University.
- Jason Haney**, Professor of Music.
B.A., Austin College; M.M., D.M., Indiana University School of Music.

Shah Mahmoud Hanifi, Professor of History.

B.A., University of Wisconsin, Madison; Ph.D., University of Michigan.

Dana L. Haraway, Professor of Middle, Secondary and Mathematics Education.

B.S., University of Virginia; M.Ed., Ed.S., James Madison University; Ph.D., University of Virginia.

Kevin R. Hardwick, Professor of History.

B.A., Swarthmore College; M.A., Ph.D., University of Maryland, College Park.

David L. Hardy, Associate Professor of Graphic Design.

B.A., University of Maryland, Baltimore County; M.F.A., University of Baltimore.

Trent A. Hargens, Associate Professor of Kinesiology.

B.S., University of Iowa; M.S., Ball State University; Ph.D., Virginia Polytechnic Institute and State University.

Robert J. Harmison, Kibler Professor of Sport Psychology in Graduate in Psychology.

B.A., M.A., University of Arizona; Ph.D., University of North Texas.

Donna L. Harper, Vice President for Access and Enrollment Management; Instructor.

B.S., M.Ed., Ed.S., James Madison University.

Steven R. Harper, Professor of Engineering

B.S., University of California, Berkeley; M.E., University of Virginia; M.A., United States Naval War College; Ph.D., University of Illinois at

Urbana-Champaign.

Katherine A. Harrison, Instructor of Health Professions.

B.S., University of Central Florida; M.S.H.A., Medical College of Virginia at Virginia Commonwealth University.

Joseph A. Harsh, Associate Professor of Biology.

B.S., Indiana University; M.S., Michigan State University; Ph.D., Indiana University.

Vesna Hart, Director of International Cooperation, Center for Global Engagement; Instructor.

B.A., University of Novi Sad; M.A., Eastern Mennonite University; Psy.D. James Madison University.

C. William Hartman, Director of Technology; Assistant Professor; Libraries.

B.A., M.B.A., James Madison University.

Christie-Joy Brodrick Hartman, Executive Director, Institute for Stewardship of the Natural World; Professor of Integrated Science and Technology.

B.S., California Polytechnic State University; M.S., Ph.D., University of California Davis.

Lindsey A. Harvell-Bowman, Associate Professor of Communication Studies.

B.G.S., University of Kansas; M.A., Wichita State University; Ph.D., University of Oklahoma.

Iris C. Haseloff, Instructor of Foreign Languages, Literatures and Cultures.

M.A., Pennsylvania State University.

Glenn P. Hastedt, Head, Department of Justice Studies, Professor of Political Science and Justice Studies.

B.A., Bucknell University; M.A., Ph.D., Indiana University

John D. Hathcoat, Associate Professor of Graduate Psychology; Associate Assessment Specialist, Center for Assessment and Research Studies.

B.S., Rogers State University; M.S., Ph.D., Oklahoma State University.

Veronica Haun, Lecturer of Foreign Languages, Literatures, and Cultures.

B.A., Universidad Americana, Managua (Nicaragua); M.A., University of Colorado at Boulder.

Jamie A. Haverkamp, Assistant Professor of Anthropology.

B.A., Brooks Institute of Photography; M.S., University of Tennessee; Ph.D., University of Maine.

William J. Hawk, Chair, Ethical Reasoning in Action; Professor of Philosophy.

B.A., Bluffton College; M.A., Eastern Mennonite Seminary; M.A., Ph.D., Vanderbilt University.

Mark D. Hawthorne, Professor of Writing, Rhetoric and Technical Communication.

B.A., Wake Forest College; M.A., Ph.D., University of Florida.

W. Bryce Hayes, Associate Professor of Music.

B.M., Westminster Choir College; M.M., Temple University; D.M.A., University of Minnesota

David C. Hayes, Deloitte Faculty Scholar; Professor of Accounting.

B.S.B.A., University of Arkansas; M.B.A., University of West Florida; Ph.D. University of South Florida.

Jayne G. Haynes, Instructor of Nursing.

B.S.N., University of Colorado; M.S.N., University of Northern Colorado.

John T. Haynes, Associate Professor of Geology and Environmental Science.

B.S., Denison University; M.S., Ph.D., The University of Cincinnati.

- Angela I. Hayslett**, Lecturer of Sport and Recreation Management.
B.A., Otterbein University; M.S., James Madison University; J.D., University of Cincinnati.
- Gretchen Hazard**, Lecturer of Communication Studies.
B.A., Virginia Polytechnic Institute and State University; M.S., James Madison University.
- Philip S. Heap**, Lecturer of Economics.
B.S., University of Utah; M.A., A.B.D., University of Virginia.
- Angela Langevin Heavey**, Assistant Professor of Management.
B.A., Colby-Sawyer College; M.S., The Pennsylvania State University; Ph.D., Cornell University.
- Brooks E. Hefner**, Professor of English.
B.A., Transylvania University; Ph.D., City University of New York.
- Demetria F. Henderson**, Visiting Assistant Professor of Management.
B.S., Louisiana State University; M.S.O.D., Queens University of Charlotte; Ph.D., University of Texas at Arlington.
- Noel Hendrickson**, Professor of Integrated Science and Technology.
M.A., Ph.D., University of Wisconsin-Madison.
- Giselle A. Hendy**, Instructor of Psychology.
B.A., M.S., Towson University.
- Laura Henigman**, Associate Professor of English.
B.A., Princeton University; M.A., M.Phil., Ph.D., Columbia University.
- Paul W. Henriksen**, Coordinator for Students, Integrated Science and Technology; Instructor of Integrated Science and Technology.
B.S., Loras College; M.A., M.S., University of Illinois.
- Carissa Henriques**, Assistant Professor of Graphic Design.
B.F.A., James Madison University; M.F.A., Virginia Commonwealth University.
- Justin J. Henriques**, Associate Professor of Engineering.
B.A., B.S., James Madison University; M.S., M.U.E.P., Ph.D., University of Virginia.
- Dayna S. Henry**, Assistant Professor of Health Sciences.
B.A., M.Sc., University of Guelph; Ph.D., Indiana University.
- Samuel Hernández**, Instructor of Foreign Languages, Literatures and Cultures.
B.A., MDIV, Eastern Mennonite University.
- James B. Herrick**, Associate Professor of Biology.
B.S., M.S., Brigham Young University; Ph.D., Cornell University.
- Philip M. Herrington**, Associate Professor of History.
B. A., Berry College; M.A., University of Georgia; Ph.D., University of Virginia.
- Elizabeth K. Herron**, Assistant Professor of Nursing.
B.S.N., University of Hawaii at Manoa; M.S.N., Duke University; Ph.D., Georgia Baptist College of Nursing at Mercer University.
- Stephen J. Hertenberg**, Lecturer of Marketing.
B.S., Miami University of Ohio; M.B.A., University of Chicago.
- Michelle Hesse**, Assistant Professor of Health Professions.
B.S., College of St. Elizabeth; Ph.D., The Ohio State University.
- Catherine E. Hessick**, Lecturer of Marketing.
B.S., Franciscan University; M.B.A., University of Dallas.
- M. Hossain Heydari**, Professor of Computer Science.
B.S., Karaj School of Mathematics and Economic Management; M.S., Jackson State University; Ph.D., University of Texas at Dallas.
- Corey A. Hickerson**, Professor of Communication Studies.
B.A., University of Memphis; M.A., University of Alabama; Ph.D., University of Virginia.
- Laura Y. Hickerson**, Assistant Director for Employer Relations, University Career Center.
B.S., Florida State University; M.Ed., James Madison University.
- Michael M. Hickman**, Instructor of Writing, Rhetoric and Technical Communication.
B.A., M.A., James Madison University.
- Robbie L. Higdon**, Associate Professor of Middle, Secondary and Mathematics Education.
B.A., Furman University; M.Ed., James Madison University; Ph.D., Clemson University.

- Alexander S. Hiland**, Lecturer of Communication Studies.
B.A., University of Northern Iowa; M.A., Ph.D., University of Minnesota.
- Richard D. Hilliard**, Professor of Graphic Design.
B.F.A., Pratt Institute; M.A. Syracuse University; M.F.A. University of Hartford Art School.
- S. Beth Hinderliter**, Director, Duke Hall Gallery of Fine Art; Assistant Professor.
B.A., University of North Carolina at Chapel Hill; M.A., The School of the Art Institute of Chicago; M.Phil., Ph.D., Columbia University.
- M. Joseph Hinshaw**, Professor of Media Arts and Design.
B.A., Bethany College; M.A., Ph.D., Indiana University.
- Cong Q. Hoang**, Assistant Professor of Mathematics and Statistics.
B.S., University of Pedagogy; M.A., Ph.D., University of Alabama.
- Kathryn D. Hobson**, Assistant Professor of Communication Studies.
B.A., Luther College; M.A., Ph.D., University of Denver.
- Douglas R. Hochstetler**, Associate Dean, College of Health and Behavioral Studies; Professor of Kinesiology.
B.A., Northwestern College; M.S., West Chester University; Ph.D., Pennsylvania State University.
- Steven H. Hoeltzel**, Professor of Philosophy.
B.A., Michigan State; Ph.D., The University of Iowa.
- Shelly L. Hokanson**, Associate Professor of Media Arts and Design.
B.B.A., Robert Morris College; Ed.M., University of Illinois at Urbana-Champaign; M.F.A., Governors State University.
- S. Keith Holland**, Associate Vice Provost, Office of Research and Scholarship; Associate Professor of Engineering.
B.S., James Madison University; M.S., Ph.D., University of Virginia.
- Steven W. Holloway**, Associate Professor; Director of Metadata Strategies, Libraries.
B.A., Samford University; M.L.I.S., University of Illinois at Urbana-Champaign; M.A., The University of Chicago, IL; Ph.D., The University of Chicago.
- Joanne M. Holman**, Professor of Media Arts and Design.
B.A., Concordia University; M.S., Syracuse University; Ph.D., Indiana University.
- Daniel D. Holt**, Interim Department Head, Psychology; Associate Professor of Psychology.
B.S., M.S., St. Cloud State University; Ph.D., Washington University.
- Adrienne M. Hooker**, Assistant Professor of Media Arts and Design.
B.F.A., Drake University; M.F.A., Indiana University.
- Robert N. Horn**, Professor of Economics; Professor of International Business.
B.S., Hofstra University; M.A., Ph.D., University of New Hampshire.
- Gilpatrick D. Hornsby**, Assistant Professor of Hospitality Management.
B.S., University of North Texas; M.S., Ph.D., Oklahoma State University.
- Tiffany C. Hornsby**, Assistant Professor of Graduate Psychology
B.S., Howard University; M.S., Ph.D., Oklahoma State University.
- S. Jeanne Horst**, Associate Professor of Graduate Psychology; Associate Assessment Specialist, Center for Assessment and Research Studies.
B.A., Millersville University; M.A., Ph.D., James Madison University.
- Bridget A. Houlahan**, Assistant Professor of Nursing.
B.S.N., Ohio Wesleyan University; M.S.N., Kent State University; Ph.D., University of Virginia.
- Rebecca E. Howes-Mischel**, Associate Professor of Anthropology.
B.A., Swarthmore College; M.A., Ph.D., New York University.
- Timothy M. Howley**, Lecturer of Health Sciences.
B.S., M.A., James Madison University.
- Di Hu**, Assistant Professor of Anthropology.
B.A., University of Pennsylvania; M.A., Ph.D., University of California, Berkeley.
- Yongguang Hu**, Associate Professor of History.
B.S., Beijing University; M.A., Ph.D., State University of New York.
- Wanchi Huang**, Professor of Music.
B.M., The Curtis Institute of Music; M.M., The Juilliard School; D.M., Indiana University/Bloomington School of Music.
- Michelle A. Hughes**, Professor of Early, Elementary and Reading Education.
B.A., State University of New York at Brockport; M.S., Nazareth College; Ph.D., University of Virginia.

- W. Christopher Hughes**, Head, Physics and Astronomy; Professor of Physics and Astronomy.
B.S., Davidson College; Ph.D., University of North Carolina at Chapel Hill.
- Christine A. Hughey**, Professor of Chemistry and Biochemistry.
B.S., Berry College; Ph.D., Florida State University.
- John W. Hulsey**, Associate Professor of Political Science.
B.A., University of Arkansas; Ph.D., Indiana University.
- Linda J. Hulton**, Professor of Nursing.
B.S.N., Roberts Wesleyan College; M.S.N., Ph.D., University of Virginia.
- Cynthia A. Hunter**, Professor of Social Work.
B.A., Central Michigan University; M.S.W., Howard University.
- Syed Muhammed Hussain**, Assistant Professor of Economics.
B.S., Lahore University of Management Sciences; M.A., Ph.D., University of Rochester.
- Oliver J. Hyman**, Lecturer of Biology.
B.S., University of Colorado Boulder; M.S., Ph.D., Arizona State University.
- Thomas E. Hynd**, Lecturer of Biology.
B.S., University of California, Irvine; M.Sc., Ph.D., University of Hawai'i at Manoa.
- Raymond M. Hyser Jr.**, Cluster Four Coordinator, Professor of History.
B.S.Ed., M.A., Georgia Southern College; Ph.D., Florida State University.
- Eric A. Imbrescia**, Instructor of Middle, Secondary and Mathematics Education.
B.F.A., M.Ed., James Madison University.
- Susan B. Ingram**, Assistant Professor of Communication Sciences and Disorders.
B.S., M.S., Ph.D., James Madison University; CCC-SLP.
- Jessica G. Irons**, Professor of Psychology.
B.A., M.S., Augusta State University; Ph.D., Auburn University.
- James H. Irving**, Associate Professor of Accounting.
B.S., M.S., University of Virginia; Ph.D., University of North Carolina at Chapel Hill.
- Shanza Isom**, Assistant Professor of Social Work.
B.S.W., M.S.W., Virginia Commonwealth University.
- Jennifer K. Jackson**, Transfer Advising Coordinator, University Advising.
B.S., M.Ed., Virginia Commonwealth University.
- Ashley Taylor Jaffee**, Associate Professor of Middle, Secondary and Mathematics Education.
B.A., University of Virginia; M.A.T., University of Virginia; Ph.D., Columbia University.
- Karen P. Jagiello**, Assistant Professor of Nursing.
B.S.N., Eastern Mennonite University; M.S.N., James Madison University; Ph.D., West Virginia University.
- Nusrat Jahan**, Professor of Mathematics and Statistics.
B.Sc., University of Dhaka (Bangladesh); M.S., Queens University (Canada); Ph.D., Mississippi State University.
- Krisztina V. Jakobsen**, Associate Professor of Psychology.
B.S., Virginia Polytechnic and State University; M.S., Ph.D., University of Georgia.
- Manal A. Jamal**, Professor of Political Science.
B.A., University of California Davis; M.A., San Francisco State University; Ph.D., McGill University.
- Sarunas Jankauskas**, Associate Professor of Music.
B.M., Grand Valley State University; M.M., Rice University; D.M.A., University of Texas at Austin.
- Kevin Jefferson**, Instructor of Writing, Rhetoric and Technical Communication.
B.A., The College of William & Mary; M.A., University of Oregon.
- Tony R. Jehi**, Assistant Professor of Health Sciences.
B.S., University of Balamand; M.S., Northeastern University; DrPH, Loma Linda University.
- James W. Jewett**, Instructor of Computer Information Systems and Business Analytics.
B.S., University of Mary Washington; M.B.A., M.S., Virginia Polytechnic Institute and State University.
- Aimee K. Johnson**, Assistant Professor of Health Sciences.
B.A., M.A., Ph.D., Baylor University.
- Casonya M. Johnson**, Head, Department of Biology; Professor of Biology.
B.S., Morgan State University; Ph. D., Johns Hopkins University.
- Elizabeth A. Johnson**, Professor of Geology and Environmental Science.
B.A., Rice University; M.S., Ph.D., California Institute of Technology.

- Christopher R. Johnson**, Associate Professor of Computer Science.
B.S., University of Northern Iowa; M.S., Ph.D., University of Tennessee.
- Pamela S. Johnson**, Professor of Theatre.
B.A., University of Virginia; M.F.A., James Madison University.
- Brant C. Jones**, Professor of Mathematics and Statistics.
B.A., Bard College; Ph.D., University of Washington.
- David A. Jones**, Professor of Political Science.
B.S., Appalachian State University; M.A., Ph.D., Purdue University.
- William E. Jones**, Associate Professor of Military Science.
B.A., State University of New York at Buffalo.
- Shraddha Joshi**, Assistant Professor of Engineering.
B.S., Nirma University (India); M.S., Ph.D., Clemson University.
- Oscar H. Judd**, Lecturer of Chemistry & Biochemistry.
B.S., University of South Carolina; M.S., Indiana University; Ph.D., Michigan State University.
- Gary W. Juhan**, Assistant Professor of Hospitality Management.
B.A., Appalachian State University; M.A., Appalachian State University; Ed.S., Appalachian State University; Ed.D., East Tennessee State University.
- Erin E. Kamarunas**, Assistant Professor of Communication Sciences and Disorders.
B.S., University of Arkansas; M.S., Ph.D., University of Arkansas for Medical Sciences.
- Shin Ji Kang**, Associate Professor of Early, Elementary and Reading Education.
Duksung Women's University (Seoul); M.Ed., Ph.D., Vanderbilt University.
- Laura R. Katzman**, Professor of Art History.
B.A., New York University; M.A., M.Phil., Ph.D., Yale University.
- Bernd Kaussler**, Professor of Political Science.
B.S., University of Sussex (UK); M.A., Ph.D., St. Andrews University (UK).
- Kara M. Kavanagh**, Associate Professor of Early, Elementary and Reading Education.
B.A., George Mason University; M.Ed., Armstrong Atlantic State University; Ph.D., Georgia State University.
- Masoud Kaveh-Baghdadorani**, Visiting Assistant Professor of Physics and Astronomy.
B.S. Isfahan University of Technology, M.S., Ph.D. University of Cincinnati
- Elaine F. Roberts Kaye**, Instructional Designer & Digital Pedagogy Specialist; Assistant Professor, Libraries.
B.A., M.S. Ed., M.Ed., James Madison University.
- Jennifer A. Keach**, Professor, Coordinator of Organizational Learning & Development, Libraries.
B.A., James Madison University; M.L.S., University of Alabama.
- Cynthia A. Kearns**, Assistant Professor of Geology and Environmental Science
B.S., Syracuse University; M.S., The University of Akron.
- Jonathan W. Keller**, Head, Department of Political Science; Professor of Political Science.
B.S., Nebraska Wesleyan University; M.A., Ph.D., The Ohio State University.
- Natalie A. Kerr**, Professor of Psychology.
B.S., Mary Washington College; M.A., Hollins University; Ph.D., Virginia Commonwealth University.
- Raihan Khan**, Instructor of Health Sciences.
MBBS, Dhaka Medical College; M.P.H., North Dakota State University
- Michele L. Kielty**, Professor of Graduate Psychology; Graduate Program Director, School Counseling.
B.A., James Madison University; M.Ed. Wake Forest University; Ph.D., University of North Carolina at Greensboro.
- Christina A. Kilby**, Assistant Professor of Religion.
B.A., Davidson College; M.T.S. Harvard Divinity School; Ph.D. University of Virginia.
- Patrick J. Kilkenny**, Lecturer of Biology.
M.S., James Madison University.
- Jooho Tony Kim**, Assistant Professor of Hospitality Management.
B.S., Hanyang University (South Korea); B.S., University of Las Vegas; M.T.A., George Washington University; Ph.D., Purdue University.
- Yeeonsoo Kim**, Associate Professor of Communication Studies.
B.A., M.A., Ewha Women's University; M.A., Ph.D., University of Florida.
- Mary B. Kimsey**, Professor of Integrated Science and Technology.
B.A., University of Cincinnati; M.A., Ph.D., University of Georgia.

- Charles W. King Jr.**, Senior Vice President for Administration and Finance; Assistant Professor.
B.S., M.A., Appalachian State University.
- Lindsay R. King**, Lecturer of Marketing.
B.S., M.S., Virginia Polytechnic Institute and State University; M.B.A., James Madison University.
- Deborah Kipps-Vaughan**, Professor of Graduate Psychology.
B.S., Virginia Polytechnic Institute and State University; Ed.S., M.Ed., Psy.D., James Madison University.
- Alan K. Kirk**, Interim Academic Unit Head, Philosophy and Religion; Professor of Religion.
B.A., M.A., University of Calgary; M.A., Pepperdine University; Ph.D., University of Toronto.
- David C. Kirkpatrick**, Assistant Professor of Religion.
B.A., University of Wisconsin-Stevens Point; M.Div., M.A., Trinity Evangelical Divinity School; M.A., Ph.D., University of Edinburgh.
- Michael S. Kirkpatrick**, Associate Professor of Computer Science.
B.A., Indiana University; M.S., Michigan State University; Ph.D., Purdue University.
- Tamela C. Kiser**, Assistant Professor of Nursing.
B.S., Eastern Mennonite University; M.S., James Madison University; D.N.P., University of South Alabama.
- Michael J. Klein**, Associate Professor of Writing, Rhetoric and Technical Communication.
B.A., M.A., The University of Arizona, Tucson; M.S., Rensselaer Polytechnic Institute; Ph.D., Virginia Polytechnic Institute and State University.
- Cynthia A. Klevickis**, Professor of Integrated Science and Technology.
B.S., M.S., University of Wisconsin, Madison; Ph.D., University of Virginia.
- Karina Kline-Gabel**, Lecturer of Foreign Languages, Literatures and Cultures.
B.A., James Madison University; M.A., University of Virginia.
- Jennifer M. Klotz**, Professor, Development & Philanthropy Librarian, Libraries.
B.A., Virginia Commonwealth University; M.L.I.S., University of Wisconsin, Milwaukee.
- Andrea F. Knopp**, Associate Professor of Nursing.
B.S.N., Medical College of Georgia; M.S.N., Emory University; Ph.D., University of Virginia.
- William M. Knorpp Jr.**, Associate Professor of Philosophy.
B.A., Southeast Missouri State University; M.A., Ph.D., University of North Carolina at Chapel Hill.
- Rachel O. Koch**, Visiting Instructor of Mathematics and Statistics.
A.S., Piedmont Virginia Community College; B.A., James Madison University; M.A., Virginia Commonwealth University.
- Peter D. Kohn**, Professor of Mathematics and Statistics.
B.S., Antioch College; M.A., San Francisco State University; Ph.D., University of Texas at Austin.
- Oleksandr Kokhan**, Associate Professor of Chemistry and Biochemistry.
Ph.D., University of Illinois at Urbana-Champaign.
- Robert W. Kolodinsky**, Professor of Management.
B.A., Albright College; M.S., Ed.S., Ph.D., Florida State University.
- Robert A. Kolvoord**, Dean, College of Integrated Science and Engineering; Professor of Integrated Science and Technology.
B.S., M.S., University of Virginia; Ph.D., Cornell University.
- Robyn L. Kondrad**, Assistant Professor of Psychology.
B.S., College of William and Mary; M.A., Arizona State University; Ph.D., University of Virginia.
- Lamiaa A. Korayem**, Visiting Instructor of Mathematics and Statistics.
B.Sc., M.Sc., M.A., Cairo University (Egypt).
- Robert E. Koslow**, Professor of Health Sciences.
B.A., William Paterson University; M.S., P.E.D., Indiana University.
- Katya Koubek**, Associate Professor of Educational Foundations and Exceptionalities.
M.A., Charles University (Czech Republic); Ph.D., University of Nebraska-Lincoln.
- Helmut Kraenzle**, Professor of Integrated Science and Technology.
Diploma in Geography, Ph.D., University of Munich (Germany).
- Jonathan A. Kratz**, Director of International Student and Scholar Services, Center for Global Engagement.
B.B.A., Eastern Mennonite University; M.Ed., James Madison University.
- Jenda K. Krauklis**, Lecturer of Communication Studies.
B.A., West Virginia State College; M.A., Indiana State University.
- Lars J. Kristiansen**, Assistant Professor of Communication Studies.
B.A., BI Norwegian School of Management (Norway); M.A., Illinois State University; Ph.D., University of Missouri.

- Kristopher E. Kubow**, Assistant Professor of Biology.
B.S., University of Southern California; Ph.D., ETH Zurich.
- Stephen J. Kubricki**, Visiting Assistant Professor of Mathematics and Statistics.
B.S., Wilkes University; M.Sc., Pennsylvania State University; Ed.D, Pennsylvania State University.
- Chrisandra A. Kufeldt**, Visiting Assistant Professor of Anthropology.
B.A., University of California at San Diego; M.A., Ph.D., George Washington University.
- Christina Kuo**, Associate Professor of Communication Sciences and Disorders.
B.A., National Taiwan University, (Taiwan); M.S., Ph.D., University of Wisconsin-Madison.
- Stephanie P. Kurti**, Assistant Professor of Kinesiology.
B.S., University of Mary Washington; M.S., Florida Atlantic University; Ph.D., Kansas State University.
- Jaime L. Kurtz**, Professor of Psychology.
B.A., Millersville University; M.A., Ph.D., University of Virginia.
- Laurie L. Kutchins**, Professor of English.
B.A., Carleton College; M.F.A., University of Massachusetts Amherst.
- Elisabeth M. Kvernen**, Assistant Professor of Media Arts & Design.
B.A., Wheaton College; M.F.A., University of Baltimore.
- Christina K. Lam**, Assistant Professor of Nursing.
B.S.N., James Madison University; M.S.N., Duke University.
- Michael O. Lam**, Associate Professor of Computer Science.
B.S., James Madison University; M.S., Ph.D., University of Maryland.
- Benjamin C. Lambert**, Associate Professor of Theatre.
B.A., Emerson College; M.F.A., California State University.
- Bethany L. Landes**, Instructor of Nursing.
B.S.N., James Madison University; M.S.N., Walden University.
- Chandra M. Lane**, Assistant Director, University Career Center.
B.A., University of Richmond; M.Ed., James Madison University.
- David J. Lane**, Instructor of Middle, Secondary and Mathematics Education.
B.A., University of Michigan; M.Ed., James Madison University.
- Mark G. Lane**, Assistant Professor, Digital Preservation Librarian, Libraries.
B.A., University of Richmond; M.L.I.S., University of South Carolina.
- Nicholas L. Langridge**, Vice President for University Advancement.
B.S., M.A., Ph.D., James Madison University.
- Jennifer R. Lang-Rigal**, Associate Professor of Foreign Languages, Literatures and Cultures.
B.A., Western Washington University; M.A., Ph.D., University of Texas at Austin.
- Gabrielle M. Lanier**, Professor of History.
B.A., University of Pennsylvania; M.A., Ph.D., University of Delaware.
- Andrew B. Lankford**, Professor of Music.
B.M., University of North Carolina at Greensboro; M.M., University of Kansas; D.M.A., University of North Carolina at Greensboro.
- Chris S. Lantz**, Professor of Biology.
B.S., James Madison University; Ph.D., Medical College of Virginia.
- Jessica L. Lantz**, Assistant Professor, Instructional Designer, Libraries.
B.S., M.Ed., James Madison University; M.L.S., The University of North Texas.
- Timothy M. LaPira**, Professor of Political Science.
B.A., LaSalle University; Ph.D., Rutgers the State University of New Jersey.
- William V. Larsen**, Professor of Marketing.
B.A., B.A., Brigham Young University; Ph.D., University of Virginia; Ph.D., Virginia Polytechnic Institute and State University.
- Carl F. Larsson**, Assistant Professor of Finance and Business Law.
B.S., Boston College; A.B.D, University of Texas at San Antonio
- Richard R. Lawler**, Associate Professor of Anthropology.
B.A., University of Illinois at Urbana-Champaign; M.A., Southern Illinois University; M.Phil., Ph.D., Yale University.
- Lori H. Leaman**, Instructor of Educational Foundations and Exceptionalities.
B.S., Eastern Mennonite University; M.Ed., James Madison University; Ed.D., Nova Southeastern University.

- Joseph J. LeBlanc**, Assistant Professor of Graduate Psychology.
Ph.D., University of North Carolina at Greensboro.
- Laura M. Leduc**, Head, Department of Management; Professor of Management.
B.A., Florida State University; M.I.B.S., University of South Carolina; Ph.D., The University of Iowa.
- Chong Kyoong Lee**, Assistant Professor of Management.
B.A., University of Wisconsin-Madison; M.B.A., University of Oxford; Ph.D., Syracuse University.
- Hak-Seon Lee**, Associate Professor of Political Science.
B.A., M.A., Seoul National University; Ph.D., University of North Carolina at Chapel Hill.
- Jamie B. Lee**, Assistant Professor of Communication Sciences and Disorders.
B.S., College of William and Mary; Au.D., Vanderbilt Medical School; Ph.D., Vanderbilt University.
- Matthew R. Lee**, Associate Professor of Interdisciplinary Liberal Studies.
B.A., Rutgers the State University of New Jersey; M.A., Ph.D., University of Illinois at Urbana-Champaign.
- Alexander S. Leidholdt**, Professor of Media Arts and Design.
B.A., Virginia Wesleyan College; M.S., Clarion University; Ed.S., Indiana University; Ph.D., Old Dominion University.
- Melissa C. Leisen**, Assistant Professor of Nursing.
B.S.N., Eastern Mennonite University; M.S.N., George Mason University.
- Lesley E. Lemons**, Lecturer of Health Sciences.
B.S.W., Rochester Institute of Technology; M.Ed., Widener University.
- Diane C. Lending**, Professor of Computer Information Systems and Business Analytics.
B.A., University of Virginia; Ph.D., University of Minnesota.
- Stephen A. Leslie**, Head, Department of Geology and Environmental Science; Professor of Geology and Environmental Science.
B.S., Bowling Green State University; M.S., University of Idaho; Ph.D., The Ohio State University.
- Mark E. L'Esperance**, Dean, College of Education; Professor of Education
B.S., M.Ed., Ph.D., University of North Carolina, Greensboro.
- Kendra L. Letchworth-Weaver**, Assistant Professor of Physics and Astronomy.
B.S., The College of William & Mary; Ph.D., Cornell University.
- Brian C. Leventhal**, Assistant Professor of Graduate Psychology; Assistant Assessment Specialist, Center for Assessment and Research Studies.
B.S., Clarkson University, M.A., University of Pittsburgh, Ph.D., University of Pittsburgh.
- Alan J. Levinovitz**, Associate Professor of Religion.
B.A., Stanford University; M.A., Ph.D., University of Chicago Divinity School.
- Amy B. Lewis**, Assistant Professor of Music.
B.M., DePaul University; M.A.T., Concordia University.
- Erica J. Lewis**, Associate Professor of Nursing.
B.S.N., Eastern Mennonite University; M.S.N., Ph.D., University of Virginia.
- Kristi L. Lewis**, Professor of Health Sciences.
B.S., Virginia Commonwealth University; M.P.H., Medical College of Virginia; Ph.D., Virginia Commonwealth University.
- Mark A. Lewis**, Associate Professor of Early, Elementary and Reading Education.
B.A., Christian Brothers University; M.A., M.Ed., Northern Arizona University; Ph.D., University of Colorado at Boulder.
- Scott B. Lewis**, Associate Professor of Chemistry and Biochemistry.
B.S., Northern Arizona University; M.S., Ph.D., University of Washington.
- Yuan Li**, Assistant Professor of Hospitality Management.
B.S., Nanjing Agricultural University (China); M.S., Purdue University; Ph.D., Virginia Polytechnic Institute and State University.
- Robert J. Lifka**, Instructor of Kinesiology.
B.S., Quincy University; M.S., University of Illinois at Chicago.
- Theresa L. Lind**, Lecturer of Hospitality Management.
B.S., Ithaca College; M.Ed., James Madison University.
- George F. Linder**, Associate Vice Provost, University Programs; Professor of Interdisciplinary Liberal Studies.
B.A., University of North Carolina at Asheville; M.A., Ph.D., University of North Carolina at Chapel Hill.
- Joshua M. Linder**, Associate Professor of Anthropology.
B.A., Washington University in St. Louis; M.A. Hunter College; Ph.D., Graduate Center, City University of New York, New York Consortium in Evolutionary Primatology.

- Kristina C. Liskey**, Associate Professor of Health Professions.
B.S., Brigham Young University; M.P.A.S., James Madison University.
- Juhong C. Liu**, Associate Professor; Head of Online Learning and Senior Instructional Designer, Libraries.
M.Ed., East Tennessee State University; Ph.D., Virginia Polytechnic and State University.
- Qingfeng Wilson Liu**, Professor of Finance; Professor of International Business.
B.A., Shenzhen University (China); M.B.A., University of Kansas; Ph.D., University of Oklahoma.
- Qingsheng Liu**, Lecturer of Chemistry and Biochemistry.
B.S., Ph.D., Jilin University (P.R. China).
- Dennis H. Lo**, Assistant Professor of English.
B.A.S., Stanford University; M.S., Columbia University; Ph.D. University of California-Los Angeles.
- Marsha S. Longerbeam**, Assistant Professor of Communication Sciences and Disorders.
B.S., M.S., Ph.D., James Madison University; CCC-SLP.
- Michael C. Loso**, Clinical Associate Instructor of Learning, Technology, and Leadership Education.
B.A., State University of New York at Potsdam; M.Ed., James Madison University; Ed.D., Nova University Southeastern.
- Shawn R. Lough**, Lecturer of Computer Information Systems and Business Analytics.
B.B.A., M.B.A., James Madison University.
- Douglas J. Loveless**, Associate Professor of Early, Elementary and Reading Education.
B.S., M.S., Ph.D., Texas A&M University – Corpus Christi.
- Matthew S. Lovesky**, Instructor of Health Sciences.
B.S., Slippery Rock University; M.S., James Madison University.
- Sharon E. Lovell**, Dean, College of Health and Behavioral Studies; Professor of Psychology.
B.S., James Madison University; M.A., Ph.D., Bowling Green State University.
- LouAnn Lovin**, Interim Head, Department of Mathematics and Statistics; Professor of Mathematics and Statistics.
B.S., North Carolina State University; B.A., Cameron University; M.S., Western Carolina University; Ph.D., University of Georgia.
- Joseph R. Loyacano III**, Instructor of Media Arts and Design; Academic Adviser, University Advising.
B.A., M.A., James Madison University.
- Caroline P. Lubert**, Professor of Mathematics and Statistics.
B.S., Ph.D., University of Exeter.
- Howard L. Lubert**, Professor of Political Science.
B.A., Rutgers the State University of New Jersey; M.A., Ph.D., Duke University.
- Melissa M. Lubin**, Dean of Professional & Continuing Education.
B.G.S., Armstrong State College; M.B.A., Georgia Southern University; Ph.D., Virginia Polytechnic Institute and State University.
- Stephen K. Lucas**, Professor of Mathematics and Statistics.
B.MATH, University of Wollongong; Ph.D., University of Sydney.
- Nicholas D. Luden**, Associate Professor of Kinesiology.
B.S., Slippery Rock University; M.S., James Madison University; Ph.D., Ball State University.
- Patrice M. Ludwig**, Associate Professor of Biology.
B.S., M.S., James Madison University; Ph.D., University of Virginia.
- William E. Lukens**, Assistant Professor of Geology and Environmental Science.
B.S., M.S., Temple University; Ph.D., Baylor University.
- Steven S. Lunsford**, Professor of Writing, Rhetoric and Technical Communication.
B.A., University of Texas of the Permian Basin; M.A., DePaul University; Ph.D., University of Texas at El Paso.
- Tracy A. Lupher**, Professor of Philosophy.
B.A., B.S., M.A., Ph.D., University of Texas at Austin; M.A., University of Pittsburgh.
- Sarah M. Lupo**, Assistant Professor of Early, Elementary and Reading Education.
B.S., M.S. University of Virginia.
- Claire W. Lyons**, Professor of Psychology.
B.Sc., Trinity College, Dublin, (Ireland); M.Sc., Psychology, University of Limerick (Ireland); Ph.D., Queen's University, Belfast, (Northern Ireland).
- Paul E. Mabrey III**, Assistant Professor of Communication Studies.
B.G.S., Fort Hays University; M.A., Georgia State University.

- Gina MacDonald Handal**, Professor of Chemistry and Biochemistry.
B.S., University of Connecticut; Ph.D., University of Minnesota.
- Roderick H. MacDonald**, Assistant Professor of Integrated Science and Technology.
B.S., State University of New York at Brockport; M.P.A., Ph.D., State University of New York at Albany.
- Dorothy Maddison**, Professor of Music.
B.M., St. Olaf College; Postgraduate Studies, Guildhall School of Music and Drama (London); M.M., D.M.A., Arizona State University.
- Sharon F. Maiewski**, Associate Professor of Health Professions.
B.S., College of Charleston; B.S., The George Washington University; M.S., Nova Southeastern University.
- Robert Inman Majors**, Professor of English.
B.A., Vanderbilt University; M.F.A., University of Alabama.
- Lucy B. Malenke**, Writing Instructor and Liaison to CHBS; Assistant Professor, College of Health and Behavioral Studies.
B.A., University of North Carolina at Chapel Hill; M.F.A., Pennsylvania State University.
- Jennifer M. Mangan**, Assistant Professor of Interdisciplinary Liberal Studies.
B.S., Rutgers the State University of New Jersey; M.S., Pennsylvania State University; Ph.D., University of Colorado Boulder.
- Bernice A. Marcopulos**, Professor of Graduate Psychology.
B.A., University of Florida; M.A., Ph.D., University of Victoria.
- Ina S. Markham**, Professor of Computer Information Systems and Business Analytics.
B.A., M.A., Calcutta University; M.B.A., Ph.D., Virginia Polytechnic Institute and State University.
- Neil D. Marrin**, Lecturer of Sport and Recreation Management.
B.A., State University of New Jersey – Ramapo College; M.S.Ed., City University of New York – Lehman College.
- Stephen P. Marrin**, Associate Professor of Integrated Science and Technology.
B.A., Colgate University; M.A., Ph.D., University of Virginia.
- Mallory L. Marsh**, Instructor of Communication Studies.
B.J., University of Nebraska-Lincoln; M.A., University of Alabama.
- Cynthia S. Martin**, Instructor of Writing, Rhetoric and Technical Communication.
B.A., James Madison University; M.A., Virginia Polytechnic Institute and State University.
- Marianne Mason**, Associate Professor of Foreign Languages, Literatures and Cultures.
B.B.A.; M.A., University of Puerto Rico; Ph.D., University of Georgia.
- Abby J. Massey**, Assistant Professor of Health Professions.
B.S., James Madison University; M.D., University of Maryland School of Medicine; Post-graduate Residency, University of Maryland Medical Center.
- Gloria M. Mast**, Interim Dean of Students.
B.S., Eastern Mennonite University; M.Ed. James Madison University
- Smita Mathur**, Associate Professor of Early, Elementary and Reading Education.
B.S., Rajasthan University (India); M.S., Maharaja Sayajirao University of Baroda (India); Ph.D., Syracuse University.
- Mark E. Mattson**, Associate Professor of Physics and Astronomy.
B.S., M.S., Ph.D., Virginia Polytechnic Institute and State University.
- Dietrich Maune**, Interim Executive Director, Center for Global Engagement; Professor of Media Arts and Design.
B.F.A., M.F.A., East Carolina University.
- Paula J. Maxwell**, Associate Vice Provost for Faculty and Curriculum; Professor of Health Professions.
B.S., Houghton College; M.S., Indiana State University; Ph.D., University at Buffalo.
- Christine L. May**, Associate Professor of Biology.
B.S., Humboldt State University; M.S., Ph.D., Oregon State University.
- Jeffrey L. May**, Associate Professor of Computer Information Systems and Business Analytics.
B.S., Wright State University; M.S., Virginia Polytechnic and State University; M.S., Ph.D., Virginia Commonwealth University.
- C. Lee Mayfield**, Lecturer of Communication Studies.
B.F.A., University of Mississippi; M.A., University of Alabama.
- Christopher S. Mayfield**, Associate Professor of Computer Science.
B.S., University of Utah; M.S., Ph.D., Purdue University.
- Frederick D. Mayhew**, Associate Professor of Political Science.
B.A., Dickinson College; M.P.A., Ph.D., North Carolina State University.
- Lisa M. Maynard**, Associate Professor of Music.
B.M., University of Queensland; M.M., Ph.D., University of Texas at Austin.

- Marsha E. Mays-Bernard**, Associate Vice President for Wellness, Orientation and Multicultural Engagement.
B.S., Hampton University; M.S., James Madison University.
- Sharon R. Mazzarella**, Professor of Communication Studies.
B.S., Northwestern University; Ph.D., University of Illinois at Urbana-Champaign.
- Eugene F. McCarthy**, Assistant Professor of Finance and Business Law.
B.A., Rutgers College; M.A., Pennsylvania State University; J.D., University of California, Los Angeles; Ph.D., University of California, Berkeley.
- Seán R. McCarthy**, Associate Professor of Writing, Rhetoric and Technical Communication.
B.A., National University of Ireland; M.A., Tulane University; Ph.D., University of Texas at Austin.
- Holly B. McCartney**, Professor of Early, Elementary and Reading Education.
B.S., M.Ed., James Madison University; Ph.D., University of Virginia.
- Jack H. McCaslin II**, Professor of Art.
B.F.A., Kansas State University; M.F.A., University of Nebraska – Lincoln.
- Kristen L. McCleary**, Associate Professor of History.
B.A., University of California, San Diego; M.A., M.A., Ph.D., University of California, Los Angeles.
- James W. McConnell**, Associate Vice President for Student Life and Involvement.
B.A., M.A., University of South Florida; Ed.D., University of Virginia.
- Dawn M. McCusker**, Professor of Graphic Design.
B.F.A., Eastern Michigan University; M.F.A., University of Illinois at Urbana-Champaign.
- Kathryn M. McDaniel**, Transfer Advising Coordinator, University Advising.
B.A., University of Vermont; M.Ed., George Mason University.
- Karen M. McDonnell**, Instructor of Writing, Rhetoric and Technical Communication.
B.A., M.A., James Madison University.
- R. Shane McGary**, Assistant Professor of Geology and Environmental Science.
B.S., Texas A&M University; Ph.D., Massachusetts Institute of Technology.
- Marquis McGee**, Associate Director of University Advising.
B.A., University of North Carolina at Asheville; M.A., Ed.D, University of North Carolina at Charlotte.
- David K. McGraw**, Assistant Director, School of Integrated Sciences; Professor of Integrated Science and Technology.
B.S., Toccoa Falls College; M.S.I.S., University of Pittsburgh; M.A.S., Southeastern Oklahoma State University; J.D., Georgetown University Law Center.
- Lisa E. McGuire**, Head, Department of Social Work; Professor of Social Work.
B.S., Butler University; M.S.W., Indiana University; Ph.D., Case Western Reserve University.
- Catherine A. McKay**, Assistant Professor of Kinesiology.
B.S., James Madison University; M.S.Ed., Virginia Polytechnic Institute and State University; Ed.D., University of Virginia.
- Robert L. McKown**, Professor of Integrated Science and Technology.
B.S., Ph.D., University of California, Irvine.
- Heather A. McLeod**, Assistant Professor of Engineering.
B.S., University of Nebraska-Lincoln; M.S., Ph.D., University of Kansas
- Paula M. McMahan**, Academic Adviser; Instructor of Kinesiology.
B.S., James Madison University; M.Ed., James Madison University.
- Kevin J. McMillan**, Professor of Music.
B.M., University of Western Ontario; M.M., Julliard School.
- Robert M. McMillen**, Lecturer of Marketing.
B.S., West Virginia University; M.B.A., James Madison University.
- Conley K. McMullen**, Professor of Biology.
B.S., Eastern Mennonite University; M.S., James Madison University; Ph.D., University of Maryland, College Park.
- Benjamin D. Meade**, Associate Professor of Justice Studies.
B.S., University of Virginia's College at Wise; M.A., Ph.D., University of South Carolina.
- Shana L. Meganck**, Assistant Professor of Communication Studies.
B.A., Mary Baldwin College; M.A., University of Georgia; Ph.D., Virginia Commonwealth University.
- Cara Meixner**, Executive Director, Center for Faculty Innovation; Associate Professor of Graduate Psychology.
B.S., James Madison University; M.A., University of Maryland–College Park; Ph.D., Antioch University.
- Richard B. Meixsel**, Associate Professor of History.
B.A., Kansas State University; M.A., University of Georgia; Ph.D., The Ohio State University.

- Kala J. Melchiori**, Assistant Professor of Psychology
B.A., Marshall University; M.A., Ph.D., Loyola University.
- Gwyneth Mellinger**, Director, School of Media Arts and Design.
B.A., Mills College; M.A., Emporia State University; M.S., Ph.D., University of Kansas.
- Iarion V. Melnikov**, Assistant Professor of Physics and Astronomy.
B.A., Cornell University; M.A., Ph.D., Duke University.
- Julia M. Merkel**, Preservation Officer; Assistant Professor, Libraries.
B.F.A., University of Notre Dame; M.F.A., James Madison University.
- Laura K. Merrell**, Assistant Professor of Health Sciences.
B.A., University of North Carolina at Greensboro; M.P.H., Ph.D., University of South Florida.
- Joi D. Merritt**, Associate Professor of Early, Elementary and Reading Education.
B.S., M.S., Ph.D. University of Michigan.
- Robert J. Mertens**, Associate Professor of Art, Design and Art History.
B.F.A., The School of the Art Institute of Chicago; M.F.A., The University of Oregon.
- Erika Metzler Sawin**, Associate Professor of Nursing.
B.A., Goshen College; M.S.N., University of Texas; Ph.D., University of Virginia.
- Diana Meza**, Instructor of Learning, Technology and Leadership Education.
B.A., M.Ed., James Madison University.
- Jonathan J. Miles**, Professor of Integrated Science and Technology.
B.A., Clark University; Ph.D., University of Massachusetts.
- Callie A. Miller**, Assistant Professor of Engineering.
B.S., James Madison University; M.A., Ph.D., University of Pittsburgh.
- Carol L. Miller**, Assistant Director of Global Scholarship and Engagement, Center for Global Engagement.
B.S., M.S., Virginia Polytechnic Institute and State University.
- Suzanne Miller-Corso**, Professor of Dance.
B.F.A., Towson State University; M.F.A., University of Colorado Boulder.
- Timothy M. Miller**, Vice President for Student Affairs
B.S., M.Ed., James Madison University; Ed.D., The George Washington University.
- Scott R. Milliman**, Professor of Economics.
B.A., University of California, Santa Cruz; M.A., Ph.D., University of Wisconsin, Madison.
- Aisha T. Mitchell**, Assistant Professor of Media Arts and Design.
B.F.A., American University; M.S., Ph.D., University of Illinois.
- Michel Mitri**, Professor of Computer Information Systems and Business Analytics.
B.A., University of Michigan; M.S., Ph.D., Michigan State University.
- Sushil Mittal**, Professor of Religion.
B.A., McGill University; M.A., Carleton University; Ph.D., University of Montreal.
- Michael Moghtader**, Academic Adviser, Interdisciplinary Liberal Studies.
B.A., Pennsylvania State University; M.A., James Madison University; Ph.D., The University of New Mexico.
- Debra L. Mohler**, Associate Professor of Chemistry and Biochemistry.
B.S., The College of William & Mary; M.S., Ph.D., University of California, Berkeley.
- Rudy M. Molina, Jr.**, Vice Provost for Academic Student Success and Enrollment Management.
B.A., M.A., Ph.D., University of Arizona.
- Cathryn S. Molloy**, Associate Professor of Writing, Rhetoric and Technical Communication.
B.A., St. Joseph's University; M.A., Ph.D., University of Rhode Island.
- Kevin P. Molloy**, Assistant Professor of Computer Science.
B.S., M.S., Ph.D., George Mason University.
- Jonathan D. Monroe**, Professor of Biology.
B.S., University of Michigan; Ph.D., Cornell University.
- Yenisei Montes de Oca**, Assistant Professor of Foreign Languages, Literatures and Cultures.
B.A., M.A., Ph.D., University of California, Riverside.
- Fawn-Amber Montoya**, Associate Dean for Diversity, Inclusion and External Engagement, Honors College; Professor of History.
B.A., Brigham Young University; M.A., Ph.D., University of Arizona.

Debali Mookerjee-Leonard, Professor of English.

B.A., M.A., Jadavpur University; M.A., University of Minnesota; M.A., Ph.D., University of Chicago.

Colleen M. Moore, Assistant Professor of History.

B.A., American History; M.A., Ph.D., Indiana University-Bloomington.

Kathleen A. Moore, Associate Professor of Integrated Science.

B.A., Mercyhurst University; Ph.D., Pennsylvania State University.

Rebekah D. Moore, Assistant Professor of Accounting; DHG Faculty Scholar.

B.S.B.A., M.Acc., Ph.D., University of Tennessee.

Thomas E. Moran, Associate Professor of Kinesiology.

B.S.Ed., M.S.Ed. State University of New York at Cortland; Ph.D., University of Virginia.

Hugo Moreira Blanco, Instructor of Foreign Languages, Literatures and Cultures.

B.A., James Madison University.

Kathryn N. Morris, Assistant Professor, Head, Special Collections, Libraries.

B.A., James Madison University; M.S., State University of New York at Albany.

Lucy D. Morris, Lecturer of Foreign Languages, Literatures and Cultures.

B.A., Brigham Young University; M.A., University of Utah.

Samuel A. Morton, III, Associate Professor of Engineering.

B.S., Tennessee Technological University; M.S., University of Tennessee Space Institute; Ph.D., The University of Tennessee, Knoxville.

Dana L. Moseley, Assistant Professor of Biology.

B.S., University of North Carolina; Ph.D., University of Massachusetts Amherst.

Fariss-Terry I. Mousa, Associate Professor of Management; Zane D. Showker Professor of Entrepreneurship.

B.B.A., M.B.A., Ph.D., Washington State University.

Brilliant Muhonja, Professor of English.

B.A., Egerton University, (Kenya); M.A., Ph.D., Binghamton University.

Lauren K. Mullen, Assistant Professor of Nursing.

B.S.N., M.S.N., James Madison University.

Margaret M. Mulrooney, Associate Vice Provost, University Programs; Professor of History.

B.A., University of Delaware; M.A., Ph.D., The College of William & Mary.

Galen B. Murton, Assistant Professor of Integrated Sciences.

B.A., Middlebury College; M.A., Tufts University; Ph.D., University of Colorado at Boulder.

Leigh A. Mutchler, Assistant Professor of Computer Information Systems and Business Analytics.

B.S., The University of Memphis; M.S., Ph.D., Mississippi State University.

Piyusha Mutreja, Assistant Professor of Economics.

B.A., University of Delhi, Hansraj College, (India); M.A., Ph.D., The University of Iowa.

Joy K. Myers, Interim Head, Early, Elementary & Reading Education Department; Assistant Professor of Early, Elementary and Reading Education.

B.S., Missouri State University; M.Ed., Ph.D., University of North Carolina at Greensboro.

Karen L. Myers, Associate Professor of Social Work.

B.A. Eastern Mennonite University; M.S.W., J.D., New York University.

Jacquelyn K. Nagel, Associate Professor of Engineering.

B.S., M.S., Missouri University of Science & Technology; Ph.D., Oregon State University.

Robert L. Nagel, Associate Professor of Engineering.

B.S., Trine University; M.S., Missouri University of Science and Technology; Ph.D., Oregon State University.

Kelly A. Naletelich, Assistant Professor of Marketing.

B.S., Rocky Mountain College; M.B.A., Midwestern State University; Ph. D, University of North Texas.

Carole L. Nash, Associate Professor of Integrated Science and Technology; Affiliate Faculty of Sociology and Anthropology.

B.S., James Madison University, M.A., Bowling Green State University; Ph.D., Catholic University of America.

Kane Nashimoto, Professor of Mathematics and Statistics.

B.A., Bemidji State University; M.A., University of North Dakota; M.A., University of Missouri; Ph.D., University of Missouri – Columbia.

Alexandra V. Naumenko, Assistant Professor of Economics.

B.S., Pennsylvania State University; Ph.D., North Carolina State University.

- C. Leigh Nelson**, Professor of Communication Studies.
B.A., M.A., Washington State University; Ph.D., Purdue University.
- Hala Y. Nelson**, Associate Professor of Mathematics and Statistics.
B.S., Beirut Arab University (Lebanon); M.S., American University of Beirut (Lebanon); Ph.D., New York University.
- Andre R. Neveu**, Associate Professor of Economics.
B.A., University of Rochester; Ph.D., City University of New York.
- Bradley R. Newcomer**, Dean, Honors College; Professor of Physics and Astronomy.
B.S., Juniata College; M.B.A., University of Alabama at Birmingham; M.S., Ph.D., Wright State University.
- Misty J. Newman**, Associate Director for Alternative Break Programs.
B.S., Heidelberg University; M.Ed., James Madison University.
- Nancy B. Nichols**, Journal of Accounting Education Professor; Professor of Accounting.
B.A., University of South Florida; M.S., Ph.D., University of North Texas.
- Gabriel Niculescu**, Professor of Physics and Astronomy.
M.S., Bucharest University (Romania); Ph.D., Hampton University.
- M. Ioana Niculescu**, Professor of Physics and Astronomy.
M.S., Bucharest University (Romania); Ph.D., Hampton University.
- Yingjiu Nie**, Associate Professor of Communication Sciences and Disorders.
B.Med., Nanhua University (China); M.Med., Capital University of Medical Sciences (China); M.A., Ph.D., University of Minnesota; CCC-A.
- Aaron Noland**, Assistant Professor, Assistant Dean for Strategy & Development, Libraries.
B.A., West Virginia Wesleyan College; M.A., Miami University of Ohio; Ph.D., James Madison University.
- Michael L. Norton**, Associate Professor of Computer Science.
B.M.Ed., M.S., James Madison University; M.A., Ph.D., The Ohio State University.
- Luis J. Novoa de Oro**, Assistant Professor of Computer Information Systems and Business Analytics.
M.S., Universidad de los Andes; Ph.D., George Washington University.
- Bethany P. Nowvickie**, Dean of Libraries; Professor of English.
B.A., Ph.D., University of Virginia; M.A.Ed., Wake Forest University.
- Susan B. Nye**, Professor of Kinesiology.
B.S., Roanoke College; M.A., Ph.D., The Ohio State University.
- Sarah H. O'Connor**, Professor of Writing, Rhetoric and Technical Communication.
B.A., Brandeis University; M.F.A., University of Virginia.
- Cynthia R. O'Donoghue**, Head, Department of Communication Sciences and Disorders; Professor of Communication Sciences and Disorders.
B.A., Clemson University; M.Ed., Ph.D., University of Virginia; CCC-SLP.
- Toluwalogo B. Odumosu**, Associate Professor of Integrated Science and Technology.
B.S., University of Lagos (Nigeria); M.Eng., Cornell University; Ph.D., Rensselaer Polytechnic Institute.
- Adebayo A. Ogundipe**, Interim Head, Department of Engineering; Associate Professor of Engineering.
B.S., University of Lagos; M.E., Ph.D., Stevens Institute of Technology.
- Minah Oh**, Associate Professor of Mathematics and Statistics.
B.S., Yonsei University; M.S., Ph.D., University of Florida.
- Shane T. O'Hara**, Professor of Dance.
B.A., Western Washington University; M.F.A., Arizona State University.
- Travis A. Olson**, Visiting Assistant Professor of Mathematics and Statistics.
B.S.E., University of Wisconsin at Oshkosh; M.S., Ph.D., Colorado State University.
- William M. O'Meara**, Professor of Philosophy.
B.A., M.A., Ph.D., Loyola University.
- Susan K. Opt**, Professor of Communication Studies.
B.F.A., Wright State University; M.A., Ph.D., The Ohio State University.
- Imelda C. O'Reilly**, Associate Professor of Media Arts and Design.
B.A., Queens College; M.F.A., Columbia University.
- Edwin O'Shea**, Associate Professor of Mathematics and Statistics.
B.Sc., University College (Ireland); Ph.D., University of Washington.
- John W. Ott**, Professor of Art History.
B.A., Stanford University; M.A., Ph.D., University of California, Los Angeles.

- M. Katherine Ott Walter**, Associate Professor of Health Sciences.
B.A., Kent State University; M.S., West Virginia University.
- David Owusu-Ansah**, Associate Provost for Diversity; Executive Director for Faculty Access and Inclusion; Professor of History.
B.A., University of Cape Coast (Ghana); M.A., McGill University; Ph.D., Northwestern University.
- Marion M. Owyar-Hosseini**, Director, Program of International Business; Professor of International Business; Professor of Management.
B.A., Ealing Technical College; M.B.A., Marshall University; Ph.D., University of Houston.
- Timucin Ozcan**, Assistant Professor of Marketing.
M.B.A., University of Tampa; Ph.D., University of Rhode Island.
- Raktim Pal**, Professor of Computer Information Systems and Business Analytics.
B.Tech., Indian Institutes of Technology (India); M.S., Ph.D., Purdue University.
- Sanduni P. Palliyage**, Visiting Assistant Professor of Mathematics and Statistics.
B.S., University of Peradeniya (Sri Lanka); M.S., Southern Illinois University Edwardsville; Ph.D., Western Michigan University.
- Susan W. Palocsay**, Professor of Computer Information Systems and Business Analytics.
B.S., James Madison University; M.S., D.Sc., George Washington University.
- Maria C. Papadakis**, Professor of Integrated Science and Technology.
B.A., Virginia Polytechnic Institute and State University; M.A., Ph.D., Indiana University.
- Matthew J. Pardo**, Assistant Professor of Dance.
B.F.A., University at Buffalo; M.F.A., University of Wisconsin-Milwaukee.
- Fernando A. Pargas**, Lecturer of Management.
B.A., George Mason University; M.B.A., Virginia Polytechnic and State University.
- Hyejin Park**, Assistant Professor of Mathematics and Statistics.
B.S., Seoul Women's University (South Korea); M.Ed., Korea University (South Korea); M.A., Ph.D., University of Georgia.
- David L. Parker**, Lecturer of Business Law; Lecturer of International Business.
B.A., Virginia Military Institute; L.L.M., The Judge Advocate General's School; J.D., University of Richmond.
- Janna M. Parker**, Assistant Professor of Marketing.
B.A. California State University, Sacramento; M.B.A. Cameron University; D.B.A. Louisiana Tech University.
- Mark L. Parker**, Professor of English.
B.A., University of Alabama; Ph.D., Harvard University.
- Michael R. Parker**, Assistant Professor of Biology.
B.S., University of Arkansas; M.S., Washington State University; Ph.D., Oregon State University.
- Ryan C. Parkhurst**, Assistant Professor of Media Arts and Design.
B.A., State University of New York at Oswego; M.S., Syracuse University.
- Alex C. Parrish**, Associate Professor of Writing, Rhetoric and Technical Communication.
B.F.A., Bemidji State University; M.A., York University; Ph.D., Washington State University.
- Tara N. Parsons Kristiansen**, Associate Professor of Justice Studies.
B.A., University of Central Arkansas; Ph.D., University of Missouri.
- Elizabeth R. Pass**, Associate Professor of Writing, Rhetoric and Technical Communication.
B.A., Texas A&M University; M.A., Ph.D., Texas Tech University.
- Dena A. Pastor**, Professor of Graduate Psychology; Senior Assessment Specialist, Center for Assessment and Research Studies.
B.A., Ph.D., University of Texas at Austin.
- Joshua R. Pate**, Associate Professor of Sport and Recreation Management.
B.S., M.S., Ph.D., University of Tennessee.
- Kurtis G. Paterson**, Associate Professor of Engineering.
B.S., M.S., Ph.D., The University of Iowa;
- Marshall W. Pattie**, Professor of Management.
B.S., Texas Christian University; M.B.A. George Washington University; Ph.D., University of Texas at Arlington.
- Amy L. Paugh**, Professor of Anthropology.
B.A., Rutgers the State University of New Jersey; M.A., Ph.D., New York University.
- Scott A. Paulson**, Head, Interdisciplinary Liberal Studies; Associate Professor of Physics and Astronomy.
B.S., St. Vincent's College; Ph.D., University of North Carolina at Chapel Hill.

- Andrew A. Peachey**, Acting Head, Department of Health Sciences; Associate Professor of Health Sciences.
B.S., Guilford College; M.A., DrPH., University of North Carolina at Greensboro.
- Liliokanaio Peaslee**, Professor of Political Science.
B.A., University of Vermont; M.A., Ph.D., Brandeis University.
- Jennifer J. PeeksMease**, Associate Professor of Communication Studies.
B.A., Villanova University; M.A., Arizona State University; Ph.D., University of North Carolina, Chapel Hill.
- Heidi L. Pennington**, Assistant Professor of English.
B.A., The College of William and Mary; M.A., Ph.D., Washington University in St. Louis.
- Andrea Pesce**, Lecturer of Biology.
B.S., University of Virginia; M.S., University of Michigan.
- Gretchen M. Peters**, Assistant Professor of Chemistry and Biochemistry.
B.A., Luther College; Ph.D., University of Maryland.
- Connie L. Peterson**, Associate Professor of Health Professions.
B.S., Indiana University; M.S., Ithaca College; Ph.D., University of Georgia.
- David R. Peterson**, Assistant Professor of Management.
B.A., Brigham Young University; M.S., Ph.D., University of Oklahoma.
- John R. Peterson**, Associate Professor of Music.
B.M., University of Western Ontario (Canada); M.M., University of Colorado Boulder; Ph. D., Florida State University.
- Maureen A. Pfahler**, Instructor of Kinesiology.
B.S., James Madison University; M.Ed., University of Virginia.
- Kevin B. Phaup**, Assistant Professor of Industrial Design and Foundations.
B.A., B.F.A, Miami University, Oxford, OH; M.F.A., University of Notre Dame.
- Diane K. Phoenix-Neal**, Assistant Professor of Music.
B.M., University of North Carolina School of the Arts; M.M., Julliard School; D.M.A., University of North Carolina at Greensboro.
- Lori E. Piitz**, Professor of Music.
B.M., University of Ottawa; M.M., D.M., Indiana University.
- Erin G. Piker**, Associate Professor of Communication Sciences and Disorders.
B.A., Indiana University; M.S., Vanderbilt University; Ph.D., University of Oregon.
- Mark C. Piper**, Associate Professor of Philosophy.
B.A., Ph.D., St. Louis University; M.A., University of York.
- Taricia L. Pippert**, Lecturer of Hospitality Management.
A.S., Blue Ridge Community College; B.I.S., James Madison University; B.S., M.Ed., James Madison University.
- Margaret S. Plass**, Professor of Justice Studies.
B.A., Loyola University; M.A., Memphis State University; Ph.D., University of New Hampshire.
- Linda Plitt Donaldson**, Associate Dean, College of Health and Behavioral Studies; Director, Institute for Innovation in Health and Human Services; Professor of Social Work.
M.S.W., University of Maryland at Baltimore; Ph.D., Catholic University of America.
- Nancy T. Poe**, Associate Professor of Social Work.
B.A., Roanoke College; M.S.W., Virginia Commonwealth University; Ph.D., Virginia Polytechnic Institute and State University.
- Dorothee Polanz**, Associate Professor of Foreign Languages, Literatures and Cultures.
Ph.D., University of Maryland, College Park.
- David J. Pope**, Professor of Music.
B.M., University of Massachusetts Amherst; M.M., Eastman School of Music.
- Lisa L. Porter**, Assistant Professor of Sociology.
B.A., University of Wyoming; M.A., California Lutheran University; Ph.D., Claremont Graduate University.
- Margarita Poteyeva**, Associate Professor of Justice Studies.
Law, International University in Moscow (Russia); M.S., Eastern Kentucky University; Ph.D., University of Delaware.
- Stephen C. Poulson**, Professor of Sociology.
B.S., James Madison University; M.A., Florida State University; Ph.D., Virginia Polytechnic Institute and State University.
- Danielle E. Price**, Assistant Professor of English.
B.A., M.A., University of Ottawa (Canada); M.A., Ph.D., University of California, Los Angeles.
- Elizabeth L. Price**, Assistant Professor, Business Librarian, Libraries.
B.S., Ohio University; M.L.I.S., University of Kentucky.

- Robert J. Prins**, Associate Professor of Engineering.
B.S., Michigan Technological University; M.S., University of Virginia; Ph.D., Virginia Polytechnic Institute and State University.
- Samantha C. Prins**, Interim Dean, College of Science and Mathematics; Professor of Mathematics and Statistics.
B.Sc., University of Auckland (New Zealand); M.S., Ph.D., University of Washington.
- Regina T. Prodoehl**, Lecturer of Health Sciences.
B.S., James Madison University; M.S., Eastern Kentucky University; Ph.D., Southern Illinois University.
- Nancy L. Puffenbarger**, Assistant Professor of Nursing.
B.S.N., M.S.N., James Madison University.
- Joshua M. Pulos**, Assistant Professor of Educational Foundations and Exceptionalities.
B.F.A., M.Ed., Ph.D., University of Oklahoma.
- Eric J. Pyle**, Professor of Geology and Environmental Science.
B.S., University of North Carolina at Charlotte; M.S., Emory University; Ph.D., University of Georgia.
- Katie S. Quartermous**, Associate Professor of Mathematics and Statistics.
B.S., University of South Carolina; M.S., Ph.D., University of Virginia.
- Ronald W. Raab**, Professor of Integrated Science and Technology.
B.A., M.A., University of California, Santa Barbara; Ph.D., Texas A&M University.
- Charles H. Radcliffe**, Instructor of Writing, Rhetoric and Technical Communication.
B.A., Wake Forest University; M.A., Appalachian State University.
- Zareen G. Rahman**, Assistant Professor of Middle, Secondary and Mathematics Education.
B.S., M.S., Montclair State University.
- Mark C. Rankin**, Professor of English.
B.S.Ed., M.A., Ohio University; Ph.D., The Ohio State University.
- Paul L. Raston**, Assistant Professor of Chemistry and Biochemistry.
B.Sc., Griffith University; Ph.D., University of Wyoming.
- Matthew E. Rebhorn**, Professor of English.
B.A., (Hons.), University of Chicago; M.A., University of Virginia; M.Phil., Ph.D., Columbia University.
- Tomás Regalado-López**, Associate Professor of Foreign Languages, Literatures and Cultures.
B.A., M.A., Ph.D., Universidad de Salamanca (Spain).
- Steven A. Reich**, Professor of History.
B.A., Lawrence University; Ph.D., Northwestern University.
- Matthew R. Reidenbach**, Assistant Professor of Accounting; Hantzmon Wiebel, LLP Faculty Scholar.
B.S., Grove City College; Ph.D., Drexel University.
- Monica J. Reis-Bergan**, Assistant Head, Department of Psychology; Professor of Psychology.
B.S., M.S., Ph.D., Iowa State University.
- Barbara A. Reisner**, Professor of Chemistry and Biochemistry.
A.B., Princeton University; Ph.D., University of California, Berkeley.
- Michael H. Renfroe**, Professor of Biology.
B.S., North Carolina State University; M.S., The Ohio State University; M.Phil., Ph.D., Yale University.
- Kevin J. Reynolds**, Bridgeforth Endowed Professor of Telecommunications; Professor of Media Arts and Design.
B.A., University of Minnesota; M.F.A., Columbia University.
- Tobias J. Reynolds-Tylus**, Assistant Professor of Communication Studies.
B.A., M.A., University at Buffalo, State University of New York; Ph.D., University of Illinois.
- Kirsten E. Richards**, Assistant Professor of Computer Science.
B.A., Life Pacific College; M.S., Ph.D., University of Maryland, Baltimore County.
- Sharlene T. Richards**, Professor of Communication Studies.
B.A., M.A., George Mason University; Ph.D., University of Oklahoma.
- Timothy M. Richards**, Visiting Assistant Professor of Computer Science and Information Technology.
A.A., Antelope Valley College; B.A., Life Pacific University; M.S., Ph.D., University of Maryland, Baltimore County.
- Elizabeth E. Richardson**, Instructor of Health Professions.
B.S., M.S., James Madison University.
- Robert C. Richardson**, Baker Tilly Faculty Scholar; Associate Professor of Accounting.
B.A., Clemson University; M.S., Ph.D., Virginia Polytechnic Institute and State University.

- Benjamin S. Riden**, Assistant Professor of Educational Foundations and Exceptionalities.
B.A., Shippensburg University; M.Ed., University of Utah; Ph.D., Pennsylvania State University.
- Don G. Rierson**, Associate Professor of Music.
B.A., University of North Carolina at Chapel Hill; M.S., Radford University; M.M., Ph.D., Florida State University.
- Terrie K. Rife**, Associate Professor of Biology.
B.S., Michigan State University; Ph.D., The Ohio State University.
- Scott D. Ridders**, Assistant Professor of Music.
B.M.E., Western Michigan University; M.M.E., James Madison University.
- Philip B. Riley**, Visiting Assistant Professor of Computer Science.
B.S., University of Chicago; M.A., Duke University; M.S., James Madison University.
- Consuelo V. Riso**, Instructor of Foreign Languages, Literatures and Cultures.
B.S., University for Interpreters and Translators (Italy); M.A., San Pio V University of Rome (Italy); M.A., Ca'Foscari University of Venice (Italy).
- William J. Ritchie**, Professor of Management and CSX Professor.
B.S., University of South Florida; M.B.A., Ph.D., Florida State University.
- Stuart P. Rittenhouse**, Geospatial Projects Coordinator; Instructor of Geographic Science.
B.A., M.T., University of Virginia.
- Robert N. Roberts**, Professor of Political Science.
B.A., M.P.A., J.D., Ph.D., Syracuse University.
- Taryn E. Roberts**, Director of Study Abroad, Center for Global Engagement.
B.S., High Point University; M.Ed., University of Virginia.
- Christine M. Robinson**, Professor of Justice Studies.
B.A., Salisbury State University; M.A., University of Memphis; Ph.D., University of Kansas.
- Daniel L. Robinson**, Associate Director, Institute for Creative Inquiry; Instructor of Art.
B.S., Radford University; M.F.A., James Madison University.
- Jamie D. Robinson**, Associate Director for Undergraduate Programs; Assistant Professor of Nursing.
B.S.N., Shenandoah University; M.S.N., University of Virginia; Ph.D., Virginia Commonwealth University.
- John A. Robinson**, Assistant Professor of Integrated Science and Technology.
B.S., James Madison University; M.A., Ph.D., George Mason University.
- Christina C. Roeder**, Lecturer of Management.
B.S., Bridgewater College, M.B.A., James Madison University.
- Mark D. Rooker**, Professor of Art.
B.F.A., M.F.A., (Graphic Design), M.F.A. (Metals), University of Illinois at Urbana-Champaign.
- Christopher S. Rose**, Professor of Biology.
B.S., McMaster University; M.S., University of Victoria; A.M., Ph.D., Harvard University.
- Jason D. Rosenhouse**, Professor of Mathematics and Statistics.
B.S., Brown University; M.A., Ph.D., Dartmouth College.
- Jennifer G. Rosier**, Associate Professor of Communication Studies.
B.A., University of Maryland; M.A., Auburn University; Ph.D., Purdue University.
- J. Barkley Rosser Jr.**, Kirby L. Cramer, Jr. Chair of Business Administration; Professor of Economics.
B.A., M.A., Ph.D., University of Wisconsin., Madison.
- Christina M. Rost**, Assistant Professor of Physics and Astronomy.
B.S., M.S., Indiana University of Pennsylvania; Ph.D., North Carolina State University.
- Ayasakanta Rout**, Professor of Communication Sciences and Disorders.
B.S., University of Bombay (India); M.S., All India Institute of Speech and Hearing (India); Ph.D., Purdue University.
- Ronald J. Rubin**, Lecturer of Finance and Business Law.
B.S., University of Tennessee; M.S., Northeastern University.
- Eric K. Ruple**, Professor of Music.
B.M., M.M., Arizona State University; D.M.A., University of Michigan; Artist Diploma, University of Cincinnati.
- Amy Russell Yun**, Assistant Professor of Health Professions.
B.A., Clark University; M.S., Springfield College; O.T.D., Nova Southeastern University.
- Kenneth R. Rutherford**, Professor of Political Science.
B.A., M.B.A., University of Colorado; M.A.L.S., Ph.D., Georgetown University.

- Matthew A. Rutherford**, Professor of Management.
B.S., Virginia Polytechnic Institute and State University; Ph.D., University of Georgia.
- Sarah C. Sackett**, Associate Professor of Kinesiology.
B.A., Hartwick College; M.S., University of North Carolina at Greensboro; Ph.D., Michigan State University.
- Emil H. Salib**, Professor of Integrated Science and Technology.
B.Sc., M.Sc., Cairo University (Egypt); Ph.D., The University of Wollongong (Australia).
- Ahmad A. Salman**, Assistant Professor of Integrated Sciences.
B.Sc., Arab Academy for Science and Technology; M.Sc., Ph.D., George Mason University.
- Sofia Samatar**, Assistant Professor of English.
B.A., Goshen College; M.A., Ph.D., University of Wisconsin, Madison
- Mona K. Sameni**, Lecturer of Economics.
B.A., M.A., University of Tehran (Iran); Ph.D., University of Wisconsin, Milwaukee.
- Alison D. Sandman**, Associate Professor of History.
B.A., Harvard University; M.A., Ph.D., University of Wisconsin, Madison.
- Lara E. Sapp**, Assistant Professor, Professional Librarian, Libraries.
B.S., Coastal Carolina University; M.P.H., M.L.I.S., University of North Carolina at Greensboro.
- Michael J. Saunders**, Professor of Kinesiology.
B.S., M.A., East Tennessee State University; Ph.D., University of Georgia.
- Bryan K. Saville**, Professor of Psychology.
B.A., University of Minnesota; M.S., Saint Cloud State University; Ph.D., Auburn University.
- Amanda G. Sawyer**, Associate Professor of Middle, Secondary and Mathematics Education.
B.S., M.A., M.A.T., University of South Carolina; Ph.D., University of Georgia.
- Giovanna Scarel**, Associate Professor of Physics and Astronomy.
B.S., University of Trieste (Italy); Ph.D., University of Wisconsin-Milwaukee.
- John A. Scherpereel**, Professor of Political Science.
B.A., University of Notre Dame; M.A., Ph.D., University of Wisconsin, Madison.
- Heather L. Scheurman**, Associate Professor of Justice Studies.
B.A., State University of New York-Geneseo; M.A., Ph.D., Emory University.
- Kurt E. Schick**, Professor of Writing, Rhetoric and Technical Communication.
B.A., University of Virginia; M.A., Mary Baldwin College; Ph.D., Texas Christian University.
- Lisa C. Schick**, Instructor of Educational Foundations and Exceptionalities.
B.S.Ed., Jacksonville University; M.Ed., James Madison University.
- Daniel K. Schill**, Professor of Communication Studies.
B.A., University of North Dakota; M.A., Ph.D., University of Kansas.
- Donna L. Schminkey**, Assistant Professor of Nursing.
B.A., B.S.N., Ph.D., University of Virginia; M.S.N., M.P.H., Emory University.
- Mikaela L. Schmitt-Harsh**, Associate Professor of Interdisciplinary Liberal Studies.
B.A., Gustavus Adolphus College; M.P.A., M.S.E.S., Ph.D., Indiana University.
- Carolyn F. Schubert**, Associate Professor; Director of Research and Education Services; Health Sciences and Nursing Librarian, Libraries.
B.A., University of California, Irvine; M.L.I.S., San Jose State University.
- Laura K. Schubert**, Executive Director, Learning Resource Centers; Assistant Professor of Writing, Rhetoric and Technical Communication.
B.A., Eastern Mennonite University; M.A., Millersville University; Ph.D., Indiana University of Pennsylvania.
- Katherine A. Schwartz**, Director, School of Art, Design and Art History; Professor of Art Education.
B.A., Radford University; M.S., Florida State University; Ph.D., The University of Arizona.
- Irana J. Scott**, Robinson Farmer Cox Associates Faculty Scholar; Associate Professor of Accounting.
B.B.A., M.Acc., East Tennessee State University; Ph.D., University of Memphis.
- Sean T. Scully**, Professor of Physics and Astronomy.
B.S., M.S., Ph.D., University of Minnesota.
- Julianne J. Secrist**, Lecturer of Nursing.
B.S.N., Eastern Mennonite University; M.S.N., Eastern Mennonite University.
- Kyle Seifert**, Professor of Biology.
B.A., Augustana College; Ph.D., University of Florida.

- Benjamin S. Selznick**, Assistant Professor of Strategic Leadership Studies.
B.A., Dartmouth College; M.A., Ph.D., New York University.
- Elias J. Semaan**, Professor of Finance and Business Law.
B.S., M.B.A., Lebanese American University; Ph.D., George Washington University.
- Michael J. Seth**, Professor of History.
B.A., M.A., State University of New York at Binghamton; Ph.D., University of Hawai'i Manoa.
- Aram Shahin**, Associate Professor of Foreign Languages, Literatures and Cultures.
B.A., Princeton University; M.A., Ph.D., University of Chicago.
- Ali M. Shahzad**, Associate Professor of Management.
B.S.E.E., University of Engineering and Technology (Lahore); Ph.D., University of Oklahoma.
- Maureen G. Shanahan**, Professor of Art History.
B.A., Duke University; J.D., Loyola Law School; M.A., Ph.D., University of Michigan.
- Maryam S. Sharifian**, Assistant Professor of Early, Elementary and Reading Education.
B.S., Med., PhD University of Buffalo.
- Dinesh R. Sharma**, Associate Professor of Mathematics and Statistics.
B.Sc., M.Sc., HNB Garhwal University (India); M.S., University of Tennessee; Ph.D., Florida State University.
- Kevin J. Sherrill**, Associate Professor of Theatre.
B.A., Ohio Wesleyan University; M.F.A., Indiana University.
- Eileen M. Shifflett**, Veris Consulting Faculty Scholar; Lecturer of Accounting.
B.B.A., M.B.A., James Madison University.
- Melanie E. Shoffner**, Professor of Middle, Secondary, and Mathematics Education.
B.A., M.A.T., Duke University; Ph.D., University of North Carolina.
- David J. Shonk**, Associate Professor of Sport and Recreation Management.
B.S., Virginia Polytechnic Institute and State University; M.S., University of Maryland; Ph.D., The Ohio State University.
- Lindsey M. Shook**, Lecturer of Communication Studies.
B.A., University of Central Oklahoma; M.A., Kansas University.
- Yasmeen L. Shorish**, Associate Professor, Head of Scholarly Communications, Libraries.
B.F.A., University of Illinois; B.S., Northeastern Illinois University; M.L.I.S., University of Illinois at Urbana-Champaign.
- Melanie L. Shoup-Knox**, Associate Professor of Psychology.
B.S., University of Pittsburgh; Ph.D., University at Albany, State University of New York.
- Kristen S. Shuyler**, Assistant Professor, Director, Communications and Outreach, Libraries.
B.A., University of Oregon; M.A., University of Michigan; M.L.I.S., University of Washington.
- John M. Siegfried**, Associate Professor of Mathematics and Statistics.
B.A., Juniata College; M.A., University of California, Santa Barbara; Ph.D., (joint) University of California, San Diego and San Diego State University.
- Rebecca A. Silberman**, Professor of Art.
B.F.A., Longwood University; M.F.A., Bowling Green State University.
- Rebecca A. Simmons**, Assistant Professor of Integrated Science and Technology.
B.M., M.B.A., James Madison University.
- Sharon J. Simmons**, Head, Department of Computer Science; Professor of Computer Science.
B.S., M.S., University of Southern Mississippi; Ph.D., The College of William & Mary.
- Whitney R. Simmons**, Assistant Professor of Health Professions.
B.S., James Madison University; M.P.A.S., Shenandoah University.
- Hannah K. Sions**, Assistant Professor of Art Education.
B.A., M.A., James Madison University; Ph.D., Virginia Commonwealth University.
- Ashley W. Skelly**, Assistant Professor of Health Professions.
B.S., The College of William and Mary; M.M.S., Wake Forest University.
- Kimberly H. Slekar**, Associate Professor of Biology.
B.S., Pennsylvania State University; Ph.D., Carnegie Mellon University.
- Margaret F. Sloan**, Interim Director, School of Strategic Leadership Studies; Professor of Strategic Leadership.
B.A., Alice Lloyd College; M.A., M.P.A., Ph.D., University of Kentucky.
- Morgan W. Smalls**, Assistant Professor of Media Arts and Design.
B.A., Columbia College; M.A., University of North Carolina at Charlotte; Ph.D., Howard University.

- Brian M. Smallwood**, Associate Professor of Theatre.
B.A., Drew University; M.F.A., Yale School of Drama.
- Angela M. Smith**, Associate Professor of Economics.
B.A., The College of William & Mary; M.A., Ph.D., University of Virginia.
- Michael Smith**, Director, School of Writing, Rhetoric and Technical Communication; Professor of Writing, Rhetoric and Technical Communication.
B.A., Knox College; M.F.A., Pennsylvania State University.
- Monica B. Smith-Woofter**, Assistant Professor of Learning, Technology & Leadership Education.
B.S., Virginia State University; MAED, Ed.D., East Carolina University.
- Randall S. Snow**, Instructor of Learning, Technology and Leadership Education.
B.S., Eastern Mennonite University; M.S.Ed., James Madison University.
- Cathleen S. Snyder**, Lecturer of Marketing.
B.S., Liberty University; M.B.A., James Madison University.
- Sara M. Snyder**, Assistant Professor of Educational Foundations and Exceptionalities.
B.S., M.Ed., Vanderbilt University; Ed.S., Lincoln Memorial University; Ph.D., University of Georgia; BCBA-D.
- James S. Sochacki**, Professor of Mathematics and Statistics.
B.S., University of Michigan; M.S., Ph.D., University of Wyoming.
- Roger A. Soenksen**, Professor of Communication Studies; Professor of Media Arts and Design.
B.S., University of Wisconsin, Platteville; M.A., University of Wisconsin, Milwaukee; Ph.D., Ohio University.
- Julie P. Solometo**, Associate Professor of Anthropology.
B.A., University of Virginia; M.A., Ph.D., University of Michigan.
- Hui H. Sono**, Head, Department of Finance and Business Law; Associate Professor of Finance; Associate Professor of International Business.
B.A., Foreign Affairs University (China); M.A., Ph.D., George Washington University.
- Heather N. Soper**, Assistant Professor of Nursing.
B.S.N., D.N.P., Liberty University; M.S., Stony Brook University.
- Michael C. Souders**, Assistant Professor of Communication Studies.
B.A., M.A., Eastern New Mexico University; Ph.D., University of Kansas.
- Joseph H. Spear**, Associate Professor of Sociology.
B.A., State University of New York at Geneseo; M.A., Ph.D., University of Virginia.
- Mary Jean Speare**, Associate Director, School of Music; Professor of Music.
B.M., Eastern New Mexico University; M.M., Southern Methodist University; Ph.D., Washington University.
- Jonathan H. Spindel**, Professor of Integrated Science and Technology.
B.S.E, Widener University; M.E.E., Rice University; Ph.D., University of Virginia.
- Sue E. Spivey**, Professor of Justice Studies.
B.A., Emory and Henry College; M.A., Ph.D., University of Virginia.
- Nathan R. Sprague**, Associate Professor of Computer Science.
Sc.B., Brown University; M.S., Ph.D., University of Rochester.
- Eric M. Stark**, Associate Professor of Management.
B.B.A., Ohio University; M.B.A., Wright State University; Ph.D., University of Arkansas.
- Angela R. Staton**, Professor of Graduate Psychology.
B.S., M.Ed., James Madison University; Ph.D., University of Virginia.
- Eric M. Stauffer**, Assistant Professor, Senior Learning Technologist, Libraries.
B.A. University of Pittsburgh; M.Ed., University of Virginia, Ph.D., Virginia Polytechnic Institute and State University.
- Kevin J. Stees**, Professor of Music.
B.S., University of Illinois; M.M., Arizona State University.
- Morgan M. Steffen Wurch**, Assistant Professor of Biology.
B.S., Iowa State University; Ph.D., University of Tennessee.
- Paulo R. Steinberg**, Professor of Music.
B.M., Universidade de São Paulo; M.M., Arizona State University; D.M., Indiana University.
- Jason C. Sterlace**, Instructor of Physics and Astronomy.
B.S., Virginia Commonwealth University.
- Alexis L. Stevens**, Associate Professor of Mathematics and Statistics.
B.A., Messiah College; M.S., Ph.D., Virginia Polytechnic Institute and State University.

- Carrie L. Stevens**, Professor of Music.
B.M., University of Wisconsin, Madison; M.M., Boston University; D.M.A., University of Minnesota – Minneapolis.
- Scott P. Stevens**, Professor of Computer Information Systems and Business Analytics.
B.S., Ph.D., Pennsylvania State University.
- Wren R. Stevens**, Associate Dean, College of Visual and Performing Arts; Associate Professor of Art History.
B.S., M.A., James Madison University; Ph.D., Virginia Commonwealth University.
- Anne L. Stewart**, Professor of Graduate Psychology.
B.A., Purdue University; M.A.T., DePauw University; Ph.D., University of Virginia.
- Gregory K. Stewart**, Professor of Art.
B.F.A., State University of New York at Brockport; M.F.A., Ohio University.
- Michael C. Stewart**, Assistant Professor of Computer Science.
B.S., University of North Carolina; M.S., Ph.D., Virginia Polytechnic Institute and State University.
- Margaret A. Stickney**, Lecturer of Health Sciences.
B.S., Otterbein College; M.S., Ph.D., University of Kentucky.
- Kristen E. St. John**, Professor of Geology and Environmental Science.
B.S., Furman University; M.S., Ph.D., The Ohio State University.
- Stephanie B. Stockwell**, Associate Professor of Integrated Science and Technology.
B.S., University of Wisconsin, Madison; Ph.D., Dartmouth College.
- Trevor F. Stokes**, Professor of Graduate Psychology.
B.A., University of Western Australia; M.A., Ph.D., University of Kansas.
- Michael L. Stoloff**, Associate Dean, The Graduate School; Professor of Psychology.
B.A., State University of New York at Binghamton; M.A., Ph.D., Johns Hopkins University.
- Jared T. Stoltzfus**, Assistant Professor of Integrated Science and Technology.
B.A., Eastern Mennonite University; Ph.D. Arizona State University.
- Sarah E. Stowell**, Instructor of Nursing.
B.S., University of New Hampshire; M.S.N., Simmons College.
- Eva M. Strawbridge**, Associate Professor of Mathematics and Statistics.
B.S., University of Alaska Anchorage; Ph.D., University of California, Davis.
- Joshua R. Streeter**, Assistant Professor of Theatre Education.
B.A., Millikin University; M.A., Emerson College; M.F.A., University of Texas at Austin.
- Bradley A. Striebig**, Professor of Engineering.
B.S., Ph.D., Pennsylvania State University; M.S., Clemson University.
- Aimee C. Stright**, Assistant Director for University Advising.
B.S., Virginia Polytechnic Institute and State University; M.Ed., The College of William and Mary.
- David A. Stringham**, Associate Professor of Music.
B.M., M.M, Ph.D., Eastman School of Music.
- Amy L. Strunk**, Lecturer of Marketing.
B.A., Virginia Polytechnic Institute and State University; M.B.A., University of North Carolina at Chapel Hill.
- Julie A. Strunk**, Associate Professor of Nursing.
B.S., B.S.N., M.S.N., James Madison University; Ph.D., Virginia Commonwealth University.
- Deborah C. Sturm**, Associate Professor, Graduate Psychology; Graduate Program Director, Counseling and Supervision.
B.A., Edinboro University of PA; M.A., Ph.D., University of North Carolina-Charlotte.
- Julia K. Stutzman**, Lecturer of Biology; Academic Adviser, University Advising.
B.A., Bridgewater University; M.S., James Madison University.
- John R. Subrick**, Associate Professor of Economics.
B.A., B.S., University of Delaware, M.A., Ph.D., George Mason University.
- Samuel S. Suggs**, Assistant Professor of Bass.
B.M., Northwestern University; M.M., D.M.A., Yale University.
- Valerie A. Sulfaro**, Professor of Political Science.
B.A., Southern Illinois University; M.A., Ph.D., University of South Carolina.
- Brian A. Sullivan**, Assistant Professor, Education Librarian, Libraries.
B.A., M.A., Framingham State University; M.L.S., Indiana University.
- Pamela M. Sullivan**, Professor of Early, Elementary and Reading Education.
B.A., Bryn Mawr College; M.A., Ed.S., University of South Florida; Ph.D., University of Virginia.

- Isaiah C. Sumner**, Associate Professor of Chemistry and Biochemistry.
B.A., Wabash College; Ph.D., Indiana University.
- Julie J. Sutherland**, Assistant Professor of Nursing.
M.S.N., DNP, Old Dominion University.
- Debra L. Sutton**, Associate Professor of Health Sciences.
B.S., M.A., Ball State University; Ph.D., Pennsylvania State University.
- Nicholas J. Swartz**, Director, Madison Center for Community Development; Associate Dean and Associate Professor, Professional and Continuing Education;; Associate Professor of Political Science.
B.A., M.P.A., University of North Carolina at Wilmington; Ph.D., University of North Carolina at Charlotte.
- Dominic D. Swayne**, 4VA Coordinator; Coordinator for External Relations and Outreach, College of Education; Instructor of Learning, Technology and Leadership Education.
M.P.A, Northeastern University.
- Christiane A. Szeps-Fralin**, Professor of Foreign Languages, Literatures and Cultures.
B.A., Mary Baldwin College; M.A., Middlebury College; Ph.D., University of Virginia.
- David E. Szwed**, Associate Professor of Psychology.
B.A., University of North Carolina at Chapel Hill; M.A., Ph.D., University of Virginia.
- Laura A. Taalman**, Professor of Mathematics and Statistics.
B.S., University of Chicago; M.A., Ph.D., Duke University.
- Janna Taft Young**, Assistant Professor of Psychology.
B.S., M.A., Ph.D., Florida Atlantic University.
- Kimiko Tanaka**, Associate Professor of Sociology.
B.A., International Christian University (Japan); M.A., Ph.D., Michigan State University.
- Jeffrey D. Tang**, Associate Dean, College of Integrated Science and Engineering; Professor of Integrated Science and Technology.
B.A., Northwestern University; M.Phil., University of Oxford; M.A., Ph.D., University of Pennsylvania.
- Richard M. Tate**, Director, Center for Professional Sales; Lecturer, Department of Marketing.
B.A., University of Virginia, M.B.A., Rollins College.
- William L. Tate II**, Professor of Architectural Design.
B.S., Wake Forest University; M.Arch., Virginia Polytechnic Institute and State University.
- Allyson C. Taylor**, Associate Professor of Art.
B.F.A., Milwaukee Institute of Art and Design; M.F.A., University of North Carolina at Chapel Hill.
- Jennifer A. Taylor**, Associate Professor of Political Science.
B.A., University of South Carolina; M.A., The Ohio State University; Ph.D., Old Dominion University.
- Joseph Taylor**, Professor of Music.
M.B.A., University of California, Los Angeles; M.M., California State University-Fullerton.
- Sarah J. Taylor**, Instructor of Communication Studies.
B.A., University of Wisconsin-Eau Claire; M.A., University of Northern Iowa.
- Janvier L. Tchommo**, Lecturer of Computer Information Systems and Business Analytics.
B.S., University of Yaoundé (Cameroon); M.S., University of Montreal (Canada).
- Anthony A. Teate**, Professor of Integrated Science and Technology.
B.S., Morehouse College; M.S., University of Michigan; Ph.D., University of South Florida.
- Wayne S. Teel**, Professor of Integrated Science and Technology.
B.Sc., Seattle Pacific University; Ph.D., Cornell University.
- April L. Temple**, Associate Professor of Health Professions.
B.S., Ph.D., University of South Florida, Tampa.
- Louise M. Temple-Rosebrook**, Professor of Integrated Science and Technology.
B.S., Mississippi College; M.S., Louisiana Tech University; Ph.D., Medical College of Virginia.
- Amanda C. Teye**, Associate Professor of Political Science.
B.A., Claremont McKenna College; M.P.A., California State University, San Bernardino; Ph.D., Claremont Graduate University.
- Emma S. Thacker**, Assistant Professor of Early, Elementary and Reading Education.
M.A.E.D., Ph.D., University of Kentucky.
- Amy D. Thelk**, Assistant Dean for Accreditation, Assessment and Accountability, College of Education.
B.S., M.Ed., University of Pittsburgh; Ph.D., James Madison University.

- Roger J. Thelwell**, Associate Professor of Mathematics and Statistics.
B.A., St. Mary's College of Maryland; M.S., Ph.D., Colorado State University.
- Linda M. Thomas**, Director, School of Integrated Sciences; Professor of Integrated Science and Technology.
B.S., M.S., University of Florida; J.D., University of Miami; Ph.D., Georgia Institute of Technology.
- Timothy G. Thomas**, Associate Professor of Educational Foundations and Exceptionalities.
B.A., University of North Carolina at Chapel Hill; M.T., Ph.D., University of Virginia.
- Cynthia R. Thompson**, Professor of Dance.
B.A., Memphis State University; M.F.A., University of Wisconsin, Madison.
- Elizabeth A. Thompson**, Associate Professor, Open Education Librarian, Libraries.
B.A., James Madison University; M.L.I.S., University of North Texas.
- Mary Thompson**, Associate Professor of English.
B.A., M.A., University of Vermont; Ph.D., Bowling Green State University.
- Gerilyn R. Timler**, Associate Professor of Communication Sciences and Disorders.
B.A., University of Wisconsin-Eau Claire; M.S., University of Wisconsin-Madison; Ph.D., University of Washington.
- Brett C. Tjaden**, Professor of Computer Science.
B.S., Haverford College; Ph.D., University of Virginia.
- John A. Tkac**, Lecturer of Foreign Languages, Literatures and Cultures.
B.S., Edinboro University of Pennsylvania; M.A., Bowling Green State University.
- Mert Tokman**, Professor of Marketing.
B.B.A., Istanbul University, Turkey; M.B.A., University of Arkansas at Little Rock; Ph.D., University of Alabama.
- Karin L. Tollefson-Hall**, Associate Professor of Art.
B.A., University of Northern Iowa; M.A., Ph.D., The University of Iowa.
- Thomas E. Tolman**, Professor of Military Science.
B.S., United States Military Academy; M.S., George Washington University.
- Anthony L. Tongen**, Vice Provost for Research, Scholarship and Creative Endeavors; Professor of Mathematics and Statistics.
B.S., University of Pittsburgh; M.S., Ph.D., Northwestern University.
- Elham Torabi**, Assistant Professor of Computer Information Systems and Business Analytics.
B.S., Isfahan University of Technology (Iran); M.S., University of Houston; Ph.D., University of Cincinnati.
- Danielle M. Torisky**, Associate Professor of Health Professions.
B.S., Seton Hill College; M.S., Ph.D., Virginia Polytechnic Institute and State University.
- Megan E. Tracy**, Associate Professor of Anthropology.
B.A., Middlebury College; M.A., Syracuse University; Ph.D., University of Pennsylvania.
- Ashton D. Trice**, Professor of Graduate Psychology.
B.A., Davidson College; Mary Baldwin College; M.A., Hollins College; Ed.D., West Virginia University.
- David A. Trouille**, Associate Professor of Sociology.
B.A., Dartmouth College; M.A., University of Chicago; Ph.D., University of California.
- Laura H. Trull**, Assistant Professor of Social Work.
B.S.W., James Madison University; M.S.W., University of Minnesota; Ph.D., James Madison University.
- Lisa M. Tubach**, Professor of Art.
B.A., Macalester College, M.F.A. Michigan State University.
- Windi D. Turner**, Director, Adult Degree Program.
B.S., Bridgewater College; M.S., Ph.D., Virginia Polytechnic Institute and State University.
- Carl J. Ullrich**, Associate Professor of Finance and Business Law.
B.S., University of Florida; M.B.A., University of South Florida; Ph.D., University of Maryland.
- Sri S. Upadhyay**, Assistant Professor of Psychology.
B.A., Kent State University; M.S., Ph.D., Binghamton University.
- Adam H. Usman**, Assistant Professor of Finance and Business Law.
B.A., M.B.A., Texas Tech University; Ph.D., Oklahoma State University.
- Jo-Anne van der Vat-Chromy**, Associate Professor of Music.
B. A., St. Mary's College of Maryland; M.M., Bowling Green State University; Ph.D., Florida State University.
- Adam J. Vanhove**, Associate Professor of Strategic Leadership Studies.
B.A.S., University of Minnesota, Duluth; M.S., Ph.D., Colorado State University.
- Anne van Leeuwen**, Associate Professor of Philosophy.
B.A. University of Western Ontario; M.A. Queen's University; Ph.D. New School for Social Research.

William C. Van Norman, Associate Professor of History.

B.A., Arizona State University; M.A., Ph.D., University of North Carolina at Chapel Hill.

Leonard A. Van Wyk, Professor of Mathematics and Statistics.

B.A., State University of New York at Potsdam; M.A., University of California, Berkeley; Ph.D., State University of New York at Binghamton.

Jay S. Varner, Lecturer of Writing, Rhetoric and Technical Communication.

B.A., Susquehanna University; M.F.A., University of North Carolina, Wilmington.

Pradeep Vasudevan Menon, Assistant Professor of Biology.

B.S., M.S., Kerala Agricultural University (India); Ph.D., University of Connecticut.

Baback Vaziri, Assistant Professor of Computer Information Systems and Business Analytics.

B.S.E., University of Michigan; Ph.D., Purdue University.

Bisi T. Velayudhan, Assistant Professor of Biology.

M.S., University of Connecticut; D.V.M., Kerala Agricultural University; Ph.D., Virginia Polytechnic and State University.

Andrea L. Veltman, Professor of Philosophy.

B.A., Eastern Illinois University; M.A., Ph.D., University of Wisconsin, Madison.

David S. Vess, Associate Professor, User Experience Librarian, Libraries.

B.A., Virginia Commonwealth University; M.L.I.S., University of Illinois at Urbana-Champaign.

George Vidal, Assistant Professor of Biology.

A.B., Harvard University; Ph.D., Stanford University.

Alexandra M. Vilela, Associate Professor of Media Arts and Design.

B.A., Universidade Federal de Minas Gerais; M.B.A., Universidade Federal de Minas Gerais; M.A., Michigan State University; Ph.D., University of Wisconsin-Madison.

Jamison L. Walker, Assistant Professor of Music.

B.M., Stetson University; M.M., Ph.D., Florida State University.

Johnathan Walker, Assistant Professor of Interdisciplinary Liberal Studies.

A.B., University of California, Berkeley; M.A., Syracuse University; Ph.D., University of Georgia.

Marquis Walker, Assistant Professor of Biology.

B.S., Morgan State University; Ph.D., University of Maryland, Baltimore County.

Ann H. Wallace, Associate Professor of Middle, Secondary, and Mathematics Education.

B.S., University of Georgia; M.S., Portland State University; Ph.D., University of Maryland, College Park.

Peter M. Waller, Assistant Professor of Military Science.

B.A., University of Iowa.

Jennifer R. Walsh, Assistant Professor of Health Professions.

B.S., M.S., Ph.D., University of Maine.

Ruairi R. Walsh, Lecturer of Management.

Diploma, Institute of Public Administration (Ireland); Diploma, National College of Ireland; M.B.A., Institute of Technology (Ireland).

Jana R. Walters, Instructor of Kinesiology.

B.S., Radford University; M.S., James Madison University.

D. Brian Walton, Professor of Mathematics and Statistics.

B.S., Brigham Young University; M.S., Ph.D., The University of Arizona, Tucson

Timothy R. Walton, Associate Professor of Integrated Science and Technology.

B.A., College of William and Mary; Ph.D., University of Virginia.

David M. Wang, Assistant Professor of Media Arts and Design.

B.F.A., Drake University; M.F.A. Louisiana Tech University.

Chin H. Wang, Senior Associate Executive Director, Center for Global Engagement.

B.B.A., M.B.A Campbell University; M.Ed, James Madison University.

Ping Wang, Associate Professor of Computer Information Systems and Business Analytics.

B.S., Northeast University of Technology; M.B.A., Appalachian State University; Ph.D., University of Georgia.

Xunhua Wang, Professor of Computer Science.

B.S., M.E., University of Science and Technology of China; Ph.D., George Mason University.

Elizabeth Ward, Assistant Professor of Mathematics and Statistics.

B.S., Massachusetts Institute of Technology; M.S. George Washington University.

- Walter L. Ward**, Interim Director, University Career Center.
B.S., M.Ed., Salisbury University; M.S. James Madison University; Ed.D., North Carolina State University.
- Beate A. Warden**, Lecturer of Foreign Languages, Literatures and Cultures.
B.A., M.A., University of Cologne (Germany).
- Stefanie E. Warlick-Burrow**, Professor, Interim Associate Dean of Libraries, Libraries.
B.A., University of Kansas; M.S.L.S., University of North Carolina at Chapel Hill.
- Deborah L. Warnaar**, Lecturer of Chemistry and Biochemistry.
B.A., Hope College; Ph.D., Virginia Commonwealth University.
- Debra A. Warne**, Professor of Mathematics and Statistics.
B.S., University of Pittsburgh; M.S., Ph.D., University of Virginia.
- Paul G. Warne**, Professor of Mathematics and Statistics.
B.A., Ashland University; M.S., James Madison University; Ph.D., University of Virginia.
- Stephanie A. Wasta**, Professor of Educational Foundations and Exceptionalities.
B.A., Cornell College; M.A., Ph.D., The University of Iowa.
- Case Watkins**, Assistant Professor of Justice Studies.
B.G.S., Louisiana State University; M.S. Texas State University; Ph.D., Louisiana State University
- Linette M. Watkins**, Head, Department of Chemistry and Biochemistry; Professor of Chemistry and Biochemistry.
B.S., Trinity University; Ph.D., University of Notre Dame.
- Colleen A. Watson**, Instructor of Mathematics and Statistics.
B.S., M.S., Georgia Institute of Technology.
- Henry A. Way**, Associate Director, School of Integrated Sciences; Professor of Integrated Science and Technology.
B.A., (Hons.) University of Oxford; M.Phil., University of Cambridge; Ph.D., University of Kansas.
- Angela W. Webb**, Associate Professor of Middle, Secondary and Mathematics Education.
B.S., Appalachian State University; M.Ed., Ph.D., University of North Carolina.
- John J. Webb**, Associate Professor of Mathematics and Statistics.
B.A., Dartmouth College; Ph.D., University of South Carolina.
- Karen A. Weeks**, Instructor of Nursing.
B.S.N., Cedar Crest College; M.S.N., University of Phoenix.
- Xuebin Wei**, Assistant Professor of Integrated Science and Technology.
B.S., Wuhan University (China); M.S., University of Twente (Netherlands); Ph.D., University of Georgia.
- Dee A. Weikle**, Associate Professor of Computer Science.
B.S., Rice University; M.S., Ph. D., University of Virginia.
- Gerald R. Weniger**, Associate Professor of Health Professions.
B.S., Lock Haven University of Pennsylvania; M.Ed., University of Virginia; M.P.A.S., James Madison University.
- David L. Wenos**, Professor of Health Professions.
B.S., Utah State University; M.S., Ph.D., Indiana University.
- Jeanne Z. Wenos**, Associate Professor of Health Professions.
B.S., Wheaton College; M.S., P.E.D., Indiana University.
- Maria T. Wessel**, Professor of Health Sciences.
B.S., M.S.Ed., James Madison University; Ed.D., University of Virginia.
- Stephanie T. West**, Director, Hart School of Hospitality, Sport and Recreation Management.
B.S.Ed., Auburn University; M.S., Georgia Southern University; Ph.D., Texas A&M University.
- Emily M. Westkaemper**, Associate Professor of History.
B.A., University of Virginia; Ph.D., Rutgers the State University of New Jersey.
- Timothy M. Whelden**, Clinical Lecturer of Nursing.
M.S.N., Johns Hopkins University.
- Siân E. White**, Associate Professor of English.
B.A., University of California, Los Angeles; M.A., Loyola Marymount University; Ph.D., University of Notre Dame.
- William L. White**, Professor of Educational Foundations and Exceptionalities.
B.A., University of Virginia; M.A., Ed.D., West Virginia University.
- Toni S. Whitfield**, Assistant Director, School of Communication Studies; Professor of Communication Studies.
B.A., M.A., Ed.D., University of West Florida.
- Shelley J. Whitmeyer**, Assistant Professor of Geology and Environmental Science.
B.S., University of Rhode Island; M.S., State University of New York at Stony Brook; Ph.D., Boston University.

- Steven Whitmeyer**, Professor of Geology and Environmental Science.
B.S., University of New Hampshire; Ph.D., Boston University.
- Bruce A. Wiggins**, Professor of Biology.
B.S., Pennsylvania State University; M.S., Ph.D., Cornell University.
- Janet K. Wigglesworth**, Head, Department of Kinesiology; Professor of Kinesiology.
B.S., University of Wisconsin - La Crosse; M.S., Southern Illinois University; Ph.D., Indiana University.
- William H. K. Wightman**, Professor of Art Education.
B.A., Virginia Wesleyan College; M.F.A., Radford University; Ph.D., The Ohio State University.
- Dhanuska B. Wijesinghe**, Visiting Assistant Professor of Geology and Environmental Science.
B.S., M.S., University of Peradeniya (Sri Lanka); Ph.D., Clemson University.
- Diane M. Wilcox**, Head, Department of Learning, Technology and Leadership Education; Professor of Learning, Technology and Leadership Education.
B.B.A., The College of William & Mary; M.A., Ph.D., University of North Carolina at Chapel Hill.
- Kristofor R. Wiley**, Assistant Professor of Middle, Secondary, and Mathematics Education.
B.A., Northwestern University; M.Ed., Drury University; Ph.D., University of Virginia.
- Marco Wilkinson**, Visiting Professor of English.
B.A., New York University; M.F.A., University of Southern Maine.
- Malia E. Willey**, Associate Professor, Humanities Librarian, Libraries.
B.A., Assumption College; M.A., University of Maine; M.L.S., Indiana University.
- Cassandra L. Williams**, Associate Professor of Mathematics and Statistics.
B.A., Adams State College; M.S., Ph.D., Colorado State University.
- Jacqueline A. Williams**, Professor of Kinesiology.
B.S., M.S., State University of New York at Cortland; Ed.D., University of Massachusetts.
- Mira C. Williams**, Associate Professor of Educational Foundations and Exceptionalities.
B.A., M.T., Ph.D., University of Virginia.
- James C. Willingham**, Assistant Professor of Mathematics and Statistics.
B.S.N., University of North Alabama, B.E., M.Ed., Vanderbilt University, Ph.D., Middle Tennessee State University.
- David L. Wilson Jr.**, Lecturer of Chemistry and Biochemistry.
B.S., University of Southern Mississippi; M.S., McNeese University.
- Donald R. Wilson**, Director, Young Children's Program; Associate Professor of Early, Elementary and Reading Education.
B.S., M.S., Clarion University; Ed.D., University of Pittsburgh
- Grace L. Wilson**, Assistant Professor, Head of Digital Collections, Libraries.
B.A., James Madison University; M.L.I.S., University of South Carolina.
- Rosemary N. Wilson**, Assistant Professor, Senior Instructional Designer and Digital Pedagogy Specialist, Libraries.
B.A., M.S.Ed., James Madison University.
- Elizabeth P. Wislar**, Assistant Professor of Theatre.
B.F.A., Washington University in St. Louis; M.F.A., Pennsylvania State University.
- Prabhashi W. Withana Gamage**, Assistant Professor of Mathematics and Statistics.
B.S., University of Peradeniya (Sri Lanka); M.S., Ph.D., Clemson University.
- Andrew D. Witmer**, Associate Professor of History.
B.A., Taylor University; M.A., Ph.D., University of Virginia.
- Christopher J. Womack**, Professor of Kinesiology.
B.S., James Madison University; M.Ed., Ph.D., University of Virginia.
- Chang Wan Woo**, Associate Professor of Communication Studies.
B.S., Illinois State University; M.A., Indiana State University; Ph.D., University of Alabama.
- John A. Wood**, Professor of Marketing; Wardinski Family Foundation Fellow.
B.S., University of Florida; M.B.A., University of North Florida; Ph.D., Georgia State University.
- William C. Wood**, Head, Department of Economics; Professor of Economics.
B.A., Auburn University; Ph.D., University of Virginia.
- Celestine A. Woodruff**, Assistant Professor of Mathematics and Statistics.
B.S., M.A., Appalachian State University; M.S., Ph.D., Florida State University.
- Gregory J. Wrenn**, Assistant Professor of English.
A.B., Harvard University; M.F.A., Washington University in St. Louis.

- John B. Wright**, Associate Professor of Media Arts and Design.
B.A., Virginia Commonwealth University; M.F.A., American University.
- Kenneth R. Wright**, Associate Professor of Interdisciplinary Liberal Studies.
B.A., M.A., California State University, Fresno; Ph.D., University of Oregon.
- Nathan T. Wright**, Associate Professor of Chemistry and Biochemistry.
B.S., Haverford College; M.S., University of Pennsylvania; Ph.D., University of Maryland, Baltimore.
- Nicole S. Wright**, Assistant Professor of Accounting; Cherry Bekaert Faculty Scholar.
B.B.A., James Madison University; M.S., Ph.D., Virginia Polytechnic Institute and State University.
- Roshna E. Wunderlich**, Professor of Biology.
B.A., University of Virginia; M.A., Ph.D., State University of New York at Stony Brook.
- Louie L. Wurch**, Assistant Professor of Biology.
B.S., Humboldt State University; Ph.D., Massachusetts Institute of Technology.
- Kristin N. Wylie**, Associate Professor of Political Science.
B.A., Louisiana State University; M.A., Ph.D., University of Texas at Austin
- Grace A. Wyngaard**, Professor of Biology.
B.S., University of Rhode Island; M.S., University of South Florida; Ph.D., University of Maryland.
- Ling Xu**, Professor of Mathematics and Statistics.
B.S., Wuhan Technology University (China); M.S., Ph.D., University of New Mexico-Albuquerque.
- Holly A. Yanacek**, Assistant Professor of Foreign Languages, Literatures and Cultures.
B.A., Heidelberg University; M.A., Ph.D., University of Pittsburgh.
- Chia-Hsuan Yang**, Assistant Professor of Integrated Science and Technology.
B.S, M.S., National Tsing Hua University (Taiwan); M.S., Ph.D, Carnegie Mellon University.
- Yi Yang**, Professor of Political Science.
B.A., Foreign Affairs College (China); Ph.D., Texas A&M University.
- Michael D. Yankey**, Lecturer of Management.
B.B.A., M.B.A., James Madison University.
- Hyong S. Yeom**, Professor of Social Work.
M.S.W., University of Minnesota – Twin Cities; M.A., Ph.D., Brandeis University.
- Emily R. York**, Assistant Professor of Integrated Science and Technology.
A.B. (Hons.), M.S., University of Chicago; Ph.D., University of California, San Diego.
- Alyssa H. Young**, Assistant Professor, Science and Math Librarian, Libraries.
B.A., Bridgewater State University; M.L.I.S., University of Rhode Island.
- Kayla M. Yurco**, Assistant Professor of Integrated Science and Technology.
B.A., B.S., University of Pittsburgh; M.S., University of Michigan; Ph.D., Pennsylvania State University.
- Emily R. Zane**, Assistant Professor of Communication Sciences and Disorders.
B.A., University of Nevada-Las Vegas; M.A., M.Phil., Ph.D., The Graduate Center, City University of New York.
- Hao Zhang**, Assistant Professor of Integrated Science and Technology.
B.S., Beijing Information Science and Technology University (China); M.S., Ph.D, Oregon State University.
- Yanjie Zhang**, Associate Professor of Chemistry and Biochemistry.
B.S., Ph.D., Julin University (China).
- Weimei Zhang**, Assistant Professor of Finance and Business Law.
M.A., Yonsei University (China); Ph.D., University of Alabama.
- Nan Zheng**, Associate Professor of Media Arts and Design.
B.A., Communication University of China; M.A., Ph.D., University of Texas at Austin.
- Yuyun Zhong**, Assistant Professor of Computer Information Systems and Business Analytics.
Ph.D., Drexel University.
- James R. Zimmerman**, Associate Professor of Writing, Rhetoric and Technical Communication.
A.B., University of Michigan; M.A., Ph.D., The Ohio State University.
- Traci A. Zimmerman**, Interim Associate Dean, College of Arts and Letters; Professor of Writing, Rhetoric and Technical Communication.
B.A., M.A., James Madison University; Ph.D., Case Western Reserve University.
- Tracy E. Zinn**, Professor of Psychology.
B.A., West Virginia University; M.S., Ph.D., Auburn University.

Daniel S. Zisk, Lecturer of Management; Lecturer of International Business.

B.A., University of Virginia; M.A., Stanford University; M.B.A., Darden School of Business, University of Virginia; P.G.M.T., University of Virginia.

Ian R. Zook, Associate Professor of Music.

B.M., University of North Carolina at Chapel Hill; M.M., University of Michigan; D.M.A., Rutgers the State University of New Jersey.

Bryan S. Zugelder, Associate Dean for Academic Affairs & Partnership; Associate Professor of Learning, Technology and Leadership Education.

B.S., University of Central Florida; M.S., The Florida State University; Ed.D., Nova Southeastern University.

Susan D. Zurbrigg, Professor of Art.

B.A., Bard College; M.F.A., Indiana University-Bloomington.

Jeanette M. Zyko, Associate Professor of Music.

B.M., University of Hartford; M.M., Butler University; D.M.A., Manhattan School of Music.

Adjunct Faculty

Paul R. Ackerman Jr., D.M.A., Adjunct Instructor, Music.

John D. Adams, IV, M.S., Adjunct Instructor, Mathematics and Statistics

Everaldo Attard, Ph.D., Adjunct Associate Professor, Integrated Science and Technology.

Maria Attard, Ph.D., Adjunct Associate Professor, Integrated Science and Technology.

Joel Azzopardi, Ph.D., Adjunct Assistant Professor, Integrated Science and Technology.

Alec Barker, M.A., Adjunct Instructor, Integrated Science and Technology.

James S. Barnes, M.S., Adjunct Instructor, Integrated Science and Technology.

Francine Barr, R.N., M.S.N., Adjunct Faculty Instructor, Nursing.

Grace A. Bauson, M.M., Adjunct Instructor, Music.

Hannah Blair, Adjunct Instructor, Integrated Science and Technology.

Jesse Blosser, M.Ed., Adjunct Instructor, Mathematics and Statistics.

Joseph Borg, Ph.D., Adjunct Associate Professor, Integrated Science and Technology.

Christy Bradburn, M. A., Adjunct Instructor, Integrated Science and Technology.

Patricia L. Brady, D.M.A., Adjunct Instructor, Music.

Matthew Bukowski, Ph.D., Adjunct Assistant Professor, Psychology.

Michel Camilleri, M.Sc., Adjunct Instructor, Integrated Science and Technology.

Stephen Carver, D.M.A., Adjunct Instructor, Music.

Louis Cassar, Ph.D., Adjunct Associate Professor, Integrated Science and Technology.

Karine Chapdelaine, M.M., Adjunct Instructor, Music.

Elisabeth Conrad, Ph.D., Adjunct Assistant Professor, Integrated Science and Technology.

Leslie A. Cook, R.N., M.S.N., Adjunct Faculty Instructor, Nursing.

Sheryl L. Cosme, R.N., M.S.N., Adjunct Faculty Instructor, Nursing.

Gregory Czyszczon, Ph.D., Adjunct Assistant Professor, Psychology.

Millicent W. Davis, M.Ed., Adjunct Instructor, Mathematics and Statistics.

Henriette Debono, Adjunct Instructor, Integrated Science and Technology.

Tonya Lambert Delp, Ph.D., Adjunct Instructor, Psychology.

Simon Fabri, Ph.D., Adjunct Associate Professor, Integrated Science and Technology.

Robert Farrugia, M.Phil., Adjunct Associate Professor, Integrated Science and Technology.

Martin Feely, Ph.D., Adjunct Professor, Geology and Environmental Science.

Eric Fitzgerald, M. S., Adjunct Instructor, Integrated Science and Technology.

Jean A. Flick, M.S., Adjunct Instructor, Mathematics and Statistics.

Marlon Foster, B.M.Ed., M.M., Adjunct Instructor, Music.

Charles Galdies, Ph.D., Adjunct Instructor, Integrated Science and Technology.

Virginia M. Galgano, M.Ed., Adjunct Instructor, Mathematics and Statistics.

Edward Gant, B.A., B.M., M.A., D.M.A., Adjunct Instructor, Music.

Brett Gardner, Ph.D., Adjunct Assistant Professor, Psychology.

Robert Ghirlando, Ph.D., Adjunct Professor, Integrated Science and Technology.

Mikael Glago, B.A., Adjunct Instructor, Music.
B. Marshall Graham, M.Ed., Adjunct Instructor, Psychology.
Omar Grech, Ph.D., Adjunct Assistant Professor, Integrated Science and Technology.
Cheri Greenfield, M.A., Adjunct Instructor, Psychology.
Nareman Hamdan, M.S., Adjunct Instructor, Mathematics and Statistics.
Linda Harpine, M.S.Ed., Adjunct Instructor, Integrated Science and Technology.
Paul Heitsch, B.A., Adjunct Instructor, Music.
Matthew Heller, P.G., M.S., Adjunct Professor, Geology and Environmental Science.
Phil Henning, Ph.D., Adjunct Instructor, Integrated Science and Technology.
Robert L. Hon, M.S., Adjunct Instructor, Mathematics and Statistics
Lucy Owen Hoyt, M.M., Adjunct Instructor, Music.
Donielle Janow, Ph.D., Adjunct Assistant Professor, Psychology.
Christopher Kaznosky, M.Ed., Adjunct Professor, Geology and Environmental Science.
Sharon Kelley, Ph.D., Adjunct Assistant Professor, Psychology.
Manita Khemthong, M.S., Adjunct Instructor, Integrated Science and Technology.
Brett Kirby, B.M., M.M., Adjunct Instructor, Music.
Adam Larrabee, M.M., Adjunct Instructor, Music.
Marketa K. Leisure, M.D., F.A.A.P., Adjunct Faculty Instructor, Nursing.
Alan P. Leonardi, Ph.D., Adjunct Associate Professor, Integrated Science and Technology.
Patrick J. Lintner, M.A.L.S., Adjunct Instructor, Mathematics and Statistics.
Cristy A. Long, R.N., M.S.N., Adjunct Faculty Instructor, Nursing.
Maria Lorcias, M.M., Adjunct Instructor, Music.
Francoise A. Marchat, Ph.D., Adjunct Instructor, Mathematics and Statistics.
Doug May, M.S., Adjunct Instructor, Integrated Science and Technology.
Anton Micallef, Ph.D., Adjunct Associate Professor, Integrated Science and Technology.
Jan S. Miller, M.A.T., Adjunct Instructor, Mathematics and Statistics.
Heather L. Mills, M.Ed., Adjunct Instructor, Mathematics and Statistics.
Kevin P.C. Minbiole, Ph.D., Adjunct Professor, Chemistry and Biochemistry.
Birgit Muehlenhaus, M. S., Adjunct Instructor, Integrated Science and Technology.
Mary Ann Mugel, R.N., M.S.N., AOCN, Adjunct Faculty Instructor, Nursing.
Luciano Mule'Stagno, Ph.D., Adjunct Associate Professor, Integrated Science and Technology.
Daniel J. Nardi, B.S., M.B.A., Adjunct Instructor, Chemistry and Biochemistry.
Dina Arkadievna Nesterenko, M.M., Adjunct Instructor, Music.
David Newman, M.M., Adjunct Instructor, Music.
Randall C. Orndorff, Adjunct Professor, Geology and Environmental Science.
Kathleen Overfield-Zook, B.M., M.M., Adjunct Instructor, Music.
Michael Overman, D.M., Adjunct Instructor, Music.
Kiersten Patsch, Ph.D., Adjunct Professor, Geology and Environmental Science.
Briana Reichgott Priester, M.M., Adjunct Instructor, Music.
J. Michael Priester, B.M., M.M., Adjunct Instructor, Music.
Ronald G. Radloff, M.A., Adjunct Instructor, Mathematics and Statistics.
Chad Reep, M.M., Adjunct Instructor, Music.
Phyllis Ressler, M.S., Adjunct Instructor, Integrated Science and Technology.
Jerry Ridgeway, M.S., Adjunct Instructor, Integrated Science and Technology.
Paul Rittenhouse, M.S., Adjunct Instructor, Integrated Science and Technology.
Bijan Saatdatmand, Ph.D., Adjunct Emeritus Professor, Psychology.
Anthony T. Sacco, Ph.D., Adjunct Assistant Professor, Integrated Science and Technology.
Tonio Sant, Ph.D., Adjunct Associate Professor, Integrated Science and Technology.
Charlotte A. Saufley, M.S., Adjunct Instructor, Mathematics and Statistics.
Mark Scerri, M.S., Adjunct Instructor, Integrated Science and Technology.
John Scrivani, Ph.D., Adjunct Instructor, Integrated Science and Technology.
Michael Shutty, Ph.D., Adjunct Assistant Professor, Psychology.
Jacqueline M. Sims, R.N., M.S.N., C.C.R.N., Adjunct Assistant Professor, Nursing.
Scott Zane Smith, M.M., Adjunct Instructor, Music.

Gerald Spence, M.Ed., Adjunct Instructor, Mathematics and Statistics.
Christopher Staff, Ph.D., Adjunct Associate Professor, Integrated Science and Technology.
Keith Stevens, B.M., M.M., Adjunct Instructor, Music.
William M. Turner, III, M.A.T., Adjunct Instructor, Mathematics and Statistics.
Alfred Vella, Ph.D., Adjunct Professor, Integrated Science and Technology.
Antoine Vella, Ph.D., Adjunct Assistant Professor, Integrated Science and Technology.
Martha N. Vesterlund, R.N., B.S., M.S.N., A.N.P.-C., N.P., Adjunct Faculty Instructor, Nursing.
Steven Voigt, B.M., M.A., Ph.D., Adjunct Instructor, Music.
Kay Walsh, M.A., Adjunct Instructor, Psychology.
Case Watkins, Adjunct Instructor, Integrated Science and Technology.
Bobby Whitescarver, M.P.A., Adjunct Instructor, Integrated Science and Technology.
Bruce E. Wilcox, Ph.D., Adjunct Assistant Professor, Chemistry and Biochemistry.
Peter J. Wilson, M.M., Adjunct Instructor, Music.
Candace Wilson Bush, B.A., Adjunct Instructor, Music.
James J. Winebrake, Ph.D., Adjunct Professor, Integrated Science and Technology.
Hillary Wing-Richards, M.A., Adjunct Instructor, Psychology.
Susan Winslow, R.N., M.S.N., NEA-BC, APHN-BC, Adjunct Faculty Instructor, Nursing.
Brenda Witmer, B.A., M.M., Adjunct Instructor, Music.
Naomi Wu, Adjunct Instructor, Integrated Science and Technology.
Charles Yousif, Ph.D., Adjunct Instructor, Integrated Science and Technology.
Lisa M. Zerull, Ph.D., R.N., F.C.N., Adjunct Faculty Instructor, Nursing.

Studies Abroad Faculty

Semester in Antwerp

Kris Lieckens, Ph.D., University of Antwerp.
Rudy Martens, Ph.D., University of Antwerp.
Ben Podevyn, M.B.A., University of Antwerp.
Paul Roosens, Ph.D., Erasmus University Rotterdam.
Ward Roofthoof, Ph.D., Century University Albuquerque.
Koen Vandembemt, Ph.D., University of Antwerp.

Semester in Florence

Luca Baldoni, Ph.D., University College London.
Beatrice Corsini, M.A., Ca' Foscari University, Venice.
Giulia Federici, Doctor of Arts and Letters, University of Florence.
Alba Forzoni, Doctor of Arts and Letters, University of Florence.
Alessandro Gentili, Doctor of Arts and Letters, University of Florence.
Giampiero Giacomello, Doctor of Political Science, Bologna University; Ph.D., European University, Florence.
Beatrice Giudice, Doctor of Arts and Letters, University of Florence.
Susanna Mollica, Doctor of Arts and Letters, University of Florence.
Caterina Paolucci, Ph.D., European University Institute, Florence.

Semester in London

Rachel Barnes, M.Phil., Birmingham University.
Tancred Bradshaw, Ph.D., London University.

Judith Dobbs, A.B., Vassar; M.Phil., University of London.
John Dodson, M.Phil., Goldsmiths' College, University of London.
Sheila Fox, B.A., Trinity College, Dublin, M.A., Ph.D., Manchester University.
Nicholas Pierpan, D. Phil., Oxford University.

Semester in Salamanca

Antonio Casaseca, Ph.D., University of Salamanca.
María Jesús Framiñá de Miguel, Ph.D., University of Salamanca.
Marta Garcia Garcia, M.A., University of Salamanca.
Eva Guerrero Guerrero, Ph.D., University of Salamanca.
Jesús Angel Jiménez, M.A., University of Salamanca.
Mercedes Marcos, M.A., University of Salamanca.
Maria Angeles Perez Lopez, Ph.D., University of Salamanca.
Enrique Jiménez Ríos, Ph.D., University of Salamanca.
Pedro Pardo Garcia, Ph.D., University of Salamanca.
Manuel Ambrosio Sánchez Sánchez, Ph.D., University of Salamanca.
Javier Santiago, Ph.D., University of Salamanca.
José Manuel Santos Pérez, Ph.D., University of Salamanca.
José Luengo Ugidos, Ph.D., University of Salamanca.
Javier Sánchez Zapatero, Ph.D., University of Salamanca.

Emeriti Faculty

Craig E. Abrahamson, B.A., M.S.W., Ph.D.
Professor Emeritus of Psychology.
Elizabeth D. Adams, B.A., M.S., D.Sc.
Associate Professor Emerita of Computer Science.
Ralph A. Alberico, B.A., M.L.S.
Dean Emeritus of Libraries.
Joseph D. Albert, B.A., Ph.D.
Professor Emeritus of Finance.
Virginia Aliotti, B.S., M.A.
Assistant Professor Emerita of French.
Violet L. Allain, B.A., M.A., Ph.D.
Associate Dean Emerita, General Education; Professor Emerita of Secondary Education.
Judith L. Anderson, B.M., M.A., M.L.S.
Professor Emerita; Catalog Librarian.
Virginia Andreoli-Mathie, B.A., B. Math., M.A., Ph.D.
Professor Emerita of Psychology.
Charles G. Arnold, B.S., M.S.
Assistant Professor Emeritus of Physical Education.
Kathleen G. Arthur, B.A., M.A., Ph.D.
Professor Emerita of Art and Art History.
Thomas H. Arthur, B.S., M.A., Ph.D.
Professor Emeritus of Theatre.
Robert C. Atkins, S.B., Ph.D.
Professor Emeritus of Chemistry.
Margaret Bagnardi, B.S.N., M.S.N., Ph.D.
Associate Professor Emerita of Nursing.

George Baker, M.S., Ph.D.

Professor Emeritus of Integrated Science and Technology.

Nicholas Bankson, B.S., M.A., Ph.D.

Professor Emeritus of Speech Pathology.

Nancy E. Barbour, B.A., M.Ed., Ph.D.

Professor Emerita of Early, Elementary and Reading Education.

Charles P. Baril, A.B., M.B.A., Ph.D.

DHG Faculty Scholar Emeritus; Professor Emeritus of Accounting.

James L. Barnes, M.Ed., M.S., Ed.D.

Professor Emeritus of Integrated Science and Technology.

Susan K. Barnes, A.B.E.D., A.M.

Associate Professor Emerita of Early, Elementary and Reading Education.

Fernando Barroso,

Professor Emeritus of Foreign Language and Literature.

Marta Bechtel, B.S., Ph.D.

Director Emerita, Biotechnology; Associate Professor Emerita of Biology.

Lucy Bednar, B.A., M.A., Ph.D.

Associate Professor Emerita of Writing, Rhetoric and Technical Communication.

Anna Lynn Bell, B.A., M.S.

Director Emerita, University Advising.

James O. Benedict, B.A., M.S., Ph.D.

Professor Emeritus of Psychology.

Ralph L. Benke Jr., B.S., M.B.A., D.B.A., C.M.A.

Professor Emeritus of Accounting.

Clinton W. Bennett, B.S., M.S., Ph.D.

Professor Emeritus of Speech Pathology.

A. Jerry Benson, B.A. M.A., Ph.D.

Provost and Senior Vice President Emeritus for Academic Affairs; Professor Emeritus of Graduate Psychology.

Devin C. Bent, B.A., Ph.D.

Director Emeritus, James Madison Center; Professor Emeritus of Political Science.

Vicki Lynn Berneking, B.M., M.A.

Professor Emerita of Music.

Robert D. Bersson, B.A., M.S.Ed, Ph.D.

Professor Emeritus of Art and Art History.

Thomas M. Bertsch, B.S., M.S., Ph.D.

Professor Emeritus of Marketing.

Charles P. Bilbrey, B.A., M.B.A., Ph.D.

Professor Emeritus of Information Technology.

Ashton C. Bishop, B.S., M.S, Ph.D.

Professor Emeritus of Accounting.

Charles W. Blair, B.A., M.A. in Ed., Ed.D.

Head Emeritus, Department of Early and Middle Education; Professor Emeritus of Education.

Sidney R. Bland, B.A., M.A., Ph.D.

Professor Emeritus of History.

Claire P. Bolfig, B.S., M.B.A., Ph.D.

Professor Emerita of Marketing.

Christina E. Bolgiano, B.A., M.L.S.

Special Collections Librarian Emerita; Adjunct Professor Emerita.

Anthony E. Bopp, B.A., M.A., Ph.D.

Professor Emeritus of Health Sciences.

Henry C. Bowers III, B.A., M.Ed., Ed.D.

Associate Professor Emeritus of Education.

Catherine E. Boyd, B.A., M.A., Ph.D.

Professor Emerita of History.

- D. Eric Boyd**, B.A., M.B.A., Ph.D.
Professor Emeritus of Marketing...
- Dorothy A. Boyd-Bragg**, A.B., Ed.M., M.A., Ph.D.
Professor Emerita of History.
- William P. Boyer Jr.**, B.A., M.A., Ph.D.
Associate Professor Emeritus of Anthropology.
- Linda M. Bradley**, B.A., M.A., Ed.D.
Associate Professor Emerita of Education.
- Bruce G. Brunton**, B.A., M.A., Ph.D.
Assistant Professor Emeritus of Economics.
- Patricia Lynn Brady**, B.A., B.M., M.M., D.M.
Professor Emerita of Music.
- David F. Brakke**, B.A., M.S., Ph.D.
Dean Emeritus, College of Science and Mathematics; Professor Emeritus of Biology; Professor Emeritus of Geology and Environmental Science.
- Patricia B. Brevard**, B.S., B.A., M.S., Ph.D.
Professor Emerita of Health Sciences.
- Douglas T. Brown**, B.A., M.A., Ph.D.
Provost Emeritus, Professor Emeritus of Psychology.
- William J. Buck**, B.A., M.F.A.
Professor Emeritus of Theatre.
- Bruce C. Busching**, B.A., Ph.D.
Professor Emeritus of Sociology.
- Jeffrey E. Bush**, B.Mus.Ed. M.M., Ph.D.
Director Emeritus of School of Music; Professor Emeritus of Music.
- Martha B. Caldwell**, B.A., M.A., M.A., Ph.D.
Professor Emerita of Art and Art History.
- Shirley Lynn Cameron**, B.A., M.A., M.L.S.
Professor Emerita of Library Administration.
- F. Howard Campbell III**, B.A., M.S.
Assistant Professor Emeritus of Geology.
- Timothy J. Carter**, B.A., M.A., Ph.D.
Department Head Emeritus of Sociology and Anthropology; Professor Emeritus of Sociology and Anthropology.
- Jean W. Cash**, B.A., M.A., Ph.D.
Professor Emerita of English.
- H. B. Cavalcanti**, B.Th, LL.B., M.Div., M.A., Ph.D.
Professor Emeritus of Sociology and Anthropology.
- Frances C. Cavanaugh**, A.B., M.A., Ph.D.
Professor Emerita of English.
- Ronald J. Cereola**, B.B.A., J.D., M.B.A.,
Assistant Professor Emeritus of Marketing.
- Mary Ann Chappell**, B.A., M.S.L.S.
Associate Professor Emerita of Libraries.
- Gary Chatelain**, B.F.A., M.F.A.
Professor Emeritus of Art and Art History.
- Ching-Yuan Chiang**, B.S., A.M., M.A., Ph.D.
Professor Emeritus of Mathematics and Statistics.
- In Dal Choi**, B.A., M.M., D.M.A., P.G.D.
Professor Emeritus of Music.
- Jeffrey C. Clark**, A.B., M.L.S.
Associate Professor Emeritus of Library Administration.
- Richard G. Clemens**, B.A., M.Ed., Ed.D.
Director Emeritus of Educational Technology and Media Center; Assistant Professor Emeritus of Learning, Technology, and Leadership Education.

- Paul C. Cline**, A.B., M.A., J.D., Ph.D.
Professor Emeritus of Political Science and Law.
- W. Dean Cocking**, B.A., M.S., Ph.D.
Associate Professor Emeritus of Biology.
- David E. Cockley**, B.S., M.S., Dr.P.H.
Associate Professor Emeritus of Health Professions.
- Howard R. Cohen**, B.A., M.A., Ph.D.
Professor Emeritus of Spanish.
- Ralph Alan Cohen**, A.B., M.S., Ph.D.
Professor Emeritus of English.
- Lee W. Congdon**, B.A., M.A., Ph.D.
Professor Emeritus of History.
- James V. Couch**, B.A., M.S., Ph.D.
Professor Emeritus of Psychology.
- Jerry L. Coulter**, B.A., M.F.A.
Professor Emeritus of Art and Art History.
- Gary P. Crowther**, B.A., Ph.D.
Professor Emeritus of Chemistry.
- Sandra F. Cryder**, B.M., M.A.
Professor Emerita of Music.
- Charles W. Curry**, B.S., M.S., Ed.D.
Director Emeritus, Adult Degree Program; Associate Professor Emeritus of Adult Education and Human Resource Development.
- Pauline K. Cushman**, B.A., M.A., M.S., Ph.D.
Professor Emerita of Integrated Science and Technology and Computer Science.
- N. Jean Dalton**, B.S., M.S., Ed.D.
Professor Emerita of Kinesiology.
- Faramarz Damanpour**, B.S., M.A., Ph.D.
Professor Emeritus of Finance.
- Jane Kruger D'Arcy**, B.S., M.S. in Ed.
Associate Professor Emerita of Physical Education.
- Michael L. Deaton**, B.S., M.S., Ph.D.
Professor Emeritus of Integrated Science and Technology.
- James E. Dendinger**, B.S., M.S., Ph.D.
Professor Emeritus of Biology.
- John David Diller**, B.F.A., M.F.A., Ph.D.
Professor Emeritus of Art.
- Judith A. Dilts**, A.B., M.A., Ph.D.
Professor Emerita of Biology.
- Francis J. Doherty Jr.**, B.A., M.Ed., Ph.D.
Director Emeritus of Institutional Research.
- Rickie J. Domangue**, B.S., M.S., Ph.D.
Professor Emeritus of Mathematics and Statistics.
- Jacqueline D. Driver**, Ph.D., M.A., M.Ed.
Associate Professor Emerita of Psychology.
- Carl G. Droms**, B.S., M.S., M.S., Ph.D.
Professor Emeritus of Mathematics and Statistics.
- Charles W. Dubenezic**, B.A., M.A., Ed.D.
Associate Professor Emeritus of Library Science and Educational Media.
- Philip B. DuBose**, B.A., M.S., Ph.D.
Professor Emeritus of Management.
- Okechi (Geoffrey) Egekwu**, B.S., M.B.A., M.S., Ph.D.
Professor Emeritus of Integrated Science and Technology.
- Anthony J. Eksterowicz**, B.A., M.A., Ph.D.
Professor Emeritus of Political Science.

- Philip S. Emmert III**, B.A., M.A., Ph.D.
Professor Emeritus of Communication Studies.
- Victoria J. Emmert**, B.A., M.A.
Instructor Emerita of Communication Studies.
- Joseph D. Eneedy**, B.S., M.S., Ph.D.
Professor Emeritus of Geographic Science
- Wayne E. Engel**, B.A., M.A., Ph.D.
Professor Emeritus of Psychology.
- Joseph J. Estock**, B.M.E., M.M.E., Ph.D.
Professor Emeritus of Music.
- Susan Facknitz**, B.A., M.F.A.
Associate Professor Emerita of English.
- Mark Facknitz**, B.A., M.F.A., Ph.D.
Professor Emeritus of English.
- Steven H. Fairchild**, B.S., M.S., Ph.D.
Associate Dean Emeritus, College of Education; Professor Emeritus of Education.
- John R. Fairfield**, Ph.D.
Professor Emeritus of Computer Science.
- Marina C. Favila**, B.A., M.L.A., Ph.D.
Professor Emerita of English.
- T. Windsor Fields**, A.B., M.A., Ph.D.
Professor Emeritus of Economics.
- Maynard D. Filter**, B.S., M.A., Ph.D.
Professor Emeritus of Speech Pathology.
- Dawn S. Fisher**, B.A., M.S. Ph.D.
Associate Professor Emerita of Mathematics.
- Jeanne Fitzgerald**, B.A., M.S., Ph.D.
Associate Professor Emerita of Mathematics and Statistics.
- Daniel E. Flage**, B.A., M.A., Ph.D.
Professor Emeritus of Philosophy.
- Judith A. Flohr**, B.S., M.A., Ph.D.
Professor Emerita of Kinesiology.
- Karen A. Ford**, B.A., M.S.W., D.S.W.
Professor Emerita of Social Work.
- Karen A. Forcht**, B.S., M.S., Ed.D.
Professor Emerita of Computer Information Systems.
- Alfred J. Francfort Jr.**, B.S., M.A., Ph.D.
Professor Emeritus of Finance.
- Joan Frederick**, B.A., M.A., Ph.D.
Professor Emerita of English.
- Gary Freeburg**, B.F.A., M.A., M.F.A.
Director Emeritus, Duke Hall Gallery of Fine Art; Professor Emeritus of Art, Design and Art History.
- Rex M. Fuller**, B.S., M.A., Ph.D.
Professor Emeritus of Communication Studies.
- J. Diane Fuqua**, B.A., M.A., Ph.D.
Associate Professor Emerita of Early Childhood Education.
- Anne S. Gabbard-Alley**, B.A., M.A., Ph.D.
Professor Emerita of Communication Studies.
- Barbra L. Gabriel**, B.S., Ph.D.
Professor Emerita of Integrated Science and Technology.
- Michael J. Galgano**, B.A., M.A., Ph.D.
Professor Emeritus of History.
- Daniel G. Gallagher**, B.A., M.A., Ph.D.
Professor Emeritus of Management.

Thomas Gallaher, B.S.

Emeritus Instrumental Chemist.

Norman E. Garrison, B.S., M.A., M.S., Ph.D.

Professor Emeritus of Biology.

Sharon S. Gasser, B.A., B.S., M.L.S.

Professor Emerita; Associate Dean and Director Emerita of Technical Services and Libraries.

Robert F. Geary Jr., B.A., M.A., Ph.D.

Professor Emeritus of English.

Clarence R. Geier, B.A., M.A., Ph.D.

Professor Emeritus of Anthropology.

John R. Gentile, B.A., M.S., Ph.D.

Professor Emeritus of Integrated Science and Technology.

Gerald L. Gill, A.B., M.A.L.S.

Professor Emeritus of Library Administration.

Dona J. Gilliam, B.M., M.M., J.D.

Professor Emerita of Music and Media Arts.

Janet W. Gloeckner, B.S., M.S., Ph.D.

Professor Emerita of Health Professions.

Robert O. Goebel, B.A., M.A., Ph.D.

Professor Emeritus of Foreign Languages, Literatures, and Cultures.

Michael S. Goldberger, B.S., M.Ed., Ph.D.

Professor Emeritus of Kinesiology.

Teresa A. Gonzalez, B.A., M.Ed., Ph.D.

Vice Provost Emerita for Academic Development; Professor Emerita of Graduate Psychology.

Paul B. Goodall, B.S., M.B.A.

Associate Professor Emeritus of Integrated Science and Technology

J. Robert Gordon, B.S., M.Ed., M.S.

Head Emeritus, Department of Physics; Professor Emeritus of Physics.

Dinah H. Gottschalk, B.S., M.B.A.

Assistant Professor Emerita of Accounting.

P. Tony Graham, A.B., M.A., Ed.D.

Professor Emeritus of Secondary Education.

Joann H. Grayson, B.A., Ph.D.

Professor Emerita of Psychology.

Phillip S. Grayson, B.A., M.A., M.F.A.

Professor Emeritus of Theater.

Gerald W. Green, B.A., M.Ed., Ed.D.

Associate Professor Emeritus of Middle Education.

Ralph Grove, B.S., M.S., Ph.D.

Professor Emeritus of Computer Science.

Glen C. Gustafson, B.A., M.Sc., Ph.D.

Professor Emeritus of Integrated Science and Technology.

Joyce Woodson Guthrie, B.A., M.B.A.

Assistant Professor Emerita of Marketing.

Mary F. Haban, B.A., M.L.S., M.S., Ph.D.

Professor Emerita of Library Science and Educational Media.

Tracy N. Hakala, B.S., M.Ed.

Associate Director Emerita of University Career Center.

Patty Hale, B.S.N., M.S.N., Ph.D.

Professor Emerita of Nursing.

Roger A. Hall, A.B., M.A., Ph.D.

Professor Emeritus of Theatre and Dance.

William O. Hall Jr., B.S.C., M.A., Ed.D.

Professor Emeritus of Education; Adjunct Professor Emeritus of Psychology.

Clive R. Hallman Jr., A.B., M.A., Ph.D.

Professor Emeritus of History.

Mario Hamlet-Metz, Professor de Estado, Ph.D.

Professor Emeritus of French.

James B. Hammond, B.A., B.S.M., M.A.

Professor Emeritus of Health Sciences.

Mary K. Handley, B.S., M.S. Ph.D.

Professor Emerita of Integrated Science and Technology.

J. Robert Hanson, A.B., M.S., Ph.D.

Assistant Dean Emeritus, College of Science and Mathematics; Professor Emeritus of Mathematics and Statistics.

David P. Hanson, A.B., M.Ed., D.Ed.

Professor Emeritus of Psychology.

Patricia N. Hardesty, B.A., M.A., M.S.L.S.

Associate Professor Emerita; Professional Librarian Emerita of Libraries.

Joy B. Harnage, R.N., Ph.D.

Assistant Professor Emerita of Nursing.

Charles M. Harris, B.A., B.D., M.A., Ph.D.

Professor Emeritus of Psychology.

J. Archer Harris, B.S., M.S., Ph.D.

Professor Emeritus of Computer Science.

Nancy L. Harris, B.A., B.A., M.S.

Lecturer Emerita of Computer Science.

Reid N. Harris, B.S., Ph.D., M.S.

Professor Emeritus of Biology.

Teresa T. Harris, B.A., M.S., Ph.D.

Professor Emerita of Early, Elementary and Reading Education.

John B. Haynes, A.B., M.A., Ph.D.

Professor Emeritus of Kinesiology.

Anne D. Henriksen, B.A., M.B.A., Ph.D.

Professor Emerita of Integrated Science and Technology.

James S. Hiatt, B.A., M.M., Ph.D.

Professor Emeritus of Music.

Robert R. Hinkle, B.S., M.Ed., Ph.D.

Professor Emeritus of Audiology.

Hugh A. Hobson, B.S., M.B.A., Ph.D., J.D.

Professor Emeritus of Finance.

Joseph E. Hollis, B.S., M.A., Ed.D., C.P.A.

Professor Emeritus of Accounting.

Judith K. Holt, B.S.N., M.S.

Associate Professor Emerita of Nursing.

Sherrill P. Hood, A.B., M.P.A.

University Registrar Emerita.

Sandra K. Hopper, M.S.N.

Associate Director Emerita, BR AHEC & Outreach; Adjunct Assistant Professor Emerita of Nursing.

Margaret F. Horn, B.A., M.S. in Ed.

Assistant Professor Emerita of Physical Education.

Robert V. Hoskins III, B.A., M.A., Ph.D.

Professor Emeritus of English.

Jane Hubbell, B.S., M.Ed.

Associate Director Emerita of Institute for Innovation in Health and Human Services.

Charles Huffman, B.S., M.A., Ph.D.

Assistant Professor Emeritus of Psychology.

Rebecca H. Humphrey, B.F.A., M.F.A.

Professor Emerita of Art and Art History.

- W. Thomas Hurt**, B.S.Ed., M.P.H., Ed.D.
Professor Emeritus of Health Sciences.
- Sue L. Hutchinson**, B.A., M.Ed.
Instructor Emerita of Early, Elementary and Reading Education.
- Elizabeth L. Ihle**, A.B., M.A., Ed.D.
Professor Emerita of Secondary Education.
- William H. Ingham**, B.S., M.S., Ph.D.
Professor Emeritus of Physics and Astronomy.
- Ming Ivory**, B.S., M.A., Ph.D.
Professor Emerita of Integrated Science and Technology.
- David K. Jeffrey**, B.A., M.A., Ph.D.
Dean Emeritus, College of Arts and Letters; Professor Emeritus of English.
- Robert T. Jerome, Jr.** B.A., Ph.D.
Professor Emeritus of International Business; Economics.
- Bruce A. Johnson**, B.A., M.A., Ph.D.
Professor Emeritus of English.
- George C. Johnson**, B.S., M.S., Ph.D.
Professor Emeritus of Media Arts and Design.
- Marilou M. Johnson**, B.S., M.S.M.C., Ph.D.
Vice Provost Emerita for Faculty and Curriculum; Professor Emerita of Media Arts and Design.
- Bethany Jones**, B.A., M.A., Ph.D.
Professor Emerita of French; Honors Program.
- Arnold S. Kahn**, B.A., M.A., Ph.D.
Professor Emeritus of Psychology.
- Jay D. Kain**, Ph.D.
Professor Emeritus of Art.
- Erika N. Kancler**, B.S., M.D.
Professor Emerita of Health Professions.
- Jon E. Kastendiek**, B.A., Ph.D.
Associate Professor Emeritus of Biology.
- Lance E. Kearns**, B.S., M.S., Ph.D.
Professor Emeritus of Geology and Environmental Science.
- Steven L. Keffer**, B.A., M.A., Ph.D.
Associate Professor Emeritus of Biology.
- Margaret B. Kempton**, B.S. in Ed., M.S.
Assistant Professor Emerita of Mathematics.
- Patricia A. Kennedy**, B.S., M.A.
Instructor Emerita of Early, Elementary and Reading Education.
- James E. Kidd Jr.**, A.B., M.A., Ed.D.
Associate Professor Emeritus of Special Education.
- Judy B. Kidd**, B.S., M.S.
Assistant Professor Emerita of Mathematics and Statistics.
- William D. Kimsey**, B.S., M.A., Ph.D.
Professor Emeritus of Communication Studies.
- Joan Kindig**, B.A., M.Ed., Ed.D.
Professor Emerita of Middle, Secondary and Mathematics Education.
- Sallie B. King**, B.A., M.A., Ph.D.
Professor Emerita of Philosophy and Religion.
- Lamont D. King**, B.A., M.A., Ph.D.
Associate Professor Emeritus of History.
- Thomas L. King**, A.B., M.A., Ph.D.
Professor Emeritus of Theatre.
- Paul Kipps**, B.S., M.S., Ph.D.
Associate Dean Emeritus, College of Business; Professor Emeritus of Economics.

Michele B. Kirkdorffer, B.M., M.M., D.M.A.

Associate Professor Emerita of Music.

James F. Kluesner, B.M., M.M.

Professor Emeritus of Music.

Kay M. Knickrehm, B.A., M.A., Ph.D.

Associate Dean Emerita, College of Arts and Letters; Department Head Emerita, Political Science; Professor Emerita of Political Science.

Steven C Knickrehm, B.A., M.A., M.B.A.

Assistant Professor Emeritus of Health Sciences.

Andrew I. Kohen, M.A., Ph.B., Ph.D.

Professor Emeritus of Economics.

Susan E. Kruck, B.A., M.B.A., Ph.D.

Professor Emerita of Computer Information Systems and Business Analytics.

S. James Kurtz, B.A., M.A., Ph.D.

Professor Emeritus of Music.

Margaret M. Kyger, B.A., M.Ed., Ph.D.

Associate Dean Emerita, College of Education.

James L. Laffey, B.S.Ed., M.S.Ed., Ph.D.

Professor Emeritus of Education.

Sally M. Lance, B.M.Ed., M.M.

Professor Emerita of Music.

Malcolm G. Lane, B.S., M.A., Ph.D.

Professor Emeritus of Computer Science.

David Lawrence, B.S., M.S., Ph.D.

Professor Emeritus of Integrated Science and Technology.

Marilyn C. Lazorack, B.S., M.S.Ed., M.A.

Assistant Professor Emerita of Mathematics.

James Joseph Leary, A.B., Ph.D.

Professor Emeritus of Chemistry.

Robert Edwin Lee, B.A., M.A., Ph.D.

Professor Emeritus of Mathematics and Statistics.

Reba Leiding, B.A., M.A., M.L.S.

Associate Professor Emerita of Libraries.

Robert L. Lembright, B.A., M.A., Ph.D.

Professor Emeritus of History.

Stinson H. Lenkerd, M.A.

Emeritus of Libraries.

Ann Marie Leonard, B.S., M.S., Ph.D.

Professor Emerita of Early Childhood Education.

Terry A. LePera, B.A., M.S.

Associate Professor Emeritus of Mathematics and Statistics.

Barbara Lewis, M.F.A., B.A.E.

Professor Emerita of Art.

Laura A. Lewis, B.A., M.A., Ph.D.

Professor Emerita of Anthropology.

David A. Ley, B.A., M.B.A., Ph.D.

Associate Professor Emeritus of Hospitality and Tourism Management.

Jesse S. Liles, A.B., M.Ed., Ed.D.

Professor Emeritus of Secondary Education.

Reid J. Linn, B.S., M.Ed., Ph.D.

Dean Emeritus, The Graduate School; Professor Emeritus of Exceptional Education.

John Little, B.S., M.M., D.M.A.

Professor Emeritus of Music.

James H. Liu, B.S., M.S., Ph.D.

Professor Emeritus of Mathematics and Statistics.

Virginia L. Livingston, B.S.N, M.S.N.

Associate Professor Emerita of Nursing.

Mary Louise Loe, B.A., M.A., Ph.D.

Professor Emerita of History.

Timothy J. Louwers, B.S., M.B.A., Ph.D.

Professor Emeritus of Accounting.

Jeffrey D. Loveland, B.S., M.S., O.T.D.

Professor Emeritus of Health Sciences.

Frank W. Luth Jr., A.B., M.Ed., Ph.D.

Professor Emeritus of Special Education.

John T. Lyon Jr., B.S., M.A., Ph.D.

Professor Emeritus of Music.

Carter Lyons, B.A., M.S., Ph.D.

Professor Emeritus of Mathematics and Statistics.

John T. Marafino, B.A., M.S., Ph.D.

Professor Emeritus of Mathematics and Statistics.

Joseph H. Marchal, B.A., M.A., M.S., Ph.D.

Professor Emeritus of Integrated Science and Technology.

S. Brooks Marshall, B.A., M.B.A., D.B.A., C.F.A.

Professor Emeritus of Finance and Business Law.

Doris Martin, B.S., M.Ed., Ph.D.

Professor Emerita of Early Childhood Education.

Jeanne M. Martino-McAllister, B.S., M.A., Ph.D.

Professor Emerita of Health Sciences; Director Emerita of the Office of Substance Abuse Research.

Merle E. Mast, B.A., B.S., M.S., Ph.D.

Professor Emerita of Nursing.

Ramon A. Mata-Toledo, B.S., M.S., M.B.A., Ph.D.

Professor Emeritus of Computer Science.

Sandra L. Maxfield, B.S., M.L.I.S., M.S.

Associate Dean Emerita of Libraries; Associate Professor Emerita of Libraries.

Phillip H. Maxwell, B.S., M.S., D.B.A.

Associate Professor Emeritus of Finance.

Robert D. McCashin, B.M., M.M., D.M.A.

Professor Emeritus of Music.

Paul A. McEnderfer, B.M., M.M.

Associate Professor Emeritus of Music.

Anne S. McFarland, B.A., M.A.

Catalog Librarian Emerita; Assistant Professor Emerita.

Thomas J. McHardy, B.S., M.F.A.

Professor Emeritus of Media Arts and Design.

Eva M. McMahan, B.S., M.A., Ph.D.

Associate Dean Emerita, College of Arts and Letters; Department Head Emerita, School of Communication Studies; Professor Emerita, Communication Studies.

Challace Joe McMillin, B.S., M.A., Ed.D.

Professor Emeritus of Kinesiology.

Robin M. McNallie, B.A., M.A.

Associate Professor Emeritus of English.

Richard E. McPherson, B.Mus., M.Mus., A.Mus.D.

Professor Emeritus of Music.

Earlynn J. Miller, B.S., M.F.A., Ed.D.

Professor Emerita of Dance.

Gordon W. Miller, B.A., M.L.S., M.A.

Professor Emeritus of Information Services.

Janice L. Minor, B.F.A., M.M., A.D., D.M.A.

Associate Professor Emerita of Music.

Esther H. Minskoff, B.S., M.S., Ph.D.

Professor Emerita of Special Education.

Helen B. Moore, B.A., M.A., Ed.D.

Professor Emerita of Psychology.

Ann-Janine Morey, B.A., M.A., Ph.D.

Associate Vice Provost Emerita of Cross Disciplinary Studies and Diversity Engagement; Professor Emerita of English.

James L. Mullenex, B.S., M.A., Ed.D.

Professor Emeritus of Mathematics.

Donald L. Musselman, B.A., M.A., Ph.D.

Associate Professor Emeritus of Computer Information Systems and Management Science.

R. Ann Myers, B.S., M.S.W.

Department Head Emerita of Social Work; Professor Emerita of Social Work.

Charles R. Neatrour, B.S., M.S.Ed., M.A., Ed.D.

Professor Emeritus of Education.

Alan Neckowitz, B.A., M.A.

Professor Emeritus of Media Arts and Design.

Eileen Nelson, A.B., M.A., Ed.D.

Professor Emerita of Psychology.

Cameron C. Nickels, B.A., M.A., Ph.D.

Professor Emeritus of English.

Carol K. Noe, B.M.Ed., M.M.

Professor Emerita of Music.

Jeanne R. Nostrandt, B.A., M.Ed., Ph.D.

Professor Emerita of English.

Thomas P. O'Connor, B.G.S., M.A., M.F.A.

Professor Emeritus of Media Arts and Design.

Nancy K. O'Hare, B.A., M.Ed., Ph.D.

Professor Emerita of Speech Pathology.

Claudia O'Neill, R.N., M.S.N.

Lecturer Emerita of Nursing.

Ramenga M. Osotsi, B.A., M.A., Ph.D.

Associate Professor Emeritus of English.

Forrest C. Palmer, B.A., B.S.L.S., M.S.L.S.

Documents Librarian Emeritus; Professor Emeritus of Library Science.

G. Edgar Parker, A.B., Ph.D.

Professor Emeritus of Mathematics and Statistics.

Joanne M. Pearson, B.S., M.S., Ph.D.

Associate Professor Emerita of Health Sciences.

Dany B. Perramond, Ph.D.

Professor Emeritus of Foreign Languages and Literatures.

Mary M. Perramond, Ph.D.

Professor Emerita of Foreign Languages and Literatures.

Anna Ruth Perry, A.B., M.A., M.S.L.S.

Catalog Librarian Emerita; Associate Professor Emerita.

Dorn W. Peterson, B.S., Ph.D.

Associate Professor Emeritus of Physics and Astronomy.

Gary L. Peterson, B.S., Ph.D.

Professor Emeritus of Mathematics and Statistics.

Alvin M. Pettus, B.A., M.Ed., Ed.D.

Associate Dean Emeritus, College of Education; Professor Emeritus of Secondary Education.

- Alice I. Philbin**, B.A., M.A., Ph.D.
Professor Emerita of Writing, Rhetoric and Technical Communication.
- Joan K. Pierson**, B.S., M.S., Ed.D.
Professor Emerita of Information and Decision Sciences.
- Georgia N. L. J. Polacek**, B.S., M.S., Ph.D.
Associate Professor Emerita of Health Sciences.
- Lynn S. Powell**, B.B.A., M.B.A.
Executive Director Emerita of Institute of Certified Professional Managers.
- Nena J. Powell**, B.S.N., M.S.N., Ph.D.
Associate Professor Emerita of Nursing.
- William L. Powell**, B.S., M.Ed., Ph.D.
Professor Emeritus of Marketing Education.
- Jack H. Presbury**, B.S.Ed., M.Ed., Ph.D.
Professor Emeritus of Psychology.
- Charles D. Pringle**, B.B.A., M.B.A, D.B.A.
Professor Emeritus of Management.
- Charles David Pruett**, B.S., M.Ed., M.S., Ph.D.
Professor Emeritus of Mathematics and Statistics.
- Abdelrahman M. Rabie**, B.S., M.S., Ph.D.
Associate Professor Emeritus of Integrated Science and Technology
- Raymond C. Ramquist**, M.S.Ed., Ed.D.
Director Emeritus of Education and Media Laboratory; Associate Professor Emeritus of Library Science and Education Media.
- Inez L. Ramsey**, B.A., M.L.S., Ed.D.
Professor Emerita of Library Science and Educational Media.
- M. Anthony Ratcliffe**, B.B.A., M.B.A.
Lecturer Emeritus of Computer Information Systems and Business Analytics.
- Vicki A. Reed**, B.S., M.A., Ed.D., CCC-SLP
Professor Emerita of Communication Sciences and Disorders.
- Patricia S. Reeder**, B.S.N., M.S.N.
Assistant Professor Emerita of Nursing.
- Robert D. Reid**, B.S., M.S., Ed.D.
Dean Emeritus, College of Business; Professor Emeritus of Marketing.
- Harry L. Reif**, B.S., M.B.A., Ph.D.
Associate Professor Emeritus of Computer Information Systems and Business Analytics.
- Michael D. Rettig**, B.S., M.S., Ph.D.
Professor Emeritus of Educational Leadership.
- C. William Rice**, B.M., M.A.
Professor Emeritus of Music.
- Philip F. Riley**, B.A., A.M., Ph.D.
Professor Emeritus of History.
- Diane A. Riordan**, B.S., M.Acct., Ph.D.
Professor Emerita of Accounting; Professor Emerita of International Business.
- Michael P. Riordan**, B.S., M.S., Ph.D.
Head Emeritus, School of Accounting; Professor Emeritus of Accounting.
- Gary K. Ritcher**, B.S., M.A., Ed.D.
Professor Emeritus of Music.
- Richard M. Roberds**, A.B., M.A., Ph.D.
Professor Emeritus of Integrated Science and Technology.
- Gene D. Robinson Jr.**, B.A., M.S., Ph.D.
Professor Emeritus of Geology and Environmental Science.
- Dennis E. Robison**, B.S., M.A., M.S.
Dean Emeritus, Integrated Learning Resources; Professor Emeritus.
- Judith T. Rocchiccioli**, B.S.N., M.S.N., Ph.D.
Professor Emerita of Nursing.

- Sheena J. Rogers**, B.Sc. (Hons), Ph.D.
Professor Emerita of Psychology.
- Lawrence W. Roller**, B.S., M.Ed., Ed.D.
Associate Professor Emeritus of Secondary Education and School Administration.
- Steven A. Rollman**, B.A., M.A., Ph.D.
Professor Emeritus of Communication Studies.
- Bradley M. Roof**, B.A., M.I.M., Ph.D.
Professor Emeritus of Accounting.
- J. Patrick Rooney**, B.M.E., M.M.E., D.M.A.
Professor Emeritus of Music.
- Martha K. Ross**, B.A., M.S., Ph.D.
Professor Emerita of Early Elementary and Reading Education.
- Marina V. Rosser**, B.A., M.A., Ph.D.
Professor Emerita of Economics; Professor Emerita of International Business.
- Dorothy M. Rowe**, B.S., M.S., Ph.D.
Head Emerita, Department of Living Sciences; Professor Emerita of Living Sciences.
- Joseph W. Rudmin**, B.S., M.S., Ph.D.
Professor Emeritus of Physics and Astronomy.
- James L. Ruff**, B.A., M.A., Ph.D.
Professor Emeritus of English.
- Charles M. Runyan**, A.B., M.A., Ph.D.
Professor Emeritus of Communication Sciences and Disorders.
- Brenda M. Ryals**, B.S., M.A., Ph.D., CCC-A
Professor Emerita of Communication Sciences and Disorders.
- Bijan Saadatmand**, B.S., M.S., Ph.D.
Professor Emeritus of Psychology.
- John E. Sander**, B.S., M.S., Ph.D.
Associate Professor Emeritus of Geology.
- William M. Sanders**, B.S., M.A., Ph.D.
Professor Emeritus of Mathematics.
- Karen E. Santos**, B.S., M.Ed., Ph.D.
Professor Emerita of Exceptional Education.
- Timothy J. Schulte**, M.A., Ed.S., Psy.D.
Professor Emeritus of Graduate Psychology.
- Brenda C. Seal**, B.S., M.A., Ph.D.
Professor Emerita of Communication Sciences and Disorders.
- Vernon C. Seguin**, B.Ch.E., M.B.A., D.B.A.
Associate Professor Emeritus of Marketing.
- Cletus M. Sellers Jr.**, B.A., M.S., Ph.D.
Director Emeritus, Center for Prehealth Resources; Professor Emeritus of Health Sciences.
- Raymond A. Serway**, B.A., M.S., Ph.D.
Professor Emeritus of Physics.
- Beverly P. Silver**, B.S., M.S., Ph.D.
Associate Professor Emerita of Biology.
- Douglas Skelley**, A.B., M.A., Ph.D.
Professor Emeritus of Political Science.
- Dorothy Sluss**, B.S., M.A., Ph.D.
Professor Emerita of Early, Elementary and Reading Education.
- Michael E. Smilowitz**, B.A., M.A., Ph.D.
Associate Professor Emeritus of Communication Studies.
- Glenn T. Smith**, B.B.A., M.S.
Associate Professor Emeritus of Computer Information Systems and Management Science.
- V. Russel Smith**, B.A., Ph.D.
Associate Professor Emeritus of Economics.

- William D. Smith**, B.S., M.A.T., Ph.D.
Professor Emeritus of Secondary Education.
- Linda L. Sobel**, B.S.N., M.S.N., Ph.D.
Professor Emerita of Nursing.
- George Sparks**, B.M.E., M.M., Ph.D.
Dean Emerita of Visual and Performing Arts.
- Diane M. Spresser**, B.S., M.A., Ph.D.
Professor Emerita of Mathematics.
- Jon A. Staib**, B.S., M.S., Ph.D.
Professor Emeritus of Physics.
- Paul H. Steagall Jr.**, B.S., M.Ed., Ph.D.
Professor Emeritus of Business Education and Administrative Services.
- Barbara S. Stern**, B.A., M.A., Ed.D.
Professor Emerita of Middle, Secondary, and Mathematics Education.
- Stephen Stewart**, B.H.S., M.P.H., Dr.P.H.
Director Emeritus, Strategic Alliances and Special Projects for CISAT; Professor Emeritus of Health Sciences.
- John D. Stone**, B.A., M.A., Ph.D.
Professor Emeritus of Communication Studies.
- Allan D. Stuhlmiller**, Lt. Col., B.S., M.S.
Head Emeritus, Department of Military Science; Professor Emeritus of Military Science.
- Donna L. Sundre**, B.A., M.A., Ed.D.
Executive Director Emerita, Center for Assessment and Research Studies; Professor Emerita of Graduate Psychology.
- John W. Sweigart**, A.B., Ph.D.
Professor Emeritus of Philosophy.
- Kenneth A. Szmagaj**, B.F.A., M.A., M.F.A.
Professor Emeritus of Art, Design and Art History.
- Gerald R. Taylor Jr.**, B.S., M.S., Ph.D.
Director Emeritus, Center for Materials Science; Professor Emeritus of Physics and Integrated Science and Technology.
- Jack A. Taylor**, B.S., M.A., Ph.D.
Associate Professor Emeritus of Integrated Science and Technology.
- Timothy N. Taylor**, B.S., M.S., M.A.
Assistant Professor Emeritus of Mathematics.
- Faye P. Teer**, B.A., M.Ed., D.B.A.
Professor Emerita of Computer Information Systems and Business Analytics.
- Harold B. Teer, Jr.**, B.S., M.B.A., D.B.A.
Professor Emeritus of Marketing.

Professor Emerita of Art.
- Daphyne S. Thomas**, B.S., M.B.A., J.D.
Professor Emerita of Business Law.
- Jon M. Thompson**, B.A., M.S.P., Ph.D.
Professor Emeritus of Health Sciences; Director Emeritus of Health Services Administration.
- Katherine B. Thompson**, B.S., M.P.A.
Assistant Dean Emerita of The Graduate School.
- Richard H. Thompson**, B.A., A.M. Ph.D.
Professor Emeritus of Anthropology.
- Mikel Kent Todd**, B.S., M.S., Ph.D.
Associate Professor Emeritus of Kinesiology.

Katherine Trammell, B.S., M.A., M.F.A.

Professor Emerita of Dance.

H. Richard Travis, B.A., M.S., Ph.D.

Professor Emeritus of Health Sciences.

Gilbert S. Trelawny, B.S., M.S., Ph.D.

Professor Emeritus of Biology.

Donna Trimm, B.S.N., M.S.N., D.N.S.

Associate Professor Emerita of Nursing.

William Gene Tucker, B.S., M.S., Ph.D.

Professor Emeritus of Integrated Science and Technology.

Larry T. Tynes, B.A., M.A.

Associate Professor Emeritus of Music.

Stanley L. Ulanski, B.S., M.S., Ph.D.

Professor Emeritus of Geology

Robert W. Vanderwarker Jr., B.A., M.S.

Assistant Professor Emeritus of Kinesiology.

Arvid W. VanDyke, B.A., M.A., Ed.D.

Associate Professor Emeritus of Integrated Science and Technology.

Joel Vedelli, B.S., M.A., Ed.S.

Professor Emeritus of Kinesiology.

Gregory R. Versen, B.A., M.S.S.W.

Associate Professor Emeritus of Social Work.

William H. Voige, B.S., Ph.D.

Professor Emeritus of Chemistry.

Jacqueline B. Walker, B.A., M.A., Ph.D.

Professor Emerita of History.

N. William Walker, B.A., Ed.M., Ed.D.

Dean Emeritus, College of Graduate and Professional Programs.

Mark J. Warner, B.A., M.A., Ed.S.

Senior Vice President Emeritus for Student Affairs and University Planning; Professor Emeritus of Health Sciences.

Patricia J. Warner, B.A., M.S., Ph.D.

Professor Emerita of Graduate Psychology.

David A. Watkins, B.M., B.S., M.A.

Associate Professor Emeritus of Music.

George A. Wead, B.A., M.A., Ph.D.

Professor Emeritus of Media Arts and Design.

Carl G. K. Weaver, B.S., M.S., D.B.A.

Professor Emeritus of Finance.

Catherine J. Webb, B.S.N., M.A.

Professor Emerita of Nursing.

Stephen D. Welpott, B.B.A., B.S., M.B.A.

Lecturer Emeritus of Hospitality and Tourism Management.

Cole H. Welter, B.F.A., M.F.A., Ph.D.

Professor Emeritus of Art.

David H. Wendelken, B.S., M.S., Ph.D.

Associate Professor Emeritus of Media Arts and Design.

Richard F. West, B.A., M.A., Ph.D.

Professor Emeritus of Graduate Psychology.

C. Steven Whisnant, B.S., M.S., Ph.D.

Head Emeritus, Department of Physics and Astronomy; Professor Emeritus of Physics and Astronomy.

Anne McCoy Wiles, B.S.S.S., M.A., Ph.D.

Professor Emerita of Philosophy.

Howard M. Wilhelm, B.A., M.A. in Ed., Ed.D.

Head Emeritus, Department of Economics; Professor Emeritus of Economics.

Kenneth C. Williamson, B.S.I.M., M.S., D.B.A.

Professor Emeritus of Marketing.

Mervyn Wingfield, A.B., M.S., Ph.D., C.P.A.

Professor Emeritus of Accounting.

Phillip M. Wishon, B.Sc., M.A., Ph.D.

Dean Emeritus, College of Education; Professor Emeritus of Education.

Maurice L. Wolla, B.S.E.E., Ph.D.

Professor Emeritus of Integrated Science and Technology.

Thomas F. Wood, B.A., M.B.A.

Lecturer Emeritus of Computer Information Systems and Business Analytics.

John M. Woody, B.S., M.S., M.F.A.

Professor Emeritus of Media Arts and Design.

Joyce S. Wszalek, B.A., M.A.

Associate Professor Emerita of English.

Ronald J. Wyancko, B.F.A., M.A., M.F.A.

Professor Emeritus of Art.

Mary Lou Wylie, B.A., M.A., Ph.D.

Head Emerita, Department of Sociology and Anthropology; Coordinator Emerita, Women's Studies Program; Professor Emerita of Sociology.

Chong-kun Yoon, B.A., M.A., Ph.D.

Professor Emeritus of History.

Jae H. Yoon, B.A., M.A., Ph.D.

Assistant Professor Emeritus of Communication Studies.

Sang Y. Yoon, B.F.A., M.F.A.

Professor Emerita of Graphic Design.

Masako Miyata Zapton, B.F.A., M.F.A.

Professor Emerita of Art and Art History.

Steven A. Zapton, B.D., M.F.A.

Professor Emeritus of Art and Art History.

Charles W. S. Ziegenfus, B.S., M.A.

Professor Emeritus of Mathematics and Statistics.

D. Kent Zimmerman, B.S., M.B.A., Ph.D.

Associate Professor Emeritus of Management.

David P. Zimmerman, B.A., M.S., Ed.D.

Associate Professor Emeritus of Library Science and Educational Media.

Rhonda Zingraff, B.S., M.A., Ph.D.

Associate Dean Emerita, College of Health and Behavioral Studies; Director Emerita, Institute for Innovation in Health and Human Services.

Sharon Zook, B.S.N., M.S.N., D.N.P.

Professor Emerita of Nursing.

Publishing Statement

This catalog is not a contract; it merely presents the requirements, offerings, information and regulations in effect at the time of publication. The university reserves the right to change any requirement or other provision at any time. The university endeavors to provide notice of any change through the advising process or through other means of communications; however, it is the responsibility of each individual student to become and remain aware of all applicable requirements and provisions that may apply to the student.

The university operator can be reached at (540) 568-6211.

James Madison University
Catalog Issue May 2020
Vol. 43, No. 1

The James Madison University 2020-2021 Undergraduate Catalog was published by the JMU Division of Academic Affairs.

Editorial services for the catalog were provided by Erin Phillippi, editor, and Kimberly McGivern, publication manager, under the advisement of Kristi Shackelford, assistant vice provost, academic policy and communications, and Dr. Marilou Johnson, vice provost for faculty and curriculum.

The catalog cover was designed by Emily Neighbors, administrative assistant for faculty and curriculum. Images are by University Communications & Marketing.

Your Right To Know

Your personal safety and the security of the campus community are of vital concern to James Madison University. Information regarding campus security and personal safety, including topics such as crime prevention, sexual assault, available resources, the law enforcement authority of the James Madison University Police Department, emergency notification protocols, protocols for resident students who are reported missing, fire safety and residence hall fire statistics, and crime reporting policies can be found in the James Madison University Annual Security Report and Annual Fire Safety Report. The publications also contain reported crime statistics for the most recent three-year period that occurred on campus, in certain off-campus buildings or property owned or controlled by James Madison University or affiliates, and on public property within, or immediately adjacent to and accessible from, the university's Harrisonburg campus and three international campuses.

The reports are available from the JMU Department of Police and Public Safety website at <http://www.jmu.edu/publicsafety/clerycompliance/righttoknow.shtml>.

You can obtain a copy of these reports by contacting:

Department of Police and Public Safety
James Madison University
821 South Main Street
MSC 6810
Harrisonburg, VA 22807

You can request that a copy be mailed to you by calling
(540) 568-6769/6913.

Notice of Non-Discrimination and Equal Opportunity

James Madison University does not discriminate on the basis of age, disability, race or color, national or ethnic origin, political affiliation or belief, religion, sex, sexual orientation, gender identity or expression, veteran status, parental status (including pregnancy), marital status, family medical or genetic information, in its employment, educational programs, activities, and admissions. JMU complies with all applicable federal and state laws regarding non-discrimination, affirmative action, and anti-harassment. The responsibility for overall coordination, monitoring and information dissemination about JMU's program of equal opportunity, non-discrimination, and affirmative action is assigned to the Office of Equal Opportunity. Inquiries or complaints may be directed to Office of Equal Opportunity:

James Robinson, Director
Office of Equal Opportunity
James Madison University
1017 Harrison Street, MSC 5802
Harrisonburg, VA 22807
(540) 568-6991
oeo@jmu.edu

JMU prohibits sexual and gender-based harassment including sexual assault and other forms of inter-personal violence. The responsibility for overall coordination, monitoring and information dissemination about JMU's Title IX program is assigned to

the Title IX Coordinator. Inquiries or complaints may be directed to the Title IX Coordinator:

Amy Sirocky-Meck
